ISSIIDIOLGY. Commentaries to the Fundamentals.

Volume fourteen

*Principals of the resonance of the structures
of Self-Consciousness*

Volume fourteen. Principals of the resonance of the structures of Self-Consciousness.

In this volume the author allows the reader to delve into the most subtle and complex, in terms of mechanisms of their manifestation, details of form-shaping synthesis processes of not only in three-dimensional range of Energy-Plasma, but also throughout the entire multidimensional energy-structure of the Universe. Every reader with an inquisitive mind and aspiration for knowledge will discover the secrets of physical laws of our material reality manifestation, as well as the mechanisms of gradually dimensional formation of inertial ranges of the Universe spatial-temporal structures. Conventionally comparing the dynamics of various forms of self-manifestation with the processes of fractal geometry formation, taking into account varying degrees of quality differentiation and the associated tension (dissonance) configuration, Oris, in an entirely new perspective describes the fundamental questions of science: mass formation, the phenomenon of gravitation, materialization mechanisms, relationship between matter and antimatter principles, and much more. In his own fashion, he describes the modern fundamental interaction theory, in particular, the physics' standard model and superstring theory, continuously comparing the modern scientific and iissiidiological worldviews. In volume 14, he reveals the essential basic understandings regarding the concept of dimensions that allow the reader to get the key perceptions for mastering the knowledge, depicted in "IISSIIDIOLOGY Fundamentals."

14.15551. The specifics of the illusory perception by Formo-Creators of “human individual” Self-Consciousness in our daily Life, offers us the inertial sequential view of events and occurrences in a form of a continuous process of changing of one type of qualitative conditions for another. However, any condition of any Form of Self-Consciousness, constantly being employed in an inertial synthesis processes of various Quality Aspects and incapable of demonstrating of any type of phenomenal manifestation within Space-Time outside of the synthesis dynamics of Formo-Creators, in correlation with an unlimited other qualitative conditions, is always slloogrent. The configuration of any type of Form, resonantly implemented or visually observed by Us in an outer Reality of various realization Forms, possesses of all the slloogrent characteristics, meaning it is potentially “projecting” of the synthesis movement of its Formo-Creators into the unlimited dynamics of all other Configurations of other Formo-Creators, manifested in both – less and more qualitative wave range of different dimensions. That is precisely what provides for the singular Nature of any “CAF” (Close Attention Focus) condition, which is manifested in a multi-polarized mode within skrruullerrt system by the Self-Consciousness of any type of Form simultaneously towards all possible Synthesis Directions upon every single rotational Shift.

14.15552. For instance, the Conscious Fields of Formo-Creators of the same sub-elementary particles, structuring with their Configurations all types of Realities of doolls range, are simultaneously being manifested by their more qualitative slloogrent conditions within our groups of Space-Time Continuums (SC’s) as elementary particles, but within wave ranges of ФЛІАКC groups of SC – equally and simultaneously throughout all possible Synthesis Directions – The same Conscious Fields are manifested by means of even more qualitative states of Formo-Creators of the super-universal particles. That slloogrent movement of altered states is being manifested throughout all the Eternity of all possible manifestations of Forms through even more advanced attributes of the universal proto- and hyper particles, while inertially “projecting” into completely different of their Configurations, which accumulate Energy-Information (synthesized Experience) of all the unity of universal attributes of various Forms of manifestation of these Conscious Fields. They are being specifically reflected through the dynamics of Formo-Creators of the Secondary and Primary Energy-Plasma, and farther – through the Creative Activity of Super-Universal Creators, all the way until they reach Collegial Cosmic Intellects of Super-Universal Totality (Universum = multiple Conversums).

14.15553. Any level of manifestation within Form-Systems of inertial and conditionally inertial (super-temporal) processes of inner-aspect, inter-aspect and inter-quality Synthesis, is slloogrent in its potential dynamics, since during the same exact instance of its observance by us, it is being manifested in a multi-qualitative mode not only throughout all possible Directions of all possible type of Synthesis, but also throughout all possible dimensions of Energy-Plasma, beginning from Its conditional state of $10^{-100000000}$... dimension, all the way to Its equally conditional state of $10^{+100000000}$... dimension. The inertial degree, with which we perceive a specific dynamics of any Form of the outer Reality (from the global “Nature manifestations” and Cosmos all the way down to bosons and fermions), in fact isn’t being real or objective (meaning – it isn’t being as such, which supposedly actually exists within the current resonant point of Space-Time), but is rather being an illusion, formed by our Perception system. It is subjectively and sequentially formed by Formo-Creators of our Self-Consciousness depending on their limited capacities and capabilities towards perception of the specific movement of Forms manifestation, inherent to the current duvuyllerrt Reality group, structuring with its subjective “human” CФУУРММ (SFUURMM)-Forms the current group of “human” Continuums, where Self-Consciousness CAF-DRF-dynamics of HУУ-BBY (NUU-VVU)-Configurations, which We currently focus within, is manifested.

14.15554. “Current” You explicitly and discretely perceive yourselves as being “here and now” in a current point of Space-Time in this given state and Form, because the Formo-Creators Configurations, which form all the realization activity of your Self-Consciousness, yet aren’t capable of utilizing a more complex mechanisms of parallel perception by “you” of “yourselves” at this time, at a very different frequency range conditions as well as very different qualitative manifestation of Creative Activity. Depending on qualitative degree of this realization activity these Forms of “you” can, more or less differ from what you can see in the mirror in your subjective “current time, now”; however, all of them – are in fact “you”, or rather, some of the mutual slloogrent part of Your Self-Consciousness (Sub-consciousness, Super-consciousness and so on), each Form of which is capable of manifesting itself only within its own “here and now”, in some type of duvuyllerrt groups of multi-qualitative and multidirectional Continuums.

14.15555. What you currently perceive as your “current now” – is an energy-informational “projection” onto the TES-“unfolding” dynamics of your Self-Consciousness by the cumulative Creative Activity of such duvuyllerrt group of SC’s, within which your “currently” in-focused “individuals” are manifested, and which supposedly “surrounds” Configurations of Formo-Creators of your Self-Consciousness with the specific “geometry” of Configurations of all types of its Forms. Again: we are talking about a group of SC’s! Therefore, neither I, nor anyone else is capable of precisely and unambiguously determine as to where exactly is the Continuum, where a moment ago you had revealed, and in which other SC, from the immense number of them, “you”, will be revealed by your reactions towards the outer Reality, owing to the dynamics of your mentally-psychic self-expression. This is so, due to the fact that all of this – is a sheer Illusion and a complete subjectivism; it is something, that doesn’t factually exist, but nevertheless, which presents itself to every one of us as being “the most real” of all!

QUESTION: If we talk about “current ourselves”, what type of synthesis occurs within our Self-Consciousness – slloogrent or inertial?

14.15556. Dear Ormala, any type of process, generated by our Self-Consciousness I would call slloogrent in its inertial movement. Why? Because slloogrent diversity is introduced within skrruullerrt system of Energy-Plasma by duvuyllerrtly-interchanging qualitative (informational) states of absolutely all Forms, structuring the Energy of Space (it’s Creative Potential). Inertia is introduced in the same skrruullerrt system by the resonant movement of Information, which in turn structures not only all Space Forms, but also simultaneously “projected” into the specific ether structures of Time. One without another (Energy and Information) isn’t capable to be manifested or somehow revealed Itself: any manifestation of Information dynamics implies the availability of at least some of the energy potential, which would insure such manifestation. Therefore, neither Space nor Time exists alone; only their collective state of existence together is possible in a form of Space-Time – an inertial condition, allowing each “point” of Time to resonantly reveal itself in a specific, inherent only to that “point”, general slloogrent activity of Energy-Plasma (in other words – every “point” of slloogrent dynamics of Space corresponds with its own “point” of Time).

14.15557. And what is the realizational mechanism of the inertial movement of the simultaneous manifestation of all Forms within Space-Time? It is the slloogrent dynamics of the UCF of Form-Creator Configurations, structuring all possible Levels of Energy-Plasma from $10^{-100000000}$... dimension, to $10^{+100000000}$... dimension, which within 3-4-dimensional wave range of Form manifestation is interpreted

by us as the dynamics of CAF-DRF of Formo-Creators of an “individual” Self-Consciousness; in the 4-5-dimensional wave range – as ФИМН-УМПН-dynamics of the collective Sub-Consciousness of “plasma” analogs of НУУ-ВВУ (NUU-VVU)-Form-Types and so on. All constantly changing “geometry” of the outer actuality is built on the basis of the individual dynamics of all multitudes of Form-Creator Focuses of the “individual” Self-Consciousness. Throughout different “points” of inertia of SC, in each out of multitude of possible development Directions, “you” perceive “yourself” and all other “human beings”, animals, plants and occurrences of nature completely differently; you make totally different choices, and all that – are subjective results of the simultaneous inertia of the “individual” Self-Consciousness of the in-focused НУУ-ВВУ (NUU-VVU)-Form-Types, where you currently focus.

14.15558. Thus, it is possible to predicate, that any degree of the manifested Perception inertia is actually a subjective reflection of an objective state of slloogrent infinity in a movement of Time. The perception degree (ability) of any qualitative “parts” (states) of this slloogrent activity – is in fact a factual capability indicator of Creative Activity of Formo-Creators of currently manifested Form. For instance, all of what I am currently (in my subjective “now”) experiencing, perceiving and imagining, differs completely from your “individual” experience, Perception and imagination, since the Perception mechanisms of the НУУ-ВВУ (NUU-VVU)-Configurations, which you “currently” focus upon, yet didn’t reach these Levels of slloogrent dynamics, which are common for my Self-Consciousness Formo-Creators. Once you gradually elevate the quality of your Perception, the Levels of more qualitative states of your simultaneous development will become more accessible and natural.

14.15559. We can talk about the inertia of the synthesis processes of any type only from the position of our constantly qualitative change of our subjective perception of any of these processes on the basis of comparison of his dynamics with “projections” of СФУУРММ (SFUURMM)-Forms of Formo-Creators, which at the moment are most active within our Self-Consciousness. At the ever-increasing of their “objective degree” (meaning at the increasing of complexity of their inter-quality Synthesis) our Perception becomes more accustomed to deeper Levels of mutual slloogrent activity of Karma-Form Configurations of Space-Time. It becomes impossible to anyhow observe more objective dynamics of realization Forms of various Collective Cosmic Intellects throughout every type of subjective Reality of 3-4-dimensional wave range, since ВВУ(ВВУ)-Configurations of the СФУУРММ (SFUURMM)-Forms “projections” themselves, which are being “projected” by Form Creators into an information space of Self-Consciousness during a process of TES-“unfolding”, do not belong to the more objective Levels of the global slloogrent activity and aren’t capable of identifying manifestation Forms of a more objective Energy-Information into a outer Reality without the subjectivism, which is inherent to them.

14.15560. For example, an ant, crawling on your hand subjectively perceives its surface as basically the same way as other animals, trees, rocks and other hard objects. But for us all the differences between these items are obvious and real! The same happens here - the Perception systems of Self-Consciousness of your “currently” in-focused “individuals” aren’t capable of differentiating between more objective dynamics of realizational Collective Intellect Forms of Planetary and Stellar Entities, and these primitive and subjective Perceptions, which you presume under these familiar terms, such as “Earth”, “Moon”, “Jupiter”, “Sun”, “black holes”, “quasars”, “neutron stars” and so on. From the more qualitative system Perception Levels of Yourselves, but in a form of ФЛИАК (FLUX)-Creators, the tremendous difference between various “parts” of slloogrent Configurations of, supposedly,

“exactly the same” Perceptions, becomes as evident, as a difference between our bodies and an airplane, Elbrus mountain and the Hudson River.

14.15561. Therefore, in our, as well as other types of subjective Realities it is impossible to consciously observe and objectively analyze any of the synthesis processes, since we only deal with “projections” of more qualitative states of slloogrent Configurations of Formo-Creators, greatly limited by the specific conditions of various Form manifestations within our in-focused Realities. The “projections” of СФУУРММ (SFUURMM)-Forms, which we utilize, are in fact intermediate results of our subjective reactions towards some external ongoing action. Formo-Creators, СЛЮИ-И-СЛЮУ (SLUI-SLUU)-Creators – are not The Creators of Energy-Plasma, but rather their multi-qualitative “projections”, “unfolding” into the specific synthesis movement of the particular Levels of information space of Self-Consciousness (Sub-Consciousness, Super-Consciousness, and so on).

14.15562. However, their slloogrent principal remains: in their primordial slloogrent state, absolutely all Levels of multi-qualitative dynamics of Creative Activity of the Tertiary Energy-Plasma (from within ± 12 to 0-dimensions) are completely synthesized (only for the current state of Collective Intellects!), while the specific synthesis dynamics, inherent to the realizational Forms of any dimension type, regardless of the principal schema of the individual Aspect Synthesis of various Cosmic Qualities (for instance, within 3-4-dimensional wave range it will be all the variants of “pairwise” interrelationships, regardless of the background ones!; in 4-5-dimensional range it will be all possible types of “Tertiary” interrelationships, and so on), have a tendency of being revealed only with the assistance of special inertial “mechanisms”, which structure by their specific dynamisms any of the realizational Levels of Collective Intellects of the Tertiary wave range: Proto-Form or Instinct Consciousness, “individual” Self-Consciousness, collective Sub-Consciousness, collective Over-Consciousness and the collective Super-Consciousness.

14.15563. That means, that for the “projections” Formo-Creators of Collective Intellects of each of the Energy-Plasma Levels, any inertial dynamics of Formo-Creators of Forms, structuring all of the “above positioned” and “below positioned” dimension wave ranges simply, presumably, DOESN'T EXIST! On one hand, all of the Form-Creator Configurations, structuring the dynamics of “lesser” dimensions, formed with the conditional lesser “amount” of fully synthesized Aspects of Pure Qualities, inertially (sequentially, gradually, resonantly) are “projected” (through VEC and TES dynamics) into all possible Vectors of Synthesis of a more universal dynamics of Configurations of all twelve Pure Cosmic Qualities. On the other hand, all the СЛЮИ-СЛЮУ (SLUI-SLUU)-Creator Configurations, structuring the dynamics of each of the “higher” dimension wave ranges, slloogrently are being “projected by the “karma-fractions” (СФУУРММ (SFUURMM)-Forms) of the primordially inherent to them Experience into all possible Vectors of Synthesis, which are structured by the less qualitative Configurations, all the way until 0-1-dimensional wave range! And let me remind you, that both of these inertial processes are being executed simultaneously!

14.15564. Every single Cosmic OO-VY-Entity, which are “projected” by OVER-Universe CCC-Ю-ИЙЙ-ЙЙ-CCC-Entitys into Space-Time of the current Universe Entity and which represent in Its Highest Collegial Intellect the slloogrent dynamics of Formo-Creators of some types of Aspects of Pure Qualities, is structured by “emanations” and “psyche” types, inherent only to this OO-VY-Entity. “Emanations” and “psyche” belonging to a certain Pure Quality, reflect some distinctive inherentities of energy-informational interconnections, which are primordially specifically formed in Configurations of only Formo-Creators of Aspects of this Quality in the distinctive, inherent

only to them resonant manner, which doesn't allow them to be revealed separately, but allows the "coupled" interrelation – under certain conditions – with other types of "emanations" and "psyche" of Aspects of other Pure Qualities. Relatively this can be compared with "dipolar" phenomena of water molecules or with valent formation principal between atoms of different chemical components. For ease of your Understanding I have subjectively portrayed it as two, simultaneously manifested states through different Consciousness Forms, one of which ("emanations") is associated by most "people" to a greater degree with Perceptions of mentality and thinking process, while the second – with sensuousness and vitality.

14.15565. Every type of "emanation" resonantly corresponds to the specific type of "psyche". In their most primitive states – 0-1-dimension wave range of the Tertiary Energy-Plasma, the inherentities of their energy-informational interrelationships between themselves do not depend on Vector of their inter-aspect Synthesis, since the very proto-form Vectors of development of ГООЛ-ЛГАМАА-А (GOOLGAMAA-A) in this dimension wave range aren't formed yet. The differences begin to be established later, depending on types of Combinations, in which these "emanations" and "psyche" commence their resonant interrelationships, revealing in a form of the specific СФУРММ (SFUURMM)-Form Conglomerates.

14.15566. All the way until 4-5-dimensional wave range of Form-Systems, they can be revealed only through the synthesis dynamics of Formo-Creators of various Forms of Consciousness: sub-elementary, elementary and partially super-universal particles, which structure Conscious Forms of all atoms, molecules and cells of the outer "materiality". There is also a larger number of more complex diversity of Formo-Creators of these Forms: animal, "human" and floral Forms; however, soon, when the high-tech equipment of superb-precision will be able to determine the reactions of various minerals towards physical and even psychic influence, the scientists will discover "mineral", "polymer", "metallic" and also complex-hybrid Forms of Consciousness of "inanimate objects".

14.15567. The inertial synthesis of various "karmanations" also takes place with the participation of Formo-Creators. Slloogrent BBY(VVU)-Configurations of Formo-Creators of each of the Pure Qualities primordially possess the ability to synthesize the specific Configurations of Conscious Forms and inherent to them dynamisms, in a corresponding, identical to their qualitative degree, Levels of Energy-Plasma. They don't form, but rather resonantly attract ("decompress", "unfold" within the informational space of Self-Consciousness) these dynamisms, by the CAF-dynamics of their BBY(VVU)-Configurations from BBY(VVU)-Information, identical to their own vibrations, but remaining in a specific super-temporal state of realizational "niches" and creative Spheres of ODS. "From there" Formo-Creators resonantly activate the inherent to them BBY(VVU)-Information, and "project" it (subjectively "revealing" it) through the inertial dynamics of Focuses of Self-Consciousness into corresponding "parts" of the global slloogrent activity of Space-Time.

14.15568. Meaning that it is of no importance to them whether this information belongs to "ten million years ago, or ten million years into the future", they have no idea about such details; all they do is simply attract towards TES-"unfolding" process only certain СФУРММ (SFUURMM)-Forms, which completely resonates with some part of global Configuration of the current "individual". Thus, their "unfolding" process can also attract even such "parts" of slloogrent BBY(VVU)-Information, which belongs to totally different Continuums, and other Time Fluxes. The multitude of Formo-Creators of various Continuum groups react very differently (individually) towards the same type of Information, which results in a formation of very different (subjective) Perceptions throughout

various Sensing systems of various Conscious Forms. Therefore, the “quantizing” (“clex”) dynamics of a single piece of Information by Formo-Creators of our Conscious Forms can differ greatly from the similar reaction of Sub-Consciousness ФЛІАКС-Creators, for instance.

14.15569. Not all the Information of various Vectors of Synthesis, which is resonantly attracted towards various types of Formo-Creators, is compatible with the quality of Conscious Forms of the multitude of other ContinYUm groups, which structure the “same” part of skrrYlIerrt system. Every group of Formo-Creators of Self-Consciousness of various ContinYUms corresponds only to the specific type of СФУУРММ (SFUURMM)-Forms, which are being “decompressed” from the global slloogrent dynamics of Information, while the nature of Formo-Creators of each type is to individually (specifically, configurationally) reflect, out all the Information diversity, belonging not only to the ODS, but also to ФЛУУ-ЛУУ (FLUU-LUU)-complexes, different parts of Information in a multi-polarized dynamics of all the Vectors of the rotational Shift. Revealing in the groups of ContinYUms by means of resonant-multi-polarized “projections” of their Focuses at the moment of each rotational Shift (“quantum shift” of Energy-Plasma within the informational space of Self-Consciousness) they structure the inherent to them ContinYUm groups by all the multitude of the multi-qualitative СФУУРММ (SFUURMM)-Forms, which they attract from the ODS, and reflect throughout all the multidirectional dynamics of Form-Systems by completely different synthesis attributes, which initiate various cause-consequence interrelationships between the Conscious Forms, which they manifest.

14.15570. Taking into account the slloogrent principal, it is possible to state, that a single Stereo-Form (Form-Type) - is as slloogrent manifestation within Space-Time of the complex-configurational dynamics of supposedly “single quintEntity individual”, a Self-Consciousness (actually – the collective Consciousness) of which is multi-polarized through the infinite number of its own Interpretations, which are all simultaneously revealed by the individual “projections” of the global (for all of them) slloogrent HYU-BBY (NUU-VVU)-Configuration throughout a vast diversity of duvuyllerrt groups of ContinYUms and Form-Systems of Realities. The Stereo-Form has absolutely no idea that it is divided into such incredibly large amount of multi-qualitative “individual” interpretations: it perceives “its own” infinite Existence only throughout all its simultaneous inertial dynamics of all its Stereo-Types, and it is simply unaware of various subjective conditions, which every one of its Interpretations is experiencing. Just like you, when you don’t keep track every second of all the activity of your biological body’s Formo-Creators! It’s simply impossible. You keep to yourself (with all your concerns and Desires), while they are, supposedly, separated from you – keep to their biochemical problems and issues. In fact, every single Stereo-Form (or Form-Type) of ЛЛУУ-BBY (LLUU-VVU) to a higher degree Self-Consciously is revealing itself through Configurations of СТООЛЛІМІІ-СВУУ- (STOOLLMI-SVUU) and УОЛДМІІ-СЛІІ (UOLDMII-SLII)-Formo-Creators of the highest Levels of the collective Super- Consciousness.

14.15571. Our Consciousness Formo-Creators are changing the duvuyllerrt ContinYUm groups by their CAF-DRF-dynamics at every instant, while being maximally resonant with their BBY(VVU)-Configurations. They focus within each group only because they “experience”, “think” and cognize “themselves” in each one of them, so that it correlates with a current ContinYUm group. At the same exact instance, some other part of slloogrent Configuration of the same Formo-Creators is “projected” into other groups, structured by other Conscious Forms, general Configurations of which allow them to experience “themselves” in a slightly different fashion, with a bit different creative realization.

14.15572. Why do they actually require any type of realization at all? Because any type of realization – is a chance of a deeper synthesis of some of the sub-levels of their Consciousness. Why do they need this more profound synthesis altogether? In order to neutralize within their Configurations of the existing tensions, stipulated by the certain dissonance distances, thus acquiring an opportunity for yet another “projection” of their Focuses into even more qualitative Forms, which structure even more harmonious groups of ContinYYms. Why there is a need to focus into a more qualitative Forms of Self-Consciousness? To be able to receive even more opportunities for the realizational Creation, which makes Self-Consciousness (Sub-Consciousness, Super-Consciousness) Synthesis even more insightful, which in turn will provide another opportunity of refocusing into yet more universal Forms of even more qualitative ContinYYm groups, for the realization within even more high-frequency Collective Intellect Levels!... And so on and so forth – infinitely and continuously advancing the manifestation degree of conscious dynamics of Creative Activity of Forms of your in-focusing.

14.15573. Formo-Creators of higher dimension Levels, are creating “their” realizational Forms in a less qualitative Levels of Energy-Plasma. Formo-Creators of 36th dimension aren’t able to know thoroughly (because of impossibility of resonating) about the exact actions of Formo-Creators of 3-4 dimension wave ranges; Formo-Creators of the Highest Intellect AYFAAR “don’t have a detailed Perception” regarding the precise movement, which takes place every inertial instant in every single one of Its infinite multidimensional variants, since this is the absolute highest (for this current Universal Entity) manifestation of the dynamics of the synthesis Creation. Therefore Formo-Creators Configuration of each type, except the primordially programmed into it the evolutionally-eglleroliftive tendencies (provided for the duvuyllerrt Principal) is also a generating source of the Energy-Information, ensuring (by the least qualitative manifestations) the dynamics of Formo-Creators of lower-frequency wave ranges.

14.15574. Everything, which We, as Formo-Creators of the collective sub-Consciousness, require for some of the lesser-qualitative form-creative process realizations, is revealed in complete detail on the levels of Self-Consciousness of Formo-Creators of bosons and fermions throughout all possible groups of simultaneously in-focused ContinYYms of 3-4-dimensions. And not a single one of us have inertially formed any of it (I am talking about a physical participation); instead all the necessary Energy-Information was duvuyllerrtly “projected” by Us (as Formo-Creators of our Sub-Consciousness) into the Configurations of Formo-Creators of a lower dimensional Levels, who have transformed it into Images they can comprehend and in turn “projected” it onto their own refocusing dynamics, reflecting their own interests – something, which they can resonate with the most.

14.15575. Formo-Creators do not actually create anything – absolutely everything already exists. It’s that their multi-qualitative CAF-dynamics of their slloogrent BBY(VVU)-Configurations is simultaneously structuring multi-polarized dynamics of the entire multitude of multi-directional rotational Shifts. The simultaneous inertial transmission is manifested through some “parts” of these Configurations into the corresponding Forms of Self-Consciousness (Sub-Consciousness, Super-Consciousness and so on) of various types of energy Potential (Formo-Creators “projections”), which momentarily initiates the activation in the ODS or FLC of the Information, which is totally in resonance with a current type of Energy-Plasma. As soon as the Energy – through the structures of Self-Consciousness – is revealed in a single rotational Shift (that happens instantly), at the same moment it becomes a synthesized Energy-Plasma, which in turn is initiating the next consequent “quantum shift” of CAF-DRF-dynamics of Formo-Creators throughout all possible Self-Consciousness Forms, structuring of all the wave “geometry” of current “part” of slloogrent Space-Time.

14.15576. That principal can be utilized in the process of conscious influence of refocusing process into Configurations of manifestation Forms of your interest. You don't really have to reveal yourselves in Space-Time of some highly-organized synthesized Form-Entity of 7th, 8th or even 10th dimension – all you have to do is to thoroughly cognize the IISSIIDIOLOGY, so that you could meticulously, sequentially and consciously elevate the degree of the dynamics of CAF of your Self-Consciousness; that will allow you (regardless of the Formo-Creators activity of first two IISSIIDII-centers) to design “for yourself”, within current Form-System, of virtually any Configuration of your preference and immediately reveal yourself through its Form. Only problem is – you don't believe, that bosons and fermions Formo-Creators – are actually “current” YOU, and that Formo-Creators of luxes, gluons, tachyons and a multitude of other super-universal particles – YOU in the near “future”.

14.15577. Oh no, instead you want to touch, see and probe of literally “every single” Form-Creator, so that you could be convinced in its “sanity”, and that it is “just as smart as you are”. Only then you would “evenly” communicate to it and trust it! But seriously, everything that you perceive as “yourselves” and which you see around you – is in fact a certain manifestations of multi-qualitative dynamics of wave structures, resembling in a Space-Time of the specifically streamlined wave states (“standing waves” in physics terms), formed by some kind of Energy carriers (Form Creators) and some type of Information (СЛУИ-СЛУУ (SLUI-SLUU)-Creators). Universal 3-4-dimensional Levels of manifestation are organized by ФЛАКС (FLUX)-Creators of super-universal particles, while their structure aspect is formed by their “projections” – elementary particles Formo-Creators. Both of these are, in fact – YOU, however, on a much higher qualitative – “transpersonal” Levels of Your manifestation in a form of Formo-Creators of all possible Realities and Form systems of 3-4-dimensional wave range.

14.15578. Then what maintains all the multi-qualitative energy-informational interrelationships between Formo-Creators of various Levels and sub-levels, you may ask? Well, the super-temporal dynamics of СЛУИ-СЛУУ (SLUI-SLUU)-Creators, which is simultaneously manifested through all the slloogrent activity of TES and VEC-FLUXs of Energy-Information, primordially programmed into each and every one of the synthesized Levels of Energy-Plasma. Moreover, all these super-temporal energy-informational interrelationships between realizational Proto-Forms and Collective Intellects of Formo-Creators of various dimensional Levels, is implemented with the assistance of the universal system of their (СЛУИ-СЛУУ (SLUI-SLUU)) frequency focus of “self-projection” (through the UFS) into the “part” of the global slloogrent dynamics, where the resonant effect of duvuyllerrt manifestation of Creative Activity (simultaneously throughout all the Synthesis Vectors!), emerging in the Configurations of all realizational Forms of current Collective Intellect, primordially “exists”.

14.15579. I see, that many of you haven't thought about the Entity of an inertial Process of multilateral multi-qualitative synthesis of Energy-Plasma. We'll talk about a bit later; instead let me draw your attention to the fact, that slloogrent Process, implemented by Formo-Creators at every inertial step of Synthesis, leaves intact every single Aspect of any of the Pure Qualities, employed in synthesis activity, with all of their inherited unique properties – the state of synthesis with Configurations of other Aspects of the same Quality or, with Configuration Aspects of the rest of the eleven Pure Qualities, allows these properties to be revealed in a more distinctive way throughout any of the “consequent” dimensional Levels of Energy-Plasma.

14.15580. This process can be approximately compared with the learning process in college: first, your Perceptions regarding something are being very superficial, but when you accumulate more information and reach more and more in-depth Perceptions, your knowledge about the subject

becomes very profound. Same happens here – you, as a Stereo-Form of the slloogrent manifestation of your JJYY-BBY (LLUU-VVU), don't actually change “externally” while your Self-Consciousness Formo-Creators accumulate, throughout all the wave ranges of your manifestation, an extensive amount of knowledge, however, your interrelationship with “your inner self” and the outer Reality, become more universal, profound and harmonized as a result of that accumulation. You always remain “yourself”, but “your” self-perceptions change accordingly upon reaching of more qualitative Levels of manifestation.

14.15581. In order to analyze the dynamic implementation processes of Form Creators of the Collective Intellects within the Tertiary Energy-Plasma in a more thorough and insightful manner, we should introduce the conditional term as “the observer”, who supposedly oversees the inertial Synthesis processes from “aside” (through the focusing in VEC-dynamics), which are taking place within TES-unfolding dynamics of each of the Karma-Forms (and not only HYB-BBY (NUU-VVU)). I also want you to schematically imagine narrow dimensional, “supposedly separated” wave ranges (non-existing in reality), into the dynamics of which I will “project” also non-existing monotype mechanisms of “karma-form” Synthesis.

14.15582. Similar manipulation can be compared with actions of a scientist-microbiologist, who makes reiterative microscopic sections of the prototype live cell in effort to reconstruct its original bioprocesses. So, I will perform similar microscopic “instantaneous cuts” within Energy-Plasma and show you some imagery and some processes, non-existing in that mode in reality. This is done to ease the process of your Understanding of synthesis mechanisms within Karma-Plasma; so that you would clearly see acquire the basic Knowledge in regards to this type of dynamism, which your Self-Consciousness Formo-Creators simply don't yet possess.

14.15583. At a more scrupulous viewing of inertial Synthesis processes, taking place within 0-1-dimensional wave range, we would see the sequentially synthesizing with each other sub-Aspects of each out of the infinite number of Aspects of every out of twelve Pure Qualities. Consequently, the universal slloogrent “point” of 0-1-dimensional wave range of skrrYYllerrt system of Energy-Plasma is structured by the general multi-polarized dynamics of all the multitude of multi-qualitative resonant zones, formed by the force interrelationships between sub-Aspects “inside” of each of the multitude Aspects of each out of all twelve Qualities. General inertial processes of every one of these resonant zones potentially are directed only towards the comprehensive interrelationship between the infinity of sub-Aspects of its own Quality Aspect, and not with any sub-Aspect of any other Pure Quality.

14.15584. These narrow-specific qualitative conditions, which we, as “observers” can subjectively witness within current wave range, isn't actually a “beginning” of anything (like Tertiary Energy-Plasma), but instead they represent only intermediate results of much more profound and inertial inside of sub-...-sub-Aspect synthesis processes, which are being simultaneously manifested throughout the multi-billion-dimensional Levels, EVEN BEFORE Formo-Creators of my Super-Consciousness will get a slightest chance to differentiate (from VEC) this synthesis dynamics between Formo-Creators of every sub-Aspects, every sub-sub-Aspects and every sub-...-sub-Aspects, structuring each Aspect of every single Pure Quality.

14.15585. Meaning, that a 0-1-dimensional wave range - is only one billionth of the infinite dimensional transformations, taking place in an Energy-Plasma before the conditional “reference

point”, designated by me, and which I subjectively have denominated as 0, since everything, taking place within slloogrent Space-Time dynamics beyond its conditional “limits”, isn’t in any way explicable by Formo-Creators of my in-focused Forms; meaning, it’s not at all comprehensible for any of the JJYY-BBY (LLUU-VVU)-Forms. However, even though we aren’t yet able to comprehend of this type of dynamics, this part of the global Synthesis process doesn’t cease to exist within the Universe, and therefore will someday be accessible to our Understanding.

14.15586. Upon the shifting of Our CAF-DRF-dynamics (Us in a form of conditional VEC-Observers of inertial processes) into areas of greater “density” (inter- confluence) of force interrelationships, simultaneously manifested in every resonant zone, we can see (within 0-2-dimensional wave range) the sequential formation of general creative movement of Conscious Fields of a single general Conglomerate – the Aspect of the same Pure Quality. There are not hundreds of thousands, not millions, but unlimited number of such Aspects, narrow-specifically manifested by Formo-Creators of various Proto-Forms within current wave range of Energy-Plasma! Few thousand of these, which could become a subject to a subjective comparison interpretation by the Self-Consciousness of Formo-Creators of biological analogs of JJYY-BBY (LLUU-VVU)-Forms, are in fact accounting for no more than a fraction of percentage out their total volume.

14.15587. You should bear in mind, that all the former sub-...-sub-aspect synthesis interrelationships, which were formed in millions of dimensions before the conditional subjective zero-reading of the dimension indication mode, aren’t disappearing anywhere and aren’t transforming into any new properties (factually they aren’t new properties, but new realizational possibilities!), which can be acquired as a result of the formation of a greater unity of scattered (on a lower Levels of Self-Consciousness) creative efforts of Conscious Fields. Because of their collective activity on the level of sub-Aspects in each of the wave ranges, formed by them of every Vector of development of current slloogrent “part” of skrrYYllerrt system.

14.15588. Each resonant zone in 0-1-dimensional wave range (as within any other wave range) is actually a proto-analog of Synthesis scheme, inherent for the particular type of Proto-Form. In other words – there are tremendous amount of proto-form (including “human kind”) Synthesis Vectors, being originated within 0-1-dimensional wave range (from the point of view of our Formo-Creators!). These Proto-Forms transmute in a higher – deeply-synthesized- dimensional wave ranges - within the more qualitative dynamics of slloogrent informational Fluxes, which are being “decompressed” within the informational space of Self-Consciousness (Sub-Consciousness, Super-Consciousness and so on) of various realizational Forms of different types of Collective Intellects, and provide the energy-informational basis for the implementation of a more complicated Synthesis schemes between dominant Qualities of different Vectors, by Formo-Creators of each of more qualitative Levels.

14.15589. Further, as the level of dimension rises within wave ranges of each of resonant zones, the more favorable creative conditions are formed for the interaction between various Conscious Fields, structuring duvuyllerrt (simultaneously throughout different Vectors of synthesis) Aspects of their own Quality. By engaging in a more and more active and dense interrelationships within each other, they form the possibilities for the formation of multi-qualitative dynamics of all the multitude of inter-aspect resonant zones of the same Quality “inside” of the distinctive dynamics of sub-aspect resonant zones. Such specific “creative zones” (within the same frequency!) are synthesisally formed throughout all infinite duvuyllerrt Aspect groups of each of the twelve Pure Qualities. That’s what I conditionally imply under 1-2-dimensional dynamics of Formo-Creators of Energy-Plasma.

14.15590. Once again I wish to draw your attention to the fact, that all the “self-sustained” (with all of their primordial attributes intact!) interconnection dynamics are formed between sub-Aspects of each of the Aspects of each of the Pure Qualities within these inter-aspect energy-informational interrelationships. It’s essential to understand that inside-aspect, inter-aspect and inter-quality “blending” isn’t happening within the slloogrent Configuration of Formo-Creators of any Level of Consciousness. Not a single sub-Aspect or Aspect loses its primordial (primeval, inherent to its OO-VY-Entity) Configuration; in fact, with the assistance of the resonant amplification of its vibrations, they actually gain a lot of additional opportunities for yet more and more energy-informational interrelationships! Therefore, the frequency of all the Realities, manifested within 2-3-dimensional wave range, is formed by the energy-informational interconnections between Form-Creator Configurations of the infinite number of multi-qualitative resonant zones, each of which is structured by the specific force interrelationship between non-duvuyllerrt Aspects, belonging to any of the twelve Pure Qualities. The inertial dynamics of 2-3-dimensional wave range of Energy-Plasma is formed by the resonant manifestations of the Creative Activity within these single-quality Aspects (simultaneously throughout different synthesis Vectors!).

14.15591. But, along with this conditional process, “inside” of each of the resonant zones, structured by the Conscious Fields of Aspects of one out of twelve Pure Qualities, the specific conditions are formed, which offer to some of the inter-aspect combinations of Formo-Creators the new opportunities for the creative resonant interaction with Conscious Fields of resonant zones, representing the inherentities of every single one out of other eleven Pure Qualities. Hence, within the corresponding wave ranges (simultaneously throughout all the possible Directions of synthesis) the energy-informational interrelationships between the most “compatible” Aspects of various Qualities are inertially formed and implemented, which is typical for the 3-4-dimensional Levels of Energy-Plasma.

14.15592. Let me repeat again – “inside” of each of such resonant zones, formed by Aspects of two Qualities, all the narrow-specific, inner-aspect and inter-aspect dynamic of Formo-Creators fully remains the same (along both interconnected parties) - not a single “psychism” or “emanation”, participating in the process of synthesis, changes its original primordial Configuration; instead, it is harmonically interposes into the general synthesis dynamics of the rest of the Conscious Fields, which structure both Aspects - the self and another Pure Quality. That resonant unity of collective efforts of multi-qualitative duvuyllerrt groups of various Conscious Fields, is in fact the main reason for the existence within 3-4-dimensional wave range, of the unique opportunities, which tremendously differ it from the attributes of 0-1, 1-2 and 2-3-dimensional wave ranges, and where “karma-forms” are being constructed differently (instead of creating of something totally new) as a result of such synthesis unity.

14.15593. Then what is taking place within even deeper Levels of inter-quality Synthesis? The resonant dynamics of the coupled groups of Quality Aspects, belonging to different Qualities, creates favorable conditions for the emerging within the corresponding wave ranges of more and more new opportunities for the creative interrelation of each of the infinite number of inter-quality resonant zones with Form-Creator Configurations of Aspect groups (simultaneously throughout all the Vectors of Development) of some other Quality, mostly “compatible” with an already formed condition.

14.15594. Thereby, the unique attributes of Conscious Fields of 0-1-dimension Level of the general slloogrent dynamics of Energy-Plasma, respectively united with each other, form

1-3-dimensional and 3-4-dimensional Levels of the self-manifestation; while within Levels of even greater catholicity and versatility of resonant interrelationships, they possess absolutely new, extraordinary abilities for the creative self-expression within Form-Systems, which I subjectively define as 4-5-dimensional Realities. Next, (from the position of the subjective inertial Perception “observer”!) everything is unfolding along the familiar scenario: Form-Creator Configurations of 0-1, 1-3, 3-4 and 4-5-dimensional Levels are simultaneously resonantly united with each other along the various Synthesis Directions and form by their resonant dynamics of a completely new realizational opportunities, which are inherent for slloogrent Configurations of Formo-Creators of 5-6-dimensional Level.

14.15595. Note that all the Form-Creator Configurations, manifested within wave ranges from 0-5-dimension, simultaneously unite by way of increasing of the number of energy-informational interconnections – nothing is actually moving, “mixing” with anything, or “binding” with anything – it’s just that within each of the following wave ranges more and more favorable conditions are formed, so that some new interconnections can be revealed; these new interconnections integrate within themselves all of the previous Experience (informational multitude of a simpler “karma-fractions”) of all possible manifestations of current Proto-Form. Remember – the so-called “vertical” of Cosmic Creation simply doesn’t exist! Any example of increasing of the quality of any Self-Consciousness occurs only after Formo-Creators of this Consciousness acquire of a new possibilities for the extended resonant attraction of Energy-Information (Experience) from the Creative Spheres of other Proto-Forms, or another Vectors of development of JJIVY-BBY (LLUU-VVU), notably after the fact of the implication of Form-Creator Configurations of Aspects of some of the new Pure Qualities.

14.15596. From the CCJIOO-CC-CHAA (SSLOO-SS-SNAA)-Creators point of view, “observing” the Tertiary Karma-Plasma condition, while remaining outside of Its inertial dynamics, all the resonant zones are being in a “single place”, within a single singularity, therefore, as the density of energy-informational interconnections rises (meaning a complication of “geometric karma-fractions “), the process of inter-quality Synthesis of CAF-DRF-dynamics of Formo-Creators of all Forms of Self-Consciousness occurs not towards an imaginable “width”, “height”, or any “slantwise” manner, but rather “inside” of the global singularity, trying to envelop with its energy-informational interrelationships all the sub-Aspects of all of the Aspects of all of the Pure Qualities, thus consequently absorb in itself as much as possible of other Proto-Form Experience, which have already synthesized the inherent to them slloogrent parts of Energy-Plasma.

14.15597. The same goes for the GLOBAL Creative Activity of the Tertiary Energy-Plasma, where everything is consolidated and self-organized increasingly, throughout various multi-qualitative manifestations and inertially formed all of its consequent – 6-7, 7-8, 8-9, 9-10, 10-11, 11-12 and 12-13-dimensional qualitative wave ranges, within each of which (but in every case – individually!) the individual creation of Formo-Creators of Conscious Fields of absolutely all possible Levels is manifested simultaneously. Why all? Because, factually, there is nothing else exists besides the very “elementary”, primordial Conscious Fields (“emanations” and “psyche”), synthesized within each other in Form-Creator Configurations throughout all possible schemes of energy-informational interconnections of inherent to them “karma-forms”, within the Tertiary state of Energy-Plasma! Secondary state of Energy-Plasma, Creators of which WE ARE, is structured completely differently, commencing from the transitional 12-13-dimensional wave ranges.

14.15598. All the “higher” Levels of Tertiary Energy-Plasma are formed by the various – more and more complex – combinations of only their own synthesized (resonantly interconnected) slloogrent Configurations and of no one else’s, which, in fact, is responsible for the increasing of the individual realizational characteristics (upon the formation of any new type of such combination) of Formo-Creators, employed in the Synthesis process of current Levels! Let’s recall from the “IISSIIDIOLOGY” Fundamentals of what are the “emanations” and “psyche” is? Don’t you remember? If not, let me remind you, that they are the very “primary” realizational Forms of Cosmic OO-YY-Entities, Which we subjectively interpret as twelve Pure Cosmic Qualities. Conscious Fields of These Entities, uniting with each other (through the assistance of the corresponding Formo-Creators) in a very specific fashion by their Configurations, are structuring within a Secondary state of Energy-Plasma the super-universal Dynamics of twenty four Merged Cosmic Qualities (as I define them). The Specific Forms of the creative manifestation of these synthesized Conscious Fields within the wave ranges all the way through 24th dimension are in fact, These US, whom I always refer to in capitals - CCJIOO-CC-CHAA (SSLOO-SS-SNAA)-Form Creators, who simultaneously structure the Secondary and Tertiary slloogrent states of Energy-Plasma.

14.15599. Please perceive this description schematically and not literally, since I am trying to let your brain Formo-Creators at least some chance to differentiate something within this incredibly difficult configurational slloogrent dynamics of various Forms of the same Energy-Plasma. Don’t forget, that within 0-1-dimensional wave ranges, slloogrent Form Creator Configurations of sub-Aspects of various Aspects of Pure Qualities are differentiated in great sense onto the “separated” elementary Configurations, therefore Formo-Creators of these wave ranges are still very antagonistic towards any “alien” (in any way different from their own) Configurations, since they don’t have enough resonant interconnections with each other, even if these Configurations structure the exact same Aspect of the same Quality, but resonantly belong to the conditionally incompatible sub-Aspects.

14.155600. In order to better understand this, recall the example regarding the color flashlights that was described in the Volume 10 of the IISSIIDIOLOGY. The red flashlight isn’t able to comprehend the manipulation sense of the blue flashlight, no matter how “hard” he would strive to. And only after the fact of multiple pairwise unification (Synthesis) with duvuyllerrtly resembled colors of other flashlights, after the unlimited number of Self-Consciousness “inspirations” of single flashlight in its strive to understand other flashlights, where red becomes a bit orange and a bit yellow and green, and the blue one includes in its Configuration frequencies, inherent for the cyan, turquoise and green flashlights, - only then they all will reveal the mutual “resonant points of contact”, which are necessary for the organization of their recently amalgamated Creation activity (similar to the very delicate mending of diplomatic fences throughout the multi-qualitative “human” societies).

14.15601. As you may have guessed, the same takes place in a high-dimensional Levels, when all the processes of the inner-aspect (all the tints of light-green or all the tints of dark-green), inter-aspect (all the tints of green or all the tints of yellow) and partially inter-quality (blue + turquoise, turquoise + green, blue + turquoise + green) Synthesis will cease, and the Configuration of each of the two synthesis states of the revealed Forms (in their Entity – the new Qualities) will include in itself the mutual, inherent to both of them, Elements of Conscious Fields. If instead of colors (various parts of spectrum of the visible light) and their infinite number of tints, you will imply the diffusive Synthesis Vectors, simultaneously manifesting within current wave range throughout various Proto-Forms, then you will come close to the deep understanding of processes of inner-aspect and inter-aspect Synthesis, implemented concurrently within Formo-Creators Configurations of each of the twelve Pure Cosmic Qualities.

14.15602. The example with different flashlights greatly illustrates the illusion of the dimensional succession of the inertial movement of synthesis processes within each of the Development Vectors. Instead – everything behaves duvuyllerrtly. The 0-1-dimensional wave range, just as every other one, is structured by the infinite number of narrow-qualitative wave ranges, inside each of which, CCM-MYJIJC (SSMMULLS)-factor (which considers not only the degree of the general quality, but also the percentage ratio between the activity and the individual vibrations of Aspects of each Quality) has the least possible value for the particular frequency of Energy-Plasma.

14.15603. What does that mean? The duvuyllerrt Principal implies the gradual, step-by-step quantizing (qualitative change) by Formo-Creators of any “unfolding” BBY(VVU)-Information. Let’s assume for instance the total area of all countries of our Planet with 0-1-dimensional wave range of the creative manifestation of Conscious Fields of a single Aspect of any of the Pure Quality, and the “people”, living on these territories – with sub-Aspects, structuring current Aspect. If we gather them altogether (hypothetically) and instruct them all to commence their inter-communication, then who do you think will be able to acquire the maximum ability in establishing the immediate contact and mutual understanding with each other? That’s correct – these, who have more ties to each other.

14.15604. For instance, the Russian will easily communicate with Ukrainian, Belarus, Kazakh, Moldovan, Czech, Slovak and so on – with these, whose Self-Consciousness Configurations are formed with more or less similar CΦYYPMM (SFUURMM)-Forms. Just like an American will easily communicate with a Canadian, British, or Australian. The communication with a Pole, Czech or Hungarian for a Russian will be more difficult than with Ukrainian or Belarus because of difference in mentality and the language barrier. Just like for an American it will be a bit more difficult to communicate with an Australian or Jamaican. It will be even more difficult to establish point of contact with Chinese, Japanese, Peruvian or Indonesian, because of the tremendous difference between their cultural and even domestic CΦYYPMM (SFUURMM)-Forms. Relatively the same process of Synthesis is happening on the level of synthesis interrelations between various sub-Aspects of the same Aspect – the inertial process of energy-informational interconnection commences with duvuyllerrtly close with each other (whose structure belongs to the specific proto-form Synthesis scheme) sub-Aspects, creating slloogrent resonant zones into each of the multi-qualitative wave ranges from 0,0 to 0,1-dimension.

14.15605. Next, in a formation of the synthesis dynamics, within the wave ranges from 0, 1 to 0, 2-dimension, into the resonant interconnection enter slightly more duvuyllerrtly remote sub-Aspects, which form the resonant zones, characterized by the greater complexity of the synthesis dynamics between all the sub-Aspects. Later on, with increasing of dimensional synthesis dynamics, resonant zones are formed by even greater multi-qualitative (duvuyllerrtly more “remote”) sub-Aspects of a single Aspect, with the simultaneous increase of the quantity of sub-Aspects, participating in the Synthesis process. The important factor of the dimensional increase within resonant zones of 0-1-dimensional wave range is the degree of stability of “newly” forming “karma-forms”: within wave ranges of 0-0, 1-dimension the resonant zones play the role of some kind of “neutral territory” for the establishing of point of contact between sub-Aspects, but the closer to the Formo-Creators Configurations of 0, 9 – 1, 0-dimension wave ranges, the dynamics of the resonant zones can be described as the real opportunity for the establishing of the volatile interrelationship between the sub-Aspects.

14.15606. Note, that as the duvuyllerrt degree of dissonance (“remoteness”, qualitative difference) between “karma-fractions”, participating in the dynamics of a single resonant zone, rises (the CCM-

MYJJC (SSMMULLS)-indicator increase for the synthesized “karma-form”) it influences rising tension factor of the energy-informational intensity within Configurations of “newly” synthesized “karma-forms”. It is inevitable, because there is an increasing number of multi-qualitative “karma-form” Configurations, which are being attracted by Formo-Creators into the synthesis process dynamics within the wave range of a single resonant zone.

Upon the approaching of the critical extent of tension stringency, the probability of sub-aspect synthesis diminishes to a zero; the same radical difference of the outer Reality views can be observed, for instance, of an Eskimo Indian and a Thai.

14.15607. Thus, for each resonant zone of a single Aspect of each Pure Quality, there is a specific corresponding CCMMYJJC (SSMMULLS)-indicator, which regulates precisely the dissonance degree (duvuyllerrt “remoteness”), which is the critical border zone for Conscious Fields Formo-Creators of two interconnecting sub-Aspects, beyond which any synthesis inner-aspect processes are not possible. These energy-informational parameters represent something called “synthesis zone limit”, the value of which depends not only on interconnecting multi-qualitative within each other sub-Aspects, which are in turn are slloogrent “parts” of the single Aspect, but also on a Synthesis type degree, where the Configurations of every one of them partially employed. The rest of sub-Aspects, extending beyond the “synthesis limit zone” (very much of different frequency quality or belonging to the other Synthesis scheme) aren’t capable of participating in the current resonant zone activity and form another resonant zones.

14.15608. It is important to note, that “synthesis limit zone” has nothing to do with belonging of sub-Aspects to some single Aspect. What does that mean? If the resonant zone is structured by conditionally “marginal” sub-Aspects of a single Aspect, which duvuyllerrtly transitioning into the conditionally “marginal” sub-Aspects of the other (“neighbor”) Aspect, then the “synthesis limit zone” wouldn’t stop between these Aspects, and will attract sub-Aspects of other Aspects into the dynamics of such diffusive resonant zone. What does that mean? Let’s review all the dynamics of the infinite aggregation of sub-Aspects of all Quality Aspects from another angle. Can it be said that on the 0-1-dimensional level, “right here” the inner-aspect dynamics of the synthesis manifestation of some single Aspect ceases to exist and immediately begins the manifestation of the specific creative dynamics of “other” Aspect; or that within some “spot” of Space-Time the dynamics of a single Quality ceases to exist and that the dynamics of other Quality commences? Of cause not – all of the cosmic OO-YY-Entitys, including absolutely every single Configuration of Conscious Fields, which they structure, are duvuyllerrt and slloogrent by Their Nature.

14.15609. If we review all the multitude of all the sub-Aspects of Aspect “A”, and compare it with another, duvuyllerrtly close multitude of all the sub-Aspects of Aspect “B”, which belong to a single Quality, we will discover, that there is absolutely no boundaries exist anywhere between them; there are absolutely no border Elements, and their existence is simply impossible! Only due to the specifics of our subjective proto-form system of perception, can we define one duvuyllerrt group of sub-Aspects (conditionally for us!) as belonging to Aspect “A”, while the other duvuyllerrt group - as belonging to the Aspect “B”. At the same time within “A” group will always be the diffusive sub-Aspects, which are to lesser degree (towards the other Elements of Aspect of the group “A”) express the attributes of Energy-Plasma, inherent for that group; and in a noticeably larger degree they express the attributes of Aspect “B” group. There are also some Aspects, which are evenly expressing the attributes of both groups, so we would have to apportion them accordingly.

14.15610. Such method of isolation of Aspects (association of sub-Aspects into groups) can be implemented not within the dynamics of Energy-Plasma itself, but only within the limited system of our subjective Perception; while the Aspect separation principal is determined not by the objective indications, but rather by the degree of our Interest towards them, as well as the inherentities of the CΦYUPMM (SFUURMM)-Forms of our Self-Consciousness. For any other Proto-Form (other development Vector) the separation of Qualities into the Aspects and Aspects into sub-Aspects can be formulated along completely different principals and differentiating indications, than what we are accustomed to.

14.15611. That is why it's not correct to talk about the possibility of Synthesis of some specific Aspects with some single specific Quality. But we do that, so that we can understand something, which at this point, in its integral clause, is still beyond our logic and comprehension. I would like to assert, that absolutely the same is taking place between all the Pure Qualities and between the dominant and background (recessive) Qualities, duvuylerrtly transforming into each other; they also have absolutely no boundaries, limiting their dynamics between any of them. Everything, absolutely EVERYTHING is slloogrent!

14.15612. The statement in the previous paragraph, described by me from the subjective position of the sequential "increase" of the qualitative state of dimension, is absolutely identical for principals of the inertial formation of all "descending" synthesis processes: the high-frequency Form Configurations of Conscious Fields of each of the more qualitative dimensional wave ranges of Energy-Plasma, potentially structuring the Form Configurations of Conscious Fields of any of the lesser qualitative Levels, including 0-1-dimensional level. In a super-temporal conditions the energy-informational interrelations between all of them have primordially occurred in a simultaneous-instantaneous fashion within a single slloogrent (multidimensional) resonant "spot", which is structured by all possible, duvuylerrtly transitioning throughout all possible development Vectors, resonant zones and Configurations of Forms of Conscious Fields, which form their multidimensional dynamics.

14.15613. That is, factually a fundamental realizational Principal of slloogrent constitution of absolutely all realizational Forms of any of the qualitative Levels of Energy-Plasma: every type of the creative manifestation of the Collective Intellect is always potentially structured by absolutely all possible Forms of creative activity. Everything, described by me in a supposedly logical, for all of us, succession, is only a conforming result of the inertial dynamics of the UCF, which generates the certain degree of subjectivism of the Perception of the Self-Consciousness of Formo-Creators, of the "personalities", in which You currently focus upon.

14.15614. Thus, we have just ascertained, that within each slloogrent resonant zone of the skrrYYllerrt system, the Synthesis of a single dimensional wave range is performed on the basis of integral unity of all the parameters, inherent for Formo-Creators of various Aspects of each of the Pure Qualities, which creates within the exact same multidimensional "spot" of Energy-Plasma the universal opportunities for the simultaneous manifestation in it of completely different (from the position of the detached observer) energy-informational parameters and attributes, which they have gained providing to all of the multitude of their possible combinations. Every Aspect of each of the all twelve Pure Qualities must be totally synthesized with every Aspect of each of the rest of the eleven Qualities; each of the jointly formed Form Configurations must be synthesized with every other Form Configuration, which is formed by all of the other Aspects. The same goes for each of the sub-levels as well! Since the Collective Intellects of US, as CCJIOO-CC-CHAA (SSLOO-SS-SNAA)

(SSLOO-SS-SNAA)-Creators structure the Secondary Energy-Plasma, all of the creative dynamics in each of the diffusive wave ranges of the Tertiary Energy-Plasma is performed by OUR “projections” – CJAA-CC-MII (SLAA-SS-MII)-Form Creators.

14.15615. It's worth mentioning, that these “projections” have an important singularity: The Form-Creator Configurations of various Levels, having the exact same frequencies, qualitatively tremendously differ from each other. It is an extremely difficult part for an explanation; however, I will try to provide a corresponding example: within “rorrok” wave range (to +3, 0 dimension) the more qualitative dynamic of refocusings of “baik-Forms” of Argllaamures and “iff-Forms” of Inglimilines, is being eglleroliftively (stimulatory) revealed by the potential “projecting” into BBY(VVU)-Configurations of these Formo-Creators of the Conscious Fields with tremendously more qualitative dynamics of Creative Activity, inherent for “enn-Forms” of Kroydles and “greis-Forms” of Aossoones, Configurations of which possess the exactly the same frequency; the same stimulatory role for “sfill-Forms” and “issk-Forms” of the next qualitative level synthesized sub-level of the first two Centers is also performed by the “projections” of more developed Formo-Creators – “ourff-Forms” and “allgss-Forms” of 3-4 of IISSIIDI-Centers, Configurations of which possess the same exact frequency, and so on.

14.15616. In order to better understand of the couching system, please recall that there are no “clear” boundaries exist between sub-Aspects of a single Aspect and between Aspects of a single Pure Quality. Thereby, not a single “karma-form” can be an “exclusive” representative of either a single Aspect or a Quality. On one hand, every Aspect is a unique manifestation of its Aspect and its Quality, and can't be subdivided into constituents, where it would be possible to assert, that, supposedly, it contains some percentage of this Aspect and some percentage of that, duvuylerrtly close to it Aspect. On the other hand, such interpretation of quality forces us to distinguish within Energy-Plasma of virtually unlimited number of Pure Qualities.

14.15617. In this dilemma it is pertinent to make a comparison with a visible spectrum of electromagnetic radiation (light) – each colorful spectrum part is unique and can't be subdivided into the smaller particles, or be described through its neighbor spectrum parts (through other colors). However, within our perception system the various combinations of only three spectrum parts: red, green and the blue, allows the imitation for our ocular organs of practically all the color palette, which is successfully applied in a TV, video and computer graphic industries. Similarly to the seven rainbow colors, through incommensurably more complex, the twelve Pure Qualities unify within themselves the elemental 0-1-dimensional “karma-forms”. The more complex: 1-2, 2-3, 3-4, 4-5...-dimensional partially synthesized “karma-forms”, possessing the ever-increasing slloogrent potential, more or less unify within themselves the manifestations of various sub-Aspects, different Aspects and Qualities.

14.15618. On the levels of 0-1-dimensional wave ranges, the existing sub-Aspects (elemental “karma-forms”) are in fact diffusive in relation to various Aspects of a single Quality – these are conditionally “borderline” sub-Aspects for a few Aspects. Parallel to that, within the same, 0-1-dimensional range there are sub-Aspect groups, which are diffusive in relation to various Pure Qualities – these are sub-Aspect groups (Aspects), conditionally “bordering” for a few Qualities. On the levels of 1-2-dimension, provided for Synthesis process within resonant zones of 0-1-dimension, every “karma-form” is structured by the integrity of less complicated 0-1-dimensional “karma-forms”, the qualitative difference of which is limited by the “synthesis limit zone”. Consequently,

0-1-dimensional diffusive resonant zones form, to even larger degree, the diffusive “karma-forms” (comparing with 0-1-dimension) on 1-2-dimensional levels. It is absolutely conforming, considering the fact, that all the “karma-forms” are being involved into the resonant dynamics of synthesis within the radius of “synthesis limit zone”. Thereby, the 1-2-dimensional “karma-form” structure can include not only the diffusive sub-Aspects of 0-1-dimensional levels, but also the sub-Aspects, which can be considered “pure” representatives of their Aspect.

14.15619. Thus, we can see, that the position and the structure of 0-1-dimensional resonant zone, greatly determines the possibility or prevailing of the purely-qualitative aspect interrelationships (I call it the pure-aspect resonant zone), or various degrees of the manifestation of diffusively-aspect interrelationships (I call it the diffusive resonant zone) on the “border” of two Aspects. Principally similar situation awakes within any more complicated dimensional wave ranges, but with certain specifics. For instance, upon the formation of diffusive resonant zones within 1-2-dimensional wave ranges, the aggregation of duvuyllerrtly close Aspects can be involved into its dynamics, one part of which reveals more of the attributes of one Pure Quality, while the other – to a greater degree, reveals the attributes of some other Pure Quality, which per se will become a simplified “proto-type” of inter-quality Synthesis dynamics. Within the wave range of 2-3-dimension, despite the ongoing dynamics in 1-2-dimensional range, the main dynamic type in a form of within-quality inter-aspect Synthesis, the dynamics of diffusive resonant zones 2-3-dimensions is substantially present. Such 2-3-dimensional dynamic represents even in a greater degree the Synthesis processes between the Aspects of two Pure Qualities, owing to the fact, that “synthesis limit zone” within wave ranges of 2-3-dimension allows the inclusion of Aspects of various Pure Qualities into the diffusive resonant zone’s dynamics.

14.15620. Let’s review the example for 2-3-dimnesional resonant zone. As you may recall, there is an inter-aspect, within-quality Synthesis of non-duvuyllerrt Aspects ongoing within this wave range. The Synthesis processes between various Aspects are inherent for the majority of the resonant zones of this wave range, to a greater degree manifesting the attributes of a single Quality. For instance, the “karma-form”, being synthesized within such “zone”, can contain 83% of the Aspect “LH”, 13% - of Aspect “LV” and 4% - of Aspect “LT”, where the first letter “L” means the Aspect is being a property of Pure Quality “L”, and the second letter conditionally resembles the Aspect of such Quality). Or, it can contain 33% of Aspect “LH”, 33% of Aspect “LV” and 33% of Aspect “LT”; or 25% of Aspect “LH”, 25% of Aspect “LV”, 13% of Aspect “LG”, 4% of Aspect “LA” and 33% of Aspect “LT”. Such “karma-forms” are being “mono-quality” in relation to the Quality “L”.

14.15621. Also let’s review the diffusive resonant zones of 2-3-dimensional wave range. For example, the “karma-form”, synthesized within such diffusive “zone” can contain 25% of Aspect “LH”, 25% of Aspect “LV”, 25% of Aspect “VF” and 25% of Aspect “VZ”; or it can contain 33% of Aspect “LH”, 25% of Aspect “LV”, 8% of Aspect “VF”, 21% of Aspect “VZ” and 13% of Aspect “VCH”. And so on – the quantity of possible combinations greatly exceeds googol. Such “karma-forms” are mixed in relation to the Qualities “L” and “B”.

14.15622. As you have guessed, the “karma-form” mixture is capable of being a prototype to processes, inherent for a next dimensional level thanks to its diffusive origin. We just saw, that the diffusive resonant zones of 1-2-dimensional and 2-3-dimensional wave ranges are capable of implementing the synthesis processes between Aspects of various Qualities, although the majority of the synthesis dynamics within these ranges belongs to the within-quality processes. Note, that

the diffusive and resonant zones have the exact same dimension, because the energy-informational complexity of “karma-forms” is the same; however the “karma-forms” of a mixed type within 2-3dimensional wave range, have become the “conception” of the inter-quality Synthesis, provided for their descend. Thus, within the same dimensional wave range we have gotten two simultaneously ongoing Synthesis types – within-quality one and inter-quality one.

14.15623. Now it should be understood that the dynamic of curators Consciousness is structured by “karma-forms” of a mixed type; they already have substantial presence of both Pure Quality features, which offers them a wide range of opportunities for the inter-*proto-form* interrelation and increases their potential within the global *slloogrent* dynamics, by virtue of the resonant compatibility with two Qualities. What they are supervising is a dynamic of Conscious Forms, in a prevailing sense structured by the “karma-forms”, synthesized on the basis of a single Pure Quality, and substantially in the lesser degree - (on the levels of a fraction of the percentage of background manifestation) – possessing the potential capabilities for the interaction with Consciousness of other Proto-Forms.

14.15624. The inertial dynamics of the Tertiary Energy-Plasma is possible only because of the activity of Focuses of Self-Consciousness, which, by virtue of their involvement into the activity of Time Flaws, reflects the illusion of consequent Synthesis of all sub-Aspects, Pure Quality Aspects and the Qualities themselves throughout all the dimensional wave ranges. Within “our” type of synthesis dynamics the Tertiary Energy-Plasma under the influence of the Universal Focuses of Self-Consciousness is being organized into sub-Aspects on Levels of 0-1-dimension and ceases in the vicinity of 12-13-dimensional wave range, commencing and terminates by the reference state of OO-VV-Entitys, representing the Pure Cosmic Qualities in their primeval mode.

14.15625. Primordially the Tertiary Energy-Plasma is nothing more than a resonant “spot” – the so called “null ingredient”. Within this “spot” there is everything: beginning from the conditional null dimension all the way to 10^{100000} dimensions. It is a “spot” because the *slloogrent* Principal instantly “curtails” all the qualitative dimensionality of the Universe. One substance has resonated with the other, the third one – with the fourth one, and so forth. All possible Energy-Plasma conditions have simultaneously “projected” into each other, which in turn had formed a Universe, something yet inaccessible to your understanding, super-temporal energy-informational state of ALL-Existence, when all the Forms of manifestation of Collective Intellects (Energy-Information) are always revealed within the inherent to their Configurations resonant spots of the *slloogrent* activity of Space-Time, meaning that absolutely Everything Always exists.

14.15626. The Universal Cosmic Intellect Types and all the multitude of Collective Consciousness, which structure all Their Forms, differentiate their Focuses into this *slloogrent* activity (the inertial dynamics of any Focus – is always an initiation of the specific qualitative variance), which always initiates the synthesized Quality, resonant to the current condition, and, correspondingly, the Configuration, which will belong to the particular “part” of *slloogrent* activity of some type of Form. That’s the Form, through which WE cognize Ourselves. There is no other way, through which this resonant spot can *slloogrently* reveal or cognize Itself. Therefore, you should now realize that none of the Tertiary Energy-Plasma Levels exist outside of the inertial dynamics of UFC!

14.15627. We, as a Collective Intellect, structuring the Secondary state of Energy-Plasma with our Configurations, have NOTHING less qualitative: the inertial dynamics of an inter-quality Synthesis of absolutely all twelve Pure Cosmic Qualities – throughout all possible Synthesis schemes,

allowable for this process – on the levels of the thirteenth dimension primordially is fully finalized; it has totally “merged” throughout all the compound slloogrent Configurations of the realizational Existence Experience of the infinite number of multi-qualitative “projections” of Formo-Creators and СЛУИ-СЛУУ (SLUI-SLUU)-Creators of the Tertiary Energy-Plasma!

14.15628. Since the “projections” can only manipulate the other “projections”, that means that within the conditions of the Tertiary state of Energy-Plasma only the narrow-specific dynamic of various slloogrent “projections” is manifested (СЛАА-СС-МИИ (SLAA-SS-MII)-Creators of the 12th dimension). That means that WE, as ССЛОО-СС-ЧАА (SSLOO-SS-SNAA)-Creators (НАА-ГЛЛИИ-И-УУ-Entitys) simultaneously “project” the ЭИЙГ-СС-МИИ-Forms and organize inherent only to US synthesis “part” of the slloogrent of Secondary (24-12-dimensions) Energy-Plasma. Therefore the Formo-Creators of the 12th-dimension enter into the energy-informational interrelationships not with СЛУИ-СЛУУ (SLUI-SLUU)-Creators themselves (УУ-ВВУ-Forms and their УУ-ВВУ- (UU-VVU) copies, ФЛУ-Modules and their ФЛУУ-ВВУ-replicas and so on, Configurations of which never exists “beyond” the dynamics of ODS or ФЛУУ-ЛУУ (FLUU-LUU)-, ИИЛЛ- and other ВВУ(VVU)-complexes) but only with some of the “projections” of inherent to them super-temporal dynamics – Though-Forms, Emotion-Form, СФУУРММ (SFUURMM)-Forms and Karma-Forms.

14.15629. Now you should better understand, that Though-Forms or Emotion-Forms, which reflect various degrees of prevailing within their inertial dynamics of either the Creative Activity of “emanations” or the Creative Activity of “psyche”, outside of the UFC dynamics simply don’t exist, since they are primordially gradually (level-by-level) all synthesized into the “karma-forms”, the unstable and intermediate condition of which, within the inertial conditions of the Tertiary Energy-Plasma, is expressed through the unstable semi-synthesis dynamic of СФУУРММ (SFUURMM)-Forms – our various (and of all other proto-forms) current “subjective” Perceptions in regards to anything we see around us. These perceptions continuously change, until they become completely synthesized in the process of the multitude of the qualitative refocusing and transmute into the Karma-Forms. They become the stabilized and balanced (for the current dimensional wave range); in terms of their energy-informational interrelationships they acquire the qualitative state of Energy-Plasma and become fully synthesized with “emanations” and “psyche”, which structure every single sub-level or Level of Self-Consciousness (as well as Sub-Consciousness, Super-Consciousness and so on).

14.15630. Meaning, that Karma-Forms are inherent only for the primordial, initial, fully synthesized state of Tertiary Energy-Plasma, however, within the inertial dynamics of CAF-DRF of Formo-Creators of our Self-Consciousness (as well as Levels of Super-Consciousness, Excess-Consciousness and the lowest levels of Proto-Consciousness) only СФУУРММ (SFUURMM)-Forms are enabled – various intermediate Karma-Form conditions, which (in relation to the СФУУРММ (SFUURMM)-Forms of all possible Synthesis Vectors, which they differentiate) always, throughout any Levels of their manifestation, present by themselves the more objective and more realistic Form, which in turn reflects the highly-qualitative Energy-Information within the inertial creative dynamics of the Collective Intellect of any of the Energy-Plasma Levels, which is perceived by all of us as our life Experience.

14.15631. This – is a very important point to understand, so that it will become possible to comprehend the Entity of the infinite multi-qualitative dynamics, which we subjectively define as the Inertness of Energy-Plasma. All the realizational Forms from the 0- all the way to the 12th-dimension, utilize the

incompletely-synthesized CΦYYPMM (SFUURMM)-Forms, (which is distinctive type of CΦYYPMM (SFUURMM)-Forms within this wave range); any synthesis process, which they participate in, always has the potential momentum of creative incompleteness, which, in fact, creates the conditions for the dynamic of eglleroliftive Impulse manifestation, which is the most important factor of manifestation of the other qualitative dynamic process – Evolution-Involution.

14.15632. If you profoundly think about this, then perhaps you will comprehend the true meaning of what I define as slloogrent frequency rotational Shift, a basis of which is - an absolute impossibility of the “projection” of Formo-Creators of any of the inertial Levels of Energy-Plasma (who are capable of manipulating only with an instable CΦYYPMM (SFUURMM)-Forms) to completely finalize any of the implemented processes of the inner-quality Synthesis. Factually, that’s precisely the objective circumstance, which stimulates all the “inner” slloogrent dynamic of their Focuses of Creative Activity and creates the conditions for the illusory effect implementation, which is manifested within the energy-informational structures of Self-Consciousness as a frequency rotational Shift. Within the structures of Formo-Creators of Sub-Consciousness, Super-Consciousness and Excess-Consciousness, this rotational Shift’s presence diminishes in the geometric sequence, finally disappearing within the highest Forms of the Proto- Consciousness.

14.15633. Therefore, when I use the term Karma-Form, I mean the highest for the current Level of Energy-Plasma conditional completion degree of some single slloogrent Vector of the global inertial process of Synthesis of various Qualities, implemented by the specific “projections” of Formo-Creators of current Level. If it is a “human being”, who “quantizes” some of the wave ranges by his / her CΦYYPMM (SFUURMM)-Forms (through the TES-dynamics), which are compatible with ДООЛЖИ- or ФЛАК-Levels, there are certain types of incomplete Karma-Forms being generated in the ODS, however, when the same type of action is performed by the Formo-Creators of some other Proto-Form Consciousness kinds, this results in the manifestation within the ODS of a completely different incomplete Karma-Forms, more or less synthesized throughout the qualitative Vectors, inherent to the Aspects of other Pure Qualities. The same goes for the process of achieving by various Proto-Forms of the different so called Creative Cosmic conditions – in this case i always talk about the maximally possible synthesis degree for each of the Levels of various Aspects of various Qualities; that degree of synthesis is being reflected in the Configurations of an incomplete Karma-Forms, inherent only for the slloogrent TES-dynamics of Formo-Creators of the current Vector of Development, specifically manifested within the global slloogrent activity of the current Level.

14.15634. But that isn’t the hardest part to understand. I urge you to take courage and patience. The nervous type should set this book aside... Now, perhaps, the most complex Information will follow. Within the specific conditions of the singular Realities (1-0-dimensions) Karma-Forms don’t have any way of being formed, since there is almost no activity of the dynamics of the inter-quality synthesis interrelationship within these sub-levels between Y-Y-Protofs, who employ “emanations” and “psyche” of sub-Aspects only during the processes of the inter-aspect Synthesis of utmost unstable “karma-fractions”, each of which reflect the narrow-specific Creative Activity of only some single “part” of a single Aspect of some of the twelve Pure Qualities. Because of the same reason the synthesized Karma-Forms are absent within the dynamics of the next 2-1-dimensional wave range, the energy-informational basis of which is formed by the variety of unstable “karma-forms” of Y-YЛ, Л-ЛY- and Y-Y-BBY-Loolgs. They are being generated as a result of the instant (impulse) interaction of “emanations” and “psyche”, which in turn structure the different duvuyllerrtly close Aspects of a same single Quality.

14.15635. The fact that the “karma-forms”, inherent for the sub-levels of Proto-Form Consciousness aren’t yet accessible to us (in our common conditions) doesn’t mean that within these frequency wave range sub-levels (2-1-dimensions) they don’t exist at all – if there is a slightest inter-movement between the “karma-forms” and “psyche” exists, then there have to be at least some results (various narrow-specific “karma-forms”) of this energy-informational interactions, since within their own frequency wave ranges they are also inertially being a part of an Energy-Plasma and thus, are accessible to the Self-Consciousness of the multitude of other inferior realizational Proto-Forms of ΓΟΟΛΓΑΜΑΑ-A (GOOLGAMAA-A), whose Formo-Creators along with the “karma-forms” they utilize, are being active within these qualitative sub-levels.

14.15636. Now let’s try to clarify some possible term utilization confusion. The Thought-Form, which is the occasional variation of manifestation of CΦΥΥΡΜΜ (SFUURMM)-Form – is a dynamic slloogrent state of Energy-Plasma’s Conscious Fields (in a form of an integral, fully synthesized Karma-Form), bearing evident signs of the Creative Activity of self-conscientious Elements of “emanations”, structuring the mental (the MENTO-Plasma) “part” of the global slloogrent dynamics of the synthesized Flux. Sense-Form, which is also an occasional variant of the CΦΥΥΡΜΜ (SFUURMM)-Form manifestation, is basically the same energy-informational occurrence, only which is being manifested within the Self-Consciousness, bearing evident signs of typical dynamics of Conscious Fields of the “psyche”, which structure the other conditional energy-informational “part” of the global slloogrent activity of the Energy-Plasma – (the ASTRO-Plasma).

14.15637. Consequently, within our simultaneous inertial dynamic of UFS, the “personalities”, which WE currently focus upon, always utilize the certain subjective CΦΥΥΡΜΜ (SFUURMM)-Forms, regardless of the terms of their definition – “karma-forms”, Though-Forms, Sense-Forms, ΥΥ-BBY- (UU-VVU) Forms, Form-copies, ΥΥ-BBY- (UU-VVU) conglomerates, ΦΛΙΥ-conglomerates, and ΦΛΙΥ-modules, ΦΛΙΥΥ-BBY-duplicates and much-much more, yet unknown to me and you). We can call Karma-Forms the subjective IDEAS (for our types of Realities) only in relation to these synthesized Levels, where the Synthesis processes within the certain Vector of development are inertially not yet completed. Please bear in mind, that in the more qualitative Levels of your creative self-expression, which are the closest to current subjective Reality, due to the slloogrent state of ALL, simultaneously manifested throughout the multitude of various qualitative dimensional Levels, exists absolutely no subjective differentiating of “something this” and “something that”.

14.15638. The more real out of any comparable creative states always is something, which already has been synthesized on the more qualitative energy-informational basis; something, which has integrated within itself all the Existence Experience of the lesser qualitative Forms of the current slloogrent Flux (Vector) of Energy-Information. Everything that “you”, as one of the variants of simultaneous creative manifestation within Form-Systems of the infinite multitude of “personality” Interpretation, think or experience at any given instant of Time, regardless of the fact of your recollection of any of your previous life events and regardless of whether you realize it or not at the time of its occurrence (as it usually happens during sleep or so called altered states of Mind) – all that is, in fact a creatively active part of the collective manifestation of all of the “projections“ of Form Creators of your sub-Consciousness. Your sub-Consciousness contains all the individually manifested Forms of Self-Consciousness, not only of your Stereo-Form, but of all of the ΛΛΙΥΥ-BBY (LLUU-VVU)-Forms, capable of the perception of the outer reality only by means of inertial refraction of the individually “decompressed” ΒΥΥ-Information by their Formo-Creators through the prism of the subjective Experience, primordially programmed into the duvuyllerrt group of ΗΥΥ-

14.15639. What I have conditionally defined as an Energy-Plasma, is actually the Universal sllloogrent dynamic of multi-qualitative Fluxes of Energy-Information, self-realizational Elements of WHICH (Form- and CЛИИ-СЛІУУ (SLUI-SLUU)-Creators) intellectually organize and entirely interpenetrate by their Creative Activity of absolutely all possible Forms of “manifestation” (specifically simultaneously structure all Levels of sllloogrent dynamics) of the infinite number of Universes, eternal in their multi-dimension. The entire system of energy-informational interrelationships between Formo-Creators of Self-Consciousness of various Forms, structuring different Time Fluxes, is performed instantly, since within even the most “densely-plasmous” wave range of the Tertiary Energy-Plasma, in which the current Perception systems of your Self-Consciousness simply aren’t able to be activated (± 1 -0-dimensions), the time (inertiality) of energy-informational impulses transition between the single-type Consciousness of various Forms, factually approaches zero. Even such a linear conception, as the “speed of light” (approximately 300.000 kilometers per second), is considerably small, comparing to the commutative energy-informational dynamic, inertially implemented between the Self-Consciousness of realizational Forms, partially structuring by their Configurations ASTRO and MENTO-plasmous “parts” of the global sllloogrent dynamic of 0-1-dimensional Form systems.

14.15640. Absolutely all space-time inertial structures of the Tertiary Energy-Plasma are composed of all the variety of multitude types of these Configurations, formed into either Thought-Forms, Sense-Forms, or into the multiplexing “karma-forms” of CФУУРММ (SFUURMM)-Forms, possessing in each of the dimensional wave ranges (“Plasmous Forces Range”) the unique energy-informational structure, fully compliant only with Goals and Tasks of the current wave range of Cosmic Creation. “New” Though- and Sense-Forms are created at the moment of the sllloogrent “compressing-unfolding” in the informational space of Self-Consciousness of some specific BBY(VVU)-Information, subjectively decoded by the brain’s Formo-Creators upon its “unfolding” from TES. In this process once the Formo-Creators, within the individual ODS, have initiated the prevailing activity of “projections” of УУ-BBY- (UU-VVU) conglomerates, bearing signs of realizational Aspects of the Will-Intellect Dominant (processes, connected to the activization of rational, analytical, logical and intellectual activity), then into the sllloogrent BBY(VVU)-Configurations of CФУУРММ (SFUURMM)-Forms of the corresponding “niches”, after the individual quantizing, Though-Forms of УУ-BBY Copies are being derived. If, however, from the individual ODS in a greater degree the “projections” of УУ-BBY- (UU-VVU) (UU-VVU) conglomerates, which are Form-carriers of Aspects of the Love-Wisdom Dominant (choices, based upon the emotionality, sensuality, passion, hysteria and other manifestations of “psyche”) are being attracted, then CФУУРММ (SFUURMM)-Forms of the specific “niches” are being structured by the quantized BBY(VVU)-Configurations of Sense-Forms.

14.15641. If, during an inertial “compressing-unfolding” process the powerful reproductive “merge” of mental and psychical reactions takes place, which tremendously and radically changes the BBY(VVU)-Configuration of “projection” of the attracted УУ-BBY- (UU-VVU) (UU-VVU) copy, then at the same very instance, within the ODS the super-temporal mechanism of the specific “stress zone” is activated, and, simultaneously with that, within the corresponding “niche” of ODS the current (temporal, intermediate) CФУУРММ (SFUURMM)-Form of the modified object of Perception is activated, which in turn instantly becomes (although it is always being within that particular resonant spot!) the active “part” of the sllloogrent dynamic of the corresponding Karma-Form (THE IDEA), whose BBY(VVU)-Configuration represents all the synthesized Experience of the current Level of Energy-Plasma.

14.15642. I have already explained why my subjective Perception regarding the “quantizing” process (of what I enslave into my own Understanding of this inertial dynamic) somewhat differs from the scientific interpretation of that notion. Since the Realities, which we now in-focus are limited in systems of our “personal” Perception by “quantum” interrelationship Levels, continuous realization in various type of creativity (in a form of generating into Space-Time of various “projections” of the multitude of CΦYYPMM (SFUURMM)-Forms from the individual Self-Consciousness ODS), we actively manipulate (by means of “our” cerebrum’s Formo-Creators) with various energy-informational interrelationships between resonantly attracted “projections” of VY-BBY- (UU-VVU) (UU-VVU) conglomerates, at the same time continuously implement within corresponding Levels of our Self-Consciousness the inner-aspect, inter-aspect or inter-quality Synthesis. As a result, there is multitude of automatically implemented dynamical CΦYYPMM (SFUURMM)-Forms being generated for the consequent qualitative “refocusings” of CAF-DRF-dynamic of Formo-Creators of the HYV-BBY (NUU-VVU)-Configurations of our in-focusing into the inertially manifested – simultaneously throughout all possible Vectors of development – slloogrent “parts” of skrruullerrt system, structured by other BBY(VVU)-Configurations of the outer us Proto-Forms (objects and events).

14.15643. Thus, in my opinion, the process of the individual “quantizing” is an inertial modification (clexing) of the quality of BBY(VVU)-Configurations of resonantly “unfolding” (in the form of the continuous “quants” of the rotational Shift) Energy-Information by Formo-Creators, within specific conditions of 3-4-dimensional Continuums. This Energy-Information is an integral element of the implementation of multitude of additional – more advanced and profound! – types of Synthesis, as a result of which, they (and, consequently, “us”!) can implement the simultaneous process of inertial multi-polarized “projections” (“our” refocusings) of their inherent CAF-DRF-dynamic into the new HYV-BBY (NUU-VVU)-Configurations of Forms of Self-Consciousness, containing higher quality Energy-Information, which primordially structure the corresponding duvuyllerrt Form-Systems. Hence, by means of the inertial “quantizing” process of various objects of the outer Reality with the specific, inherent to them CΦYYPMM (SFUURMM)-Forms, brain’s Formo-Creators continuously generate additional opportunities for the active inertial manifestation within the informational space of Self-Consciousness of all “personality” Interpretations of all the forthcoming more or less synthesized CΦYYPMM (SFUURMM)-Forms, so that all of our manifestation Forms of Energy-Information, could always implement their most important task – simultaneous inter-quality Synthesis of the various Aspects of Pure Cosmic Qualities.

14.15644. But since the HYV-BBY (NUU-VVU)-Form-Types, which we currently in-focus, as well as the other Proto-Forms, represent the diffusive model of Collective Intellect development, within each of the slloogrent sub-levels of Self-Consciousness (throughout every single instance of your infinite Existence!) the Synthesis process is being implemented simultaneously throughout all the possible Vectors of development, inherent to the multi-qualitative Proto-Forms. Every type of our individual creative manifestation (professional, sporting, social, political, religious, scientific, philosophical, literature and other such activity) within the dynamics of certain duvuyllerrt Continuum groups which WE structure, represents a certain type (scheme) of Synthesis of sub-Aspects or Aspects of some of the ten Pure Qualities, more or less manifesting (through their realizational Forms!) their inherent synthesis dynamics simultaneously with the powerful dominating Synthesis of some of the two Qualities (in our case these are Love-Wisdom, and Will-Intellect). Every day of your Life consists of the multiple, superseding various daily activities and creative realizations, each of which stimulates the process of your inertial refocusings into the Synthesis Vector, inherent for various Proto-Forms. Within HYV-BBY (NUU-VVU)-Forms this process is being implemented in

a background mode, along with obvious dominance of the two named Qualities. The background activity constantly varies, leading to the constant change in dynamics of your refocusing into various Vectors of development. Throughout all these multi-qualitative and multi-directional realizations, the certain period of your Life has greatly favored the background Synthesis various sub-levels of either a single, or multiple Vectors of development, while during other periods you had concentrated on some other issues, which facilitated the background Synthesis of other Vectors of development throughout the slloogrent dynamics.

14.15646. While you are steadily focusing onto a particular development Vector, there is only a certain Synthesis variation being activated within the sub-levels of your Self-Consciousness, inherent only to the CΦYUPMM (SFUURMM)-Forms dynamics of that particular Direction of Synthesis. As soon as the previous interest, which you have expressed towards some type of creative activity ceases, you commence the steady refocusing into some other Vector. This means, that within the slloogrent dynamics of the same sub-levels, you should implement that Synthesis anew, with prevailing activity of these background dynamics, which is inherent to the new Vector of your refocusing! Once you are being surfeited with the current creative activity, you become infatuated by something else, and again are forced to synthesize the partially scrutinized sub-levels, taking into account the fact of the background situation change. And thus – infinitely, throughout all of the sub-levels and Aspects of each of the twelve Pure Qualities!

14.15647. Within the dimensional wave range of 3, 75 and 4, 25 the process of “accession” of the third Dominant, begins with the inner-aspect and inter-aspect Synthesis with “psyche” and “emanations”, representing sub-Aspects and Aspects of that Quality, which is thereafter duvuyllertrly transforms into the inter-quality Synthesis. In our – “JJIYBBYmic” (JJY-BBY (LLUU-VVU) – humanoid) – development Direction, the third Quality is The Unity (togetherness). Upon the Synthesis of two Dominants, the activity of background Qualities, in spite of its faintly-intensive fluctuation dynamic, determines a Vector of refocusing into the proto-form development Directions. Upon the chaotic variance of existential interests, the corresponding intensity of background Qualities rises within the Self-Consciousness of a “person”. The UCF is fluctuate-alternately shifting in the directions of various Proto-Forms, as a result of which the immensely powerful dynamics of inner-aspect synthesis processes, while within the primary Synthesis Vector the dynamics of inner-aspect background interrelationships is diminished to a minimum.

14.15648. But that doesn’t mean, that the high intensity of inter-qualitative Synthesis within the Self-Consciousness between the Aspects of two Dominants results in a “summarized” (for the current dimensional wave range) Form of Self-Consciousness, within the Configuration of which the background Qualities are scrutinized in the minimal degree. Oh, no! I suppose that you haven’t considered that such types of high-frequency Forms of Self-Consciousness are the most qualitative and “resultant” for all the Forms of the current proto-form Direction, since their HY-BBY (NUU-VVU) Configurations contain absolutely all the Experience, collected by means of TOTAL infinite number of the lesser qualitative Forms of Self-Consciousness of the current JJY-BBY (LLUU-VVU), focused within lesser qualitative development scenarios, implementing to a greater degree, the prevailing Synthesis of some of the two “human” Dominants with sub-Aspects and Aspects of Pure Qualities of the various proto-form Vectors of development. Their constant “Deaths” automatically become the source of a passive (automatic) Experience, which is gathered by Formo-Creators of each of the more qualitative HY-BBY (NUU-VVU)-Configurations, which in turn within the HYJL-BBY (NUULL-VVU)-Forms creates the best conditions and possibilities for the maximally stable and

profound concentration of Creative Activity of Self-Consciousness of Formo-Creators only in a ЛЛЮУ-BBY (LLUU-VVU) Direction of Synthesis.

14.15649. As you can see, there is no “loss” of Experience or diminishing of profoundness of the inter-Quality Synthesis occurs: Focuses of the lesser qualitative “parts” of the slloogrent activity, are simultaneously actualizing throughout all possible Vectors of development and resonantly synthesizing into a particular Experience, duvuyllerrtly “refocus” into the more qualitative “areas” of НУУЛЛ-BBY (NUULL-VVU)-Configurations of the most developed Form-Types of the current ЛЛЮУ-BBY (LLUU-VVU)-Form, providing their Formo-Creators of the more and more favorable opportunities (in relation to the lesser qualitative manifestations) for the activation of inherent dynamics of Creative Activity within deeper synthesized Form Configurations.

14.15650. In order to better understand this process, please imagine the Conversum in a form of an infinite multidimensional spherical structure, being the mostly qualitative (maximally synthesized) within the imaginable Center, while all the lesser synthesized Form-Systems being a multitude of layers, moving away from that center. Let’s assume, that a Center in this example is a source of Light, while the Configurations of any manifested Forms (within the limits of this Conversum dynamics) are pellets of the same size. Any of the pellets, illuminated by the source of light, will shadow of the specific size onto the surface of the closest layer (Form-System), creating within the Sphere of somewhat an obscure area in a form of cone, where its peak is a pellet, while the bottom (its shadow) – the imaginable surface of the layer. The pellet is a “transitional” Configuration of Self-Consciousness Form, while the shaded cone-shaped area – is an infinite set of the lesser qualitative Forms of Self-Consciousness, whose experience is organically included within the current pellet Configuration.

14.15651. Thus, as we can see, the more qualitative (more profoundly synthesized) the Form Configuration is, the closer it can be positioned to the Center, and the wider its Experience “cone” will be, formed by the Synthesis of a wider Aspect spectrum, including dominant and background Qualities. Moreover, you can also reference such principal as ММААГ-CC-ММААА (MMAAG-SS-MMAAA) “I AM THE CREATIVE REFLECTION OF PRESENCE OF EVERYTHING WITHIN EVERYTHING” (“The Law of the Integrity of multiplicities” - ЛЛИАСС-ЛЛЮУСС (LLAASS-LLUUSS)), which provides any Form of a Collective Intellect with “omnipresence”, being instantaneously reflected in a form of an infinite number of multi-qualitative “projections” throughout every single Level of the Universe, throughout any multidimensional Universal Spheres of Creation.

14.15652. Let’s talk about another very important detail, which should reveal to you the more in-depth information regarding the implementation of the “intrusion” of the incompletely-synthesized ВВУ(VVU)-Configurations of СФУУРММ (SFUURMM)-Forms, differentiated at the “unfolding” instant into the level-subsequent synthesized slloogrent ВВУ(VVU)-Configurations of these of the СФУУРММ (SFUURMM)-Forms, which already structure each of the “niches” of the individual ODS of our Self-Consciousness. But it is impossible to comprehend this without the thorough knowledge and understanding of the Tertiary Energy-Plasma structure. Therefore I suggest continuing its detailed research and reviewing the very elementary - one-dimensional – Levels, where we would strive to study the structures, which provide the slloogrent dynamics of Forms of the twelfth dimension.

14.15653. The inner-sub-aspect Conscious Fields of СФУУРММ (SFUURMM)-Forms (“karma-fractions”), synthesized by Formo-Creators of 0-1-dimensional wave range, which are structuring

the inertial dynamics of 0-1-dimensional Form-Systems by utterly unstable interrelations between the “emanations” and “psyche”, figuratively remind me something, which to a greater degree can be comparable with the intensively spherizing (“rotating”, “shivering”, “vector-fuzzy”, “dispersive-fluctuating”, “ambiguously whirring” and so on) “tetrahedral” ether structures, in which the scheme of the organization of the energy-informational interactions between “projections” of Formo-Creators and СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators, can be simplistically imagined as a force multi-polarized ether “ribs”, Vectors of potential Synthesis of which, constituting all the conditional “length” (energy-informational potential) of each of the “ribs”, simultaneously orientated in a different duvuyllerrt Directions, inherent to the individual creative dynamics of only their sub-Aspect or Aspect of some Quality. Every single “rib” resonantly interconnects the “peaks” of each of the unstable “tetrahedrons” between each other, which are constantly changing their Configurations at every inertial rotational Shift. Each “peak” – is a certain slloogrent “part” of the mutual Creative Activity of the Self-Consciousness Configuration of the realizational Form, being manifested by means of the specific dynamics of some of the duvuyllerrt groups of Formo-Creators, structuring the current one-dimensional wave range.

14.15654. I have mentioned that all the “tetrahedrons” are intensively spherizing (“revolving”); moreover, every one of them is rotating in only a single Synthesis Vector, which reflects the integral of all Synthesis Vectors of “tetrahedron’s ribs”, orientated into different duvuyllerrt Directions. Why did I utilize this term? Only because the perceptions, more or less approximated to such type of dynamics, are completely absent from within your Self-Consciousness. I would like to highlight the fact, that while talking about “spherizing”, in no way I mean the common mechanical rotation, the presence of which is simply impossible within the subject of discussion, bearing the parameters of such vast dimensions and proportions. Used here and thereafter the term “spherizing” – is a constant, multidirectional alteration of “angular” dynamics of instantaneously manifested throughout the Energy-Plasma of the parameters of Creative Potential (quality and quantity of Energy-Information) of the scrutinized conditional “karma-form”, at the moment of its interference with similar dynamics of Formo-Creators of all the rest of the “tetrahedron” structures, which organize all the informational space of the current “karma-form” Consciousness by their own instantaneous “dispersive fluctuations”.

14.15655. I wish to provide an advance notice to all scientists, accustomed to computing and measuring of everything: the volume of that dynamic for a single “karma-form” in no way can be discretely expressed, since that potential is very closely and complicatedly allied with “dispersive-fluctuating” dynamics of all the multitude of other structures of all slloogrent multidimensional Energy-Plasma Levels. I propose to call this specific dynamics the angular spherizing (as a semantic analog or a qualitatively different prototype of the widely known notion the angular velocity in physics). The angular spherizing of each of the “karma-fractions” specifically related with such a physics notion as a spin of an elementary particle. Therefore, instead of the term “spin”, I will utilize my own ИССИДИОLOGY term – svilgs, which within the conditions of Synthesis of 3-4-dimensional Form Configurations, is a more fundamental and profoundly-expressed analog of a spin dynamics. However, in order to describe the details of the svilgs-dynamics, first I would have to expound the step-dimensional structuring specifics of “geometrical forms” of “karma-forms”.

14.15656. Every “karma-form” is created by the mutual dynamics of “emanations” and “psyche”, which structure and regulate the multi-qualitative Vector dynamics of the force tensions within various “ribs” of “tetrahedrons” (mento-plasmous and astro-plasmous); their individual interrelations

also bear their own force characteristics, since each of the “emanations” or “psyche” is a slloogrent energy-informational carrier of already synthesized sub-...-sub-Aspects and sub-sub-Aspects by means of certain inner synthesis schemes of any single one out of the twelve Pure Qualities. What does that mean? This means that before there was a revealing opportunity for “emanations” and “psyche” to be manifested by their specific attributes into a dynamics of relatively accessible to Our Perception the 0-1-dimensional wave ranges, “emanations” and “psyche”, inherent for the manifestation Forms of each of the OO-YY-Entitys throughout the Space-Time of “our” Universal Entity, have already been synthesized throughout the millions of dimensional types along the infinite set of criteria, inherent to the various types of sub-...-sub-Aspects, structuring the dynamics of Forms of each of the Qualities within the wave ranges of their own manifestation.

14.15657. It is simply impossible to reflect all the multitude of sub-...-sub-Aspects in any of their manifestation variations in a conditional, pre-zero dimensional state of Energy-Plasma. Therefore I will only mention the fact that all that variance of the multitude of the Configurations, synthesized within limits of each of the OO-YY-Entitys, in a state of the Form dynamics, manifested within 0-1-dimension, has been expressed within these narrow-specific combinations of all the multitude of sub-...-sub-Aspects, which I have defined as “psyche” and “emanations”. Again: their attributes are strictly individual for each of the Pure Qualities! The constant interrelationship (throughout the wave ranges, higher than the conditional 0-1-dimension) between their Configurations and the carriers of the similar individual characteristics of each of the other Qualities, will continuously endure some of the inertial frequency alterations, which subjectively can be defined as a distinctive “dispersive-fluctuation” sphering.

14.15658. I would like to immediately highlight that above-mentioned – is an extremely conditional discrete description of the energy-informational constituencies of any type of the elementary “karma-forms”; it can as well be compared only with just as abstract and metaphysical dynamics description of a single “atom” of a single molecule of a substance. Therefore I suggest you treat such a subjective description accordingly – just as elementary schematics and rough draft, which has little in common with a real object. It is noteworthy, that the larger the resonant balance degree of ether force interrelationships of “emanations” and “psyche” along each of the six “ribs”, connecting four “peaks” (meaning, the more stable the “tetrahedron”, whose “ribs” are qualitatively correspond with each other, without creating substantial tension fluctuations), the deeper and more profoundly within the energy-informational interrelationships of the current “karma-form”, the inertial process of the inner-sub-Aspect Synthesis will be manifested (between all the sub-...-sub-Aspects of a single Aspect). Therefore the Space “geometry” of each Configuration “side” of the current “tetrahedron” Form will be more stabilized by means of slloogrent dynamics of the four equilateral “triangles”, linked into an integrated “dispersive-fluctuation” sphering “tetrahedron”.

14.15659. If, however, within some of the force interrelationship Configurations (for instance, conditionally “mental” Conscious Fields – “emanations”) the dynamics of Synthesis Vectors of one or two “ribs” are positioned in a relative dominance with the realizational dynamics of Synthesis Vectors of other ether “ribs” (conditionally “vital” Conscious Fields – “psyche”), then some of the interrelationships, forming the energy-informational dynamics of such “ribs”, to some degree are experiencing the tension stress (counteraction, resistance destruction) in relation to the qualitative dynamics of some of the neighbor “ribs”, as a result of which, the energy-informational formation is being created instantaneously within the current wave range, bearing incompletely-synthesized (discording with each other) sub-sub-Aspects of Qualities – the “karma-form” Configuration, which

is extremely unstable in its manifestation (within the current sub-level of the current wave range), bearing the predominance of some “emanation-like” tendencies, sloogrently structuring the Thought-Forms of a more synthesized Levels, which, according to the resonant Principal, instantly transforms (“re-projects”) into a lesser-tension “tetrahedron” structure, since the inertial redeployment of the dynamics of the most destructive of its interrelations, into the ether “tetrahedron ribs”, which are most effectively compatible in their quality, also occurs instantaneously.

14.15660. Upon the opposite scheme of the synthesis dominance of the “ribs” dynamics, there are such an unstable “karma-forms” are established; however, bearing the more denominated conditionally “vital” tendencies (which within the Self-Consciousness Forms of a higher dimensions sloogrently create the Sense-Forms). Note, that I have used the words “mental” and “vital” within quotation marks, since in reality, neither one of them – in our understanding of it – exists within the single-dimensional Form-Systems. I only defined the mere tendencies of the synthesis inner-sub-aspect and inner-aspect dynamics with these, familiar to you terms. That dynamics is revealed by the Y...Y and Л...Л-Protofs, simultaneously and along each of the Aspect of all twelve Pure Qualities, which, frankly, aren’t compatible with our traditional Perceptions regarding Thoughts and Feelings.

14.15661. When I talk about the instability of some of the energy-informational relationships between Y...Y Protofs, I am implying the very specific interactivities, which are capable of existing within the one-dimensional Space-Time only for the duration of the infinitesimal fractions of what we define as an “instant”. The schema of their synthesis implementation is elaborated by me so that you could at least generally imagine the very Entity of the inertial Synthesis process, as well as the resonant formation of all the “karma-forms” in the “realizational niches” of one-dimensional sublevels of the ODS and Form-Systems. All these “karma-forms” represent all the multitude of the intermediate, semi-synthesized inner-sub-aspect conditions, which precedes the inertial implementation process of the inner-aspect, as well as inter-aspect Synthesis inside each of the twelve Qualities.

14.15662. In reality, as I have noted previously, conditionally “emanation-like” Conscious Fields of every “rib”, whose Y-Y Configurations aren’t balanced with corresponding (Л-Л) conditionally “psyche” force interrelationships with the Y...Y (U...U) or Л...Л (L...L)-Formo-Creators Configurations, instantly locate (resonate) within the local sloogrent “part” of skrruullerrt system the more favorable “tetrahedron” structures, within the mutual Configurations of which the “rib” energy-informational interrelationships between СЛЮИ-СЛЮУ (SLUI-SLUU)-Formo-Creators and “peaks” (Formo-Creators), eglleroliftiveively-organizing their Creative Activity, mostly correspond to the quality of Energy-Information, programmed into their Y-Y-Configurations. At the very instant, while this more harmonious energy-informational interaction (with no “mixing” or a complete confluence!) takes place, the multi-qualitative dynamics of the interacting “emanations” and “psyche” is being transformed into a somewhat different sphering “structure” – the mutual for both of them “bi-tetrahedron karma-form”, narrow-specifically manifesting within 0-1-dimensional wave range of Energy-Plasma, some of the aspect of some creative tendency of the current sub-Aspect of some of the Aspect of some of the single Quality.

14.15663. There is an infinite set of such “bi- bi-tetrahedrons” (two “tetrahedrons” linked by their bases), spatially reflecting only a single part of the current realizational tendency. Within their own sub-level they are automatically self-organizing into the duvuyllerrt dynamic groups (resonant zones) along the various prevailing Vectors of different resonant interactions with the “karma-forms” of other sub-Aspects of the same Aspect of the same Quality. Most resonating with each

other Formo-Creators Configurations (tetrahedron “peaks”) coupled with the energy-informational linking “rib” dynamics, are inertially superimposing onto each other, thus forming (along each of the narrow-specific inner-aspect Synthesis Directions) a somewhat particular (different from them) “dispersively-fluctuating” sphering dynamics of radically different frequency Form-Creator Configurations – the specifically sphering “pyramids with a cube in their base”.

14.15664. Let me emphasize, that factually all these resonant synthesis interrelationships between the multi-qualitative Conscious Fields, which level-by-level (dimension-by-dimension) self-organizing into a one and only super-temporal “Instant”, are being manifested within the individual dynamics of Formo-Creators of proto-form Levels (within the wave ranges between 0-4th dimension) of Our “personal” Self-Consciousness only as they continue to implement the inertial “self-projecting” (among the mutual slloogrent dynamics of brain’s Formo-Creators) into the most identical with them BBY(VVU)-Configurations, slloogrently structuring the corresponding HYV-BBY (NUU-VVU)-Configurations.

14.15665. Why “emanations” and “psyche” (beginning with the 2-3-dimensional levels, these are already a much more complex Thought and Sense-Form Configurations) aren’t immediately synthesizing into the “karma-forms”? Because the Conscious Fields, structuring the “tetrahedrons ribs” have different volume of synthesis of sub-Aspects and Quality Aspects, starting from the various stages of the most primitive inner-aspect state (when “tetrahedrons ribs” are formed by the BBY(VVU)-Configurations of multi-qualitative Conscious Fields, differently manifesting through the realizational Forms of one-dimensional Form-Systems the narrow-specific dynamics of a single, out of their infinite number, realizational Aspects of the same Quality, simultaneously manifested within the very narrow frequency wave range) all the way to the inter-aspect state (when “ribs” BBY(VVU)-Configurations are acting as multi-qualitative Conscious Fields, which structure the realizational dynamics of various Aspects of a single, out of all twelve, Pure Qualities, simultaneously manifested within a very narrow 2-3-dimensional wave range of Energy-Plasma).

14.15666. That is, where the action of a ЙЙЮ-ЛЛУ-АЙЙ (YYU-LLU-AYY)-Law - “The Destruction and Destabilizing of all Forms of Quality Aspects in a global Creative Dynamics of the Universe” can be observed quite vividly. What is the meaning of that? The meaning of that is the fact, that in order for the Synthesis of these more complex and more stable for themselves “emanations” and “psyche” to commence into even more complex, and thus, more stable Configurations, it is necessary to vigorously destabilize the slloogrent energy-informational interrelationships, which are inherent for every single one of these Configurations, so that the process of “diffusion” between them could occur (just like a sugar dissolves in a cup of a hot tea). Without such preliminary destabilization of the previous – lesser qualitative – individual manifestations, the synthesis processes of the formation of additional energy-informational interrelationship between the Configurations of the ever increasing number of Formo-Creators, would either not occur at all, or would progress much slower. That takes certain amounts of time, which, although they are variable along each of the Vectors, have a mutual tendency towards the decreasing of required time volume, as the degree and profoundness of the inter-quality Synthesis increases.

14.15667. You should have a solid understanding of the fact that the various inner-aspect states of “emanations” and “psyche” are organized into their own infinite types (Vectors of the inertial Synthesis) of the unstable “tetrahedron-like” conditions, since every Aspect of each of the twelve Pure Qualities is differentiated “within Itself” throughout each of the frequency sub-levels onto

the certain multitude – approximately 2000 – basic realizational sub-Aspects, each of which is ALREADY synthesized out of billions of types of sub-...-sub-Aspects. Such an unstable “tetrahedron” states aren’t able to commence the intimate synthesis interrelationships with each other until the full completion of inner-aspect Synthesis cycle (throughout each of the sub-Aspects), which is being implemented within their one-dimensional Forms, occurs.

14.15668. The interrelationships between such narrow-specific “tetrahedron” groups, formed by the sub-aspect force reciprocals, are so inert and unstable, that they simply aren’t capable to create the independent “karma-forms” and can sometimes be interpreted by us on an unconscious level of Perception as somewhat, instantaneously appearing and momentarily disappearing, quite vague and completely uncertain Feeling, or some elusive and imperceptible “thought” or “emotional” “noise”, the meaning of which is impossible to register or retain, since the very meaning (sense) – in our usual understanding of that term – simply isn’t present yet within this current “karma-form” flux. However, by means of the associative aligning towards the frequency of some transient emotional feeling (through the Meditation) with CAF-DRF-dynamics of cerebrum’s Formo-Creators, you could try to resonate with a more complex BBY(VVU)-Configuration of the CΦYYPMM (SFUURMM)-Form, sillogrently structured by the current “karma-form”.

14.15669. Thus, during the process of the inertial Formo-Creators Synthesis, the eglleroliftive dynamics has a tendency towards the duvuyllerrt interaction of BBY(VVU)-Configurations of Conscious Fields of the lesser qualitative sub-levels of Energy-Plasma with BBY(VVU)-Configurations of Conscious Fields of more qualitative sub-levels. The unstable ether BBY(VVU)-Configurations of each of the “emanations” and “psyche” of 0-1-dimensional wave range of Space-Time, which have inertially formed the variously sphering “dispersively-fluctuating” “tetrahedron” BBY(VVU)-Configurations of “karma-forms” by means of their interaction, are being subjected to the compulsory quantizing (clexing) by Formo-Creators in a following rotational frequency Shift. That compulsory quantizing implies the “projecting” of the next in turn урглыкст – while within the 1-2, 2-3 and 3-4-dimesional Realities the аффтракт, уйккуй and “quantum” of the new Energy-Information are being “projected”.

14.15670. As a result, the balance between them instantaneously transgresses, and they again resonantly “rearrange” with one another, being automatically drawn into the BBY(VVU)-Configurations of other, slightly more qualitative “tetrahedrons”, which are structured by the mostly corresponding energy-informational interrelationships. Thus, within the current rotational Shift there are “new” types of “karma-forms” are being inertially created simultaneously throughout all possible Synthesis Vectors. In the following rotational Shift the entire quantizing (clexing) process repeats anew and also ceases with the formation of the “new” types of “karma-forms”.

14.15671. Please keep in mind that the above mentioned energy-informational “ribs” in reality aren’t what you perhaps accustomed to from school’s geometry lessons; they are not the mere edges of a polyhedron, identical to the classic geometry figures. Oh, no! These – are functional, duvuyllerrtly multi-polarized simultaneously throughout all possible Directions of the skrruullerrt system Force Vectors, implementing the primordially programmed mutual dynamics of the inertial development (refocusings) of Conscious Fields within the strictly defined narrow-frequency wave range of the creative manifestation of BBY(VVU)-Configurations of Formo-Creators of the Energy-Plasma. The Energy-Information itself, which is encoded into BBY(VVU)-Configurations of “emanations” and “psyche”, is contained within the narrow-specific dynamics, incentively created between the BBY(VVU)-Configurations of Form Creators of each of the “peaks” of current energy-informational

Form-structure, which I only figuratively compare with the well-known to you geometrical figure. The resemblance between them is pretty much the same, as between the working draft of the future building, and the real structure, already populated and equipped with various home appliances, electronics, plants and the like.

14.15672. Within the tremendously powerful multi-qualitative dynamics of constantly variable Form-Systems, one can't observe any "tetrahedrons" or other above mentioned "geometrical forms" whatsoever. In order to describe all that I had to consciously "stop" ("photograph") instant-by-instant (from with VEC, by means of ФЛИУ-BBY-Modules) the inertial dynamics of my own Self-Consciousness and delve into the very "microscopic" structure of the inertial slloogrent dynamics of BBY(VVU)-Configurations of Formo-Creators of the Energy-Plasma of each Reality, simultaneously superseding one another throughout the multitude of multi-qualitative Synthesis Directions (as in a Sci-Fi exploration, utilizing the incredibly powerful, hundreds of trillions magnifying times, microscope). I had to record and deeply analyze every instance of each step-instantaneous "reconnaissance" of the energy-informational interrelationships from BBY(VVU)-Configurations of "karma-form" Formo-Creators of certain Realities, into BBY(VVU)-Configurations of Formo-Creators of somewhat different "dispersively-fluctuating" sphering "karma-forms", structuring the entire multitude of other multi-qualitative Realities of the current – 0-1-dimensional or 1-2-dimensional slloogrent "area" of skrruullerrt system.

14.15673. So, everything, what I have just told you about and described in a previous paragraph, supposedly, for our 3-4-dimensional HYV-BBY (NUU-VVU)-Configuration Formo-Creators, in reality, doesn't exist. That means that visual observance of this simultaneous multi-qualitative interaction between the resonating Conscious Fields is simply impossible even with the use of the most advanced scientific, or other similar type of equipment. That is because you can only observe the powerful inertial interrelation of only the fractional part of the intermediate results of these force interactions, occurring far beyond the limits of your perception of "quantum" dynamics.

14.15674. The distinctive Form-image of the implementation Principal of multi-qualitative energy-informational interrelationships between Formo-Creators and СЛИИ-СЛИУ (SLUI-SLUU)-Creators implies, that existence of СФУУРММ (SFUURMM)-Forms (or Karma-Forms), "within themselves", in some type of discrete state of separation from other СФУУРММ (SFUURMM)-Forms (or Karma-Forms), is totally impossible. What does take place, is a mutual for all, slloogrent-multi-dimensional dynamics of Energy-Plasma, which is unified by the multi-qualitative Directions of specifically synthesized energy-informational interrelationships simultaneously throughout all possible Levels, types and Vectors of force interactions, which are in turn structured by the force interrelationships between absolutely all possible sub-Aspects and Aspects of all of the twelve Pure Qualities.

14.15675. At that, these slloogrent Levels aren't being "horizontal", "vertical" or positioned within Space-Time in a form of certain "stripes" or multi-qualitative "layers". Instead, each of these Levels bears their own variable characteristics and behavior; also they aren't bound to the linear Space-Time concept, which has become your conventional perception. On top of that, they have absolutely nothing to do with such of your subjective notions as the top, bottom, left, right, diagonal, transverse, far, close, deep, shallow, light, soft, hard, heavy and so forth. Previously I had defined all that with such terms as slloogrent, holographic, "fractal" and multi-polarized. However, in combination all these terms will only reflect the fraction of these universal manifestation principals of the integral mutual slloogrent-multi-dimensional dynamics of all the Energy-Plasma Levels, whose specific

states are slloogrent and are “self-projecting” into every single condition of all the other Levels.

14.15676. Continuing the sequential reviewing of the inertial formation process of Karma-Forms from the intermediate “karma-fraction” conditions and CΦYUPMM (SFUURMM)-Forms, which in turn are being created by the “confluence” of the incompletely-synthesized Thought- and Sense-Forms (“emanations” and “psyche”), I would like to highlight once again, that the variously-directional Force Vectors of each of the “ribs” of the one-dimensional “tetrahedrons” of the extremely-unbalanced “karma-fractions”, individually structured by the Energy-Information of the same Quality Aspect, acquire the tendency to become synthesized in groups of four (resonantly uniting together) within the “highest” (0, 75 – 1, 0-dimension) 0-1-dimensional wave range, which duvuyllerrtly bordering with the “lowest” 1-2-dimensional wave range of Energy-Plasma (1, 0 – 1, 25-dimension). They are synthesizing with the mostly identical to them “dispersively-fluctuating ribs” of the “karma-fractions”, sphering in the same Direction; these “karma-fractions” structure the BBY(VVU)-Configuration of each of the inertially-following duvuyllerrt Reality by means of the slloogrent dynamics of rotational Shifts. As a result of which, the infinite multitude variety and types of “karma-fractions” are being created throughout the multidirectional, inter-quality wave ranges of 1-2-dimenional groups of duvuyllerrt Continuums. Their somewhat different dynamics is progressing in a “pyramidal” form, created by means of resonant amalgamation of energy-informational “ribs” of four one-dimensional “tetrahedrons” with very similar properties of various sub-Aspects, pertaining to the Aspect dynamics of a single, out of all twelve, Pure Qualities.

14.15677. Throughout each group of duvuyllerrt Aspects of each Pure Quality, there are specific energy-informational Vectors of the inter-aspect Synthesis are being formed, which somewhat resemble the resonant zones of “pyramidal karma-fractions”: small “pyramids”, which are all look kind of similar “geometrically”, but which possess totally different attributes of slloogrent Directions throughout the mutual dynamics of 1-2-dimensional levels of Energy-Plasma, which in turn tremendously effects the inertial dynamics and qualitative differences in Form Configurations of Form-systems. The “pyramids” of 1-2-dimensional “karma-fractions”, partially synthesized throughout all the Aspects of each of the Pure Qualities, by means of formation of the variety of inherent synthesis dynamics, upon the shift of the CAF-dynamics of Formo-Creators (which, as you might recall, structure the “peaks” of each of ether structures) within the rotational Cycles of 2-3-dimensional Form-Systems, begin the “peak” coupling process into “octahedrons”, which represent the groups of unsteadily-synthesized Aspects of single Pure Quality throughout the global creative dynamics.

14.15678. Sequentially continuing the Synthesis process throughout the 2-3-dimensional wave range, Formo-Creators of “octahedrons” synthesisally create and structure the unlimited number of variously “dispersively-fluctuating” sphering “hexahedron” (as a consequence of sphering – “spheroidal”) Configurations, which are all connected with each other by means of the mutual for all of them “ribs” of energy-informational interrelations. All the “hexahedron” totality of various Pure Qualities is in actuality an unlimited number of “karma-fraction” form-frameworks, which structure all the Form-Systems of “our” 3-4-dimensional wave range with the inherent Energy-Information, whose dynamics envelopes various Directions and Synthesis schemes, which could be described as the dual Quality Synthesis.

14.15679. Upon the more detailed review of the duvuyllerrt inertial formation of the “geometry” of Forms (including Space-Time) of groups of 2-3-dimensional duvuyllerrt Continuums schematically

can be described in the following manner: within the 1-2-dimensional wave range the two similarly “dispersively-fluctuating” sphering “pyramids” are resonantly being connected by means of four “peaks” and four “ribs” of their “square” foundations into the mutual, inertially a slightly more stable “octahedron-like karma-fraction”, the angular sphering of which resembles the two multidirectionally sphering halves of a single “spindle”, which in general (independently from the dynamics, inherent to the current “karma-fraction”) structurally resembles a single “dispersively-fluctuating” “octahedron”, every part of which (“half-octahedrons”, as I call them) in turn has its own svilgs-dynamics.

14.15680. The consolidation between the variously-sphering “pyramids” is performed in a similar fashion as in case with quarks, when they are being “glued” together by means of gluons; only in this case the role of “quarks” is being resembled by BBY(VVU)-Configurations of “ribs” of each type of the “karma-fractions” – “emanations” and “psyche”, while the role of “gluons” is played by the multidimensional graviton-analog Formo-Creators: укстры, такстры, йюкстры, хваслоны, поранты and others (which I will talk about a bit later). Formo-Creators of both “peaks” of “dispersively-fluctuating” sphering “octahedron”, being within the dynamics of Form-Systems the duvuyllerrt Aspects of a single Pure Quality, begin an active attraction of BBY(VVU)-Configurations of “peak” Formo-Creators of other “octahedrons”, which resonate with them on a single frequency, but which “rotate” in different Direction, meaning that they are a bit different in terms of a primordial “sense”, programmed into them initially, since they belong to different Aspects of the same Quality.

14.15681. After the “merging” of two “octahedrons” Formo-Creators of each of the two connected “peaks” of two differently-directional sphering “octahedrons” and restructuring of their BBY(VVU)-Configurations, form the incomplete dynamic of a “hexahedron” from the four multi-qualitative “half-octahedrons”, two of which reflect one group of duvuyllerrt Aspects, while other two reflect the second group of duvuyllerrt Aspects of a single, mutual for all of them, Pure Quality. The “facets” of that “hexahedron” are formed by means of the “square footings” of the four “half-octahedrons”, while BBY(VVU)-Configurations of Formo-Creators of four vacant “peaks” are being positioned in the center. As soon as the two pairs of these differently-directional “rotating” multi-Aspect “half-octahedrons” begin the intense resonant interactions with each other, their svilgs indexes immediately change, which in turn weaken the interrelations between Formo-Creators of the sixteen (pairwise connected) exterior “peaks” along with four inner merged “peaks” of the partially formed “hexahedron”. The established disbalance literally, at the very same instance, initiates the “involvement” of the next pair of resonant “half-octahedrons” (the third group of duvuyllerrt Aspects of the same Quality) by means of its “peaks” (BBY-Configurations of its own Formo-Creators), thus greatly compensating (balancing) the tension interrelation dynamics, which have formed as a result of the qualitative change of svilgs indexes. This new “addition” (of the third group) has made the Configuration of the newly formed “karma-fraction” even more stable, in relation to all of its previous states.

14.15682. Thus, at the same exact instance, the dynamics of the infinite multi-qualitative 3-4-dimensional Levels in a form of the differently-directional Creative Activity of the innumerable multitude of “hexahedron masses” (various Synthesis Vectors between all Aspects and sub-Aspects of some of the pairs of different Pure Qualities) has inertially formed within the Energy-Plasma. These “hexahedron masses” resemble some “cube-like” structures, which possess the multi-qualitative inner dynamics, but which have the mutual dynamics within the separated wave ranges. Notably, each one of such “dispersively-fluctuating” multi-sphering hexahedrons, which form by their angular sphering the infinite number of specifically interconnected multi-qualitative

“spheroidicities”, simultaneously and “independently” from the dynamics of other interconnected “ribs” and “peaks”, at the same time, continues to sustain the individual dynamics of the energy-informational interrelationships between “karma-fractions” of all “previous” dimensional Levels, manifested within each “cubic sphere” on a specific frequency, in a form of the specifically sphering “octahedrons”, pyramids” and “tetrahedrons”, which are being synthesized by Formo-Creators of Conscious Fields of 3-2, 2-1 and 0-1-dimensional wave ranges.

14.15683. Provided for the existence inside of these structures of the multi-qualitative dynamics of the balanced BBY(VVU)-Configurations of differently-directional force Conscious Fields (the mutual frequency for all three pairs of “half-octahedrons” somewhat “attracts” them towards each other, while the difference in the Creative Potentials of various Aspects of a single Pure Quality which they synthesize, somewhat “repulses” them away from each other) all the infinity of these “cube-spherical” karma-structures are not being merged into a single integral whole, but instead form (in relation to the other multi-qualitative BBY(VVU)-Configurations) some “marginal” (wave range) informational space with each other, which is filled with the mutual Information, inherent only for their ether layers (symbolically simultaneously being “yes” and “no”, merged together, while nevertheless preserving their individual structural inherentities and their distinctive energy-informational dynamics).

14.15684. Schematically this process looks approximately so: three pairs of differently-directional sphering “half-octahedrons” (throughout the inertial dynamics they resemble something like “spindle-like” energy-informational vortexes), which resonantly continue their sphering together, while being merged by means of their “peaks”, however now we can observe some slight difference in their sivilgs-dynamics in comparison with their previous characteristics. Why these qualitative transformations are taking place? Because within the slloogrent dynamics of the mutual Synthesis, not only Conscious Fields Formo-Creators of the synthesized Aspects of the particular Pure Quality are being actively resonantly (gradually) interacting with each other, but also the Formo-Creators of the corresponding Aspects of all the other ten Pure Qualities, “karma-fractions” or CΦYYPMM (SFUURMM)-Forms of which are structured by means of the same slloogrent Energy-Information, but which is being differently interpreted by various Proto-Form Formo-Creators.

14.15685. For instance, a cat is sunbathing while experiencing something pleasant (peace, quiet and bliss). CΦYYPMM (SFUURMM)-Forms of that individual experience are being formed by the cat’s Self-Consciousness Formo-Creators on the basis of the energy-informational interrelationships between various “karma-fractions” of Aspects of such Pure Qualities as Love-Wisdom and Steadiness-Stability, which they synthesize, and which are being dominant in relation to the other ten Pure Qualities. Somewhere else a “human-being” lies on the beach sunbathing and experiencing the same peace, quiet and bliss, but in a different way. CΦYYPMM (SFUURMM)-Forms of that “personal” experience are created by a “human-being” Self-Consciousness Formo-Creators because of Aspect Synthesis of the same vibration sub-levels of the other two dominants – Love-Wisdom and Will-Intellect. Near them, Self-Consciousness Formo-Creators of some mushrooms and lichens are also positively experiencing and resonating towards the same exact Information within the same wave range due to the specific Synthesis of Aspects of such dominants as Will-Intellect and Tendency, taking place within their Self-Consciousness structures.

14.15686. So, during the TES-“unfolding” of the exact same Information, the CΦYYPMM (SFUURMM)-Form dynamics (“karma-fractions”) within Self-Consciousness structures of a “human”, a cat and

mushrooms, which is reflecting the characteristics of the exact same vibrational sub-levels of the ODS, despite the tremendous qualitative difference (let's not consider the mutual difference between all of them in terms of the of conditional degree of "mentality" and "vitality") in their BBY(VVU)-Configurations (which are structured by the Aspects of completely different Pure Qualities!) is also being resonant (however, not identical!). The Force Vectors (the individual dynamics of the Creative Activity of Formo-Creators of Conscious Fields of every single Aspect) which inertially participate in the implementation of that simultaneous synthesis dynamics are differently-directional. Consequently, upon the existing resonant effect, Configurations of the "hexahedron" Formo-Creators, entering into a creative resonant interrelationship with each other, but resembling the synthesized dynamics of Formo-Creators of Aspects of various Pure Qualities, possess the various qualitative attributes of the individual sphering.

14.15687. One more example: in some of the Synthesis Directions, "karma-fraction peaks" Formo-Creators, which are reflecting the dynamics of such Aspects of a Pure Quality as Love-Wisdom, can attract into their BBY(VVU)-Configuration the Formo-Creators, which are reflecting the dynamics of such Aspects of the Pure Quality as Will-Intellect and vice versa. In some other ten Synthesis Directions, the similar mutual gravity can be formed between Formo-Creators of such Aspects of the Pure Quality as Love-Wisdom and Formo-Creators of the other ten Qualities. Yet in some other of the ten Synthesis Directions, the various types of energy-informational interrelationships can be formed between Formo-Creators of such Quality as Will-Intellect and Formo-Creators of Aspects of each of the other ten Pure Qualities. And the same goes for every single Pure Quality! They can pairwise implement some instable state of something unified whole only in a form of certain "duality" – the CΦYYPMM (SFUURMM)-Form or a "karma-fraction" of 3-4-dimensional Levels of Energy-Plasma.

14.15688. However, this inherent to the current Levels, "duality", is simultaneously being the Cause and the Consequence of these types of interrelationships. It is being their Cause since the inertially forming state of constant force instability, created between the "emanations" and "psyche", which structure the Configurations of all the "tetrahedron ribs", is actually a key factor of emergence within the Energy-Plasma of the multi-qualitative eglleroliftive dynamics (constant strive of these inertially synthesizing Elements of Collective Intellects towards harmonization, composure and perfectibility) owing to which, the certain part of the global slloogrent Process, which we subjectively interpret as Evolution, is being implemented.

14.15689. It is also being a Consequence because as a result of additional complex-configurational compounds between the "emanations" and "psyche" of multi-qualitative "tetrahedrons", there is always a new Information quantizing taking place, which again and again creates conditions for the formation of tension states between all of them, which in turn stimulate them towards more and more resonant interactions. The more quality-differential interactions are being formed between "tetrahedrons" merged into the mutual dynamics of a certain Configuration, the less provisions are being created for the formation of various tensions, since the incompletely-synthesized Force Vectors of each "emanation" and "psyche" receive additional opportunities for the resonant interaction with "tetrahedron ribs" Force Vectors, synthesizing the Aspects of other Qualities.

14.15690. As a result, the instantaneous resonant compensation of newly formed tensions throughout all the multitude of existing development Scenarios occurs. Therefore, the more qualitative is the Level, which any Collective Intellect Proto-Form is synthesizing, the lesser the degree of "duality"

(energy-informationally uncompensated) interrelationships with other Forms of Intellect. That is because with each new Level within the mutual synthesis dynamics of various Proto-Forms, the additional opportunities for the active inclusion in its Self-Consciousness dynamics of the compensational interrelationships with Formo-Creators of Aspects of other Pure Qualities is being implemented. Thus, the more dynamic and ideal (versatile) its BBY(VVU)-Configurations become. Please, also keep in mind, that all these inertial transformations are being implemented within a single and only Eternity Instant.

14.15691. One more inherentity of the energy-informational structuring of 3-4-dimensional Levels is that the mutual Formo-Creators Configuration of consolidated “peaks” of each newly formed within this wave range “karma-fractions”, also in turn can be structured by Formo-Creators BBY(VVU)-Configurations, which predominantly reflect the Aspects of two different Qualities, while to lesser degree (recessively) it can reflect the Aspects of some other Pure Qualities – catalysts. And it can be sub-Aspects and Aspects of any of the ten other Qualities in various aggregations; that is “later on”, when they actually resonantly being “sorted” with each other throughout the Configurations of the identical Synthesis schemes, inherent to the certain Proto-Form types, for instance - HYV-BBY (NUU-VVU) and HYVJI-BBY (NUULL-VVU).

14.15692. That is precisely the inherentity of the multi-qualitative “karma-fraction” dynamics, which is being utilized by our Formo-Creators, develops in a refocusing dynamics of the “individual” Self-Consciousness, the emerging ability of certain fluctuation background Creative Activity, reflecting throughout the Synthesis process of two main Dominants which we implement, a certain dynamics of Form-Creator of Aspects of other ten Qualities, which in turn can very easily transform (which definitely does occur in some other scenarios!) into the different Synthesis Directions, inherent for Form-Creator’s Configurations of other Proto-Forms. These are the precise characteristics of the potential multi-qualitative structuring of 3-4-dimensional (including 4-5-dimensional) Levels of Energy-Plasma, which explain the diffusive (meaning the simultaneous and duvuyllerrt “reprojecting” into each other throughout the various qualitative Directions) attributes of various Synthesis schemes, which are manifested within current wave ranges by Formo-Creators of all Collective Intellect Proto-Forms.

14.15693. Frankly, during all that research of differently-directional and multi-qualitative “dispersively-fluctuating” dynamics of the inferior Levels of Energy-Plasma, I have begun pondering, as perhaps many of you did, about why the “tetrahedron karma-fractions”, after they are being merged into quartet “pyramids”, don’t just begin to “merge” into “hexahedrons” in groups, but instead preliminarily acquire the more stable “octahedron” forms, which only then do unite into even more stable “cubical” structures? The answer has come very quickly: in order to provide the creative opportunity of more stable synthesis “karma-fractions” Configurations, it is necessary to employ as much as possible of the energy-informational interrelationships between the all “emanations” and “psyche”, participating in this process. Evidently, the three “octahedrons”, already merged into the “hexahedron” by means of the synthesis dynamics of six “pyramids”, have much more of such capabilities, comparing to just three separate “stand-alone” “octahedrons”. That is why the three-dimensional Forms are much more stable (more synthesized) than two-dimensional.

14.15694. That in turn means that the four-dimensional “karma-fractions” are even more stable than our current Forms? Yes, that is correct! However, usually the term “stability” is understood only as a certain analog of the biological, material steadiness and firmness, while I perceive in it simply

the stability of synthesized with each other energy-informational interrelationships, which perfectly can be substituted with a different word – universality. The more extensive the dynamics system of interconnection between various “karma-fractions”, which are merged into a single slloogrent Formo-Creators Configuration, the lesser the degree of the manifestation of the of self-identification dynamics with a certain Form, jointly participating in a mutual creative movement. You wouldn’t believe how hard it is for me to tell you all this! When my mom have told me to learn physics, I haven’t listened to her...And now I am telling you – cognize, study and master IISSIIDIOLOGY, my dear friends, so you can avoid the same mistakes I once did.

14.15695. Returning back to our topic of discussion let me highlight that as a result of all this various multi-qualitative dynamics the following occurs:

1. The Information, inherent to “psyche” of Aspects of certain Qualities, is being partially transformed into the “psyche” of other Qualities through the Formo-Creators Configurations,
2. The Information, inherent to the “emanations” of Aspects of certain Qualities, is being partially transformed into the “emanations” of other Qualities through the Formo-Creators Configurations,
3. The Information, inherent to the partially synthesized with each other “psyche” of Aspects of certain Qualities, is also being transformed through the Formo-Creators Configurations into the partially mixed “emanations” of Aspects of other Qualities,
4. Simultaneously with all that, the energy-informational Entity of mixed multi-qualitative “emanations”, through the Formo-Creators Configurations of mutually formed “peaks” is being “projected” into already mixed (within the same exact sublevel!) multi-qualitative “psyche”. Therefore, within the current Energy-Plasma wave range, the inertial dynamics of certain, more monolithic and much more complex energy-informational Flux occurs, which by itself reflects more integral and harmonized state of the mutual synthesis dynamics of “karma-fractions” of all Pure Qualities, than all its previous states.

14.15696. Thus, within a complex “geometry” of 3-4-dimensional wave range of Space-Time, the dynamics ether structures are being manifested out of all the variety of multi-qualitative 2-3-dimensional wave ranges; they are formed by means of three pairs of interconnected and somewhat “differently-directional”, energy-informational vortexes, partially delineated with the mutual for all of them Energy-Information. The “inner” part of each out of these three, simultaneously interrelating with each other pairs, schematically reminds “me” the something, resembling a “dumbbell”-shaped object, quickly spherizing (with a simultaneous manifestation of various parameters of angular spherizing) along of its axis, as if it symbolizes the well-known sign “infinity” (∞). But they (energy-informational interrelationships between various Aspects of a single Quality) are actually directed towards the Infinity, birvulartly penetrating absolutely all “superior” and “inferior” Levels of the Tertiary Energy-Plasma!

14.15697. The powerful svilgs–spherizing dynamics correspondingly transforms the energy-informational movement of “ribs” of all “square” perimeters, serving as foundations of each of the “half-octahedrons” into the “circumference”-like shape, while the spherizing “pyramids” (halves of each differently-directed spherizing “octahedrons”) look “cone-like” throughout the global energy-informational dynamics. The “karma-fractions”, formed in such synthesis fashion, in their mutual

creative dynamics already possess the “complexly-spheroidal” Forms – specifically variously-sphering “cubes”, the “ribs” of which are structured by the multi-qualitative dynamics of three pairs of variously-sphering “parts”, forming three, connected in a single sllloogrent “spot”, pairs of multi-qualitative “half-octahedrons”. All the multitude of these “hexahedral” structures, which form within the 3-4dimensional Space-Time by means of their multi-sphering movement something, very much resembling (in my opinion) the soapsuds, with similar in size “soap bubbles”; they constantly sphere “all around”, in all possible directions, and have a tendency towards the self-appearing simultaneously in multitudes of Synthesis Directions, inherent to the realizational Forms of the current sub-level of Energy-Plasma.

14.15698. This is the global unifying-balancing Principal, which is the basis of the dynamics of all realizational Forms of the Tertiary Energy-Plasma, structuring all of its “inferior” as well as “superior” Levels of multi-qualitative dimension, with the distinction being that the quantity of force (energy-informational) interrelationships within each Configuration of Formo-Creators and inherent to them Conscious Fields, differ from the same indications of the previous dimension in terms of the increasing of Creative Potential abilities by many times, equivalent of the synthesis movement of the “karma-fractions” Creative Activity (in other words, with the increasing of dimension, these parameters within the inertial dynamics of the realizational Forms are being constantly universalized).

QUESTION: Oris, could you please describe in short the multi-level Synthesis process, directly concerning the Self-Consciousness of the “human-being”?

14.15699. What I have defined under the term inner-sub-aspect process as well as the inner-aspect Synthesis, isn’t in any way identifiable or cognizable (at this point) for any of you, dear Urdllummuurrd, since all of that is taking place on Levels of Consciousness of Form-Copies - YY-BBY- (UU-VVU) Conglomerates. In fact, all the sub-levels of your Self-Consciousness aren’t yet synthesized; but even if they are partially synthesized, it isn’t enough for the stable and sustainable refocusing into the ЛЛУУВВУмическое (lluuvvumic) development direction. You might think, that the inferior Levels of your Self-Consciousness are already synthesized, however, in case of the “projecting” of Configurations of Formo-Creators of your Self-Consciousness in some of the multitude of other – proto-form – Synthesis Directions, the manifestation degree of the quality of your CAF-DRF-dynamics instantly falls to Levels, which are inherent to Formo-Creators of that particular Direction. If you find yourself in a situation where the danger to your Life is obvious and inevitable, while some of the sub-levels of 1 through 3 Levels of the first two Energy Centers of your Self-Consciousness aren’t completely synthesized, you instinctively will choose to defend your own Life at all costs, even if it means the Life of the other.

14.15700. As you might recall, the “tetrahedrons” are the basis of the mechanism, by means of which the Formo-Creators can manifest their inner- and inter-aspect Synthesis inside of a single Pure Quality. Within “our” Reality type, where the inter-quality Synthesis are becoming more and more active, the “tetrahedron” dynamics no longer exists in its “pure” form, while BBY(VVU)-Configurations of Formo-Creators of our Self-Consciousness are implementing mostly through the “hexahedron” and “icosahedron” energy-informational interrelationships. The mechanisms of the inner- and inter-aspect Synthesis within Our HYY-BBY (NUU-VVU)-Configurations still are the key structural elements for the implementation of more complex inter-quality processes.

14.15701. The Superior Formo-Creators of biological analogs of HYY-BBY (NUU-VVU)-Form-Type, resonantly choose only these “tetrahedrons”, “pyramids” and “octahedrons” out of their multitude, which are being slloogrent “parts” of CΦYYPMM (SFUURMM)-Forms, inherent to the various biological Proto-Forms of the JJIYY-BBY (LLUU-VVU) in order to create their own “hexahedron” Reality. Since the HYY-BBY (NUU-VVU)-Form, as well as all the other Proto-Forms of ΓΟΟΛΓΑΜΑΑ-A (GOOLGAMAA-A), is actually a diffusive Form, the interference of other development Direction Formo-Creators into the CAF-DRF-dynamics of Formo-Creators of its Self-Consciousness (according to the incompleteness of synthesis degree) is inevitable. The existence of Diffusive Forms is explicable by the fact, that the Energy-Plasma itself is diffusive and it is completely impossible to draw the exact boundary between the Creative Activity of Formo-Creators and CΦYYPMM (SFUURMM)-Forms of one Proto-Form and the activity of Formo-Creators and CΦYYPMM (SFUURMM)-Forms of a completely different Proto-Form, ongoing within our Self-Consciousness; where exactly ceases a certain Level of slloogrent dynamic of Energy-Plasma and commences the other Level of the exact same slloogrent dynamic.

14.15702. All synthesis Realities within the 3-4-dimensional wave range are formed by the “hexahedron” dynamics, the “karma-ribs” of which are the carriers of Force Vectors and Synthesis Directions of Energy-Plasma, inherent to the Formo-Creators of certain Proto-Forms. The “hexahedron” conglomerates are being the multi-qualitative synthesis dynamics, which is being formed from the multitude of resonant interconnections on the levels of “tetrahedron” Formo-Creators, Configurations of which in turn, form the specific Configurations of “pyramids” and “octahedrons” Formo-Creators, inherent only to their Synthesis Vector. The Information, which is included in this type of dynamics, is partially inherent to various Proto-Forms, on the basis of which Formo-Creators, for instance, of the HYY-BBY (NUU-VVU)-Forms, within each of the duvuylletrt groups of Continuums, form their own specific Perceptions: types of the world outlook, relationships, moral, ethical values and so on; which to some degree contains the Perception attributes of various Proto-Forms, manifested through our laws, religions, philosophy, politics, society and in some of our behavioral reactions.

14.15703. Such mixed activity of different development Direction Formo-Creators is a basis for the inertial implementation of the inter-quality Synthesis of some two Dominant Qualities, which begins on the “octahedron” level and which is being fully implemented through all possible “hexahedron” Forms. “Octahedrons” are the mediums for the multitude of variously-proto-form properties, from which Formo-Creators of JJIYY-BBY (LLUU-VVU) Direction resonantly attract into the informational space of their HYY-BBY (NUU-VVU)-Forms Self-Consciousness only these, which they are capable to successfully manipulate with. At the same time, on the level of Formo-Creators of “hexahedron” dynamics, the inter-quality Synthesis is being implemented between Aspects of various background and dominant Qualities, which on the “dodecahedron” levels results in a cessation Configuration Synthesis of all manifestation Forms throughout the two, inherent only to them, dominant Qualities.

14.15704. Upon the cessation of Synthesis of Aspects of two dominant Qualities, a certain group of Formo-Creators of Aspects of some of the ten background Qualities commences a gradual stirring to activity within the dynamics of Self-Consciousness informational space. Since the energy-informational interrelationships between the most compatible out of synthesized BBY(VVU)-Configurations of variously-Qualitative Formo-Creators are constantly being activated and extended, the opportunities for their dissemination throughout the “ribs” of newly formed “hexahedron” Conglomerates of various Self-Consciousness Forms are also constantly being expanded and

strengthened. Consequently, the “octahedron” and “hexahedron” Formo-Creators Configurations of some other Qualities, simultaneously synthesizing in “hexahedron” Directions, are resonantly being attracted into a global inter-quality dynamics of Formo-Creators of some two Dominants, as a result of which their powerful convergence and resonant joining is occurring on a “dodecahedron” Levels.

14.15705. For instance, that is exactly what happens with Formo-Creators Configurations of the first two Dominants of JIJY-BBY (LLUU-VVU)-Forms, where the gradual attraction of the Formo-Creators of Aspects of such Pure Quality as The Unanimity takes place upon the deepening of the Synthesis process between them. However, that is true only in the most favorable (HYVJJI-BBY (NUULL-VVU)) direction out of all possible existing development Vectors for the bio-analogs of HYV-BBY (NUU-VVU) Form-Types of JIJY-BBY (LLUU-VVU) Forms. Simultaneously with that, on the “dodecahedron” Levels, HYVJJI-BBY (NUULL-VVU) Synthesis Direction is also converging with “octahedron” and “hexahedron” Formo-Creators Configurations of such Pure Quality as The-Entity or The Steadiness, or any other Pure Quality, forming completely different proto-form Synthesis Schemes.

14.15706. It's worth mentioning, that in reality, the so called geometrical figures, which are mentioned in connection with the formation of an “energy-informational” basis, mutual for all the Conscious Fields and Formo-Creators of each “karma-fraction”, and which are being constructively manifested throughout various dimensional wave ranges, in fact represent the universal slloogrent “mechanism” of the corresponding (automatic) resonant alteration of Space-Time “geometry”, holographically structured by BBY(VVU)-Configurations of all possible Conscious Forms. This is necessary for the structural constructive manifestation and existence of the unlimited number of Forms of various types of Collective Intellects – the bearers of the specific types and kinds of Consciousness throughout all the slloogrent Space-Time “continuity”. The slloogrent dynamics of this refocusing “mechanism” can be compared with something, which in physics and mathematics is implied under the term fractality – the method of constant self-replication of all the nuances of the global Idea of self-similarity by means of “self-projecting” of the exact same Information into the different qualitative Levels of self-perception of various Forms of Self-Consciousness.

14.15707. Taking an opportunity, I would like to note, that absolutely all numerical denominations, utilized by us within 3-4-dimensional Reality types, possess the dynamic “fractal” nature, based on the fact that the vibrations of all the number sequences - univocal (1, 2, 3, ...8, 9), as well as multivalued – are formed by means of relatively close frequency characteristics of their individual vibrations, inherent for “projections” of Formo-Creators of various Quality Aspects, Configurations of which resonantly interplay with each other within the multi-dimensional space-time structures.

14.15708. That means that any digit represents by itself a defined manifestation form of specific properties (Energy-Information) of its “fractality” within outer Space-Time, and therefore possesses the ability to alter its “geometry” individually! The Configurations of all the univocal digits from 0 to 9, as well as “projection” Configurations of supposedly the “same” digits in their various combinations with other digits of natural sequence (for instance, the “fractality” of a digit 8 in numbers 68, 18, 85, 84; 781, 837, 528; 9835, 18727, 64328; 284359, 467881, 1938764... and so on) substantially differ between each other not only in terms of the energy-informational potential, intrinsic to each one of them, but also the characteristics of their resonant impact onto the dynamics of Formo-Creators Configurations of other Forms of Consciousness, results of which in every separate case can vary throughout essentially wide range – from the compatibility and balance all the way

to the duality and antagonism. Therefore, the Perceptions of a certain “sacral” meaning, ostensibly inherent to digits, remaining within the “human kind”, despite the multi-millennial research in this field, are still very much simplified and perfunctory. They will become much more qualitative and reliable once your Perception systems will be able to differentiate and recognize the dynamics of the individual resonant interconnections of Formo-Creators Configurations of digital “fractalities” in each of the possible variants of their unlimited combinations.

14.15709. The “fractality” principal can also become a great example of the formation of slloogrent nature of our current state of Self-Consciousness, all the self-organization of which can be compared with a certain eternal, globally-dimensional “fractal” structure, being self-similar throughout every single “spot” of its constructive manifestation, where all compositional parts of it are synthesized simultaneously in the lesser qualitative, as well as more qualitative Levels of Energy-Plasma. In its Entity, the “fractality” – is the infinite self-similar geometrical figure; only in our case that “geometry” is expressed quite conditionally through the resonantly-dissonant dynamics of all the multitude of interdependent “parts” of the global Configuration, and also it is dependent on the properties and quality degree of the supposed onlooker’s Configuration, whose Self-Consciousness Focuses are also multi-polarized into all the multitude of multi-quality scenarios, where every single one of these separated “parts” of the mutual global Configuration can be manifested somewhat differently, than in its other “parts”.

14.15710. The “tetrahedron” Levels of Form-Creator Configurations “fractality” provide the conditions for the implementation processes of inner-aspect Synthesis of each of the twelve Pure Qualities. At that, the “tetrahedron” dynamics is present throughout all the dimensional Levels of the Tertiary Energy-Plasma (from 0-th to the ± 12 -th dimension). Deepening of the Synthesis processes, coupled with the universalization of energy-informational interrelationships between Form-Creator Configurations becomes possible due to the duvuyllerrt addition of the Creative Activity of Aspects of some of the “new” Quality Forms to the current Configuration. The “tetrahedron” Formo-Creators are being activated by their Configurations into already existing synthesized interrelationships of other Quality Formo-Creators, beginning from the very elementary Levels and sequentially synthesizing with them all the way to the very complex (for the current Self-Consciousness Form) Levels of constructive manifestation.

14.15711. Thus, in each of the subsequent wave ranges, where “parts” of the slloogrent Configuration of a certain Form of Self-Consciousness are simultaneously manifested, Formo-Creators of the already synthesized Dominants – whether there are two, three or more of them – commence the active interaction not with all of the Formo-Creators of a new Quality, but rather gradually – first, with their “tetrahedron” fractalities” (since the probability of resonance with the lesser volumes of Energy-Information is always higher), then – with “pyramidal”, “octahedron” and “hexahedron”, depending on the dimension, where some “part” of the slloogrent Configuration is manifested. The same goes for all the Aspects of each of the synthesizing Dominants throughout all the dimensional Levels, where “tetrahedrons”, “octahedrons”, pyramids” and “hexahedrons”, plus everything, that have synthesized before throughout each of the “below-positioned” dimensional Levels, always retain the inherent degree of the Creative Activity within the Self-Consciousness Configuration Form. Formo-Creators of Aspects of the background Qualities also participate in the synthesis processes of Dominants all the way until the 3-4-dimensional wave range on a “tetrahedron” level, which are being synthesized into “pyramids”, “octahedrons” and the like upon the increasing of the dimensional level. The specifics of this mechanism begin to appear starting from the 9th dimension,

when much more complicated “fractality” types, bearing their own profound dynamics, commence to engage into the inter-quality synthesis processes, which in turn significantly contributes to the deepening of the interrelationships between the Formo-Creators.

14.15712. The mechanism of “tetrahedron” implication of Formo-Creators into the synthesis dynamics is based upon the slloogrent principal of any “rib” of any “karma-fraction” – the “rib” is potentially structured by the absolutely all Quality Aspects and absolutely all Synthesis Schemes, therefore, between the “karma-fractional peaks” (Form-Creator Configurations) all, inherent to any Proto-Form, energy-informational interrelationships can occur. The type of the manifestation Form’s Self-Consciousness determines the resonance extent of Formo-Creators with various global slloogrent parts of Energy-Plasma. For instance, our Self-Consciousness Formo-Creators resonate within the current dimensional wave range only with these types of the Energy-Information, which are capable of at least somehow, be sensibly reflected through the СФУУРММ (SFUURMM)-Forms, inherent to the “humankind” and ВВУ(VVU)-Configurations of Formo-Creators themselves. The same is true for an ant; however, his Continuum has different wave range and differs from ours. The interrelation between Formo-Creators of the most “people” Self-Consciousness is being implemented within 2, 5 – 3, 75 dimensional wave range, while ants assumingly “operate” within 2, 0 – 3, 0 dimensional wave range. Hence, the mutual dimensional wave range for both of our Consciousness types of energy-informational interaction is approximately 2, 5 – 3, 0.

14.15713. In this wave range Configurations of Formo-Creators of the 10th karmic Channel АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA) are being actively manifested, including байки, сфиллки, крокки, иффиллины, исскуллины, иннгуллины, as well as эннирисцы, оурффголлущы, ууффлуусцы, грэйсцы, аллгссы, ллаволловалоффты of Formo-Creators of 1, 2 and 3rd karmic Channels of ОРЛААКТОР (ORLAAKTOR) and АИГЛЛИЛИАА (AIGLLILLIAA); in this sense it could be asserted, that the active intercommunication even between “humans” and ants can be established. Moreover, the results in each separate case will be completely different, depending on the Perception Levels of certain Formo-Creators, which in this case would be responsible for establishing and maintaining of such bilateral interrelationship on both sides. By the way, here is my question to you in connection with the above mentioned statement: why is that the multitude of “human” nations, for the millennial periods of time, weren’t able to find at least some type of СФУУРММ (SFUURMM)-Forms in order to establish the mutual understanding of each other?

QUESTION: Is that true, that the “tetrahedron” Formo-Creators of first and second Levels of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA)-Иуссиуду can be manifested through our Self-Consciousness Configurations? Since we can perceive the Energy-Plasma on these low-frequency Perception Levels as a certain structure with the minimal quantity of conditional “ribs” and “peaks”, the Self-Consciousness Forms of these Levels seem too primitive to us. However, if someone is capable of perceiving the same exact “tetrahedron” Self-Consciousness Forms in a tremendously more complex, “fractal” fashion, then would it be possible for him to perceive the Self-Consciousness Forms of the same inferior Levels of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA) as Cosmic Creators?

14.15714. This is exactly what I have been telling you before, dear Глаайстрасс: The Formo-Creators Configurations of the fifth synthesized Levels of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИ-

МИЛИССА (INGLIMILISSA), frequency-wise correspond to the dynamics of the same dimensional wave range of the Formo-Creators of first synthesized Levels of ОРЛААКТОР (ORLAAKTOR) and АИГЛЛИЛЛИАА-Ииссииди (AIGLLILLIAA-Iissiidi), although the later reflect their own dynamics inherent to their own Configurations, completely differently than иммлы и рпророки. For instance, when we observe the outer Reality from the position of Formo-Creators of the 5th synthesized Levels of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA)-Ииссииди, we perceive everything from the egocentric positions, inherent to these Formo-Creators. However, if we look at the same outer Reality from the position of Formo-Creators of the 1-st Level of ОРЛААКТОР and АИГЛЛИЛЛИАА-Ииссииди (AIGLLILLIAA-Iissiidi), then the whole world-view within our Self-Consciousness immediately transforms and becomes positive and altruistic. Consequently, the “hexahedron” quality, structuring all the Forms of the outer Reality will also be perceived by us absolutely differently.

14.15715. For example, the carnivore completely ignores the orange, since it has completely different Perception regarding this particular Form of the outer Reality, than we do. The carnivore looks at this type of “hexahedrality” with no interest and doesn’t see in it the opportunity for the sustaining of his usual livelihood and survival (in terms of food). We, however, perceive the dragonfly not as a source of food, but rather as the scientific and explorer opportunity of discovery and research, while the birds actually perceive it as their favorite type of food. The dragonfly, orange and even the shish-kebab on the barbecue – these are all the “hexahedron” types of the outer Reality. And while we, just as some of the predator animals, will react similarly towards the shish-kebab, the herbivorous animals (the goat or a rabbit, for instance), will not react towards the same shish-kebab at all.

14.15716. All of this – is a dynamics of “hexahedron” Formo-Creators, or structuring them “tetrahedron”, “pyramid” and “octahedron” Forms-Creators, because of whom we can perceive any Form, outer us from totally different points of view. It’s completely unimportant how this Form looks like – the СФУУРММ (SFUURMM)-Forms, which resonantly activate the Creative Activity of various Formo-Creators within our Self-Consciousness, connect us with the corresponding Levels of our individual ODS. That is true regarding the goat, the rabbit and the carnivore – the traverse of all the slloogrent dynamics of transformation of the exact same СФУУРММ (SFUURMM)-Forms from the more qualitative Levels of our Perception into the lesser qualitative happens at the “junction point” of our Self-Consciousness Formo-Creators and СЛУИ-СЛУУ (SLUI-SLUU)-Creators of the ODS. And if the carnivore doesn’t like the roasted meat, since usually he eats the raw meat, while being really hungry, he is willing to eat the roasted meat as well. For us is quite the opposite: we don’t like the raw meat, however, under the extreme and severe circumstances, most of us are willing to consume the raw meat in order to survive, if nothing else is available. Thus, the slloogrent Levels of our Perception can change, depending on the Formo-Creators Configuration Levels, responsible for the decision making at that time. Remember, that the “traverse point” of various interests exist everywhere, when the diffusive dynamics of our Perception systems being implemented as the “exact same” Forms, “exact same” hexahedrons”, “exact same octahedrons” or the “tetrahedrons”.

14.15717. The conclusion is – in order to understand the outer Reality in a more profound and deep fashion, we have conditionally divided the very Qualities into their conditional sub-Aspects and Aspects, and then in the same manner we have conditionally “projected” their potential attributes onto our Perceptions regarding “tetrahedrons”, “pyramids”, “octahedrons” and the like. And then, out of all that, we have conditionally differentiated something as being “less qualitative”, while something else – as “more qualitative”. Although in reality all this is stipulated exclusively by

the Creative Activity of Form-structures of our own Self-Consciousness karmic Channels, while the elementary Formo-Creators Configurations of the most “inferior” Levels of АРГЛЛАМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA)-Ииссииди are also infinite and just in the same way valuable for the slloogrent dynamics of Energy-Plasma, as the most advanced and “superior” Formo-Creators Configurations of the 12th dimension. The water molecule is also an inferior dipole, without which the whole Global Ocean wouldn’t exist!

14.15718. For instance, if we look at the Formo-Creators ВВУ(VVU)-Configurations of АРГЛЛАМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA) at the moment of their inertial Synthesis, and the more qualitative interpretations of their own slloogrent activity through the Formo-Creators Configurations of ОРЛААКТОР and АИГЛЛИЛЛИАА-Ииссииди (AIGLLILLIAA-Iissiiidi), we will see that their separation for us is being purely conditional, since it only reflects the consequence of the limited abilities of our System of Perception, owing to which we are capable of distinguishing from the outer reality of something in relation to something else and define this “something” as “egocentric” demonstration (in relation to our own capabilities!), while the other “something” – as being “altruistic” (again, in relation to our own Perceptions in regards to this subject!). However, within the entire dimensional multitude, in which both of these creative realizations can simultaneously be manifested throughout the multi-qualitative “parts” of the activity, mutual for the current slloogrent Forms, they all potentially equally exist.

14.15719. According to our Perception, the “interrelationships”, which are being realized through the gradual (level-by-level) synthesis dynamics of the first two energy Centers – are the tension interconnections of the CAF-dynamics with the Energy-Information, which are to the greater degree are inclined to create powerful counteractions, then be in harmonious state with each other. But all the “pattern” of the Self-Consciousness Form state (as well as its outer reality) is being changed in a duvuyllerrt fashion as the increasing “projection” of the “perception” mechanism of the same Energy-Information into the more advanced dynamics of gradual interconnections, inherent to the next two following energy-Centers: the lesser-qualitative “projections” of Formo-Creators become able to make radically other – much more qualitative, altruistic and judicious – decisions, while consecutively and gradually resonating with the more qualitative “parts” of their Configurations slloogrent activity. The “tetrahedron” Formo-Creators Configurations, participating in the Pure Quality sub-Aspect Synthesis within 1-2-dimensional wave range, differ from the Formo-Creators Configurations of “tetrahedrons”, which participate in the resonant formation of “dodecahedron” Continuums of 4-5-dimension only by the fact, that energy-informational interrelationships, inherent to the “inferior” Levels of manifestation, undergo various kinds of resistance due to the weak capacity towards the interchange of the “decompressed” Energy-Information, demonstrated by the Formo-Creators.

14.15720. This creates the favorable conditions for the formation between the multi-qualitative “parts” of global slloogrent Configuration, of the very high degree of the inertia, which in turn is the result of the relatively small number of Formo-Creators “peaks”, resonantly uniting between each other the similar “parts” of the exact same Energy-Information: Formo-Creators of certain “karma-fractions” interpret it in their own way, according to their ОО-УУ(ОО-УУ)-Entity’s parameters, while Formo-Creators of other ОО-УУ-Entitys either powerfully antagonizing towards the dynamics of current Formo-Creators, or somewhat resonate with them by means of inherent interpretations, forming a very unstable energy-informational interrelationships. The greater the resonance degree between the various multi-qualitative “parts” of the slloogrent Configuration, the smaller is the

dissonance distance, which Formo-Creators of these “parts” would have to overcome in order to create within Space-Time the certain energy-informational Resomiral. The smaller the dissonance distance between the multi-qualitative “parts” of Formo-Creators Configurations is, the lesser the inertial degree, inherent to their Conscious Forms manifestation.

14.15721. The Energy-Informational Resomirals – resonant stable synthesis formations within Space-Time of the duvuyllerrt “parts” of the Formo-Creators Configurations of the multitude of the multi-qualitative Forms of Consciousness, which are structuring the various proto-form “karma-fraction” states in each of the dimensional wave ranges.

14.15722. It is quite important to differentiate between the Resomirals, which are the integral structures for the force (energy-informational) interrelationships between the mostly resonant Formo-Creators Configurations of the multi-qualitative Levels of the Energy-Plasma, and the notion of subjective Realities, which are the “projection” results of DRF-dynamics of various СФУРММ (SFUURMM)-Forms of the ODS onto the realizational CAF-dynamics Formo-Creators of Self-Consciousness. Thus, the Resomirals are primordially energetically invariable in each of the inherent to them qualitative states of various “parts” of the mutual slloogrent dynamics of Space-Time (this is what always primordially exists). All the variants of the subjective Realities – are narrow-specific “projections”, the sheer Illusion (this is what DOESN'T exist within the current “spot” of Space-Time) reflected on the “individual bio-screens” of every Self-Consciousness Form, of qualitatively constantly changing (again – only within the “individual” systems of Perception!) “karma-fractional” interconnections between Formo-Creators and resonantly corresponding to them СЛЮИ-СЛЮУ (SLUI-SLUU)-Creators, which can at the same time structure the entirely different Resomirals. Meaning that each type of subjective Reality – is only an “end result” of the focus dynamics of Formo-Creators, most actively participating in TES-“decompressions” of the informational space of Self-Consciousness of each of the manifested “individuals”, whose energy-informational manifestation parameters (in a “geometry” of Space-Time) are totally being determined by the quality of ВВУ (VVU)-Configurations of these Formo-Creators.

14.15723. For instance, every single “individual”, reviewing the exact same painting, will experience different impressions not only in regards to its outer, but also an inner meaning, which its author (painter in this case) tried to express through it, including the character and tendencies of the painter’s “personality” and so on. The whole energy-informational Entity of this painting – regardless of the “spot” of the global slloogrent Space-Time and the Temporal Flux, from where this object is being examined (reviewed) by the multi-qualitative Forms of Self-Consciousness – belongs to certain (out of the infinite number of them) “human” multi-quality Resomiral (considering that the object in question was designed by “people”, and not, for example, by animals). All the eternal multitude of the multi-qualitative Perceptions, resonantly arising during TES-“decompressions” of every “individual” (not only “people”, but also animals, who also have their own perceptions regarding any particular subject) along with configurationally manifesting (“self-projecting”) into the “individually” outer reality, owing to the Energy-Information, structuring of this subject, forms all the diversity of the specific manifestation of the aggregate focus dynamics of all types of “individual” subjective Realities throughout each of the slloogrent duvuyllerrt Continuum groups.

14.15724. The quality of every such Perception totally depends on the fact of which types of the most active proto-form development Direction’s hvasslons have participated in TES-“decompressions” of this particular Energy-Information. Thus, any object, energy-informationally (“karma-fractionally”)

structuring of any type of the “human” Resomirals, is actually a manifestation source of the multitude of subjective Realities within each Temporal Flux, where it is manifested in various forms due to various reasons (for instance, an archeological artifact, ancestral relic, historical or cultural value and so forth). Consequently, each Form of Self-Consciousness represents by itself a certain means of manifestation throughout the global mutual slloogrent Space-Time of certain part of СФУУР-ММ (SFUURMM)-Forms (СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators), which are inherent for the synthesis “karma-like” interconnections between Formo-Creators of the certain variety of the infinite multitude of various Resomirals. Resomirals – are super-temporal energy-informational structures; therefore, the focus dynamics of Formo-Creators of every single one of them possesses the ability to the manifest of the inherent to them Levels of the Constructive Activity throughout Continuums, which are in turn structured by various Temporal Fluxes, but which nevertheless possess the resonantly similar synthesis conditions for the manifesting of the current, very specific types of Forms of Self-Consciousness.

14.15725. It is possible (for a greater visualization and adaptation to your discrete Perception systems) to compare (purely conditionally!) all types of the multi-qualitative Resomirals with such mathematical notion as the multitude of valid digits, which would unite the integral, fractional, natural, even, odd, rational, irrational, simple, unequivocal, multivalued and other types of digits. Every single mentioned category is in fact a subset of even greater quantity of digits, which is formed by the addition of various subsets of yet another aggregated digit systems, such as integrated, interval (the analog of wave ranges) and others.

14.15726. All the multi-qualitative energy foundation of resomiral structures of Space-Time is slloogrently formed by means of the universal attributes of the duvuyllerrt resonance of BBY(VVU)-Configurations of Formo-Creators of absolutely all Forms of Self-Consciousness of the Tertiary Energy-Plasma, which in turn are simultaneously manifested throughout all the Temporal Fluxes and throughout all synthesized qualitative Levels. While the Informational foundation of any Resomiral is slloogrently based upon BBY(VVU)-Configurations of all the multitude of СФУУР-ММ (SFUURMM)-Forms of ODS and ФЛУУ-ЛУУ (FLUU-LUU)-Complexes, duvuyllerrtly-resonantly interacting with only certain types (sets of the particular characteristics) of BBY(VVU)-Configurations of Self-Consciousness Formo-Creators. Every such set resonantly excludes the greater characteristics part of active interaction between Formo-Creators and СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators, which is inherent to all the multitude of other Karma-Forms, interacting only with these, which match their own inter-quality Synthesis schema. According to this schema it is primordially qualitatively determined which types of “emanations” and “psyche” of the Pure Qualities, and in which sequence of svilgs-sphering, are to resonantly interconnect with each other with the formation of variously tolerant Synthesis products. Let me remind you, that the certain types of Energy (the Space) are capable of interacting with the identical Informational Levels only by means of sequential realizations of the multi-qualitative states of Forms of Self-Consciousness, as a result of which the Inertia effect is manifested within the Space, which in turn forms all the subjective Perceptions (СФУУРММ (SFUURMM)-Forms) regarding the Time throughout all the focus dynamics of Formo-Creators.

14.15727. By means of “projecting” of the variety of additional characteristics onto the slloogrent states of BBY(VVU)-Configurations of Formo-Creators and СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators, which broaden their capabilities for the energy-informational interaction, it is possible in each Resomiral (“karma-fractional multitude”) to manifest (specifically single out) more and more additional aggregates of the greater “discrete” structural conditions (“karma-fractional sub-multitudes”),

which become slloogrent constituent “parts” of the Energy-Information of the even more integral “multiplicity” condition of the current Resomiral. For the superior СЛАА-СС-МНН (SLAA-SS-MII)-Creators of the Tertiary Energy-Plasma only “the single” slloogrent Resomiral is acting as the “state of the finite multiplicity”, duvuyllerrtly-resonantly combining within itself absolutely all the multitude of Karma-Forms, structuring all the dimensional Levels and Synthesis schemas, while forming by its mutual Configuration the integrated Karma-Form of Energy-Plasma of the 12th dimension. If we, from within our own Self-Consciousness, begin to consequently differentiate of this Karma-Form – as a mutual “karma-fractional multiplicity” – onto the constituent energy-informational Elements, the less and less universal, but at the same time, more narrow-specific “karma-fractional sub-multiplicities” (multi-level Resomirals of Proto-Forms of the Collective Cosmic Intellects) will be sequentially implemented in our Perception systems.

14.15728. As the **superior СЛАА-СС-МНН (SLAA-SS-MII)-Creators**, “isolating” from the global slloogrent state of Karma-Form the specific energy-informational features of “emanations” and “psyche” of every single Pure Quality, We provide the opportunity towards the manifestation within our Self-Consciousness of the distinctive properties of the strictly determined “karma-fractional sub-multiplicities” (Resomirals) of 11-12th dimensions, within each of which the “emanations” and “psyche” of the eleven Pure Qualities exist as Dominants, while the last Quality acts in the background mode. If we compare each Pure Quality with a letter, then the Karma-Form of the 12th dimension of Energy-Plasma will look like “ABCDEFGHijkl”. Upon the farther “isolation” from it of Aspects of every single Pure Quality (considering the Synthesis process is deployed backwards), We initiate the manifestation of the twelve multi-qualitative types of “karma-fractional sub-multiplicities” (where the upper-case letter resembles the Dominant, while the lower-case letter – the recessive state): “aBCDEFGHijkl”, “AbCDEFGHijkl”, “ABcDEFGHijkl”, “ABCdEFGHijkl”... “ABCDEFHijkl”, each of which – within its own range of 11-12th dimension – resembles the stand-alone, isolated Synthesis schema and, the integrated summary of birvulart (i.e. mutually-penetrating of all the Configurations of multi-qualitative Forms of Self-Consciousness, simultaneously manifested throughout all the Levels before the 11-12th dimensions) distinctive attributes of Proto-Forms of a certain type of the Collective Cosmic Intellect.

14.15729. Upon the farther differentiating the slloogrent Configurations conditions of each of the 12 “karma-fractional sub-multiplicities”, revealed with Our assistance within the current dimensional range, are capable of dividing onto at least 11 “karma-fractional sub-multiplicities”: “abCDEFGHijkl”, “aBcDEFGHijkl”, “aBCdEFGHijkl”, ... “aBCDEFHijkl”, thus forming the next 11 types of multi-qualitatively synthesized Resomirals into the corresponding qualitative ranges of the 10-11th dimensions. This process of the conditional differentiating of a more synthesized Configurations, “inside” of the mutual slloogrent state, onto their lesser synthesized manifestations – as a result of this – within the Energy-Plasma of the various Resomiral “karma-fractional sub-...-multiplicities”, is inherent for the focus dynamics of absolutely all Forms of Self-Consciousness, right down to the Levels of 3-4-dimensions, beyond the limits of which (0-3-dimensional ranges) the fundamental processes of the inter-quality Synthesis sequentially transform into the processes of the inner-quality Synthesis, thus forming the much more narrowly-specific types of proto-form Resomirals.

14.15730. Please note, that in the conditionally-primitive alphabet example, I have deliberately limited the Energy-Plasma model by 12 letters, only to illustrate in a comprehensible fashion the slloogrent principal of synthesis process and the sequential inclusion (the duvuyllerrt “projecting”)

of the results of the global svilgs-sphering synthesis dynamics, which is simultaneously implemented by all the Self-Consciousness Forms of each wave range, as a basic Energy-Informational state for the inertial implementation of the synthesis processes (focus dynamics) in the next dimensional wave range. In reality such differentiating attributes of the most profoundly-synthesized Configurations of Forms of Self-Consciousness onto the separated “karma-fractional sub-multiplicities” and “sub-... multiplicities” exist in unlimited multitudes, and all of them, being thoroughly synthesized within the global slloogrent space-time Continuums and Conversuums of all Levels of the Tertiary Energy-Plasma, form – with each other and “inside” of each other – the most intricate and unpredictable combinations of “emanations” and “psyche”, which we can subjective define as the proto-form Resomirals.

14.15731. The slloogrent Configuration of the ЛЛЮУ-BBY (LLUU-VVU) Resomiral (Res^{ЛЛЮУ-BBY}), partially manifested through the mostly qualitative Forms of Self-Consciousness of the bio-analogs of НУУ-BBY (NUU-VVU)-Form-Types, which in turn structure by their CAF-dynamics the 3-4-dimensional ranges, includes in itself the infinite number of narrowly-specific attributes, inherent for all the diversity of Self-Consciousness Forms of the ЛЛЮУ-BBY (LLUU-VVU) (including the “human”) civilizations, each of which differ from all the rest by means of its specific НУУ-BBY (NUU-VVU)-Form inherentities of the implementation of the global inter-quality Synthesis schema, mutual for all ЛЛЮУ-BBY (LLUU-VVU)-Forms. For instance, in the CAF-dynamics of Self-Consciousness Formo-Creators of a certain civilization, there is a modest prevailing of a single Dominant over the other, upon the equal participation of hvasslons Formo-Creators of the ten background Qualities (thus, the specific Res^{ЛЛЮУ-BBY} 1 is formed); the other civilization’s Collective Consciousness, simultaneously structuring its own Temporal Fluxes and inherent Continuums along with the first one, has evident prevailing (over the intensity of the hvasslons sphering of all the rest of background Qualities) of CAF-dynamics of Formo-Creators of a certain background Quality, for example – THE-Tendency (thus, the specific Res^{ЛЛЮУ-BBY} 2 is formed); НУУ-BBY (NUU-VVU)-Forms of the Collective Consciousness of the third civilization have evidently deflated Constrictive Activity of Formo-Creators of two such background Qualities as THE-Unanimity and THE-Mobility (thus, the specific Res^{ЛЛЮУ-BBY} 3 is formed); the Self-Consciousness Forms, inherent to the fourth civilization, show signs of the hyper-inflated hvasslon Activity of such background Quality as THE-Stability, while the hvasslon activity of THE-Knowledge is evidently suppressed (thus, the specific Res^{ЛЛЮУ-BBY} 4 is formed)...

14.15732. Such diversity of the multi-qualitative fundamental attributes manifestation, inherent for the mutual slloogrent state of the fully synthesized Collective Cosmic Intellect Configuration of ЛЛЮУ-BBY (LLUU-VVU), is being duvuyllerrtly-diffusively “self-projecting” (“propagating”) into the infinity of the synthesis combinations of absolutely all possible Forms of Consciousness of the Tertiary Energy-Plasma: certain attributes (specifics) of the hvasslon svilgs-sphering of the mutual for all ЛЛЮУ-BBY (LLUU-VVU)-Forms Synthesis schemas throughout all the narrow-frequency dimensional ranges, create the pre-conditions for manifestation within the resonant zones of Space-Time of НУУ-BBY (NUU-VVU)-Configurations of only a certain type of “karma-fractional sub-...-multiplicities”, which in turn form onto the energy-informational basis of qualitatively corresponding to them Resomirals “their own” groups of duvuyllerrt Continuums. For the biological Forms of Self-Consciousness of all the ЛЛЮУ-BBY (LLUU-VVU) civilizations, simultaneously manifested throughout the multi-qualitative Temporal Fluxes of 3-4-dimensional ranges, the distinction characteristics are being various energy-informational combinations (interrelations) of the hvasslon dynamics of various “parts” of СВУУЛЛМИИ-СВУУ (SVUULLMII-SVUU)- and ЛУУДМИИ-СВУУ

(LUUDMII-SVUU)-Creators, which provide the specific formation and the individual revealing of the biological forms of absolutely all Proto-Forms (for instance, birds, fish, insects, primates, and many more of known and unknown bio-form Self-Consciousness types, synthesized on the basis of the constructive interaction between the multi-qualitative bio-Creators, simultaneously structuring all the Temporal Fluxes of the current dimensional wave range).

14.15733. In Volume 10 of the IISSIIDIOLOGY I have stated that ЛЛЮУ-BBY (LLUU-VVU), within the range of 3-4-dimension, doesn't have its own - ЛЛЮУ-BBY (LLUU-VVU)-like – manifestation Forms, while the biological analogs of НУУ-BBY (NUU-VVU)-Form-types of every ЛЛЮУ-BBY (LLUU-VVU)-like multi-temporal civilizations are synthesized along the certain set of energy-informational interrelations between СВУУЛЛММII-SVUU) and ЛУУДММII-SВУУ (LUUDMII-SVUU)-Creators of the multitude of other Proto-Forms, whose inter-quality Synthesis schemas, somewhat matches the general wave parameters, inherent to the “human” DNA (that is why all of them have a tendency to be revealed along us within the current Continuum group wave range). The general slloogrent state of the energy-informational structures of ЛЛЮУ-BBY (LLUU-VVU)-Resomiral of the “current” “human” civilization, which we focus upon, is also specifically differentiated onto the few fundamental varieties of “karma-fractional sub-multiplicities” or sub-Resomirals, each of which is in fact a slloogrent constituent of the global “human” (i.e. not completely ЛЛЮУ-BBY (LLUU-VVU)-like, but duvuyllerrtly “approaching” it by the quality of its Energy-Information) Resomiral. Formo-Creators of Self-Consciousness Forms of every race, simultaneously manifested through the specifics of Temporal Fluxes in each of the “human” civilizations, having various distinctive morphogenetic inherentities and psycho-mental characteristics, implement the corresponding part of the mutual for all “humans” Synthesis schema, by means of the hvasslon dynamics of the НУУ-BBY (NUU-VVU)-Configurations, which they focus upon. There is a multitude of НУУ-BBY (NUU-VVU)-Configurations of “human” (ЛЛЮУ-BBY (LLUU-VVU)-like) civilizations, which simultaneously, energy-informationally involved in this global slloogrent process, and which reveal (in their own Temporal Fluxes) similar qualitative characteristics.

14.15734. For instance, within Forms of Self-Consciousness of certain “human” races – due to the particular evolutionary preconditions of the qualitative formation of their biological bodies – there exists a much greater activity of these proto-form СВУУЛЛММII-SВУУ (SVUULLMII-SVUU)-Creators (in comparison with Forms of Self-Consciousness of other races) which determine the existence of the resistive functions towards the low temperatures, while prevent the consumption of dairy products; Forms of Self-Consciousness of other “human” races have the adaptive mechanisms for living on the very high ground, which is inherent for the certain types of mammals. Yet another set of attributes in order to Resomiral allocation can be a mental or a sensual activity, evident through various types of professional activity: the “karma-fractional” interrelationships of certain sub-Resomirals, by means of the specific CAF-dynamics of Forms of Self-Consciousness, stimulate the propensity towards medicine and healing; just as the “karma-fractional” inherentities of other sub-Resomirals activate the predisposition tendencies within Self-Consciousness of particular НУУ-BBY (NUU-VVU)-Configurations towards the СФУУРММ (SFUURMM)-Forms of physics, mathematics, biology, art, sports, dancing, religion, politics, psychology and so on... These tendencies, in different correlation, are being manifested in specific Forms of Self-Consciousness of the multi-qualitative “human” races, which in turn contain not only the temporary FCA-dynamics of the Collective Consciousness of the “current human-kind”, but also qualitative specifics of the Temporal Fluxes of the simultaneous manifestation of Self-Consciousness Forms of all other “human” civilization types.

14.15735. BBY(VVU)-Configurations of Formo-Creators of Self-Consciousness Forms, qualitative energy-informational interrelations of which allows them to reveal the certain degree of resonance towards the focus dynamics of each other, are sloogrently “integrated” into the corresponding Resomiral types. This integration is performed by means of the aggregation of certain, qualitatively synthesized particular attributes (CΦYUPMM (SFUURMM)-Forms + Formo-Creators of hvasslons of some certain Pure Qualities), having either the exact same parameters (frequencies) of manifestation throughout the Space-Time, or the high “compatibility” degree of hvasslon svilgs-sphering of these Pure Qualities within the particular Levels of its manifestation (not only according to the commonality of one or both Dominants, but also according to the high activity degree of certain types of background interrelationships).

QUESTION: Oris, could you please tell us if it's true, that the global ODS is actually a combination of all the proto-form Resomirals of the current dimensional range?

14.15736. – The question isn't quite correctly formulated. It's the same if you would ask me is it true, that the current automobile's movement is a result of the presence in it of all its components, parts and assemblies? Undoubtedly, without some very important assemblies or parts, it will be impossible not only move, but even start any automobile altogether. However, upon the full package and great mechanical order, but without the presence of other necessary conditions or items (such as the availability of a driver) the automobile will still be nothing more than a combination of specifically interconnected metallic, rubber, plastic and other types of alloys. Almost the same is true regarding Formo-Creators of all Resomirals, which, without an active energy-informational interrelationship with YY-BBY- (UU-VVU) Forms and YY-BBY- (UU-VVU) Conglomerates of the ODS, would still be nothing more than the potential realizational capacities of Space-Time. In order to activate ALL the inertial dynamics, the uniting factor is necessary – the presence of all the multi-qualitative variety of constantly functioning Forms of Self-Consciousness (Proto-Forms), which would resonantly bind the otherwise separate sloogrent Configurations of multi-qualitatively-synthesized Energy with precisely corresponding to them sloogrent Configurations of multi-qualitative synthesized Information. Only upon these conditions ALL The Universe is capable of the inertial functioning.

14.15737. The Resomirals – are a primordial multiplicity of multi-qualitative types of synthesis interconnections within Space-Time of CAF-dynamics of Formo-Creators and DRF-dynamics of CЛYИ-CЛYУ (SLUI-SLUU)-Creators. The space-time formations, which are created by them (“karma-fractional multiplicities”) not only resonantly, unite the Energy-Information of Forms of Self-Consciousness by means of their BBY(VVU)-Configurations, which are being manifested throughout various Temporal Fluxes, but also provide the conditions (the existence of duvuyllerrt Continuum groups) for the simultaneous sloogrent manifestation of these Forms of Self-Consciousness. It is conditionally true, that the Space-Time and the ODS act as certain analogs of the “injector” and “fuel”, without which the “automobile” (Form of Self-Consciousness) wouldn't be able to anyhow reveal itself.

14.15738. Let me remind you, that the informational constituent of all the inertial focus dynamics of Forms throughout the Space-Time is provided by the CЛYИ-CЛYУ (SLUI-SLUU)-Creators of the РЕЗОНАНСНО-ЭВОЛЮЦИОННОЙ Branch (ODS and ФЛYУ-ЛYУ (FLUU-LUU)-Complexes), while the energy constituent is revealed through BBY(VVU)-Configurations of Formo-Creators of the Evolutional Branch, united into the corresponding types of synthesis Resomirals. The set of perceptions of any

Form of Self-Consciousness in regards to its outer reality – is a sheer illusion, being constantly formed by various subjective Perception systems (the ability of the qualitative reflecting of the Energy-Information). That means, that the Formo-Creators supposedly “realizing themselves” not within Continuums, Realities or World Form-Systems, the illusory manifestations of which every one of you somehow subjectively perceives for yourselves, - instead, they supposedly “realizing themselves” in Resomirals, while enveloping of all the multitude of multi-qualitatively-synthesized proto-form Directions, which simultaneously structure all the Temporal Fluxes, by means of their multi-polarized focus dynamics.

14.15739. The good example of subjective evaluation, which we apply towards various JJIYY-BBY (LLUU-VVU)-Resomirals, can be the fact, that we still divide all the HYY-BBY (NUU-VVU)-Forms onto the different “human races”, “nations” and “nationalities” (proto-form Directions). The basis of the Resomiral formation of 3-4-dimensional range is a formation diversity of “hexahedron” Forms of Self-Consciousness. Factually, Resomirals – are the basis of dimensional formation; it is what prevents the Forms of Self-Consciousness of various slloogrent “parts” of Continuum groups to be revealed within other Continuum groups, due to the fact of the existence within their Configurations of the specific dissonance extent. At the same time, the multi-qualitative structure of dimension, synthesized by Formo-Creators, allows for a simultaneous manifestation within a single wave range of the multitude of quality-differential Self-Consciousness Forms, nevertheless, not excluding of some degree of tensions towards each other – within limits of the specific synthesis range and Proto-Form compatibility.

14.15740. That is what is responsible for the emergence of the necessary conditions for the collective existence of the specific types of nations, nationalities and races, as well as various animals, plants and even objects of living, within the corresponding resonant zones of Space, simulated by various Temporal Flux parameters. Meaning, that all these conventional and obvious for us types of the electronic, communication, transportation and other appliance technology isn’t necessary inherent for the development of other “human” civilizations only because their corresponding, energy-informational Resomirals (resonantly structuring an FCA-dynamics of their Forms of Consciousness) are formed by means of other “hexahedron” combinations, which in turn are formed by means of other groups of “tetrahedrons” (in a somewhat different fashion, plus they are synthesized along the two JJIYY-BBY (LLUU-VVU)-Dominants in other proto-form sequence).

14.15741. I repeat: JJIYY-BBY (LLUU-VVU)-Resomirals are neither intended nor they exist for any specific civilization – the manifestations of the multi-qualitative Forms of Self-Consciousness throughout various slloogrent “parts” of the multi-qualitative Continuum groups is implemented only by means of resonance degree of each of these Forms with the Energy-Information, intrinsic for the current zone. If you could somehow “stop” the inertial focus dynamics of your Self-Consciousness Form and affix your CAF in a global primordial “instant”, you would see for yourself that all the Resomirals already primordially exist. All the other activity, however, which could be described as “happened”, or which, supposedly, “taking place” within the outer reality, registered by your systems of perception – all of this is nothing more than transitional results of the undulatory manifestation of the multi-polarized dynamics of Focuses of multi-qualitative synthesized “hexahedron karma-fractions”, structuring within Continuums of the current wave range not only HYY-BBY (NUU-VVU)-Configurations, but also all other Forms of Self-Consciousness.

14.15742. Precisely the narrow-specific inherentities of the focus dynamics allow various slloogrent “parts” of JJIYY-BBY (LLUU-VVU)-Resomirals to be differently manifested within Space-Time.

All “routine” manifestations of World Form-Systems and Continuums within Space-Time are the consequence of the subjectivism of the Perception systems of the Forms of Self-Consciousness, where we currently focus upon: by “projecting” our inherent Perceptions into the slloogrent construction of JJIYY-BBY (LLUU-VVU)-Resomiral, we inertially isolate only these notions and conceptions, which correspond with our Perceptions. Forms of Self-Consciousness, manifested throughout the Collective Consciousness types of variable “human” civilizations, are structured by BBY(VVU)-Configurations of Formo-Creators, concurrently “belonging” to the Forms of different Temporal Fluxes, because due to some energy-informational parameters of the HYV-BBY (NUU-VVU)-Configurations of their current simultaneous in-focusing, – within the current manifestation range – they are capable of sufficiently resonating with CΦYYPMM (SFUURMM)-Forms of various Forms of Collective “human” Intellect, structuring different Continuum groups.

14.15743. Thus, not only a certain civilization as a “whole” (although “the civilization” is a very subjective and relative notion), but also the various constituents of its Collective Intellect, upon attaining of the certain synthesis conditions, which are inherent to the specific manifestation range (i.e. “level of development”), “project” by the quality of their FCA-dynamics into the outer Space-Time, of particular characteristics, which in turn, to a greater degree, reflect the quality of CΦYYPMM (SFUURMM)-Forms, inherent not only to the current, but also to various other civilizations, Forms of Self-Consciousness of which are revealed throughout the multiplicity of the multitude of different Temporal Fluxes. Earlier¹* I had described in detail the exact process, where the steadfast and powerful prevailing of certain CΦYYPMM (SFUURMM)-Forms, structuring the YY-BBY- (UU-VVU) Conglomerates of the specific Level of Self-Consciousness during the “individual” TES-“decompressions”, can become (and constantly do!) the cause of its purposeful “individual” manifestation simultaneously within HYV-BBY (NUU-VVU)-Forms of various Temporal Fluxes, not necessarily within a single, but rather throughout multiple civilizations. These “personified incarnations”, accompanying by the retaining of previous “memory” fragments (general CΦYYPMM (SFUURMM)-Forms of the individual ODS), are called inter-form-type refocusing. They can be implemented not only upon the inter-quality Synthesis (“Death”) throughout certain sub-levels of Self-Consciousness, but also in an “ongoing” mode of Existence of variable Self-Consciousness Forms, which, while being parts of different Temporal Fluxes, but which, between various “parts” of their HYV-BBY (NUU-VVU)-Configurations, have a pretty high degree of resonant Creative Activity of Formo-Creators, which in turn, during the TES-“unfolding” are capable of utilizing variable (in terms of different Synthesis schemas), but at the same time, vibrationally-identical CΦYYPMM (SFUURMM)-Forms.

14.15744. All Resomirals, as the qualitative structures of Energy-Plasma, are formed by very specific energy-informational interrelationships between Formo-Creators, just as within Space-Time the variable “hexahedron fractalities” of different Forms of Self-Consciousness are being synthesized, which by means of their multi-polarized CAF-dynamics are capable of simultaneous reflection throughout various Continuums of attributes, inherent to a greater degree to hvasslon Aspects of absolutely different Pure Qualities. Throughout the global slloogrent dynamics of Space-Time all this allows the Forms of Self-Consciousness of various Temporal Fluxes and various civilizations to find quite unique and diverse variants of qualitative realization of the exact same scientifically-technological, social, culturally-ethnical, geopolitical, financially-economical, morally-ethical and religious objectives.

1 See IISSIIDIOLOGY, Volume 12

14.15745. Certain sequence in various inter-quality Synthesis, forming a somewhat similar dynamics of the Creative Activity of Formo-Creators of billions of multi-qualitative groups of “hexahedron karma-fractions”, structuring a certain “part” of the global slloogrent JJYY-BBY (LLUU-VVU)-Resomiral, can stimulate the CΦYYPMM (SFUURMM)-Forms of the specific qualitative Level, which, upon the specific resonance degree with each other, can commence the simultaneous manifestation within Self-Consciousness Forms of various Temporal Fluxes of a single “human” civilization. The same can be simultaneously implemented throughout the different “human” civilizations. At that, the higher the advancement level (degree of inter-qualitative synthesis) of HYB-BBY (NUU-VVU)-Configurations of Self-Consciousness Forms, the larger number of opportunities can be created for the Formo-Creators (which focus upon these HYB-BBY (NUU-VVU)-Configurations) for the simultaneous, subjectively-conscious (“individual”) Existence throughout a variety of different civilizations (which differently implement the exact same evolutionary Tasks) at once.

14.15746. Certain types of groups of Formo-Creators (the BBY(VVU)-Configurations aggregation, synthesized along the various Pure Quality Aspect schemas, which are most compatible within the current manifestation range with the Formo-Creators of both HYB-BBY (NUU-VVU)-Dominant’s attributes) by means of inherent to them biological analogs of HYB-BBY (NUU-VVU)-Form-Types, are forming the inertial dynamics, inherent to certain civilizations within the corresponding slloogrent “parts” of Space-Time, while other groups are resonantly active in formation and implementation of the FCA-dynamics of Forms of Self-Consciousness of other civilizations. Hence, throughout various “parts” of slloogrentity of duvuyllerrt groups of Continuums, concurrently, inertially and narrow-specifically, out of different “karma-fractions”, the Forms of Self-Consciousness of billions of multi-qualitative civilizations are being formed, which, depending on the svilgs-sphering types and sequence, upon which the Dominant Pure Quality Aspects are being synthesized within their HYB-BBY (NUU-VVU)-Configurations, create variable kinds of solutions for the exact same Problems. Let’s assume, that certain Qualities are less compatible with each other, therefore, in order to deepen the CAF-dynamics and find the most effective alternate solution, Formo-Creators of certain “groups” of JJYY-BBY (LLUU-VVU)-Resomiral, have to overcome the specific tension (under-synthesized between certain Aspects) conditions, for which it is necessary to resonantly attract into the focus dynamics of “hexahedron karma-fractions” of their own group, while at the same time dissonantly exclude, (“kick out”, “expel”) from it the of certain of its “participants” (i.e. interchange the drastically discordant types of partially synthesized energy-informational interconnections - CΦYYPMM (SFUURMM)-Forms – between “hexahedron” Formo-Creators onto a somewhat resonant, or even more universal, i.e. high-frequency ones).

14.15747. Upon the completion of this interchange phase, the qualitative-transformed BBY(VVU)-Configurations of duvuyllerrt “groups” of Formo-Creators of certain “hexahedron karma-fractions” instantaneously resonantly “integrate” with BBY(VVU)-Configurations (or some of their “parts”) of Formo-Creators, which, by means of their FCA-dynamics have already synthesized and correspondingly revealed throughout Space-Time the variant of a better solution because they possess within their “karma-fractions” (Form of Self-Consciousness) the more compatible types of energy-informational interconnections. The duration of the inertial manifestation of a “karma-fraction” is irrelevant – this is absolutely a subjective factor, which only objectively reflects the tension degree of the creative manifestation throughout Space-Time of the FCA-dynamics of Formo-Creators of certain HYB-BBY (NUU-VVU)-Configurations, in relation to the manifestation quality of Formo-Creators of these HYB-BBY (NUU-VVU)-Configurations, which are ALREADY structuring the manifestation dynamics, subjectively selected by us as a “Goal” of our life.

14.15748. For example, the most qualitative revealing throughout the global slloogrent dynamics of all Forms of Self-Consciousness of ЛЛЮУ-ВВУ (LLUU-VVU) – is one of the Goals of our mutual infinite existence throughout Space-Time. Depending on within which qualitative levels of Energy-Plasma’s НУУ-ВВУ (NUU-VVU)-Configurations WE are capable of focus upon, these would be our most real Forms of our current “personified” inertial existence. Slloogrentity of the inertial revealing throughout the Space-Time of OUR certain conditional “final” Goal, consists of sequentially-multi-polarized (hvasslon-“attractor”) refocusing dynamics of Formo-Creators of the multitude of quality-differential ЛЛЮУ-ВВУ (LLUU-VVU)-Configurations, which simultaneously structure various types of “human” and ЛЛЮУ-ВВУ (LLUU-VVU)-like civilizations. The Goal of the ЛЛЮУ-ВВУ (LLUU-VVU)-like aspect of OUR Collective Existence as СЛЛЛ-СС-МЛЛ (SLAA-SS-MII)-Creators – is the sequential in-focusing throughout some of ЛЛЮУ-ВВУ (LLUU-VVU)-like civilizations, profound analysis of any obstacles to our self-development, overcoming of all the existing dissonances within our Self-Consciousness and precondition creation for farther in-focusing into the less destructive (within current manifestation Levels!) НУУ-ВВУ (NUU-VVU) Configurations.

QUESITON: Oris, you have stated, that Resomirals – are the primordially synthesized space-time structures. Meaning they are already synthesized, unlike World Form-Systems, Reality types and their Continuums?

14.15749. – Resomirals – are ALL THE OBJECTIVITY, which has synthesized momentarily – upon A SINGLE INSTANCE OF THE UNIVERSAL MANIFESTATION. For the ease of your understanding, please imagine that a certain gigantic megapolis was instantly supplied with absolutely all the essentials, necessary for the existence of its billions of inhabitants; at that, each supplied item was instantly placed on its appropriate place (similar to the file placement procedure within an Oracle DBMS – Database Management System – translator’s example). During the multitudes of oncoming decades, each of the megapolis inhabitants, depending on their interests and needs, without the need of producing anything, simply utilizes anything, which has always been, is, and will be there for them. Since every single supplied item primordially located only at the specifically designated site within this imaginary megapolis, it is only a matter of certain efforts, which all the inhabitants must apply in order to get to where the desired item is located, so that they will be able to get anything they wish.

14.15750. Absolutely all Resomirals are already slloogrently synthesized and qualitatively (resonantly) simultaneously revealed throughout this SINGLE UNIVERSAL INSTANCE. Because of them, all the Universal Form-structures have ability towards the objective self-manifestation and subjective Existence; at least its (Universal) “synthesis” part. We aren’t synthesizing anything, not at all altering it, neither do we improving, nor we deteriorating anything. We only actively utilize all that in order to gain a specific Experience, just like the student-drivers utilize the driving simulation computer equipment in order to acquire the necessary driving skills. During these driving simulation sessions no single car or truck is wrecked, no pedestrians are traumatized; the student-drivers themselves aren’t being hurt in any way, but instead are able to acquire the necessary driving (or flying) skills! If absolutely nothing is being changed during these driving simulation sessions, then what exactly helps them to gain that experience? What helps them is the alteration of their psychic reactions (Focus) of their Perception systems, which entirely depends on the quality of НУУ-ВВУ (NUU-VVU)-Configurations of Forms of Self-Consciousness, which they simultaneously and multi-polarizationally in-focus upon.

14.15751. The energy-informational inherentities of the infinite Form-structure Existence of various World Form-Systems, Reality types and groups of space-time Continuums which they consist of, one way or another is being manifested throughout the informational space of your Self-Consciousness only because out of the variety of multi-qualitative types of the global slloogrent Resomirals, your Focus currently is capable of a resonant “picking” out of the Space-Time and a subjective “reflection” (perversely “revealing”, “manifesting”) through the BBY(VVU)-Configurations of CΦYYPMM (SFUURMM)-Forms, which are structuring the “Bio-Screen”, of only a strictly synthesis condition of Form-structures, out of all the infinite multitude of them, primordially inherent to ALL THE UNIVERSE. (The Focus is – the reflection result of “projections” of the CAF-dynamics of Formo-Creators of certain “parts” of slloogrent Resomirals, from the qualitative condition of CΦYYPMM (SFUURMM)-Forms of the individual Self-Consciousness ODS).

14.15752. Forms of Self-Consciousness, very similar and variable in terms of their qualitative parameters (for instance, the sequence implementation of their sivilgs-sphering) and these, structuring absolutely different Temporal Fluxes, have a mutual tendency to resonantly aggregate with each other, by means of some “parts” of their HYV-BBY (NUU-VVU)-Configurations, regardless of the Temporal Flux type they belong to. Provided for this attribute of their focus dynamics, throughout variable Continuum’s Forms of Self-Consciousness, the CAF-dynamics of HYV-BBY (NUU-VVU)-Configurations Formo-Creators, structuring various JJIYY-BBY (LLUU-VVU)-civilizations, is able to be simultaneously manifested in variable forms, which in turn depend on the capabilities of the Continuums Themselves. This precise inherency of Space-Time – is in fact, the inertial foundation of your tendency towards the simultaneous refocusing implementation process by means of variable proto-form development Directions, into these groups of Continuums, whose CΦYYPMM (SFUURMM)-Forms are gradually reflecting the energy-informational characteristics of the JJIYY-BBY (LLUU-VVU)-like Synthesis Direction.

14.15753. As a rough example of the above mentioned, imagine that various “people” have decided to get to Moscow from different points of origin: certain groups have originated their journey from Europe, certain groups from Africa; others have commenced the travel from Asia, Australia, North and South America. Every one of these travelers is faced with different situations and obstacles along the way, thus synthesizing the same Aspects in a slightly different fashion from all other travelers, considering variable combinations of background and dominant Qualities, consecutively self-identifying with the dynamics of certain proto-forms, or with attributes of other ones. Ultimately, all the travelers will meet at the certain location, which every one of them have designated as their final destination point. In roughly the same fashion, the Focuses of Self-Consciousness Formo-Creators of all the HYV-BBY (NUU-VVU)-Forms, initiated by their global mutual evolutionary Goal, but structuring variable JJIYY-BBY (LLUU-VVU)-civilizations, are being sequentially-resonantly manifested by their various “parts” throughout the HYV-BBY (NUU-VVU)-Configurations, belonging to variable Temporal Fluxes.

14.15754. Throughout the “current” for us Continuum groups, only these Forms of Self-Consciousness can more adequately be manifested, which reflect by their CΦYYPMM (SFUURMM)-Forms the properties of the specific Proto-Form variants, including the corresponding Synthesis Directions. By means of the persistent shift of the CAF-dynamics into some of the other Synthesis schemas, not inherent to the JJIYY-BBY (LLUU-VVU)-like development Direction, your Forms of Self-Consciousness gradually become more compliant with these HYV-BBY (NUU-VVU)-Configurations, which are manifested throughout different other civilizations of roughly the same level of development

matching your current one, but which perceive themselves slightly differently. Thus, from the different resonant slloogrent Resomiral parts – by means of the multi-polarized focus dynamics of Formo-Creators of the multi-qualitative Forms of Self-Consciousness – everything, similar in terms of its quality but inherent to various civilizations, is being inertially-jointly manifested. In fact, that is how the duvuyllerri multi-qualitative slloogrent Continuum groups are being manifested, where the Forms of Self-Consciousness of your current in-focus are revealed.

QUESTION: I am sorry, but I can't really understand – do the Resomirals structure various Continuums, or is it vice-versa?

14.15755. – The global Resomiral slloogrentity (all the way to the 12-13th dimensional Levels) is structured by the fully synthesized BBY(VVU)-Configurations of Formo-Creators, meaning that it “doesn’t” already contain of any svilgs (hvasslon) dynamics, or any possibilities for manifestations of Inertia (although, in reality it isn’t quite so – within Form-structures of the Secondary Energy-Plasma the Universal Principals instead considerably deepen!). All the 3-4-dimensional Continuums represent the narrowly-specific manifestations onto the “Bio-Screens” of all biological Forms of Self-Consciousness of the slloogrent Illusion of the polytypic Collective Intellects, whose realizational Forms (Forms of Self-Consciousness) are also being the “projections” (the simultaneous multi-polarized activity of hvasslon svilgs-sphering) of BBY(VVU)-Configurations of the EXACT SAME – resomiral! – Formo-Creators. The Resomirals represent the Principal of the stable manifestation of the potential objectivism, while Continuums – the Principal of the inertial formation of the variable Forms of subjectivism. The subjective reflections of various Continuum Forms – are the manifestations within the Self-Consciousness of these Forms of the transitional slloogrent conditions of all possible variants of the multi-qualitatively synthesized Form-structures of Energy-Plasma. There is no fundamental difference (from the position of the VEC-Observer) between the Resomiral Energy-Information and the Energy-Information, which is being “projected” from them – these are differently perceived Forms manifestations of the exact same slloogrent structure.

14.15756. But from OUR position as CCJIOO-CC-CHAA (SSLOO-SS-SNAA)-Creators, neither Resomirals, nor Continuums exist: in reality all that does exist is the slloogrent manifestation Principal of Energy-Plasma, owing to which all the simultaneous foundation of skrruullerri system is capable of revealing through the variable types of multi-qualitative Continuums, which in every separate case are subjectively being perceived by the Formo-Creators as the outer actuality, consisting of all the potentially existing civilizations of all the variants of the “past” as well as all the variants of the “future”, which are capable of a constrictive self-expression within the current dimensional wave range. Various SC’s are structured by the different proto-form Resomirals, however, at the same time any Resomiral is enveloping by its functionality (the focus dynamics of its Formo-Creators) multiple groups of SC’s, which are simultaneously manifested throughout diverse Temporal Fluxes.

14.15757. HYY-BBY (NUU-VVU)-Configurations of all the multi-quality types of “hexahedron” Forms of Self-Consciousness of 3-4-dimensional range, are synthesized according to the mutual to all of them resonance Principal, which energy-informationally aggregates into these Configurations the various Form- and CJYH-CJYV (SLUI-SLUU)-Creators of different proto-form Directions. Therefore, the most primitive “parts” of slloogrentity of JJYV-BBY (LLUU-VVU)-Resomiral consist of BBY(VVU)-Configurations of Formo-Creators, which resonate with the CΦYYPMM (SFUURMM)-Forms of Proto-Forms of domestic animals, who are capable of understanding “people” emotions (for

instance anger or love), owing to the fact, that they constantly live together with “humans”. In the same fashion, HYY-BBY (NUU-VVU)-Forms, structuring certain Resomiral Levels of various Proto-Forms, manifest themselves accordingly. Thus, every single “karma-fraction” can be conditionally interpreted as the tolerant synthesis resonant formation throughout Space-Time of duvuyllerrt Configuration “parts” of Formo-Creators. Any “hexahedron karma-fraction” represents by itself a part of the synthesized slloogrentity of a few proto-form Resomirals, since Formo-Creators, which form its “peaks”, are also structure various Resomirals by their BBY(VVU)-Configurations, which actually form this very same “hexahedron” HYY-BBY (NUU-VVU)-Configuration (“octahedron” Resomirals, “pyramidal” Resomirals and “tetrahedron” Resomirals). On the other hand, the “hexahedron” Resomirals are the constituents of even more complex energy-informational formations – “icosahedron”, “dodecahedron” and other even more versatile Resomirals.

14.15758. The larger the quantity of the multi-Aspect or multi-Quality Formo-Creators, employed in a Configuration formation of any given “karma-fraction”, the more Experience, generated by the Collective Intellects of various OO-YY-Entitys is resonantly being attracted into the “decompression” dynamics of any Information. When there isn’t enough Experience (meaning – Formo-Creators), then any tensions (the qualitative difference in the interpretation of the similar Information) are liquidated with the assistance of hvasslons (and other dimensional analogs of svilgsons²) Formo-Creators, requiring in this case the larger Energy expenditures, which in turn means the implementation of a larger quantity inertial rotational Shifts, which are the essential energy potential Source for Formo-Creators of any Resomiral, structuring the synthesis dynamics of Space-Time.

14.15759. This is true regarding of absolutely all Proto-Form manifestations, since the Configuration of “tetrahedron” Formo-Creators of each type, is also being a part of all more complex configurational structures, inherent for the polytypic Resomirals of all dimensional ranges, where the tension svilgdynamic is being leveled by means of all multitude of Formo-Creators of other “peaks” of each of the “karma-fraction”, facilitating to the formation of the stable states of inter-resistance, inter-opposition and inter-incomprehension within Configurations of Forms of Self-Consciousness. I am not talking about the specific state of various Realities and groups of Continuums, the conditional Forms manifestation of which are being the consequences of extreme necessity of Synthesis in Configurations of their Consciousness of certain qualitative sub-levels. Such Form-systems, specializing on the activation of the specific sub-Aspects and Aspects of particular Qualities, exist in unlimited quantities. I am talking about the opportunity for each Form of Self-Consciousness, primordially programmed within the Universal structure, which allows for the constant increase of the inertial dynamics of its qualitative refocusing.

14.15760. Let’s assume that if you prick yourself with a needle, you will feel pain, since the Perceptions of bio-Creators of your biological organism in regards to this impact, aren’t leveled by the CΦYYPMM (SFUURMM)-Form dynamics (convincing Motivations) of other Formo-Creators, which possess the necessary Experience regarding the fact that, for instance, a needle shot into a certain acupuncture spot, can indeed be very useful for the body. While the Self-Consciousness Formo-Creators don’t have any persuasive Motivation (profound Understanding) for any action or mentally-psychic state implementation, the unpleasant feelings from the arising tensions will generate the stable Desire of leaving the “painful” process. When, however, the Sense of the ongoing event, happening to you, is found, profoundly and comprehensively interpreted and concerted with CΦYYPMM (SFUURMM)-Forms of the most active Formo-Creators of your Self-Consciousness,

2 For the information regarding the variously-dimensional graviton analogs please read below.

then any, previously unpleasant or even painful conditions or outer influence, lose all “their” – farfetched by you! – negativeness, and even can transform into the opposite tension type – state of dependency from something or someone, a certain excessive affection. For instance, sexually it is manifested in a form of a sadomasochism tendencies and habits. In a relationship between the mother and her beloved child or a wife and her husband-tyrant it is manifested as a necessity of constant self-sacrifice and denial in return for the ingratitude and rudeness. As soon as the powerful Motivation is being activated within Self-Consciousness (consciously or not), which is essential for the hvasslon Formo-Creators, so they can completely synthesize of various sub-levels of the current Configuration, the situation instantly transforms from the negative and stressful to at least neutral, or even positive and favorable.

14.15761. If you increase the Perception Level in relation to any negative situation or a psychic condition, you will deeply cognize the fact that you haven’t yet experienced this particular feeling, situation or condition, which could be manifested in this particular pain, this particular humiliation, this particular fear, bitterness, disappointment, and so on. And then, in the contrast to dislike, enmity and fear, provoked by the critical situation or a condition, the sudden dilemma arises within your Self-Consciousness: what’s more important – refuse and escape as far as possible from all, that frightens and represses you, or stay and try to experience the possible pain and fear on a much greater scale, on Levels, still unknown to you. And, as soon as you decide to stay, you immediately magically transform from the helpless “experimental mouse of your insidious and vicious Destiny” into the impartial and supraliminal Researcher of your Own Self and the ongoing situation, revealed in your Life. This state of mind totally transforms your position, if not into completely positive, then definitely into a much more concerned state towards the opportunity of a balanced and reasonable analysis of the previously negative situation or a depression.

14.15762. If the universal IISSIIDIOLOGY-like CΦYYPMM (SFUURMM)-Forms are being engaged together with this process of self-cognition, the effectiveness from such conscious “re-projecting” of Self-Consciousness from the dynamics of the lesser qualitative Resomirals into the more qualitative ones, instantly being increased manifold. This is true because your high-frequency Formo-Creators don’t have a fear of “Death”; instead they possess the profound and deep understanding of the fact, that YOUR “individual” Existence is infinite, that it is simply impossible to anyhow harm or annihilate YOU and that YOU, who in reality is much more genuine, isn’t at all being the current visible manifestation Form. All that understanding allows you to easily cross the conditional limits of your Self-Consciousness, simply transforming from the despondent psychic state of a “victim” into the state of the optimistic equitable spiritual Researcher of myriads of Realities and multitudes of Your Own Selves, manifested throughout the current universe.

14.15763. Through every situation and your psychic reaction towards it, you have a chance to cognize the Word and Yourself throughout these creative manifestations of Formo-Creators, in which you haven’t yet cognized your “current” Interpretation” of yourself. Upon the firm and conscious approach to every problematic situation, your subjective negativity towards the objective circumstances will drastically decrease; moreover, once you increase the comprehension and perception of any situation all the way up to these Formo-Creators, which certainly know, that they (“means “you”) aren’t at all that current visible Form of manifestation, then the very liberation moment, which earlier had oppressed, scared and intimidated you, might actually begin to show its opposite site of joy and satisfaction from the feeling of your stable focusing in a more qualitative Configurations of the high-frequency Formo-Creators.

14.15764. Thus, it is possible to completely eliminate from your Self-Consciousness of any physical or “phantom” pain, which is being a huge problem for the majority of gravely ill “people”. When your Self-Consciousness Formo-Creators are deeply and incessantly involved into the detailed research of the true cause of the origination of any pain or fear instead of focusing on its subjective experiencing, not only the Synthesis Directions are being changed, but also the qualitative Levels of refocusing from one types of НУУ-BBY (NUU-VVU)-Configurations into the other inevitably occurs. Don’t forget that in more qualitative Self-Consciousness conditions, pain and fear can either be manifested in a very weak form, or not at all. On Self-Consciousness levels, where the high-frequency Formo-Creators aren’t employed, the low-frequency ones are guided by the inherent to them Perceptions regarding the pain and fear without any understanding of the fact that owing to the very experiencing of these СФУУРММ (SFUURMM)-Forms of pain and fear, the sequential tension liquidation is being implemented, which facilitates to the retuning of the focusing process into the more universal Levels of Existence.

14.15765. The great example of the self-sacrifice for the sake of other “people” can be the decision of a young German doctor Lindeman, to TEST upon him the contamination effect of the second stage of the syphilis bacteria. Therefore, in 1851 he had consciously infected himself, under the supervision of the French Academy of Science and Medicine with syphilis bacteria as a result of which, the symptoms of severe illness were evident shortly thereafter. He had denied other doctors demands for the immediate cessation of the experiment, so that his research could be completed. This process, despite the presence in his Life of the obvious potential source of negativism, nevertheless had replenished every instant of his Existence with a deep sense of service to “others”, while the understanding of his self-renunciation along with the stable exploratory Interest have brought to him the joy of the creative gratification. Such examples of the “personal” self-denial for the sake of various science developments exist in multitudes.

14.15766. If we are to compare with these very positive feelings the extremely negative states of Self-Consciousness of his other “personified” Interpretations, which “accidentally” had been infected with syphilis (or any other serious disease), we could evidently see the difference between the Levels, where the inherent to them Synthesis processes of Formo-Creators of 1-6 karmic Channels of ОРЛА-АКТОР (ORLAAKTOR) and АИГЛЛИЛЛИАА (AIGLLILLIAA) are being implemented, with Levels of the subjective Perception, implemented by Formo-Creators of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA), due to the absence of necessary Experience (more authentic Knowledge) within their Configurations, generating into the “individual” Self-Consciousness the powerful emotional fear for the biological Form integrity, the affirmative fixation onto the pain sensation and all the other similar emotions, which allow them to self-manifest in a outer Reality by various expressions of hatred, malice, aggression, humility, depression, despondency and so on.

14.15767. In the abovementioned example, the system of an “individual” Perception to the most part was guided by the inferior Formo-Creators of the second pair of Иисииди-Centers, for which it was far more important to go through the conscious profound experiencing of any ongoing processes, which accompanying the researched Cause (in this case – syphilis), and therefore the spontaneously manifested state of depression (due to the absence of Knowledge of non-existence of “Death” back then, which had provoked an instinctive fear) were minimal. Confronted with the reproach of other doctors regarding his forthcoming “Death”, the researcher had replied: “So much the better!”. He had formulated the most convincing – for him! – Motivation for such deed: “My death will prove that the whole syphilis doctrine is nothing more than a delusion, which will prevent the additional

misfortunes”. The experiencing of the sincere state of altruism and the creative intellect gratitude became above all the Perceptions regarding “Death” and moreover, they were the constant source of the constructive Joy.

14.15768. The Entity of previous passage is a more profound Understanding of the fact that ALL, absolutely all Forms of OUR synchronous Existence, being visually manifested throughout the Space-Time supposedly separately and discretely from each other, in reality represent the SINGLE ONE – fully integral and in no way separated – slloogrent Configuration of the universal Form of a Cosmic Intellect. It’s just that due to the quantity (“density”, capacity) of the energy-informational interrelationships within the more qualitative Forms of Self-Consciousness, there are more favorable conditions and capabilities are being created for the deeper penetration into the more genuine Levels of the semantic Entity of things of the outer reality, which allows Formo-Creators to tremendously increase manifestation Levels of their realizational dynamics as well as the dimensional level they focus upon. As soon as the Entity of the outer events is differently interpreted by your Self-Consciousness Formo-Creators, you immediately change the dimensional level of your own Existence within the range of your manifestation.

QUESTION: Returning back to the issue of digits and “fractalities”, I would like to find out how exactly the discrete numerals can relate to the multidimensional “fractal” formations throughout various dimensional ranges?

14.15769. Dear Тллааирлисс, since the time of the Pythagorean mathematics, the digits are being viewed as primary and essential merits of “God” as an eternal Source of Energy-Information and the Law of Harmony as a synchronous manifestation of all Forms of the Universe. The digits were interpreted by many ancient philosophers as living Forces and certain “divine qualities”, revealing through the inherent actions. Always, when we make any kind of manipulation with numbers (for example, while reviewing the influence onto the dimensional attributes of the quantity of force “ribs” of any specific “karma-fraction”), invariably within our Self-Consciousness the dynamics of energy-informational vibration action of the spatial-temporal “geometry”, inherent to the Configuration of the very specific number onto the qualitative dynamics of Formo-Creators of the outer Forms is being manifested.

14.15770. Aristotle has called digits the foundation and Entity of all things, manifested throughout the Universe, and the main cause of all their interrelationships and conditions. I, on the other hand, wouldn’t advise you to perceive his СФУУРММ (SFUURMM)-Forms literally, and will only note that since the foundation of all the form-building processes, occurring within the physical (from our point of view!) Universes, is to a larger degree discretely-additive, that means that these very processes are easily explicable and demonstrable by means of digital manipulation, the basis of which is the slloogrent, “fractal”, skrruullerrt and duvuyllerrt Principals, inherent to all revealed Forms of Collective Intellects.

14.15771. Within the more qualitative types of the Universe (from the 4th to the 12th dimension and higher), structured by the tremendously more qualitative and advanced energy-informational interrelations, the manifestation Nature of the individual dynamics of slloogrent Configurations of each “digit” is also being the more virtual, universal and less concrete, discrete and unequivocal. Therefore, I think that you shouldn’t impart the digits with more value than they actually deserve.

“Mathematics” of a more qualitative Levels of Energy-Plasma is based on the very different Laws, Principals and Knowledge than what we know of currently. And the “digital” dynamics, inherent to our realities, simply don’t exist “THERE”! However, the slloogrent energy-informational interrelations, inherent to all digits in the same manner as to any other manifestations of Forms of Self-Consciousness, have the singular Nature – meaning that they are being prolonged throughout all the dimensional Levels by means of the realizational dynamics of Formo-Creators, inherent to these Levels.

14.15772. Concerning the properties of our 3-4-dimensional subjective Reality, I must note, that each DNA molecule, inherent to the biological analogs of HYY-BBY (NUU-VVU)-Form-Types, is also built on the basis of “projecting” (“inter-duplicating”) energy-informational interrelations between the “dodecahedron” and “icosahedron” “karma-fractional” structures (this will be explained a bit later on), as “projections” of the exact same Information into the creative activity of various Levels of Self-Consciousness. In general, the finer DNA molecule dynamics can be imagined as the dynamic “spheroidicity”, formed by means of the specific types of sphering of multi-qualitative “hexahedrons”. And if you could within your own Imagination, specifically “rotate the hexahedron karma-fraction” of the DNA onto the 72 degrees, it will transform into the 4-5-dimenaional “icosahedron karma-fraction”, which in turn, energy-informationally duplicates the interconnections of the “dodecahedron karma-fraction”, inherent to the inferior ranges of 4-5-dimensional Levels.

14.15773. In this inertial (reciprocal) “karma-fractional” dynamics, structuring every DNA molecule, the karmic interconnections, from which this molecule is constructed from alternately being “re-projected” from the “icosahedron” into the “dodecahedron” and vice-versa...infinitely! The invariable order of such constant “re-projecting” – on-the-mitre of 72 degrees and back – transforms the “cubical” manifestation dynamic on the molecular level into the “spheroidal” dynamics of higher-frequency ranges. In turn, the chromosomes also represent the geometrical “karma-fractions”, slloogrently containing within themselves the Form-images, inherent to all the Reality, not only relating to our biological bodies, but taking into account the energy-informational interrelationships between absolutely all objects of the current Reality, including Formo-Creators of atoms and molecules of all Proto-Forms of Collective Intellects of the ГООЛГАМАА-А (GOOLGAMAA-A).

14.15774. Since the realizational Forms of Collective Intellects of 3-4-dimensonal Levels of Energy-Plasma to the most part alter the slloogrent “geometry” of Space-Time simultaneously throughout the multitude of the duvuyllerrt ranges, forming the infinite numbers of Continuums of their conscious synchronous manifestation (existence), the “karma-fractions”, which form the “psycho-emanational fractal” Configurations, in fact, represent the specific energy-informational inter-dimensional “portals”, which, on one hand, allow the CAF-dynamics of Formo-Creators of Self-Consciousness (and Sub-Consciousness) of the realizational Forms of “neighbor” (adjoining) dimensional ranges to “re-project” (what we are accomplishing by re-focusing) into Forms, mostly resonating with the Configuration of our persistently ongoing psycho-mental states (i.e. into the other dimension of the creative dynamics of Energy-Plasma), while on the other hand reliably prevent the “penetrating” of these Forms (into the inherent to them wave ranges (Resomirals), Configurations of “karma-fractions” of which qualitatively do not match the primordially programmed parameters of their Continuums.

14.15775. Within the superior ranges of 3-4-dimensional groups of our collective manifestation, including all the multitude of other proto-Forms, the “tetrahedron” Configurations of “emanations”

and “psyche” of the sphering “hexahedrons”, while attracting to themselves the synthesized sub-Aspects and Aspects of other Qualities, duvuyllerrtly transform into the distinctively sphering (by all elements of the inner structure, as well as in relation to their neighboring multi-qualitative dynamics) Configurations of Formo-Creators of karma-plasma “icosahedron-like” structures. Then, throughout the inferior ranges of 4-5-dimensional Continuum groups, after the process of cessation of the federation of “hexahedron karma-fractions”, belonging to the various Pure Qualities, there is a “geometrical” transformation of “icosahedron” Configurations into the “dodecahedron-like” structures, which in turn are being the proto-analogs of Forms of the first synthesis state, corresponding to its own Synthesis schema. Our schema in this case is a condition, which I call the “Cosmic Constructive Potentiality”.

14.15776. Once again please pay attention to the following notion: not a single “karma-fraction” is being fused or glued together in some type of the “monolith construction”; every “tetrahedron”, being part of an inner structure of a “maternal karma-fraction”, fully reserves the inherent only to itself the svilgs-dynamics and an informational integrity. It’s just that because of the resonant “karma-fractional” interconnection, the gradual dimensional merger of svilgs-dynamics of Formo-Creators of each “tetrahedron”, pyramid” or an “octahedron” inside of the “maternal karma-fraction” is being implemented, which provides for the formation within the Self-Consciousness of the mutual energy-informational space, where all the Formo-Creators (which were capable of a resonant unification during the dynamics of mutual for them synthesized Experience) are able to receive the Energy-Information of all the “ribs”, along with all the Experience of other Formo-Creators, structuring the “maternal karma-fraction”.

14.15777. Throughout the medium levels of the 4-5-dimensional Realities, the foundation of such “spheroidal” dynamics is represented by Resomirals, which are synthesized by means of Formo-Creators Configurations of Aspects of various Qualities of “dodecahedron karma-fractions”, gradually “accreting” (attracting towards its dynamics) the Configurations of Formo-Creators of elementary “karma-fractions” of sub-Aspects and Aspects of the consequent Pure Quality, which in turn is involved into the synthesis dynamics of the corresponding proto-form Synthesis Direction. Such complex “geometrical figures” can hardly be associated with the proper polyhedrons, known to you, since to the most part resemble the “polyhedron spheroidicity”, structured by the large number of the variously “interfaced” with each other, resonant groups of multi-Qualitative “tetrahedrons”. When I observe the Process of “karma-fractional” formation throughout various Levels of Energy-Plasma during Meditation, within the informational space of my Self-Consciousness the constantly changing Configurations of these Form-Images begin to occur; they are being structured by means of self-conscious Elements (Conscious Fields) of the individual ODS into the various dynamic integrated figures, many of which I simply unable to anyhow describe due to the fact of the complete absence of their dynamics analogs within your Perception systems.

14.15778. There are well-known elementary figures, such as sphere, hexahedron (cube), pyramid, tetrahedron, octahedron, icosahedron and dodecahedron – all these are “projections” of our 3-4-dimensional Perceptions. However, the figures which I am able to observe in my meditations aren’t at all the same as these I have listed above. They are constantly being variable within themselves (just as in the plasticine cartoon) and represent some kinds of infinite cone-ellipticities and trapeziform truncations, complex-dynamic “fractalities”, specific “extensions”, “convexities”, “indentations” and so forth. Moreover, at the very instant of the manifestation of each of these “figures”, a certain general Energy-Information is being “projected” into the informational space of

Self-Consciousness, the meaning of which isn't really clear in the beginning, but upon the gradual concentration into its Configuration, becomes comprehensible in a form of "sharper projections" of Form-Images, which in turn, upon my resonant interaction with brain Formo-Creators, (i.e. assimilation of that Information) immediately scatter and dilute, transforming into the shining goldish-violet, blue-emerald, silvery-azure, yellowish-green sparkling fluxes, which are being altered very dynamically, farther transforming into the additional, infinite color combinations.

14.15779. At that, each such transformation is being accompanied by a very distinctive sound and that is why I continue to assert, that the sound and color dynamic is very closely interconnected between each other and has a certain mutual Nature, as opposed to the conventional Science perception in regards to this matter. All our conditional geometrical Perceptions regarding "karma-fractions" have their own color characteristics, which resembles the mixed color pallet, where it is impossible to distinguish any particular single colors but only certain prevalence of any specific spectrum parts. The color dynamics of every "karma-fractional" Resomiral is very diverse, very agile; it consists of brilliantly sparkling sub-Aspect "karma-fraction" elements, with no regard to the dimensional characteristics. On the Configurational Level of the superior Self-Consciousness Formo-Creators, this dynamic is perceived as a unified-whole dynamic mass of "something living and intelligent", its being "flashy" and "spangle-like", consisting of the constantly altering vivid tinges; at that, the color intensity and saturation of these "masses" to a great degree depends on the Resomiral (dimension type).

14.15780. For instance, Resomirals, structured to a various degree by the synthesized Configurations of Formo-Creators of СВУУЛЛМИИ-СВУУ (SVUULLMII-SVUU) and ЛУУДМИИ-СВУУ (LUUDMII-SVUU)-Forms (from 1-6 and 7-12 ДУУ-ЛЛИ) of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA)-Иисииди, are sparkling with vividly-cherry red colors. This isn't blood; instead it is a very beautiful and fascinating spectacle: all the Space-Time, formed by its manifestation dynamics appears before the VEC-Observer in a form of a continuous, uninterruptedly and variably iridescent mass of various "spangles", "fountainlets", and "sparkles", without bearing any signs of negativity, fear or aggression. And when the compulsively-subjective participation of Self-Consciousness Formo-Creators is absent – this becomes a stupendously colorful, fantastic and startling show, which is never being monotonous and uniform.

14.15781. That is actually a spatiotemporal manifestation (demonstration) of the "karma-fractional" Force Vectors dynamics and the inertia of duvuyllerrt Synthesis of the particular Resomirals. When two "human" Dominants are being synthesized (THE Love-Wisdom and THE Will-Intellect), a certain kinds of colors are involved, while the catalysts, which are always participating in an inner dynamics of Formo-Creators of Aspects of each Dominant resemble completely different colors. And it is almost impossible to state firmly which color is which. Everything, which the color dynamics consists of, is inherent only for the "human" Realities, only for our Perception systems. Proto-Forms can visualize the same, but in different and distorted (in comparison to us) shape and form.

14.15782. I describe the "geometrical transformations" so minutely because this is, in fact, a step-dimensional principal of "materialization" of all Forms of Collective Intellects – from the state of the energy-informational interrelationships, inherent to all "forms of the undulatory manifestation" within 2-3-dimensional Levels, all the way to the qualitative states of Formo-Creators Configurations, structuring 4th, 5th and all forthcoming infinite dimensions of the Tertiary Energy-Plasma. All the "materializational" dynamics of each of these transformationally-transmutation processes is feasible

due to the concurrent frequency realization of the infinite number of “parts” of certain types of slloogrent Energy-Information, implemented by means of the interaction of particular “geometrical” figures – “karma-fractions”, which are in turn formed by the narrow-specific Creative Activity of the essential component Elements of the Energy-Plasma – “emanations” and “psyche”.

14.15783. Each of the “ribs” of these “karma-fractions”, slloogrently structured by the specific dynamics of multi-qualitative Force Vectors, is an initial “projection” mechanism into the informational space of the “individual” Self-Consciousness of the slloogrent Form-Images of a certain Aspect of the particular Quality, which, while transforming within our subjective Perception system (by means of the brain Formo-Creators) into the certain general Perceptions (“What is this?...” “Who is this?”) in a distinctive fashion stimulate all our feelings, opinions, Desires and Aspirations. Thus, from the partially-synthesized “emanations” and “psyche” of the most inferior Levels of the Energy-Plasma, their more complex “projections” commence to be inertially manifested throughout 2-3-dimensional Form-Systems – BBY(VVU)-Configurations of Thought- and Sensual Forms, which immediately enter into an active interactivity with each other (by means of the Self-Consciousness structures of the various Proto-Forms), and synthesize into the corresponding sub-level manifestation CΦYYPMM (SFUURMM)-Forms – certain intermediate constructive (“karma”) result of the vital activity of the Self-Consciousness of any type. Each of such concurrent results, being instantly aggregated within the duvuyllerrt sublevels with all the multitude of the specific consequences of the multi-qualitative choices of other realizational Forms, create from the abovementioned slloogrent “tetrahedron” dynamics absolutely all the diversity of various types, kinds and Levels of the Tertiary Energy-Information.

14.15784. The higher the Level of “karma-fraction” quality, which you utilize within your Self-Consciousness for the formation of your own Perceptions regarding any object or subject, the higher the individual frequency of these “karma-fractions” will be, since in order to form a frequency dynamics of such density, Formo-Creators have to utilize the ever-increasing number of energy-informational “ribs” (Energy-Information mediums), which will provide for the lesser degree of tensions (incompatibility or dependency) between the Configurations of multi-qualitative Formo-Creators. It might seem possible to derive all the necessary Information from any single slloogrent “rib”, structuring “karma-fraction”, and...I can tell you that this notion is absolutely “correct”! Yes, it is definitely so, if only you have an access to a universal - super-temporal – decoding “mechanism”, which, unfortunately isn’t active among these Levels of your Constructive Activity, which is attributed as an “individual” Self-Consciousness.

14.15785. The American scientist David Bohme had introduced a following example, where two cameras, positioned on the opposite walls of the aquarium, are videotaping the same exact fish inside that aquarium. The video is transmitted by means of two different monitors, located in an adjacent room. The potential observer, not knowing about an aquarium and viewing the fish from the side view and full face angles for the first time, would be greatly surprised if told, that the fishes he sees on two monitors – in fact is the same one single fish. That is because the imagery difference from both cameras is so striking. Just about the same is happening with “karma-fractions” – in each previous dimensional range there is an infinite number of connections of a simpler “karma-fractions”, which are ultimately jointly form a single, structurally more complex “karma-fraction”. We, while simultaneously being focused upon the different groups of duvuyllerrt Continuums, become the Observers of all the multitude of factually the exact same “karma-fractions”, who’s mutual Configuration is “projected” into an informational space of our Self-Consciousness from

the multi-qualitative positions of a synchronous perception, and therefore we have an illusory “impression” that these are absolutely different “karma-fractions”.

14.15786. But that Illusion is only a result of the fact, that within the current type of subjective Reality we don't have an opportunity to observe and analyze the whole integral slloogrent scenario of the manifested “karma-fraction”, the Configuration of which is constantly being transformed and transmuted into the multitude of additional states: at first the “pyramid” of a certain Aspect has joined it in one Form-System, then – the “pyramid” of another Aspect, while in the third Form-System the whole group of “tetrahedron” catalysts has also joined that “karma-fraction”. And somewhere the Formo-Creators of our Self-Consciousness view the perceived dominant attachment of the “karma-fraction” of certain Quality as the connection of background catalysts, consisting of Aspects of various Qualities. On the assumption of the difference of the analyzed Configurations of the observed Forms, we come to the wrong conclusion regarding the fact, that we observe two different “karma-fractions”, when in fact, we see the same exact one.

14.15787. Looking at the alteration of the outer reality simultaneously from the different scenarios, structuring the mutual slloogrent development scenario of the Stereo-Form we focus upon, we always subjectively perceive absolutely different consequences of the energy-informational quantizing of “maternal karma-fraction”, which within the Form-System actualities are being transformed into various lively situations, conditions, “personal” relationships and the ongoing daily activities (happening to us or someone else). All this discrete, and, supposedly non-connected energy-informational dynamics, is actually constituent Elements of a single “karma-fraction”, which in all their diversity of variously-qualitative ways of quantizing-connection, form all sorts of variants and possibilities for the cognizing of more high-frequency Formo-Creators by means of realizational-synthesis dynamics of the lesser qualitative “parts” of a single slloogrent Configuration. And now I wish to ask you: how many of these “karma-fractions” in reality are – one or an infinite multitude of them? The beauty of the current situation is that regardless of what your answer would be, it always will be correct. That is due to the slloogrentity Principal, which is being supplemented and realized by means of JJIAACC-JJIVYCC-dynamics (“The Law of Unity of the multitudes”), is eternal and universal in its essential Meaning, and any manifestation Form of the Energy-Information (“karma-fraction”) is actually a result of an inertial quantizing-unifying of structurally more simplified elements.

14.15788. Currently, existing within a biological Form and completely depending on the qualitative dynamics of the brain Formo-Creators (which predominantly form the dynamics, inherent to the first two Energy-Centers), you are forced to utilize quite cumbersome and complicated system of narrow-frequency inertial decoding of the “decompressed” Information, which in turn is tremendously limited by the carriers of only two fundamental Qualities, which they (brain Formo-Creators) currently synthesize. All the other “part” of the slloogrentity of any “unfolding” Information is still being unavailable to them (and, conformably, to “you”). By means of such “unfolding” fashion all the CΦYYPMM (SFUURMM)-Forms of various types of Self-Consciousness are created. These are very specific Formo-Creators Derivations of all the Collective Intellects Proto-Forms, which don't have any binding to the specific Temporal Fluxes within the OD-Systems. They are being connected with each other in quite surprising and surreal combinations within the “inferior” Levels of Energy-Plasma (until 3-4-dimension) and to a greater degree they are being inertially “stratified” throughout the Configurations of the various inter- and inner-aspect Synthesis Directions, which they structure, while within the high-frequency Levels they are gradually reflecting the universal properties of slloogrentity by their dynamics.

14.15789. At that, as I have said before, within Configurations of two dominating Quality Aspects (throughout each of the inertial Synthesis Directions), structuring Resomirals of wave ranges of the duvuyllerrt “projecting” of all Form-Creator Configurations from the multi-qualitative states of 3-4-dimensions into the similarly multi-qualitative but more synthesized states of 4-5-dimensions, certain dissonant (but in reality – moderately compensatory, partially balanced and preparing the previous Form to the next Level of its Existence) factor is being interposed into the implemented Synthesis process. This factor forms within the multi-qualitative boundaries of 3-4-dimensional ranges the spherizing “karma-fraction” dynamics on the basis of the very inconstant (continuously superimposing onto each other) “icosahedron-dodecahedron fractal” Configurations, which are in the more stable states of 4-5-dimensions harmoniously being transmuted into the spherizing “dodecahedrons”.

14.15790. These “dodecahedrons”, as opposed to the “hexahedrons” of the previous range, are formed by Formo-Creators not by means of unifying of different-Aspect “octahedrons” of a single Quality, but by means of creation of qualitatively-new and more functional “hexahedron quadruplets” from the differently-Qualitative “tetrahedron” combinations of 3-4-dimesional range. At that, the third and the fourth of the interacting “hexahedrons” represent certain Aspects of background Qualities and are being catalysts of their interconnection with all the “neighbor dodecahedron” Formo-Creators Configurations. The “karma-fractions” of the Quality THE-Unanimity are being the Synthesis catalysts in a Direction of forthcoming development throughout the synthesis dynamics of Formo-Creators of JJYV-BBY (LLUU-VVU) for HYYJJ-BBY (NUULL-VVU)-Forms.

14.15791. Within 4-5-dimensional range there are “hexahedron” Formo-Creators – the carriers of Aspects of an additional Pure Quality are additionally being activated. They are equally interacting with all other Formo-Creators of Aspects of two already synthesized Qualities while the Formo-Creators of additional fourth, fifth and sixth “hexahedrons”, resonantly interposed by their Configurations into each of the “hexahedron quadruplets” (“dodecahedron”) are also playing their catalyst role of the background interactions. Thereafter everything is being revolved along the same scheme: in each of the following dimensional ranges the Form-Creator Configurations – Aspect carriers of certain new additional dominant Quality, being equally balanced with each other by the background catalysts, resonantly engage (by means of the corresponding Resomirals of the similar dimensional wave ranges) into the “spheroidal” “karma-fractional” dynamics.

14.15792. What is the actual difference between the “hexahedrons” of dominant Qualities and “hexahedrons” of background catalysts? The “ribs” of the first are formed by “emanations” and “psyche” of a single certain Quality, while the “ribs” of the later are formed by “emanations” and “psyche” of various Qualities. When interposing into the 3-4-dimensional synthesis dynamics of every “hexahedron” pair, which represents Aspects of only two different Qualities, they enforce and consolidate an established mutual quantizing (synthesized energy-informational codes) by means of their multi-qualitative (only relating to the current pair!) energy-informational interconnections, thus decreasing the capabilities for the formation of the stable tension strains between the various Dominants. As soon as the tension (the semantic difference between the synthesizing Aspects of variable Qualities) becomes too great (we interpret it as a psychic stress), the resonant “projecting” of CAF-DRF-dynamics of the current Formo-Creators group occurs into the qualitatively more balanced Configurations (already devoid from the powerful energy-informational destruction factor), in which the pairs of dominant “hexahedrons” blend with pairs of background catalysts somewhat differently.

14.15793. Formo-Creators of catalysts “karma-fractions” throughout all Levels of the Tertiary Energy-Plasma represent by their Configurations the mixed type of energy-informational formations, created within the diffusive resonant zones and by their Entity are carrying the simultaneous manifestation of the two and more Pure Qualities. That is precisely what allows the catalysts to “initially” engage into the dynamics of inter-quality synthesis process, forming the distinctive duvuyllerrt “bridges” for the connection of the simplest “karma-fractions” of the second (third, fourth...) Dominants. By the inertial sequencing interposing of its “tetrahedrons” into the mutual synthesis process, catalyst Formo-Creators have an opportunity for the formation in each type of Space-Time of the multi-qualitative diffusive transition zones of various interacting “parts” of the exact same slloogrent Configuration from the prevailing dominance of a certain Quality over to the other types of dominance, substantially balancing the tensor intensity in the Configurations of multi-qualitative Formo-Creators.

14.15794. In the inferior as well as the superior ranges of 5-6-dimensional groups of duvuyllerrt Continuums these force interrelations become “sixth-seventh-angular rib” Configuration (4 “karma-fractions” of dominant Qualities are being actively stimulated by the 3 background catalysts; upon the dimensional level increase, the 4 Dominants are also being stimulated by the other background catalysts).

Next:

Within 6-7-dimensional Continuums this schema duvuyllerrtly changes for the “eighth-ninth-angular geometry of fractal facets” (5 Dominants + 4 catalysts; 5 Dominants + 5 catalysts);

Within 7-8-dimensional Continuums the Configurations of Form manifestations are correspondingly formed by “tenth-eleventh angular geometry” (6 Dominants + 5 catalysts; 6 Dominants + 6 catalysts).

If we look at this interdependence even deeper, we will see that 8-9-dimensional Form Configurations have “12-13-angular facets” (7 Dominants + 6 catalysts; 7 Dominants + 7 catalysts);

9-10-dimensional – “14-15” (8 Dominants + 7 catalysts; 8 Dominants + 8 catalysts);

10-11-dimensional – “16-17” (9 Dominants + 8 catalysts; 9 Dominants + 9 catalysts);

11-12-dimensional – “18-19” (10 Dominants + 9 catalysts; 10 Dominants + 10 catalysts);

12-13-dimensional – “20-21” (11 Dominants + 10 catalysts; 11 Dominants + 11 catalysts);

Within the transitional 13-14-dimensional range (the transition of the Tertiary state of Energy-Plasma into its Secondary state), the functional ability of the Planetary Collective Intellect towards the Cosmic Creation can only be manifested through the “fractality of 22-23-angular facets” of all of its Karma-Fractions (12 Dominants + 11 catalysts; 12 Dominants + 12 catalysts).

14.15795. So now we have determined that Karma-Fractions (the fundamental “psycho-emanation clusters” of the creative dynamics of Formo-Creators of Energy-Plasma within each of dimensional

ranges of its – simultaneously manifested – Existence) represent somewhat isolated from each other and never coming in any sort of contact with each other energy-informational “capacities” (due to the fact of the constant influence of “dual” Force Vectors, formed by Formo-Creators – carriers of Aspects of other Qualities), which schematically reminds me the functioning principals of the computer RAM memory. Even if they hypothetically would “desire” to somehow “merge” – totally and inseparably – they wouldn’t be able to do that.

14.15796. The same principal applies inside the atom nucleus, when the similarly charged elementary particles are being retained together, while forming by their constructive dynamics the mutual integrated field, where they never impinge or even touch one other. This objective inherency of any dimensional Level of Energy-Plasma provides everything, existing within it to take place instantaneously and concurrently. The influence of the rotational dynamics of the inertial Coefficient (i.e. qualitative difference between every single TES-“unfolding”, implementing by Self-Consciousness Formo-Creators) is manifested only in the process of your subjective “individual” Perception of anything and is realized as a certain chronological difference within your “linear” (three-dimensional) Temporal perception between “various” events as a certain logical systemacy, conforming sequence or a periodicity.

14.15797. The key factor in a synthesis “karma-fractional” dynamics, as I have said before, is an angular sphering, defined by the mechanism of svilgs-dynamics (svilgs – multidimensional vector, characterizing this dynamics), which prevents the “karma-fractions” to merge together. The reason why this inertial change of the energy-informational directivity of these parameters takes place is unknown for me, since these basic “karma-fractions” are very unstable and because of that I simply couldn’t derive this information.

14.15798. I can only guess that all these “dispersive-fluctuating” sphering occurs due to the existence in the dynamics of each of the “ribs” of the multitude of differently-directional Force Vectors, the concurrent integral of interrelation of which forms the specific tendency towards the dynamics of individual “charge”, inherent to the current “karma-fraction”, i.e. towards the alteration of the energy-informational potential in relation to the “spheroidal” force field, which is forced by the certain Synthesis Direction (for the “karma-fractions” of 3-4-dimensional range - протофсо-лоолг-со-ДООЛЛСОВЫМИ analogs of different variables of multi-directional svilgs-interactions or svilgs waves, representing the concurrent multi-qualitative svilgs-condition of the slloogrent Configuration of “graviton” Formo-Creators – svilgsons – of a single “karma-fraction” in relation to all possible duvuylleerrt Synthesis Directions). This field is also represented in this multi-qualitative dynamics by the integral of Force Vectors, formed by all the multitude of other, actively interacting “karma-fractions”.

14.15799. In quantum physics the term “spin” has the following definition: “intrinsic moment of quantity of the particle movement, having quantum nature and not connected with the movement of the particle as a whole”. Even though this only quite remotely reflects of what’s going on within the inertial energy-informational dynamics of the Tertiary Energy-Plasma (in multidimensional Form-Systems), I propose to utilize this term failing the more reliable Perceptions at this time...

14.15800. The spin, ascribed to the elementary particles, is too large to be able to fit the definition of rotating of the constituent substance upon the known assessment of the particle’s size. Therefore for these particles the spin is reckoned to inner attributes, similar to mass and charge, requiring a

specific, still unknown to scientists, justification. One of the specifics of quantum mechanics is the fact that the real particle movements are interchanged for the quantum wave functions, while the experiment results are calculated in a form of probability of various events. Such approach is unable to explain the spin nature, since that requires substantive particle models. The spin of any simple elementary particle can either be integer or half-integer, unless we deal with atoms or molecules. The atom spin is a vector summary of spins of all particles, which it consists of, considering quantization rules. In an unexcited state the atom (or molecule) spin equals zero, since the quantity of protons and electrons is the same. Upon the molecule excitation one of the electrons switches over to a higher energy level, while the multiplicity can either be the same (upon the unchanging reciprocal spin orientation), or altered (upon the change of spin orientation).

14.15801. It is worth mentioning that the multiplicity is defined by the quantum digit S for the square of electron spin molecule. The multiplicity of M equals $2S+1$. Since the electron spin is half-integral, the multiplicity is a natural number, moreover for the N -electron molecule with even N possible definitions of the multiplicity equal 1, 3, 5, ... ; the corresponding conditions are called singlet, triplet, quintet and so on. At the odd N the multiplicity can be defined 2, 4, 6, ... (doublet, quartet, sextet and similar conditions). Let's assume that the molecule from the main singlet state can transform into an excited singlet or triplet ($M=3$) condition. Meaning we are dealing with molecules of three kinds, with three different spins.

14.15802. And here we can draw some analogies with the earlier described attributes of resonant range energy-informational interrelationships: *multi-differential synthesis dynamics of differently-directional Force Vectors of each "karma-fraction" within each resonant range also has an opportunity of being inertially "excited" – while being positioned on its lowest level within a certain "neutral" state, the "karma-fraction", after being energy-informationally quantized, alters its state simultaneously throughout all possible Synthesis Vectors, at that, its multiplicity can actually rise.*

In the slloogrent concurrent "karma-fractional" dynamics these force fluctuations aren't at all discretely definable, since throughout each of the dimensional sub-levels the "karma-fraction" is manifested only by means of a certain "part" of its mutual energy-informational BBV(VVU)-Configuration, while the only way to actually define it, is possible by means of the Resomiral interrelationship within each of the dimensional resonant ranges.

14.15803. Let us get to the bottom of the spin wave conception. There is such a quasi-particle, called magnon, the dynamics of which correlates to the elementary excitement of the interconnecting spins system. Within crystals, bearing a few magnetic sub-lattices (antiferromagnetic for instance), few kinds of magnons can exist, which have various energy spectrums, each of which represents a spin wave within the crystal. This principal quite closely resembles the energy-informational interrelation between Force Vectors of variable Synthesis Directions, not only within one "tetrahedron rib", but also between all Vectors of the six multi-qualitative "ribs" of a single "basic karma-fraction", as well as between all synthesized "ribs" of all "karma-fractions" within the same dimensional sub-level simultaneously.

14.15804. The excitement, arising within any particular Force Vectors is immediately being transmitted to all other Vectors, influencing their dynamisms. Magnons interact with one another and with other quasi-particles. At temperatures, lose to an absolute zero the crystal lattice achieves the condition of the least possible energy, in which the atomic spins (as well as the magnetic moments) are being

arranged in a particular direction (which reminds me the formation of the each particular Synthesis Direction within “karma-fraction” dynamics). Upon the temperature increasing (the qualitative alteration of the informational space dynamics) the spins begin to deviate from the primary direction, thus increasing the inner energy and decreasing the full magnetization, similar to the quenching of the magnetization volume at the expense of the “parasitic” collective spin interactions.

14.15805. Within the slloogrent “karma-fractional” interconnections this is being inertially manifested, for instance, as periodically emerging (within the informational space outer each “karma-fraction”) tendency towards the dominant (suppressing) impact or a recessive (oppressing) condition of “emanations” and “psyche” of variable Aspects of different Qualities in relation to each other. Note that in quantum physics there is such notion as spin wave branches, the quantity of which equals the quantity of magnetic sub-lattices. This is governed by the processional character of magnetic sub-lattice moments.

14.15806. Let us deeper get into the mechanism of formation and interaction of “karma-fractions”. Svilgs-dynamics in its core foundation resembles the pseudo-rotational process of “tetrahedron karma-fractions”, which I have defined as the angular sphering. It would be completely wrong to associate the svilgs-dynamics with certain rotary movement kinematics: in reality this process of the instantaneous energy-informational “refocusing” of the individual inner-focus qualitative Configuration dynamics of “peak” Formo-Creators into the informationally more complex (more multidimensional) Configurations of slloogrently (primordially!) formed by them “karma-fractions”. Which, from the position of your “current” primitive Perceptions regarding the ultra-fast (but in reality – instantaneous) and sequential schema of certain multi-qualitative states of the slloogrent Configuration of specifically manifested Self-Consciousness Form into all the multitude of other ones, concurrently inherent to it, multi-qualitatively manifested conditions, can be associated only with the chaotic geometric transformation of the Form itself within the exact same wave range of Space-Time, which in turn creates the illusion of certain “rotation movement” within our imagination.

14.15807. Although there can be no such “rotation” at all, since there is nothing, which can actually “rotate” within the Energy-Plasma (and, frankly, there is no reason for any “rotation” to occur), absolutely all variants of all possible multi-qualitative Configuration states as Forms of Self-Consciousness are already in existence and manifested within their inherent resonant spots of Space-Time. Any inertial dynamics can relate only to the qualitative interchange of inner-focus states of Formo-Creators. Resonant “inclusion” of “tetrahedrons” into the dynamics of qualitatively different or structurally more complex “karma-fractions” leads to the partial energy-informational inter-distortion of previous Formo-Creators Configurations of “tetrahedron” structures, providing the opportunities for advanced balancing (equilibration, equalizing) of the mutually created energy-informational structure. For example, upon the formation of the “pyramid”, consisting of four “tetrahedrons”, “lengths” (dissonance distances) of certain “ribs” conditionally “decreasing”, while some other ones conditionally “increasing”. In reality, there is no linear alteration taking place, but what does take place is the slloogrent properties of Space-Time Form-Structures are being changed in the individual-resonant fashion in relation to the current inner-focus dynamics. Within Space-Time the more complex Configurations of “karma-fraction” Formo-Creators are capable of manifesting only through the specific and inherent only to them, Forms of Self-Consciousness.

14.15808. The gradually-instantaneous transformation of the geometrical Form of each “karma-fraction” is not happening chaotically (although it may seem unpredictable and absolutely

incomprehensible), but it is being implemented in a specific and unique (for the current Configuration) sequence, which strictly corresponds to the Level of slloogrent participation of Formo-Creators of the current “karma-fraction” in the synthesis process. That means that the simplest “karma-fractions” as “tetrahedrons”, “pyramids” and “octahedrons” are being involved into the dynamics of the multitude of the proto-form Synthesis schemas, as structural Elements, which are necessary for the formation of the more complex “karma-fraction” Configurations and their manifestation Forms, for instance, on the levels of Formo-Creators of carbonic Self-Consciousness Forms – proteins, amino acids, saccharides, organic acids and salts, along with other simplest organic realization Forms of bio-Creators. Implementing their “functional” purpose in each of the “ascending” (more synthesized) fluxes of slloogrent synthesis dynamics, the simplest “basic karma-fractions” are being the constituents of the infinite variety of much more intricate “karma-fraction” types, CΦYYPMM (SFUURMM)-Forms and Karma-Forms, unifying all the potential energy-informational possibilities of such participation within the Formo-Creators Configurations of their “peaks”.

14.15809. By that I would like to highlight, that any “peak” Form-Creator of any “karma-fraction”, beginning with “tetrahedron” levels, always has a real potential ability to actively participate by means of its Focus’s slloogrent dynamics, in the implementation of synthesis processes within the Configurations of Forms of Self-Consciousness, which are concurrently manifested throughout 0 until the 12th dimension, which means that the Formo-Creators themselves aren’t being shifted anywhere, they aren’t becoming more supraliminal or more wise. It’s just that all constructive abilities are primordially programmed into them, on the “tetrahedron” levels, and upon the gradual implementation of various synthesis processes and the complication of the energy-informational Configuration capacity (corresponding to the constructive dynamics of their Focuses) the “peaks” Formo-Creators acquire more high-frequency slloogrent constituents of informational “ribs”. This can approximately be compared with the situation, when you lie on your bed, and, depending on the activity of your Self-Consciousness at that moment, can experience joy, sorrow, flippancy or concerned state of mind. It doesn’t mean that you are actually moving anywhere in order to get that experience, but rather you can experience all sorts of feelings and emotions, beginning with the most primitive ones all the way to the most sublime and subtle ones, by means of associative recollection mechanisms of your Self-Consciousness.

14.15810. The uniqueness of the inertial succession of all “geometric” transformations inside the slloogrent “karma-fraction” Configuration, ongoing as a result of the alternate (but in reality – simultaneous!) resonant inclusion in it, of the additional Elements of the Formo-Creators Synthesis, which results in the formation within its Configuration of the narrow-specific (for each of the variants of the simultaneous “karma-fraction” manifestation) Direction of its angular sphering, which I define as a svilgs. The process of the simultaneous “projection” by all “karma-fraction peak” Formo-Creators of the realization dynamics of infinite number of Focuses of its individual BBY(VVU)-Configurations into the informational space (individual ODS) of Forms of Self-Consciousness manifestations, is synchronized with the simultaneous dynamics of rotational Shifts of each Form-System, in which all the Interpretations of current Forms are being inertially manifested along with the variable qualitative TES-“unfolding “variants of their Self-Consciousness. This process is being a part of the formation mechanism within Space-Time of the synthesis Formo-Creators svilgs-dynamics of all the infinite multitude of Forms of Self-Consciousness manifestation, which is being implemented in a narrow-specific fashion simultaneously throughout all possible Synthesis Directions and all possible Dimension levels of the Energy-Plasma.

14.15811. There are potentially unlimited opportunities exist for various proto-form integration Experience, which are available to all the Formo-Creators of “karma-fractional peaks”. Since Formo-Creators of each of the “tetrahedrons” (as the carriers of Energy-Information of various sub-Aspects, which they synthesize) are capable of the concurrent participation in the multitude of variable Synthesis schemas of sub-Aspects and Aspects of all the Pure Qualities by means of their BBY(VVU)-Configurations, they automatically acquire the Experience of other “karma-fraction” Formo-Creators, which is implemented along with completely different Synthesis schemas. This circumstance, in turn, provides the opportunity to the CAF-dynamics of each Proto-Form’s Self-Consciousness Form Creators resonantly “re-project” from the Configurations of certain Proto-Forms into the Configurations of other ones (only into the resonantly compatible “parts”) during the process of the synthesis balancing of tension strains.

14.15812. So, who is implementing all these sequential inertial balancing and resonant alignments between the multi-qualitative Formo-Creators BBY(VVU)-Configurations, which structure various “parts” of the mutual slloogrent Configuration of any “karma-fraction”, simultaneously revealed throughout all the dimensional Levels of Space-Time? Cosmic Entitys (Formo-Creators), narrow-specific analogs of which, manifested within our dimensional resonant ranges, scientists call the gravitons and define them as pseudoparticles; they are responsible for the organizing of narrow-specific svilgs-dynamics, not only for each Level of Energy-Plasma, but also for each Resomiral of the infinite dimensional resonant wave ranges. These particles have their own IISSIIDIOLOGYCAL definitions and corresponding Cosmic Codes within each Level of their narrow-specific activity.

14.15813. Here is the svilgson classification in a gradual order of dimensional progression:

- Formo-Creators of proto-elementary graviton-analogs of Conscious Forms, manifested within Resomirals of 0-1-dimensional ranges I define as укстры; they are slloogrently structuring оглокквортный Level of the causal sub-overtone УРГЛЮКСТР – from 0, 0 to + 1, 0 dimension (Cosmic Code – УКСТР);
- Formo-Creators of proto-elementary graviton-analogs of Conscious Forms, manifested within proto-form Resomirals of 1-2-dimensional ranges I define as такстры; they are slloogrently structuring the уффлуммургный Level of causal sub-overtone АФФТАКСТР – from 0, 0 to +2, 0 dimension (Cosmic Code – ТАКСТР);
- Formo-Creators of proto-elementary graviton-analogs of Conscious Forms, manifested within proto-form Resomirals of 2-3-dimensional ranges I define as йюкстры; they are slloogrently structuring the ирккуллигранный Level of causal sub-overtone УЙККУЙЮКСТР – from 0, 0 to +3, 0 dimension (Cosmic Code – ЙЮКСТР);
- Formo-Creators of gravitons of Conscious Forms, manifested within Resomirals of 3-4-dimensional ranges I define as *hvasslons*; they are slloogrently structuring the ахсывв-роллентный Level of causal sub-overtone УПДУХВАССЛ – from 0, 0 to +4, 0 dimension (Cosmic Code – ХВАССЛ);
- Formo-Creators of graviton-analogs of Conscious Forms, manifested within Resomirals of 3-4-dimensional ranges I define as *hvasslons*; they are slloogrently structuring the ахсывв-роллентный Level of causal sub-overtone УПДУХВАССЛ – from 0, 0 to +4, 0 dimension

(Cosmic Code – ХВАССЛ);

- Formo-Creators of more qualitative proto-analogs of graviton-hvasslons, manifested throughout various proto-form Resomirals of 4-5-dimensional wave ranges, I define as поранты; they are slloogrently structuring эхкдорпорантный Level of causal sub-overtone АЙАССМАСС – from 0, 0 to +5, 0 - dimension (Cosmic Code – ПОРАНТ).
- Graviton-analogs Formo-Creators of other more qualitative Levels are defined respectively:
- 5-6 dimensions – вийвы (Cosmic Code – ВИЙВ);
- 6-7 dimensions – вулссы (Cosmic Code – ВУЛСС);
- 7-8 dimensions – ммирссы (Cosmic Code – ММИРСС);
- 8-9 dimensions – дойлссы (Cosmic Code – ДОЙЛСС);
- 9-10 dimensions – кралмы (Cosmic Code – КРАЛМ);
- 10-11 dimensions – вуулхмы (Cosmic Code – ВУУЛХМ);
- 11-12 dimensions – фиймы (Cosmic Code – ФИЙМ);
- 12-13 dimensions – иввссы (Cosmic Code – ИВВСС).

Throughout the Configurations of manifestation Forms of various Collective Intellects, formed within the Secondary Energy-Plasma Space-Time, the svilgs-dynamics is being implemented by means of fundamentally different processes, which are regulated by аввакклонов Formo-Creators, while the very “mechanism” of their activity is called “аввакк-лонгация” or “аввакклонизация”.

14.15814. The slloogrent Configurations of all Formo-Creators of graviton-analogs of various manifestation Levels resemble the very complexly differentiated resonant combinations of Energy-Information, the interconnections between which are not at all analyzable, inherent to the very limited abilities of the “human” logic. The multi-qualitative attributes of each of the above mentioned types of graviton-analogs Formo-Creators are quite diverse, aren’t compatible with anything, known to men, aren’t comparable, and thus each of them can conditionally be compared only with the distinctive inherentities of a certain nation, which has very unique culture, lifestyle, laws, moral principles, religion and so on. The integrity of this nation is insured by the specific, inherent only to this nation, traditions, language and all the rest, totally separated and detached from others. The same goes for these Form-Creator types, which possess the over specified slloogrent Information within their Configurations, and that Information is related to the mutual Synthesis of all sub-Aspects and Aspects of each of the ОО-УУ-Entitys, with all sub-Aspects and Aspects of each of the other 11 ОО-УУ-Entitys.

14.15815. That is why I am stating that the slloogrent Configuration of each type of graviton-analogs Formo-Creators, specifically manifested through the dynamics of Conscious Forms of each of the dimensional range, is *supposedly* differentiated “within itself” onto the infinite multitude of its own

varieties, employed in the implementation of all processes of Synthesis, inherent only to certain, uniquely expressed and dovuyllerrt with one another (mostly resonating with each other) proto-form Vectors. Since the synthesis dynamics of укстров, такстров и йюкстров is incomprehensible to us, I will try to compare it with the hvasslons constructive activity.

14.15816. Previously we have discussed the fact that between the “fractal” Configurations of unequivocal digits and each Configuration, which is formed by the variable combinations of some of these digits, coupled with other digits (two, three, ... n-valued) there is a tremendous difference, which in turn is vividly evident in the mathematical attributes, which these various digital combinations are revealing (for instance, 5, 51, 256, 5 894, 27 645, 198 534 and so on). The same goes for hvasslons. Initially each hvasslons Form-Creator type is configurationally belongs to a certain Pure Quality and carries within itself the slloogrentity, inherent to “basic karma-fractions”, СФУУРММ (SFUURMM)-Forms and Karma-Forms of only their OO-УУ-Entity, which within the 36th dimension is already being manifested in its conditional “finalized” (only for the dynamics of Formo-Creators Plasmous Forces Range from 0 to $\pm 36^{\text{th}}$ dimension!) synthesized state. Among them there is such type, Formo-Creators of which within 3-4-dimensional range are employed in the implementation of *harmonious* and *balanced* dynamics of sub-Aspects and Aspects of only single Quality – THE Love-THE Wisdom (let’s define them as X1).

14.15817. Other hvasslon type provides the harmonization of sub-Aspects and Aspects of only single Quality of THE Will-THE Intellect (let’s define them as an X2). The third hvasslon type (X3) provides the harmonious states inside of any synthesis dynamics, related to the Elements of a Pure Quality THE Unanimity. Formo-Creators of X4 are balancing everything, which is related to the synthesis manifestations of the Quality THE Entity, X5, supposedly, represents THE Aspiration; X6 represents THE Steadiness-Stability, X7 represents THE Emptiness, X8 represents THE Integrity, X9 represents THE Initialization, X10 represents THE Mobility, X11 represents THE Fullness, X12 represents THE Knowledge.

14.15818. In the completely different conditions of manifestation of Forms of Self-Consciousness within 3-4-dimensional ranges all types of hvasslon Formo-Creators resonantly insure the harmonization of Conscious Fields Configurations with each other, which are mainly structuring some most compatible between each other, pairs of OO-УУ-Entitys. For instance, the combined dynamics of X1 and X2 is directed towards the constant resonant balancing of Elements of their Qualities in every instance of their Synthesis with one another. It would be fine, if not for one, but very important factor: the pairwise Synthesis is not possible without a corresponding – background – participation in it of Elements of all other ten Pure Qualities. This factor considerably “complicates” the harmonizing dynamics of energy-informational interrelations of the combination of X1-X2 with hvasslons of all other types. The matter of fact is – all the background synthesis interconnections between all hvasslon types in each conditional inertial “instance” of manifestation of Forms of Self-Consciousness, which they structure, occurs concurrently!

14.15819. *Resonantly* synthesized pair of X1-X2 *resonantly* simultaneously interacts by means of corresponding “parts” of its mutual slloogrent Configuration with Configurations of not only all other, formed with THEM pairs (for instance, $X1+X3=A$, $X1+X4=B$, $X1+X5=B$, $X1+X6=\Gamma$, $X1+X7=D$ and so on; $X2+X3=E$, $X2+X4=\ddot{E}$, $X2+X5=\mathcal{K}$, $X2+X6=3$, $X2+X7=И$ and so forth; $A+E=AE-1$, $A+\ddot{E}=A\ddot{E}-1$, $A+\mathcal{K}=A\mathcal{K}-1..$; $B+E=BE-1$; $B+3=B3-1$, $B+И=БИ-1..$; $B+\ddot{E}=B\ddot{E}-1$, $B+\mathcal{K}=B\mathcal{K}-1..$, $\Gamma+E=\Gamma E-1$, $\Gamma+\ddot{E}=\Gamma\ddot{E}-1$, $\Gamma+\mathcal{K}=\Gamma\mathcal{K}-1..$; $D+E=D E-1$, $D+\ddot{E}=D\ddot{E}-1$, $D+\mathcal{K}=D\mathcal{K}-1..$), but

also with all their multitude of newly forming between each other, combinations (for example, $X3+X4=\text{Й}$, ..., $X3+X-6=K$; $X4+X5=\text{Л}$, ..., $X4+X-6=M$; $X5+X6=H$, ..., $X6+X-6=O$; $X6+X7=\text{П}$, ..., $X6+X-6=P$; $X7+X8=C$, ..., $X7+X-6=T$; $X8+X9=Y$, ..., $X8+X-6=\Phi$; $X9+X0=\text{Ц}$, $X9+X-a=\text{Ч}$, $X9+X-6=\text{Ш}$; $X0+X-a=\text{Щ}$, $X0+X-6=\text{Я}$; $X-a+X-6=\text{Ю}$) and with all the variable multitude of their conditions, already pairwise synthesized by other hvasslon types. For example, AE-1 (as well as 2, 3, ... 10n)+Й (as well as K,Л,М,Н,О...Ю,Я...); AЁ-1 (as well as 2, 3, ... 10n)+K (as well as Л,М,Н,О...Ю,Я...); AЖ-1 (as well as 2, 3, ... 10n)+Л (as well as М,Н,О...Ю,Я...); BE-1 (as well as 2, 3, ... 10n)+Й (as well as K,Л,М,Н,О...Ю,Я...); БЁ-1 (as well as 2, 3, ... 10n)+K (as well as Л,М,Н,О...Ю,Я...) and so on.

14.15820. Thus within Space-Time are being resonantly formed more or less balanced (in terms of existing tensions) synthesis “karma-fraction” Configurations and СФУУРММ (SFUURMM)-Forms, inherent to all simultaneous diffusive dynamics of Formo-Creators of variable biological analogs of ЛЛЮУ-ВВУ (LLUU-VVU)-Forms, specifically manifested within their Resomirals. Each such Resomiral reflects the narrow-specific singularities of certain proto-form Synthesis Directions, revealed “inside” of all manifestation spectrum of Conscious Forms of ЛЛЮУ-ВВУ (LLUU-VVU)-Forms within current slloogrent “part” of Space-Time in the qualitative dynamics of the 3-4-dimensional range. Within the inertial Formo-Creators dynamics, hvasslons are qualitatively-resonantly modifying the more tensorial conditions of the synthesizing “karma-fraction” Configurations, into the less tensorial; conditions, which are to a greater degree balanced between each other throughout their multi-qualitative “parts” of slloogrentity.

14.15821. In other words, their mutual svilgs-dynamics creates such a subjective impression, as if they actually transmit the Energy-Information from Configurations of Formo-Creators of more simplified and to a lesser degree inter-qualitatively synthesized dimensional ranges of Space-Time, into the Configurations of Formo-Creators of more complexly-synthesized ranges, more and more inertially shifting their qualitative conditions to a certain standard (etalon, for each of the Proto-Forms of Self-Consciousness, manifested within the current range) primordially existing result. And although each hvasslon type initially belongs to a certain Quality, its slloogrent Configuration potentially contains within itself absolutely all Information, since, ultimately, the constituent Elements of all the twelve Qualities in certain resonant zones of Space-Time are already connected together. Let us review the hvasslon role in the formation of svilgs-dynamics of angular sphering.

14.15822. I would state figuratively that the svilgs-dynamics of hvasslons Formo-Creators of certain “karma-fractions” “demonstrates” to hvasslon Formo-Creators of other “karma-fractions” its potential readiness towards the mutual participation in a synthesis process of a specific Direction. Any “karma-fraction” Formo-Creators and the inherent to them svilgs-dynamics are capable of being manifested within Form-Systems only by means of Self-Consciousness CAF-dynamics of the Form they structure. If hvasslons svilgs-dynamics of a particular “karma-fraction”, where the Observer is located isn’t revealed, therefore, within the fixation range of the Observer’s CAF of Self-Consciousness, the energy-informational interconnections of Formo-Creators of the current “karma-fraction” are already balanced, and its svilgs-activity has transformed into the new qualitative states of Forms, which are manifested in the higher-frequency dimensional range.

14.15823. Schematically the inertial svilgs-dynamics of the slloogrent Configuration of every hvasslon can be portrayed as a certain imaginary “trajectory”, *already primordially* “attractively-interplayed” inside of the global Synthesis schema of all “parts” of Configurations of current Proto-

Form, revealed within the current dimensional range. Let me remind you that “attractors” are being the aggregation of the inner and outer conditions, contributing to the choice the self-organizing system makes in one of the multiple Directions of steady dynamics; otherwise it can be defined as potentially existing ideal finalized condition, towards which the system is striving to get in its development process. Thus, the hvasslons primary goal is – the implementation (actually, it’s rather a **re-establishing** in its inertial fashion everything, which is already present in its most qualitative form!) of the maximally profound (the most balanced) Synthesis of “its karma-fraction” with some other, separately-manifested “karma-fraction”, potentially capable of the maximal degree of resonance.

14.15824. This principal is quite simple, since all the complicated “attractor” path to this unique “karma-fraction” is primordially “coded” within the hvasslon Configuration itself: upon each act of Synthesis the most detailed schema of resonant svilgs-dynamics is being automatically “decompressed” in it, which is inertially implemented between Formo-Creators of various “karma-fractions”, in order to shift its CAF one “step” closer towards the most qualitative slloogrent “part” of the mutual Configuration of current Proto-Form. This is similar to the playing a videotape from its end to the beginning: all that primordially exists on this videotape, to the smallest detail will repeat in **inverted sequence** of all events, emotions and so on, throughout all the causal-consequence interrelationships, as well as in all the choices, which has been made by each of the participants, who appeared on the videotape at the certain time and place. Or, this also can be compared with a computer file: it primordially exists in its finalized state and you, by means of the necessary equipment (a PC), always can open it and find any part of the necessary Information within it as you please. And so on.

14.15825. In the same exact fashion, it is possible to “project” the “attractor” svilgs-dynamics of hvasslons Formo-Creators, which is still incomprehensible for your Self-Consciousness, onto the Choices dynamics, implementing within the Self-Consciousness, which, as you know, determine every moment of the biological manifestation of its constantly changing HYV-BBY (NUU-VVU)-Configuration for any “individual” Interpretations of the Stereo-Form, in variable (out of the infinite multitude of potential possibilities it has) development scenarios. Subjectively-visually each such scenario is organized as a time (the number of the specific quantity of CCΦY-YHΓCC-shifts within the Space-Time dynamics) of constant manifestation of the current Configuration of HYV-BBY (NUU-VVU) Form of Self-Consciousness within the interval between the “lethal” refocusing of the previous and the following “individual” Interpretations.

14.15826. Objectively it is an energy-informational Potential, which is necessary for the annihilation of tensions between Configurations of Formo-Creators of certain most active Levels of the current “individual” Self-Consciousness. This is the volume of Energy-Information of the dissonant distance between the two inertial moments in an implementation process of the inter-quality Synthesis – from the “previous” to “next”. In the skrruullerrt system it is possible to “project” any “spot” of any Choice simultaneously into the multitude of proto-form Directions, which is implemented by Self-Consciousness Formo-Creators throughout various Synthesis schemas, as a result of which, frankly, the variable development scenarios are being revealed within an inertial CAF-DRF-dynamics. Depending on which dominant Pure Qualities enter within the current “part” of the skrruullerrt system into the synthesizing interrelations with each other by means of sub-Aspects and Aspects of Formo-Creators, the dissonant distance between the two moments of the successive inter-qualitative Synthesis or “Deaths», implementing within the individual rotational Cycle of a single HYV-BBY

(NUU-VVU)-Form: the lower the value of this indicator within the structures of Self-Consciousness, the shorter the development scenarios, structuring the current “part” of the slloogrentity of the rotational Cycle, which insures the more qualitative energy-informational conditions of individual Realities, in which the Formo-Creators of its Self-Consciousness are creating.

14.15827. Hence, the degree of energy-informational capacity of the individual Realities of each of the rotational Cycles of any Stereo-Form is characterized by the tension value factor, inherent to the CAF-DRF-dynamics of Self-Consciousness Formo-Creators of each of its “individual” Interpretations. This value factor is defined by me as the “t-indicator”. Its individual value is characterizing the difference in the qualitative conditions of Formo-Creators Configurations of Self-Consciousness, which are structuring the inertial dynamics of multi-qualitative groups of duvuyllertr rotational Cycles of a single Stereo-Form. Thus, the t-indicator is not only a qualitative, but also a quantitative characteristic of the dissonant distance between the Configurations of Formo-Creators of Self-Consciousness, which are concurrently manifested throughout variable scenarios.

14.15828. In each “spot” of the skrruullertr system there always exists the most maximal (from the potentially possible), as well as the most minimal qualitative limit for the implementation of your Choices. The lesser the value factor of the t-indicator of HYY-BBY (NUU-VVU)-Configurations of your Self-Consciousness will be, the resonantly closer your implementable Choice will be to the most qualitative condition (out of all possible variations within the same “spot” of skrruullertr system). We aren’t able to determine the exact value of this condition, since its constructive dynamics is simultaneously self-projected into the multitude of various dimensions and Synthesis Directions, “dissolving” into the Configurations of Forms of other wave ranges). So, the conclusion of the previous paragraph is – the least qualitative choices in life are bearing the largest value factor of t-indicator and vice-versa.

14.15829. Objectively, the Self-Consciousness t-indicator is characterized by the svilgs-sphering quantity value, which hvasslon Formo-Creators of the current Configuration have to implement in relation to each of its manifestation Forms within the current “spot” of Space-Time, beginning from the Configurations of Formo-Creators of the molecular biology and physiology, including the CΦYYPMM (SFUURMM)-Forms “projections” of the individual ODS they utilize, which in turn, actually determines the quality of existential Experience of the current “individual”. That continuous svilgs-sphering are vital for the hvasslon neutralization (in each separate case) of existing dissonance distance, separating the conditions of the concurrent manifestation throughout Space-Time of the lesser qualitative Configurations from the manifestation conditions of more qualitative Formo-Creators Configurations of the exact same Stereo-Form. Upon the lowering of the value factor of t-indicator, the svilgs-sphering quality rises.

14.15830. The t-indicator is also correlates to the specific qualitative number (but not the quantity!) of CCΦY-YHΓCC-shifts of the Configuration of Self-Consciousness, concurrently implemented throughout the multi-qualitative Form-Systems of various Realities. What in this case could be defined as an initial factor in this synthesis dynamics - CCΦY-YHΓCC-shifts, qualitatively characterizing the inertial dynamics of spatiotemporal “rotation” within structures of Self-Consciousness, or the svilgs-sphering activity, determining the order and sequence of Form-Creator Configurations manifestation in variable Vectors of development? Of cause it’s the resonant formation “process” of “karma-fraction” Configurations as a result of the “attractor” hvasslon activity; the process, which defines the exact ongoing Synthesis Direction by the dynamics of the individual svilgs-sphering at

every Choice point, as well as the “spot” of the resonant manifestation of current HYV-BBY (NUU-VVU)-Configuration in the slloogrent dynamics of Space-Time.

14.15831. Svilgs-sphering is the key determining factor of the exact result (and not any other!) and precise and very specific (and not any other!) visual circumstances – during the sequence of implementation of certain Choices / Actions and the inertial CCΦY-YHΓCC (SSFU-UNGSS)-shifts of CAF-DRF-dynamics throughout Worlds Form-Systems – will inevitably lead the Self-Consciousness Configuration towards the corresponding development scenario. The qualitative energy-informational Entity of svilgs-sphering of absolutely all possible “karma-fractions” of current Self-Consciousness Form determines the fact of the resonant pertaining (slloogrent manifestation) of the current Form-Creator Configuration to the certain ongoing CCΦY-YHΓCC (SSFU-UNGSS)-shifts of Space-Time.

14.15832. The dissonance distance could only be balanced within the resonant point, which inertially separates the dynamics of current Self-Consciousness Configuration from the somewhat different Configuration dynamics of other “individual” Interpretations, which in turn are structuring the qualitatively somewhat different Form-Systems, where the Formo-Creators CAF-DRF-dynamics has a potential probability of being “projected” as a result of the fact of implementation throughout any certain Self-Consciousness Levels of inter-quality Synthesis (“Death”). The very phenomenon of “Death”, within the Self-Consciousness manifestation of 3-4-dimensional groups of duvuyllerrt “human” SC, can be defined as an objective necessity, appropriately governed by the great separation of Configurations of HYV-BBY (NUU-VVU)-Forms of various “individual” Interpretations, arising upon the non-duvuyllerrt overfocusing as a result of the inter-quality Synthesis, where the dynamics of the just transmuted Self-Consciousness Configuration becomes absolutely resonantly incompatible with the Configuration of Self-Consciousness Form, which is still structuring the previous Form-System.

14.15833. The dissonance distance is, in fact, what is qualitatively “distancing” any non-duvuyllerrt Configurations, concurrently manifested within each resonant point of skrruullerrt system throughout all possible Directions of inter-quality Synthesis. Under the term “distance” I imply the quantity of svilgs-sphering, which is necessary in order to make the current part of slloogrent Configuration the most resonant with the next value factor of t-indicator, which allows Formo-Creators the implementation of inter-quality Synthesis in a certain sub-Level of a particular development Direction.

14.15834. Inertially the current synthesis process is being implemented as follows: within certain sub-Levels of Self-Consciousness the inter-quality Synthesis (“Death”), performed by Formo-Creators, has occurred. This “Death” is actually being a consequence of the resonant realignment mechanism of currently revealed “individual” Self-Consciousness Configuration, onto the other, more qualitative Self-Consciousness Configuration, which has lesser value factor of t-indicator in relation to the most qualitative Choices. This is true, owing to the fact of newly acquired Experience, due to the attraction into the CAF-DRF-dynamics of BBY(VVU)-Configurations of more qualitative CΦYYPMM (SFUURMM)-Forms. That means that upon each consequent “Death”, the hvasslons Formo-Creators can implement the lesser quantitative value of svilgs-sphering (since they become more and more qualitative and thus, more capacious in terms of the energy-information!) in order to reach the next position of the inter-quality Synthesis, which in turn, to a much greater degree will advance Self-Consciousness Formo-Creators towards the certain “decision making point”, the parameters of which are being the most qualitative for the current situation.

14.15835. Even upon the most qualitative choices, the development scenarios will not only relate to the JJIYY-BBY (LLUU-VVU) Direction, but also can develop for a certain inertial period within the Formo-Creators dynamics of near-JJIYY-BBY (LLUU-VVU) proto-form Directions, parallel to the JJIYY-BBY (LLUU-VVU) Direction (so they can attract and Synthesize the deficient Energy-Information); or qualitatively additive (according to the Pure Quality Aspect compatibility) or to the certain degree approaching towards the characteristics of rotational Cycles of the development of biological analogs of HYY-BBY (NUU-VVU)-Form-Types. Within this resonant point, the Choices can be implemented simultaneously, based upon the dynamics of Formo-Creators of other proto-form Directions, which are being the most favorable for their svilgs-sphering Vectors, however, according to our subjective attributes, they are being lesser qualitative than the “human” ones, and lead to the situations, where the quantity of svilgs-sphering before the next resonant point of inter-quality Synthesis (“Death”) and the dissonance distance would constantly increase.

14.15836. The “attractor” factor of that svilgs-sphering is assigned through the already existing within our collective Sub-Consciousness energy-informational trajectories, which are thoroughly programmed through the Formo-Creators Configurations of the genome, according to each of all the multitude of possible scenarios of development of your Stereo-Form: upon receiving of inter-Aspect or sub-Aspect Experience, we are automatically overfocusing from the conditions of the resonant manifestation within certain proto-form Directions, into the manifestation conditions of other proto-form Directions, constantly supplementing the energy-informational synthesis interrelations between Formo-Creators by means of the dynamics of additional hvasslon Configurations from other Pure Qualities. Once the Synthesis is accomplished, we again *sort of* return to the resonant state, which again (!) allows US to be manifested (already bearing the more qualitative Self-Consciousness Configuration!) within the “exact same” slloogrent point of Space-Time, within the exact same situation, where previously we have “departed” from the most qualitative Choice we could make, but which wasn’t available to us back then as the most qualitative Decision.

14.15837. Thus, moving through the tremendous amount of variable scenarios in the variable proto-form Directions, we, unconsciously endure the colossal amount of “Deaths”, acquiring the deficit CΦYYPMM (SFUURMM)-Forms, which are necessary for the inter-quality Synthesis; then we come upon the necessity anew, of certain Choice making within the current “point” of our Existence, and every time begin the resonance with Formo-Creators groups of gradually more qualitative development scenarios. Therefore, frankly, our Self-Consciousness Formo-Creators, provided for the hvasslon dynamics, are constantly implementing the synthesis processes, which, in spite of its apparent to us incomprehensibility and inconsistency, ultimately balance the dynamics of our Self-Consciousness, so the value factor of the t-indicator within it, is constantly decreasing.

14.15838. Therefore it can be stated that each such “Death” factually leads the Formo-Creators of “individual” Self-Consciousness to the *supposed* return into the “same exact spot” of the slloogrent Stereo-Form Configuration, where they can implement gradually more qualitative Choices upon the gradual tension decrease, which means the consequent scenarios also will always begin with the lesser tensions between the Configurations of multi-Qualitative Formo-Creators, which in turn will offer them the more qualitative (in relation to the previous variants) Choices. In this fashion all inter-age overfocusing is taking place, since this – is a realization mechanism of the implementation of any desire, still not self-fulfilled during the “individual” Lifetime due to the absence, within their Self-Consciousness Configuration, of certain CΦYYPMM (SFUURMM)-Forms, which are imperative for the necessary act of inter-quality Synthesis realization within a certain sub-Level.

14.15839. Following the series of the proto-form realizations, and the implementation of the corresponding sub-Aspect, inter-Aspects, and inter-quality Synthesis, the “individual” realizes and reconsiders something within the following development scenario of the rotational Cycle, and again is forced to face the similar situation, but this time, bearing the new gained Experience within the HYY-BBY (NUU-VVU)-Configuration, the “individual” actually makes more qualitative decision. It’s quite an interesting fact, that most “people” usually regret the missed opportunities: “...oh, I would definitely make a better choice in this situation, if only I knew, or had a chance to relive this moment anew”. Little do they know that precisely in this way – by means of the sequential losses, misfortunes and failures – absolutely all constructive abilities gradually implement within their rotational Cycles.

14.15840. Let’s try to find out how the dissonance distance of variable tension degrees throughout the mutual svilgs-dynamics of Formo-Creators of Self-Consciousness is created. For example, when in stressful circumstances (in accordance with certain development scenarios) Self-Consciousness Formo-Creators decide to “let the situation go” (act indifferently), or allow the “individual” to temporarily relax and forget all that”; or, deeply comprehending the true Cause of the situation, they influence the calm acceptance of it), the tensions degree inside of their Configurations is decreasing due to the fact that the inertial dynamics of their “projections” is being implemented into the more qualitative “parts” of the mutual slloogrentity. That means in turn that the tensions are created as a consequence of inability of Formo-Creators of current Self-Consciousness HYY-BBY (NUU-VVU)-Configuration to wisely and intellectually “decompress” the corresponding piece of the specific BBY(VVU)-Information, which structures the more qualitative development scenarios from within the slloogrent TES-dynamics.

14.15841. There an algoristic (in terms of quality degree) “quantum shift”, which occurs within the informational space of Self-Consciousness at the moment of TES-“unfolding” upon each of the slloogrent states of HYY-BBY (NUU-VVU)-Configuration, characterized by the strictly defined tension degree between BBY(VVU)-Configurations of Self-Consciousness Formo-Creators and the specific (available to their “understanding” and “perception”) quality of the “decompressed part” of BBY(VVU)-Information. This concurrent multi-qualitative dynamics (in terms of its spectrum manifestation) is being initiated by hvasslons of the two JIIVY-BBY (LLUU-VVU)-like (“human”) Dominants. As a result of which, the CAF-dynamics of Formo-Creators of each of the multi-qualitative “parts” of the slloogrent HYY-BBY (NUU-VVU)-Configuration is being resonantly “projected” into the Configurations of these development scenarios (out of the infinite number of them), where the most favorable conditions for the implementation of certain Synthesis processes, unfinished by Formo-Creators exist, in order to shorten the dissonance distance and annihilate the specific tensions, still existing within their BBY(VVU)-Configurations.

14.15842. For instance, the CAF-dynamics of Formo-Creators of the least synthesized “parts” of HYY-BBY (NUU-VVU)-Configurations are being “projected” into the scenarios, where Self-Consciousness of “individuals” are existing in the deepest (the most active) levels of proto-form Directions, qualitatively corresponding to their tension conditions. That is true because of already developed extreme necessity, within these Formo-Creators BBY(VVU)-Configurations, of Experience acquisition (hvasslons svilgs-dynamics) during the background interrelations with Formo-Creators of specific qualitative manifestations of Proto-Forms (CΦYYPMM (SFUURMM)-Forms), in relation to which (due to the absence of any interconnection with them), the most powerful tension dynamics arises within their BBY(VVU)-Configurations.

14.15843. I would compare such “quantum shift” with subjective “withdrawal” (“re-projecting”) of the CAF-dynamics into certain “temporal loops”, structured by the multitude of quality-differential rotational Cycles with various value factors of dissonance distances between the most qualitative and the least qualitative conditions, which are possible for the current HYY-BBY (NUU-VVU)-Configuration. The infinite multitude of such inertial “loops” conditionally “divide” the “projections” of all Formo-Creators CAF’s of each of the lesser qualitative “parts” of the mutual slloogrent HYY-BBY (NUU-VVU)-Configuration from “projections” of CAF-dynamics of Formo-Creators of each of the more qualitative “parts” of HYY-BBY (NUU-VVU)-Configuration of the same Stereo-Form. The lesser synthesized states between BBY(VVU)-Configurations of “human” hvasslons and BBY(VVU)-Configurations of proto-form hvasslons are contributing to the “re-projecting” of the CAF-dynamics of Self-Consciousness Formo-Creators into the deeper levels of proto-form Directions, into the sub- or sub-sub-scenario dynamics, where the most favorable (powerfully stressful) conditions for the inner-quality and inner-aspect Synthesis, owing to which the tension annihilation within the more “primitive” (low-frequency) Levels of Self-Consciousness, exist.

14.15844. Subjectively, the “refocusing” of CAF-dynamics of Self-Consciousness Formo-Creators into the various least qualitative “temporal loops” (in relation to the dynamics of JJYY-BBY (LLUU-VVU)-like Direction) is a result of their least radical and least qualitative decisions making pattern (which is most relaxed towards the egocentric or egoistic manifestations), the consequence of which is the fact that these Formo-Creators feel the vital necessity to concentrate their synthesis CAF-dynamics onto the more inertial (lower-frequency-dimensional) processes. Upon the implementation of the sequential Synthesis and elimination of the most tensor conditions within BBY(VVU)-Configurations, the gradual accumulation of a new synthesis Experience occurs throughout each of the consequent scenarios, ceasing by the multitude of “Deaths” of “individuals”, manifested in these Configurations. The new synthesis gradual Experience accumulation, coupled with the resonant “re-projecting” of the CAF-dynamics of Self-Consciousness Formo-Creators from the lowest-frequency Levels of each of the proto-form Directions into the scenarios of the increasingly more qualitative Levels occurs, where the hvasslon dynamics of the JJYY-BBY (LLUU-VVU)-like Direction acquires the ability for the even more powerful influence of their inherent eglleroliftive Impulse, onto the synthesis CAF-dynamics of Formo-Creators.

14.15845. Thus, the dissonance distance - is actually such qualitative difference in the variously synthesized Self-Consciousness state manifestations, as if it “separates” any Form-Creator BBY(VVU)-Configurations from the certain “part” of slloogrent HYY-BBY (NUU-VVU)-Configuration, where a specific – qualitatively following – inter-quality Synthesis phase has already been implemented in it. It’s neither possible to define the value of this difference in meters, hours nor CCΦY-YHΓCC-shifts; just as it is impossible to anyhow measure the difference between two various “parallel” Worlds. The only comparison of any types of Self-Consciousness Configurations is possible in terms of their resonance with one another. Because the “attractor” hvasslon svilgs-dynamics, providing all the “reflexive-inertial” CAF-dynamics of absolutely all Self-Consciousness Formo-Creators within the current dimensional range has the slloogrent structure, within each out of the multitude of sub-phases (sub-scenarios) of the concurrently implemented inter-quality Synthesis, it consists of the strictly defined number of “karma-fractional” hvasslon quantizing clexes (acts of the angular sphering).

14.15846. Therefore, the implementation of only a single act of the inter-quality Synthesis (i.e. annihilation of the existing dissonance distance) within the certain, (out of the infinite multitude of them) sub- and inter-level interconnections, including the transmutation into the more qualitative

states of BBY(VVU)-Configurations, requires the Self-Consciousness Formo-Creators to experience all the multitude of the lesser qualitative structural transformations (i.e. inclusions of all the multitude of the necessary “tetrahedrons”, “pyramids” and “octahedrons” into their “hexahedron” svilgs-dynamics from various proto-form Directions). The quantity of such structural background transformations, required for the implementation of act of inter-quality Synthesis, is enormously large and can be approximately compared with the aggregation of all variants of the formation of multi-qualitative types of “dodecahedron” dynamics from the “hexahedron” ones, with respect to the multitude of variables and the connection sequence of the constituents of their “tetrahedron karma-fractions”.

14.15847. Throughout various dimensional wave ranges, the meaning of the notion “tensor” is quite variable, however, in terms of the geometrical “karma-fractional” model, the “tension factor”, as a manifestation of specific conditions of incomplete synthesis of variously-Qualitative BBY(VVU)-Configurations of Formo-Creators (which are coordinated by svilgs-sons of various Pure Qualities), indicates any degree of dissonance (the absence of a complete resonance), when the energy-informational dynamics of synthesized interconnections with BBY(VVU)-Configurations of Formo-Creators of separate sub-Aspects and Aspects of dominant or background Qualities, are absent in the CAF-dynamics of Formo-Creators of the current HYV-BBY (NUU-VVU)-Configuration. The absence within the HYV-BBY (NUU-VVU)-Configuration, of the stable (already synthesized) interrelationships with various groups of Formo-Creators leads to the limitation of their abilities towards the “unfolding” from the slloogrent TES-Information of the more qualitative CΦYYPMM (SFUURMM)-Forms, in the dynamics of which the Configurations of current sub-Aspects and Aspects are already synthesized. Meaning, that some part of slloogrent dynamics of the mutual informational TES flux, remains inaccessible for Self-Consciousness Formo-Creators of the current “individual”, as a result of which within the Perception system of such “individual”, the certain dissonance distance is being originated towards the more qualitative manifestations of “decompressed” CΦYYPMM (SFUURMM)-Forms; this dissonance distance creates the conflict situation, or a confrontation of already synthesized CΦYYPMM (SFUURMM)-Forms with already “decompressed” ones.

14.15848. As a result of all that, within the *current sub-level* of CAF-dynamics of Self-Consciousness Formo-Creators, the tension factor appears in relation to the yet unknown to them qualitative dynamics, which in turn, forces hvasslons of the two Dominants (in order to annihilate this dissonance), apply the certain corresponding svilgs-dynamics towards the CAF-dynamics of Formo-Creators of the current HYV-BBY (NUU-VVU)-Configuration, the goal of which is the successive Synthesis with Formo-Creators of sub-Aspects and Aspects of the absent Synthesis Direction. Consequentially, the CAF-dynamics of yet incompletely-synthesized Configurations of Self-Consciousness Formo-Creators becomes cycled within this process, and acts as if it temporarily “falls out” from the dynamics of rotational Cycles of more qualitative Forms of the current group of duvuyllerrt Continuums. Then, the quality-differentiation process, coupled with the simultaneous “re-projecting” (resonant redistribution) of CAF-dynamics of the current Self-Consciousness Formo-Creators takes place, throughout the multi-qualitative scenarios: the Focus “projections” of the more qualitative “parts” of HYV-BBY (NUU-VVU)-Configurations (already possessing this Experience), are being manifested within the more favorable (less stressful) conditions, while the “projections” of CAF of Formo-Creators of yet incompletely-synthesized HYV-BBY (NUU-VVU)-Configurations are being manifested in worsened conflict and destructive conditions in relation to CΦYYPMM (SFUURMM)-Forms of still missing (for them) Synthesis Directions.

14.15849. As the lesser-qualitative Form-Creator Configurations become gradually more profoundly synthesized (which in certain scenarios requires seconds or minutes, while in other ones – months and years), the successive “re-projecting” of their Focuses occurs into the more qualitative “parts” of the mutual slloogrentity of HYY-BBY (NUU-VVU)-Interpretations of current Stereo-Form. It is imperative to keep in mind that this subjective “inertially-reflexive” process, consists of all the realization dynamics of infinite inter-age refocusing (by means of DRF-activity of CΦYYP-MM (SFUURMM)-Forms of steadily-resonant YY-BBY- (UU-VVU) conglomerates) during the implementation instance of each of the inter-quality Synthesis “acts”, accompanying by subjective “Deaths” of lesser qualitative “individuals” (within more qualitative Form-systems), as well as “Deaths” of more qualitative “individuals” (within the lesser qualitative Form-systems).

14.15850. Let us review the role of each Form-Type of graviton-analogs (svilgs) within the inertial dynamics of the mutual slloogrent Universe structure. If we look at the Synthesis Process within the Tertiary Energy-Plasma in its completeness, we can actually state, that at that very “instant”, all “karma-fraction” graviton-analogs Formo-Creators, concurrently manifested throughout all the twelve dimensional ranges, have performed all their functional tasks, and all “karma-fractions”, counting from the simplest “tetrahedrons” all the way to the fully synthesized 12-dimensional Karma-Forms, already *exist*. Within this, fully synthesized, by all the 12 Pure Qualities, Energy-Information condition, there could be no more Formo-Creators graviton-analogs svilgs-dynamics, since they all are in an already “bound” state, and are being the structural elements of the slloogrent Configuration of the Collective Cosmic Intellect of a Single Karma-Form, consisting of absolutely all Existence Experience of all Proto-Forms of ΓΟΟΛΓΑΜΑΑ-Α (GOOLGAMAA-A), which in turn are manifested within 0-12th dimensions of the Energy-Plasma.

14.15851. If we, as certain virtual super-temporal Observers, begin the conditional “disassembling” of this 12th-dimensional Karma-Form, and apportion its constituents throughout various Conversums, Continuums, Realities and Form-systems in our differentiating Perception system, factually, we will commence the deployment of the slloogrent picture of the mutual Synthesis of the Tertiary Energy-Plasma in reverse order. Virtually separating *within our own Consciousness* of each new Element from the previous, more integral one (i.e. more qualitative state of Karma-Form), we automatically form within the current “part” of the slloogrent “geometry” of Space-Time, the “projection” certain energy-informational “cord”, which, in accordance with the tension intensity degree, created by *our own Consciousness*, forms within the Configuration of *our own Consciousness*, the “reflexive movement” impulse, constantly quantizing each type of energy-informational distortion, implemented by us within the Configuration of Karma-Form, toward Its primordial, fully finalized condition.

14.15852. I intentionally highlighted the words “*our own Consciousness*” in order to remind you, that all that differentiating (inertial) dynamics of the “subjective partition of indivisible” is being implemented only within *our own Consciousness* (and nowhere else!), and not within the Energy-Plasma Itself. WE have “compelled” towards the inertial manifestation all the slloogrent dynamics of Space-Time, because of our manifestation within already fully synthesized state of the Tertiary Energy-Plasma, by means of the realization-motivated dynamics of Focuses of our Consciousness Forms, continuously “projecting” the resonantly-deriving from the individual ODS and ΦΛΥΥ-ΛΥΥ (FLUU-LUU)-Complexes onto it, all previously OUR quantized ΦΛΥΥ-ΛΥΥ (FLUU-LUU)-Modules and CΦYYPMM (SFUURMM)-Forms.

14.15853. Schematically this process reminds me of the situation, when we, avoiding to get lost in the woods, leave many specific marks on various trees and barely perceptible paths; when we leave many such marks, we can always easily trace our way back. The wave quants (claxes), imprinted by Formo-Creators of our Self-Consciousness within BBY(VVU)-Configuration of each, inertially “decompressed projection” of each СФУУРММ (SFUURMM)-Form, are in fact the specific energy-information “marks” of Dominants hvasslons Formo-Creators of each of the Synthesis Directions, concurrently manifested through the Forms of Self-Consciousness of every dimensional range, by means of which they inertially revert the CAF-dynamics of Formo-Creators of the **total** slloogrent Configuration into their primordial state – the integral Karma-Form of 11-12th dimensional range of Energy-Plasma. Within the Self-Consciousness structures, for instance, the “projections” of all these individual quants, are securely and eternally “embedded” into СФУУРММ (SFUURMM)-Form Configurations of the individual ODS, and that is how hvasslon Formo-Creators determine the reversed integral Path of each Proto-Form into its initial state of complete synthesis maturity - resonantly “unfolding” from TES-dynamics (which is being translated to them by порантами) of vital (already marked upon the previous differentiating) parts of slloogrent СФУУРММ (SFUURMM)-Forms dynamics.

14.15854. It's worth mentioning that during the process of such virtual “differentiating” of Karma-Form Configuration, we are forced to also “partition” the Temporal Entity onto the number of Temporal Fluxes, strictly corresponding to the quantity of the implemented “partitions”, which, factually serves as the cause of the formation of multi-qualitative Form-systems and the aggregation of ССФУ-УНГСС-shifts, consolidating them into the individual rotational Cycles. If you even remotely imagine all that, you should also understand that on the highest Level of Its inertial manifestation, the Tertiary Karma-Plasma resembles the supergiant aggregation of energy-informational “tension bars”, structuring (just like reliable “marks” in the forest), slloogrent Formo-Creators Configurations of svilgsons (graviton-analogs of all resonant range Levels), which, within the single, conditional “Instant”, again – inertially and absolutely sequentially – sort of “restore” the concurrent “projections” of UCF-dynamics of Formo-Creators Configurations of all “karma-fractions” into a certain, mutual for them all, “initial” synthesis state.

14.15855. The temporal extent, which we subjectively define as “our Life” – is actually a sum of all the energy expenditures, which we are forced to “project” from the informational space of our Self-Consciousness into the “geometry” of all other Forms of the outer Space in order to compensate (by means of svilgs-dynamics of dominant svilgsons) of the existing informational distortions within our Configurations, which have created the infinite number of various tensions within our Self-Consciousness, the neutralizing dynamics of which, in fact, creates the dissonance distance – which we subjectively define as seconds, minutes, hours, days, months and years of our INSTANTENEOUS (ETERNAL) Life.

14.15856. Let us review the example of GPS navigation system, where we would see at least a rough analogy between the hvasslon svilgs-dynamics of two “human” Dominants Principal, and CAF-DRF-dynamics of constant re-focusing activity of Formo-Creators of our Self-Consciousness Forms from HYY-BBY (NUU-VVU)-Configurations, which are structuring certain development scenarios, into the HYY-BBY (NUU-VVU)-Configurations of other scenarios. I will commence with a very important elaboration: although hvasslon Formo-Creators conditionally belong to Pure Qualities, but in the global slloogrent synthesis dynamics of the Tertiary Energy-Plasma they, as well as all other svilgsons (graviton-analogs of 0 to 12th dimensional range), execute the most important function of

inertially-indicating and organizationally-guiding Elements, equally inherent to absolutely all inter-quality Synthesis schemas, inertially implemented within the 0- to the 12th dimension range through Self-Consciousness Forms of all types of Collective Cosmic Intellects.

14.15857. Hence,

GPS-navigation system – is a HYV-BBY (NUU-VVU)-Form of your “personality”, the one you focus upon at every moment of the current rotational Cycle;

GPS-navigation system software – is an CAF-dynamics of your Self-Consciousness Formo-Creators, determining the qualitative dynamics of each of your sequential actions and choices;

GPS-navigation system’s monitor – is a Perception system, which subjectively reflects the quality of your current location (the Self-Consciousness Configuration) at every moment of time;

GPS-navigation system’s map (the cartography file), bearing geographical marks and the highway information – is a 3-4-dimensional range of groups of duvuyllerrt Continuums, which you focus upon in real time mode; it has variable hvasslon svilgs-dynamics of two “human” Dominants, directing all Self-Consciousness Synthesis processes straight either into the JJIVY-BBY (LLUU-VVU) Direction, or preliminary “preparing” them throughout Proto-Form Directions;

Your chosen final destination point – your Dream, Goal (your more synthesized HYV-BBY (NUU-VVU)-Configuration);

The waypoints – various resonant points of skrruullerrt system, potential possibilities for adoption and realization of your choices, phases of possible qualitative movement towards the Goal, intermediate HYV-BBY (NUU-VVU)-Configurations for re-focusing of Formo-Creators of your Self-Consciousness;

Streets, highways and dead ends – development scenarios between the two “Deaths” (phases of inter-quality Synthesis);

Street Crossings – slloogrent “points” of skrruullerrt system, with high qualitative diversity Choice Vectors, and generally, the spot, where most accidents happen (re-focusing activity upon the fact of an inter-quality Synthesis);

All possible GPS-path variants – this is the simultaneous reflection of all inertial re-focusing of CAF-dynamics of the rotational Cycle, subjectively implemented by you.

14.15858. The most important thing I wish to note here is that the “current” re-focusing activity inside each scenario, isn’t intended for the execution of the whole sequence of radical Choices, because as a result of the implementation of an inter-quality Synthesis act during the re-focusing process by your Self-Consciousness Formo-Creators, the specific psychic and biological condition, preceding your every drastic choice, always acts as concluding “phase” of its development scenario. As a rule, this specific condition ends by “Death” simultaneously with a definitive acceptance of any drastic choice, as well as the re-focusing of Formo-Creators into the HYV-BBY (NUU-VVU)-Configuration of

multi-qualitative variants of successive scenarios (out of all the multitude of them), which resonates with the quality of current choice the most. On top of that, the “movement” (re-focusing activity) inside of each scenario consists of the whole number of possibilities for the “submersion” of CAF-dynamics into the sub-scenario (“octahedron”) and sub-sub-scenario (“pyramidal”) Synthesis processes of both **Dominant** Qualities; including sub-sub-sub-scenario (“tetrahedron”) Synthesis processes of all necessary **background** Qualities, owing to which, hvasslons “prepare” BBY(VVU)-Configurations of Self-Consciousness Formo-Creators towards the inter-quality Dominant Synthesis act implementation.

14.15859. In order to retain the stable re-focusing tendency towards the JJYY-BBY (LLUU-VVU) Direction within sub-scenario parts of rotational Cycles, it is imperative to sustain the CAF-dynamics on levels, not lower than the qualitative level of the scenario itself, without immersing into the details of sub-sub-scenarios and sub-sub-sub-scenarios – a quite low-frequency dynamics, which assumes the in-detail study of sub-Aspects and Aspects of various background Qualities. With absence of already developed Intuitive ability, this can only be achieved by the empirical method - one unsuccessful attempt-failure (the “dead end”), another unsuccessful attempt-another failure; this goes on until the result will be mostly harmonized with altruistically-intellectual Perceptions of JJYY-BBY (LLUU-VVU) Direction, and not the egoistic Experience, inherent to proto-form Directions CΦYYPMM (SFUURMM)-Forms. Then, on the next street crossing (in real Life it can be any important event, assuming the serious and tremendous changes: a great job offer, completely new “individual” relationship, someone’s illness or “Death”, war conflicts, effecting your lifestyle and so on) the GPS-software (CAF-dynamics of your Self-Consciousness Formo-Creators) will inevitably “decompress” (unpack) from the Subconsciousness the most favorable variation of your “future” scenario.

14.15860. Often, your existential Goal is motivated within your Self-Consciousness by the whole number of unconscious Desires. In this situation, the **cartographic file** of your GPS reflects if not all, but still a vast part of global scheme of the potential re-focusings, which is embedded within the slloogrent hvasslon Configurations (it exists **primordially** within the Subconsciousness, as an aggregation of variable rotational Cycles of the Stereo-Form), while the **GPS-path**, which the GPS software is laying out – is the most probable trajectory of the continuation of rotational Cycle for the current HYV-BBY (NUU-VVU)-Configuration of your Self-Consciousness. At that, within the Configuration of your hvasslon GPS-navigation systems, all variants of possible intermediate points are absolutely precisely recorded (your low- and middle-frequency CΦYYPMM (SFUURMM)-Form conditions realization), through which you have to re-focus on the path towards the most qualitative Goal, including the most “insignificant” and “accidental” events, without the experience of which, the required Synthesis type within the Self-Consciousness is simply impossible.

14.15861. If your existential objectives are limited only by the current egocentric necessities (food, image, money, power and health), your GPS wouldn’t lead you farther than the nearest possibilities, the implementation of which wouldn’t require the availability of the detailed map of the extensive geographical locality, and thus the qualitative changes of HYV-BBY (NUU-VVU)-Configurations, daily in-focused by your Self-Consciousness, wouldn’t be in any way substantial – while within these low-qualitative levels of existence, you would have to spend years and decades on the same “hexahedron-tetrahedron” synthesis manipulations, which would require only minutes or hours if you make more qualitative choices. If, however, your existence Objectives are mostly highly-altruistic, your hvasslon GPS could offer you path to any point of the planet, coupled with a multitude of

shortest routes there, which differ by the complexity degree, depending on your experience and readiness to sacrifice (for instance – sacrifice your time, efforts, knowledge and so forth).

14.15862. While refocusing towards your Final Objective along the chosen GPS path, you are free to correct it any way you feel necessary, so that some of the lesser-qualitative Interests will also be implemented within your Self-Consciousness. And all the while, during which your FCA inseparably bound with CΦYUPMM (SFUURMM)-Forms of your Final Objective, hvasslons (the highway signs and the marks on the cartographic map), will inevitably lead your Self-Consciousness into the CΦYUPMM (SFUURMM)-Forms of JJIYV-BBY (LLUU-VVU) development Direction, structured by hvasslon dynamics of the two “human” Dominants, even upon the considerable deviation from the Final Objective (problems with health, money, job, personal drag, or other existential confusions). The timing of your “return to the path” is totally dependent upon the character and quantity of such deviations.

14.15863. All the Information regarding the Path is already programmed into the GPS: all possible speed limit signs, traffic lights, highway construction zones and dead ends; all you have to do is simply remember about your primary Final Objective, striving not to deviate from the chosen path, so that the phrase: -“ let’s make a U-Turn as soon as possible”, - agitating your Conscience, would come to your mind very seldom, reminding you about the wrong decision you once made to “slightly deviate” from the path. During the re-focusing process the GPS software, while scanning the Information from the intuitive Levels (GSM-operators in our case), can offer a slight deviation from the Path, if an error or an accident (tensions) has occurred. If that happens the GPS device (CAF of your Self-Consciousness) might offer you to bypass it and follow the other path, which can substantially differ from the original Path, as it might look like in the beginning. However, in reality it will always be aimed at saving you time and resources and help you avoiding “roadblocks” and traffic, so you could consciously attract certain background Quality Aspects into your CAF-dynamics, lowering the tension factor of HYV-BBY (NUU-VVU)-Configurations of your in-focusing, and again lead you to the main Path.

14.15864. Just like on the highway, if you get “stuck” in a “life’s traffic”, you could demonstrate a native wit, and find a non-standard, radically more qualitative decision or implement the long-forgotten phases of the inner-quality and background Synthesis, without which the CAF-dynamics quality elevation isn’t possible. In such cases the additional Information regarding the roadblocks, construction and traffic will be essential. Such Information can be obtained from the GSM-operators - the Energy-Information of Formo-Creators Configurations of high-frequency sub-conscious Levels, coordinating all the hvasslon GPS-devices, which, prima facie, offers the illogical or unwise decision, motivated by your Primary Objective). Thus, as you are progressing towards your Objective, the GPS-device is correcting the initial path by receiving updated information regarding various highway obstacles and objects of your necessities realization (variable commercials); it also updates the GPS-software. So, each sequential instant you are utilizing the most updated map (cartographic file), on the basis of which the GPS implements the “itinerary recalculation”, offering you the additional paths towards the Primary Objective, in accordance with the new implemented changes.

14.15865. Please note that various streets or crossings, indicated in your course, do not resemble the complete scenario; it is essential to understand that none of your choices and actions can be formed and implemented instantaneously. This process is inertial, and depends on a background activity of

low-frequency (distracting) YY-BBY- (UU-VVU) Conglomerates. It can be implemented with various degree of potentially possible success depending on the situation. It is totally dependent on the specifics and the perception abilities by your Self-Consciousness Formo-Creators of the slloogrentity of any “decompressed” Energy-Information. Before choosing the most qualitative decision, you concentrate, compare and analyze the multitude of various CΦYYPMM (SFUURMM)-Forms, you try to correlate them with these, which already exist with your individual ODS as a previous Experience. The concentration within the higher-qualitative “parts” of slloogrentity of the mutual Configuration of this Experience allows your Formo-Creators to “unpack” the most complete “amount” of the Energy-Information per time unit, while the low-qualitative Perceptions allow the manipulation with only a very limited and lesser-qualitative potential of the exact same Energy-Information, including in this process the considerably lesser quantity of interconnections with other “karma-fraction” Formo-Creators.

14.15866. Thus, each more qualitative variant of our possible decision is connected to absolutely different inertial distances within Space-Time, since the “projections” of the previous CAF-dynamics of your Perception are being “re-projected” (superimposing with the tensions, inherent to them) onto the CAF-dynamics of each of the subsequent decisions. The higher the quality of such decision is, the higher its effectiveness, and the tension amount, which would have to be annihilated by hvasslons (by means of attraction of corresponding stressful situations) is lessened as well.

14.15867. Although the global continuous Decision-making Process is being implemented within our Self-Consciousness constantly, but per se, it’s not in any way quantized onto the certain “before” and “after”, since the constant refinement, intermediate result analysis and the current correction of all the aggregation of the previously performed decisions, which creates the variable choice of each of the subsequent decisions, capable to get you closer to your Primary Objective with variable succession. The GPS, while plotting the course, isn’t insisting on you driving through each street from its beginning to its end, since there is a tremendous amount of intersections with various other streets and avenues; instead, it chooses the shortcuts and the most drastic reductions of an itinerary. Each Proto-Form’s hvasslons prime Objective is to provide an opportunity to reach the Goal (the highest, for current Form of Self-Consciousness, qualitative state of its Configuration) through the shortest possible way; therefore, upon each consequent instant of your infinite Existence (your “Destiny intersections”) your Self-Consciousness Formo-Creators are offered at least a few, most drastic decision variations, settled with which, you can reach your Primary Objective in a considerably shorter period of time.

14.15868. Why did I mention earlier that “attractor trajectories” of the inertial hvasslon svilgs-dynamics (and other svilgs) are “running” through the global slloogrentity of Proto-Form Synthesis schema? Because throughout the infinite inertial sequence of energy-information “bands”, constantly formed upon the synthesis interrelation of multi-Qualitative hvasslon Formo-Creators, appearing chaotic and in no way regulated prima facie, nevertheless exists in an absolutely inter-orderly, inter-balanced, perfectly regulated and completely rational fashion, which is inaccessible to any logic or reasoning, but which in each separate case is being manifested as a certain “attractor trajectory” – as if it’s being an imaginative aggregation of inter-influences, “programmed by Someone in advance” between the Formo-Creators of various “karma-fractions”, which only in their inherent resonant mode are creating the “trajectory of orderly convergence”(at that they also act *as if* they annihilate the previous – *primordial* – hvasslon interrelationships) of Form-Creator Configurations of resonating with each other “karma-fractions”, consisting of the sequence of the intermediate,

mostly stabilized states of force interrelations, inherent for all Forms of the current resonant zone.

14.15869. Each, synthesisally stabilized, Form-Creator “karma-fraction” Configuration remains in a state of “potential well”, the barrier of which is surmounted with the current “karma-fraction” hvasslon assistance, at the inertial resonant stimulation of their svilgs-dynamics by the activation of the CAF of the revealed Form of Self-Consciousness Formo-Creators (the “karma-fraction” multiplicity increase by quantizing). Throughout the Form-System dynamics of 3-4-dimensional Realities, all the inertial dynamics of, supposedly, “discrete” development scenarios of each Stereo-Form, structuring all their energy-informational interrelations with “karma-fractions” of the corresponding Directions of the potential for them, Proto-Form Synthesis within the Configurations of each diffusive Proto-Form, is built upon all the diversity of “attractor trajectories”, created by hvasslons – by means of the constantly manifesting realization mechanism of the resonant synchronization of rotational Shifts within the Self-Consciousness. The super-temporal nature of these “attractor bands” is formed by the infinite differentiation of the Temporal Entity ОО-УУИЛЛИ-И-УУЛЛ, into all, inherent to IT, aggregation of multi-quality Temporal Fluxes, each of which also inertially reflects the “attractor” dynamics of the specific resonant interconnections between all Formo-Creators of graviton-analogs of Forms, concurrently manifested throughout various dimensional ranges.

14.15870. In this process the primary role is played by *karma-clofts*, which transform the *instantaneous* resonant nature of the energy-informational interrelations between Form-Creator Configurations of each “karma-fraction” into the inertially-sequential array of ССФУ-УНГСС-shifts, determining the instantaneous state of all Form-Creator Configurations of concurrently manifested Forms, in turn structuring the Tertiary Energy-Plasma. The inevitable consequence of such ССФУ-УНГСС-sifts of Self-Consciousness along the hvasslon “attractor trajectories” is being the resonant merging of duvuyllerrt “parts” of Temporal Fluxes and, variously (proto-form-like) reflecting the specific qualitative dynamics of duvuyllerrt dimensional ranges within the Space slloogrentity. Let me remind you that karma-clofts are an indispensable constituent of “karma-fraction” Synthesis process, which among scientists is defined as a hypothetically existing “Higgs bosons”, responsible for the formation of the “substance mass”.

14.15871. The hvasslon eglleroliftive svilgs-dynamics, which directs the transmuting processes (which are being implemented by the synthesizing Formo-Creators of “karma-fractional peaks”) concurrently, throughout all the probable Vectors of variable Synthesis schemas, primordial energy-informational “trajectories” of which are embedded into their slloogrent Configurations – due to the constant increase of the profoundness and quality degree of the implementing Synthesis – uninterruptedly increasing energy-informational potential of all “karma-fraction” Formo-Creators Configurations, which leads to the tensions decrease (resistance decrease) of all the karma-clofts dynamics. Which in turn results in the decrease of the influence degree of karma-cloft Formo-Creators onto the Self-Consciousness due to the activation of within its dynamics of something, we define as profound Understanding, and which is evidently being expressed by us in a form of inclusion of a more qualitative BBY(VVU)-Information into our Creative Activity.

14.15872. For instance, if someone tells us that the Earth is being held on the three elephants, which in turn are standing on three whales, we would not accept this knowledge, since our Self-Consciousness Formo-Creators within the individual ODS, possess the СФУУРММ (SFUURMM)-Forms of much higher quality of Energy-Information. In this case the karma-clofts deactivate their relationship with the current hvasslon part (they increase the dissonance distance towards them) and

instead activate the interrelationships with Formo-Creators of other hvasslons, which generate a higher-quality dynamics, to a greater degree resonating with our Perceptions.

14.15873. Please note that there are, **at least**, three primaries, more or less accessible to the subjective interpretations of our Self-Consciousness, three categories (within the global synthesis Formo-Creators activity) which functionally quite differ between each other in relation to their mutual objective – absolute Synthesis of the Versatile State of the Universe, Which we rather superficially define as an Energy-Plasma. It's worth mentioning that each of these three categories is also differentiated “inside of itself” onto the infinite number of multi-qualitative Levels and sub-levels, variable “classes”, “types”, “kinds”, “families”, “sorts” and “series” of Formo-Creators, the degree of the qualitative and functional disparity between which can reach the state of mutual conditional antagonism and absolute antithesis with each other.

14.15874. It is simply impossible at this point to transmit this Information in words of terms, since there is **not a single** analogy of what I imply here, exists within your Perceptions. I am not trying to explain it in easier terms because doing so will greatly diminish the quality of IISSIIDIOLOGY Information, which I am trying to transmit into the “human” Collective Consciousness. So, you are free to utilize the existing (**considerably deformed and simplified!!!**) variation of this Knowledge, but even this variant of the Universal Knowledge resembles the CΦYYPMM (SFUURMM)-Forms, which are being quite far from the truth, and which I literally forcedly “adjust” and “squeeze” into the staggering subjectivism of your Self-Consciousness.

14.15875. The Cosmic Civilizations, belonging to the **conditional category of the synthesizing Formo-Creators** within each dimensional range (which they actually structure by means of their own slloogrent BBY(VVU)-Configurations) are employed exclusively in the process of the specification of any Level of the implemented Process of inter-quality Synthesis (including an inner-quality Synthesis throughout Each of the OO-YY-Entitys: inter-sub-...-sub-Aspect Synthesis – up to the conditional zeroth dimension, and inter-sub-Aspect and inter-Aspect Synthesis – up to the conditional 3rd dimension). These are also “peaks” Formo-Creators, structuring each of the synthesizing “karma-fraction” with their Configurations; but they implement only the resonantly-unifying interconnections with variable types and multitudes of “psyche” and “emanations”, which in turn are structuring the exact same OO-YY-Entity, to the Pure Quality of which, the very synthesizing Formo-Creators also conditionally “belong”.

14.15876. They “belong” **conditionally**, since they in turn are structuring the SYNTHESIS Branch, but their **energy** BBY(VVU)-**Configurations qualitatively** are absolutely identical with the **information** BBY(VVU)-**Configurations of CЛYH-CЛYУ (SLUI-SLUU)-Creators, as a result** of which, their instantaneous “collapse” (Synthesis) occurs in a specific conditions of Space-Time: The Energy of Forms of SYNTHESIS development Branch is constructively unify with the Information of PE3OCKOH-ЦЕОННЫЙ development Branch. Interconnecting by the maximum compatibility principal with the most resonating “parts” of slloogrent BBY(VVU)-Configurations of similar Formo-Creators, structuring the other OO-YY-Entitys, each Formo-Creators type automatically attracts into the mutual dynamics the inherent types of “psyche” and “emanations” Conscious Fields, which are actually firsthand carriers of the Information of CЛYH-CЛYУ (SLUI-SLUU)-Creators of each of the Pure Qualities.

14.15877. The whole Synthesis is being implemented by means of an infinite multitude of multi-qualitative Force Vectors, structuring the slloogrent dynamics of each of the “karma-fractional ribs”.

The most compatible “ribs” (the most resonating with one another), depending on their Configuration, being within the inertial manifestation “karma-fraction” conditions, in the qualitatively-corresponding “parts” of Space-Time slloogrentity, form the specific interconnections of “karma-fractional facets”, every one of which, depending on the Formo-Creators of various Pure Qualities structuring it, resembles the specific group of inherent proto-form Synthesis Directions.

14.15878. Thus, depending on the individual energy-informational “contents” of resonantly-merged “karma-fractional facets” inside of the synthesis dynamics of each Proto-Form, manifested throughout the Space-Time, there are subjective multi-qualitative development Directions are created. The “projections” of energy-informational “facets” play the crucial role in the dynamics of the current type of Consciousness in variable Forms, and not the “projections” of “ribs”. Why? Because the “ribs” reflect the resonant attractor dynamics of multi-qualitative “emanations” and “psyche”, while the “facets”, formed by the specifically structured “ribs”, resemble the Creative Spheres of certain CΦYYPMM (SFUURMM)-Forms, synthesized by “peak” Formo-Creators from the energy-informational basis of each “karma-fraction rib” they utilize.

14.15879. Since each “karma-fraction peak” Formo-Creators resemble variable compatible with each other Qualities in the mutual synthesis dynamics, the individual interpretations of THE ***EXACT SAME CΦYYPMM (SFUURMM)-Forms, mutually created by them within the “karma-fraction facets”, will considerably differ from one another. This concerns not only the difference in psycho-mental aspects of*** Forms of Self-Consciousness formation (the degree of predominance and recessiveness of Aspects of certain Qualities over the other, which is reflected onto the specifics of mentality and sensuality, culture originality, social structure, religious priorities and so on), manifested by these Formo-Creators, but also differences in some genetic features of Forms themselves (for instance, the degree of predominance or recessiveness of certain genes, responsible for the color and structure inherentities of skin, eyes, hair, height parameters, various parts of the body, and so forth).

14.15880. Separate “groups” of these Directions, qualitatively most compatible with each other, “geographically” (historically, ethnically or evolutionally) merge only depending on the sings, inherent to their own Forms of Self-Consciousness into the specific multi-qualitative Resomirals “inside” of all the multitude of representatives of the exact same Proto-Forms, manifested within the same dimensional ranges, but within variable Temporal Fluxes (Continuum groups). For instance, out of all the diversity of various Self-Consciousness types, inherent to the biological analogs of HYB-BBY (NUU-VVU)-Form-Types of JLYY-BBY (LLUU-VVU), concurrently manifested throughout the multitude of Temporal Fluxes of 3-4-dimensional ranges of Space-Time, there were 6 (considering the “facet” quantity of “hexahedron karma-fractions”) diffusive development Directions formed, which could also be considered as 6 fundamental “human” population types (the current classification is illustrated here only as demonstrational and generalizing example of possible variant of racial differentiating, and is disclaiming the exclusiveness):

Australoid (Avstraloids, races: Australian, Tasmanian, Tasmanoid, and New Caledonian; Papuans, races: Papua-Melanesian, Papua-Montana; Tapir; Veddoids, races: Veddoid, Malian);

Negroid (Steatopiga, races: Bushmen, Hottentot, Coastal; Pigmid; Bambuti; Bubinga; Negroids, races: Udan, Nilotic, Kaffir, Savage; Batu, races: Aeta-Semang, Andaman; Boreal over-race body);

Mongoloid (Premongoloids, races: Pale-Siberian, Kamchatkan, Tibetan, Punan; mongoloids, races: Tungus, Central-Asian, Aral, Chinese, South-Mongolian, Burmese, Palauan; Eskimoids, races: Eskimo, Alaskan);

Caucasian (Pre-Caucasian, races: Ainu, Ural, Caucasian, races: Mediterranean, Coastal, Berber, Pale-Sardinian, Nordic, Irish, Dalsky, Finnish, Iranian, Assiroid, Libyan, Indian, Indian Peninsular, Alpine, Georgian, Baltic, Pre-Slavic, Carpathian, Adriatic, Padan, Noric, Pamir, Armenoid; lappoids, Lppish Race);

Subequatorial (Paleo-Indidos, races: Tamil, Malabar, Canary; Ethiopid, races: Ethiopian, Oromon, Masai; Batusi, races: Sahrawi, Madagascar);

Pacific (Polynezids, races: Polynesian, Micronesian; Maori; Americanoids, races: Allegheny, Dakota, Aleut, Sonora, Californian, Columbian, Pueblo-Andes, Amazon, Laguna; Sirion, races: Pampas, Patagonian, Magellan).

14.15881. It's worth noticing that purely "hexahedron" "karma-fractional" types (as well as "tetrahedron", "octahedron", "dodecahedron" and others), within inertial synthesis dynamics of Self-Consciousness Forms, concurrently structuring the slloogrent "geometry" of any Continuums and Resomirals of Space-Time, simply don't exist, since the dynamics, inherent to some other Synthesis schemas and wave range sub-levels is always "embedded into" each interaction type between various Formo-Creators Configurations of "karma-fractional peaks" at any conditional "instant". Therefore any offered classification of "human", animalistic or vegetative populations of Proto-Forms isn't able to claim even the slightest degree of veracity and accuracy, since all the populations constantly interact with one another, not only in the inter-population fashion, but also in the Temporal Flux conditions, concurrently structuring the Resomirals and Continuum groups of the "hexahedron" – 3-4-dimensional range of manifestation of variable Forms of Self-Consciousness.

14.15882. I suppose you now understand the meaning of what I imply under the notion "synthetizing Formo-Creators category". And now let's review the **second conditional category** of Formo-Creators, which I had to divide into three separate classes:

- **Ixons** – Formo-Creators, currently absolutely inaccessible to our Perception, which are organizing the inertial processes of (inter-...sub-aspect) Synthesis, being implemented within wave ranges below the conditional zeroth dimension;
- **Svilgsons** – Formo-Creators of "karma-fraction" graviton-analogs of all dimensional Levels of the Tertiary Energy-Plasma;
- **Avvacclons** – eglleroliftive Formo-Creators of Karma-Forms of the Secondary Energy-Plasma.

14.15883. I am unable to tell you anything regarding ixons and avvacclons, since their dynamics is essentially inaccessible to Conscious Forms, manifesting throughout the inter-quality Synthesis systems of JJIYY-BBY (LLUU-VVU)-Formo-Creators, however I can provide a certain Information regarding svilgsons. Considering the example of already familiar to you Formo-Creators I propose we talk about where the svilgs-Creators actually came from. As you know, hvasslons are remaining

in their “independent” unbound state until act of Synthesis between the corresponding “karma-fractions” occurs. Upon the differentiating onto the constituent Elements of fully-synthesized Karma-Forms during the “re-projection” of dynamics process of Aggregated Consciousness of Pure Qualities from the 12th dimension into the lower dimensional ranges (the analogy of what the scientists call “the Big Bang”), the formation of svilgson (eglleroliftive in relation to one another upon the decrease of quality or dimension) interconnections between the “constituent elements” of Karma-Forms occurs (this is what I have called the “energy-informational bands”).

14.15884. In the slloogrent Configurations of a multitude of svilgs-Creators, which have formed at that, the “attractor trajectories” are being created instantly, which structure the development scenarios of Worlds Form-Systems, while all the aggregation of the differentiated parts of Karma-Forms is being transformed into all the multitude of, supposedly, “separately manifested” Configurations (within the corresponding dimensional ranges) of proto-universal, hyper-universal, super-universal, elementary, sub-elementary, sub-sub-elementary and proto-elementary groups of “form-particles”, structuring all dimensional Levels of the Tertiary Energy-Plasma.

14.15885. The farther review of this issue I offer to continue with the example of the process of an introduction of the new Information into the Collective “human” Consciousness with the assistance of СВОАЛЛГСС-Entitys. The eglleroliftive Element of the chaos (СВОАЛЛГСС-Entity³) – is an instrument of the Energy-Plasma, providing the maximal diversity of Synthesis process, which can be achieved by symbiotic “mixture” of the multi-level dynamics of various Proto-Forms and by the formation within structures of Self-Consciousness Forms of the researcher Interest, defined as “paradox” (among “humans” it is most often demonstrated when they are trying to find the cause of other “people” actions, when another reaction was expected; also when they are trying to understand the core meaning of certain events or occurrences). The “paradox” state within the Self-Consciousness forces the manifestation of svilgs-dynamics of Formo-Creators of more qualitative Levels in order to provide an explanation (clarification of hidden patterns and formation of “motivational sequence chains”) of their own lesser qualitative Levels, which currently are being the energy-informational fundamental for the everyday dynamics of their Self-Consciousness.

14.15886. Thus, the dynamics of Formo-Creators Configurations of lesser qualitative “karma-fractions” is being a part of the synthesis structure of Formo-Creators Configurations of more complex “karma-fractions”. In the Worlds Form-Systems, any “paradoxical” situation solution for the Self-Consciousness Formo-Creators is being the specific psychic state, which can be described as “eureka” – the instantaneous Synthesis and the simultaneous refocusing into the “karma-fractional” Self-Consciousness of the more qualitative group of the “human” SC, where the conformities of energy-informational interrelations, which are provided by the current СВОАЛЛГСС-Entity, become evident and obvious due to the fact that in the “new” SC, the required conformity is already found by Self-Consciousness Formo-Creators, and the “paradoxical” notion has been cognized on the basis of inertially preceding perceptions. In this case, the expression “become evident and obvious” means that the dynamics of, supposedly, “chaotic” process, observed and analyzed by the Observer, locating inside and outside of itself certain patterns or conformities, becomes *associated* (quite sensible) Element of Self-Consciousness, meaning that it becomes a part of its dynamics and establishes the energy-informational interconnections with all other active СФУУРММ (SFUURMM)-Forms, with which the CAF-DRF-dynamics of Formo-Creators have been temporarily identified.

14.15887. The ways of manifestation of СВОАЛЛГСС-Entitys within 3-4-dimensional SC's (just as in any others) are based on the "attractor" influence of hvasslons onto the resonant dynamics of synthesizing Formo-Creators, consisting of their orientation on the Configurations of more qualitative "karma-fractions", structuring the Collective Proto-Form Consciousness. The inertially-sequential increase of the spatial density of manifestation within Form-systems of highly-qualitative svilgs-dynamics, which initially being perceived as the СВОАЛЛГСС-Entitys activity, consequently leads to the evidently expressed synthesis process, qualitatively organizing the Formo-Creators Configurations of the lesser energy-informationally capacious СФУУРММ (SFUURMM)-Forms into the gradually more energy-informationally capacious СФУУРММ (SFUURMM)-Forms Configurations. Here is the example: by the end of 1970-s the frequency of informational contacts between "people" became so dense, that the quantity of conventional cabled telephone-lines failed to provide the rapidly growing demand. The quite stable СФУУРММ (SFUURMM)-Form within Self-Consciousness of millions of "people" has constantly triggered the question: "why can't we just hear the other party at any place of our own location, sort of like radio receiver"?

14.15888. Thus, the inherent svilgs-dynamics of Formo-Creators of various СФУУРММ (SFUURMM)-Forms of structure and functioning of a mobile (cell) phone, began to penetrate (gravitate) in the "attractor" fashion from the more qualitative "human" SC's to Self-Consciousness of "people", structuring the SC's of 1980's, and sequentially incarnate into our outer Reality: the most resonating in this Synthesis Direction, Self-Consciousness Formo-Creators of "individuals", who possessed all necessary "information" and have constantly directed their thoughtful process towards the implementation of this idea technologically, were capable of "grasping" the necessary СФУУРММ (SFUURMM)-Forms intuitively and actually combine within their Self-Consciousness such heterogeneous СФУУРММ (SFUURMM)-Forms as a telephone, radio and the portable energy source, as a result of which, something New was created, which included all previous "human" Experience.

14.15889. And this New has instantly "made humankind" completely different, while per se, it has refocused the Collective "Human" Consciousness into these Realities, where everyone is able to communicate with basically everyone else. But what became the trigger of this "discovery"? That's right – already manifested throughout the more qualitative SC's the dynamics of svilgs-Creators of mobile phone СФУУРММ (SFUURMM)-Forms. The intuitive desire of possession of certain "device" has provided the mass refocusing of the synthesizing "human" Formo-Creators into these Continuums, where all that ALREADY EXISTS. And the initially-weak "attractor" svilgs-dynamics has been created by means of the resonant inter-amplification of hvasslon activity throughout the Self-Consciousness of millions of "people", who felt the same exact desire. Now think – do you actually want to communicate with others by means of cellphones, computers, satellites and other "communication equipment"? Your answer will inevitably foretell of which possibilities you will *definitely* "receive" tomorrow.

14.15890. We have found out that first of all, the slloogrent Configurations of svilgs-Creators aren't directly participating in the energy-informational Synthesis processes themselves, since their role is to sustain the necessary eglleroliftive Impulse in the Configurations of synthesizing Formo-Creators, which dictates at every conditional instant the activation and the implementation (within each "karma-fractional rib") of various, (solely possible at any given moment) Directions of Force Vector dynamics (the concurrent resonant interactions between the multi-Qualitative "emanations" and "psyche"). Secondly, the svilgs-sons aren't bound to the Self-Consciousness of any Form, concurrently manifested throughout the various Temporal Fluxes of Space-Time. For svilgs-Creators of various

ranges, absolutely all Configurations of Self-Consciousness Forms, manifested within the current range resemble the unified and constant dynamics of a certain virtual energy-informational “stub” – strictly fixated within its slloogrent Configuration of “attractor trajectory”, which imprints the inversely-progressive dynamics of quality change of Configurations of all manifested Forms of Self-Consciousness. They are in no way connected with Self-Consciousness of Forms themselves, but are absolutely fixated only on the degree of resonant activity, inertially variable in Configurations of synthesizing Creators.

14.15891. In other words, they “know” absolutely all variations of certain intermediate qualitative states of Form Configurations up to the “initial” moment of their manifestation throughout the specific dynamics of inherent to them, dimensional wave range, including absolutely all variations of certain intermediate “ending” states of the mutual slloogrentity of the “exact same” Configurations, inherent to these Formo-Creators of the same Form upon “exiting” out of the current range. This is almost the same if you ask someone to instruct you how to get to a particular destination: the other party would have to have you on the phone until you finally get there, thoroughly explaining you all the details and nuances of the path. Other party wouldn’t be implementing this very itinerary along with you, but would rather provide their Experience and knowledge, going about their own business at the same time.

14.15892. The same is true about svilgsons of each dimensional Level: they similar to the relay race, “accept” within their range under their “command” the Proto-Form Configurations, in the synthesis manifestation of which the Formo-Creators of inherent (to the svilgsons) Pure Qualities are participating; and literally at the very same instant (which, within the Form’s Self-Consciousness, can be perceived as years, decades or millenniums) the svilgsons are “transferring” already the most qualitative (for each Synthesis Direction!) variations of the current diffusive Self-Consciousness Form over to the resonantly corresponding svilgsons of the next dimensional range. So, where are these lesser-qualitative variations of the current Form of Self-Consciousness, you may ask? Well, they are still there – they are always being a constituent part of the global mutual Form Configuration slloogrentity, which are concurrently with them are manifested through the Conscious Forms of more qualitative dimensional ranges. I remind you again and again – nothing can simply “disappear” anywhere – each concurrently manifested Form of Self-Consciousness, has its own specific dynamics of multi-qualitative inertial states of Focuses of Steadfast Attention of Formo-Creators, structuring at the current conditional instant, the current “part” of the slloogrent Configuration of this realization Form of the Collective Intellect.

14.15893. At that you should always keep in mind that hvasslons are directing the CAF-dynamics of Self-Consciousness Formo-Creators throughout all possible Proto-Form Direction of Synthesis. You can say that each scenario is bound to the specific duvuyllerrt group of proto-form Synthesis Directions, where the Aspect resonance of the dominant and background Qualities – upon their compatibility degree – is being the most powerful. In the various synthesis interrelations between hvasslons of sub-Aspect and Aspects of any single, out of the two, Dominants with Formo-Creators of other background Qualities, they attract the Configurations of Formo-Creators of other proto-form Directions, as if they “interpose” into the current Synthesis schema, the dynamics, which is inherent to other schemas. They, while resonantly attracting from the other Directions the interrelations with the necessary “tetrahedrons”, are forming (within 4-5 Levels of 2-3-dimensional range of АРГЛЛААМУНИ (ARGLLAAMUNI)-ИНГЛИМИЛИССА (INGLIMILISSA) and within the 1 Level of ОРЛААКТОР (ORLAAKTOR)-АИГЛЛИЛЛИАА (AIGLLILLIAA)) from their СФУУРММ

(SFUURMM)-Forms the unstable “octahedrons” of the “human” CΦYYPMM (SFUURMM)-Forms, as if these CΦYYPMM (SFUURMM)-Forms are temporarily “wedged in” into the HYV-BBY (NUU-VVU)-Configurations of “human hexahedron” within the 3-4-dimension, which become the foundation of the synthesis dynamics of “icosahedron” and “dodecahedron” ЛЛЙУУ-BBY (LLUU-VVU) Resomirals of 4-5-dimensional Levels.

14.15894. The “hexahedron” hvasslon Formo-Creators “attract” the necessary to them “tetrahedrons” not from the drastically dissonant, in relation to them, 0-1-dimensional range, but from the schemas, already synthesized by Formo-Creators of other Proto-Forms, from the “hexahedron” Configurations of which the current “tetrahedrons” “expel” upon the more profound Synthesis, as “unnecessary” (the most tensor ones). This takes place in approximately the following fashion: through the universal dynamics of “zero ingredient” the hvasslons are “projecting” the specific Energy-Information into the Formo-Creators Configurations of “their own” Form of Self-Consciousness, which exists in a form of an extremely unstable (due to the weak resonance with Configurations of other Formo-Creators) “tetrahedron”, temporarily structuring the Configuration of other Form of Self-Consciousness (either “human” or proto-form), regardless of the fact of how specifically the CΦYYPMM (SFUURMM)-Form of the current “tetrahedron” is expressed because of its affiliation with the other Synthesis scheme. But absolutely any kind of Energy-Information is vital for Formo-Creators of the specific Levels of “human” Forms of Self-Consciousness, since during the TES-“decompression” it can be interpreted (quantized) by the corresponding “human” Experience. Meaning that the attraction into the ЛЛЙУУ-BBY (LLUU-VVU) type of Synthesis of Formo-Creators of background Qualities occurs due to:

- 1) The increase of the degree of “tetrahedron” dynamics between the “hexahedron” Configurations as a whole, and
- 2) Constant interchange of Formo-Creators of the most dissonant “tetrahedrons” onto the lesser dissonant ones.

14.15895. In cases of drastic “shift” (“refocusing”) of CAF-dynamics of a certain part of Self-Consciousness into certain proto-form Synthesis Directions, the “extra” active svilgs-dynamics of hvasslon Formo-Creators of the Proto-Forms begins to introduce into the “hexahedron” HYV-BBY (NUU-VVU)-Configuration of Self-Consciousness not the “expelled tetrahedrons”, but “pyramids” or “octahedrons” of background Qualities, already synthesized by Formo-Creators of these Directions. These, more complex than “tetrahedrons”, “karma-fractions”, while becoming to active part of HYV-BBY (NUU-VVU)-Configuration, make the CAF-dynamics of Self-Consciousness Formo-Creators of the current “individual” gradually more “inconsistent” with CΦYYPMM (SFUURMM)-Forms of ЛЛЙУУ-BBY (LLUU-VVU) Synthesis Direction, which in turn maximally increases the tensor state of that “individual” in relation to the most high-frequency ЛЛЙУУ-BBY manifestations, deeply submerging the “individual” into the narrow-specific Perceptions, inherent to the current proto-form Synthesis Direction.

14.15896. For instance, for the biological analogs of HYV-BBY (NUU-VVU)-Form-Types the hvasslons of the two Qualities of THE-Love-Wisdom and THE-Will-Intellect are being the synthesizing Dominants, while for other Proto-Forms – hvasslons of the Qualities THE-Will-Intellect and THE-Aspiration (meaning that hvasslon dynamics the Quality THE-Will-Intellect are being mutually-diffusive for them). Formo-Creators of these Proto-Forms – through the “hexahedron” Configurations, already synthesized by hvasslons of both our Dominants, - powerfully “project” the tensions of

inherent to them CΦYUPMM (SFUURMM)-Forms into the Configurations of Formo-Creators of the second Dominant THE Love-Wisdom, due to the “expelled” dissonance dynamics, “re-project” the destructive Energy-Information from “hexahedron human” Forms into the elementary “tetrahedrons” of their own “hexahedron” Configurations and narrow-specifically synthesize them, which results in the purely “human” exterior manifestation, while all the “inner” psycho-mental dynamics of such “individual” reflects only the CΦYUPMM (SFUURMM)-Forms of the specific animalistic Proto-Form, Formo-Creators of which are still powerfully dominate within the “unfolding” dynamics of its Self-Consciousness.

14.15897. To tell you honestly, the Formo-Creators of Self-Consciousness of about 9/10th of the global Earth population “currently” resemble the similar, deeply “degrading”, proto-form conditions, initiating by their powerful tension vibrations various illnesses, syndromes and genetic mutations in the “people’s” physical Forms. How can “people” actually escape these occurrences if, - as “individuals” – they aren’t able to individually (adequately, self- consciously) “reborn” in the animalistic Forms? Any degree of tension, manifested within the current dimensional range, can be sequentially annihilated only by means of the gradual inertial increase of the degree of multi-Qualitative “tetrahedron-like” activity throughout “hexahedron” Configuration; due to the sequential “inner” Synthesis of the simplest “karma-fractions” of energy-informationally suppressed Dominant, which, upon the lesser synthesis degree of Energy-Information within them, reflect the sub-Aspects and Aspects of the current dominant Quality the most, which is inherent to the current vibration Level of interrelations. This is how, very-very slowly (by means of the infinite number of “death”, age-related and inter-form-type refocusing) but surely, the inertial return into the “unfolding” TES-dynamics of “human” Self-Consciousness of the “previous” Levels of Creative Activity of Formo-Creators of either two of our Dominants is implemented – from the purely instinctive and unconscious Levels of the animal-biological activity into the subconscious Levels of ЛЛЮУ-BBY (LLUU-VVU) “bio-plasmous” and fully “plasmous” analogs of НУУ-BBY (NUU-VVU)-Form-Types.

14.15898. Let’s review the *third conditional category* of Formo-Creators of “karma-fraction peaks” – *karma-plasmoids*. Each dimensional range has its own variety of Formo-Creators of karma-plasmoids, which qualitatively (configurationally) can considerably vary among themselves not only throughout various resonant ranges of a single conditional dimensional range, but also within the Configurations of Forms of Consciousness manifestation, inherent to the various proto-form Resomirals. You should already be familiar to some of them – karma-clofts of 3-4-dimensional range, which is structured by the synthesis Formo-Creators of УПДУЙКК-Field. Therefore let us review the part of the karma-plasmoid properties on their example.

14.15899. The inertial degree of the attraction process of inter-resonating Configurations of “karma-fractions” depends on the dynamics of karma-clofts. It is extremely hard to explain the interrelation schema between the CΦYUPMM (SFUURMM)-Form Conscious Fields and karma-clofts Formo-Creators; therefore I will utilize the certain allegoric model, which will assist you in creating an associative perception of this specific dynamics. Imagine that all “karma-fractions” of 3-4-dimensional range are submerged into the certain sticky “liquid”, which is fully envelopes them from all over. The “liquid” resembles a substance of a Collective Intellect of the УПДУЙКК-Field.

14.15900. Conscious Fields of conditional “facets” and “tetrahedron ribs”, which, due to the hvasslon svilgs-dynamics, already entered into the resonant interrelationship with other “karma-fractions” and have formed the “hexahedrons”, are not in contact with the “liquid” by their surfaces,

but instead are interconnected with each other by already existing synthesized interrelations, which provide the unhindered energy-informational exchange with Configurations Formo-Creators of their “peaks”. Therefore within the inner “space” of each “karma-fraction” the tensions, which arise as a result of the certain qualitative difference between Configurations of multi-Qualitative Formo-Creators of each “peak”, are minimal in relation to these, which are submerged into the УПДУЙ-КК-Field substance, while the interrelation speed between Formo-Creators is extremely fast, since they have a mutual informational space. Conscious Fields Configurations of these “facets” and “ribs”, which interact with the “liquid”, become a subject of the more powerful inertial deceleration – since the “liquid” is quite sticky, the eglleroliftive Impulse, coming from hvasslons (by means of which the synthesizing Formo-Creators enter into the resonant interrelation with each other), is forced to overcome the resistance of the substance, thus shortening the dissonance distance between Configurations (which is essential to overcome, receiving the signal, and subsequently connect with the corresponding Configuration of other “karma-fraction”).

14.15901. It is important to note that upon the complexity increase of the global Configuration of all “peak” Formo-Creators of a “karma-fraction”, the relation between the quantity (energy-informational capacity) of “ribs”, connected with each other, and the quantity of “ribs”, connected with the “liquid” increases in favor of the first. For instance, the “tetrahedron” has the 6 “ribs”, which come in contact with the “liquid”, while the “pyramid” has the 20 “ribs”, connected with the “liquid” (out of the 24 of total number of “ribs”); the “octahedron” has 24 out of 48, “hexahedron” 72 out of 144, and so on. Upon the geometrical complexity of the “karma-fraction”, more and more “ribs” will participate in an unhindered Synthesis, and thus there will be the lesser quantity of these “ribs”, which come in contact with the “liquid”, which is slowing the processes of the resonant “merging” of “karma-fractional” Formo-Creators Configurations.

14.15902. One more important role, which is played by the karma-plasmoids within the mutual dynamics, is – the reflection of the specific “projection” Configurations of СФУУРММ (SFUURMM)-Forms, which are resonantly being manifested within the informational space of Form Consciousness during the TES-“decompression” process into SOMETHING, WHICH we subjectively define as Space-Time; i.e. – into the qualitative instantaneously-interchanging dynamics of Forms of individually outer us Reality. The specific reflection in each “part” of the slloogrentity of Space-Time of each of the resonant interrelationships, constantly occurring within “karma-fractional” Formo-Creators Configuration, which in turn simultaneously revealed throughout the multitude of the Temporal Fluxes, is, in fact, being their primary function. The karma-plasmoids actually form from the Proto-Form “karma-fractions”, structuring the multi-qualitative Form-Systems, absolutely all synthesis types of proto-form Resomirals, Realities, Continuums and Conversums. The same karma-plasmoids are being the generators of the narrow-specific dynamics, individually inherent to the various manifestation conditions of Configurations of Conscious Forms, which I conditionally define as “mass-analogs”, or what the science interprets as “substance mass” within our 3-4-dimensoinal range.

14.15903. We have spent considerable amount of time to this complex issues, so I will not mention again the fact between the way the scientists define it, and what it is in reality is a considerable difference. Instead, I will only note that karma-plasmoids, by their participation in the structuration of the inertial dynamics of Space-Time, provide something, which we, in our Reality, define as an Interest. Each moment, because of an eglleroliftive influence of sivilgsons onto the synthesizing Formo-Creators Configurations, the realization dynamics of “projections” of СФУУРММ

(SFUURMM)-Forms of their Focuses, resonantly maximally being attracted towards the certain, outer us manifestation Forms of the Creative Activity. This, frankly, stimulates our Interest (as a manifestation in our Self-Consciousness of Sympathy or Antipathy Forces) towards anything as a whole, and something specific in particular. Depending on the degree of an Interest quality, which we display towards the outer us Reality (because we subjectively create it) we resonantly structure the dynamics of our Self-Consciousness by either more qualitative karma-plasmoids, or the lesser-qualitative ones.

14.15904. This sums it up in regards to the conditional Formo-Creators categories activity. Let us now review the synthesis processes, based on svilgs-dynamics implementation. Any svilgs-dynamics conditions of Configurations of synthesizing “karma-fraction” Formo-Creators is being formed on the basis of merging of contradirectional Configurations of “karma-fraction” Formo-Creators svilgs-dynamics types of the lower dimensional ranges. Within resonant zones, the synthesis occurs by means of the sequential accession of the simplest “karma-fractions” (“tetrahedrons”, “pyramids” and “octahedrons”), with a consequent shift of svilgson activity from the “newly” formed (“intermediate”) “karma-fractions” Configuration, towards the “karma-fraction” Configuration of the next resonant zone.

14.15905. These geometrical figures, which I define as “octahedrons”, “hexahedrons”, “dodecahedrons” and the like, exist only within the lower resonant ranges of each of the dimensional diapasons: from 1, 0 to 1, 25, from 2, 0 to 2, 6, from 3, 0, to 3, 03, from 4, 0 to 4, 01, - where the new type of the synthesis interactivity commences. It includes the Synthesis of duvuyllertr Aspects of a single Quality, the Synthesis of non-duvuyllertr Aspects of a single Quality, inter-quality Synthesis, and the Synthesis, where additional Aspects of other Qualities are appended to the existing inter-quality Synthesis. Throughout all other resonant ranges (for instance: from 3, 15 to 3, 20, from 3, 37 to 4, 41, from 4, 65 to 4, 68...) the Configuration of any “karma-fraction”, having a proper “geometric” form within the lower resonant range, resonantly “accumulates” the “newly” acquired “tetrahedrons” throughout its whole surface.

14.15906. The svilgs attraction process of necessary Configurations of simplest “karma-fractions” into the resonant zone for the subsequent inter-quality Synthesis implementation has a duvuyllertr Nature: Formo-Creators of “matrix karma-fraction” constantly correlate their svilgs-Impulse with a svilgs-Impulse of an attracted “karma-fraction”, alternately synthesizing into their Configuration the energy-informational interconnections of simplest “karma-fraction” Formo-Creators, at that partially annihilating the part of their svilgs-potential, which is inherent for the current dimensional range, and thus, sequentially and gradually shifting the activity of their svilgs-dynamics into the Formo-Creators Configurations of higher dimensional ranges.

14.15907. Upon the approximation towards the totally complete geometric “karma-fraction” form, adopted for the manifestation conditions of the current dimensional range (1-2nd, 2-3rd, 3-4th ...), meaning when a quantity of “attracted tetrahedrons” (“stuck” to its surface) becomes sufficient for the formation of the proper geometric figure, necessary for the revealing within the following diapason, the svilgs-dynamics tensions, inherent for the current diapason weakens, being compensated due to the additional energy-information capacitance of Form-Creator Configurations of “attracted” simplest “karma-fractions”. Upon the merge of Configuration of the last deficient “tetrahedron” (“pyramid”, “octahedron”...) the previous svilgs-dynamics of “karma-fraction” Formo-Creators, inherent to the current dimensional range, instantly “re-projects” into the more qualitative “karma-

fractional” Configuration of Formo-Creators of the following dimensional range. What about a previous one? Since the current process is being slloogrent, the “previous” or “next” Configurations or conditions simply don’t exist. Therefore, any “previous karma-fraction” is always being at its own place – within the resonant zone of Space-Time, inherent to its Configuration!

14.15908. Let’s review the instance with the formation of synthesizing Formo-Creators Configuration of “octahedron karma-fraction” from the Configuration of Formo-Creators of an initial “pyramidal karma-fraction”. Each “pyramid” Configuration, structuring the 1-2-dimensional ranges of Space-Time, has the unique svilgs-dynamics, inherent only to its Formo-Creators, which determines the potential capabilities of their participation in the corresponding proto-form Synthesis schemas. First, the Configuration of “tetrahedron” Formo-Creators, possessing the uniquely-corresponding svilgs-dynamics, resonantly attracts to the Formo-Creators Configuration of “matrix pyramid” within the resonant zone of 1, 0 – 1, 25-dimensional range, which results in a partial balancing of differently-directional (tension) svilgs-instances within the sphering of both Configurations, and shifting of CAF-dynamics of Formo-Creators of “newly” formed “karma-fraction” (“pyramid” + “tetrahedron” = “P+1”) into the dimensionally-following resonant zone.

14.15909. Second phase involves the resonant attraction of Formo-Creators of an additional “tetrahedron” to the already formed intermediate Configuration “P+1” within the 1, 25- 1, 5 dimensional range, and both Configurations concurrently enter in the energy-informational interrelationship, including the initial “karma-fraction”, thus even greater compensating the “previous” tensions within the initial “pyramidal karma-fraction” Configuration, while displaying its own degree of instability on more qualitative interaction Levels, which causes the implementation of “additional” Configuration “integration” of the “newly” revealed “Karma-fraction”.

14.15910. The next two phases involve the attraction of Formo-Creators Configurations of two additional “tetrahedrons” to the intermediate form “P+2”, which finalize the formation of the second “pyramidal karma-fraction”, totally identical with the initial “matrix karma-fraction”. The “peak” Configurations of “peak” Formo-Creators of a “newly” formed and the “matrix pyramids”, are connected with each other by the “ribs” of their foundations, jointly forming an “octahedron karma-fraction”. The second revealed “pyramid” possesses the svilgs-dynamics, which is absolutely identical with the manifestation frequency of the “matrix karma-fraction” Configuration svilgs-dynamics, but has the conversed ratio balance of Formo-Creators in relation to it, which in turn resemble the ASTRO- and MENTO-Plasma (meaning that it expresses the differently-directional angular sphering).

14.15911. Such inter-compensation by Formo-Creators of the two “karma-fractions” of their own svilgs-dynamic leads to the increased balancing and the decrease of tensions, existing between their Configurations. However, it never gets to the complete stability (all the way up to the Karma-Forms, manifested within the 12th dimension!) since again there is a shortage of “something”. And then the next resonant attraction of additional Configurations occurs...and so on and so forth, all the way until the fully balanced slloogrent Karma-Form Configuration of the superior sub-level of 11-12th-dimensional range of the Tertiary Energy Plasma forms within Space-Time, Which, frankly, resembles the COMPLETE slloogrent dynamics of Space-Time.

14.15912. Therefore, it is true that the *svilgs-sphering of Formo-Creators Configurations of any “karma-fraction” resembles the dynamic resultant Vector of the eglleroliftive Synthesis*

directionality, formed by the aggregation of multi-qualitative interconnections between all “ribs” and “facets” Conscious Fields, as well as the Formo-Creators of “peaks”, structuring the current “karma-fraction”.

14.15913. The svilgs-sphering (or, simply, svilgs) defines the inner quality of the “karma-fraction” Formo-Creators dynamics and depends on the Creative Activity degree, manifested within their Configuration by the constituent Elements not only dominant, but also background Qualities. The svilgs-dynamics “attractor activity” of “karma-fraction” Formo-Creators is conveyed in a form of the resonant Synthesis possibility of СФУУРММ (SFUURMM)-Forms of certain proto-form Directions upon the maintaining of the “primary” Synthesis Direction for each of the proto-forms. During the Synthesis process, and the qualitative “re-projecting” into the structurally more complex “karma-fraction” types, the svilgs-parameter of Configuration of each of the “newly” formed “karma-fraction” represents the result of aggregation of all Formo-Creators Configurations of the initial (“previous”) “karma-fractions”.

14.15914. The svilgs-dynamics of Formo-Creators of any wave range – is an actual direction of “quantum” (ДООЛЛICOBOГO, ФЛIAKCOBOГO...) “shift” towards the larger Energy-Potential, which corresponds to the larger volume of the structuring Information. This is the inner qualitative transformation, which is directed onto the balancing and stabilizing “inside of itself” of all the connected “karma-fraction” Form-Creator Configurations due to the constant approaching of the resonant states, bearing the larger volume of Energy-Information. Hvasslons, as elements of interconnection of synthesizing Formo-Creators, constantly direct each “octahedron” inside the “hexahedron” towards the larger energy-informational capacity. Various “hexahedron” Formo-Creators are simultaneously forming the different proto-form Resomirals throughout different Synthesis Directions, and consequently, all of them have their own svilgs-dynamics.

14.15915. For instance, within the various “octahedron” Form-Creator Configurations, the svilgs-sphering activity is spread into multiple directions, but upon the merging into a mutual “hexahedron” Form-Creator Configuration, they form the aggregated svilgs-sphering, different from the svilgs-sphering of the neighbor “hexahedron”, which consists of the completely different “octahedron” Formo-Creators, bearing different, inherent only to them, svilgs-dynamics. The svilgson job – is to determine which Formo-Creators of Aspects of which Qualities have to enter into an interrelation, in order for the maximum energy-informational effect and resonance to occur, which in turn would attract the new Information “quant”, which would lead to the consequent change of svilgs-sphering volume of “hexahedron” Form-Creator Configurations. Again – the various proto-form Directions are formed by Formo-Creators of various “hexahedrons”, consisting of Form-Creator Configurations of the various “octahedrons”. These Synthesis Directions are expressed throughout our subjective Reality type as an air density, gas composition, and the inter-gas interrelationship, including the interaction with other substances. Thus, the “hexahedron” Formo-Creators, which throughout our resonant ranges are responsible for the formation of an air space, to a lesser degree, are inclined to interact with “hexahedron” Formo-Creators, forming, for instance, metals, however, to a greater degree are interacting with these Formo-Creators, which are responsible for the formation of liquids, flora and fauna.

14.15916. Let’s review the “hexahedron” svilgs-dynamics example, belonging to the resonant zone of the synthesis Direction of ЛЛIVV-BBY (LLUU-VVU); upon the THE-Love-Wisdom Aspects dominance, the hvasslons would predominantly adjust the svilgs-sphering of “karma-fraction facets” towards

the Synthesis with Formo-Creators of Aspects of other Quality – THE-Will-Intellect. This occurs as a result of the activity of hvasslon of a certain Quality with a gradually increasing hvasslon activity of other Quality, which ultimately results in established interconnection, coupled with Synthesis process, and thus, a saturation of the mutually formed Configuration of Formo-Creators of “newly” formed “karma-fraction” by the more qualitative Energy-Information.

14.15917. In our case, the Formo-Creators of the Quality THE-Will-Intellect suddenly get saturated with the Energy-Information more than the Formo-Creators of the Quality THE-Love-Wisdom, and begin to generate the Energy-Information, as a result of which, the Synthesis process initiation function is being transferred over to the Formo-Creators of other Dominant – THE-Love-Wisdom. Each Dominant Formo-Creators construct their svilgs-dynamics type, the sphering directions of which are unique. Thus, during the interaction process the alternate activity of svilgs-dynamics of both Dominants is fluctuating, going through the harmonious balance instances. Formo-Creators of each “karma-fraction” concurrently participate in the synthesis processes of the tremendous amount of multi-qualitative resonant zones. Each resonant zone, in turn, represents the structure element of the innumerable amount of the Synthesis schemas, within which the very specific “fragment” of the synthesis dynamics of the mutually-proto-form Synthesis schema occurs. Any proto-form Synthesis Direction schema consists of countless multitudes of slloogrent fragments of synthesis processes, occurring within resonant zones.

14.15918. Per se, each resonant zone represents the multi-polarized in its svilgs-dynamics, the Configuration of Formo-Creators of sub-Aspects and Aspects of corresponding Pure Qualities (only within the current frequency range!). Much more extensive slloogrent Synthesis schemas of multi-qualitative Proto-Form Configurations are structured out of all the aggregation of resonantly similar zones. What we define as a Proto-Form, can encompass the multitude of dimensional ranges of Energy-Plasma by their resonant zones dynamics, while being sequentially synthesized within each of them into the more universal and perfected Configurations of the creative manifestation of Cosmic Conscious Forms.

14.15919. Commencing from the “hexahedron” range of 3-4-dimensions, the primary synthesis dynamics of Formo-Creators of which is concentrated upon the deep Synthesis of Aspects of two different Pure Qualities, “karma-fraction” Configurations, structuring the resonant zones, acquire the more profound abilities towards the widening of the spectrum of Forms of their realization manifestation by means of the multi-qualitative synthesis processes. Thus, Formo-Creators of completely synthesized Aspects of the Quality THE-Love-Wisdom, begin to attract into their own svilgs-dynamics the Form-Creator Configurations of sub-Aspects of the five “compatible” Qualities, thus creating the new, higher-dimensional resonant zones, each of which reflects its own Direction of the proto-form Synthesis.

14.15920. The “karma-fraction” and CΦYYPMM (SFUURMM)-Forms projections onto the distinctive dynamics of Formo-Creators of our Self-Consciousness, Sub-Consciousness and Super-Consciousness (and of cause onto the subjective Perception system of our HYV-BBY (NUU-VVU)-Forms!) are not being the only possible mechanism and the Principal of manifestation of the synthesis Creative Activity of Each of the OO-VY-Entitys throughout the Universe. Outside of the limits of “tetrahedron” Energy-Plasma Synthesis schemas are the infinite multitude of possibilities for the inertial manifestation of sub-Aspects and Aspects of Pure Qualities hidden, which we aren’t able to neither logically detect, consciously associate, nor anyhow systemize and bring into conformity,

correlated with our Perceptions, while we are existing in the “current” conditions. Hence, some part of what can somehow be expressed outside of the “tetrahedron” Formo-Creators dynamic limits can represent the variable more complex “fractal” manifestations, which otherwise are unable to anyhow be reflected within our Perception systems, as only by means of certain, completely unstable within our Self-Consciousness, types of an inertial manifestation.

14.15921. Therefore, you should really understand the fact that there is no such “finalized” state, as, supposedly, the third dimension, upon which the Space-Time would be totally constructed out of the accessible to our Perception, number of “hexahedrons”, since any “hexahedron” Forms of Consciousness manifestation resemble only a very narrow-specific effect of the subjective energy-informational interrelation of such “part” of the global slloogrentity of Space, which is structured by Formo-Creators of *our* Perception system, accompanied by such Temporal Fluxes, which narrow-specifically being resonantly “projected” only into an informational space of similar narrow-specific structures of Self-Consciousness of your “currently” manifested HYY-BBY (NUU-VVU)-Forms. All the other activity, occurring parallel with everything, which we are capable of perceiving out of the outer reality, is hidden from the CAF-DRF-dynamics of our Formo-Creators, but nevertheless structures the 99, 999 99...% of the Creative Activity of variable manifestation Forms of the multi-typed Collective Intellects of the Tertiary Energy-Plasma.

14.15922. All the Configurations of the appearing Reality, which I have conditionally defined as “tetrahedrons”, “octahedrons”, “hexahedrons” and others, - is a small fraction of what I was able to somehow detect and filter by means of Formo-Creators of the superior Levels of my Super-Consciousness out of a certain “part” of the mutual slloogrentity of the outer Space-Time. Meaning that all this is only a “little something”, which at least to some degree resembles something, which we already can associate and perceive, representing not the whole complete picture of the outer reality, but only some of the uncertain advances of the superior Formo-Creators of my Super-Consciousness, transmitting Their CΦYUPMM (SFUURMM)-Forms into the Form-Creator Configurations of sub-Consciousness by means of their ability to “stop” the Illusion of inertial instances.

14.15923. But the problem of my objective construction of a more authentic “picture” of the outer reality is such, that the very moment, which I can subjectively and comprehensively review for as long as I want when I “stop” the inertial dynamics of Formo-Creators of my Self-Consciousness, simply doesn’t exist throughout the dynamics of the Universe! It’s completely non-existent, since this – is a sheer Illusion, mirage and the phantom of my subjective Perception! However, it primordially DOES exist, it has always “been existent”, and always “will be existent” everywhere! Any “halted” inertial “instant” has an ability to be manifested only within the Secondary Energy-Plasma, from where comes Our Observation ability as CCJIOO-CC-CHAA (SSLOO-SS-SNAA)-Creators, implemented concurrently after all the dynamics of Forms of Consciousness, structuring the Tertiary Energy-Plasma. Meaning that only beyond the limits of the Tertiary state of the Energy-Plasma it is possible to implement such minimally altered observation, throughout the Perception Levels of at least AA-НН-Entities.

14.15924. So, everything that isn’t in any way cognizable, and completely unavailable to any Levels of our Perception system (remember that the self-cognizable dynamics of JJIVY-BBY (LLUU-VVU)-Formo-Creators commences only from the 2nd-3rd-dimensional levels!), which is manifested throughout the Space-Time “far” beyond the limits of the resonant zones of “tetrahedron” Form-Creator Configurations, is not in any way less complex and consists of not any less-complex energy-

informational interrelationships, representing the consequences of other, much “smaller” – but not in any way lesser-complex! – “fractal” Levels of the outer Configurations of Formo-Creators of “tetrahedrons”, “octahedrons”, “hexahedrons” and so on. All these – are sub-...-sub-Aspects Synthesis Levels. Their exact quantity and the interconnection principals of their Formo-Creators are totally unknown to me, since currently they are completely inaccessible to any levels of my Self-Consciousness.

14.15925. However, one thing is pretty clear: we can't limit the dynamics of our Self-Consciousness by only the subjective Perceptions regarding “tetrahedrons” as being “minimal” manifestation Form of Universal Formo-Creators. There are infinite multitudes of possibly considerably more complex Forms of Collective Intellects can specifically be manifested either “below” the conditional zero, or “above” the conditional 36th dimensions. We might assume that Forms of Consciousness, manifested within 0-1-dimensional levels, are the most primitive and simple (comparing to “us”), but we shouldn't forget that “below” the conditionally defined by me, “0-mark”, in a natural fashion, INFINITELY continues its existence the certain, currently inaccessible to our Perception, complication degree of the energy-informational interrelations between variable Formo-Creators.

14.15926. The OO-YY-Entitys Configurations have their commencing not from the “tetrahedrons”, but much, much “deeper” – eternally “deeper”; and their Synthesis completes not within the 36th dimensional Levels, but also, much “deeper”, and surely, these slloogrent states of Energy-Plasma “cross” and superimpose somewhere. Our current discussion reminds me the research of the “Mariana Trench” – the deepest-water cavity on our planet, the researchers of which, while not possessing any real technical means to submerge into this depth, are nevertheless convinced, that there are Life Forms out there, existing even deeper than that, which still have to be researched. The “projection” complexity of geometrical Configurations of “karma-fraction” Formo-Creators, manifested throughout the dimensional ranges from 0 to 12th, upon the so-called deepening or “decreasing” dimensional levels, aren't being “shrunk” to the state of the lesser quantity of “peak” Formo-Creators, but instead they are being transformed into other Configurations.

14.15927. On the assumption of our inherent logic Perceptions, it's very possible that slloogrent Form-Creator Configurations of sub-Aspects, manifested within the 0-1-dimensional range, are structured by even more simplified Form-Creator Configurations of the infinite multitudes of sub-... sub-Aspects. But this suggested assumption can also be a mistake! And I urge you not to think along the similarly-primitive lines! Why is that that the whole Energy-Information Flux abruptly and unexpectedly discontinues “below” the zero dimensional mark within the парргоидно-аллавном Level? I suppose that beyond these limits there is something, not in any way less complex than the Configurations of Conscious Forms of the 12th dimension, but which have nothing in common with ЛЛІУУ-BBY (LLUU-VVU)-Form-Creator dynamics. And I say let there be a mystery! There must be a Big Mystery even within such a fundamental and Universal Knowledge, as the ІІSSІІDІOLOGY!

14.15928. The fact, that we have an opportunity to commence our more authentic cognition of the Universe only from the “tetrahedron” Form-Creator Configurations, is just one, out of many slloogrent possibilities of Form-Creator Configurations of our НУУ-BBY (NUU-VVU)-Forms, which, throughout the other, unknown for Forms of Self-Consciousness of 0-12th dimensional range, Levels of the Universe, to a greater degree is being manifested with other capabilities towards the synthesis modeling of absolutely different Configurations, while the “ribs” and “facets” of any of the “tetrahedrons” are structured by the multitude of variable, inaccessible to our comprehension,

“multifractal” dynamic types. “Multifractal” – because there is variable sub-...-sub-Aspects of various Qualities participate in these types of interrelations. And even when we are saying that Form-Creator Configurations of homo-typed “tetrahedron karma-fractions” represent only a certain Pure Quality, it is a mistaken Perception: the dynamics of sub-...-sub-Aspects of all other Qualities, Configurations of which are simply being “aggregated” within a “tetrahedron”, potentially superimposed and narrow-specifically manifested within each alleged “homo-typed” Configuration.

14.15929. Each “tetrahedron” Configuration – is an integral reflection of very complex energy-informational interrelations of “pre-tetrahedron” Formo-Creators of various Consciousness Forms. We simply potentially “filter” out of the outer slloogrent “geometry” of Space-Time only the Configurations of these Formo-Creators, which at least potentially (“in the attractor fashion”) can resonate with Self-Consciousness Formo-Creators of the “human” Form. However, from the exact same slloogrent dynamics, Formo-Creators of other Proto-Forms “filter” absolutely different interrelations, and apparently, this is being perceived (reflected) as something, which is known and more accessible to the Formo-Creators of their Perception mechanisms.

QUESTION: From what you have said I understood that within 0-1-dimensional Levels, within limits of each of the 12 Pure Qualities, the Synthesis occurs of an unlimited number of sub-Aspects inside of each of the infinite set of its Aspects. Consequently, Formo-Creators Configurations of “tetrahedron karma-fractions”, representing the synthesis dynamics of sub-Aspects of certain Pure Qualities, can’t be the most “simple” out of all geometrical figures, which means in turn that the very sub-Aspect Configurations can also be expressed within the Self-Consciousness as certain Levels of Quality Aspects, or even as certain other Pure Qualities or their Interpretations?

14.15930. Please keep in mind, dear Стойлергустр that Form-Creator Configurations of all the multitude of sub-Aspects also represent the “parts” of the slloogrent dynamics of Self-Consciousness: if these are СФУУРММ (SFUURMM)-Forms – they belong to СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators, if these are Consciousness “projections” into the SC – they belong to Formo-Creators. If we begin to conditionally differentiate each sub-Aspect onto its constituents, we will discover in their Configurations the reflections (“projections”) of all the multitude of sub-Aspects of compatible background Qualities, certain interrelations between these sub-Aspects, and their background sub-Aspect analogs. Everything, which we will perceive and derive from the dynamics of Consciousness Formo-Creators of various Proto-Forms, will immediately transform the “rib-facet” dynamics of the outer “karma-fraction” Configurations into something, which can at least somehow be reflected within the Observer’s Consciousness the most.

14.15931. If we examine the energy-informational dynamics of the Energy-Plasma from any Level of VEC, we’ll observe the variable combinations of “multifractal” figures, simultaneously manifested throughout the global slloogrent dynamics of all Forms of Consciousness. Throughout the inferior, low-frequency Levels of Energy-Plasma, the manifested dynamisms in no way resonate with our “human” СФУУРММ (SFUURMM)-Forms, and they aren’t identifiable with anything we know. If we stop the slloogrent dynamics, and review the single “frame”, we can associatively identify some of their manifestation with something, which remotely resembles our Perceptions of “facets” and “ribs” of some fantastical polyhedrons. There is an unimaginable and inexpressible quantity of them, which is densely interrelated and birvulantly penetrate one another. And if we intently review

some part of this global flux, and steadily “submerge” with our Observer’s Mind into it, we could “get down” to “tetrahedron” dynamics, after which again the obscure and highly complex dynamics of “multifractal” structures.

14.15932. So, it appears that the Observer’s Consciousness can “snatch out” (“filter out”) only a fraction “part” of the mutual dynamics out of the global flux, as if it’s “one within the other”, after which goes the same, as before – the whole series of unknown Configurations, built out of some unclear interactions. However, if it wasn’t an Observer of the ЛЛІУУ-BBY (LLUU-VVU)-Forms but instead of some other Proto-Forms, he wouldn’t pay any attention to the Configurations I have mentioned, “filtering out” only these Configurations, which at least somehow associate with “his own” СФУУРММ (SFUURMM)-Forms. I suppose that the sub-Aspects, Aspects and Pure Qualities themselves, as well as the synthesis States, into which they are being synthesized by Formo-Creators, according to their informational capacity “not really” differ from each other (just as analog systems), distinctively reflecting a Certain, mutual for the whole Universe, Entity, just as synonyms reflect a certain sense between various words. Therefore, it is possible to anyhow “deploy” and model each of these Levels for as long you want, which, frankly, Formo-Creators of variable Proto-Form Consciousness types are doing all the time. There isn’t even a hint of “discreteness” of anything, - even OO-YY-Entitys! – existing in the Universe! The discreteness and the ability to the division of the indivisible – it is only an attribution of an individual Perception mechanism, isolating something out of the global dynamics in order to comprehend it and ultimately cognize it as something integral and logical.

14.15933. Form-Creator Configurations of “tetrahedron karma-fractions” in terms of their informational saturation and other processes, occurring within them, are not less saturated and integral then Form-Creator Configurations of all the other “polyhedrons”. It’s just a “tetrahedron” group, manifested within 0-1-dimensional range became a bit “larger” upon its manifestation within the dynamics of 1-2-dimensaional range (from the position of our subjective Perception) although the quantitative measures aren’t even applicable here, - again, this is a purely specific attribute of our inferior mind and these Formo-Creators, which within the current wave range of manifestation of our НУУ-BBY (NUU-VVU)-Configurations, recourse to such artificial differentiation in their strive to comprehend and perceive something.

14.15934. Variable combinations of Formo-Creators of different “fractal” Configurations are capable of the implementation of various types of Synthesis. Formo-Creators, merging their Configurations into the “tetrahedrons”, “pyramids” and, partially, “octahedrons”, implement the inner-aspect and inter-aspect Synthesis Process. Form-Creator Configurations merged into the “octahedrons”, hexahedrons”, “icosahedrons” and “dodecahedrons”, provide the implementation of the inter-quality Synthesis. The Configurations of “spheroidal polyhedrons” of various complexity degrees continue the next types of Synthesis – multi-qualitative. But, since the “tetrahedron”, “octahedron” and “pyramid” Configurations are equally inherent to 3, 5 to 3, 75 dimensional ranges, the inertial processes of the inner-aspect and inter-aspect Synthesis occurs within them, on the background of the variable inter-quality Synthesis schemas. But even here these processes can’t cease, because the inter-aspect Synthesis is being implemented concurrently throughout all Directions, and the Formo-Creators re-focusing occurs sequentially – from the Configurations, where the current Synthesis has partially been completed into these, where it has been completed to a larger degree.

14.15935. Let us switch the topic slightly; otherwise it will be difficult for you to understand all the forthcoming information. I have already mentioned it before that within the very Form of manifestation of any type of Consciousness, there aren't any Formo-Creators exist, except these, who implement the dynamics on atom and molecular levels, but even they aren't actually being present there – these are simply “projections”, conforming results of their interaction Forces, subjectively manifesting within Space-Time by means of variable Forms – carriers of Consciousness “projections”. The Conscious-Fields of Creators of these Forms, organizing their interrelations into all the variety of Forms, aren't being manifested in the inertial conditions of Levels of Space-Time, where Forms of their realization are being manifested; instead they structure the sequentially more qualitative wave ranges. Moreover – the very Forms of their manifestation represent only the “projections” of slloogrent Form-Creator Configurations of even more qualitative Levels. And so on. So, where are the Formo-Creators of the Tertiary Energy-Plasma actually “located”, you may ask? Within the Secondary Levels of Energy-Plasma! But even THEY represent only more genuine (in relation to the Tertiary state) “projections” of slloogrent Form-Creator Configurations of Super-Universal Levels of Energy-Plasma, organizing Its Initial state. Hence, as I said before – there isn't any “beginning” or an “end” there!

14.15936. Any, visually manifested Form, as well as what you perceive as “yourselves”, - is simply something, which your limited Perception system is capable of differentiating throughout all the diversity of other Forms, similarly structuring the outer reality, but inaccessible to the sensor systems of your “current” Perception, as if all the infinite diversity of these Forms of Consciousness simply doesn't exist for you! You exist separately from them, since you aren't able not only to notice them around you, but even cognize the minimal amount of Consciousness Forms, which are manifested along with you. However, as your Perception system begins to develop, you begin to notice something, which completely doesn't match any parameters of atoms, molecules and all your scientific Perceptions of them, as well the traditional Perceptions about solidity, viscosity, fluidity, airiness and all the others.

14.15937. Upon the deepening and the larger degree of concurrent polarizing of your CAF-DRF-dynamics within various Form Configurations of Consciousness (which occurs only upon the greater submergence and completeness of Synthesis processes throughout all the inferior and mid-frequency Levels of your Self-Consciousness), everything is drastically being transformed and altered, above all, within the Perception system, and **not** within the brain. The doctors waste considerable amount of time and resources, meticulously “digging” the brains of the dead geniuses and psychics, striving to find the difference, - it's not there, and never will be! Structurally, molecularly the brain of the “psychic” isn't at all different from the “ordinary man” cerebrum. But then who and by what means provides and correlates the qualitative difference of Perception systems of the “gifted” and “ordinary” people? Well, it's WE, but as the more qualitative “parts” of OUR slloogrent Configurations, which are manifested within the more qualitative Form-Systems as an infinite diversity of ФЛАКС (FLUX)-Forms of the collective Sub- Consciousness.

14.15938. Let us review the “fractal” types anew. I have mentioned before that each “karma-fraction” Configuration type, to a greater degree reflecting the Aspects of a certain single Quality, can be “decompressed” within the Self-Consciousness Form only by means of the resonant interaction with corresponding Form-Creator Configurations, which reflect the dynamics of the same Aspects. For instance, the Formo-Creators of Aspects of two Pure Qualities, such as THE-Will-Intellect and THE-Love-Wisdom, compile the energy-informational foundation of the creative realization of

Forms of Self-Consciousness of НУУ-BBY (NUU-VVU)-Form-Types, which structure the collective Consciousness levels of ЛЛУУ-BBY (LLUU-VVU)-Forms.

14.15939. As a result of Synthesis of their Configurations the specific type of Configurations of “octahedron”, hexahedron”, “icosahedron”, dodecahedron” and other, resonant with them “karma-fractions” and СФУУРММ (SFUURMM)-Forms is being created. I define these as BBY(VVU)-Configurations, which, depending on the wave range conditions of their manifestation, are being transformed into the whole diversity of Proto-Forms, forming “inside” of the multi-qualitative dynamics of the Collective Consciousness of the ЛЛУУ-BBY (LLUU-VVU)-Form. Note that within various ranges of Energy-Plasma and within various Synthesis conditions, there are such BBY(VVU)-Configurations as: НУУЛЛ-BBY (NUULL-VVU), УУЛЛ-BBY, ГООРР-BBY, ПИИЙКХ-BBY, РР-BBY, ТТ-ААЙИ-BBY, ППУУРПУ-BBY, ЯИХСС-BBY, ФЛИРРФ-BBY, ССМ-BBY, ТАО-BBY, ММУУ-BBY, СЦЫЫГЛ-BBY, РДУУ-BBY, УЛГУУ-BBY, ЛЙЮЙЮ-BBY, ХВУО-BBY, ДДВУУ-BBY, ЯИЙГ-BBY, and many others, which are sloogrently included within the manifested structure of НУУ-BBY (NUU-VVU)-Configurations of Formo-Creators of ЛЛУУ-BBY (LLUU-VVU)-Forms.

14.15940. The process of the energy-informational “decomposition” (TES-“decompression”) within structures of variable Proto-Form “karma-fraction” Consciousness Configuration occurs only upon the interconnection of the resonantly corresponding to them, Form-Creator Configurations. For instance, the “BBY” prefix indicates the potential affiliation of certain Formo-Creators, together structuring the Configuration of current Form of Consciousness, to the ЛЛУУ-BBY (LLUU-VVU) development Direction – the Collective Consciousness of the ЛЛУУ-BBY (LLUU-VVU)-Forms. Our “human” subjective Realities are structured by СФУУРММ (SFUURMM)-Forms, the Configurations of which have the “BBY” prefix; this is an indication of the fact that these – are our Realities, our creations, our types of creative realizations, regardless of their qualitative nature. Therefore, only these Forms of Consciousness, which possess similarly active Configurations, Formo-Creators of which reflect the Aspects of at least one of “our” two Dominants, are capable of at least some degree of understanding of the specific peculiarities of the energy-informational interrelations, essential for the “inter-human” relationships.

14.15941. When Aspect Formo-Creators of a certain background Quality begin to actively pretend on one of the halves of НУУ-BBY (NUU-VVU)-dominance in the realization dynamics of Self-Consciousness of large amounts of “people”, belonging to a single race or a nation, the inter-comprehension issues with other races or the whole nations commence, which can last for centuries and even millenniums. However, since within these races and nations there are “people”, whose realization dynamics of their Self-Consciousness are also effected by the Formo-Creators of Aspects of other Qualities, the absence of the mutual understanding leads to the constant civil wars and within-national and ethnic conflicts, solving of which is currently possible only on the basis of the searching of such moral, religious, social and political values, which are inherent to all Dominants.

14.15942. Since there are not many of such mutually-universal СФУУРММ (SFUURMM)-Forms, or they are only being manifested within the high-frequency Self-Consciousness Levels, the wars, revolutions, uprisings, turnovers and the other murderous conflicts became the usual signs of the outer reality. What is the solution? I suppose the best solution would be to find a universal means of rapid increase of the Constructive Self-Consciousness Activity of hundreds of millions of “people”. Honestly speaking, throughout a multitude of the development scenarios, mostly favorable towards the ЛЛУУ-BBY (LLUU-VVU)-Direction, this global reconciliation and mutual understanding task

was successfully completed with the assistance of the Universal Knowledge of the IISSIDIOLGY. Would the BBY–Configurations of Self-Consciousness Formo-Creators of your HYV-BBY (NUU-VVU)-Forms belong to these scenarios – is only up to you!

14.15943. Not only BBY(VVU)-Creators are structuring the subjective “human” types of Realities and Continuums within limits of the specific energy-informational dynamics of the “octahedron-hexahedron” and “hexahedron-icosahedron” Resomirals, inherent only to the “human” Proto-Forms; and not only BBY(VVU)-Configurations of CΦYYPMM (SFUURMM)-Forms of our individual ODS can hardly be comprehended even by “people”, not mentioning of the other Proto-Forms. But along with that, BBY(VVU)-Configurations of Self-Consciousness Formo-Creators of HYV-BBY (NUU-VVU)-Forms, while being “projected” through the TES-dynamics onto the limited “facets of hexahedron” surfaces of Space-Time, also “snatch” into the informational space of our Self-Consciousness out of the global slloogrent dynamics of Conscious Forms of the outer reality only the BBY(VVU)-Configurations of CΦYYPMM (SFUURMM)-Forms, manifested as “tetrahedrons”, “pyramids”, “octahedrons”, hexahedrons” or “icosahedrons”. From the informational database (ODS) of the “generally-hexahedrons” Forms, structuring the outer Space-Time, BBY(VVU)-Formo-Creators can resonantly attract and minutely cognize only something, which corresponds to the diffusive dynamics of HYV-BBY-Form, the global slloogrent Configuration of which is totally quantized by the variable BBY(VVU)-CΦYYPMM (SFUURMM)-Forms.

14.15944. The productive interrelation of Formo-Creators with the various carriers of BBY(VVU)-Information (manifestations of Nature, society, variable creative realizations, objects, events and so on) occur only resonantly, which is possible only with these CΦYYPMM (SFUURMM)-Forms, which are quantized by the identical BBY(VVU)-Information. BBY – is a specific frequency, a specific vibration, inherent for all People, this is a whole spectrum of the specific behavioral reactions, which penetrates the multitude of dimensions, and is inherent for all of Us, who is being currently manifested within the much more qualitative dimensions, as well as these Us, who are being manifested within the current wave dimensional range.

14.15945. The larger the “quantity” (the energy-informational potential) of Formo-Creators BBY(VVU)-Configurations, which can resonantly attract the BBY(VVU)-Configurations of the CΦYYPMM (SFUURMM)-Forms we utilize, the more opportunities for a much higher qualitative realizations will be offered (“reflected”) within our outer reality. Consequently, each additional resonant merge of “tetrahedrons” between each other increases the quantity of Formo-Creators and the interrelations between them. The united “tetrahedrons”, after formation of “pyramids”, and then – “octahedrons”, are svilgs-sphering in a contradirectional fashion towards the mutual qualitative directive of one another, and thus, each “peak” remains independent, meaning that Formo-Creators of each “pyramid” remain actively interconnected between each other, but not united.

14.15946. Upon the exchange of the energy-informational Impulses and the qualitative alteration of their previous BBY(VVU)-Configurations, they commence the svilgs-sphering in the slightly different dynamics, trying to attract the new BBY—Configurations, the dynamics of which is also altering the mutual svilgs-sphering of the utilized CΦYYPMM (SFUURMM)-Form. At the new interrelation instant with another Proto-Form BBY(VVU)-Configuration, the svilgs-shift occurs, but in a slightly different Direction. Hence, the formation of all the multitude of BBY(VVU)-Configurations of the “human” CΦYYPMM (SFUURMM)-Forms within our Self-Consciousness, reflected by Formo-Creators into Form-structures of the outer reality, which we resonantly attract out of the chosen BBY(VVU)-

Configurations of the proto-form “pyramids” and “octahedrons”, occurs. Each combination of such interchanging dynamics every time it occurs is different, not the same it was within our individual ODS, since it includes part of the new proto-form qualitative interrelations.

14.15947. This is the primary Entity of the formation of all the multitude of HYV-BBY-Resomirals – “human” types of subjective Realities, structured by the Formo-Creators of “human” Forms, belonging to various races, nationalities and nations. The dynamics of BBY(VVU)-Configurations forms all the infinite multitude of “individual” genotypes and the DNA, at which the Formo-Creators of other Proto-Forms can “wedge-in” into it only in case if they also possess the same BBY(VVU)-Configurations. Therefore, the Resomirals of 3-4-dimensional Realities, manifested through the variable Temporal Fluxes, consist of somewhat stereotyped “hexahedron karma-fractions”, which are formed by the specific svilgs interrelations.

14.15948. The Resomirals of the ants Realities, for instance, are structured by the other somewhat stereotyped “hexahedron karma-fractions”, formed by totally different svilgs interrelations between Formo-Creators. Although all these Resomirals aren’t able to mix with each other even within the same dimensional range conditions, but they definitely can interact with each other by means of the mutual Continuums, constantly acquiring the new, more qualitative energy-informational interrelationships (due to the continuous increase of “quantity” of “peak” Formo-Creators of the mutual “karma-fractions” and annihilation of the current tensions), which in the conditions of 4-5-dimensional ranges leads to the resonant formation of the multitude of inter-proto-form Resomirals, where people and animals not only easily understand each other, but cooperate of the mutually beneficial levels.

14.15949. All leptons, which are manifested throughout the 3-4-dimensional ranges, are also structured by the various “octahedron-hexahedron”, “hexahedron” or “hexahedron-icosahedron karma-fraction”, depending on the proto-form Resomiral they structure. The point of this is the fact that electrons are not all the same. Moreover, the “hexahedrons” are also not all the same, because the Formo-Creators Configurations, from which they are created, are different. Certain “hexahedrons” can interconnect with one another, while others push-off from each other and aren’t able to interconnect, since their Formo-Creators are able to resonantly interconnect only with Formo-Creators of the qualitatively corresponding “fractal” figures (magnets are the good example). As a result of the fact, that Formo-Creators of our Forms are diffusive, they can have homogeneous reactions towards few other groups, closest to them, or vice-versa – the opposite in terms of the quality of Formo-Creators BBY(VVU)-Configurations.

14.15950. If a tendency towards the predominance of the Direction of a certain Proto-Form becomes evident during the refocusing process, the Creative Activity of Formo-Creators within the Self-Consciousness also changes, since each Form-Creator type can interact only with CΦYYPMM (SFUURMM)-Forms of the inherent to them Proto-Forms. BBY(VVU)-Formo-Creators aren’t able to understand or cognize (resonantly activate) Formo-Creators from the other Proto-Form Direction due to the differences in Perceptions and CΦYYPMM (SFUURMM)-Forms. For instance, I don’t suppose any of you would even remotely understand what a crow’s croaking would mean! The Formo-Creators of JJYY-BBY (LLUU-VVU)-Direction aren’t an exception within the global dynamics of Proto-Forms Formo-Creators; they are simply different, but not more or less important. If the stabilization of the CAF-dynamics in a JJYY-BBY (LLUU-VVU)-Direction occurs on the regular basis, the brain Formo-Creators are becoming more harmonized (i.e. resonantly inclined) by the

high-frequency CΦYUPMM (SFUURMM)-Forms of their BBY(VVU)-Configurations, predominantly manifesting only the ЛЛIY-BBY (LLUU-VVU) activity.

14.15951. However, as soon as the CAF-dynamics of Formo-Creators of your Self-Consciousness persistently and steadily is being “re-focused” by means of an Interest into any other Directions, predominantly resonating with CΦYUPMM (SFUURMM)-Forms, inherent to some Proto-Forms, this stimulates the manifestation of an increased amount of tensions (dissonance) within the informational space of Self-Consciousness in relation to the Synthesis schemas of other Formo-Creators of ПΠOO-ΦΦ-PPY (not only of the ЛЛIY-BBY (LLUU-VVU), but other Directions as well!) and the CΦYUPMM (SFUURMM)-Forms they generate.

QUESTION: Is it possible for Formo-Creators Configurations of “hexahedron karma-fractions” to gradually “refocus” into the “dodecahedron karma-fractions” of the 4-5-dimensional range by means of the sequential quantizing?

14.15952. Dear Ооллспрооксс, the various Configurations of “dodecahedron” Formo-Creators are being formed due to the svilgs-sequential inertial attraction into their dynamics of the informational “icosahedron” fragments of Configurations, inherent to the more high-frequency Levels from the Formo-Creators Configurations of various “hexahedrons”. The quantity of the energy-informational interrelations of “hexahedrons” Formo-Creators increases and the structure of their Configurations is gradually being modified, transforming into the more complex figure, which penetrates into “hexahedrons” of other Formo-Creators and Proto-Forms and establishes the resonant interconnections with them. This is the primary conception of the concurrent differently-directed Synthesis throughout all possible Directions.

14.15953. When I utilize such terms as the Synthesis dynamics or the dynamics of Synthesis processes, this automatically correlates to the inertial system of our Perception, a certain sequence, in which one “octahedron” is being connected to the “hexahedron”, then the second “octahedron”, and so on. In reality, however, all that ***already*** exists: the “hexahedron”, synthesized with a single “tetrahedron” of the other Quality, the “hexahedron”, synthesized with the “tetrahedron” of the third Quality, the “hexahedron”, synthesized with the three “tetrahedrons” of the fourth Quality, and all other possible variations of their interconnection between each other – ***always already exist***. However, for our understanding we will review this gradually and sequentially, as if we are moving behind your virtual Focus of the Steadfast Attention, concurrently surfacing throughout the gradually complicated conglomerates of CΦYUPMM (SFUURMM)-Forms of various Directions of a possible development.

14.15954. The process of establishing of the energy-informational interconnections by Formo-Creators of other Proto-Forms can be imagined in a way, as if a “hexahedron” is being “accreted” by the additional “tetrahedrons”, directed towards the potentially formed resonant interconnections. Attracted “tetrahedrons” belong to the other Synthesis schemas and sub-Aspects and Aspects of some other Cosmic Quality. “Newly” formed interconnections allow the “hexahedron” Formo-Creators to attract into their dynamics of completely new Directions of the creative realization. The more of the multi-qualitative simplest “karma-fractions” being added to “hexahedrons”, the more of the interconnections with the Continuums of other Proto-Forms there are, and to the greater degree the “hexahedrons” are being transformed into the “figures” of the higher dimension – “icosahedrons”,

gradually transferring into such manifestation conditions, which are inherent to the ФЛАКС (FLUX)-Forms of Sub-Consciousness of 4-5-dimensions. Upon entering of the range of 4-5 dimensions, all the interconnections, bearing the specific svilgs-sequence, formed within the previous range, contributed to the creation of “dodecahedrons” – the new energy-informational structures, built on the basis of “hexahedrons” and the attached to them simplest “karma-fractions”.

14.15955. Comparing to the “hexahedron”, the “dodecahedron” interrelations are much more “globally-universal”, due to the inclusion within the self-dynamics of Form-Creator Configurations of other Pure Qualities. And so, the “tetrahedrons”, which were previously incomprehensible and inadmissible for Formo-Creators, throughout the higher dimension, participate in a totally different capacity, as a necessary material for the organization of the new Creative Directions, which in the previous conditions didn’t make any sense, due to the absence of the Energy-Information – more reliable СФУУРММ (SFUURMM)-Forms. For instance, currently we are unable to retrieve the energy out of the vacuum or derive energy from the hydrogenous interrelations, while in other Continuums, all this has been already performed – the specific groups of Formo-Creators have done this “for ages”. Why? Well, we don’t have enough Knowledge, which is inherent to them.

14.15956. We refocus into “these” resonant zones of Space-Time gradually, more and more submerging into other proto-form Continuums by means of the dynamics of “newly” added “tetrahedrons” to our Configurations, where our specific “future” Interpretation will have an Idea: “Oh! I can actually do it this way!” The result of this could easily be a stupendous Invention – a new Energy-Information. This Energy-Information is potentially present within the “tetrahedrons” of 0-1-dimensional range, within “pyramids” of 1-2-dimensional range, within “octahedrons” of 2-3-dimensional range, but the unanimity degree of multi-qualitative dynamics of Form-Creator groups for its implementation, wasn’t sufficient for the Mutual “hexahedron-dodecahedron” quantizing Configuration of the corresponding Form-Systems of Realities.

14.15957. Once again I wish to draw your attention to the fact that the inner-aspect and inter-aspect Synthesis processes are being implemented within Conscious Forms of various dimensional Levels, and not only throughout the inferior ones, but also within mid- and high-frequency Levels. The “tetrahedron”, “pyramid” and “octahedron” Form-Creator Configurations participate in all Synthesis schemas, up until the 13th dimension. The instances of lack of the implementation occur more often within the superior Levels, since within the inferior Levels the interrelation schema includes one, two of three dimensional ranges, so consequently the scope zone of the qualitative Synthesis isn’t large (everything is taking place within a single Quality), therefore the arising tensions are quite “easily” being annihilated. On the Levels of 4-5-dimensions the new Energy-Information is being synthesized in the Configurations according to much more complex and inter-penetrating schemas, where upon the interrelation establishing attempts, the previous СФУУРММ (SFUURMM)-Form and Perceptions don’t correlate with the newly created conditions. That’s because these perceptions are incoming from Continuums, which structure the Collective Intellects of other types and other Proto-Forms. The attempt to establish the connection between the domestic and proto-form СФУУРММ (SFUURMM)-Forms reveals the presence of vast non-synthesized fluxes of the slloogrent dynamics of ЛЛЮУ-ВВУ (LLUU-VVU).

14.15958. During such times we are experiencing a great deal of Interest, however, we don’t know yet of its usefulness or its nature. But that, for instance, is being a manifestation of a Quality THE-Mobility, not inherent to us, and we commence its research, begin the resonant comparison of that

with what already exists within our Self-Consciousness. And suddenly there resonant shift occurs – a piece of the “puzzle” is being placed into the space, which was missing within the slloogrent flux of the Stereo-Form. As a result, within the structure of 3-4-dimensional СФУУРММ (SFUURMM)-Form, an inner-aspect Synthesis has occurred in the Direction of the intensification of interrelations with Configurations of Formo-Creators of the Quality THE-Mobility, meaning that the “tetrahedron” Configurations of sub-aspects of this Quality have sequentially svilgs-spherically connected to the group of “hexahedrons”, which are structured by Formo-Creators of Qualities THE-Love-Wisdom and THE-Will-Intellect.

QUESTION: Why can't we simply develop exclusively in our own ЛЛУУ-ВВУ (LLUU-VVU)-Direction, without any concern regarding any other Proto-Forms?

14.15959. The new Information, dear Флавуыйерра, introduces its own Perceptions, meaning that the previous СФУУРММ (SFUURMM)-Forms change; they change depending on the quantity of additional interrelations with new Proto-Forms is being formed within the Configurations of our Forms of Consciousness. Why all Forms are diffusive? The reason lies in the structure of the Continuums, where everything is interconnected with everything: food chains, the law of energy conservation, symbioses, biosphere cycle, and water circulation. The Synthesis of Two Dominants occurs only after everything, related to them, merges into this process; however, within the Continuum of the current Proto-Form, everything will be synthesized only according to these two Dominants. For instance, everything we teach our domestic animals, is being automatically transferred to their whole kind (remember the “hundredth monkey” effect). The hundred monkeys throughout the different parts of the world were shown the same trick of whipping bananas from palm trees with sticks, and sometime later, across the globe the monkeys themselves are looking for sticks so they could whip the bananas off. They get an idea, a СФУУРММ (SFUURMM)-Form, that “this” can be done “like that”. So they actually “scanned” some of our СФУУРММ (SFUURMM)-Forms. The same is with bears - the conventional excavators are created in a similar way the bears dig their lairs.

14.15960. In the volume 10 of the IISSIIDIOLGY I was asked why our choices to a large degree seem accidental, “attractor-wise”, and why aren't they are nondeterministic (clause 10.11718). The reason for that is – the implementation of КРУУЙЙ-ДМООЙЙ-Principle of the Destabilization, reflecting the Law of ЙЙЮ-ЛЛУ-АЙЙ, which contributes to the profound Synthesis of Quality Aspects within the Humanoid Evolutional Development Branch without missing a single Synthesis schema and the Synthesis Direction, ultimately leads to the Synthesis of such Quality as THE-PERINEALNESS.

QUESTION: Oris, what is the qualitative difference of synthesis processes within diapasons and resonant wave ranges?

14.15961. It is imperative to precisely understand what a resonant range (“resopason”) is, dear Стуингглион, and be able to differentiate it from the notion diapason. The resonant wave range is the area, where the stable resonance with the “standard” informational Pattern arises within the current Configuration of Form of Self-Consciousness. Each such area has the objectively expressed character within its own Configuration, which correlates to the specific type of the Collective Consciousness and is characterized by the specific attribute of the Perception subjectivism of its Self-Consciousness Forms in a resonant principles category and the “amplitude” of resonant vibrations in relation to the “standard”. The most resonating Configurations of a single Proto-Form

“karma-fraction” Configurations within limits of a single resonant range, manifested throughout the slloogrent dynamics of Space-Time, are merged into Resomirals. The comprehensiveness of any resonant range potentially includes all possible interrelations of the current type, since even within the infinite the resonance degree is striving towards the zero, but doesn’t equal it.

14.15962. Therefore, for ease of understanding, I have defined a resonant range as the aggregation of all resonantly-similar BBY(VVU)-Configurations, the resonance degree of which in relation to the certain “standard” Configuration remains within limits of the “significance effect”. The degree of such “significance effect” can be determined in each separate case in a form of conditional boundaries. For instance, “the zone of resonant overlapping of Configurations with identity degree of over 20%” means that when we review any dynamics process, we are only looking for Configurations, the resonance degree of which with the chosen “standard” Configuration equals of more than 20%.

14.15963. The notion “resopason” is a derivative of the two words: resonance and diapason. Hence, in order to determine the resonance degree, we would require the “standard” Configuration, which would resonate with all other Configurations, while the diapason determination would require the criteria of the evaluation assessment of the extent of the resonant superposition of Configurations along with the degree of its importance of the reviewed process. The necessity of choosing of a “standard” Configuration upon the determination of resopason is justified by the infinite duvuyllerrt state of the Universe and the absence of diapasons as such. Usually, speaking of diapason, we imply the certain extent of the associative similarity of an object, event or phenomena with specific standardized Perception within our Self-Consciousness. The mathematical diapason notion isn’t really applicable in real Life, where beyond the limits of any diapason the process dynamics doesn’t cease, but rather either considerably diminish, or transform into the other qualitative manifestation.

14.15964. Per se, only resopasons, and not the diapasons are present within the slloogrent dynamics of Karma-Plasma. Meaning that everything dynamic and duvuyllerrt, consisting of transitioning states. There are certain instances, which allow certain dynamisms to be merged into a mutual dynamics according to a single inherent attribute, or another attribute, but which qualitatively is being manifested in a completely different scope. Gradually the “octahedrons” transform into figures, very remotely resembling “hexahedrons”, after which it all forms into more dense energy-informational interrelations. Then, “hexahedrons” begin to attract other “octahedrons”, and immediately “tetrahedrons” enter in their dynamics. These “octahedrons”, which have entered into the “hexahedron”, begin to resonantly attract “pyramids” by “ribs” of their foundations, as a result of which “octahedron” is being formed, partially being a constituent of one “hexahedron”, and partially – the constituent of the other. At that, the other “hexahedron” of some proto-form Continuum was attracted to the “hexahedron” of the “human” Proto-Form. That’s how we receive the Experience “from there”, which isn’t inherent to the current group of Continuums. And if we can somehow compare the “human” CΦYUPMM (SFUURMM)-Forms with geometrical figures, the other Proto-Forms energy-informational interrelations might “look” completely different.

14.15965. I would like to remind you to please not to link to the exact “karma-fraction” Forms, since these Conscious Forms don’t have any precise exact specifics. “Tetrahedrons”, “octahedrons”, “hexahedrons” – are predominantly associative symbols, in which you should find your own profound meaning. You don’t really perceive a spin of the particle as a rotation of the charged ball? The same is regarding “tetrahedrons”.

QUESTION: Oris, if Formo-Creators, which are manifested within the 0-2, 5 dimension ranges, aren't able to reveal in "our" dimensional ranges, could we perhaps not consider them at all?

14.15966. – Dear Уссоотл, the НУУ-BBY (NUU-VVU)-Configurations of our current in-focusing, manifest as НУУ-BBY (NUU-VVU)-Forms concurrently throughout the multitude of duvuyllerrt Continuums, while the Formo-Creators dynamics of ЛЛЮУ-BBY (LLUU-VVU) is only reflected by our own psyche. Formo-Creators of ЛЛЮУ-BBY (LLUU-VVU)-aren't being what we consider "our body". Do your current thoughts in regards to the ИССИДИОLOGY reflect through your body? No, they don't. Our body – is the whole biochemistry, transformed into the mechanics. What is biochemistry? This is the aggregated Formo-Creators dynamics of Proto-Forms, where each group provides their own functional physiological element: kidneys, brain marrow, lymph, epithelium, hair and so on. Each bio-Creators group, structuring the biological body, remains within their own Continuums, where they have a primary role "there", and not "us".

14.15967. Our brain and our biology – are the manifestations of other Continuums, other Proto-Forms, which are involved into activity, inherent to our Synthesis schema, but at that their Formo-Creators participate in the totally different Synthesis schemas. During the refocusing process our Self-Consciousness, the set of СФУУРММ (SFUURMM)-Forms and the biological body's Configuration are being changed qualitatively, Formo-Creators of which have to precisely correlate with the current ongoing psyche processes. For instance – adrenalin, dopamine, noradrenalin and cortisol and the similar hormones are being the realization Forms of the inferior Formo-Creators - АРГЛЛАМУНИ (ARGLLAAMUNI)- and ИНГЛИМИЛИССА (INGLIMILISSA)- Ииссииди. If these hormones cease to release within your psyche to a greater extent, therefore you actually shift your CAF from the current Continuum group into the more qualitative Continuum group. The only question is – which proto-form direction you are refocusing into?

14.15968. We change Continuums by means of the alteration of our psychic state of Self-Consciousness – out current Perceptions of anything. The current Continuums depend on the type of proto-form Formo-Creators, which we predominantly interconnect with. Recall that the very definition of the Continuum is its binding to the Form manifestation frequency. What is – the Form? For us is still pure biology. But within these НУУЛЛ-BBY (NUULL-VVU)-Forms, the dynamics of Formo-Creators of which is capable of adequately reflect the dynamics of Formo-Creators of the superior Levels of Self-Consciousness, the Form begins the gradual merging with Consciousness and within its most qualitative manifestations transforms into the integral dynamics of ФЛАКС (FLUX)-Forms of Sub-Consciousness, revealed in the conditions of 4-5-dimensional ranges.

QUESTION: Within the 3-4-dimensional resopasons, where the basic Configurations of manifestation are being "hexahedrons", can the more complex figures be present?

14.15969. "Icosahedrons" and "dodecahedrons" are present within the 3-4-dimensional ranges potentially, as complicated "hexahedrons". But please don't think dear Склаилффуулс that it has to do with "higher" or "lower". They are present within the integral multitude of the energy-informational interconnections. In order to gain more Experience, one should "transmit" more Information through their Self-Consciousness. The increased amount of Experience will provide the interaction with larger amount of Formo-Creators in an integral slloogrent Configuration. The more Experience you have, the larger energy-informational potential of multi-qualitative Formo-Creators

you will be able to attract towards your type of the resonant concernment, the larger the volume of Energy-Information you can manipulate per unit of Time, the higher the quality of CΦYUPMM (SFUURMM)-Forms you utilize, which in turn means the presence of deeper and more multi-polarized Perceptions within your Self-Consciousness.

14.15970. We easily depart from older Perceptions once the Experience is already synthesized. If that occurred, you will not commence the passing on a two-way road, since you will definitely know what you need: you don't need a burned corpse, but rather the constructive activity. The more of such Experience you possess, the more nuances and "refinements" appear in your Understanding of any of the possible realization instances, and the intuitive capability to quickly filter everything more qualitative from everything less qualitative in your Life, becomes more active, which in turn will allow you to make more and more qualitative choices. All the above mentioned is the svilgs-dynamics of Formo-Creators, which "project" into the Continuum (your realization sphere) the most important Energy-Information. Each Information type is coherent to the specific Energy type: the more highly-qualitative Information you possess and manipulate within your own Self-Consciousness, the larger energy potential you automatically vest into each refocusing pattern. Additionally, the most qualitative Perceptions of your current existence pertain to the IISSIDIOLGY. Hence, they represent the most energy-intensive informational "puzzles", from which every one of you is sequentially forming "their own" outer Reality picture.

QUESTION: The Clexing and the Synthesis – are these notions have a single meaning, or are they being the two phases of the hvasslon dynamics of the “karma-fraction” Synthesis? Does the “karma-fraction” Configuration undergo the preliminary gradual clexing before the Synthesis occurrence, or it’s immediately merges with the other “karma-fraction”, which you, actually, define as “clexing”?

14.15971. Factually, my dear Астаавусонна, these are two, inertially inter-stimulating, sides of the same exact simultaneous process. As if they are "two in one". But in reality, however, this process is already primordially implemented, and we have an opportunity to analyze and compare, – within incredibly limited and subjective frames, only from the positions of these CΦYUPMM (SFUURMM)-Forms, which are synthesized by Formo-Creators of the ЛЛЮУ-BBY (LLUU-VVU)-Direction!, – of only the tiniest fraction part of the multi-level "projections" of the very narrow inertial CAF-DRF dynamics, inherent to Formo-Creators of polytypic Conscious Forms of biological analogs of HYU-BBY (NUU-VVU)-Form-Types, manifested within very specific conditions of the current group of duvuyllerrt subjective Realities. Such polytypic and multi-qualitative groups of "human" Realities ("human-like" Resomirals), duvuyllerrtly transmuting in one another throughout various parts of the global slloogrentity of Space-Time, concurrently exist in infinite multitudes.

14.15972. Therefore, speaking about the inertial aspects of inter-quality Synthesis, I imply the concurrent multi-qualitative dynamics not of just the two, or a hundred constituent Elements, but of the participating in this energy-informational exchange process, of the infinite multitude of multi-qualitative Formo-Creators and СЛЮИ-СЛЮУ (SLUI-SLUU)-Creators of the Tertiary Energy-Plasma. The inertial Synthesis simply couldn't possibly be completed without the clexing dynamics, while the very process of clexing can only be manifested within the Form-system only by means of the energy-informational exchange act (i.e. various CΦYUPMM (SFUURMM)-Forms Synthesis) between the resonant parts of the slloogrent Formo-Creators BBY(VVU)-Configurations.

14.15973. Let me remind you of what exactly I imply under this term – clexing. The term originates from the Code clex – the specific wave mark, resembling the certain type of magnetic bar-code, individually inherent to the CAF-dynamics of each group of Self-Consciousness Formo-Creators, owing to which, every multi-polarized “instance” of the inertial “unfolding” process is being qualitatively-specifically “labeled”. Additionally, the simultaneous CΦYYPMM (SFUURMM)-Forms “labeled projections” differentiation, is being implemented throughout the individual Self-Consciousness Interpretations of various Forms of the ODS. This, sequential, step-instantaneous qualitative alteration of energy-informational interrelations between Formo-Creators, is the primary cause of the inertial transformation of their CAF-DRF-dynamics in certain Synthesis Direction. The true clexing source is the eglleroliftive Impulses, which are being simultaneously generated into the global slloogrent inertial dynamics of absolutely all Synthesis Levels by hvasslons of various Pure Qualities. Due to this precise Reason, each conditional clexing “instant” is multi-polarized within structures of multitude of “individual” Interpretations of Self-Consciousness, throughout all possible Synthesis directions, possible for the current “point” of skrruullerrt system, at once.

14.15974. The multi-qualitative groups of Formo-Creators, most resonating between each other, constantly implement the slloogrent BBY(VVU)-Information within the Self-Consciousness; they structure the specific Levels of Self-Consciousness, and, due to their incomplete synthesis state, implementing groups of Formo-Creators manifest the highest Constructive Activity at that instant, while the other Form-Creator group’s participation in this process is suppressed. Out of all the slloogrentity of TES-Information, they resonantly attract the “projections” of only missing CΦYYPMM (SFUURMM)-Forms (types of energy-information interrelations) into their BBY(VVU)-Configurations, which are required for the deepening of already established synthesis conditions between them, and, thus achieving a greater resonance degree.

14.15975. All this CAF-DRF-dynamics alternately is being initiated by hvasslons of both Dominants: upon the completion of certain, - sufficient at that moment – Synthesis part in the current Direction, the hvasslon eglleroliftive Impulse of one Dominant somewhat weakens, which allows the hvasslons of the other Dominant to increase the Constructive Activity of corresponding groups of Formo-Creators within the individual space of Self-Consciousness, and attract them towards the TES-“unfolding” clexing dynamics. It is a common occurrence, when the eglleroliftive Impulse of one of the two Dominants, due to the partial absence, or the incomplete presence of the required synthesized interrelationships of Formo-Creators of the current Quality, with Formo-Creators of some of the background Qualities, for the continuation of the process of even greater deepening of already existing synthesized state, periodically concedes their active positions in the CAF-DRF-dynamics over to the eglleroliftive hvasslon Impulse of the required Quality, which I define as the Self-Consciousness submergence into the current proto-form Synthesis Direction.

14.15976. Nothing other, than the alternate inertial CAF-DRF-dynamics of various resonant groups of Formo-Creators, throughout the multi-qualitative conditions of primordially synthesized Energy-Plasma within the Self-Consciousness, occurs! Please NEVER forget this, otherwise, the dynamics of your Self-Consciousness inevitably will again become part of the Illusion, that you “individually” can create something, in your infinite inertial Existence! Not at all! We have already, primordially, created everything, and within our “current” conditions can only CHOOSE ANYTHING, out of all the infinite multitude of Forms of Self-Consciousness, which structure our mutual, AGGREGATED Creation. The primary “mechanism”, through which the current inertial Existence Illusion is being “projected” into each type of Self-Consciousness of our concurrently manifested HYV-BBY (NUU-

VVU)-Configuration, is being the universal Principle of larger or smaller degree of resonance of the generated UCF with qualitative Configuration characteristics of various Forms of Self-Consciousness Formo-Creators, already primordially manifested “overall” throughout the Space-Time. Owing to this very Principle, the Universal Focuses of Self-Consciousness of us, as ССЛОО-СС-СНАА (SSLOO-SS-SNAA)-Creators (24-12 dimensions), are multi-polarizing into the entire multitude and the synthesis diversity of multi-qualitative states of ФИММ- and CAF-dynamics of other us, but this time as СЛАА-СС-МММ (SLAA-SS-MII)-Creators (1-12 dimensions).

14.15977. So, certain types of resonant groups of Formo-Creators “decompress” only resonating BBY(VVU)-Information from the TES-flux, in a form of СФУУРММ (SFUURMM)-Forms inherent only to them; upon the processing it through the narrow-specific cycle of biochemical and psychosomatic reactions, initiated by the corresponding hormonal and ferment activity, (the result of which, frankly, is the qualitative foundation of each clexing instant of the outer Space-Time by the Self-Consciousness Formo-Creators), they “project” the specifically “marked” СФУУРММ (SFUURMM)-Forms “back” into the ODS, from which they were resonantly “scanned”. As a result of these inertial manipulations, between some of the multi-qualitative states of CAF within the НУУ-ВВУ (NUU-VVU)-Configurations of various “individual” Interpretations, the Illusion of the “current Synthesis manifestation” had formed in the Self-Consciousness of each of these “individuals” various “parts” of their НУУ-ВВУ (NUU-VVU)-Configurations. However, if I would always imply that while talking about these processes, I ALWAYS talk about an inertial Perception Illusion, and not about the real condition of already finalized process, you wouldn’t be able to understand me. Therefore, in order for me to transmit this Knowledge to you as best as I can, I allow you to self-deceit in relation to the fact, that it is you, who actually CREATE the outer Realities, in hope that you never forget about this very important peculiarity of your inertial Existence.

14.15978. Qualitatively different resonant groups of Formo-Creators, manifested within parallel scenarios at the same exact instant, in an informational space of the qualitatively somewhat different Self-Consciousness НУУ-ВВУ (NUU-VVU)-Configurations, resonantly “decompress” completely different СФУУРММ (SFUURMM)-Forms from the same slloogrent TES-Flux, upon which they clex them with corresponding psychosomatic reactions, “project” them back to the ODS. Individually “marked” in such fashion, the СФУУРММ (SFUURMM)-Forms potentially become part of the individual ODS of these “personalities”, through the Self-Consciousness of which the current resonant Form-Creator groups have been implemented (partially synthesized into the qualitatively corresponding sub-levels).

14.15979. Thus, the Formo-Creators CAF –dynamics of our Self-Consciousness, constantly, “gliding” (“re-projecting”) throughout the multi-qualitative states of already synthesized Energy-Plasma, creates within our Perception system, the subjective Representations regarding the Synthesis processes, which “we” supposedly, implement. If we review this issue from the inertial positions of Forms of Self-Consciousness, structuring all levels of 3-4-dimensional range, the Synthesis will appear as a process, which reflects the hvasslon simultaneous svilgs-dynamics of all Pure Qualities through the multi-qualitative states of synthesized Formo-Creators BBY(VVU)-Configurations. Meaning, that factually, it is all that aggregation of multi-qualitative hvasslon svilgs-dynamics, which must be initiated within the Self-Consciousness Form-Creator Configurations of the current “individual”, so that in the next instant their CAF-dynamics could manifest in a qualitatively other “spot” of resonant activity of the slloogrent Space-Time, through the Self-Consciousness of the other “individual”.

QUESTION: Can it be stated, that each “quantum shift”, implementing within the Self-Consciousness approximately 328 times per second, results in the situation, when a Synthesis act occurs within the Self-Consciousness upon each of these “quantum shifts”?

14.15980. Yes, dear Иусселддмийя! Of cause! The “quantum shifts”, which are concurrently multi-polarized throughout Self-Consciousness Formo-Creators Focuses of absolutely all possible Proto-Forms, in turn structuring various Synthesis Directions of the 3-4-dimensional wave range, are being a primary “trigger mechanism” of each of the inertial rotational Shift. The inertial dynamics of rotational Shifts is in no way connected to the fully synthesized state of Space-Time itself, the Self-Consciousness Form Configurations of which always remains unchanged in each spot of their resonant manifestation. The rotational Shifts are being implemented only by means of the multi-qualitative focus dynamics of Self-Consciousness Formo-Creators themselves, initiated by the multi-Qualitative eglleroliftive Impulses, and not anywhere “outside” of it. These Impulses are being constantly “projected” by Collective Cosmic Intellects of CCJIOO-CC-CHAA (SSLOO-SS-SNAA)-Creators (24-12 dimensions) into all possible levels of the Tertiary Energy-Plasma in a form of the slloogrent Energy-Information, structuring all TES and VEC-dynamics.

14.15981. If at least “one” elementary Synthesis act wouldn’t be implemented within the Configuration Formo-Creators of Self-Consciousness (which implies the resonant attraction into their CAF-dynamics of the energy-informational interrelations of at least one “tetrahedron”), there will be no CAF-dynamics, along with the rotational Shift, which is responsible for the realization of an Illusion of constant changeability of all Forms of Self-Consciousness, structuring the Space-Time. The “Quantum shift”, is a minimal qualitative “shift” of CAF-dynamics in the slloogrent Information, structuring the single “quantum” of Energy, according to our subjective Perceptions.

14.15982. Let me remind you, that the “tetrahedrons” aren’t being the minimal energy-informational unit. We could only approach the conditional “boundaries” of the so-called “zero dimension” in our Perceptions regarding the most inferior Synthesis Levels, however, in reality, an unimaginable energy-informational potential of various synthesis transfigurations – concurrently with all the other (from 0- to $\pm 12^{\text{th}}$ dimensions) dynamics of the Tertiary Form conditions – is being implemented even before this conditional Level of the specific manifestation within the Energy-Plasma, of the various synthesis Self-Consciousness Forms. Meaning, that if the inertial modifications occur within the conditional zero dimension, that means, that they are stipulated by certain processes, not yet accessible to our Understanding, and which are implemented by Formo-Creators throughout all possible sub- ...-sub-Aspect Levels of energy-informational interrelations.

QUESTION: In the Volume 11 of the HISSIIDIOLOGY you state, that the duvuylerrt Continuum groups of our manifestation, are structured by the Energy-Information within the 2, 5 to 4, 0 dimensional range. How can the activity of the 1st, 2nd, 3rd, and 4th Levels of the first two energy Centers manifest through the structures of our Self-Consciousness, considering the fact, that all that activity can only reveal within the lesser-dimensional range?

14.15983. Dear Cryyprypce! Within the “unfolding” TES-dynamics of our Self-Consciousness Formo-Creators, they are potentially being manifested among the mutual slloogrentity of all the other Configurations, since they are appropriated for Formo-Creators of HYV-BBY (NUU-VVU)-Forms of the lesser qualitative Continuum groups, which are manifested throughout other Temporal

Fluxes simultaneously with us, and whose manifestation range of Self-Consciousness Formo-Creators of the most primitive HYY-BBY (NUU-VVU)-Form-Types, is limited by the lesser-frequency dimensional ranges (for instance from 2, 0 - 3, 0 or 1, 5 – 2, 5 or 1, 0 – 2, 5 – what we define as “primeval men”). At that, within the current groups of “human” Continuums, the “human” HYY-BBY (NUU-VVU)-Forms of “people”, who have approached the utmost inferior limits of refocusing into the various proto-form Directions, are also revealed. Consequently, their Formo-Creators are responsible for the formation of absolutely different individual dimensional ranges, by means of the predominant activity of animalistic CΦYUPMM (SFUURMM)-Forms within the Self-Consciousness of these “people”, which are inherent for the narrow-specific instances of manifestation of all other types of animal Proto-Forms within the “human” Continuum groups.

14.15984. For instance, various combinations of Synthesis of any HYY-BBY (NUU-VVU)-Dominants with Aspects of other Qualities, form the totally different Resomiral types inside of resopasons of 2, 5 to 4, 0 dimensional range – beginning with “pyramid-octahedron” and “octahedron-hexahedron” all the way to “hexahedron-icosahedron” ones. All these multi-qualitative Proto-Form Configurations can simultaneously, bearing the higher or lower types of activity, manifest within certain types of duvuyllerrt Continuum groups: the lower-quality HYY-BBY (NUU-VVU)-Configurations can reveal within some higher-qualitative proto-form Continuums, while the lower-quality proto-form Configurations can reveal within higher-qualitative “human” Continuums. That is determined by the diffusive and duvuyllerrt Principles of the concurrent inter-quality Synthesis of all Forms of Consciousness.

14.15985. Within the higher-qualitative HYY-BBY (NUU-VVU)-Configurations, everything, which is being “decompressed”, but isn’t at all resonating with BBY(VVU)-Configurations of Self-Consciousness Formo-Creators (such as “tetrahedron”, “pyramidal” and partially “octahedron karma-fractions”), is being attracted into their synthesis dynamics only in a form of a “building material”, so that various proto-form “superstructures” can be implemented in the “hexahedron” CΦYUPMM (SFUURMM)-Forms they utilize. That allows for considerable deepening of the inter-quality Synthesis they implement, but doesn’t possess the required activity degree, which is already inherent to Formo-Creators of the current dimensional range. Don’t forget, that within the 1st and 2nd dimensional Levels, there are no stable (in our understanding of it) CΦYUPMM (SFUURMM)-Forms; hence, I define them only as “karma-fractions” – the participants of certain intermediate Synthesis processes. Since they are rather unstable, they are not able to manifest within our Self-Consciousness in a form of the inherent to them individual inertial dynamics, Levels of manifestation of which, are considerably lower than our BBY(VVU)-Creators Levels of Constructive Activity.

14.15986. Hence, everything you perceive as certain “destructive” or “subversive”, which in your subjective Perceptions can resemble the first two ИИССИИДИ-Center Levels, don’t belong to 0 – 1, 5-dimensional range, since they are actively employed in the Formo-Creators Configurations of completely different dimensional resopasons. Such BBY(VVU)-Information, which we decompress from the TES, is structured by “karma-fractions” of these dimensions, for instance, “tetrahedrons”, which is inherent to various types of animals. But! The only Formo-Creators, which are manifested within their corresponding dimensional ranges from 0 to 1, 5 resonate with them. What does it mean? There is a vast amount of various, as we think, “shreds” of some Thoughts, feelings and perceptions. The CBYUJJI-Creators of the inferior Levels, structuring the groups of our Continuums, are capable of attracting of these partially synthesized fragments of ASTRO- and MENTO-Plasma, and on the basis of their aggregated dynamics form the Perceptions, which are of much higher quality than

what is represented by these “karma-fraction” Formo-Creators, manifesting in their corresponding dimensional range.

14.15987. In the same exact fashion can ФЛАКC (FLUX)-Creators of 4th – 5th dimensional levels (collective Sub-Consciousness), manifest through the highest Self-Consciousness Levels of Forms, revealed within current Continuum groups – from 2, 5 to the 4th dimension. The primary mechanism of the energy-informational interrelation with Levels of Formo-Creators, extending beyond our Continuum groups, is the karma Channels structures. ФЛАКC (FLUX)-Creators of Sub-Consciousness Levels, resonantly detecting the slloogrent fragments of certain “hexahedron-icosahedron”, or just “icosahedron” BBY(VVU)-Information, attempt to form something, resembling their Perceptions, like with the “puzzle” pieces. Within the inferior, extended for their Configurations Levels, they form something, which of cause, doesn’t match the required veracity, clarity and realism degree, which they perceive in the higher-qualitative Levels of inherent to them, Sub-Consciousness.

14.15988. Here, within the HYY-BBY (NUU-VVU)-Form-Types of our Continuums, Formo-Creators of these higher-frequency Levels, aren’t able to manifest, since the manifestation implies the utilization of the complete energy-information potential, fully enable the dynamics of all their CФУУРММ (SFUURMM)-Forms, but this is exactly what they aren’t able to perform in our Continuums, because our habitual CФУУРММ (SFUURMM)-Forms, are being similarly “garbled” for them, the “building material” for their CФУУРММ (SFUURMM)-Forms, just as the simplest “karma-fractions” of 0-2 dimensional levels resemble the “building material” for Configurations of our BBY(VVU)-Creators. This is also a primary mechanism for the lower-frequency BBY(VVU)-Information manifestation, which isn’t capable of being reflected and revealed within our Continuums, simply because there are no necessary conditions for it (all the aggregation of duvuyllerrtly-interconnected CФУУРММ (SFUURMM)-Forms of the specific frequency range). However, it is potentially present through the “tetrahedrons” of any dimension, within any slloogrent dynamics, such as psyche and reasoning. These simplest “karma-fractions” of 1st and 2nd dimensional levels, always exist as the implementation possibilities for “something”; they exist as the “puzzle” pieces, by means of which, it is possible to sequentially refocus into the higher-frequency Levels of the Constructive Activity.

14.15989. The “hexahedron” consists of the “spheroidal” svilgs-dynamics of the three conditional “octahedrons” (or 24 “tetrahedrons”), “octahedron” consists of two “pyramids”, “pyramids” consist of the four “tetrahedrons”, remember? The “tetrahedrons” participate in the formation of dynamics of CФУУРММ (SFUURMM)-Forms of both – the 4th and the 5th dimensions, but already through the other Proto-form types of Consciousness. If they aren’t able to implement through the HYY-BBY (NUU-VVU)-Configurations of the ЛЛУУ-BBY (LLUU-VVU)-Form, they enter in the synthesis interrelations with “Constructive Cosmic conditions”, in their other proto-form states. In the ЛЛУУ-BBY (LLUU-VVU) development Direction, the process of attraction of Formo-Creators of the Quality THE-Unanimity, doesn’t occur right away; it’s rather a gradual process, beginning with sequential background activation in our Self-Consciousness of Form-Creator Configurations of “tetrahedrons”, “pyramids”, and also “octahedrons” of this Quality, when they begin the gradual resonance degree connection, on the corresponding manifestation Levels, to the process of dominant Synthesis of Aspect Formo-Creators of our two Qualities.

- That means they manifest through us indirectly?

14.15990. Yes, dear Лаармии-Ллиррг, this is an attribute of any duvuyllerrt Continuum groups – to unite in their constructive dynamics the multi-qualitative and multi-level synthesis processes, at the same time, limiting them by the conditional “highest” and the “lowest” margins, inherent separately to each Continuum group. Formo-Creators of Sub- and Super-Consciousness manifest through us indirectly in Forms, through НУУ-BBY (NUU-VVU)-Configurations of which, we are capable to marginally reveal them; reveal the synthesis dynamics of their inherent Energy-Information through our CAF-DRF activity with the assistance of certain СФУУРММ (SFUURMM)-Forms, accessible to us, attracted from the individual ODS in cooperation with ФЛАКС (FLUX)–Creators ВВУ(VVU)-Configurations. But that wouldn’t be their direct realization; this would be the realization of the “projections” of certain slloogrent part of high-frequency Formo-Creators, which are primordially manifested within the current groups of “human” Continuums. Their own direct realization is being implemented within their inherent “dodecahedron” Levels, where the most qualitative, of our “icosahedron” СФУУРММ (SFUURMM)-Forms, duvuyllerrtly interconnected with new, not yet accessible to our Perception Formo-Creators, ВВУ(VVU)-Information, which helps them to clex the outer ФЛАКС (FLUX)-reality by already synthesized СФУУРММ (SFUURMM)-Forms within the 4th – 5th dimensional range.

14.15991. The high-frequency СФУУРММ (SFUURMM)-Forms of Formo-Creators of our Sub-Consciousness aren’t able to manifest in our Self-Consciousness in full, because they are structured by much more versatile and multi-Qualitative interrelations, where Formo-Creators of other Proto-Forms are actively employed, the Existence Principles and synthesis construction of which, are completely unknown to us at this point. And therefore the Energy-Information, which in reality is inherent for the svilgs-dynamics of the high-frequency Formo-Creators, which in turn are manifested through the ФЛАКС (FLUX)-Creators Form-Types, we simply aren’t able to reflect by any type of СФУУРММ (SFUURMM)-Forms, structuring our “hexahedron” subjective Realities, due to the fact, that large “chunks” of the high-frequency synthesized dynamics of Energy-Plasma are absent within our constructive creation. That synthesized Energy-Plasma dynamics is structuring various types of Sub-Consciousness of the multitude of other Proto-Forms, Formo-Creators svilgs-dynamics of which can be easily reflected the НУУ-BBY (NUU-VVU)-Configurations of our ФЛАКС (FLUX) Self-Consciousness Forms. Within the more primitive Proto-Form Self-Consciousness Forms, structuring our groups of “human” Continuums, the high-frequency dynamics of ФЛАКС (FLUX) СФУУРММ (SFUURMM)-Forms, simply isn’t able to reveal by any Form-Imageries, because within the “hexahedron” structures of Energy-Plasma, which are quantized by the irkkulligren Formo-Creators, there are no vibration-resonant conditions for the formation of the inherent manifestation Forms. All the Proto-Forms, still present within our Continuums, within our individual Realities, are being certain “crowd scenes”, which manifests on the background of the mutual prerogativity Forms, exclusively constructed by our “human” creation.

14.15992. I must remind you once again that the dimension type in each Continuum is different. Please keep that in mind. The “human” Continuums have one kind of dimension type, while the Continuums and Realities of all various Proto-Forms – the other. On the basis of the Information, expounded within this section, we can make a supplement to the notion of “dimension”, and define it as an intermediate result of the synthesis dynamics between Formo-Creators Configurations of multi-qualitative “karma-fractions”. “Karma-fractions”, inherent to the other Proto-Forms (rather, these of their Form-Types, which are manifested within our “human” subjective Realities and Continuums), are typical only for СВУУЛЛ-BBY (SVUULL-VVU)-Creators of the most inferior Levels of our Self-Consciousness: we can include them in the slloogrent dynamics of the Stereo-Form only on the

Level of the creative realization of Formo-Creators, resonating with the animalistic karma Channels of CBYUJI-BBY (SVUULL-VVU)-Conglomerates, i.e. on the levels of our inferior Perceptions regarding ourselves and the outer Reality.

QUESTION: Oris, can your own Self-Consciousness be considered as a role model of the undistorted Perceptions in relation to the outer Reality?

14.15993. No, dear Буллозамоонд. There can simply be no undistorted manifestations throughout the outer Reality. It is possible, however, to define them as more qualitative, and sometimes – much more qualitative, as yours, perhaps. But the HYY-BBY (NUU-VVU)-Form Self-Consciousness Types, where I am currently in-focusing, aren't at all an exception, since the CAF-DRF-dynamics of these HYY-BBY (NUU-VVU)-Configuration Forms-Creators, simply resembles the quality degree of certain level of the Constructive Activity, in which very soon, millions of you will also refocus, due to the introduction of high-frequency CΦYYPMM (SFUURMM)-Forms of the IISSIIDIOLOGY into the dynamics of your Self-Consciousness Formo-Creators. It is simply impossible to preserve the absolute integrity and the slloogrent veracity of all universal Perceptions of this Knowledge, upon its subjective transmission over to you.

14.15994. Having the ability of the real simultaneous experiencing of myself throughout much more qualitative Levels of manifestation of slloogrent Sub-Consciousness, and even Super-Consciousness, without any way of a more qualitative Self-expression through the CΦYYPMM (SFUURMM)-Forms, inherent to you, very often I am simply forced to make up something similar, or very closely “resembling” the Truth, and “adjust” it under the existing thought-forms, expressions and Perceptions; although we all understand full well, that these “made up” comparisons only somewhat actually reflect that Actuality, within which we are all manifested beyond the focusing limits of dynamics of biological HYY-BBY (NUU-VVU)-analogs of JJIYY-BBY (LLUU-VVU). Again and again, in deep Meditations I am “self-projecting” into Levels of my own Sub- and Super-Consciousness, while I commensurate “THAT” and “THIS”, and form the more sensible Form-Thoughts of the ФЛАКC (FLUX) Energy-Information, “return back here”, and... again I face the same impossible task!

14.15995. This situation can be roughly compared with an empty swimming pool, while my objective as an instructor – is to teach you how to swim. I jump in this pool, wag my hands, but I can't swim: there is no water in the pool, - there are no conditions for the swimming lesson exist. Yes, I know perfectly how to swim, along with all the processes, associated with swimming – everything; but there is no water – there are no CΦYYPMM (SFUURMM)-Forms present – which means, that there are no conditions established for this “swimming” lesson to occur. Perhaps, the only thing I can do in this situation is diligently and patiently fill the outer reality by my higher-frequency Perceptions, variously simulate them through the multitude of “people” Self-Consciousness, i.e. explain to them what is the “water”, and how to move and swim in it. Many of you gradually become accustomed to the swimmer's image, and more or less perceive the subjective Reality as such “filled with water pool”, that the real water begins to slowly but surely materialize in your “pool”, even though the water trickles are weak and often parched in the beginning. However, gradually the water begins to infiltrate into the outer Reality through the dynamics of much more qualitative CΦYYPMM (SFUURMM)-Forms of your Self- and Sub-Consciousness, and the larger amount of “people”, studying the IISSIIDIOLOGY, intuitively understand what is “water”, and that is actually exists! Thus, this will occur until about 150-200 million of you will realize the presence of this “water” in

the “pool”. As soon as this happens, the “pool” will immediately be filled – you will refocus into these Configurations, where the current circumstances are real.

14.15996. Any combinations of the outer reality – are the inertially manifesting “projection” reflections of CΦYYPMM (SFUURMM)-Forms of your Self-Consciousness Formo-Creators. That means that your Formo-Creators, while focusing onto the realizations within the lower-frequency synthesis processes, simply aren’t able to steadily fixate their Focuses within these Levels, as me. Remove your susceptibility, arrogance, insolence, envy, jealousy and other connections to the lower-frequency activity, and you will immediately feel such a powerful increase of your own capacities and capabilities, that all your previous doubts regarding your Form incapacity in compassion with mine, will vanish. It’s just that Levels of the steady dynamics of the Focus of Constructive Activity of Formo-Creators of Self-Consciousness of my HYV-BBY (NUU-VVU)-Configurations, are bit different than of the majority of you. But this creative state of Self-Consciousness isn’t being an exception; it is inherent not only to me, but also to a multitude of other “people”, who will be able to evolve and develop fast, and transform the outer Reality into much more harmonious variations of possible ETERNAL Existence, once they profoundly cognize the IISSIIDIOLOGY and, literally, “saturate” their Self-Consciousness by the corresponding IISSIIDIOLOGICAL ΦΛAKC (FLUX)-CΦYYPMM (SFUURMM)-Forms.

14.15997. Individual abilities depend on the Direction of the creation field, in which every one of you is being realized throughout the chosen spheres of your interests and preferences, as a Form-Creator of Sub-Consciousness. For instance, I am entirely devoted to the most reliable transmission of the IISSIIDIOLOGY to “people”. Some other “people”, who have also predominantly departed from certain lower-frequency activity, are realizing in variable Synthesis Directions; and depending on the degree of compatibility or dissension of CΦYYPMM (SFUURMM)-Forms of their Direction Path in relation to the superior CΦYYPMM (SFUURMM)-Forms of “human” Direction, they will also develop abilities, similar to mine, or other types of abilities, which are very subjectively defined by you as an “extrasensory”.

QUESTION: Oris, I am sorry, but I don’t really understand your information in relation to the lower dimensional ranges. In the “Fundamentals”, when you have described the first three synthesis Levels of APTJIAAMYHH (ARGLLAAMUNI), you have also mentioned the manifestation quality of Formo-Creators of these Levels through the Self-Consciousness psyche in a form of various types of aggression and violence, and you have also said that the CΦYYPMM (SFUURMM)-Forms of these Levels variously manifest through the psyche of all “people”. Hence, it is quite difficult to depart the perceptions, regarding the manifestation of these “pyramids” and “tetrahedrons” within our Self-Consciousness.

14.15998. Well, firstly, I am not saying, dear Аксталаккаларсс, that they are NOT being manifested through our Self-Consciousness, especially, if CBYUJJI-BBY (SVUULL-VVU)-conglomerates constructive activity is still present and can somehow reveal within the dynamics of its Formo-Creators. Secondly, if we look at this issue from the prospective of a larger veracity degree, and extrapolate the psychisms of 0-2-dimension Formo-Creators into your psyche, you will clearly comprehend that there isn’t any aggression present in their synthesis dynamics at all. They aren’t aggressors or vandals, bloodthirsty infanticides or sadists. Such are the variable Conscious Forms, so primitively and forthrightly realizing through their Configurations. It is normal for them to destruct

any type of Form (whether it is “their own” or “someone else’s” – regardless!), or annihilate the results of any Creation. It’s completely normal and obvious process, and within their motivational model, which is also based on the resonant Principle, any type of destruction of Configurations of various “karma-fractions”, is being an integral part of their own Constructive realization, which in turn consists of the search of the most resonating Configurations.

14.15999. And if the required “tetrahedron” and “pyramidal” Configurations are structuring more complex Forms of Self-Consciousness or their CΦYYPMM (SFUURMM)-Forms, the only way to “acquire “ them is to destruct the whole Form of Self-Consciousness entirely. This is similar to how the small children behave, when in order to derive a certain item from the complex device, they simply break the device itself without hesitation, since that certain item in it interests them much more than a complete device as a whole. This is due to the one very simple (and, as I suppose – valid and justifying all their destruction actions) reason – the energy-informational interrelations, structuring them, are extremely unstable. And if they wouldn’t be able to self-organize into the more stable Configurations, not a single Form of Consciousness, structuring the superior ranges of Energy-Plasma, would be able to synthesize and manifest.

14.16000. Hence, the degree of their proto-form egocentrism through the corresponding Forms of Self-Consciousness is manifested so powerfully and vividly, that only their own Creation and Desires they perceive as valid, implementing them all from a very simplified point of view: I need it, and I must have it. And believe me that the CBYVJLI-BBY (SVUULL-VVU)-Creators don’t feel any aggression towards any one, since such their all-destruction reactions – is the very Sense of their synthesizing realizations, this is all their logic and perception; by performing all that destruction (the reconstruction) of the least stable (i.e. tensor) in their manifestation (in relation to other Formo-Creators) “areas” of Configuration of partially synthesized “karma-fractions”, they implement the very important function in the sequential Synthesis of more qualitative Forms of Self-Consciousness. We, from the positions of our subjectively-limited Perceptions regarding “ourselves” and the outer reality, interpret their actions as aggression, violence, vandalism or cruelty; that’s because our Formo-Creators, possessing the extensive synthesis Experience of such realizations (through the Formo-Creators actions of lesser-qualitative HYV-BBY (NUU-VVU)-Configurations), know full well about the much more qualitative solutions.

14.16001. If the simplest “karma-fractions”, during the realization of these inherent to them CΦYYPMM (SFUURMM)-Forms, would resonate with Formo-Creators Configurations directly, and not through the much higher-qualitative brain Formo-Creators, then certain Forms of Self-Consciousness, bearing the predominant activity of egocentric realizations over the sense of self-preservation, which is generated by the Formo-Creators of more qualitative Levels, would be able to manifest in our Continuum groups. Such Self-Consciousness Forms would self-destruct fast, since they wouldn’t be able to preserve even their own biological body – they would perceive it as a realization target for their momentary destructive desire. Therefore, in their own Realities, Formo-Creators of 0-2-dimensional levels are often manifested by means of much lesser “destructible” Forms of Consciousness, for instance – minerals.

14.16002. Please tell me – do you know any such “individual”, who only destructs everything, without creating something? Correct - this is simply impossible. Any such “individual”, within the structure of their Self-Consciousness, utilizes certain Configuration parts of these lower-frequency “karma-fractions”, and, superimposing the already synthesized Perceptions (more stable CΦYYP-

MM (SFUURMM)-Forms), implements the ambition, for instance. The ambition creates the desire of winning at all costs, even if that implies the destruction of someone else; but the mere destruction isn't being the sole objective here. The primary objective is to create something, which is more coherent with the destructor's ambitions. The ambition – is an attribute of lower mind (constructive manifestations of ЛУУДМИИ-СВУУ (LUUDMII-SVUU)-Formo-Creators), which correlates to the 3rd Level of АРГЛЛААМУНИ (ARGLLAAMUNI) and ИНГЛИМИЛИССА (INGLIMILISSA) – the poorly-rational activity.

14.16003. The signs of higher mind commence to manifest through the Formo-Creators Configurations, resonating to СФУУРММ (SFUURMM)-Forms of karmic Channels of the 4th Level of АРГЛЛААМУНИ and ИНГЛИМИЛИССА (INGLIMILISSA), through which such qualities as ambition, jealousy, envy, and other psycho-egocentric tendencies, can manifest in full within Form-systems. Thus, the lower-frequency ВВУ(ВВУ)-Information of Formo-Creators of 0-2-dimesional range, “intersperses” into the slloogrent dynamics of form-creation processes of “karma-fractional” Formo-Creators of higher Levels, forcing the Self-Consciousness towards the indirect realization of the 1-2-dimensional range dynamics by means of the Desire methods realization changes. Since the “karma-fraction” СВУУЛЛ-ВВУ (SVUULL-VVU)-Configurations are concurrently being the structural Elements of more higher-frequency СФУУРММ (SFUURMM)-Forms, are potentially always existing as various background “superstructures” in their synthesis dynamics, any instances of incomplete synthesis within more qualitative Levels of the slloogrent dynamics of ЛУУДМИИ-СВУУ (LUUDMII-SVUU)-Formo-Creators, become the instances of the simultaneous possibility for lesser-frequency “karma-fraction” Formo-Creators.

14.16004. Please keep in mind that You, in relation to Forms of Your concurrent manifestation throughout Space-Time, as well as the multitypeness of constructive realization of Consciousness of these Forms – are slloogrent, and any Formo-Creators dynamics is also slloogrent, i.e. “filtering out” of the outer reality only what is the most necessary for its farther constructive development. The outer reality – is the flux of ВВУ(ВВУ)-Information of the global development scenario of the current duvuyllerrt Continuum groups, where each Form-Creator, regardless of the manifestation Level of its Configuration, “filters out” only the necessary information, which would assist in the implementation of this realization.

QUESTION: Ok, following this logic, one can conclude, that the ФЛАКС (FLUX) Sub-Consciousness Forms must also “suffer” from the indirect aggression manifestation trough their inherent analogs of our psyche. The same “tetrahedrons” structure the СФУУРММ (SFUURMM)–Forms of higher-dimensional ranges, for instance, 4th and the 5th, which means that incompletely-synthesized tensions will remain, correct?

14.16005. – Not at all, dear Лииуллсс! Flatly not at all! All tensions always remain within all “karma-fractions”, all the way to Configurations of Karma-Forms of the 12th dimension; they only being increased qualitatively: the СФУУРММ (SFUURMM)-Forms, which we subjectively define as high-frequency, always possess the tensions for the lesser-qualitative СФУУРММ (SFUURMM)-Forms; in the next, more qualitative range, there will be even more high-frequency СФУУРММ (SFUURMM)-Forms, which will become the tension source for them, and so on. As the Formo-Creators reach the new Self-Consciousness Levels, the older СФУУРММ (SFUURMM)-Forms completely synthesize with “tetrahedrons” and “pyramids” of other Quality Aspects, and vanish

from their Constrictive Activity; but in their place, another СФУУРММ (SFUURMM)-Forms appear, which are more qualitative, but not in any way less active then the previous ones!

14.16006. Let me remind you of what a “tetrahedron” is. The “tetrahedron” – is an extremely unstable Configuration of certain Information, synthesizing into more complex and balanced states of its slloogrentity with the assistance of the Energy-Potential of the eglleroliftive Impulse, primordially programmed (individually inherent) into the svilgs-dynamics of svilgson Formo-Creators of every Pure Quality. The Information itself carries within it no aggression, no destruction, nothing of this kind. But it is being perceived that way, because these simplest “karma-fractions” haven’t yet become the additional part of a more qualitative svilgs-dynamics of your Formo-Creators, and therefore you treat them as foreign “elements”, with suspicion and skepticism. Provided for the high-frequency Energy-Potential of Formo-Creators Configurations of ФЛАКC (FLUX) Realities, the manifestation slloogrentity of the same Information simply transforms (modifies, transfigures) into ФЛАКC (FLUX)-Forms, inherent to their manifestation Levels; and if for some reason it discords with them, it’s not being destroyed or annihilated, instead it’s being resonantly re-allocated (differentiated) throughout all the multitude of other Formo-Creators Configurations, for which these manifestation Forms of the Energy-Information play the positive and creative role.

14.16007. The “tetrahedron” Information discords with our perceptions, since it creates tensions within the dynamics of our Self-Consciousness with certain Aspects, the carriers of which in this Continuum groups are being the ЛЛУУ-ВВУ (LLUU-VVU)-Forms, and upon the “unformed” manifestation circumstances this Information isn’t able to enter into any type of interrelation with your ВВУ(VVU)-Creators Configurations. But it has created tensions – the Directions, where the harmonizing svilgs-sphering should occur, elevating the quality of the implemented Synthesis onto the new Comprehension and successful interaction Levels between various multi-Qualitative Formo-Creators. The Information itself is never “bad” or “negative”, as you currently see it; in other combinations, in other Synthesis schemas, inherent to other Proto-Forms or more balanced Levels of our Self-Consciousness (Sub-Consciousness), synthesized with Formo-Creators Configurations of current Proto-Forms, this Information is being eglleroliftive and constructive.

14.16008. For instance, we take a certain Quality, not really compatible with Aspects of THE-Will-Intellect in the bilateral Synthesis processes. The mere fact of incompatibility in the beginning provokes the instances of misunderstanding of Formo-Creators: “What is this? This is garbage! This is – nothing, emptiness!” Any instant of incomprehension is a sign of denial and rejection of something, with which you can’t really associate yourself yet. Accordingly, the Formo-Creators don’t perceive the Aspects and sub-Aspects of the incompatible Qualities as something, which can be effectively utilized for the self-realization. If there is no realization opportunity visible, this something automatically is being rejected and denied. However, that in turn automatically creates tensions, negativity and interconnection unwillingness.

14.16009. The dissonance (negativity) in relation to someone or something arises only because the current type of Energy-Information belongs to other Proto-Forms Formo-Creators of different Synthesis schema. However, when sub-Aspects of another Quality (compatible one) begin to draw into the dynamics of our Self-Consciousness along with its Aspects, which results in an inter-quality Synthesis; then follows the succession of sequential resonant svilgs-sphering instances, the more “compatible” conditions are created within Self-Consciousness Formo-Creators Configurations, and the Quality, which in the beginning was perceived negatively by Formo-Creators, is viewed positively:

“Oh! I can utilize this Information like THAT!” Why this happens? Because the Self-Consciousness Configuration has enriched by the multitude of other energy-informational interrelations, meaning that the Formo-Creators, which possess the required experience have joined the group, and they know the new information, which previously seemed unclear, full well. At that point the new Information, structured by Formo-Creators of same “tetrahedrons” and “pyramids” ceased to be identified with aggression and negativity. Previously it was perceived that way, since there was a small amount of Formo-Creators, responsible for the organization of these interrelations, and also due to the ignorance – shortage of more genuine Energy-Information within the Self-Consciousness Configuration.

14.16010. There are more energy-informationally compatible and less energy-informationally compatible groups of “karma-fraction” Formo-Creators, beginning from the “tetrahedron” levels. First, the Configurations of compatible “tetrahedrons” enter into the resonant interrelations with each other, which consist of the different structuring constituent Information elements, but nevertheless, it’s being perceived interactively by multi-Qualitative “peaks” Formo-Creators. And even though it is quite difficult for you to draw a certain parallel here, because within the range of the sub vibrational processes the analog systems of Perception work differently, but some “analogs” of the mutual understanding and continuation of a mutual collaboration conditions, are also inherent for Formo-Creators of this Level.

QUESTION: Oris, you have indicated that there are groups of “human” Continuums, which are manifested within 2, 5 – 3, 0 dimensional levels. I suppose that this is typical example of the fact, that the predominant Self-Consciousness Creative Activity of HYY-BBY (NUU-VVU)-Forms, manifested in that range is positioned within the +3, 0 dimensional ranges, where the inner-quality Synthesis activity of the finalizing phases, including the beginning phases of the inter-quality Synthesis is high. The Self-Conscious HYY-BBY (NUU-VVU)-Forms, manifested within such Continuums, are structured by “octahedron-hexahedron karma-fractions”, the major part of which, in accordance with JITYY-BBY (LLUU-VVU) Synthesis schema, belongs to two types of resonant zones: the first has evidently dominating synthesis processes of Aspect Formo-Creators of THE-Love-Wisdom Quality, while the second possesses the obvious dominance of THE-Will-Intellect Formo-Creators. Could the lower-frequency dynamics of Self-Consciousness Formo-Creators of HYY-BBY (NUU-VVU)-Forms actually be the cause of influence of weakly-synthesized narrow-range Formo-Creators Configurations of “tetrahedrons” and “pyramids” of the second Dominant, at the time of its juncture to “hexahedrons” of the first Dominant?

14.16011. No, dear Аллксзаусста, it’s not so. The inter-quality Synthesis between the two Dominants is implemented through the more or less equal inner-qualitatively synthesized “karma-fractions” of both Qualities. The specific, actively resonating with each other, “hexahedron karma-fractional parts” of THE-Love-Wisdom Quality Formo-Creators, are being attracted towards the specific “hexahedron karma-fractional parts” of THE Will-Intellect Formo-Creators, as a result of which, the certain redeployment of Formo-Creators inside of the newly formed “hexahedron karma-fraction”, within the Configuration of which the mostly dissonant “tetrahedrons” and “pyramids” of background Qualities Formo-Creators immediately “brake out” of the mutual Synthesis dynamics, (instantly being attracted towards the more resonant with them “hexahedrons”), while more compatible “karma-fractions” are being attracted in their place. Therefore within the 3-4-dimensional range, the

inter-quality Synthesis is implemented only between the unstable Configuration parts of already formed “hexahedrons”, with a subsequent background alteration of Aspects of the more compatible Qualities (which were formed first) onto the Aspects of lesser compatible Qualities (because of the greater participation of multi-qualitative Formo-Creators in the Synthesis process).

14.16012. Within the inferior sub-levels of 3-4-dimensional ranges, in the already synthesized “hexahedron” CAF-dynamics of Formo-Creators of the two “human” Dominants, in the background mode (not destroying the already formed “hexahedrons”, but instead creating on their basis the additional ones, mostly resonating with one another, “karma-fractions”), the “tetrahedron” CAF-dynamics of Formo-Creators of all the other ten Qualities, powerfully “engages”, which greatly weakens the influence of eggeroliftive Impulses of the ЛЛУУ-BBY (LLUU-VVU)-Direction hvasslons, since many types of the energy-informational interconnections with corresponding Elements are missing, preventing the implementation of the inter-quality Synthesis with НУУ-BBY (NUU-VVU) Configurations Formo-Creators.

14.16013. Hence, the low-frequency proto-form activity is quite common for the Creative dynamics of НУУ-BBY (NUU-VVU)-Form-Types, manifested within these Levels, factually distinguishing “people” from animals only in terms of the Form and not the Levels of Self-Consciousness: all their СФУУРММ (SFUURMM)-Forms are synthesized with a goal of a maximum survivability, oriented towards the rough realization of an instinctive behavior, acquiring of the larger living space and resources, which aid in the implementation of all this – power, wealth and fame, the presence of which also powerfully feeds the self-significance Illusion within their Self-Consciousness. Therefore, it is quite common to observe in our “current” groups of “human” Continuums, avid and unscrupulous, mendacious and double-faced, merciless and vicious, cynical and harsh “individuals”, positioned at the “helm” of various structures of power. Their first two pairs of inferior Levels of ИИССИИ-ДИ-Centers are weakly developed, and they cling to the “high” society at any cost (usually at the others expense).

14.16014. In the middle-frequency Levels of the current range, upon the increasing synthesis degree of НУУ-BBY (NUU-VVU)-Configuration Formo-Creators with “tetrahedron” proto-form dynamics (possessing its inherent Experience), the “hexahedron” dynamics of their Focuses is being sequentially densely “accreted” by various “pyramidal” interrelations with Formo-Creators of already synthesized “tetrahedrons”, which can differ tremendously between one another in terms of the hvasslon svilgs-dynamics, and by connecting with “hexahedron” НУУ-BBY (NUU-VVU)-Configurations Formo-Creators they form the variable types of “human” Resomirals in the slloogrentity of Space-Time. The great deal of energy-information synthesis with Aspects of both Dominants allows the Formo-Creators of НУУ-BBY (NUU-VVU) Self-Consciousness of the middle-frequency Levels of removing of their constructive activity limitations in terms of the roughly-egocentric Interests, as well as the engaging into the realization through the elementary altruistic manifestations and intellectual activity. More often this is being the circumstantial consequences of the synthesis dynamics of hvasslons of the two “human” Dominants (since the characteristic signs of the ЛЛУУ-BBY (LLUU-VVU) Direction in these Synthesis Levels aren’t yet clearly defined), and not the specific manifestations, inherent to Aspect Formo-Creators of certain already synthesized background Qualities within the НУУ-BBY (NUU-VVU)-Configuration.

QUESTION: Oris, I have an additional question: what is the difference between Resomirals, and how exactly implemented the energy-informational interaction within them?

14.16015. Dear Галлфиллиросс, the manifestation dynamics of Configurations of Self-Consciousness Forms within Resomirals, which represents the structural part of the mutual dynamics of Form-Systems, differs from the dynamics of the last by the fact that it doesn't depend on the "individual" affiliation to a certain race, nation, country or nationality (plus, it doesn't even depend on the Proto-Form affiliation within the Resomirals of the highest dimensional Levels), but only takes into account the resonant peculiarities of Self-Consciousness Configurations, without the presence of which none of Self-Consciousness Forms would be able to become the dynamics part of the current Resomiral. To some degree, the Resomiral organization principles of the Constructive Activity of Formo-Creators resemble the formation principles within various Collective Consciousness types of such, already known to you, structure fractals as Egregors. The only difference is – in the Resomirals the Formo-Creators of Self-Consciousness affiliation to various Proto-Forms, factually, has no significance, unless the current Configuration powerfully resonates with a certain part of all the other Configurations of current Resomiral. That is why all the "human" Resomirals, which were formed within the "boundary" (for HYY-BBY (NUU-VVU)-Configurations) proto-form Direction resopasons, are represented by Formo-Creators Configurations of not only the "human" types of Self-Consciousness, but also these, which have a high resonance effect with them.

14.16016. At that, the "hexahedron" dynamics of all the multitude of "human" Resomirals, which are inside of themselves, are differentiated onto the multitude of various types (races, nations, cultures and religions – i.e. sub-sub-scenario and sub-scenario types of inter-quality Synthesis of the two ЛЛЙУ-ВВУ (LLUU-VVU)-Dominants), coupled with the "hexahedron" dynamics of the infinite multitude of animalistic and vegetative Resomirals, - are completely different Spheres of the realization creation, and because of the principle difference in Synthesis schemas of various Dominant pairs, each one of them has their own energy-informational structure. Again – not all "hexahedrons" are the same.

14.16017. For instance, some of the "human hexahedron" Resomirals have a tendency towards the resonant attraction of already stable synthesized "octahedron" Forms to their dynamics. The "inter-hexahedron" dynamics between "cubes" (which, as I am sure you recall, represent the various types of the "spheroidicity" in their svilgs-dynamics, and not simply "cubes"!), is implemented due to the fact of the presence of various degree of resonant-quality-differential energy-information interconnections between their Form-Creator Configurations, "octahedron", for instance, which in turn allows the CAF-dynamics of Formo-Creators themselves quite easily "re-focus" into the "icosahedron" Configurations in the boundary resopasons with the "dodecahedron" dynamics. However, this becomes evident in "hexahedrons" only upon the highest degree of an inter-quality Synthesis for 3-4-dimensional range.

14.16018. The Formo-Creators of the least qualitative "human" Resomirals, which are also constructed by the "hexahedron" dynamics, have an interconnection tendency only on the "tetrahedron" Levels. Upon the deepening of the inner-aspect and inter-aspect Synthesis as well as the finalizing stage of an inter-quality Synthesis within their own sub-level, the "tetrahedron" Formo-Creators, resonantly "included" into the dynamics of certain "hexahedrons", easily merge into "pyramids" (sometimes only formed "pyramids" can also be utilized), while it is impossible for Formo-Creators of other Resomirals. Hence, this will be the other animal type Resomirals, and for various reasons these

Proto-Forms Self-Consciousness Formo-Creators wouldn't be able to interconnect with each other in this fashion.

14.16019. For instance, birds and lions are manifested in Continuums of the “hexahedron” dynamics. However, the energy-informational interrelations, providing the CAF-dynamics of Formo-Creators of these Proto-Forms with Formo-Creators of other types of Self-Consciousness are quite different from one another and are very specific. Moreover, if “tetrahedron” dynamics is “embedded” into the “inter-hexahedron” interrelations, it can have various svilgs characteristics, reflecting the narrow-specific attributes of certain (out of the infinite number of them) sub-Aspects or Aspects of a particular Quality. And if the “hexahedron” svilgs-dynamics isn't quite compatible in that respect, that means that hvasslons aren't able to fully resonantly interact with each other in these Formo-Creators conditions. In order for that to take place the Formo-Creators must undertake some intermediate Synthesis steps, perhaps with Aspects of some other Qualities. It happens very often when hvasslons of the Self-Consciousness Formo-Creators of two different Proto-Forms within the higher interaction Levels, aren't able to enter into a mutual resonance with one another only because the interactivity on the lower Levels isn't yet completely realized (synthesized) by their Formo-Creators.

14.16020. If the synthesis (realizational) interactivity between Formo-Creators BBY(VVU)-Configurations of various Proto-Forms are absent, or aren't yet activated within their Self-Consciousness Forms, then certain animal type wouldn't be able to adequately (according to their own Perceptions) perceive the realization dynamics of other animal (or “human”) type; or a “human” wouldn't be able to understand the exact meaning of other animals desires and realizations. That is due to the fact that hvasslons of various types of Self-Consciousness, organizing the synthesis dynamics of the two Dominants, form completely different CФУУРММ (SFUURMM)-Forms, often bearing the directly inverse, (incompatible) meaning in the same exact situations, even within the same qualitative sub-levels.

14.16021. It is the compatibility degree of Quality Aspects, which they represent within the current Self-Consciousness Forms through the svilgs-dynamics of the synthesizing Formo-Creators, which determines the hvasslon dynamics. For instance, the hvasslons of THE Love-Wisdom, THE Will-Intellect Qualities belong to the highest compatibility group (most compatible), and therefore pretty easily enter into the inter-quality energy-informational interrelations with one another, beginning from the 3, 0 to 3, 1dimensional sub-ranges, forming the mutual (although still quite unstable) “hexahedron karma-fractions”. The same can be said regarding hvasslons of such Qualities, as: THE Stability and THE Emptiness, THE Integrity and THE Aspiration, THE Unanimity and THE Entity, THE Initialization and THE Mobility, THE Knowledge and THE Fullness.

14.16022. However, there are such hvasslons, which can enter into the synthesis interrelations with one another only upon the partially synthesized (within the current sub-level) “hexahedron” dynamics of Formo-Creators of other Qualities. Therefore the inter-quality Synthesis between them begins not from the most inferior sub-levels of 3-4 dimensional ranges, but rather from 1-2 Levels of АИГЛ-ЛИЛЛИАА-ОРЛААКТОР (ORLAAKTOR) (for instance, THE-Love-THE Wisdom and THE-Stability, THE-Will-Intellect and THE-Integrity, THE-Emptiness and THE-Aspiration, THE-Unanimity and THE-Initialization, THE-Entity and THE-Knowledge, THE-Mobility and THE-Fullness);

- Or from the 2-3rd Levels (for instance, THE-Unanimity and THE-Love-Wisdom, THE-Entity and THE-Will-Intellect, THE-Initialization and THE-Stability, THE-Mobility and THE-Emptiness, THE-Knowledge and THE-Integrity, THE-Fullness and THE-Aspiration);
- Or only beginning from 3-4th Levels (for instance, THE-Love-Wisdom and THE-Fullness, THE-Will-Intellect and THE-Knowledge, THE-Stability and THE-Mobility, THE-Emptiness and THE-Initialization, THE-Integrity and THE-Entity, THE-Aspiration and THE-Unanimity).

14.16023. The Aspects of Formo-Creators of each Pure Quality can only come in synthesis interrelation with other hvasslons Formo-Creators under the certain conditions. Meaning that upon the more profound inter-quality Synthesis with Formo-Creators of certain, resonantly compatible Configurations they gradually enter into certain background interrelationships (on the sub-Aspect levels) with Formo-Creators of less compatible Qualities, and upon the gradual deepening into their svilgs-dynamics, sequentially annihilate the primordially existing tensions and overcome the dissonant distances, “separating” them. Only after that their Configurations are able to manifest in the specific situations, providing all possible opportunities for the implementation of the inter-quality Synthesis.

14.16024. Have you ever thought about why the hvasslons Formo-Creators Configurations (and, all svilgs in general) of certain Pure Qualities are more compatible with one another, while the Configurations of other svilgs are less compatible with one another? Ok, let me remind you that the process of the inertial differentiation of the slloogrent flux of the Energy-Information (please recall the example with the crossing beams of the twelve multicolor flashlights) has certain resonant zones, which are formed by the specific Energy-Information, predominantly inherent for certain types of inter-quality intercrossing, and not so much for other types. However this effect is only inherent for the most contrasting (“external”) parts, located in the nearest proximity to the illusory (subjectively perceived only by us, as the “source” of multi-qualitative types of radiation) set of “switched on flashlights” – conditionally not yet synthesized state of twelve OO-YY-Entitys (which, of cause, isn’t possible in reality!).

14.16025. Upon the more gradual deepening into the mutual inter-radial multi-qualitative dynamics (i.e. the CAF-DRF-dynamics frequency increase in Levels of the inertially synthesized Energy-Plasma), the illusory boundaries of the complex (mixed with others) manifestation of each of the “variegated flashlights” progressively obliterate; moreover, beginning from certain Levels of their revealing it is impossible to differentiate any individual color characteristics, which were previously inherent to each of these twelve “flashlights”. The same is true about the conditional degrees of the inter-quality “compatibility” or “incompatibility”: within the most inferior, low-frequency Levels of the synthesis svilgs-dynamics manifestation of multi-Qualitative Formo-Creators, this phenomenon is more vividly pronounced, while within the higher-frequency Levels it is expressed in a minor decreasing form. This is because the dissonant distances (vividly expressed peculiarities of each of the Pure Qualities) between the different “parts” of the slloogrent Configurations of various Forms of Self-Consciousness, inertially synthesized by multi-Qualitative Formo-Creators, are being constantly balanced and reduced, which enables them to clex the outer Space-Time with more universal CΦΥΥPMM (SFUURMM)-Forms, structured by the realization dynamics, inherent to the multitude of Proto-Forms, representing various types of Collective Intellects. Beginning from the 9-10th synthesized dimensional Levels, any qualitative individual svilgson characteristics of various Qualities practically disappear.

14.16026. The remarkable in its evolutionary Sense, attribute of the diffusive *duvuyllerit slloogrentity* of Formo-Creators Configurations of all Proto-Forms, is being the cause of the fact, that upon the gradual drastic deepening of CAF-DRF-dynamics *hvasslons* Formo-Creators of the “human” Forms of Self-Consciousness into the *svilgs*-dynamics of Formo-Creators of other proto-form Directions, the “human” types of “hexahedron” *Resomirals* are gradually being transformed into “hexahedron” *Resomirals* of some of the animal Proto-Forms. Why is that? Because the *hvasslon svilgs*-dynamics of the certain “human” Dominants begins the more intensive and stable inter-merging and interchanging by qualitatively other *hvasslon svilgs*-dynamics of one of the Dominants of Proto-Form Self-Consciousness of the current proto-form Direction.

14.16027. Every single one of such “shifts” (refocusingings) is possible because the Formo-Creators of the current “karma-fraction” groups, structuring the current *HYU-BBY (NUU-VVU)*-Configuration, aren’t able to “self-project” (manifest their CAF-dynamics) into the *HYU-BBY (NUU-VVU)*-Configurations of the more qualitative Forms of Self-Consciousness because their own *BBY(VVU)*-Configurations lack the multi-qualitative Elements (sub-Aspects or Aspects), which are necessary for the implementation of process of the inter-quality Synthesis; this remains so until the missing energy-informational interrelations, causing the tension conditions with *СФУУРММ (SFUURMM)*-Forms of the current Direction, are totally synthesized. The absence of possibilities for the corresponding constructive realization forces the *hvasslons* of “human” Dominants to “shift” the CAF-dynamics of Self-Consciousness Formo-Creators throughout all possible Directions simultaneously, as well as to “project” the synthesized Experience into the *HYUJI-BBY (NUULL-VVU)*-Configurations of *ЛЛИУ-BBY (LLUU-VVU)* Direction.

14.16028. Coming back to the question, I wish to note that in the higher-frequency 3rd-4th-dimensional range (but within the conditional limits of the marginal sub-levels of the *ФЛИАК (FLUX)* dynamics of 4th-5th dimensional levels) the interconnection principles between “hexahedron-pyramidal” Formo-Creators Configurations become more stipulated by the “octahedron” interrelations they synthesize, which allows them to gradually “re-project” the CAF-dynamics of Forms of Self-Consciousness they structure, into the superior (for the current dimensional range) high-frequency “icosahedron” Levels, which are organized by *порантами* and by structuring *ФЛИАК (FLUX)*-Creators of the inferior *Resomirals* of the 4th-5th dimensional range. Beginning with these Levels, the sufficient degree of the primary and secondary synthesis activity of “hexahedron-octahedron” *HYU-BBY (NUU-VVU)*-Configurations, allows the manifestation of the stable Constructive Activity in the TES-“unfolding” dynamics of *HYU-BBY (NUU-VVU)*-Forms Self-Consciousness Formo-Creators of the “projections” of *строолгов (паарруурсы, аамморфы, аилггиллуфцы* and many other civilizations of *кройдлов*) and *тлоондов (ловиргийдцы, регоспорруты, придмлы* and many other civilizations of *аосоо-нов*), which establish the qualitative synthesis foundation for the formation of precisely the *ЛЛИУ-BBY (LLUU-VVU)* Self-Consciousness types in the diffusive *HYU-BBY (NUU-VVU)*-Forms by means of inherent to them *ФИМИ-УМПИ*-dynamics.

14.16029. Now, after we have reviewed the general principles of the synthesis manifestation of “hexahedron” Formo-Creators Configurations in various Levels of 3rd-4th dimensional ranges, let’s attempt to closely review the process of the energy-informational interrelations between *BBY(VVU)*-Configurations of multi-qualitative Formo-Creators in even more narrow sub-ranges, for instance, 3-3, 1-dimensional resonant zones. If, for instance, the Configurations of independent “tetrahedron karma-fractions” of a certain background Quality resonantly engage in the already synthesized “hexahedron” dynamics, each of these “tetrahedrons” Formo-Creators will be in minority, comparing

to the already synthesized dynamics of Formo-Creators of 24-dominant “tetrahedrons” (which are structuring the “hexahedron”), and thus, the energy-informational interrelations, inherent to these independent “tetrahedrons” will reveal in a very weak fashion, comparing to the Constructive Activity of the primary “bulk” of the “mother-hexahedron” Formo-Creators; per se they will lock onto one or a few, out of already synthesized 24 “tetrahedrons” by their own svilgs-dynamics, at the same time forming the “duplex pyramid”, consisting out the two “tetrahedrons”, half-submerged into the primary “hexahedron” dynamics.

14.16030. Since the Formo-Creators of the newly attached “tetrahedron” aren’t able to utilize the Information and its inherent Energy potential of Formo-Creators of the “mother-hexahedron” due to the high degree of the qualitative diversity of their Configurations, the constructive creativity Levels, accessible through the “unfolding” Self-Consciousness TES-dynamics to both – the Configurations of “tetrahedron” and “hexahedron” Formo-Creators, will considerably differ, which inevitably lead to the increased tensions between the Formo-Creators inside the “karma-fraction”. These tensions can only be resolved by injecting the certain quantity of “tetrahedrons” of other background Quality into the current “hexahedron karma-fraction”, so that the mutual dynamics of all its Formo-Creators would become balanced (harmonized) due to the straitening of their Constructive Activity mode.

14.16031. This function is being the prerogative of the two Dominant hvasslons, which provide all the slloogrent Existence of current Self-Consciousness Form. These hvasslons don’t let the Formo-Creators of other Proto-Forms (HYV-BBY (NUU-VVU)-Forms, for instance), fully and irreversibly seize all the “unfolding” dynamics of Self-Consciousness Constructive Activity, because they balance the inner energy-informational dynamics to the allowable limits of the qualitative manifestation. Therefore, the “inclusion” quantity is strictly regulated, since every additional resonant instance of the “inclusion” of the background “tetrahedron” into the “hexahedron” interrelationships, leads to the “prolapse” of the specific dominant “hexahedron”, which most actively participated in the process of the tension formation in relation to the current background Quality.

14.16032. The “prolapsed tetrahedron” has manifested at the very same instant (except it didn’t move or shift anywhere, as you are imagining it, but only “re-projected”) within the Formo-Creators hexahedron dynamics, which structure the previous (slightly less synthesized, thus slightly less qualitative) sub-level. As soon as the degree of the background activity inside the “hexahedron” HYV-BBY (NUU-VVU)-Configuration reaches about 30%, the balancing of the CAF-dynamics occurs in relation to the specific t-indicator ($\approx 70\%$ - is the influence of eglleroliftive hvasslon Impulses of the two “human” Dominants + $\approx 30\%$ - is the background Quality influence), while at the same time, the tension opportunities for the similar sequential “inclusion” of certain other background Qualities into the current “hexahedron tetrahedron karma-fraction” are being created. The dominant hvasslons, in the slloogrent configurations of which all the “reciprocating” inter-quality Synthesis process, as well as the inertial “re-projecting” of CAF-dynamics of all Formo-Creators, is primordially “embedded”, determine the exact type of the background Quality in question.

14.16033. The sequential “implementation” of Formo-Creators Configurations of additional “tetrahedrons”, which represent the additional background Quality, also results in the “expelling” from the current “hexahedron” Configuration of a certain, quite insignificant amount of the dominant “tetrahedrons” and larger quantity of background “tetrahedrons”, representing the source of the newly formed tension. This process lasts until the tension somewhat levels ($\approx 65\%$ - dominant manifestations, $\approx 35\%$ - two background Qualities influence). This process of the gradual Synthesis

lasts until there is $\approx 50\%$ hvasslon and $\approx 50\%$ other background Qualities influence within the CAF-dynamics of Formo-Creators of “hexahedron” karma-fraction (every step is characterized by partial exchange of the background and dominant “tetrahedrons”).

14.16034. That is precisely what I define as the profound inter-quality Synthesis criteria for Self-Consciousness Formo-Creators of each sub-level of 3rd-4th dimensional range. As the dimensional dynamics increases, the tension degree decreases due to the balancing of energy-information interrelationships between Formo-Creators inside the “hexahedron karma-fraction” itself as well as the more active resonant attraction of already synthesized multi-qualitative “pyramid” and “octahedron” Configurations (the peculiarities of which are also engaged by Dominant hvasslons in order to annihilate the constantly forming tensions), towards the narrow-specific “tetrahedron” dynamics, which forms the “facets” and “ribs” of “hexahedron karma-fraction”.

14.16035. As you can see, Formo-Creators of “tetrahedron” karma-fractions are dissonant towards the various constituent Elements of that Configuration and when they “interpose” into the energy-information dynamics of “hexahedron” (“icosahedron”, dodecahedron” and so on) Configurations, they begin to “undermine” that more or less stable system, which is formed on a qualitative basis and limited by the previous interrelationships and Perceptions, thus contributing the qualitative transformation of already synthesized CΦYYPMM (SFUURMM)-Forms of existing “karma-fractions”. Therefore it is partially true, that in order to create anything new, one has to somewhat destroy the existing object, relationship, event, or perception. In this case the “tetrahedrons” play the role of the dissonant dynamics source, which is destructive towards the rest of Formo-Creators, who in turn has formed the more qualitative, higher-frequency Configuration. By “imposing” into partially synthesized interrelationships between various Formo-Creators, they reveal the tensions, and while partially reconstructing them, commence to transform them into a something more complete.

14.16036. Formo-Creators of “parent karma-fraction” have no other choice but to resonantly comply with the influence of this Information, and subsequently include it into the existing CAF-dynamics. That requires the tension annihilation, which have emerged upon the adjourning with another “tetrahedron”, so that the whole “hexahedron” Configuration becomes balanced. The previous “hexahedron” Configuration isn’t being destroyed, but after being slightly deformed, it is reconstructed and modernized (improves), acquiring a different, slightly more qualitative higher-frequency. Consequently this is the process of “quantizing” (clexing) of different part of slloogrent Space-Time due to the fact that previous tensions have balanced; also because the new “tetrahedron” was introduced into the “hexahedron”, the new interrelationships between Formo-Creators have emerged, in turn forming the new Space “geometry”. And this new “geometry” already belongs to different development scenario.

14.16037. This is how the process of the qualitative “re-projecting” of the Formo-Creators CAF-dynamics (and our own re-focusing within the slloogrent structures of Self-Consciousness) takes place. This process occurs not because they (or we) just wanted it to happen, but as a result of alteration of frequency of their Configurations; as soon as the frequency is changed, they instantly belong to different scenario, which structures the different “point” of Space-Time. Each subsequent “tetrahedron” resonantly merges not with the whole “hexahedron” altogether, but with a certain, most resonating part of it. Each “hexahedron” also consists of “tetrahedrons”, energy-informationally unified into the “pyramidal” and “octahedron” structures, which, following the merging of an additional “tetrahedron”, have formed a somewhat unstable Configuration within Space-Time – a

deformed “cube”. In order for the Configuration formation to become stable and balanced again, one “tetrahedron” has to leave this formation. Which one should leave? That should be the most “conflicting” (dissonant) one, comparing to all other participants of the newly formed “karma-fraction”. Joining of yet another “tetrahedron” destabilizes the newly balanced interrelationships and dominant hvasslons again automatically balance the tensions inside of the “new” formation, while Formo-Creators are being “re-projecting” into a more qualitative Configuration, which in turn belongs to other “point” of Space-Time”...

14.16038. This is how the process of inertial “quantizing” by Self-Consciousness Formo-Creators of all objects and event Configurations (primordially synthesized “Space geometry”) of the outer reality, occurs. The deeper (more diverse) Experience the “hexahedron” Configurations of Self-Consciousness Formo-Creators possess, the more universal (less limited by certain CØYYPMM (SFUURMM)-Forms) Perceptions of the global slloogrent BBY(VVU)-Information they would be able to resonate with during the process of inertial TES-“decompressions”, and thus, have better opportunities for more qualitative clexing of the outer Space-Time “geometry”. What is the actual criterion of the “more qualitative” Experience for Self-Consciousness Forms, manifested throughout the 3-4 dimensional ranges? It’s a large quantity of multi-Qualitative “tetrahedrons” within the current Configuration, or, already synthesized “pyramids” and “octahedrons”, embedded into the “hexahedron” dynamics. That factor is capable of insuring the presence of a large quantity of various interrelationships between sub-Aspects or Aspects of various Qualities within each of the “hexahedrons”.

14.16039. Hence, the larger the amount of Information, inherent to the multitude of other “hexahedron” Resomirals, is being “projected” (through “tetrahedrons”, “pyramids” and “octahedrons” of other background Qualities) into the synthesis dynamics of Self-Consciousness Formo-Creators, the more qualitative (higher-frequency) can its Constructive Activity be. That is because the general hexahedron “quality” remains the same, regardless the quantity of “tetrahedrons”, belonging to the same background Quality it contains – the slloogrentity of higher-qualitative Configurations represents the quintEntity of less synthesized Configurations Experience. If the background Qualities, structuring the “hexahedron” are different (for instance, various “tetrahedrons” represent various amounts of partially synthesized Experience of such Qualities as THE-Mobility, THE-Integrity and THE-Entity), the global volume of multi-Qualitative synthesized, but resonantly identical Information (otherwise they wouldn’t be able to resonantly attract towards one another!), “projected” (concentrated, potentially manifested) within the exact same Energy-potential of Formo-Creators, tremendously increases. The inertial manifestation dynamics (per the conditional unit of time) of such “hexahedron karma-fraction” Configuration contains (already synthesized) the larger amount of Information than within the Configuration, bearing the lesser amount of Formo-Creators of various background Qualities, which is actually an important sign of a higher frequency (when the larger amount of multi-Qualitative Formo-Creators participate in the Synthesize process of each CØYYPMM (SFUURMM)-Form).

QUESTION: Can it be said that the unstable “karma-fractions” in a form of detached “tetrahedrons”, “pyramids” and “octahedrons”, are being redundant in “icosahedron” and “dodecahedron” Configurations of ЛЛIYV-BBY (LLUU-VVU)-Form, manifested within 3-4 dimensional ranges? And because of that, they somehow discord within our “hexahedron” Self-Consciousness?

14.16040. Dear Эрфийлисса, the processes of the synthesis form development have absolutely nothing that is “redundant or unnecessary”. Absolutely everything remains intact, and only transmutes into new, more qualitative Experience, where Formo-Creators of each of the Levels utilize it in their own, specific fashion. That’s because specific synthesis conditions form on every Level of Energy-Plasma within Formo-Creators Configurations, which more or less are energy-informationally interlaced with Configurations of other Level Formo-Creators, meaning that they are capable of expressing their Constructive Activity in relation to them by means of similar (analogic) СФУУРММ (SFUURMM)-Forms.

14.16041. When I say “more or less”, the “quantity” of anything isn’t implied, since the manifestation quality of various “parts” of slloogrent BBY(VVU)-Configurations throughout various Levels of Self-Consciousness is absolutely different. For instance, there is only one СФУУРММ (SFUURMM)-Form, regarding “inflammable kerosene properties”, while the Perceptions regarding its use exist in multiples and vary tremendously throughout various Formo-Creators - from utilizing it as a jet or rocket fuel, all the way to kerosene lamp or a fire kindling. There is only a certain chemical reaction chain, providing for the manifestation of this process, exists (hydrocarbon oxidation within the oxygen), but various historic Formo-Creators and various Self-Consciousness Forms utilize this information in a very diverse fashion, following completely different objections. Formo-Creators of the same slloogrent “karma-fraction” Configuration, possessing different potentials for the energy-information interrelations, reveal themselves very differently, depending on the multi-qualitative synthesis degree of Self-Consciousness Form-Creator Configurations, utilizing it.

14.16042. The multilevel Self-Consciousness Formo-Creators resonantly interact only with СФУУРММ (SFUURMM)-Forms of YY-BBY- (UU-VVU) conglomerates of the individual ODS of the current “individual” HYY-BBY (NUU-VVU)-Configuration according to their inherent “unfolding” dynamics, but these YY-BBY- (UU-VVU) conglomerates aren’t concentrated with a certain Space-Time or an informational space of Self-Consciousness; they are dispersed throughout the global Creation, throughout all the super-temporal structures, which altogether constitute the Resomirals, Worlds, Realities, Continuums and Conversums. The ODS, as such, doesn’t really exist. And even Form-Systems of various Realities also don’t exist separately from the ODS or ФЛЮУ-ЛЮУ (FLUU-LUU)-Complexes, since ALL of that remains in a unified, interconnected and balanced resonant dynamics. Each “part” of the slloogrent Information of any СФУУРММ (SFUURMM)-Form is resonantly “attached” (primordially “projected”) towards every possible situation, being realized throughout various scenarios, i.e. towards the Energies of BBY(VVU)-Configuration of Self-Consciousness Formo-Creators, which absolutely identically correlate to the BBY(VVU)-Configuration of the current “part”.

14.16043. As I have mentioned previously, the ЛЛЮУ-ВВУ (LLUU-VVU)-Form Formo-Creators have their own BBY(VVU)-Configurations. All the BBY(VVU)-Information, which they consist of, initiates the certain resonant degree only within Form-Systems, correlating to that salient feature. All the Form-Systems are created in such a way that no resonance can emerge with no apparent reason, or just because a certain Form-Creator wanted it to happen. In fact, Formo-Creators aren’t able to “desire” anything; they “possess” only a slight portion of slloogrent dynamics “projections” of the global, most qualitative Form-Creator, and strictly in accordance with that dynamics specifically resonantly manifest only within certain part of the global slloogrentity of Space-Time, which corresponds to their own Configuration with an utmost precision.

14.16044. The 0-2 dimensional range slloogrently exists throughout all the more qualitative “dimensional” Continuums. All our Continuums consist of 0-1, 1-2, 2-3 and what we define as the current, - 3-4-dimensional Continuum. The “following” 4-5-dimensional Continuums Formo-Creators dynamics are structured by the synthesized “parts” of Formo-Creators Configurations of 0-1, 1-2, 2-3, 3-4 and 4-5 dimensional ranges. The 5-6 dimensional Continuums are structured by 0-1, 1-2, 2-3, 3-4, 4-5 and 5-6 dimensional ranges. The Configurations of the exact same Formo-Creators participate in the dynamics throughout all these dimensions; however, the synthesis interrelations between them are being constantly improved, and, transforming into more qualitative Levels, become completely different. They become “different” because the constructive svilgs-dynamics of a certain Configuration Formo-Creators gradually being aggregated of the increasing number of “narrow-professional specialists”, and thus, collectively, they are able to overcome the particular “obstacles”, which they weren’t able to overcome earlier on their own. Everything, which we define as “positioned below”, exists potentially throughout all possible Continuums.

14.16045. Please keep in mind that all Synthesis schema descriptions of any “karma-fractions” are expressed by me exclusively from the position of the super-temporal Observer. When I state that when the two “pyramids” unite they form the “octahedron”, or that three “octahedrons” unifying, form the “hexahedron”, - this information comes not from the rotationally-subjective “routine” of your outer reality, which strictly limits the Perception mechanisms by its narrow-specific inertial-temporal conditions, but rather it is an impartial position of the super-temporal Observer, whose Self-Consciousness is focused throughout certain VEC-Levels, owing to which he is capable of perceiving the quintEntity of certain inertial processes, occurring simultaneously throughout Form-Matter Levels (ТРУУФФОРРГ-БУУ) and Form-Plasma Levels as well (ТРУУРРГУРРДТ-НУУ).

14.16046. For instance, upon the unifying of the three conditional “octahedrons” into a “hexahedron” within the 2-3 dimensional resonant zone, the infinite number of development scenarios merge throughout the various slloogrent parts of Form-Matter, each of which is finalized by this very Synthesis act. Each of these scenarios is structured by its own Temporal Flux and can be expressed by its own “temporal” duration, consisting out of the strict number of the individual rotational Shifts. Each of these scenarios has its own unique slloogrent structure, consisting of multiple smaller constituents – sub-scenarios, each of which, in turn, also represents the slloogrent structure, containing its own slloogrent structure, consisting of other ...sub-levels, and so on – into infinity. This very much resembles the “Matreshka-Russian doll”, only the difference is, that each larger matreshka has not one, but trillions of “sub-matreshkas” in it, which look very similar, but still differ from the “mother-matreshka” in a certain way. Of cause, each subsequent matreshka has trillions of other, smaller matreshkas inside it, and so on, and so forth – infinitely.

14.16047. Every development scenario, in its energy-informational Entity, represents the slloogrent aggregation of the multitude of sub-scenarios, within each of which, the geometrically more simplified “karma-fraction” of the previous dimensional range, is being added to the “mother karma-fraction”. Thus, for 2-3-dimensional resonant zone, the inertial finalizing of a sub-scenario represents the act of addition of a standalone “pyramid” (belonging to 1-2-dimensional resonant zone) to the “octahedron-like mother karma-fraction”, while the succession of four of such acts forms the “hexahedron” inter-quality Synthesis. The sub-scenario, representing the act of adjoining of a “pyramid”, also consists of the slloogrent aggregation of sub-scenarios, where an additional “tetrahedron” is being added to the “mother karma-fraction”, while the sequence of four of such sub-sub-scenarios forms the sub-scenario of the “pyramidal” inter-quality Synthesis.

14.16048. The hvasslon sequence of the resonant “tetrahedron” addition and the global svilgs-dynamics formation inside each of the sub-scenarios substantially vary, depending on the global energy-information “contents” of its individual TES-dynamics, since the process of the energy-informational clexing of each “karma-fraction” throughout various sub-sub-scenarios are implemented differently (ДООЛЛСами, waves, ФЛАКСами...). For instance, in a certain scenario the certain “tetrahedron” has connected to the “mother karma-fraction” by the certain “facet”, in the other scenarios – by different “facet”, in the third scenario it had connected to a totally different “mother karma-fraction tetrahedron”, and in the fourth scenario it had wedged in by both of its “facets”, thus substantially altering the initial “geometric form”. The configuration peculiarities for the resonant connection are stipulated by the exactness of the inertial influence of infinite number of energy-information interrelations of every “karma-fraction”, which actually represent the slloogrent foundation of TES-dynamics of the corresponding development scenario.

14.16049. Once again – any scenario, any sub-scenario, any sub-sub-...scenario represents the clexing sequence of “mother karma-fraction” by the energy-informational carriers (bundled Photon-fibers) of the corresponding range – ДООЛЛСами, waves, ФЛАКСами, and so on, which inevitably ceases by the Synthesis act (whether it’s an within-aspect, inter-aspect or inter-quality). The energy-information clex density (the quantity of the Information and the Energy of, for instance, the wave carrier), determines the necessary number of rotational Shifts, which are required in order to overcome the dissonant distance, the svilgs-dynamics synchronization and the Synthesis process implementation.

14.16050. In the example, displayed above, we have reviewed the Synthesis processes, which occur within the 2-3-dimensional zone, and have established the following compliance:

- The scenario – is an act of Synthesis of non-duvuyllerrt Aspects,
- The sub-scenario – is a Synthesis of duvuyllerrt Aspects,
- The sub-sub-scenario – is a Synthesis of sub-Aspects of a certain Quality.

14.16051. If we take as an example the 3-4-dimensional resonant zone, the level correspondence of the ongoing synthesis processes in various scenarios and sub-scenarios also varies:

- There are the inter-quality Synthesis processes of the two Dominant Qualities, occurring within the scenarios,
- The Aspect Synthesis occurs separately, relating to each Quality in the sub-scenarios,
- The single Quality Synthesis of duvuyllerrt Aspects occurs within the sub-sub-scenarios,
- The sub-Aspect Synthesis of a single Quality occurs within sub-sub-sub-scenarios.

14.16052. Throughout 4-5-dimensional ranges the implementation Levels of the synthesis processes also change:

- The inter-quality Synthesis of connecting of additional Aspects of the third Dominant to

“karma-fractions” of the “Constructive Synthesis Quality” prevails (for instance – “The Constructive Cosmic Potentiality” for ЛЛЛЛ-ВВВ-Forms),

- An inter-quality Synthesis of the two Quality Aspects prevails throughout the sub-scenarios
- The none-duvuyllerrt Aspect Synthesis prevails throughout the sub-sub-scenarios
- The Synthesis of duvuyllerrt Aspects are prevailing throughout the sub-sub-sub-scenarios
- The sub-Aspect Synthesis prevails throughout the sub-sub-sub-sub-scenarios...

14.16053. As you can see the Continuum scenarios, bearing the lesser dimensionality, are being the constituents Elements in the slloogrent Synthesis processes of the energy-informationally more capacious – more highly-dimensional Continuums. Just as 3-4-dimensional Continuum scenarios are being constituent elements of the more qualitative Levels of slloogrentity of ФЛАКC (FLUX), 4-5-dimensional Realities, СФУУРММ (SFUURMM)-Forms of which constitute the foundation of our collective Sub-Consciousness. As perhaps you have noticed, the inertially-sequential inclusion of Configurations of inferior “karma-fractions” to Configurations of more complex synthesis Forms actually creates the necessary conditions for the implementation of the sub-aspect and the inner-aspect Synthesis throughout any Level of an inter-quality Synthesis.

14.16054. The possibilities of the implementation of the dynamics of energy-informational interrelations between the Formo-Creators of various “karma-fractions” will considerably differ with one another not only throughout the various dimensional ranges, but also within the primary ranges, which structure each dimensional range. For instance, throughout the superior boundary resopasons of 2-3-dimensional range, simultaneously with global “octahedron-pyramidal” dynamics, leading to the formation of very unstable “hexahedron” Forms, the “tetrahedron-hexahedron” interrelationship tendency will become evident, upon which the hvasslons Formo-Creators of the multi-qualitative “tetrahedrons” manifest the more active initiative towards the resonant interrelation with hvasslon Formo-Creators of the most compatible with them Qualities, which in turn have commenced to synthesize and integrate into the unstable “hexahedron” groups by their Configurations. This allows the Formo-Creators to increase the resonant integrity of the pairwise “hexahedron” formation (out of Aspects of the two, the most compatible Qualities).

14.16055. Throughout the most inferior boundary resopasons of 3-4-dimensional ranges, the situation somewhat changes, since now the hvasslon Formo-Creators of pairwise-synthesizing “hexahedrons” manifest the considerably more powerful activity in order to attract not only the most compatible “hexahedrons”, but also the differently-synthesized “pyramids” (throughout various interaction schemas between sub-Aspect Formo-Creators), attracting from all the multitude of them, only these, whose Energy-Information to the most degree is resonant with other “hexahedron” Formo-Creators Configurations. At that, the “hexahedron” groups, bearing lesser resonating Configurations basically “stick out” from the global dynamics, being immediately drawn to the more compatible formations.

14.16056. Since the “hexahedron” inner resonant stability is still quite weak (we are only talking about the inferior resopasons of 3-4-dimentional ranges), while the global “hexahedron-tetrahedron” and “hexahedron-pyramidal” dynamics of an inter-quality Synthesis is still quite strong, the “octahedron-hexahedron” tendencies begin to manifest between the Formo-Creators of the most compatible

Qualities, when already synthesized “octahedron” Formo-Creators commence to powerfully “inter-wedge” and “expel” these “octahedrons”, whose Energy-Information, discords more with most of “hexahedron” Formo-Creators, then with “octahedron”. Thus, because of the Experience, infused by these Formo-Creators, the inner stability (vitality, survivability) of “hexahedron” Forms of Self-Consciousness considerably increases, which subjectively is being expressed as the powerful egocentric impulsiveness at the weak mind activity, which is inherent to all low-frequency Forms.

14.16057. Throughout the mid-levels of 3-4-dimensional range, when the stability of “hexahedron” Forms of Self-Consciousness reaches the maximum degree of its self-expression, while the impulsiveness in the CAF-dynamics of Formo-Creators is more or less being balanced by Aspects of both Dominants, the “hexahedron” hvasslons begin the intensive and determined attraction of these “octahedron” Formo-Creators (from “hexahedron” Configurations of other Proto-Forms), which help them to reduce the tension degree within their own construction. At that, among the least compatible “hexahedron karma-fraction” Qualities Formo-Creators, the inertial types of other – inferior – energy-informational interrelationships continue their implementation – the “tetrahedron – pyramidal – octahedron – hexahedron-like”. Thus, the Creators-Curators of the most inferior ФЛАКС (FLUX) Levels (грэйсцы, аллгссы, ллаволловалоффы, эннирисцы, ууффлуусцы, оурффогуллуфцы and others) within the middle Levels of 3-4-dimensional ranges, begin to actively organize the more qualitative “hexahedron-octahedron” tendencies, which differ from “octahedron-hexahedron” ones by the more powerful dynamics of eglleroliftive Impulses between the multi-Quality hvasslons. This difference subjectively is being expressed by means of various Forms of Self-Consciousness, as the greater degree of consciousness upon the energy-information object choosing.

14.16058. Throughout the superior frequency resopasons, this interaction type, actively stimulated and initiated by Creators-Curators (аййфуллугры, ффиллисцы, ииссорфы, нгунмы, боллфы, скрадомуляты and others), begin to leave the previously established biological conditions, and start to acquire the powerfully impulsive dynamics of the resonant “inter-wedging” into the most dissonant parts of Formo-Creators Configurations of still unstable “icosahedron karma-fractions”, which are based on the energy-informational interrelationships between the two, qualitatively related “hexahedrons”. This type of “hexahedron-icosahedron” tendencies in the subjective Perception of the corresponding Forms of Self-Consciousness, can be described as irrepressible Conscious Aspiration towards the spiritual self-development, which inevitably leads to the “loosening” and reconsideration of all the previous energy-informational interrelationships (the Perception regarding the Meaning and Purpose of Life, family and friends relationships, and so on), as well as the powerful concentration on the most qualitative inner resources, and, as the consequence, the activation of variable proto-form abilities, manifestation of which depends on the prevailing of CAF-dynamics of various Proto-Form Formo-Creators activity within the global Self-Consciousness Configuration.

14.16059. Throughout the superior resopasons of 3-4-dimensional ranges, the ФЛАКС (FLUX)-Creators of the 3rd Level of ФЛАКС-СТООЛЛ-ВВУ (FLUX-STOOL-VVU) range (ловиргийдцы, при-дмлы, регоспорруты, паарпуурсы, аамморфы, аиллгиллуфцы and others) are organizing the impulse “hexahedron-icosahedron” tendencies, which are being replaced by consciously-purposeful “icosahedron-hexahedron” activity of “icosahedron” ФЛАКС (FLUX)-Creators themselves of the mostly compatible “hexahedron karma-fractions”. Alongside the continuous dynamics of “hexahedron-icosahedron” and “icosahedron-octahedron” types of energy-informational interrelations between the “hexahedrons” of biological Forms of Self-Consciousness, the “bio-plasma” and “plasma” Forms

of the Resomirals, bearing the constructive realization of multi-type kinds of Self-Consciousness throughout the slloogrent dynamics of Space-Time, which are synthesized out of Self-Consciousness Formo-Creators of the multitude of various Proto-Forms.

14.16060. I suppose that now the principle of slloogrentity of individual development scenarios and individual rotational Cycles become clearer for you. There are billions of ways of inertial-sequential clexing, along with the addition of the inferior “karma-fractions” throughout the sub-scenario slloogrent parts, which or Perception system isn’t able to reflect, therefore the complex process of “step-tetrahedron” increase of the “mother karma-fraction” is being transferred into the simplified algorithm of the merging of N “karma-fractions” of m-dimensional range into a single m+1-dimensional “karma-fraction”. At that, only the scenario level is actually accessible for Perception system Formo-Creators, while all the infinite multitude of “tiny” fractions of sub-synthesis processes remains “outside” of your observation.

14.16061. It is worth mentioning at this point so-called “sub-chakra” re-focusing process, during which the CAF-DRF-dynamics of Self-Consciousness Formo-Creators sort of “skips” the large parts of slloogrent dynamics of the Stereo-Form, thus instantaneously implementing a tremendous amount of sub-aspect, aspect, or even inter-quality Synthesis. In that case, the Observer, “located” within VEC will “see” that the whole bunch of “tetrahedrons”, “pyramids” and “octahedrons” have joined together. Such “impressions” are not being the duvuyllertr principle violation indication, but rather indicate the infinite re-focusing dynamics possibilities, which our Self-Consciousness can implement. In reality each even the smallest fraction of any sub-...scenario always exists, ensuring the duvuyllertr Principle implementation by means of resonant interactivity between Formo-Creators Configurations. The very existence of this Principle allows the hvasslons to provide an opportunity to Focuses of the most qualitative Self-Consciousness Configurations Formo-Creators to implement the necessary dynamics, soft of “skipping” through hundreds, and even millions of the intermediate and lesser qualitative slloogrent fragments of the Stereo-Form.

QUESTION: When we make a choice within the skrruullertr system, is this choice being a “karma-fraction” dynamics, which is formed by our own brain Formo-Creators? As far as I understand, the Energy-Information is being recorded into our temporary ether substance (TES) from “karma-fraction” Configurations. So, all the “karma-fractions” are also located within the same skrruullertr system?

14.16062. Without a doubt, dear Алкриакклея! The slloogrent dynamics of the skrruullertr system is structured by Configurations of absolutely all primordially existing “possibilities”, which are necessary for the realization of any Constructive Activity, separate subjective Forms of which are slloogrently presented within the informational space of our Self-Consciousness (within our individual ODS) in the form of various СФУУРММ (SFUURMM)-Forms, whose dynamics is actually being our only means of orientation at every moment of our choice making process. However, the basis of all, as you already know, is being the resonant effect: the specific dynamics of certain slloogrent parts (“karma-fractions”) of skrruullertr system, powerfully resonating with BBY(VVU)-Configurations of your brain’s Formo-Creators of your current HYY-BBY (NUU-VVU)-Configurations, will determine the individual characteristics of СФУУРММ (SFUURMM)-Form quality, which in turn would become essential for your choice making. It means that the slloogrent structure of skrruullertr system – is, actually the only possible scope of application of our possible vital construction at each following

instant of our infinite Existence. Per se, we, as individual Forms of Self-Consciousness, simply don't have any other means of representation of our constructing manifestation throughout the entire Universe.

- So, we resonate towards the Configuration of each of the primordially existing “karma-fractions” in the same exact fashion, as during Mediations onto the Cosmic Codes?

14.16063. The “karma-fractions”, dear Крауллард, actually, are the Codes. What I have “described” previously as a joining of very different geometrical figures, resembles the panel assembling from multitude of various puzzles. A figure, resembling, let's say, a specific ASTRO-Plasma dynamics correlates to its own, very specifically matching it Element, reflecting the very specific dynamics of MENTO-Plasma. Their vibrations are identical, while their quality is very different. There is an unimaginable amount of such multi-qualitative Elements within each out of the narrow ranges. I am not talking about a quantity, but rather about a volume of Information and the Energy potential. The Energy, without a stimulating (directing) it Information would be completely “dead” (inactive), while the Information without the Energy, enforcing it, would be totally useless. They simply wouldn't be able to manifest or reveal without one another. And once they form the elementary “tetrahedrons” of the unstable energy-informational interrelations, connect to one another and form extremely complex semantic constructions in a “spheroidal” fashion, the variable Configurations of the multitude of СФУРРММ (SFUURMM)-Forms, with different degree of stability are being formed, which slloogrently structure the specific qualitative Directions of each of the dimensional Levels of Karma-Plasma by means of their dynamics.

14.16064. Per se, all our Perceptions are created by the same exact Thoughts and Senses; we simply structure them and correlate differently every time. For instance, let's examine the Notion regarding Love in connection with other specific notion “humanity”, or “personality”. At every moment of our existence, our own “puzzles” exist in order for us to express our own, very specific opinion in relation to something or someone, which indeed, differs from other “people” opinions, at least somehow. And this opinion is being formed on the basis of the mutual for everyone Elements (“emanations” and “psyche”); we all manipulate with the same exact Information, however, we all do it our own way, differently, depending on the quality of Energy, which our Formo-Creators employ during this process. It can also be compared with the Lego assembler, when the same exact parts can be used in order to compile very different figures and structures. It also can be compared with a kaleidoscope, when a new, marvelous pattern can be created by each turn of the tube (by means of the inner, longitudinal lens). Thus, by utilizing the exact same slloogrent structures of Energy-Plasma we can express our own opinion towards everything, which surrounds us.

- And then our brains Formo-Creators collect these Codes, decipher them, - and “record” or reflect them throughout the manifested biological analogs of HYY-BBY (NUU-VVU)-Form-Types in a form of various gene types of our DNA?

14.16065. – No, dear Гроуллссмаасс, it all happens instantaneously; there is no way to actually differentiate this process onto what is primary and what is secondary – our Creation or DNA – an egg, or a chicken. It is almost impossible to detect. Each Stereo-Form is represented by the slloogrent diversity of a single (global, mutual), very complex in its multidimensional organizational structure, HYY-BBY (NUU-VVU)-Configuration in a super-temporal (NOT in an inertial, spatial-temporal!)

dynamic of Form-Systems. The “inner dynamics” of this Configuration is actually what I define as TES-Flux and certain global Energy-Information. The complete Entity of this Flux greatly depends on the quality of the already synthesized in it interrelationships, whose nature in turn almost entirely (but not completely) depends on which Levels of Energy-Plasma’s “emanations” and “psyche” are structured by the “icosahedron-dodecahedron” dynamics of “cubical” molecules of our DNA. I have mentioned previously that the DNA consists of various combinations of “karma-fractions”, which are specifically “projected” into a global HYV-BBY (NUU-VVU)-Configuration of your Stereo-Form in a specific proportion by the corresponding Formo-Creators of the mutual HYV-BBY (NUU-VVU)-Configurations of your parents.

14.16066. It is worth mentioning, that every single one of these super-temporal HYV-BBY (NUU-VVU)-Configurations consists of not only of slloogrently “packed” and energy-informationally reflected “karma-fractions”, inherent to your parents Stereo-Forms, but also of other “karma-fractions”, inherent for Stereo-Forms of absolutely all their ancestors, which simultaneously with you structure all Temporal Fluxes, where realizational ΠΡΟΟΦΦ-PPY Forms have any means for frequency manifestation. Thus, your slloogrent DNA structures Configurations possess all the inertial development History of all the “humankind” while some chromosome “karma-fraction” Configurations also contains the inertial development History of the entire Universe).

14.16067. At every moment of your infinite Existence, depending on the overall quality of your HYV-BBY (NUU-VVU)-Configuration, within the information space of your Self-Consciousness only the specific slloogrent parts of the global DNA Configurations can activate, which are being the realizational Forms of your brain’s Formo-Creators. As soon as they come into resonance with any of the slloogrent areas, the specific part of the global energy-informational dynamics immediately activates within the individual ODS (structuring the DNA in a super-temporal mode), and all your thought- and psyche-creation activity is being “re-projected” into a single possible inertial Synthesis Direction (meaning that CAF is implementing through CΦYYPMM (SFUURMM)-Forms of some specific Levels of Energy-Plasma), but as soon as the CAF-dynamics has “changed” its frequency and shifted into another area of the DNA, instantly the quality of your vital existence also changes. As the CAF-dynamics of DNA Formo-Creators changes, the sphere of your interests changes as well. However, owing to slloogrent and duvuylleert Principles, all this diverse Form-Creator activity is being implemented throughout all Form-Systems, inertially allocating throughout all the multitude of HYV-BBY (NUU-VVU)-Configurations of “individual” Interpretations, which structure the global super-temporal Constructive Activity of your Stereo-Form.

14.16068. I wouldn’t actually state that firstly, your Formo-Creators form the diversified CΦYYPMM (SFUURMM)-Forms by means of their TES-dynamics, then they are being activated within your Self-Consciousness, then they are being activated within your DNA, and only after that all this is sequentially being “recorded” within your TES. No, instead all this is only a result of your own subjective inertial Perception of “you” as well as your outer reality. In actuality, nothing is being “recorded” anywhere, but rather sequentially I being recreated, since everything, absolutely everything already primordially exists in its completeness, or in its striving to completeness version, while all we actually “do”, is sequentially re-focus into various slloogrent parts of all that.

14.16069. One more important thing. We are not actually forming our rotational Cycles. I always say that our choices qualitatively determine our rotation Cycles, but in reality, we don’t actually “build” or anyhow “construct” them. What we do, is simply choose something every instant, out of

the infinite multitude of choices, offered to us by the diversified dynamics of the skrruullerrt system; and depending on the degree of resonance with any of them by means of BBY(VVU)-Configurations of our Formo-Creators, we either utilize, or ignore it as we “move along” our Lives. Every single “move” has been already per-instantly “allocated” primordially, as we reveal throughout the infinite diversity of Form-Systems in our inertial vital existence dynamics. Absolutely any (out of all possible) choice at every single following instant has its own, initially programmed, schema of the synthesis realization throughout any of the multitude of Directions of its primordial slloogrent dynamics. If we talk about choices in relation to the Time, we can say that at every inertial instant the activation of certain parts of quantum (ДООЛЛСОВЫХ, ФЛАКСОВЫХ) structures of our DNA within the biological analogs of HYY-BBY (NUU-VVU)-Form-Types, as well as the implementation of their inherent though-sensing construction within the informational space of Self-Consciousness, occurs.

14.16070. And it works vice versa. Since we aren’t able to anyhow register or sense these concise instances and associate our choice making process with the multi-qualitative slloogrent dynamics of each rotational Cycle, every single one of these already implemented facts of our existence is subjectively fixated within our Self-Consciousness with a considerable delay. Therefore, quite often, after we make a certain mechanical (unconscious) choice, and even when we realize it throughout the global diversity of its possible consequences, we aren’t able to change anything. Although there are no desperate or hopeless situations within the skrruullerrt system exist, due to the multitude of subjective reasons we often aren’t able to see the solution out of situations, which are being simple and obvious for other, our more qualitative Interpretations.

- If we have activated a certain CΦΥΥPMM (SFUURMM)-Form within our individual ODS, then does it mean that this is definitely “recorded” within our DNA as an Experience?

14.16071. – Yes, deal Ooφφcтppyyppcc, all this, as well as all the rest of what is currently remains inactive within our current HYY-BBY (NUU-VVU)-Configurations, but one way or another, has been stimulated by our other Interpretations, already exists. And no one in a position to change it, since this, frankly, is, in fact, a total infinite number of choices, which are meticulously “apportioned” throughout all possible development scenarios, and the individual dynamics of which is automatically being transformed into the global slloogrent dynamics of all the multitude of rotational Cycles of our Stereo-Form. Generally, all the Energy-Plasma, as well as any out of the forming it Form-Systems, is fully equilibrated in terms of the energy-informational balance, since Aspects of absolutely all Pure Qualities are ALREADY completely synthesized with one another. However, this potentially balanced state, regardless of how close it comes to its absolute “rest mass”, can’t actually become it or acquire it, because of the constant existence of a slight difference within the dynamics of effecting each other, diversified Vectors of multi-qualitative Forces and constructive interrelationships within Configurations of every “karma-fraction” of any realization Form (something, which we subjectively define as “a bit better”, or “a bit worse” of something else). Various manifestations of this “slight difference” can be found in any comparative specifics of the inertial dynamics of any Energy-Plasma wave range.

14.16072. Every one of you, within the global aggregated Consciousness of your ЛЛІΥΥ-BBY (LLUU-VVU)-Forms, are still capable of realizing yourselves only as an incredibly tiny part of the slloogrent constructive dynamics of the Collective Intellect of all the realization Forms of Tertiary Energy-Plasma. However, along with that, throughout the absolute Infinity of your eternal existence, there

are primordially programmed periods, where Constructive Activity Focuses of your HYY-BBY (NUU-VVU)-Forms are structuring various Levels of the Secondary Energy-Plasma, from which the Energy and the Information, arranged by the most qualitative ОПИС HYY-BBY (NUU-VVU)-Configurations into the universal Knowledge of the IISSIIDIOLOGY, inherent for the Collective Intellect Paradigm of the new, “upcoming” spatiotemporal continuum, is being transmitted to your infinite multiple “here and now”.

14.16073. The most important thing throughout your infinite re-focusing process, is the constant activity within your Self-Consciousness of the precise and definite СФУУРММ (SFUURMM)-Forms, logically and convincingly illustrating to you “personally” the profound energy-informational Entity of any transformative processes, be it a Planet, animals, plants, minerals or “humans”, that it is impossible to exist without an affirmative belief in the veracity of the Knowledge of the IISSIIDIOLOGY, which could be built if not onto your personal empiric Experience, than at least onto a deep analysis, also providing the state of the absolute authenticity of the most СФУУРММ (SFUURMM)-Forms you utilize. It’s just like when an unshakable confidence and strong belief in certain mathematical laws, theorems or axioms inspires the mathematician-analyst towards his own mathematical discoveries, representing from that moment on, his own “individual” Experience. Only provided for the detailed personal experience and analysis of the integral theoretical information, the analyst becomes capable of producing new formulas, practically easily applicable and asserted.

14.16074. It is therefore, very important to pass all the newest Knowledge, presented within the IISSIIDIOLOGY through one’s own deep consciousness and analytical reasoning, in order to be able to logically assemble all possible peculiarities of your “individual” existence with these Processes, which you see as your own outer reality. For the first time in “human” history there is a chance, given to modern science to attempt at least somehow “shift” the accent of its Creation from spheres of the inveterate pragmatism and conservatism into a mysterious and unknown, “beyond limits” spheres of practical activity, delicately bounding with ALL, WHAT we are accustomed to consider to the spiritual side of our materialistic Existence. And all famous sages have insisted that the Truth in the World of the dualistic realities always lies somewhere in between.

14.16075. All teachings and worldviews, preceding the Knowledge of the IISSIIDIOLOGY, have approached many vital issues somewhat unilaterally – either in prevailingly materialistic fashion, or with the excessive “theology-like” meaning, therefore it was impossible to find solutions, which would satisfy everyone. In order to successfully implement the fascinating Idea of conscience Infinite Existence, you should try to pass all this Knowledge through the dynamics of your Self-Consciousness СФУУРММ (SFUURMM)-Forms, striving to achieve the point, where most of its Perceptions become your own and not mine, as well as each of its corroborating Principles became the natural chain link of all of your forthcoming reasoning.

14.16076. Only then, at any given moment of time, upon each of the following scenario cessation of your HYY-BBY (NUU-VVU)-Form, manifested within the current Reality, you will be absolutely convinced that you are positively, literally IMMORTAL! And at some point, during the process of the stable altruistic re-focusing, once you will master the conscious fixating at least within the middle-ranged synthesis diapasons of the Creative Activity of Formo-Creators of the following two Energy Centers within your Self-Consciousness, you will be able to acquire your own experience and proof of the profound veracity and validity of everything, which now you can cognize only theoretically. But in order for you to achieve this, the continuous dynamics of your Self-Consciousness should

undergo a very complex, but total change of all your older Perceptions regarding yourselves and the World around you, to СФУУРММ (SFUURMM)-Forms regarding the Man and the Universe, which are presented by the ИССИДИОLOGY.

14.16077. A lot of you think that they are actually Humans. But in reality it can't be farther from the truth! Don't flatter yourselves, since such quite overestimated and practically baseless conceit can seriously harm the entire process of the development of your Self-Consciousness in this particular Direction. You will become People ONLY then, when you will cease being an instrument of construction of your inferior Forms, currently implementing their creativity through the first two Energy Centers - АРГЛЛААМУНИ (ARGLLAAMUNI)- and ИНГЛИМИЛИССА (INGLIMILISSA)-Иис-сиди; when you will no longer able to hate anyone, or envy anyone, when you no longer will infuse an dissimulation and falsity in your relationship with others. Up until all this will be completely gone from your Configurations, you will not be able to become Humans. Then you might ask: - "who are we?" Well, at this point, you are not more than simply rough intermediates, from which, after the endless number of corrections, the Humans can actually form.

14.16078. These of you, who, due to their morbid ambitions and arrogance, still thinks that I am a Devil, arrogant boor, an ignoramus, a sex maniac, or purse-proud ambitionist, and treats this information as intolerable and deeply hurting their "human" dignity, I wish to remind that while you are capable of such negative reactions towards anything, which even slightly differs from your own opinion, regardless of any "the most convincing" motivations you find for it, you will not be able to become Humans. And, if you will not be able to be terrified by such your "current" behavior, you will inevitably retire more and more from the ЛЛУУ-ВВУ (LLUU-VVU)-like (genuinely Human) Synthesis Direction, which at some point will end for some of your "individual" Interpretations by the unexpected re-focusing into some Proto-Form type (of which you will not have a slightest idea, since the specific СФУУРММ (SFUURMM)-Forms of your Self-Consciousness, duvuyllerrtly and sequentially, way before the final re-focusing, will securely identify "you" with the synthesis dynamics of current Proto-Form).

14.16079. The True Humans simply are not capable of such animalistic vicious reactions and rabid condemnations of anything or anyone for anything. Why do you feel these destructive emotions? Anger and blame are the first signs of the process of the powerful differentiation of the qualitative Self-Consciousness dynamics from tendencies, inherent to the ЛЛУУ-ВВУ (LLUU-VVU)-like development Direction. These signs are mostly inherent to СФУУРММ (SFUURMM)-Forms of the multitude of animal Proto-Forms, actively realizing themselves through the primitive predator instincts. Please remember: if you feel angry or aggression towards anything or anyone, - it is an obvious consequence of active "shift" of the CAF-dynamics of your Self-Consciousness Formo-Creators towards the development Direction of some of the rapacious Proto-Forms. Why that is certain animals consume or instinctively hate other animals? Because within the structures of their Self-Consciousness there are multiple low-quality tension formations (the energy-informational interrelationships within certain "karma-fractions", which aren't compatible with the "karma-fraction" dynamics, inherent to Self-Consciousness of other Forms), which demand their realization, as a result of which, the qualitative inter-compensation occurs (satisfaction), which, per se, actually is the Synthesis. Cats hate dogs, lions, wolves and other predators consume roes, goats, sheep and other kinds of herbivorous animals, whose relatively peaceful СФУУРММ (SFUURMM)-Forms considerably differ from their own.

14.16080. All of them represent the multi-qualitative Directions of an inter-quality Synthesis within the energy-informational constructive dynamics of your outer three-dimensional Continuum. Once the “unfolding” CAF-DRF dynamics of your Self-Consciousness Formo-Creators will stabilize within the Force Vectors, peculiar to ЛЛЮУ-BBY (LLUU-VVU)-like development Direction, no aggressive, hostile or criticaster tendencies have any chance for real manifestation in your life. That is when your superior Intellect Levels Formo-Creators are active, which allows you to treat everything, happening around you, or with you, only from the position of the profound Understanding of the objective necessity of occurrence of such events in your rotational cycle, as real opportunities for your “individual” intellectual and spiritual self-developing.

14.16081. Once your Self-Consciousness dynamics stabilizes within these balanced conditions, your physical health, the relationship with the outer Reality and your “personal” Life’s circumstances will inevitably normalize and harmonize, widely opening the real perspectives of more active application of all your constructive abilities. And once the CAF-RDF dynamics of your brain’s Formo-Creators actively “shifts” into some of the infinite development Directions of predatory Proto-Forms (animal or vegetative), the similar СФУУРММ (SFUURMM)-Forms, inherent to the current Proto-Form Synthesis schema, begin to manifest through the low-quality part of the slloogrent TES-dynamics within the informational space of your Self-Consciousness.

14.16082. If you communicate with “someone”, whose “unfolding” Self-Consciousness dynamics is saturated with qualitatively other type of СФУУРММ (SFUURMM)-Forms, inherent to some other Proto-Forms, the certain tension will very soon be evident within your “inter-personal” energy-informational exchange, as a result of which, “your” psyche-mental reaction towards their statements, reasoning or actions will predominantly reflect the relations tendencies, inherent to the animalistic Synthesis Directions. And if your reasoning and psyche have certain, even covert by the specific “human-like” СФУУРММ (SFUURMM)-Forms, predatory tendencies (such as preference for forceful solutions and rough suppression, self-opinion obtrusion, coupled with other opinion’s rejections and so on), while your counterpart’s Self-Consciousness is predominantly reflecting the Perceptions, inherent to herbivorous Proto-Forms (peacefulness, consideration, other opinion and interests respect, compassion, and so on), very soon there will emerge a surmountable misunderstanding, estrangement and coldness between you both. Your interlocutor will try to escape your presence as soon as possible under any pretext (just like a deer from the tiger), while you, unconsciously to yourself, and motivated by the animalistic hunting instinct, will strive to “run-down” and somehow “crush” your “victim”.

14.16083. This is exactly what causes the misunderstanding, distrust, separateness and an unexplained aggression, so evidently inherent to the current “human” interpersonal relations. This is because during various periods of your Lifetime, considering the multi-qualitative diffusion of НУУ-BBY (NUU-VVU)-Forms, you steadily focus by your Self-Consciousness into various Directions of the inertial inter-quality Synthesis. Throughout various periods of our vital existence, every one of us actively implements СФУУРММ (SFUURMM)-Forms of variable Entities of non-ЛЛЮУ-BBY (LLUU-VVU) development type and Synthesis Direction within the energy-information dynamics of the outer Continuum, because of which you either constantly and adamantly enter into a powerful confrontation with Perceptions of “people”, who are implementing absolutely different Synthesis Directions, or somehow try to counterbalance and reconcile “inside yourself” all the diversity of multi-qualitative opinions, propositions, principles and views, at some point achieving the peace of mind and state of balance.

14.16084. The latter – is the indicator of the increasing shift towards the dynamics, inherent to the НУУЛЛ-ВВУ (NUULL-VVU)-Forms, which is being enforced and activated by the ИССИДИОLOGY СФУУРММ (SFUURMM)-Forms. And if you react negatively or irritably towards anyone, who transmits this Information, this is simply being an extra indication of the fact that within the dynamics of your Self-Consciousness, the various tendencies (СФУУРММ (SFUURMM)-Forms) of the not yet ЛЛУУ-ВВУ (LLUU-VVU)-like development Directions, still prevail, since everyone, in their more conscious states of mind, are actually being the Humans, perfectly understand the necessity and the objective expediency of any manifestations of Constructive Activity throughout the inertial History of their eternal Existence. If something isn't up to your expectations within your surrounding Continuum, you should concentrate only on "self-developing" point of view, so that you could begin re-focusing stably into the most desired and expected Life circumstances, being the most favorable for you at the time, without having to divert from your Principles and Aspirations. The deep Meditations should help you along the way considerably.

14.16085. I can also state with certainty that along with the evidently manifested inhuman signs, you also, simultaneously are being real Humans due to the slloogrentity of ALL – it's just that you aren't yet able to stabilize your psyche-mental creative activity within the Human Levels for a considerable period of time in order to enter into other Space-Time Continuums and permanently perceive yourself "there" as Humans naturally. Up until you master the permanent focusing into Levels, inherent for the dynamics of АИГЛЛИЛЛИАА (AIGLLILLIAA) and ОРЛААКТОР-Ииссииди (ORLAAKTOR-Iissiidi) Formo-Creators, you will not be able to become true Humans. However, as soon as you achieve this, without any reservation to even the superior Levels of ИНГЛИМИЛИССА (INGLIMILISSA)- and АРГЛЛААМУНИ (ARGLLAAMUNI)-Ииссииди, the surrounding Reality, quantized by your Formo-Creators by exclusively the high-frequency Information, will radically change; far more qualitative mechanisms of the extended existence in the much better and universal Forms will emerge as well, along with completely improved social interrelations. And the dynamics of your FCA will also steadily fixate within Levels, contributing towards the СФУУРММ (SFUURMM)-Forms of the powerful highly-sensuous Intellect, coupled with highly-intellectual Altruism (the specific states of УОЛДМИИ-И (UOLDMII-I) and СТООЛЛМИИ-СВУУ (STOOLLMII-SVUU)).

14.16086. This is why the ИССИДИОLOGY is being the most secure Path between your "current", vague, misty and semi-conscious state of existence, and these scenario variations of your highly-qualitative "Future", where the globally-prevailing Positivism superimposes over the currently mutilating all your plans and creative initiatives, egocentrism, and becomes the foundation of all your Existence as well as the vital necessity, without which you simply unable to creatively implement your Life. For instance, if your ability to breathe was taken away from you now, you would cease to represent any type of realization Form of Self-Consciousness within the current Form-System. Just in the same fashion, if someone "there" could manage to "remove" your constant and deepest experiencing of Altruism, or deprived you of the ability of highly-sensuous construction and your Aspiration towards the positive social relationship, the total meaning of your Existence "there" would be completely lost. Such re-focusing tendencies will accompany every instant of your Existence up until the point, when you will manage to consciously "pass" the complete constructive dynamics, structuring by their specific НУУ-ВВУ (NUU-VVU)-Configurations of already fully synthesized Levels of АИГЛЛИЛЛИАА- and ОРЛААКТОР-Ииссииди (ORLAAKTOR-Iissiidi) (which are inherent to ЛЛУУ-ВВУ (LLUU-VVU)-Forms), through the inertial synthesis dynamics of your Sub-Consciousness and Supra-Consciousness.

14.16087. The implementation of that will require quite an enduring inertial period of time (despite the fact that we, the People, will have more universal Existential Forms by then), even though this timely period will be experienced by all of you completely different, than now. You begin to probe these Levels intuitively at this point, however, the multitude of various “inclusions” within the global dynamics of the information space of your Self-Consciousness, destructive in relation to the quality of СФУУРММ (SFUURMM)-Form ВВУ(VVU)-Configurations of our “future” Existence, doesn’t allow your Formo-Creators to steadily and purposefully re-focus in a desired development Direction. As these Levels Constructive Activity degree increases within your Self-Consciousness, so will the potential opportunity for the implementation of the high-frequency dynamics of the realization Areas of Constructive Activity of Formo-Creators of the more profound Levels – УЛ-ГЛУУ- and ССААССФАТИ-Иисииди.

14.16088. I have already told you that you also cease to experience yourselves as People beyond the activity of the superior Levels of АИГЛЛИЛЛИАА (AIGLLILLIAA)- и ОРЛААКТОР-Иисииди (ORLAAKTOR-Iissiidi). It is very difficult to describe These of You, into whose Super-Consciousness of already existing realization Forms you will once “re-project” by means of “inferior” УУЛ-ДМ- and ССОУИССТ-Formo-Creators dynamics, since in “these” Levels of Energy-Plasma You have absolutely no such deterministic exactness, which is inherent to your “current” Perceptions regarding the surrounding Reality. It’s almost like trying to describe the exorbitant Essence of the Cosmos using regular semantic terms... There you “just” immediately experience “Yourself” as Planetary (in our subjective opinion) Entities, who not only aggregates the realization possibilities of Human Forms within themselves (which is in your Super-Consciousness always remains as already synthesized Experience, activating in your Configurations the dynamics of the profound realization of Yourself in this exact capacity), but also the Self-cognizing dynamics throughout all other Proto-Forms, which are simultaneously with ЛЛУУ-ВВУ (LLUU-VVU) –Forms are being projected by the Planetary Entity ГРЭИЙСЛИИСС (Earth) into all possible Levels of the slloogrent Tertiary Energy-Plasma.

14.16089. It is fairly true, that in the “future” most qualitative constructive realization conditions, (of these currently subjectively perceived), You practically transform into the Collective Intellects of the Superior Planetary Levels Formo-Creators. And if you ask me: - “So, who are we “Out There”? Birds? Animals? Oceans, mountains or skies?”, - I will only be able to lie to you, and tell you something like: “yes, “THERE”, All of You – People,, “birds”, “animals”, “oceans”, “mountains”, “skies”, and much more... but not as these Forms, which we “currently” subjectively perceive, but rather as that their Superior Essence, which manifests so strangely within current three-dimensional Continuums.

14.16090. However, it is totally meaningless to state, that you only transform into “this”, or only “that”, while THERE, since within lesser dimensionality ranges not only you simultaneously synthesize absolutely all possible Existence Experience of human or “human-like” nature, but also accumulate within the Super-Consciousness of all possible Constructive Potential, inherent to the infinite multitude of various inhuman Proto-Forms. You become the Formo-Creators of precisely THESE Levels only because you mastered to synthesize within yourselves and integrate into the Super-Consciousness all the Experience of all Proto-Forms, simultaneously developing in various Synthesis Directions, associated with the diffusive constructive dynamics of ЛЛУУ-ВВУ (LLUU-VVU)-Forms. It is worth mentioning, that within even higher quality dimensional ranges, the constructive dynamics of Your Universal Self-Consciousness Focus directs Your Interests into

the variable Spheres of energy-informational interrelationships between the Planetary and Stellar Essences regardless of the System, currently perceived by us as Galaxies and Nebulas, They actively reveal. The Experience, which you now synthesize within the Earth Forms, is being, perhaps, one/billionth part of the aggregated Experience, which you simultaneously accumulate in the specific conditions and Forms of other Planetary and Stellar Essences.

14.16091. These of You, whose Cosmic Creative Activity at this point greatly exceeds the capabilities of Planetary Essences, also possess certain qualities, which, from the position, let's say, ЭЙЯАА- or СВААГАЛИ-Иисииди Creators might look "egocentric" and "inferior". The integrated Collective Intellect of the Planetary Essence is, actually, the transitional Form for the realization of various diversity of the Planetary "Egoism". Any Planetary Essence within each Level of specific manifestation of Its Forms also undergoes through all phases of qualitative Self-Determination, beginning from the necessity of elementary Self-sustaining in unfavorable conditions (which is actually a result of Its inner eggerolift (эгллериолитивной) dynamics), finding solutions to transform these unfavorable conditions into more harmonious and balanced ones, all the way to Cosmic Acts of stupendous Self-sacrifice in favor of more qualitative Forms (something, which we subjectively call "Planetary death", Stars, quasars and even entire Galaxies).

14.16092. Something, which you call "Earth" – is merely a very thin section of certain physical Form-Systems, whose "densly-plasmous" Forms are capable of frequency manifestation and implementation only within the very narrow perspective of the global Cosmic Construction. This low-frequency range represents certain transitional line between certain separate Collective Animal Intellect Forms and other Nature's Collective Intellect Kingdoms (vegetative, mineral, variously "mixed" – synthesized – between them, as well as an energy-informational – various ODS and ФЛУУ-ЛУУ (FLUU-LUU)-complexes). They are all unified by the Triunity of Essential Life Forces: ЛААНГХ-КРУУМ and 12 Quality Aspect helixes. In the "human" Form ЛЛУУ-ВВУ (LLUU-VVU) is THE-Love-Wisdom and THE-Will-Intellect Qualities. There is a way for ultimate sequential "re-projecting" of your Self-Consciousness along each of the Proto-Form synthesized development Direction into Constructive Activity Levels of УУН-ГЛИИРИДА, through which Ultra-Consciousness Formo-Creators "re-project" into the Proto-Consciousness dynamics, where You, while experiencing Yourselves as ААНИ- , РААКЛИМА- and СВААГАЛИ-Иисииди Creators, are being an Element of Collegial Intellect АЙФААР to a much greater degree, than all Formo-Creators "projections" of any Planetary Levels of the Tertiary state of Energy-Plasma.

Part XVII

Causal Self-Consciousness influence processes onto the Forms manifestation dynamics of the surrounding reality

14.16093. The latest achievements of the modern science - super string theory (in its 5 variations) and M-Theory – both came quite close to understanding of the essence of the very complex “mechanism” of slloogrent (слюогрентной) self-organization of simultaneous energy-information interconnections within multi-qualitative Levels of Energy-Plasma. Despite its level of over-simplification, superficialism and multitude of erroneous interpretations of the true Causes, organizing all the synthesis energy-informational dynamics of our reality, the super string theory (as opposed to the orthodox science), at least provides our Self-Consciousness Formo-Creators the specific energy-informational preconditions regarding the fact, that volumetric multi-dimensional Space of the observed Macrocosm – is only an unimaginably microscopic fraction of the more diverse, and still inaccessible to our understanding and cognition instruments, Space-Time, in various other manifestations of which, totally different types of Universes exist, bearing completely different than we can imagine, attributes and inherent only to them, analogs of known to us Forms of “Galaxies”, “Stars”, “Planets” and many other “cosmic objects”, which aren’t able to reveal by means of their peculiar Configurations within the synthesis conditions of the reality, surrounding us.

14.16094. It is my subjective opinion that at this stage of our science development, the superstring and M-theories, although not yet experimentally and purely mathematically, managed to come real close to the more authentic Idea regarding the origin and manifestation – only for us! – Of All, That we habitually define by the term “surrounding reality». However, scientists are still missing in-depth elaborated, logically valid and precisely formulated Information, contained within the IISSIIDIOLOGY, which can assist them in acquiring of more profound cognition of diversified Macrocosm structure Principles and Global Existence Laws, revealing throughout all its diversity and slloogrentity (слюогрентность) of energy-informational interrelations, aggregating the material scopes of application of collective intelligent Construction of myriads of Proto-Forms with their more qualitative Spheres, simultaneously existing throughout all possible levels of their mutual frequency (sub, and meta-vibrational) manifestation. The Revolutionary New Science, inherent to the more qualitative organization system of the “future” human (without quotation marks) society, sequentially “re-projecting” it’s vital existence dynamics into the more universal and promising paradigm of “bio-plasmous” and “photon-plasmous” Forms, can’t be constructed on the limited mind activity, coupled with disuniting logic.

14.16095. The “future” Continuums, structured by “bio-plasmous” analogs of our current HYY-BBY (NUU-VVU)-Forms – is the active constructive intuitive thinking dynamics manifestation sphere, constantly infused by the powerful mental and highly-sensuous inspiration flashes within our Self-Consciousness, initially perceived as vague insights, but later developing into the shattering, sometimes even stupendous discoveries. In this respect, high-frequency IISSIIDIOLOGY CΦYUP-MM (SFUURMM)-Forms – is actually the best possible way to steadily develop and improve the primordially-existing extrasensory attributes of our Self-Consciousness. Currently, not a single scientific discipline, including quantum physics, is capable of offering any type of Universal Perceptions, which can closely involve the “individual” mental activity into the still inaccessible for the limited Perception systems of majority of “people”, dynamics of the New Worldview, inherent to the human society conditions of the nearest “future”.

14.16096. The primary super-string theory concept that the most profound levels of “matter” can be positioned in a form of certain “strings” – no matter how hypothetic and “indivisible” it can be presented (but can there be any limit to the differentiation and transgression process of any type of “matter”, which in reality is totally immaterial?), completely differs from the IISSIIDIOLOGY concepts and Perceptions: the orthodox superstring concept doesn’t take into account the slloogrentity and skrruullerrtity of All – the condition of simultaneous diversity, super-variance, multi-dimensionality and multi-quality of each, supposedly, “indivisible spot”, which forms the “geometric” dynamics of any Level of frequency “manifestation” of all realization Forms within Energy-Plasma. You should already know that variously detected and registered by us, the elementary particle dynamics (quants, quarks, leptons, and multitude of other Conscious Fields of other Forms constituents) is implemented simultaneously throughout all possible Synthesis Directions of Twelve Pristine Quality Aspects.

14.16097. They don’t have any specific development trajectory throughout Space-Time, since they aren’t bound to the Configuration of a single realization Form; instead they represent the integral of certain force (energy-information) interrelations with one another throughout each of the duvuyllerrt (дувуыллертный) dimension. However, the mere fact of such “immaterial” Macrocosm interpretation by superstring theory is, by all means, a step forward, since it allows not only the more detailed analysis of “immaterial” dynamics of Energy-Information, but also provides the inquisitive and patient Truth researchers at least theoretical opportunities of its manipulation within the informational space of Self-Consciousness, uniquely identifying, and thus, overcoming the emerging instances of impossibility of simultaneous perception of multi-qualitative slloogrent (сллоогрентной) dynamics of All.

14.16098. For instance, the experienced architect and engineer would easily be able to determine all the nuances and peculiarities regarding the building’s internal and external layout, position and location of all windows, doors, staircases, roof and the like, while looking at the building’s construction draft; however, a stranger, with no architect or engineer experience, looking at the same draft, would never be able to determine any of that. Similar to that analogy, we are also forced at this time to utilize the specific scientific terminology, tremendously limiting our Perception of the surrounding Reality, and consider certain “strings”, existing only on “quantum” level. However, if we imagine “quants” as singular slloogrent “dots”, which “self-propel” within the Eternity throughout all possible Directions of its simultaneous multi-qualitative manifestation, then there will be no more customary (for scientists) quants, but rather certain dynamic objects, possessing the individually intrinsic degrees of the intellectual self-organization. I must note, that some provisions of the superstring theory were chosen for the demonstration of certain CΦYUPMM (SFUURMM)-

Forms not because currently this theory reflects the most IISSIIDIOLOGY's Perceptions or Notions degree, but merely as means of the schematic expression of this Knowledge, while trying to propagate this very complex Energy-Information, structuring the high-frequency Sub-Consciousness Levels.

QUESTION: In connection to the above mentioned, I came up with a following subjective analogy: there is a certain Reality, absolutely inaccessible to our understanding, which we distortedly perceive as real and existing on its own, within the universal manifestation conditions of which the particular dynamisms, which we interpret as certain clashes or diverse interrelations of certain multitudes with some other multitudes, occur. In order to somehow explain this complex slloogrent dynamics, the scientists have created extremely limited and primitive analogy of this Reality, in a form of certain chess game, through which they strive to imitate and construct various interconnecting combinations, non-existing within the true Reality, or which have totally different and yet unknown to us organizational structures of much more complex Universal Laws...

14.16099. – Yes, dear Ммааллссм, this analogy indeed has some resemblance to the situation at hand! The scientists indeed have created the game; all the moves in this imaginary game are stipulated by particular rules, imposed by the discrete logic of mind, greatly narrowed in its Perception, on the basis of purely subjective interpretation of unimaginably tiny fraction of the global Nature's dynamics, which, according to the very limited number of currently accessible attributes, they at least somehow are capable of differentiating. This definitely is a good comparison, considering the fact that quite simplified Perceptions of many scientists regarding the Nature and the true energy-informational Essence of Formo-Creators (for instance, elementary particles or the electromagnetic fields), currently limit the possibilities of the advanced Cognition Process of the surrounding Reality in the same degree, as the same process occurs throughout other Temporal Fluxes and Continuums by means of ignorant Perceptions regarding the fact, that the Earth is flat, or that it is being a center of the Whole Universe. The same can be said about the very narrow and shallow Perceptions regarding Nature and the so-called “Big Bang” conception, which supposedly, became the initiating kick-start for everything in the Macrocosm.

14.16100. The True Nature of the global slloogrent dynamics of Space-Time, together with the dimensionality, inertially enabled by both of them, capable of being reflected within the limited vibrational conditions of our surrounding reality only by the very least of its actual Essence, is still completely unexplored; their mutual interrelated dynamics are still perceived only linearly and chronologically (except certain general notions within the theory of relativity, which talk about the possibility of change of time intervals); as of the dimensions themselves, they are simply being presented as purely mathematical attributes, being added by the theoreticians as certain variables, which are then referred as being “the fourth”, “fifth”...or “tenth” dimension. Such narrow, purely schematic and mathematic interpretation of the complex and diverse organizational Nature of Space-Time dimensional dynamics, as well as many other conclusions of quantum world scientists, aren't able of satisfying the meticulous researchers, striving to the best of their ability to cognize the Essence of All.

14.16101. It is already discovered, that one of the fundamental physical constants - fine-structure constant (represented by the α sign and equaling approximately $1/137$, according to physics), defining the electromagnetic interrelation force interaction between the particles (interrelation of the two

types of energy: a) the amount of energy necessary to overcome the electrostatic repulsion between the two electrons, while drawing them together out of the infinity to a particular distance, and b) the photon energy), has substantially different values, depending on time and place. This is actually a new evidence of the fact that the electromagnetic interaction contravenes the Einstein's equivalence principle (which states: strength of the gravitational interaction is proportional to the gravitational mass of the body; the force of inertia is proportional to the inertial mass of the body), according to which the current constant has to be permanent, regardless of time and place of its evaluation.

14.16102. By this I only wish to highlight the fact that the mathematicians and physicists utilize their own Perceptions, while the Real Life dictates its own, in which even the answer to such simple question as: "How much is two by two?" only in very exceptional cases could actually equal four. For instance, even I – the complete amateur in science, would ask the counter-questions, such as: "what exactly, out of all the multi-qualitative dynamics of the surrounding reality is understood under the equation "two by two"? Which type of the energy-informational interrelation is implied under each of these two terms? What Aspect sum and exactly which of the twelve Pure Qualities enter in the dominant interrelations here? What are the background qualities participating at that, and so on.

14.16103. If, for instance, some part of Quality Aspects, structuring the dynamics of the first "two" doesn't correspond to some other Quality Aspects of the other "two", the expected result will never occur! Our mind, not in possession of this Information, available only to intuitive (Sub-Consciousness) Levels of Perception, irresponsibly offers us the solution, that two by two equals four, but in reality this solution is fake and fabrication; it is a result of a very limited logical fantasy, which sometimes can actually lead towards the catastrophic consequences... The scientists should therefore get to the very bottom of all this, including the issue of Time, and how it is connected to the dynamics of dimensional and Spatial formation by means of certain "quantum" mechanics within our Self-Consciousness.

14.16104. You already know that our Self-Consciousness represents the unified, and not in any way, shape or form, divisible dynamics of Formo-Creators, coupled with СЛҮИ-СЛҮҮ (SLUI-SLUU)-Creators, simultaneously synthesizing all the Levels of constructive slloogrent Energy-Plasma Dynamics, which in turn represents the result of the energy-informational interrelationship of the infinite multitude of multi-qualitative Force Fields – realization Conscious Fields of various synthesis Construction of multitude of Collective Intellects. If, at least some of the truly talented scientists of various research fields would treat the IISSIIDIOLOGY's Perceptions with a certain degree of Interest, such energy-informational symbioses would produce truly unimaginable – according to your current Perceptions – discoveries and practical achievements, which would actually "re-project" the CAF-DRF-dynamics of our Collective Consciousness Paradigm into the subjective Realities and Continuums, where the scientific, intellectual and spiritual development of all "human race" is possible in truly fabulous and stupendous proportions!

QUESTION: We understand the Constructive Activity as certain dynamics of certain synthesis Processes, which are being, in fact, what we call Inertia. If everything already exists, then the very notion "Process dynamics" loses its sense. I mean that we should probably perceive the Constructive Activity somewhat different.

14.16105. Yes, dear Лифмида, of course. The entire picture of the most profound and comprehensive inter-qualitative Synthesis is already primordially “painted” in a very Essence of the Energy-Information, sloogrently structuring all the Configurations of all Forms of vibrational (as well as all unknown to us types of meta-vibrational dynamics) manifestation of various Collective Intellects, which form Everything, which I subjectively imply under the term Energy-Plasma. When we discuss any inertia processes, or any type of the synthesis dynamics, specifically implemented only within dimensional Levels, inherent to it; when we talk about any re-focusing or “re-projecting” process of Us, as Formo-Creators and СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators, or about frequency or any other type of meta-vibrational “shifts” within the global sloogrentity of always existing Configurations, please remember, that under the term “shift” I always imply certain individual energy-informational “alteration”, but not within the Form-System itself (since any type of deformation activity simply isn’t possible there!). This is merely a conditional inertial adaptation dynamics (subjectively perceived by any Form) towards the global quality “condition”, which primordially is inherent to the simultaneous state of certain Elements, which I have conditionally “isolated”, and which is structuring the Universal Consciousness Focus, including the UMPI (УМПІ) and DRF, FIMI (ФІМІ) and CAF.

14.16106. That means that the Inertia, revealing, for instance, in the 0-4-dimension Energy-Plasma Configurations, is actually being a direct consequence of various “local” tensions formation within the CAF-DRF-dynamics of Form- and СЛҮИ-СЛҮУ (SLUI-SLUU)-Creators; within the 4-5-dimensional Levels it results in more harmonious and balanced energy-information interrelationship inside the ФІМІ-УМПІ-Creator dynamics of the current range, the more profound ФЛАКС (FLUX)-Forms synthesis state of which is much less likely to exhibit the dissonance dynamics of previous tensions degree between various Formo-Creators. The effect of diverse inertial dynamics, disrupting and altering absolutely nothing throughout the global balanced state of multi-qualitative Energy-Information, is capable of being revealed only throughout the Tertiary Energy-Plasma Collective Intellect Levels (since Its Secondary conditions show absolutely different types of interrelationships).

14.16107. I once again wish to remind you about this because the term “Energy-Plasma”, which I often utilize, is being fundamental in the IISSIDIOLGY. In the “Fundamentals” book series I have elaborated the notion Energy-Plasma quite thoroughly, and thus you should realize that what the scientists imply under such terms as “the energy” and “the plasma” completely contradicts the meaning of an indivisible notion “Energy-Plasma”, utilized in the IISSIDIOLGY, which actually implies the cause-consequence (as we define them – synthesis, even though it’s not really true), energy-informational interrelationships, allowing all Collective Intellectual Forms the opportunity of constructive self-expression throughout all the qualitative combinations of specifically organizing them Energy and the Information.

14.16108. The Energy-Plasma state is unimaginably more diverse, unbelievably more “profound”, more “fine” and, I would say, more qualitative in its energy potential, than any characteristics of known to us, intranuclear relations. I am saying “more qualitative”, because in case with intranuclear relations we are limiting ourselves with certain perceptions regarding the particular types of particles (fermions, and boson fields, which are generated by fermion interactivity), owing to which the visibly perceived and experienced surrounding reality is formed, part of which is represented by the dynamics of Forms within which we currently in-focus, since these Forms are actually also a result of interaction of these particles and fields, structuring the whole our surrounding “material” Macrocosm. There are totally different Processes ongoing on a more dynamic (“deep”, “profound”)

Level of our Cosmic Construction, which to “current” us may seem totally inaccessible, unclear and incomprehensible; that is because their very Nature (synthesis schema) is completely different, and the Directions of energy-informational (force) interrelationships (the constructive realization system) between them totally differ from these, which are inherent to form-building processes of our subjective Reality, where, for instance, quite specific electric and magnetic field range of force interrelationship, correlates to the specific dimension type.

14.16109. Once again let me remind you that any synthesis types and frequency dimensional ranges represent the subjective result of the reflection (by means of the multitude of *duvuyllerrtno* (дувуйллертно) superseding Form-Systems, structuring the spatiotemporal Continuums) of self-conscious processes aggregation, which initially are being implemented throughout the Energy-Plasma, with active energy-information interactivity (Synthesis) of the infinite multitude of realization Forms – the carriers of one, two, or many Pure Cosmic Qualities, powerfully dominating over the constructive Aspect dynamics of other Qualities (where other Conscious Forms act as dominant carriers). Every single Continuum, out of the infinite number of them, simultaneously interacting with one another by means of the various “parts” of their *slloogrent* Configurations, is constructed by the diverse dimensional combination – the types of energy-informational interconnections between the constructive dynamics of various Formo-Creators.

14.16110. This concerns not only all the multitude of “human” and *lluuvvumicheskikh* (ЛЛУУВВУ-мических) Continuums, created throughout various Temporal Fluxes by means of the synthesis dynamics of Dominant Formo-Creators, inherent to ЛЛУУ-ВВУ (LLUU-VVU)-Forms, but also the various other Continuums, constructed by the diverse dominant Formo-Creators dynamics, utilizing the subjective Perceptions, individually inherent to various Proto-Forms. That is why there are different dimensional types existing throughout various “human” and proto-form Continuums. But you shouldn’t confuse the notion of the dimensionality with SC’s types, each of which is structured by the multitude of specifically synthesized dimension types, forming as a result not a single SC, but rather a complex-configuration *slloogrent* dynamics of the multitude of differently-directional Continuum groups, *duvuyllerrtno* (дувуйллертно) transforming into each other, unattached from any particular dimension frequency ranges, but capable of “stretching” and “narrowing”, depending on the quality dynamics, manifested by various Formo-Creators of various Proto-Form Consciousness types.

14.16111. As a result of the *duvuyllerrt* (дувуйллертной) diversity of these energy-informational processes throughout the global inertial dynamics of the Tertiary Energy-Plasma *slloogrentno* (сллоогрентно) – sort of “ones inside the other ones and vice versa at the same time”, the various Levels of sub-vibrational (sort of “BELOW-vibration”), vibrational, and meta-vibrational (sort of “OVER-vibrational”) manifestations are formed; these various manifestations consist of the multitude of realization Conscious Fields Forms, along with СЛУИ-СЛУУ (SLUI-SLUU)-Creators – synthesis transformers of these force (inner-aspect, inter-aspect and inter-quality) interactions, subjectively interpreted by us as electric and magnetic activity, electromagnetic (photon) and radio emission, as well as intranuclear, chemical, thermal, baric, ionization, biological and many other types of processes, which in reality represent inertial dynamics of the simultaneous constructive interaction of various СФУУРММ (SFUURMM)-Forms, inherent to the various types of Collective Intellects, existing in a very diverse Pure Cosmic Quality Aspect Synthesis.

14.16112. Please also keep in mind that the very Forms of these Conscious Fields, which we define

discretely and separately from one another, are not in fact, being in any way separated processes: for instance, gravitation fields, inherent to our three-four dimensional range, emerge upon the active interaction of electric and magnetic fields, although they can be created by any other Energy-carrier types; the only thing is – in this case they would lose some of their properties, subjectively “ascribed” by us to the attributes, which, are supposedly, inherent only to the gravitation: for instance, psycho-mental conditions of powerful sympathy or antipathy, which physically and physiologically either connecting certain “people” together, or antagonizing their relationship so much, that the it is simply impossible for such “people” to either psychically or physiologically remain together. They also are capable of actively interacting with quants of electromagnetic fields – photons, for example, refracting, reflecting or rolling them up into “cocoon”; the electric fields themselves, however, not possessing the rest mass, also can interact with one another upon the application of certain tension, thus forming the various quantum effects.

14.16113. Considering the tremendous difference between the fundamental Perceptions of “exact same” (as it appears to be) processes and occurrences, which are utilized in the IISSIDIOLGY and the orthodox science, I deem important to provide some information for these of you, who aren’t really following the scientific research. You can see for yourself that the superstring theory represents one of the multiple constituents of the Knowledge, which is provided IISSIDIOLGY. Let’s begin with the understanding that the term “string” in quantum physics doesn’t carry the same meaning as the string, used in music instruments. Instead it’s a quite abstract mathematical notion, adopted for the modeling convenience within the conditional n-dimensional (not existing in reality) coordinate system; it’s a “part” of multi-qualitative slloogrent dynamics of skrruullerrt system, manifested within Space-Time, representing the specific type of Energy-Plasma, which, according to its dimensional characteristics, relates not only to well-known to us elementary particles and wave fields, but also other types of sub- and meta-vibrational synthesis dynamics of Energy-Plasma.

14.16114. So, in reality, there are no strings, allegedly structuring the Space-Time; however, we could still utilize these terms and notions in order to detail and concretize of other, more global processes, which otherwise would be impossible to anyhow describe or imagine. It’s quite the same when I utilize the existing notions of polyhedrons: tetrahedrons, octahedrons, hexahedrons, dodecahedrons, icosahedrons and others, which don’t exist in reality, but on the basis of which it becomes possible for me to explain the schematics of the dimensional formation mechanism, the energy-information interrelationships “inside” of the global dynamics of Energy-Plasma, as well as the Synthesis Schema within and between certain Proto-Forms, not to mention the principles of duvuylerrt formation of multi-qualitative dimensional Levels.

14.16115. The variable vibrational frequency and order (sub- or meta-vibrations) of each string creates the effect of diverse Form Configuration manifestation, which, considering their unique curvature (“geometry”), specifically structuring absolutely everything throughout the Macrocosm by means of their inertial dynamics of inherent to them energy-informational interconnections. Each excitation state (active, manifested only within the specific conditions) of each string correlates to its own type of the synthesis Form-Creator dynamics of sub-elementary, elementary, super-, hyper-, and proto-universal particles.

14.16116. Within ranges of the most inferior excitation state (0-1 dimensional) the Form-Creator dynamics of energy-informational interrelations of certain strings with Formo-Creators of other strings, implementing various other Synthesis schemas (with sub-Aspects or other Aspects of their

own Quality, or sub-Aspects of other Qualities), are expressed quite weakly, therefore they tend to basically, “loop back” (or “ground”) the Configurations dynamics of their own sub-Aspects onto “themselves” – i.e. the energy-informational interrelationship implementation with only these string Formo-Creators, Configurations of which correspond with tier own Configurations in terms of quality the most, meaning that these Formo-Creators are equally conforming one another. This becomes possible to “conditionally free” ends of such strings, or in reality – by means of mostly resonating Configuration parts of inertially under-synthesized “karma-fractions”, aren’t yet capable of establishing resonant relationship with sub-Aspect Formo-Creators of other Qualities.

14.16117. Any gravitation dynamics, revealed upon the dominant interrelations of electromagnetic fields (with the evident superiority for “human” Dominants manifestation), indirectly reflects the compatibility or incompatibility degree of energy-informational Configurations of certain types of their Form-carriers, narrow-specifically revealed within the current Level of Energy-Plasma. In “human” Continuums this “attractor” dynamics is manifested in its own unique way (not only as masses attraction, but also as psychic, intellectual, spiritual, professional and any other constructive inclination of “people” towards one another, as well as various situations, conditions, fulfillment of cherished Beliefs and so on), while in Continuums, dominantly comprised of CΦYYPMM (SFUURMM)-Forms of all other Proto-Forms, its being performed in its own very unique individual fashion, completely unknown and inaccessible to us.

14.16118. However, since each of the Proto-Form Self-Consciousness, manifested throughout the “human” Continuums, being the diffuzgentnyy carrier of the specific inter-quality Synthesis schema also contains one of our inherent Dominants - (either VSE-Volya-VSE-Razuma - Aspects of “electricity” effect, or VSE-Lyubov-VSE-Mudrost – Aspects of “magnetism” effect), and on the level of background interrelations with us and other Proto-Forms also shows quite high degree of activity of one of its inherent Dominants, these Proto-Forms also become subject of gravity laws, inherent to “human” Continuums; only in their Self-Consciousness types OUR gravity type is formed on the basis of the interactivity of one of their Dominants (either VSE-Volya-VSE-Razuma, or VSE-Lyubov-VSE-Mudrost) with background activity of Aspects of the second of these Dominant Qualities, considerably weakened in connection to its high tensions degree in relation to the other Dominant Aspect dynamics. Therefore within OUR Continuums OUR gravity affects other Proto-Forms absolutely differently than HYV-BBY (NUU-VVU)-Forms. Just in the same fashion, the underdeveloped “human” HYV-BBY (NUU-VVU)-Form-Types, which structure the inertial dynamics of various Continuums, also subdue to CΦYYPMM (SFUURMM)-Forms, created only by their own Dominants and “gravity” laws.

14.16119. Hence the superstring theory automatically includes the gravity notion, but due to the string “rolling-down” and “localization” attributes, such notion as Infinity (quite uncomfortable and difficult in terms of discussion for your currently limited Perception mechanisms), and inherent to the field as well as the gravity theory, is absent from it. The superstring theory, as well as its fundamental basis – supersymmetry – allows for the quantizing (“looping”, soft of “limiting” the infinite tendencies) of supergravity (the synthesis dynamics of low-frequency, mid-frequency and high-frequency energy-informational interrelationships), inherent to 3-4-dimensional range; and after conditionally “filtering” them off their slloogrent (infinite) Nature, unify into single whole only these particles, the nature of the inertial manifestation of which within the current 3-4-dimensional Energy-Plasma range correlates with various quantum statistics (i.e. exact conditions and parameters of energy-informational interrelationship).

14.16120. What do I mean? At first let me remind you once again that the superstring theories, as well as some of supersymmetry provisions are utilized here for the energy-informational manipulation of corresponding Perceptions only in a form of an initiating “seed”, i.e. as a certain, more or less suitable “departure point” in order to continue our logical conclusions and build on their more universal basis absolutely new, far advancing beyond the limits of both of these theories, intuitive Perceptions regarding the slloogrent Macrocosm construction, beginning with the theoretical review of various intranuclear interrelations between the particles, all the way up to such “fine” energy-informational interconnections, of which the quantum physicists aren’t able of even thinking now (due to the complete absence of any mathematical preconditions).

14.16121. Moreover – the superstring and supersymmetry theories are attributable to magnitudes of such powerful electromagnetic interrelationships as various Universal macro objects, only indirectly, by means of more profound understanding of “macro processes”, which are being implemented on levels of elementary particles and fields. These fields and particles help us to get a deeper knowledge of at least some of these synthesis processes, by means of which the Collegial Universal Intellects were capable of manifesting Themselves as Space-Time, creating throughout the multi-qualitative Energy-Plasma Levels multitudes of slloogrent Forms-Systems, Realities, Continuums, Conversums and Universums. Therefore I ask the worrisome advocates of quantum mechanics please not to continue reading this Information farther in order to avoid stressful (hence, vitally dangerous!) psychic states within their Self-Consciousness.

14.16122. As of myself, I like these two theories also because within conditions of quantum supersymmetry the attributes of Infinity sort of “retrench” (mathematically “abridge”, logically localize, conditionally “annihilate”), and in their “locally-excited” state quants create the effect of attribute manifestation, inherent to the Space-Time – they “transform” into all the infinity of “intra-penetrating strings”, so vividly imagined by us. Let me remind you that each quant is a carrier of a specific, inherent only to it, Energy-Information. A single quantum transformation (certain energy-informational “shift” between the two quantum states) produces a single “quantum shift” – the alteration of previous attributes of Energy-Information of each of the two participating quants, which initiates the immediate conditional appearance of the graviton and its super partner gravitino (the $3/2$ spin particle), the realization dynamics of which in relation to all the multitude of the “surrounding” them elements, per se, results in something, which we subjectively perceive as gravity.

14.16123. This unilateral “quantum shift” of the two strings in relation to their own individual slloogrent Configurations within each Continuum (in reality representing the differently directed – in terms of the Synthesis schema – duvuyllertr groups of multi-qualitative Continuums!) creates a specific volume of certain “linear length”, which we define as “the moment” or “the instant” – something, which is very subjective and relative, but extremely volatile for our systems of Perception. The individual Perceptions regarding the length of a single “instant” within each Continuum are quite different: for instance, for Perception systems of the “human” HYV-BBY (NUU-VVU)-Forms it manifests from within the $1/250$ to $1/400$ parts of the second range, while within various Continuums of our organism’s bio-Creators or Formo-Creators of planetary, stellar and galactic Entities this range of Perception of a single “instant” either tremendously increases, or tremendously decreases, sometimes in hundreds of thousands of times; the same goes for all the multitude of other proto-form Continuums, formed by the multi-qualitative CΦYYPMM (SFUURMM)-Forms.

14.16124. Therefore it is essential to remember, that every instant is absolutely conditional and

relativistic in its illusion “lasting” nature, since it represents the subjective reflection of the specific dimensional (multi-qualitative and differently directional in terms of Synthesis) dynamics, being individually implemented not only within each type of Self-Consciousness, but also in each psychic condition of each individual Proto-Form. Here I wish to highlight the fact, that throughout the whole Universe – the space-time, inertial slloogrent dynamics of Its Self-Expression, there can’t exist two absolutely identical moments, since each such moment is being the super-original slloogrent dynamics, structured only by the inherently specific Energy-Information, completely regardless (and its very important!), through the Configuration of which Form it is being visually (evidently) manifested throughout various Temporal Fluxes.

14.16125. Upon the total coincidence of Configurations of two different moments, resulting from the various “quantum shifts”, they would immediately resonate with one another, forming the dynamics of a single moment. If a sufficient “quantity” of Formo-Creators BBY(VVU)-Configurations participate in the process of energy-informational “collapsing” (the necessary minimum amount of YY-BBY-(UU-VVU) conglomerates, clexed by a single type of Energy-Information, identically manifested through absolutely identical psychic states of various “individuals”, belonging to various Temporal Fluxes), then such phenomenon as “biological shift within Space-Time” from one historical era into the other, when a “human”, while continuing to experience himself as the same exact “individual”, instantaneously realizes that he lives now either within completely different part of the chronological time, or, within a completely different geographical spot of his or her own Form-System. If, however, the amount of BBY(VVU)-“spectrums” within the HYU-BBY (NUU-VVU)-Configurations of various “individuals” is not sufficient for such phenomenon to take place, then, upon the certain degree of similarity of the specific energy-informational dynamics within evidently differently qualitative scenarios the sub-chakra “shift” (“re-projecting”) of the CAF-DRF-dynamics of Formo-Creators from one “individual” HYU-BBY (NUU-VVU)-Configuration into the other “individual” HYU-BBY (NUU-VVU)-Configuration; at that, the “déjà vu” effect, variously realized by the “individual” can take place, unless it wasn’t the result of stress, with the following it, “death” refocusing).

14.16126. The “quantum” shift between the two strings applies to the total amount of Energy-Information, clexed at that instant throughout Configurations of absolutely all possible Forms, structuring the slloogrent conditions of Space-Time, and is created by means of frequency “superimposing” (“projecting”) of slloogrent Configurations of each string. The УУЙЙ-ЛЛСС-Principle of Slloogrentity-of-All provides an opportunity to sort of “arrange” all possible strings, structured by the multi-qualitative Energy-Information as if it’s an infinite amount of “fascicles”, or, rather, birvulart skloongms (the dynamics of an infinite multitude of variously-synthesizing Configurations, “fractually” duplicating one another throughout every single spot of its resonant interactivity), directed throughout the global slloogrentity of the Space-Time they simultaneously construct, along the multi-qualitative energy-informational interrelations, and, at the same time, interpenetrating into one another at each single “spot” of the differently-directional resonant interactivity. This allows me, by means of this quite primitive fashion, to express the multi-complex inertial dynamics of the Principal of Slloogrentity of each Form (the specific carriers of the particular “part” of the slloogrent Energy-Information), which you still aren’t able to associate with the condition of Single-Momentness.

14.16127. Hence, because of this incredibly small “geometric” difference, created by the multi-qualitative energy-informational interrelation between “tetrahedrons” Configurations of various Forms, and which is specifically manifested between the two instances of “quantum gravity” (in a

form of the specific Space-Time dynamics, created by the frequency “shift” of the two superstrings in relation to each other), the infinite quantity of resonant “shift” points is created within the energy-informational state of the differently-directed, multi-qualitative “string fascicles”, revealing all the attributes of the hyperspace tunnels, or “quantum black holes” (collapsars), which in turn create the maximal number of opportunities for “quantum transitions” of the CAF-DRF-dynamics of Self-Consciousness Formo-Creators between the various resonant zones of the global slloogrent dynamics, inherent for all types of Forms of the current type of the Collective Intellect, inertially manifested within the current range of Energy-Plasma. That is precisely what I call the zero ingredients, and which are characterizing the CΦAAYΦΦ-state (something, which in physics is referred to as “Wormhole”, for more detailed information see the IISSIIDIOLOGY Fundamentals, Volume 1)

14.16128. The individual attributes of each of the infinite number of zero ingredients, structuring the inertial dynamics of each multi-qualitative “instant” of any simultaneously manifested dimension, are preconditioned by the peculiarities of such synthesis processes, which are being implemented within each of the “quantum black holes” – in the dynamics of each single narrow-specific “instance of the qualitative resonance”, where only the specific zero ingredient can be revealed. For instance, within “quantum black holes”, structured by the wave length, which is smaller than that “spheroidal” dynamics, which is created as a result of the Energy-Information Flux multiplexing up to its maximum allowable volume limit (beyond which the powerful “deformation” - the distortion of attributes – of the current slloogrent Configuration of the manifestation Form of Energy-Information begins), the Self-Consciousness of any Form has certain capabilities for the constructive manifestation, while in case with “quantum black holes”, created, for instance, by the elementary particles, the wave length of which is larger than the “maximum allowable veracity range”, it considerably limits the realization capabilities of Self-Consciousness Forms, revealing through such zero ingredients.

14.16129. Within 3-4-dimensional range the Form-Creator Configurations of the conditional types of the imaginable “quantum strings”, can exist not only in a form of various “self-contained energy-informational contours”, but also in a form of “open” strings, bearing the conditionally “liberated” energy-informational dynamics (qualitatively inherent for any other, duvuyllerrt-birvulart strings), and the specifically “directed” (depending on the Synthesis schema, corresponding to their Formo-Creators) “ends”, where the diverse “D-branes”, bearing various quality characteristics, are formed. Each out of the infinite number of “D-branes” (in other words – Formo Systems) represents the very specific quality dynamics of Space-Time, inertially initiated by each “quantum shift” of the CAF-dynamics of Self-Consciousness Formo-Creators throughout all possible Synthesis Directions and specifically structuring the dimensional ranges of each Continuum group.

14.16130. All Self-Consciousness Forms, structuring with their Configurations such simultaneously multi-directional “open” strings throughout all possible Directions of an inter-quality Synthesis, require the constant source of the eglleroIf Impulses, incoming from the more qualitative slloogrentity “parts” of Energy-Information, in order to “disidentify” (disengage) the Form-Creator CAF-dynamics of each newly-formed (throughout all possible Synthesis Directions) “D-branes” with the Form-Creator CAF-dynamics, BBY(VVU)-Configurations of which structure less synthesized “D-branes”, which are clexed by less qualitative Energy-Information. In order for that to occur, they strive to “close-up” (connect) their liberated “ends” (which are mostly synthesized, hence, least active Configuration “parts”), creating, as a result of each of such energy-informational compositions, the certain angular velocity (the specifically directed synthesis sivilgs-dynamics within the “hexahedron” Form-Creator Configurations) of “gravity field quants” – the graviton-analogs of УПДУЙКК-Field

or hvasslons. This angular velocity reflects the resulting CAF-dynamics of the energy-informational interrelations every time each such energy-informational interactivity occurs between the two Dominant hvasslon Formo-Creators in relation to the mutual synthesis dynamics of background Quality Formo-Creators, represented within the current “hexahedron karma-fraction”.

14.16131. As referred in section one, the hvasslon role (as well as the other types of energy-plasma graviton-analogs or svilgsos, and avvakksons – the graviton-analogs of the Secondary Energy-Plasma), which are individually being formed throughout each Direction of Synthesis of the current Level – is the organization and maintenance of resonant processes of sequential tension elimination in the dynamics of mutually synthesizing multi-qualitative Form-Creator Configurations throughout the Energy-Plasma of the 3-4-dimensional range; that leads to the purposeful “re-projecting” of their CAF-DRF-dynamics into more qualitatively-balanced conditions (due to the deepening of Synthesis profoundness), and sequential improving of their re-focusing to the *popaam* (rorant) svilgs-spheration, eglleroliftly organizing the synthesis dynamics of ФЛАКС (FLUX)-Creators of the 4-5-dimensional range. As an additional charge of the guiding Impulse is received (due to the infusion of the new Energy-Information in a form of an additional synthesized Experience, into a string’s global Form-Creator Configuration), along with the “divorcing” of its Focuses from the svilgs-dynamics of each of the previous “D-branes” Formo-Creators (throughout all possible Directions at once!), the Formo-Creators of the “circuited onto itself karma-fraction” (string) “re-project” into a new (for them) quality condition, structuring the dynamics of the higher dimensional level.

14.16132. Thus, every instance of “circuited” of the mostly synthesized “parts” of the “hexahedron” Configuration with one another becomes the reason of a certain narrow-specific dynamics between the Formo-Creators (mostly resonant in relation to the “karma-fraction” strings of a particular inter-quality Synthesis Direction), manifested within 3-4-dimensional Levels of Space-Time in a form of the various hvasslon types – the certain gravity type carriers, individually inherent for the “karma-fraction” Formo-Creators of various Proto-Form development Directions (as I have mentioned previously, the “tetrahedrons” of the least synthesized “parts”, causing the most amount of tensions within the Configuration, are being “expelled” continuously by the newly attracted “tetrahedrons”, and resonantly gravitate into the other, qualitatively corresponding “hexahedron karma-fraction”, and as a result – don’t participate in the “circuit” process).

14.16133. In turn, their multi-quality dynamics initiates more active manifestation (Constructive Activity) of the energy-information of sub-Aspect and Aspect Formo-Creators of additional background Qualities, in relation to the “karma-fraction” superstring Configurations of the current dimensional Level (two Dominants Synthesis), which form the mutual products of their constructive activity together with partially synthesized “karma-fraction” sub-Aspects and Aspects of these strings – karmo-klofts of the current dimensional range. The latter, charged by their Formo-Creators with specific impulse towards the continuous deepening localization, vest the FLAKS (ФЛАКС)-Creators Configurations with the individual rest masses of all the super-universal “dodecahedron karma-fractions”, which become subject of the force influence of the karmo-klofts CAF-dynamics, which didn’t have their own rest mass prior to that; that ultimately lead to the powerful “geometry” change of initially “neutral” Space, where various multidimensional objects received an opportunity for manifestation as a result of multiple quality-differential spatial “shifts”.

14.16134. So, the strings, reviewed and introduced by the orthodox quantum mechanics (in a form of a superstring theory), which in the IISSIIDIOLOGY are considered slloogrent-birvulart skloongms,

which can acquire infinitely variable Configurations (depending on the structuring them Energy-Information dynamics, including various “tetrahedron”, hexahedron”, dodecahedron”, and other types of multidimensional “fractal” combinations), can in fact (with a certain degree of subjectivism!) be perceived as certain “dimensionless projections” of concurrent inertial synthesis dynamics of “emanations” and “psyche” of various Proto-Forms (constantly transmuting into “karma-fractions”, or karmo-klofts), which in turn “re-project” onto the infinite multitude of differently-directed Energy-Plasma “facets”, which, upon their even slightest force (energy-informational) interaction (“quantum” or inertial “shift”) reveals the specific attributes within the Space-Time It constructs, which I define as dimensional. Each type of such interactivity of the two “circuited” strings is being instantly reflected through the energy-informational dynamics alteration of the other strings of each of the birvulart skloongms (“string fascicles”), duvuyllerrt in relation to one another, creating only particular type of Space, along with the unique parameters of Time and dimension (individual Synthesis dynamics) within every resonant spot of such differently-directional “quantum shift”.

14.16135. When a dynamics, constructed by the infinite amount of differently-directional in relation to one another, birvulart skloongms, bearing various excitation and freedom degrees, consists of simultaneous infinite multitude of such “shifts”, then, throughout the whole Universe Infinity of Energy-Plasma (slloogrentity), the locally “collapsed” Configurations of multi-quality Form-Systems, Reality types, spatial-temporal Continuums, Conversums and Universums are being formed simultaneously throughout Space-Time, creating, by means of their multi-quality synthesis dynamics, all the innumerable infinity of sublevels and dimensional Levels of Energy-Plasma, where the energy-informational interactions of all the Conscious Field realms of Formo-Creators along with СЛҮИ-СЛҮУ (SLUI-SLUU)- and ГЛЛАА-ГЛЛИИ (GLLAA-GLLII)-Creators are being specifically reflected.

14.16136. All the multitude of elementary “formo-particles”, concurrently participating in a formation of various Proto-Forms, structuring all the inertial dynamics of Karma-Plasma of various Form-Systems of surrounding spatial-temporal Continuums by their collective construction dynamics, can be aggregated, per se, to combinations, consisting six variables of quarks, and six variables of leptons. While talking about “our” Continuum, I imply the 3-4-dimensional wave range of the constant Configuration (“curvature”), all karma (force) object interactions of which dynamically “incased” (sort of slloogrently “inserted”) into the multitude of Continuum Configurations of higher-frequency resopasons (throughout all possible development Directions!), while these, in turn are “incased” into Configurations of all the multitude Continuums (Conversums) of 4-5-dimensional range, and so on.

14.16137. Current “humankind” implements its re-focusing process throughout the specific synthesis dynamics, inherent to Forms of Self-Consciousness of 3-4-dimensional range: all the surrounding objects, including the biological analogs of НҮҮ-ВВҮ (NUU-VVU)-Form-Types, where we currently in-focus, are structured in a three-dimensional fashion, while all our СФҮҮРММ (SFUURMM)-Forms (Thoughts, Senses and Desires), which we employ during the process of our mental, physic and “physiological” activity, are structured by either four-dimensional (higher-frequency), three-dimensional (mid-frequency), or two-dimensional (low-frequency) principal. The creative activity of ФВҮ-Configurations of Formo-Creators of флакглаассны (флакглаассных) 4-5-dimensional Continuums is being periodically manifested through the energy-informational dynamics of higher-frequency СФҮҮРММ (SFUURMM)-Forms of the most qualitative Self-Consciousness Levels of the НҮҮ-ВВҮ (NUU-VVU)-Forms we in-focus, within our duvuyllerrt group of Continuums; the CAF-

DRF-dynamics of ирккуллигреного (irkkulligrenny) 3-4-dimensional range are being implemented through the mid-frequency СФУУРММ (SFUURMM)-Forms (that is why the most “grounded” dreams and Desires can be fulfilled much faster and easier); the Formo-Creators of 2-3-dimensional дооллттрокного (doolttrokny) Level, along with partial activity of Formo-Creators “karma-fractions” of the superior лоолгслоорных (loolgsloorny) (1-2-dimensional) sub-levels of the unconscious are implemented by means of the low-frequency СФУУРММ (SFUURMM)-Forms within the duvuyllerrt group of our Continuums through the biological and psychic systems of our НУУ-ВВУ (NUU-VVU)-Forms.

14.16138. All holistic objects (including objects of Macrocosm), physical objects and biological bodies, structuring the global mutual inertial dynamics of our Continuum groups by means of Configurations of their frequency dynamics, instantly acquiring the specific “rest mass” upon each differently directed “quantum shifts”, thus continuously altering the “geometry” of the surrounding Space-Time, hence simultaneously belonging to the dynamics of 3-4-dimensional range (as frequency manifested material objects, bearing three spatial coordinates), as well as the dynamics of 4-5-dimensional range (which are still aren’t inertially clexed through the Configuration’s TES-dynamics, and which are structured by the super-universal Conscious Fields of subconscious Levels Formo-Creators).

14.16139. All there is (which is manifested within specific frequency range) throughout our duvuyllerrt Continuum groups, represents the concentrated dynamic expression of Cosmic Construction of a multitude of various “formo-particles” and variable synthesized Cosmic radiation Formo-Creators – Thought “emanations” – “ematon”, “emarizons” and “miazons”; Sense “psyche” – “fluotons”, “psirizons” and “psiazons”; as well as synthesized “karma-fractions” of ASTRO and MENTO-Plasma – “karmotons”, “karmizons”, “kluazons” and karmo-klofts, sequentially “vested” by specific inert mass by means of the constructive dynamics of Collective Intellect structures. The entire Universe represents the unified Collegial Cosmic Intellect, the global mutual holographic Cosmic Entity, simultaneously Self-Expressing Itself creatively throughout the infinite multitude of qualitative Directions of Self-Cognition by means of the multidimensional slloogrent Energy-Plasma dynamics, which includes within Itself all Forms of Constructive Activity as well as the qualitative manifestation of slloogrent Energy-Information.

14.16140. Throughout the most inferior dimensional Levels of energy-informational interactions of “Plasmic Forces Diapason” (from 0-12 dimension), all the infinite variety of “quantum” and other types of Perceptions of That Cosmic Energy-Information, is manifested in a form of birvulart skloongms, “shaped” by the multi-quality dynamics of the infinite multitude of superstrings, vibrating on various sub-frequencies, frequencies and meta-frequencies. Hence, the multi-qualitative Forms of various other Form-Systems, extrinsic to our Continuum dimensional ranges, are manifested in various slloogrent “parts” of Space-Time and specifically self-express there by means of totally different attributes than these, we got accustomed to, and which are in no way can be compared not only with any Perceptions regarding the Time linearness and Space length, but also with any value criteria and the Force interaction nature, manifested on the elementary particle level, forming the habitual for us, “physical” type of the subjective Reality.

QUESTION: Did you talk about these Perceptions, when you were talking about photo-dispersive Conscious Fields or photo-dispersive Ether? Currently, there are four fundamental

interrelations are known to science: weak, strong, electromagnetic and gravitational. Then where these sub-elementary and super-universal particles, bearing the individually-inherent to them, Conscious Fields, came from?

14.16141. Dear Flooft (Флооффт), the answer to this very question, covered in quite detail, is located in the end of Volume Ten of “Commentaries” to the IISSIIDIOLOGY Fundamentals. However, I can gladly remind you that Conscious Fields, belonging to foreign resopasons (which are not manifested locally in a form of particles or fields within conditions of our HYY-BBY (NUU-VVU)-Forms Perception systems, structuring the dynamics of 3-4-dimensional range of Energy-Plasma), represent the infinite results of these background synthesis interactions, which are always present throughout the surrounding groups of duvuyllerrt Continuums, regardless of whether we can observe them, or not, but which anyhow aren’t able to enter into the energy-information interactivity with elementary, or even with sub-elementary particles, specifically organizing the dynamics of these Conscious Fields, meaning that these Formo-Creators, due to various reasons, aren’t able to be perceived by neither the electric, nor magnetic fields of the current dimensional range. Practically everything, which we – consciously or unconsciously – stimulate towards the material (frequency) manifestation throughout the surrounding reality by our habitual psyche reactions and emotions, is formed by these four types of force interactivity, each of which has its own corresponding force field. However, none of these fields is capable of interacting with any other type of field on its own, in complete disregard to the resulting dynamics of the self-organizing synthesis interactivity, inherent to all other fields.

14.16142. For instance, the electric field consists not only the energies of electric activity – the electron dynamics, but each of its manifestations, somehow reflects the dynamics of the Constructive Activity of other fermions (protons and positrons, muons and anti-muoniums (anti-muons), tau-leptons, as well as the three neutrino and antineutrino types. Any local manifestation of the electrical field definitely consists of other field types, together comprising the “aggregation” of their resulting dynamics, which in turn reflect other Quality Aspects. Currently I am unable to express the semantic definitions, force parameters and the energy-informational Essence of each of these Conscious Fields (even though I tried to achieve this quite minutely in the volume ten of the IISSIIDIOLOGY) through the already developed subjective Views you possess at this time, since the dynamics of these Fields is still virtually inexistent within the realization dynamics of CΦYYPMM (SFUURMM)-Forms, inherent for our Perception systems.

14.16143. However, I am totally convinced that the quantity of force fields, organizing the synthesis dynamics of any of the 3-4-dimensional Continuums, where WE concurrently in-focus upon, is much larger than just four, currently known to scientists. Very soon there will be many more interactivity types discovered and detected, when it definitely become evident, that something, which now can be detected by the highly-sensitive scientific computers, but subjectively is being perceived as a single type of field, in reality represents simply a specific reflection of the aggregated force interactivity between the multitudes of other field types, hence the more detailed field type differentiation, coupled with the interaction of their development detection will commence. In particular, in the nearest future physicists will discover, that the electric fields are structured by the 32 “constituent parts”, while the magnetic fields – by the 16 such “constituents”, which therefore will tremendously increase the number of fermion particles among the known today lepton and quark families, which in turn means the considerable increase in boson particle discoveries (since they are considered the energy-carriers between leptons and quarks).

14.16144. One of the most fundamental objectives of the IISSHIDIOLOGY is the speeding up of the process of drastic overhaul and older scientific views refinement, which include the currently existing physics laws, coupled with the standard scientific model of elementary particles, since the latter are still based upon the utmost obsolete Perceptions and quite questionable results, most of which are concluded and reasoned on the basis of extremely outdated (for the New Science) laboratory research and TESTING. Once the more fundamental and profound Perceptions regarding the expectation possibilities of the certain result quality will be programmed primordially into the psychological matrix of any scientific research process, then the quality of scientific discoveries will occur on the considerably higher quality Levels. Until more or less profound, precise and more genuine Perception is formed within the scientist's own Self-Consciousness regarding the exact outcome of his or her research, the actual results will be quite superficial and coincidental, inherent to the lesser qualitative Continuums, which tend not to lead into the ЛИУУВВУмическом (lluuvvumichesky) development Direction, but rather towards some of the other Proto-Form Synthesis Directions. At this point there isn't any suitable scientific equipment available for higher quality experiments, therefore these variable properties, emerging upon any particular electric field induction, usually are being interpreted as the manifestation of only the electric field, while the short-existing particles, detected during such experiment (depending on the radiation frequency, where any more or less suitable discovery potentially can be made), produce not only the natural amazement and perplexity, but also reveal the complete scientific insolvency, as scientists aren't able to logically explain such obvious "phenomena" with the assistance of the older and outdated Perceptions.

14.16145. Nothing "fundamentally new and undiscovered" can be found and securely accepted as an obvious fact, since the very equipment is oriented by СФУУРММ (SFUURMM)-Forms of their developers and manufacturers, as well as the scientists, who utilize it, towards the specific outcome expectancy of only these force interactions, which occur within the strictly corresponding dimensional range (where only the required object can be located); other particles, as well as the fields of their interactivity, capable of revealing only under other types of conditions and structuring the dynamics of other dimensional ranges, in no way can "distinctly" manifest within the target dimension range, which, according to its own unique Synthesis schema, doesn't belong to these other types of ranges. Factually, in their current findings, the scientists operate within very narrow range of Perceptions they have accumulated so far within their Self-Consciousness regarding the potential interactivity of only these particles, which they already know about, and the target range manifestation of which, - according to their subjective opinion – is exorbitant. Therefore, more often than not, they perceive the faintly subtle interactivity dynamics of other fields with their scientific equipment as certain emptiness, "tranquility", occasionally disturbed by some "accidentally" flashed and unknown to them "object" or an unclear and inexplicable fluctuation. But "where exactly" did this "object" flash? Through "what" did it flicker? Let's review a simple analogy: if we are doing something bad, we understand that this something is "bad" only because we have other clear Perceptions of what is considered to be "good".

14.16146. The same goes for science. If we observe during an experiment an electron dynamics, we should understand that this dynamics isn't taking place within "the emptiness" or a "vacuum", as some ignoramus from science might suggest, but rather within some type of energy-informational interrelationship, which is unknown to science at this point! How is this possible, in our enlightened times to seriously talk about certain state of "emptiness" of anything!?! I suppose that these statements should only call for an indulgent smile. Dear friends, there isn't such a thing as a state of "emptiness", since it can't exist in the first place, per se! What scientists currently perceive as

“nothing” – is not emptiness at all, but rather something, which you have no idea about! And this – is a core essence of my “impertinent” and straight-out Message to the worldwide science auditory through the revolutionary CΦYYPMM (SFUURMM)-Forms of the IISSIIDIOLOGY.

14.16147. While striving to deliver the Essence of this Knowledge to the profound comprehension level of the infinite amount of the adolescent “indigo” generation, I aim to once and for all to return the Collective Scientific Consciousness “from the its head onto its feet”, which is being harshly maltreated by the currently powerful “mammoths” and “mastodons” from science, who utilize any means possible to remain in power and keep the ever-increasing dynamics of the unstoppable evolutionary progress, knocking out the remaining rotten foundations of their former authority from their precarious “scientific” positions, long ago transformed into the criminal authoritarianism and the scientific totalitarianism. It is ok if someone calls me the charlatan or a dreamer; however, in my relationship with the members of the scientific community I only wish to achieve the following: to compel the younger scientists, who aren’t yet spoiled by the farfetched doctorate degrees, initiate the constructive opposition to the Knowledge of IISSIIDIOLOGY, thus attempt to show them that the surrounding Reality is much more complex, more profound and infinitely more multidimensional than it might seem!

14.16148. It is not a secret that beyond the ultralow Planck value distance parameters of $-1,6 \times 10^{-35}$ meters, as well as the ultrahigh force Energy interrelationships of 10^{18-22} GeV (gigaelectronvolt), there are completely different, cardinally new “physics” laws taking effect, Understanding of considerable part of which throughout the more favorable human Collective Consciousness development scenarios, commences to actively manifest through the dynamics of the newest IISSIIDIOLOGY Perceptions, which are far more integral and universal, than all previous attempts the human race have undertaken in order to comprehend the more genuine Essence of All as well as the attempts to reveal the Meaning of our Existence Mystery as part of the global universal egllerolift dynamics of This slloogrent WHOLE.

QUESTION: The Universe “projection”, which we can observe in the sky, is being researched separately from the micro-level – from molecules, atoms and other elementary particles. Is there any close relationship between the micro – and macrocosm? Are we able to draw any “inner” parallel throughout the Universal dynamics between its macro objects (galaxies, stars and planets) and its micro objects, such as molecules, atoms and elementary particles)?

14.16149. Dear Эйллаийлийда, traditionally “people” subjectively consider everything, surrounding them “on Earth and in the sky” the whole single reality and define the “universe” as everything, they see around them. Galaxies, vagueness or stellar clusters, which scientists can observe through their astronomical telescopes, are actually an exorbitant volume of multi-qualitative Forms of Cosmic Intelligence, multi-type and diverse in their realization synthesis dynamics surrounding us, and which are distanced from one another in linear terms in tens, and even hundreds of thousands of luminous years. However, within the certain frequency range of our perception, many of them can’t be observed even by means of the most powerful radio telescopes, which are distanced from Earth in billions of conditional luminous years (conditional, because in terms of such distances, our customary Perceptions regarding the “linear” Space-Time have no solid foundation). I would compare this reality, “materially” manifested through our Perception mechanisms with certain “macro-molecule”, where just like within a molecule of any matter, the specific force interactivity

is being implemented, certain causes are manifested, initiating the specific consequences, various energy-informational interrelations are being implemented, causing the particular outcome to be narrow-specifically “re-projected” into the global constructive dynamics. These outcome results can for instance, be revealed as various field type activity (gravity, electromagnetic and others), radiation, as well as the multitude of other activities, which are common throughout our “physical” world.

14.16150. It is quite obvious to me that interpersonal dynamics, manifested within the conditions of our reality – beyond the peculiar to “humans” subjective bindings – associatively resembles the dynamics of multi-qualitative energy-informational interrelationships of such Existence Levels, which I come in contact with during the meditation onto a particular elementary particle. Once I “come out” of such meditation and try to associate my feelings with something, customary to me, like a certain Experience of my individual ODS, then the more objective Realities of elementary particle Self-Consciousness Forms, considerably less conditional by the subjective CAF-dynamics of multi-qualitative “human” and animal Forms of Self-Consciousness, according to my own Self-Consciousness Formo-Creators seem just as large and “densely populated” by the narrow-specific CΦYUPMM (SFUURMM)-Form Configurations of its “inhabitants” (sub-elementary or super-universal Conscious Fields), and not in way less exorbitant, which is also inherent for my own “material” surrounding. The scientists still think that all electrons, protons and neutrons, forming the nucleus of each atom, are all absolutely identical within limits of their manifested Form. And this point of view is actually being the predominant one at this time. However, let me highlight a very important Notion once again: each of the elementary “formo-particles” – is in reality a realization Collective Intellect Form, through which the much higher number of other realization Forms of various Aspects (Formo-Creators), specifically inherent to each of the twelve Pure Cosmic Qualities, is manifested (if only the quantity notion can at all be applicable to the Constructive Activity of these particles).

14.16151. Let’s begin with atom, whose nucleus consists of protons and neutrons, which in turn consist of quarks and multitude of gluon particles (i.e. eglleroliftivnyy directing and organizing the individual dynamics of each of their humongous “families”). The specific “part” of the sloogrentnyy Space-Time dynamics is formed around the atom nucleus, which potentially is structured by the energy-informational interrelations, inherent not only for sub-vibrational (below-vibrational), but also meta-vibrational (above-vibrational) processes in relatively the same relation, as the minimum the “distance” from Earth to the Sun. The impression, regarding the certain energy-informational filling of the “near-nuclear Space” of each atom, structuring the dynamics of each molecule (especially this difference is evident upon the comparison of various molecule’s “near-nuclear Spaces”), is created because of the electron dynamics, concurrently manifested throughout each reflecting it “spot”. The proton and neutron mass in about 2000 times larger than the mass of the electron (proton = 1836 electron masses, while neutron = roughly 1838 electron masses). That means that the electron Formo-Creators, being relatively lighter and more “volatile”, concurrently uninterruptedly “fill” every spot of “near-nuclear Space” by means of energy-information dynamics of their Configurations, constantly “interlacing” with the specific “karma-fraction” dynamics, formed by proton and neutron Formo-Creators.

14.16152. There aren’t any “empty shells”, limiting the “nuclear Spaces” of neighboring atoms: if we are to switch to the schematics and conventionality language, I would have to note that the “inter-nuclear Space” inertially is formed by the various, already known to you, multi-qualitative “tetrahedron”, octahedron”, hexahedron”, dodecahedron” and other synthesis Form-Creator dynamics, but which

is expressed through completely different energy-information interconnections between the “karma-fractions” than these, which are inherent to our – “human” CΦYUPMM (SFUURMM)-Forms!

14.16153. Frankly, the “distance” (although in reality this inertial dynamics isn’t at all what we think regarding the linear time, but rather is a certain energy-informational fluctuation) between atom nucleuses can subjectively be compared with the indefinite separation, similar to the feeling we all have, while observing few Cosmic objects simultaneously: visually, the distance between the observer and all these objects is the same, while there is a feeling of separation and discreteness of our and their existence. Perhaps it has to do with the fact, that on the level of the generally-molecular dynamics, the energy-informational interrelations between the atom Formo-Creators, are manifested in a considerably lesser degree, than between their nucleus Formo-Creators, therefore during the Meditation, the Self-Consciousness interactions with the latter are perceived more distinctively and more certainly.

14.16154. If one would reveal throughout the multidimensional dynamics of atomic and inter-nuclear levels of any material object by means of their CAF-DRF Form-Creator dynamics and higher-frequency YY-BBY- (UU-VVU) Conglomerates, one would be able to simultaneously observe of the entire “karma-fraction” multitude of sub-elementary, as well as the super-universal particles, which – each within its own dimensional range, - are organizing the global (unified and integral) inner-molecular, atomic and nuclear dynamics, simultaneously providing for absolutely all possible energy-informational interrelations on these dimensional Levels, which are vital for Form,- and CJY-И-CJIYY (SLUI-SLUU)-Creators in order for them to establish the variable inertial Form Configuration transformations concurrently throughout all possible Directions of the inner-nuclear Synthesis.

14.16155. Attentive readers can recall the information, which I have mentioned in Volume 11 of the IISSIIDIOLOGY regarding the Alan Aspect experiment with “tangled” elementary particles. The roots of this experiment go back to 1930’s, when so called “The EPR Paradox” (Einstein, Podolsky and Rosen), which involved the situation, where the “entangled” particles sort of “felt” the conditions of one another, meaning that upon the certain parameter alteration of one particle, the parameters of another particle immediately changed in precisely the same manner; moreover, this effect was always true regardless of the distance, separating these particles. By the end of the twentieth century, the scientists actually managed to demonstrate the fundamental possibility of such notion, as the “teleportation”: the Energy-Information, inherent to one carrier-particle was transformed by one atom Formo-Creators to the other atom Formo-Creators. Lately, the technology and attributes of this experiment have steadily improved, and currently entered into the new phase of quantum computer manufacturing.

14.16156. The true cause of such elementary particle behavior phenomena is the fact, that the elementary particle Form-Creator interactivity specifics with each other (subjectively interpreted by researchers as “the entangled objects”), is actually a certain aggregated manifestation of slloogrent multidimensional Collective Consciousness manifestation Constructive Activity Form dynamics; hence each of the elements of such dynamics within limits of the conditionally circuited system (within the 3-4-dimensional Spatial-Time Continuum range) is capable of preserving the spatial-temporal (unbound from any specific inertial parameters of Space-Time) informational interrelation with other elements, indefinitely. The “entangled particle” Form-Creator Configurations belong to a specific, mutual for them all, slloogrent Flux “part” of such dynamics, and on the higher energy-informational quality Level (4-5 dimension and higher), are organized by means of CΦYUP-

MM (SFUURMM)-Forms, created by the Self-Consciousness Formo-Creators of such experiment researchers (or, anyone for that matter), - by their Thoughts and feelings, Formo-Creators (“karma-fractions”) of which also involuntary (unconsciously on the researcher’s part) participate in the current dynamics, modeling of all the variations of their expectations, assumptions and Aspirations.

14.16157. I must add here, that the discovered “entangled particle” effect in only a tiniest degree can actually reflect all the slloogrent interrelationship dynamics between the multi-typed Collective Intellect Formo-Creators, since absolutely all particles of the spatial-temporal Continuum, are actually “entangled” with one another as a result of continuous resonant interactivity, by means of the inherent to them, energy-informational interrelationship, bearing various degree of resonance, which in turn automatically means, that the Self-Consciousness Formo-Creators of any particle always “know” the conditional state of any other particle Formo-Creators and respond to their “psyche-mental” radiation emission by the corresponding resonant reactions, correlating to their quality and their degree of identity.

14.16158. All the ongoing events of our lives are always being perceived only from the position of subjectivity, which is inherent to our current “individual” systems of Perception. Any point of view, while isolating only the accessible “part” of its global inertial dynamics of current “individual” Self-Consciousness from the Energy-Plasma slloogrentity, always considerably limits the realization possibilities of other Levels and development Directions Formo-Creators throughout the “unfolding” CAF-dynamics of the current Form of Self-Consciousness. During all experiments with “entangled” particles, the experimenter’s sensing systems, operating with limited amount of Perceptions regarding the properties of the surrounding reality, are capable of subjective isolating only these signs and obvious interrelations out of the infinite multitude of variations of elementary particle slloogrent dynamics, which are concurrently ongoing “around them” and are accessible to their own understanding and comprehension Levels. However, these attributes in only a slightest fashion are capable of reflecting the infinite energy-informational interconnection between various Causes and Consequences, where the Self-Consciousness of “people”, motivationally observing this experiment, and potentially tuned towards the specific and precise (even results, participates in the purposeful CΦYYPMM (SFUURMM)-Form dynamics.

14.16159. Their involuntary Self-Consciousness Formo-Creators Constructive Activity creates the conditions for something they define as an “unexpected particle entanglement”. However, if these experiment observers could utilize the more qualitative and synthesized CΦYYPMM (SFUURMM)-Forms, they would be able to derive totally different – much more reliable results out of the entire potential interrelationship slloogrentity. This actually is the real source of the infinite multi-qualitative elementary particle diversity of Form-Creator manifestation of various Forms throughout our subjective Reality type – some of these groups are mostly capable of manifesting their individual attributes through something, which we (subjectively, but nevertheless, vaguely!) define as “electrons”, other groups of somewhat similar particle Formo-Creators are defined by us as “neutrons”, the third group is named “protons”, and so on – involving multiple fermion and boson particle types.

14.16160. The “superposition” experiment (Superposition is a principle of quantum theory that describes a challenging concept about the nature and behavior of matter and forces at the sub-atomic level. The principle of superposition claims that while we do not know what the state of any object is, it is actually in all possible states simultaneously, as long as we don’t look to

check. It is the measurement itself that causes the object to be limited to a single possibility) is another very interesting example of the slloogrent Formo-Creators dynamics, where, according to quantum mechanics, any system can exist in a definite certainty only in a specific state, and not in a multiple states simultaneously. In quantum mechanics, such system condition, where only one of the multitude of variants is implemented of their multiple diversity, is defined as “tangled”. These situations seem normal for our logical sense; that is precisely what science calls “matter”, and which is capable of be perceived by our sense organs as well as the scientific equipment. However, for all Self-Consciousness Forms of our surrounding reality, the situations of the simultaneous existence throughout the multitude of diverse states are actually the most natural. We all know that, since the considerable part of our physic and psychic experience is being implemented by means of certain superimposing of (sort of) separate conditions onto one another without any specific mutual influence.

14.16161. On the other hand, it was experimentally proved, that a single object, which we interpret as a particle, can simultaneously go through the two separate gaps (diffraction). The particle, going though one gap is being in its certain state, while “the same” particle, going through the other gap, has its own state. That is exactly what in quantum mechanics is defined as superposition, or “purely-quantum” state. We now talk about “quantum superposition”, where multi-qualitative superposition states (from the orthodox scientific point of view!) simply unable to be implemented concurrently. The super-positional states can exist only while there isn’t any energy-informational relationship between the system and its surroundings - the experimenter’s Form-Creator Self-Consciousness CAF-dynamics. It was also found during the two-gap experiment that the quantum system ceased to be closed (circuited) when the flight detector, representing the “outer surrounding” was installed; moreover – the system has transformed into a “tangled” state since there was no interference present.

14.16162. It is possible to observe the superposition only if we don’t fixate the object’s condition at the same time. When we observe an electron, we can only see the same obvious and researched attributes of its slloogrent dynamics, which already have formed within our own Self-Consciousness. And so, the electron conformably is either passing through one gap or both gaps simultaneously, reflecting our own subjective expectations. However, the only instance when a particle can go through two (and more) gaps simultaneously is when we don’t consciously motivate its Formo-Creators CAF-dynamics by our limited Perceptions regarding its potential abilities! The interference infringement occurs only because the certain experimenter CΦYYPMM (SFUURMM)-Forms within his or her Self-Consciousness, limit the particle moving path to a particular and the most probable movement vector. If we are aware of a particle’s trajectory vector, then the interference doesn’t occur; if, on the other hand, an experiment can include a few mutually-exclusive – from the orthodox science point of view – variants, then it means that we are dealing with superposition of various states, when the electron, as a classic reality element, doesn’t exist.

14.16163. Only the “unfolding” Formo-Creators CAF-dynamics of our Self-Consciousness allows for various objects to be somehow manifested on certain frequency throughout our surrounding micro-world (as well as throughout our individual Realms). Without such energy-informational interconnection not a single Conscious Field is able to discretely manifest throughout the surrounding reality as elementary particles or their resonant conglomerates (nucleus, atoms and molecules), but always exists only as multi-qualitative dynamics potential – waves, or “probabilistic projections”, which, while only resonantly reflecting the aggregated CAF-DRF-dynamics of Self-Consciousness Formo-Creators and the CΦYYPMM (SFUURMM)-Forms they utilize, transform into the orderly

Self-Consciousness Forms of the elementary particle diversity, correspondingly “materializing” our steadily initiated abilities into certain expectations.

14.16164. Thus, the process of “materialization” of anything throughout the surrounding Reality can only be implemented due to the intense (powerful and lasting) “projective dynamics interposing” of the individual ODS Self-Consciousness CΦYYPMM (SFUURMM)-Forms onto the Conscious Fields BBY(VVU)-Configurations Formo-Creators energy foundation, structuring the current Form-System. In order for any type of “materialization” to occur, the quality-relevant Form-Creator BBY(VVU)-Configurations, along with the corresponding CΦYYPMM (SFUURMM)-Forms within each Level of the Energy-Plasma, must be actively initiated in this inertial process. Therefore, the most complicated kind of “materialization” - is to perform this task within a dynamics of low-frequency or middle-frequency CΦYYPMM (SFUURMM)-Form range, which don’t reflect the dynamics of high-frequency Self-Consciousness Levels: as the Close Attention Focus (CAF) descends towards the Levels of the low-frequency dynamics, the tension degree between the Form-system Form-Creator Configurations rises, hence the possibilities towards active manifestation of high-frequency “probabilistic projections” in them, drastically decreases. This is precisely the reason for scientist’s inability of detecting any facts of the super-frequency dynamics even while utilizing such super-device as adorn collider, during many currently ongoing experiments. However, upon the implementation of higher quality re-focusing into more qualitative Form-Systems, the scientific experiments, based on the IISSIIDIOLOGY CΦYYPMM (SFUURMM)-Forms, will bring the ever-increasing amount of purely shocking results.

14.16165. The second conclusion: the superposition of possible state of various elementary particle Forms is actually nothing else, but the aggregation of slloogrent Choice Vectors within the skrruullerrt system. Depending on the quality of CΦYYPMM (SFUURMM)-Forms, steadily utilized and activated within our Self-Consciousness by our Formo-Creators (employed in clexing process of TES-dynamics) during the process of inertial step-instantaneous choice-making, we acquire such corresponding opportunities for the elementary particle formation throughout the surrounding Form-System (meaning that we re-focus into these scenarios, where the HYV-BBY (NUU-VVU)-Configurations of our temporarily in-focusing, clexed by these specific Perceptions, already primordially exist). The “tangled” particle states are a result of specific instrumentations (such as establishing of energy-informational interconnections), applied to purely-quantum states; this is a decoherence result of purely-quantum states. Per se, the quantum mechanics describes the Directions aggregation for the microcosm particles within the skrruullerrt system, in detail.

14.16166. The elementary particle Formo-Creators Configuration superposition states, as well as the slloogrent Form-Creator CAF-DRF-dynamics throughout the skrruullerrt system is per se, the same thing; the only difference is that superposition – is a quantum-mechanic notion, which is utilized by scientists in relation to the force interrelationships of the microcosm, while the slloogrent formation of the multi-qualitative rotational Cycles throughout the Energy-Plasma skrruullerrt system – is a purely IISSIIDIOLOGICAL Perception regarding the dynamics of the self-conscious Elements, the multi-qualitative Form Configurations of which are structuring the duvuyllerrt SC diversity.

14.16167. Summing up all the above, I once again intend to highlight my principal position in relation to the Essence of form-dynamics of the surrounding Reality, which by many scientists might be perceived as the most absurd and seditious Perceptions, the profound validity of which, is nevertheless very obvious to me:

The elementary particles, structuring the nuclear and “perinuclear Space” of atoms of various substances (quarks, electrons, neutrons, protons, neutrino and the like), as well as elementary particle Forms, always perceived by scientists as “the exactly the same” during many different experiments, within Levels of 2nd, 3rd, 4th-5th and other dimensions of their concurrent constructive realization, nevertheless represent *different* Conscious Field types, each one of which is bearing the unique, individually denominated characteristics within each Form they focus upon (such as sub-elementary, elementary and super-universal particles).

14.16168. Just as neutron, in case when it’s not connected with proton within the atom nucleus, exists only for 15 minutes and then disintegrates onto the proton and electron, the electrons themselves, while preserving their fundamental attributes of their inherent Form (mass is 0, 511 Mega electron Volts, charge -1, spin $\frac{1}{2}$) for billions of years within our type of irkkulligren Reality, are manifested through each of these Forms throughout the multi-qualitative doolsovy and flaksovy Interpretations, providing for the inertial dynamics of various synthesis processes throughout inherent to them dimensional Levels. This can conditionally be compared to the group of “people”, where no matter how similar they might appear, they nevertheless display various individual characteristics, such as inclinations, habits, behavior, knowledge, skills and the general vital Experience.

14.16169. The most superficial and the most “rough” (the most accessible for discovery by the super-accurate scientific equipment) disparity attributes can only be revealed though the spin dynamics upon the multi-qualitative interactivity within the individual electron properties of various substances. Some of you might know the principle of operation of electron-radial tube of an ordinary TV: the cathode thermionic emission causes the electron flux to reflect onto the inner display surface. There are various materials, which are utilized as cathodes for the electron emission, mostly compatible for these purposes. In fact, this device can be used for a very special and very interesting experiment, showing the property differences of an electron beam, radiated by cathodes of various materials. When various substances are used as basis of a cathode (for instance, barium or calcium oxide and so on), we will observe the different properties of an incident electron beams upon the exact same display surface attribute provision. The conventional physics research is quite often faces such fine effects, which precipitately are written off due to the experiment’s error, which in turn results in a huge amount of potential experimental discoveries being basically buried in their infancy.

14.16170. The “electron” constructive activity within 3-4-dimensional range is closely connected with THE-Unanimity Aspect Quality dynamics, which is revealed only indirectly through the “human” HYV-BBY (NUU-VVU)-Configurations – by means of the partial synthesis dynamics within the Self-Consciousness space, between the sub-Aspects of the current Quality and the “karma-fractions” of already partially synthesized sub-Aspects of two Dominants, inherent to the biological analogs of our HYV-BBY (NUU-VVU)-Form-Types: it’s when we are trying to create something together, when we closely feel and specifically relate to one another, when we consider other’s opinion; when we intuitively feel the necessity of unification with either a “human”, group of “people”, or with a certain animal, a plant, mineral, or generally with nature – forest, field, maintain, ocean, and so on. The higher the degree of synthesis between both Dominant Aspects within the HYV-Self-Consciousness BBY(VVU)-Configurations, the easier and faster the THE-Unanimity Quality Aspects, as well as its sub-Aspects can enter into the inter-quality synthesis interrelationship, since separately they interact with both Dominants Conscious Fields quite “reluctantly” due to considerable amount of energy-informational tensions and disparity between them (the absence of the complete resonance).

14.16171. Let me remind you again, that in quantum mechanics and particle physics, spin is an intrinsic form of angular momentum carried by elementary particles, composite particles (hadrons), and atomic nuclei. Spin is a solely quantum-mechanical phenomenon; it does not have a counterpart in classical mechanics (despite the term spin being reminiscent of classical phenomena such as a planet spinning on its axis). It is known throughout scientists, that an electron isn't able to have few various spins in its unexcited state, just as it can't have different charges and different mass. However, once you begin the deep Meditation, concentrating onto the narrow-specific peculiarities of the energy-information dynamics of all the currently known particles, bearing various "spin" characteristics, you start to absolutely unequivocally understand, that each realization slloogrent Form of Energy-Plasma, frequency manifested throughout the irkkulligren Reality types as an elementary particle, represents by itself the simultaneous dynamics of infinite amount of multi-qualitative types of various Collective Intellects, existing in more qualitative dimensional Levels, outside of the customary to us, discrete state, but rather in a form of already known to you, slloogrent superposition – the tremendously more organized, perfected and integral dynamics of the global Form-Creator Constructive Activity.

14.16172. Even the conventional scientific cutting-edge equipment still can't offer the ability to differentiate the diversity of the finest nuances and peculiarities, allowing each elementary particle to manifest even throughout this Reality types considerably in more unique ways, than it might seem to the experimenters, therefore all the differences between these particles can only be distinguishable in terms of the most approximate and imperfect spin classification system of the whole (1, 2, 3...) and semi-integral ($1/2$, $3/2$, $5/2$) digits. However, once the new scientific possibilities and technical capabilities will emerge in a near future, the scientists will be able to tremendously increase and broaden their knowledge, by deepening into the Self-Consciousness Levels, which currently seem "inaccessible". They will discover absolutely new types of Form-Creator groups (various cosmic civilizations) of particles, which appear to be "similar" to many already known particle types, and which, while not being quite active within the current "human" subjective "materiality" type, are organizing the foundation of the energy-informational dynamics throughout other "human" and proto-form Continuums and Conversums (by means of creating an infinite amount of "individual" Forms of Self-Consciousness), providing the coexistence and constructive interaction ability (within their inherent dimensional Levels) to the infinite Proto-Form diversity, structuring the entire simultaneous and slloogrent Energy-Plasma Constructive Activity.

14.16173. The final result of Their Creation - is that SOMETHING, which all of them (if they were "humans") would perceive as "the Universe". Upon the sequential intensification into the matter dynamics, I would conditionally compare all the force interactions, which are being implemented between the sub-elementary, elementary and super-universal particles within the "intra-atomic Space" with customary to us Perceptions of "interplanetary cosmic interrelationships", while the multi-qualitative synthesis dynamics between the atoms within each molecule – with our Perceptions regarding the interconnections between various "stellar systems" (considering the fact, of cause, that within the corresponding atom Levels, the completely different Space-Time "structure system" dynamics of force interrelationships are being implemented and interpretationally reflected).

14.16174. If we compare each molecule with the visible Universe part, then the distances, which various Electron Forms are traveling within the "intra-atomic Space" can be also compared with the individual and "attractor" correlated (specifically organized in accordance with certain Laws) Stellar and Planetary Entity dynamics (of cause, very subjectively, since the very Nature of the

“speed linear” movement is also a constant variable!). However, since all this synthesis Creation is being implemented within completely different Perception Systems, it would be grossly ignorant and foolish to try to imagine you as such “form-particle”, thinking that it perceives and observes the surrounding Reality just as we do! Their Perception systems are totally different from ours, and are implemented outside of the JJYY-BBY (LLUU-VVU) Synthesis Schemas.

14.16175. The conditions, where we are synthesizing the Aspects of the dominant and background Qualities through our HYV-BBY (NUU-VVU)-Configurations are narrow-specific, and inherent only for the HYV-BBY (NUU-VVU) Formo-Creators Constructive Activity; therefore we aren’t able even remotely to cognize the Perceptions, inherent to sub-elementary and super-universal Conscious Fields systems, which, on the much subtle Levels, form all the intra-atomic, inter-nuclear and inter-molecular interaction diversity, which in turn are being the corner stone of the creation of various “physical” Reality types. If we compare two various “Universes” (one comprised of “iron” force interactivity and the other – by “radium” or “uranium” interactivity), we will see, that these “Universes” will not be able to perceive one another, just like we aren’t able to anyhow perceive other “human-like” Forms of Self-Consciousness, which synthesize the same Dominants, but differently, and with different background correlation factor.

14.16176. Again – each elementary particle is totally unique in terms of its individual manifestation activity! However, it would not be correct to assume that metals “electrons” are more similar with one another than, let’s say, non-metal “electrons”. It is only possible to assume this from our own subjective Perception level. In reality these “realization systems” are organized in a much more complex fashion. Physicists know, that a neutron is “almost” a proton, which during certain conditions (at tremendous speeds, for instance) sort of “bind” with an electron: electron shells are being indented into protons, forming a mutually aggregated for various certain conditions, realization Form, which we subjectively interpret as “neutron”. But there are other very complicated types of energy-informational interactions, which are hidden from us behind all these “diversions” and “merges”, and which are implemented for sake of sub-Aspect and Aspect synthesis of only certain types of Qualities, and which are in turn are organized by the very scrupulous, even more intense and complex of other materiality Formo-Creators dynamics of the certain type – quarks, photons and gluons; these particles, while are assumed “indivisible” within the inherent to them dimensional Levels, are nevertheless differentiate (transgress) onto additional sub-elementary and super-universal Forms, bearing their intrinsic energy-informational interrelations, completely different from atom nucleus ones, and they are represented by much greater force field interactions, which we utilize to describe any inertial dynamics (for example, intensiveness and tensions).

14.16177. That is where the processes, precipitately classified by the scientists as “weak energy interactions”, commence. However, in reality these energy types are expressed through the purely colossal, unimaginable and completely unprecedented for us, volumes, which penetrate the global slloogrent dynamics of all the innumerable diversity of individually synthesized Form-Systems, simultaneously revealed throughout each dimensional Level, inherent to them, and manifest in totally unique way in each separate case! This results in multiple atom nucleus splitting experiments, with stupendous outbursts of Energy, not always controllable by the scientists.

14.16178. It was calculated during multiple experiments that the elementary particle mass accounts for no more than 5% of the total nucleus mass. And the legitimate question is: where and how the remaining 95% are manifested? Well, the remaining 95% of the nucleus mass is actually these colossal

unimaginable Energy interactivities, simultaneously implemented by ourselves, THESE US, who are currently in-focusing within Formo-Creators HYY-BBY (NUU-VVU)-Configurations of much higher dimensional frequencies. This type of Energy is being allocated by THESE US into the simultaneous infinite diversity of multi-qualitatively synthesized “human” Continuum inertial dynamics, within each of the duvuyllerrt groups of which, its certain part is being revealed as elementary particle dynamics, while other part is also being allocated throughout various Synthesis schemas, sort of “transforming” from the kinetic energy into the potential one (for each “existing” types of Forms).

14.16179. The scientist are grossly mistaken when they assume the gluons (elementary particles, located “between” quarks) to be “just” an “adhesive substance”, connecting quarks together. In reality, however, this is a much higher Level of Collective Intellect Forms of Self-Consciousness, WHICH stimulatingly (egllerolift) guide the inertial quark Form-Systems dynamic, correlating it with the dynamics, which is also simultaneously manifested by “them” throughout each duvuyllerrt group of Continuums. The conditional specifics of their construction activity can be compared with the functions of foremen, who are responsible for all the steps of construction implementation, performed by the regular workers. Quarks, and other particles, transforming through them (and into them) – are these “regular workers”, responsible for the implementation of only certain kind of synthesized “materiality” in various parts of the universal global Space-Time slloogrentity. And gluons are the more qualitative Formo-Creators Forms, actually organizing the quark activity processes. In fact, they both represent synthesis realization Forms of us as other various Form-System Formo-Creators.

QUESTION: Then what is being the “construction material”, which WE, as Formo-Creators, utilize in each “separate” case?

14.16180. In the previous section, dear Саантофрея (Saantofreya), I have described the inertial principles of “karma-fraction” intra-aspect, inter-aspect and inter-quality synthesis, structuring all the dimensional Levels of slloogrent dynamics of the Tertiary Energy-Plasma. The primary dynamic energy-information foundation for absolutely all systems of OUR surrounding Reality dimensional Level Synthesis is actually represented by “emanations” and “psyche”, which serve as a primary basis for the narrow-specific dynamics of any СФУУРММ (SFUURMM)-Form, providing the opportunities towards the various Formo-Creators diverse realization activity through any Proto-Form Perception system.

14.16181. Let me remind you that absolutely all our Thoughts and Emotions – is a result of narrow-specific biochemical dynamic reflection of various brain’s realizational Forms of its specific bio-Creators, resonantly manipulating (strictly within limits of specific BBY(VVU)-Configurations) with BBY(VVU)-Configuration “projections”, qualitatively completely correlating with corresponding YY-BBY- (UU-VVU) Conglomerates of each “person” individual ODS. Alongside with you, the same occurs within individual Self-Consciousness of all other Proto-Forms of “Animal”, “Vegetative” and Mineral” Kingdoms, visually perceived Forms of which are also structured by the synthesis dynamics of elementary particles, such as fermions – leptons and quarks, as well the carriers of their energy-informational interactivity – bosons.

14.16182. In other words, any Thoughts and Emotions can manifest within our Self-Consciousness only when specific biological mechanism Formo-Creators (nerve cells, for instance), “project” the

certain BBY(VVU)-Configurations of the corresponding СФУУРММ (SFUURMM)-Forms through their own realization Forms, which immediately is being reflected in a dynamics of all other Forms of the biological body as specific biochemical reaction. At the same time, the so called “weak interrelationship electric fields” (Conscious Fields) appear throughout Space-Time of that particular Continuum, which “re-project” into the corresponding BBY(VVU)-Configuration (inherent only to that synthesis sub-level) of any of the two ИИССИИДИ-Centers (IISSIIDI-Centers), after which they are being deciphered by other Formo-Creators and subjectively experienced by you as certain psychic emotion or a part of thinking process. The unique attributes of each atom of all substances primarily depend on the quality of Proto-Forms, which structure the proton and neutron nucleus of this particular atom (predominantly sub-elementary, elementary, or super-universal particles). Because as I’ve mentioned previously, possess their own Individuality, which in our material reality is revealed through the individual properties of each atom, for instance, iron, helium, hydrogen, and so on, including the entire Periodic table.

QUESTION: Oris, if I, for instance, unscrew this bold, currently sort of “belonging” to this fan, tighten it into the wall and will hang a picture on it, will the bold atoms and the elementary particles, structuring it, change?

14.16183. Yes, dear Овуллдс (Ovullds), they indeed, will. The point is that you clex the current “hexahedron” Configuration of the existing Form, “equipped” with the fan СФУУРММ (SFUURMM)-Forms by your own СФУУРММ (SFUURMM)-Forms of a its new application, for instance by handing the picture on this bold. At that the surrounding Reality type remains the “hexahedron” one; however, the “hexahedron” Configuration, structuring the geometry of the bold Space-Time will be slightly different, since this energy-informational (and hence, already DIFFERENT kind of bold) becomes a constituent part of a psyche-dynamics of the other type (of your own Self-Consciousness and not the fan’s assembling technician), and thus will not be karma-interconnected with the previous СФУУРММ (SFUURMM)-Form source, which have clexed its Configuration with a fan functions interactivity (for instance, if the fan would be damaged and became a reason for a fire or someone’s injury, the responsibility would in this case apply to someone’, who had actually caused the item’s malfunction). At that the previous Form-system, where this bold has slloogrently structured the fan’s Form, haven’t disappeared – in Form-systems, where you haven’t chosen this course of action, the bold remains at its original place, while in other Form-systems, where it was removed from the fan, its primary function hasn’t changed (its Form remained exactly the same); it simply had sort of “extended” due to your own Self-Consciousness Experience, when you have clexed this type of “hexahedron” dynamics by the new type of Energy-Information.

14.16184. As a result of a TES-“unpacking” within the information space of your Self-Consciousness, the СФУУРММ (SFUURMM)-Forms of the certain bold, inserted into the non-working fan have appeared; hence the Formo-Creators Experience, “imprinted” within a global Configuration of your individual ODS has prompted you that the current item (bold) can be used at other destination. This is exactly what I call “clexing” - “quantizing” of the current Configuration by the new application “function”. However, by altering the item’s application “function”, programmed into its Configuration, you haven’t altered its primary energy-information essence (СФУУРММ (SFUURMM)-Form), determining its functionality – the bold still remains itself. But if you had, for instance, filed its thread, then you would definitely alter its original functionality essence and revealed in your Form-system a completely new Form – a nail.

QUESTION: How can we apply the “form-particles”, structuring various Self-Consciousness manifestation Forms within the current dimensional range (the aggregation of bosons and fermions, manifested in a form of a bold in this case) to the specific type of “hexahedron” Formo-Creators, which precisely determine its primary functionality to the currently manifested Form: “the fan’s bracket bold”?

14.16185. Dear Ийювиллоиррисс (Iyuvilloirris), the “hexahedron” Formo-Creators actually compose this rotating mechanism, which we define as fan. Does the fan (or any other “inanimate” item) possess its own Form of Self-Consciousness? Yes, it does. However, this is manifested only on levels of energy-information interactivity of all bosons and fermions, structuring it, and uniquely revealing through the current Form of their mutual manifestation. This is the same as if many “people” would build a large, mutual house for everyone, and while living in it, they would realize the multiple “interpersonal” relationships.

14.16186. It’s also similar to “our” biological body, through the Form and attributes of which we implement as electrons, neutrons and other various energy field Formo-Creators. Think about it – it’s not you, who is organizing each biological reaction, ongoing in your body! It is not you, who is thinking about the necessary hormones, which have to be produced and where it should be directed through the bloodstream! It’s not you, who determines the protein, glucose and vitamins obtaining process from the digested food and what should be done with all that thereafter! It’s not you, who performs all these vital functions! Then who are really YOU? In what way do you relate to the body, which you think “belongs” to you? Just like in the case with a fan, you are simply a resulting realization part of all the global dynamics of the multitude of boson and fermion Formo-Creators. As a manifestation Form – You are simply an automobile, structured by various parts and mechanisms, while they are actually you, but as a Self-Consciousness Form – a DRIVER of that vehicle! Without a driver any vehicle becomes only an object, a realization Form of OTHER Self-Consciousness Levels of the above-mentioned fermion and boson Formo-Creators. Hence, it’s THEM, who actually orchestrate an entire “human” society, our politics, economics, religions, Realities and Continuums. They are within us and around us – these infinitely diverse cosmic civilizations, the presence of which we don’t consider only because we don’t correlate their activity with “ourselves”, perceiving them simply as primitive “elementary particles”; that is why our scientists often are sincerely amazed, when they observe the signs of a Conscious Intellect, manifested by these particles during various experiments!

14.16187. But let’s come back to the fan and its bold. Any action, through which you can currently implement, is principally based on the fact that you resonantly attract the mostly compatible YY-BBY- (UU-VVU) Forms (BBY-Information) from the slloogrent Space-Time Energy-Information into the “unfolding” dynamics of your own Self-Consciousness and steadily “re-project” the CФУУРММ (SFUURMM)-Forms, peculiar to your HHAACMM (NNAASSMM) – meaning that you will inertially quantize it by the Formo-Creators Experience, primordially programmed into your individual ODS. If you spend a considerable amount of psychic effort (Energy and Time = re-focusing quantity), you will achieve the initially desired result. Each individual choice alters the narrow-specific energy-information interrelationships between various Formo-Creators of specific resonant “hexahedron” groups (each of which structures only the specific Synthesis Vector, inherent to its Formo-Creators), manifesting various qualities, peculiar to different Constructive Activity of the individual Self-Consciousness. In other words, each choice is actually an alteration of the resonant frequency within the mutual Form-Creator Configuration group by the “unfolding” dynamics of your Self-

Consciousness Formo-Creators of any chosen Direction Vectors, which factually always represents the qualitatively totally different “hexahedron” group in relation to its initial attributes.

14.16188. For instance, revealing the aggression qualities, inherent to the inferior Levels of Formo-Creators Self-Consciousness, you can break this fan, thus clexing it's Form anew, by incasing a whole new meaning to it, depriving a certain Formo-Creators group of the farther continuous constructive implementation through this particular fan's working process. It is you and not them, who are refocusing into the particular Form-System, where these Formo-Creators don't have the ability of implementing through the fan's working process. By breaking it you have incased in its Form a certain BBY(VVU)-Information type (CΦYYPMM (SFUURMM)-Form, explaining the reason for such solution) as well as the inherent to it, type of specific psychic Energy. This Energy-Information has transformed the earlier unified Form into the ruined remains and fragments (by the way, the destruction is actually a distinctive characteristic of all low-quality Energy types, since the creation of something requires a participation of more developed and more advanced Formo-Creators).

14.16189. Until such aggressive clexing was applied, the Form-System has been structured by “this particular” manifestation Form of certain Energy-Information, and now it has been corrected in accordance with your Formo-Creators perception into its new Form – the broken remains and particles. The completely different type of Energy-Information can be utilized, for instance, by pasting of this ordinary bottle by the ornamental glass. In this case you have displayed a higher quality Formo-Creators dynamics, the result of which can be observed here – the Configuration of this very beautiful vase, now structuring the Form-System “geometry”. The results of any clexing-quantizing always depend on the quality of Experience utilized by your Formo-Creators, meaning the quality of your own manifestation, as a resulting Form of their constructive realization.

QUESTION: At what point the electrons change, so they could correspond to their new purpose?

14.16190. Dear Maapp (Maar), not a single Form of electrons or other particles, structuring the current Form-system, ever changes – it is forever affixed (stabilized, programmed) within inherent only to this particle, resonant spot of inertial Space-Time dynamics! Coming back to our example – the intake and broken fans are structuring the scenarios of qualitatively different Form-systems, where various Levels Formo-Creators of your aggregated Stereo-Form's unified Self-Consciousness are manifested by means of the corresponding “individual” Interpretations and Formo-Creators, peculiar to its (your Stereo-Form) Configuration. Remember – everything, which concerns Forms never ever, changes; it always “has been”, “is” and “will be” remain exactly the same throughout each of the inertially synthesized Levels of Energy-Plasma. The ONLY thing, which always changes – is the FSA-DRF dynamics, while focusing onto the quality contents of each of these Forms depending on the participating Form-Creator Self-Consciousness Levels: each Focus condition (the Constructive Activity Level) correlates to a specific result throughout the slloogrent dynamics of Space-Time. While in current Form-system the fan was quantized by aggression, thus disintegrating into a pile of trash, in other Form-system the same fan was actually modified by more qualitative Form of your Interpretations, and the fan acquired an additional working function – an air ionizer.

14.16191. The electron Forms themselves in this example haven't changed, however throughout various Form-systems they acquire various types of Experience provided for various CΦYYPMM (SFUURMM)-Forms interconnection, correspondingly altering their inherent Configurations. The

electron remains itself throughout each Form-system, but its Configuration can considerably change, in which case we say that in certain conditions “electron has switched to another orbit”, or “changed his previous level”. What does that mean? What “other level”? Other frequency! The saturation of any Configuration with a more qualitative Information causes its frequency to rise, and vice versa. Together with that the Form’s energy potential either automatically increases or decreases accordingly. The more qualitative Information realization dynamics required more qualitative and more powerful energy supply. All these illusive “alterations” and “corrections” are reflected within the Perception system only by means of the inertial FSA-DRF dynamics of Self-Consciousness Formo-Creators themselves, which are unaware of any of their other Interpretation results throughout other Form-systems. Due to the fact that we aren’t familiar with an integral state and the whole “universal picture”, occurring to other Forms throughout various other Form-systems, we perceive the electron’s Form, inherent only to the “geometry” of these current Form-systems as exactly the same, although its Configuration isn’t the same, comparing to its previous Configuration.

14.16192. Everything is much more complicated than you can imagine, and it can’t be really simplified and narrated down to the levels of our existing subjective Perceptions and current technical potential. Our scientists remind me some quite limited and amateur observers, trying to research the dynamics of very similar types of “particles” with outdated scientific equipment. Let’s assume the “particles” resemble the Planet’s population, which is very diverse in terms of race, culture, nation, intellect and psychology factors. However, with only a limited amount of measuring instruments, these observers have managed to find only three “distinctive” characteristics, such as color (they defined it as “charge”), gender (which was defined as “spin”) and the weight (which they characterized as “rest mass”); all these properties (as they think!), are being the primary determining characteristics of our human race in general. All other distinctions and characteristics, which are so evident between various human races and nations, were left behind, since the limited scientific equipment wasn’t capable of even registering them. And hence, these observers began to classify us according to these three characteristics and draw all their conclusions based on an assumption that we are the “particles”. At the same time we know perfectly well, that humans vary in many more ways than just color, weight and gender!

14.16193. Someone could oppose, asking how it can be explained that our worldwide scientific community has achieved a great success and continues on. Well, if we are to be chosen to perform a certain simple rough work, which doesn’t require any type of experience, based on these three defining characteristics (weight, color and gender), we would indeed successfully complete it: upon the certain working conditions, the representatives of various races and nationalities, political views and religious confessions, scientists and workmen, painters and farmers can dig a pit of required size along with canals, construct supporting walls, apply a pavement, land and grow the trees, and so on... In fact, our scientists have basically the same type of relationship with various particles and fields they research. But if they only knew more about the individual capabilities and talents of their “employed force”, they would be able to acquire tremendously greater potential volume of benefit if they treated us not as some “unenlightened rednecks”, but rather as equal Creators (who might be even more advanced sometimes!). So, please think about it, especially these of you, who even in the slightest way are capable of influencing the critical situation in our global scientific community.

14.16194. Now we understand that the Forms themselves don’t change, - it’s their Formo-Creators Self-Consciousness, which do. It occurs every time you alter your previous Perception in regards to them, applying the different CΦYYPMM (SFUURMM)-Forms. The fan bold, reviewed in the earlier

example, as a manifestation Form, capable of participating simultaneously throughout various Synthesis Vectors never changes, it always remains the same; however, if we look at it as a Form of Self-Consciousness, then it is always different. Thus, it becomes evident, that each atom's elementary particle Conscious Fields contains the slloogrent program of its participation in all possible kinds of Synthesis, primordially incased in it. The precise Form of a precise atomic composition, bearing precise mechanical and chemical attributes is capable of revealing itself within the specific realization type. In someone's Self-Consciousness this bold is structured by the "octahedron" Formo-Creators, in other person's Self-Consciousness its structured by the "hexahedron" Formo-Creators, while in someone else's Self-Consciousness – by the "dodecahedron" Formo-Creators, not counting all the variety of other "intermediate" variants of synthesized "karma-fractions".

14.16195. By utilizing the specific machine, it's possible to transform this bold into a nail, re-melt it into a bracket, or, while chemically treating it, make a pigment out of it with a reagent's participation; or, we can create a fertilizer from it, and its atoms will then enter the plant's molecular structure. Only the quality degree of your Self-Consciousness Formo-Creators can determine the specific morphogenetic processes, where the aggregation of iron atoms, currently expressed in this bold, can participate. As well as knowing about the material processing, physical and chemical structure of matter, also determine the entire spectrum of various "tasks", where these particles can be utilized as various Forms. The quality of application for each item (the bold in this case) is determined by the quality of Form-system, where you are capable of re-focusing into. This bold have acquired its current Form because certain "people", who knew about the ore and steel mining and processing, have transformed the once "lose" elementary particles into it. Similarly, other "people", possessing slightly different set of raw material processing CΦYYPMM (SFUURMM)-Forms, could manage the creation of blood-substitute specimen constituent.

14.16196. Hence, the electrons can be clexed by various definitions, and then they would differ not by a Form, but by such quality degree, which you can attract from CΦYYPMM (SFUURMM)-Forms, already existing as certain Experience within your individual ODS. And if you have nothing to do with creation of this fan (if you aren't being its Form-Creator, and you don't have the CΦYYPMM (SFUURMM)-Forms regarding its structure), then, following the untwisting the screw, the fan can at some point fell and brake, since you have incased the fan's Configuration with your own Information, which isn't compatible with the previous Information, which in turn has contributed to its manifestation in this Reality as a fan. In order to understand the differences between electrons and atoms, comprising the various materials, it is essential to understand what gluons are.

14.16197. Well, what are gluons? First of all, they are the Information carriers, on the basis of which they organize quarks into the more complex structures. On the basis of Information, which gluon Formo-Creators incase into each family of quark Formo-Creators, gluons together with photons "project" this Information into lepton Formo-Creators Configurations together with Information, which photons "project" into the lepton Form-Creator Configurations. However, the Information, inherent to gluon, photon and quark Formo-Creators is slloogrent in its nature. The electron Formo-Creators, while resonantly attracting it from this slloogrentity strictly in accordance with their function quality, uniquely "unpack" and reveal it as a certain Form; this means that the definition type of the Information, clexed by them, depends on which exact Configuration Forms will be structured by these precise electron Formo-Creators. For them it's unimportant whether it's a fan, or some type of plastic; the important fact is that they react differently towards the various types of definitions – towards the "projecting" of various Energy-Information, coming from quarks.

14.16198. How is that electron, proton and neutron Formo-Creators became a fan, and not anything else? Well, the “humankind” collective Consciousness possesses the natural resource processing technology, the energy source, technological drafts of manufacturing and assembly – an aggregation of certain СФУУРММ (SFUURMM)-Forms, which has defined the entire dynamics of certain fragments along with this whole “creation’s” consecutive manifestation. And the resonantly formed proton, electron and neutron Form-Creator “creative team” Configuration became this very “creation”. The gluon Formo-Creators have “projected” the Energy-Information regarding “this very” utilization type of these elementary particles within this current Continuum groups into the Configurations of the specific quark families, representing tiniest fraction out of the considerably more extensive slloogrent information flux of all possible ways of their various “utilization”.

14.16199. The only utilization type, which isn’t possible to perform – is to accelerate these atoms to the speed of light. This Energy-Information isn’t primordially incased into their Configurations, since in this case they would cease to be the electron, proton and neutron Formo-Creators, as well as the “substance atoms” within current dimensional range. The Energy-Information of each particle is slloogrent, and all possibilities for its manifestation in a certain Reality are primordially predetermined within it. Electrons, participating in a morphogenetic dynamics of “human” Self-Consciousness Forms, are synthesized (clexed) by СФУУРММ (SFUURMM)-Forms of “our” “human” “Formo-Creators; therefore they differ from other electron Configurations, clexed by various other Synthesis Vectors.

14.16200. In Continuums, where other Proto-Forms act as the dominant manifestation Form, the electron, proton and other “formo-particle” Forms are the same; however their Form-Creator Configurations will be different, since they are structured by the different Quality Aspect “karma-fractions”, than the “human” ones. The HHAACMM (NNAASSMM) of each elementary particle is structured by the slloogrent Energy-Information, resonantly “projected” into it, and everything, related to the dynamics of this particular slloogrent part, in relation to this very particle, can implement it only in this particular type of dynamics and non-other. The exchange of the realization Form of this particle is possible only upon the change of the Energy-Information, structuring it, the resonance source of which can come from various other Self-Consciousness Formo-Creators. Any “form-particle” dynamics always has a boson present there, as a representative of a field structure, which created this particle and allowed its manifestation in this exact “fashion” by means of its own resonant interactivity with the corresponding (in terms of quality) karmo-klofts of УПДУЙКК-Field (UPDUYKK-Field).

14.16201. The Universal Energy-Information slloogrentity attribute is a core component of any particle manifestation ability. For instance, why electron can become a polaron? Because primordially this capability is programmed into it, and once a polaron, it imparts a whole new attributes to the Space. However, “externally” (according to its manifestation Form), it’s the same exact electron, which slowed its dynamics and imbedded a part of its Energy-Information into the Energy, necessary for the surrounding atoms polarization, which immediately effected its own attributes, re-focusing it into the other Form, resonantly more compatible to its newly acquired attributes. And it’s important to keep in mind, that the Energy-Information, related to such “re-focusing” activity upon the specific constructive realization cessation process, has always been a part of its dynamics.

14.16202. I know that any “form-particle” of our Reality is either a “dodecahedron”, or “hexahedron”, and the only difference between them lies in the quality of Energy-Information, structuring their

manifestation Form Configurations. Their Form is the same, but the Energy-Information, structuring the “ribs” and stimulating the svilgs-dynamics of such “hexahedron” towards the manifestation in a form of a “sphere” – is different. Factually the “sphere” doesn’t exist in reality, since the only thing, which does exist – is the “spheroidal” dynamics – it speeds up so fast, that actually transforms into something, which can only be compared with an electron cloud, a “geometrical figure”, which, at the instant of its forced “halting” within the information space of my own Self-Consciousness, most closely have resembled the “hexahedron” to me. The ever-increasing amount of other “hexahedron” interconnections continuously enters this “spheroidisity” due to the resonantly-egllerolift attractor influence of gravitons-hvasslons. Each “hexahedron” can only enter into a very specific resonant interactivity type with other “hexahedrons”, hence producing various types of substances, various types of interconnections and Conscious Fields.

QUESTION: Wouldn't it be logical to assume, that the quantity of elementary particles, structuring our Reality must be much larger, not 12 (6 leptons + 6 quarks), since each “hexahedron” Configuration should have its own particle. In reality, however, we observe a quite limited amount of stable particles, constituting the basis of our materiality, while at the same time for some reason don't observe any intermediate Forms between, let's say, proton and neutron – some hypothetical kind of “neutron-proton” or “proton-neutron”. Or am I wrong?

14.16203. Dear Велла (Vella), it's just that we try to research them from the very same Reality, where they are manifested. We actually are manifested here by means of the same protons and neutrons, and thus can see only things, which mostly correlate to our Reality type and our Synthesis schema, which is assured due to specific “human” СФУУРММ (SFUURMM)-Forms, and not, let's say, animal or insect СФУУРММ (SFUURMM)-Forms. If you are to turn into an ant now, the tremendous amount of circumstances in your biology, surroundings and Perceptions, would change accordingly. For instance, in Thailand I've seen large ants, capable of maintaining of incredible amount of efforts during a very long period of time, holding a growing palm leaf with their front paws, while attempting to build their cocoon; they remain in this stretched, extremely tense conditions for days, withstanding unimaginable (from our point of view), amounts of pressure.

14.16204. They have completely different electron Form-Creator Configuration, differing from ours, since they utilize totally different part of slloogrent Energy-Information. Slloogrent! The one, which allows the electron Formo-Creators to be manifested as a Form of an ant, and not our “cellular component” Form, for instance. As a “form-particle”, the electron Energy-Information of an ant's body varies from ours. The Energy-Information provides variable attributes to the same (as you think) electrons and protons, participating in manifestation Forms of various Proto-Forms. However, in reality, the scientists have defined a vast, multi-quality “hexahedron” quantity as an electron, only because they somewhat similarly interact with karmo-klofts, while another “hexahedron” group, tremendously different from the first, was defined as “protons”. And so on. Therefore I repeat one again: supposedly “the same electrons”, structuring various Proto-Forms, are in fact – different particles; and in the future, as we progress towards the флакглаассный (flakglaass) Reality types, these distinctions will become evident progressively.

- According to physics, the difference in biological and physical Form attributes is based on organic molecule structure variance. The ant's external skeleton consists for the most part of the chitin

compounds, allowing for such tremendous load pressures, manifold surpassing its body weight.

14.16205. Dear Ввуудтуурм (Vvuuldtuurm), let's look at it more closely! What a chitin consists of? That's right – of the monosaccharide molecules. They are structured by atoms, which, in turn, consist of electrons, protons and neutrons. The electron, proton and neutron Configurations, possessing the Energy-Information, inherent only to them, have managed to merge within a specific ant Form into a substance, which we define as chitin (non-existing in our HYU-BBY (NUU-VVU)-Forms), since we, in our subjective Reality, going through completely different Synthesis schemas. The atom and molecule Formo-Creators of “our” biological Forms – electrons and nucleons, can never become a chitin, because in realization construction of the current Synthesis schema such Energy-Information is completely irrelevant to them throughout any stage of their inertial development. And even if you compose yourself a meal, consisting of ants for 100%, the level of chitin constituent, nevertheless, will not change within your biological Form. Whenever the superior Formo-Creators of an ant Proto-Form “re-focus” out of the “dead” ant Forms, they still only possess the ant bio-Creators of ant's DNA, proteins and polysaccharides. Our DNA bio-Creators aren't able to utilize the ant's proteins and polysaccharides for their own synthesis purposes (intact!); for that to occur they first have to disintegrate them onto constituent Forms, for which initially they would require СВУУЛМИИ-СВУУ (SVUULLMII-SVUU)- and ЛУУДМИИ-СВУУ (LUUDMII-SVUU)-Formo-Creators (SVUULLMII-SVUU- and LUUDMII-SVUU), responsible for the decomposition, putrefaction and disintegration processes, which actually “know” how to separate the highly-molecular protein and polysaccharide structures into the low-molecular ones.

14.16206. Our Formo-Creators, manifesting through bosons (photons and gluons, to which you are accustomed to), are capable of quantizing only in relation to the limits of their own Synthesis schema; and in order for them to utilize chitin for any purposes, they have to “dismantle” it to such degree of its protein “elementariness”, certain fragments of which they could successfully utilize in their Creation, while everything else, not suitable for them, withdraw from the body. And only after that, utilizing the Energy-Information, embedded into their Configurations (just like an engineering draft regarding their own Synthesis schema), our bio-Creators can utilize the universal fragments, formed on the chitin basis for their realization Construction. As I've mentioned previously, the Formo-Creators, utilizing the СВУУЛЛ-BBY (SVUULL-VVU) and ЛУУД-BBY (LUUD-VVU)-copy СФУУРММ (SFUURMM)-Forms – are mutual for all biological Proto-Forms, since they represent the hypothetical “building blocks”, which the more developed bio-Creators utilize for the construction of their own synthesis dynamics.

14.16207. It should be very clear for you that it isn't us, “the people”, who are organizing the protein, polysaccharides, DNA, RNA, and other macromolecule formation processes, not mentioning the regulation of various systems and organs. In fact, most of us have no idea what that is! However, not many of us actually wonder who is organizing all these processes. Is it really some “inanimate atoms and molecules” are wiser, more experienced and more educated than most of “us”? Of course not! Most of you are inclined to believe anything, but that, since it offends their individual “honor and dignity”! But I couldn't care less about the egocentric artificiality regarding “yourselves” and “your own” farfetched self-pride!

14.16208. Therefore I once again highlight for the most inapprehensive and stubborn of you: everything, which you define as “the base, inferior psyche” and discrete mental processes is actually a result of continuous biochemical reactions, organized by various molecular (resonantly aggregated

in terms of specific Synthesis schema Configurations) groups of self-conscious elementary particle Formo-Creators. The more organized Self-Consciousness dynamics, verging with a Collective Sub-Consciousness, is implemented on flaks-wave Level, since the higher-frequency psyche-mental activity is based not upon the ODS CΦYUPMM (SFUURMM)-Forms, but rather ΦЛYУ-ЛYУ (FLUU-LUU)-complexes of ΦЛYУ-BBY (FLUU-VVU)-modules. Hence, the “unpacking” process of such Energy-Information requires the participation of boson ФЛАКС (FLAKS)-Creators – photons and gluons. And such dynamics itself is implemented not so much by the biochemical reactions, but rather by the “Bio-pendulum” (Biomayatnik) and the cerebral cortex of higher-frequency Form-Creator Configurations wave dynamics, “projected” onto the Self-Consciousness “bio-screen”.

14.16209. If you could actually enter into an “inner space” of your own physical organism, you wouldn’t see anything, even remotely connected to your subjective Perceptions regarding a “homo sapiens”, manageable from a certain “main console”; you will only see an entire biochemical laboratory, or better yet – gigantic processing plant, where each separate element performs “its own” specific function. Why is that pipe vibrating over there? Oh, it actually produces a specific hormone! Where does it get it from? Well, it derives it from these circulatory blood vessels with various substances being delivered to it (the “phosphorous” and “iron” Formo-Creators), which in turn are being absorbed by it through specific membranes and turned into adenosine triphosphate and so on. No one of us have any idea how exactly this is done, but all this – is a specific Formo-Creators activity, which operate by the realization dynamics of specific atoms and elementary particles by means of the continuous egllerolift “presence” in them of the higher-quality energy-information carrier Configurations – bosons (that is why most bosons are capable of active interactivity relationship with karma-klofts, since without their specific Energy-Information the elementary particle Formo-Creators couldn’t implement their primary functions). At that, the boson aggregation, structuring each realization Form, represents the combination of self-conscious multitude of various Conscious Fields, certain elements of which you define as weak or strong electric or magnetic interactivity.

QUESTION: Well, is this true that elementary particles themselves are like these universal bricks, let’s say, 50 types or kinds, and only Formo-Creators decide how they wish to utilize them...

14.16210. Dear Грааллгллаасс (Graallgllaass), you again got it all wrong! You are trying to divide the elementary particles onto some sort of “building blocks” and some certain Form-Creators. Such separation doesn’t exist in the Universe. You tend to forget that each particle is fully self-conscious and it’s concurrently a Form-Creator, information carrier and transmitter, since in the basis of its realization construction lays the partially synthesized “karma-fraction”. As you know, any “karma-fraction” is an aggregation of Form- and СЛYИ-СЛYУ (SLUI-SLUU)-Creators (SLUI-SLUU). I have indicated that a “karma-fraction” lays in a basis of any particle, since the particle is actually a narrow-specific Configuration “projection” of this “karma-fraction” onto the Space-Time dynamics (through the clexing process of any CΦYUPMM (SFUURMM)-Form by the Self-Consciousness Formo-Creators).

14.16211. Even according to modern physics there aren’t any completely neutral particles – any particles participates in a single or multiple field interactivity processes, hence it potentially possesses the required Energy-Information, allowing it to act accordingly. Moreover, any particle has its own spin and is capable of egllerolift alternation of its state towards the other particles; therefore it can

be considered the Energy-Information carrier. Considering the abovementioned, can you still assert that there are certain “building blocks” and separately from them – certain “builders”? Please get accustomed to a notion, that any particles type is actually a specific Energy-Information type carrier, simultaneously being both - the “construction material” as well as organizing “principle”, involving this particle into various morphogenetic processes, not just as a passive “structural element”, but rather as an informational transmitter of the global slloogrent dynamics. Let’s review a simple example: what are the plant’s seeds? It’s a DNA, coupled with certain amount of nutrient reserves for an initial growth phase. The DNA possesses sufficient amount of Energy-Information for seed’s Formo-Creators to initiate an active involvement of elements of the surrounding reality into their resonant dynamics and code the entire flux of newly attracted “formo-particles” (clexing within their Self-Consciousness) by their own genetic Energy-Information, thus “making” them the participants of this synthesis process.

14.16212. Furthermore – what is a Thought? It is a certain СФУУРММ (SFUURMM)-Form, bearing the prevailing Will-Intellect Aspect Quality realization dynamics within its Configuration. On which Levels the Thought can implement throughout our STC - on levels of electron, proton or neutron activity? Well, in reality, the inferior Sensitivity СФУУРММ (SFUURMM)-Form Formo-Creators implement their constructive activity on these Levels, where the Love-Wisdom Quality Aspects are in predominance. In fact, I would compare the high-quality Thinking dynamics with tachyon Form-Creator attributes, which are being active construction Elements of ФЛАКС (FLAKS) 3-4 dimensional “resopason” (resonant diapason). Hence, thinking about certain processes, “not belonging” to this Reality, and not in any way reflected by the Formo-Matter Configuration of 3-4-dimensional levels, means manipulating from gluon and tachyon particle Formo-Creator Level positions, which structure the 4-5-dimensional resopasons.

14.16213. Gluons, tachyons and photons – are the particles, closest to quarks (currently known to scientists) – in terms of “materiality” degree of ФЛАКС (FLAKS)-Creator Configurations. So, where the quarks originate from? That’s right - within superior resopasons of 3-4-dimensional levels. Hence, gluons and photons are actually being these Forms of constructive manifestation of Self-Consciousness Formo-Creators, which directly transmit the Energy-Information from the neighboring ФЛАКС (FLAKS) inferior Reality resopason into Configurations of irkkulligrenn Reality Formo-Creators Configurations. According to our Perceptions, what is “out there”, most closely resembling the ФЛАКС (FLAKS) dynamics? Out of what is currently known to scientists, these are tachyons (moving faster than a speed of light), luxons (moving with the speed of light) as well as all possible types of polaritons, originating as a result of the photon interactivity with various medium exaltations, such as phonons, excitons, plasmons and magnons). All morphogenetic processes occur not as a result of our activity (like working with a saw), but because the Sub-Consciousness Formo-Creators are constantly transmitting the slloogrent Energy-Information into the information space of Self-Consciousness, and through the most qualitative Formo-and СЛУИ-СЛУУ (SLUI-SLUU)-Creators are organizing the quark Formo-Creators from within, implementing absolutely all possible morphogenetic processes, which we observe around us in a form of a fan or a bold, for instance. There is a slloogrent Energy-Information regarding a certain implementation process – it has manifested in a form of a Thought СФУУРММ (SFUURMM)-Form, while a Thought itself – is actually a tachyon, gluon and polariton Formo-Creator Configurations aggregation, specifically interacting with one another.

14.16214. If you are to incase your Self-Consciousness into your own body by means of a deep Meditation and examine any tissue fragment, you will be amazed that there is nothing exists there,

except electron, nucleon as well as protein and fatty complexes, created by them! No one is running or fussing around, and no one is “loafing” either. The whole organization and implementation structure is flawless and fully automated in a “space”, which seems virtually unlimited and endless. If you closely examine the blood, you will be staggered by the orderly and self-sustaining degree of any Formo-Creators organization, for instance, the ones which we define as leukocytes. Thus, without “asking anyone”, or “reporting to anyone”, neutrophil bio-Creators detect, capture and process various pathogenic bacteria and tissue particles with the assistance of hydrolytic ferment; parallel with them, bio-Creators of eosinophil, independently migrating from the bloodstream into the mucous membranes of respiratory, genitourinary and intestine, locate specific parasites there and inject them with the contents of their granules (peroxidase, phospholipase, acid phosphatase, collagenases and so on) as well as lipid mediators, perniciously affecting them; along with all of them, basophile bio-Creators, also without “asking anyone’s permission” precisely implement their warning functions, secreting upon necessity various substances, provoking allergic rhinitis, various asthma forms, or – at in very dangerous situations – anaphylactic shock; monocyte bio-Creators, upon exiting the bloodstream, actively absorb bacteria and other foreign inclusions; lymphocyte bio-Creators form the multitude of antibodies, combat the tumorous cells, detect and annihilate viruses and much more. Parallel with them, erythrocyte bio-Creators transmit the oxygen from the lungs to various tissues, and carbon dioxide from various tissues back to lungs.

14.16215. Something, which we subjectively define as the “blood plasma”, is in fact much more than just “watery blood part”; it is a specifically manifested Form of the superior protein Collective Intellect Formo-Creators, which are not simply assisting the entire multitude of various bio-Creators in their blood vessel movement, - the plasma Form-Creators (albumin and globulin) implement an egglorlift leucocyte and erythrocyte dynamics correction, directing their activity towards the needy organs, and various body parts, while such protein Form-Creators as prothrombin and fibrinogen insure the blood coagulation process. Many of these Form-Creators act as transport proteins (hemoglobin) for various hormones, free fatty acids, bilirubin, various ions and incoming medicine; maintain the stability of colloid osmotic constant blood, participate in a number of metabolic processes (for instance, link the genital hormones, transferrin, histamine, thyroxin and bilirubin, iron, cholesterol, and vitamins A, D and K), as well as the inflammation and immune response processes (for instance, low-molecular peptide Form-Creators cytokines) and so on.

14.16216. The minerals Form-Creators, structuring the blood’s plasma dynamics, - salts Configurations of sodium, potassium, calcium, magnesium, chlorine, phosphorus, iodine, zinc, and others – mutually participate in an osmotic pressure of blood pH and other processes (for instance, Form-Creators of calcium ions affect the colloidal state of the cell contents, are involved in regulation processes of blood clotting as well of muscle contraction and the nerve cells sensitivity). Form-Creators of plasma proteins, along with the rest of the blood constituents, maintain a constant concentration of hydrogen ions on the low-alkaline level (pH 7.39), which is vital for the flow of most of the biochemical processes in the body. The other plasma Form-Creators group is busy “garbage cleaning” (for instance, expelling of urea, uric acid, creatinine, bilirubin, and others). Moreover, all Form-Creators have their own Conscious Field.

14.16217. Frankly, while observing this highly-organized, precisely orchestrated and incomprehensible dynamics, one would involuntarily be amazed by the coherence and synchronism degree of their implementation. It looks like all this is created by an imaginary Creator, far more advanced than we are! However, in reality all this is being orchestrated by Form-Creators of electrons, protons,

neutrons, as well as the protein complexes they initiate – white and gray matter with protein amino-acids, which manage all our surrounding Reality by means of the boson conscious-fields Energy-Information, slloogrently “projected” into their Configurations. It isn’t us, who receives certain directives through TES in our Self-Consciousness regarding each of the Form-Creators: “ok, right now so many erythrocytes have to enter the bloodstream and so many salt milligrams have to be removed from it...” Yes, it looks funny□ that’s because these Form-Creators know and constantly implement all this far better than us.

QUESTION: It appears, that everything “people” implement within each the “human” Reality type, is being “unpacked” into the information space of our Self-Consciousness not directly by us, but rather by these invisible and not in any way comprehensible or impalpable Cosmic Entities – Formo- and bio-Creators?

14.16218. – Yes, dear Зааомми (Zaaommi), exactly! The gluons Form-Creators transmute the Energy-Information from our Sub- to Self-Consciousness. Even the most inferior (from our point of view) types of creation are also being formed through gluons, but are being perceived by other Forms – resopasons (resonant diapasons) between the irkkulligrenn and this Reality. The surrounding matter crystal lattice ionization of, let’s say, the brain’s gray matter, doesn’t allow the high-quality СФУУРММ (SFUURMM)-Forms to manifest through it, causing inhibited polarons (moving through the matter multi-polarized charged quasi-particles, surrounded by ions) to appear, and create only simplified primitive crafts, and not anything complex. So, how do they actually appear within the brain? Well, since this is very complicated and advanced topic, I would have to provide some initial information, for a better comprehension.

14.16219. Each “individual” Interpretation’s cerebral slloogrent Configuration manifestation is formed by the specific proton, electron and neutron Form-Creators, structuring its entire molecular dynamics. However, various parts of the brain are structured by the various proton, electron and neutron Configurations. Their energy-information interactivity spectrums are formed by the resonantly compatible (minimally tense) as well as resonantly incompatible (dissonant, maximally tense) zones. What does that mean? Each electron’s synthesis Self-Consciousness Configuration is resonantly oriented towards very specific level (spectrum) of other Form-Creator energy-information Configuration interactivity. Speaking scientifically, it means that every electron can occupy only its own Level of Energy-Plasma, resonantly mostly compatible with its own dynamics. Certain part of the current Level is predominantly harmonious and balanced with its Configuration, while another part can become such only after the introduction (Synthesis) of a specific Energy-Information to it, only upon its certain qualitative “excitation”.

14.16220. While striving to its previous, most stable condition, the current electron Form-Creators – with assistance of hvasslon egllerolift svilgs-dynamics – are attempting to return into their most balanced state, and “project” a part of the incased – already synthesized by them! – Energy-Information into the synthesis dynamics of other Form-Creator Configurations (electrons, protons and neutrons), at that, supposedly “returning” their Focus (since their “previous” Form had never “left” the current “resonant” spot!) into the inherent to them energy-information Level (such qualitative Form-Creators “re-focusing” are always related to either “absorbing” of a missing, or an “allocation” of an “excessive” for them, Energy-Information).

14.16221. The resonant force, attracting all compatible electron Configurations together, as well as the dissonant resistance (“rejection”, “repulsion”) force between incompatible Configurations, is always present within the Form-Creator Configuration dynamics of any electron (and any other particle!). These Forces are initiated by the “leveling” egllerolift hvasslon svilgs-dynamics – the carriers of certain Pure Qualities, which have motivated the current Form to its manifestation. For instance, gravitons-hvasslons of the JJYY-BBY (LLUU-VVU)-like Development Vectors correct and adjust the entire Form-Creators Configuration synthesis process only along the inherent to them, HVY-BBY (NUU-VVU)-Form Direction, continuously experiencing the dissonant influence of other proto-form hvasslon development Vectors, since all Forms are diffusive. If the electron Configurations are maximally incompatible with one another (for instance, the water and gold molecules), such Configurations remain intact, and have almost zero interactivity degree.

14.16222. Upon the instant of resonant interactivity between the compatible Configurations, the distinctive dynamics of each Configuration Form-Creators becomes somewhat deformed as a result of their mutual counteractive influence (for instance, when two different substance atoms form a single crystal lattice, to some extent altering their previously inherent electron orbitals). Each interactive Configuration has its own force balance interaction due to the considerable duvuyllerit and resonance degree between each slloogrent Energy-Information part, structuring every one of these Configurations. Once the new, additionally “introduced” (synthesized) Energy-Information enters the picture, the counterbalanced energy-informational Levels within each Configuration change accordingly: in some of them the Energy Level decreases on a “single quantum of implemented interactivity”, while in others – increases on the same “single quantum of implemented interactivity”.

14.16223. At that, the Configurations themselves don’t “mix” with one another, but rather are “tightly” held “together” (in certain qualitative condition) only within the level of newly appeared resonant interaction between them (like a magnet and the metal, a fire and the wood, a water and the sponge). However, in such state, the “inner forces”, inherent to each of the interacting Configurations undergo a certain deformation of their dynamics due to that new resonant force impact (meaning that electron shells of all interacting atoms somehow superimpose one another), which in turn considerably alters the typical dynamics of each electron Form-Creators Configuration, which at certain conditions, without any additional energy-information costs, can “inter-project” from their original Level into the other Form-Creators Configuration Level, as if they simultaneously belong to each one of them. In the example with a crystal substance it looks like a totally costless electron transition from certain atom level onto the neighboring atom levels – so, while freely “moving” along the crystal, the electron can belong simultaneously to all crystal lattice atoms.

14.16224. However, this can only occur when an Energy-Information mutual exchange is being implemented within a single Stereo-Form HVY-BBY (NUU-VVU)-Configuration, which, actually, leads to the situation, when all “individual” Interpretations of a single Stereo-Form are initiated by Configurations of the exact same electron, proton and neutron Form-Creators. Thus, their FSA-DRF dynamics can easily and without any extra energy input (only by shifting the information contains of its Focus) concurrently “re-focus” among multitudes of various HVY-BBY (NUU-VVU) Configurations. Within the limits general stereotype of a single Stereo-Form dynamics, all Form-Creators - of each elementary particle type – acquire a certain similarity attribute, which results in their orchestrated interaction, evident through the biological organism systems and various organs dynamics of every concurrently manifested HVY-BBY (NUU-VVU) Form, where these various processes occur. Therefore in certain scenarios we witness “Death of an individual”, while throughout a multitude

of other, “neighboring” scenarios we can actually observe various multi-qualitative variants of that same “individual” continuous Life. That’s because the Form-Creators, implementing throughout the global slloogrent Configuration of the current Stereo-Form, are exactly the same!

14.16225. As a result of a resonant Configuration merge of the entire Form-Creator multitude (electrons, for instance), the slloogrent energy-information zones, inherent only to that very Stereo-Form, are created within global information space of its Self-Consciousness; similar zones are created within mutual slloogrent Form-Types of a single ЛЛЮУ-BBY (LLUU-VVU) Form Configuration. These are such typical clex attributes, which prevent Form-Creators of certain electron Stereo-Forms to manifest within a biological analog of other НУУ-BBY (NUU-VVU) Form-Type, unless they structure the same exact ЛЛЮУ-BBY (LLUU-VVU) Form Configuration.

14.16226. The “allowable range” – the dynamics manifestation between the Form-Creator Configurations of only within all the “individual” single Stereo-Form Interpretations, or throughout a certain number of ЛЛЮУ-BBY (LLUU-VVU) Form-Types, depends on the resonance degree between them: the higher the resonance degree, the weaker the manifestation differentiating Level, hence the manifestation ability throughout other Configurations. Therefore, the only way to actually accomplish an inter-form-type, or an inter-proto-form refocusing is within the two Self-Consciousness “quantum unpacking” instants. That is what, frankly, a “Death” phenomena is all about – without it Self-Consciousness Form-Creators of certain ЛЛЮУ-BBY (LLUU-VVU) Form wouldn’t be able to “refocus” into the any other ЛЛЮУ-BBY (LLUU-VVU) Form Self-Consciousness. At the very instant of a specific intermediate “quantum differential” condition between the “already dead” and living bodies (along the entire Synthesis Direction multitude) they acquire this opportunity. Therefore each Stereo-Form has so many variable “Death” conditions – for a better energy-information exchange between Form-Creators of various Form-Types. The same is typical not only for biological НУУ-BBY (NUU-VVU), and other bio-Proto-Form analogs, but also for elementary particle Form-Creator conditions: each conditionally discrete atom of any matter possesses its own Energy parameters, just like elementary particles, structuring it.

14.16227. Consequently, it can be asserted that elementary and super-universal Form-Creator particles of every Self-, Over-, Super-, and Sub-Consciousness Form (within either a single biological НУУ-BBY (NUU-VVU), all Stereo-Types of a single Stereo-Form, within all Form-Types of a single ЛЛЮУ-BBY (LLUU-VVU), or all the way over to the superior ГООЛГАМАА-A (GOOLGAMAA-A) (GOOLGAMAA-A) Collective Consciousness Intellect) exist as a specific energy-information manifestation spectrum, bearing the resonance (and not tier-like!) structure – from one allowable parameter to the next, beyond which the same exact Energy-Information manifestation becomes impossible. For instance, the Constructive Activity of the exact same АРГЛЛАМУНИ and ИНГЛИМИЛИССА (ARGLLAAMUNI, and INGLIMILISSA) 1-9 Karma-Channel Form-Creators is possible only within quite wide range of manifested Self-Consciousness Form Configurations of a single Stereo-Form, however, once a certain Synthesis degree is reached, it becomes impossible for these Form-Creators to reveal in the same type of “quantizing”, since this Self-Consciousness type corresponds to a totally different Form-Creators dynamics. The same can be asserted in relation to the matter’s Form-Creators: the forbidden energy parameter volume is determined only by the nature of interrelating atoms, crystal lattice structure, and doesn’t depend at all on the crystal size itself; as the elementary particle manifestation energy level increases, so does its “implementation resopason”, while the forbidden energy spectrum narrows (for additional reference see “The electronic band structure” article: http://en.wikipedia.org/wiki/Electronic_band_structure)

14.16228. This isn't as simple as it seems, though. Each "allowable resopason" (or "tolerance zone" for the Form-Creators dynamics) is structured by the variety of multi-qualitative and differently-directed proto-form sub-levels, synthesized by the multitude of energy-information interrelations. Therefore, the low-frequency Form-Creators, which form the most tensor dynamics in relation to other Configurations, are considerably more limited in their choice of Forms, to the Configurations of which they can freely "refocus". Respectively, the more balanced and less conflict high-frequency Form-Creators can manifest throughout a much wider "allowable ranges", which can be weakly, moderately, or fully synthesized.

14.16229. The filling of any particular resopason by any particular Form-Creator Configuration group commences from the moment of synthesis of Energy-Information, the CΦYYPMM (SFUURMM) Form quality of which corresponds the majority of energy-information parameters, typical for the current resonant manifestation zone. There are no completely synthesized "allowable range" inertial conditions exist, since within some of their structuring Synthesis types, there are always some provisional deformations and defects, caused by the inner-aspect, inter-aspect or inter-quality Synthesis, which usually localize on the "boarders" of each of the proto-form development Vectors.

14.16230. All the inter-proto-form refocusing occurs within such psychic conditions, which are typical for these "defect zones". Moreover, in such "zones", not only the Configuration energy-information conditions of the most resonating with defect, for the current Vector, Configuration, elementary particles.

More "localized" Form-Creators conditions, revealing within the "defect zone" force them to be limited with a very narrow manifestation spectrum in deformed Form Configurations, which, for example, in JJYY-BBY (LLUU-VVU)-like development Direction become a foundation of a short nonviable imbecile, oligophrenic and other retarded "individual" HYV-BBY (NUU-VVU) dynamics.

14.16231. The same is true regarding the Form-Creator manifestations of similarly nonviable and deformed Configurations throughout all other development directions as well. These Form-Creators, being a various defect condition carriers at the crossroads of the multitude of various "allowable ranges", not typical for any Proto-Form, - due to their own dissonance – aren't able to participate in realization dynamics of non-deformed Self-Consciousness Form-Creators of any development Direction. The tremendous amount of "Deaths" (nonviable manifestation Form losses) is required so that the deformation elements could synthesize into acceptable, for the current Direction, Self-Consciousness Configurations. This occurs because in a defectiveness conditions the background Quality Form-Creator Aspect energy-information interrelationships becoming active, actually "lead" the deformed Configuration onto manifestation Levels with certain Synthesis type Forms, where the "allowable ranges" become wider, while the spectrums, limiting various manifestations, become narrow respectively.

14.16232. Let's review now the example of sequential conglomerate refocusing process, along with the Self-Consciousness Form-Creators merging-and-differentiation principle, organized according to various "allowable range" limits and their respective types.
