Variety of Forms of Creative Realization of the Cosmic Human

Volume three. Variety of Forms of Creative Realization of the Cosmic Human.

The third volume of «IISSIIDIOLOGY Fundamentals» allows readers to go deeper into yet completely unexplored by us structures that provide functioning of human Self-Consciousness and its interconnections with Self-Consciousnesses Forms focused by it. First two volumes of «IISSIIDIOLOGY Fundamentals» thoroughly describe the deep Nature of Causes and Mechanisms of Creative Activity of everything manifested in multidimensional and different-Qualitative Macrocosmos, including also qualitative Basis of Focus Dynamics of Form-Creators of Universal Structures. The third volume in its turn focuses on the detailed description of basic Principles of exuberation of Human and other Self-Consciousnesses Forms in all the diversity of different-dimensional diapasons of the Tertiary Illusion.

To allow the reader to fully comprehend the essence of the notion «Self-Consciousness Form,» the author describes realization functions of these structures at the example of subjective formation — as a result of life creativity of every personality — of so called personalistic Worlds, which goes far beyond existing scientific notions about the surrounding reality and peculiarities of interaction between Forms structuring it, whether it is a human, a planet, or an elementary particle. Furthermore, he describes different-dimensional variety of Forms of lluuvvumic Direction of development and characteristics of focal realization of Humankind Collective Cosmic Intelligence as a unified the LLUU-VVU-Entity.

The third volume ends with a detailed description of multi-level manifestation of Plasmic Forces Diapasons of our Universe, which are described from a position of their subjective interpretation through the specific peculiarities of human Perception systems. Endless inner transformations of Universal Illusion, as mechanisms of evolutional growth of the Cosmic Human on its Way to its Universal Future, lets inquisitive readers to form in their Self-Consciousness own highly intuitive conceptions about endless varieties of all possible variants of development, where goes the process of eternal multidimensional Existence of every human personality.

Personalistic World as Self-Consciousness Form

Chapter 1. Multitude of personalistic Worlds and sensibleness of Perception

3.0001. It will be extremely difficult for me to uncover and for you, truth seekers, to comprehend *renitively* (i.e. deeply, scrupulously) the true Essence of such important notion as personalistic (i.e. individual) World of «personality,» because very limited by its abilities system of subjective Perception of each of you operates only with decoherent (i.e. artificially, selectively chosen by you from the general slloogrent state of Macrocosmos) Notions about «yourself» and about surrounding reality, which are infinitely small part of versions of different-Qualitative events, circumstances, and states out of a countless multitude of development scenarios, where Form-Creators of Self-Consciousness of «your personality» focus simultaneously (i.e. in parallel) and really. Not only quantum Reality itself is multifaceted and multivariate, where we and other Self-Consciousnesses Forms are manifested *aspectably* (visibly), but we are multifaceted and multivariate as well actively and continuously quantizing, energy-informationally organizing slloogrent Focus Dynamics of all the multitude of different-Qualitative types of this subjective Reality by your different-Qualitative Thoughts, Desires, and Aspirations.

3.0002. Every moment these Elements composing our *subterransive* (i.e. «individual,» «inner,» the deepest) Conceptions about anything — automatically and consistently — change personalized picture of Reality subjectively perceived by us, which makes each of us believe in one and only option of events happening to us, in us, and around us, and do not notice all the consequences which — *at the same moment!* — we carry out by many other reasons, which form in slloogrent Multipolarization of our Focus Dynamics completely different circumstances, mental reactions, and types of behavior. In fact, all that multitude of subterransive possibilities are what I mean by the term «scenario of personality development.»

3.0003. In the language of quantum mechanics, development scenarios, or personalistic Worlds — there are classic options of different-Qualitative «projections» of our single multiworld quantum existence: Depending on our subjective position or point of view on any matter, in our Focus Dynamics in a corresponding way there is «changing» classic picture of subterraneously *seemingly* «formed» by us reality. Actually, we do not create anything new — either in our environment, or in Universe, or in Macrocosmos Itself, but *always* only subjectively perceive, identify something new for us with something, we already know and interpret in our own way, What structures already «initially» Energy-Plasma by peculiar to «It» energy-informational interconnections and gets manifested in every «point» of Space-Time together with «us,» being initiated from Rezomirals by typical for us Focus Dynamics. Any of «personalities,» simultaneously exhibited (manifested) near us, will see and perceive «picture» observed by us completely in its own way. It will «project» Its own Experience «adding» different sense and meaning to it. The same concerns all the rest beings that structure together with us the given «point» of Space-Time, which observe the same «picture»: In Perception systems of different Self-Consciousnesses Forms, like in different kaleidoscopes, it will acquire the most diverse subjective characteristics.

3.0004. The main reason of such endless diversity of versions of same events, circumstances, phenomena, choices, and relationships are subterraneous differences in Focus Dynamics of each Self-Consciousness Form. The Multipolarization Principle of Focus Dynamics implies its presence in every moment in the state of superposition, i.e. such state of Self-Consciousness that includes not one or two but a countless amount of parallel, simultaneous options of any choice made by us, which serves the main reason of manifestation in energy-informational structure of Space-Time (in the skrruullerrrt system) of uncountable multitude of different-Qualitative personalistic Worlds or subterraneous development scenarios. Depending on your ability to perceive qualitatively, renitively, and with interest any of the events happening in your life and your mental state, subjective aspect of Focus Dynamics of «personal» Interpretation that you are self-realizing in «now,» is instantly «reprojected» into the subjective scenario that most corresponds to that particular focal state (NNAASSMM) and is structured particularly by these realizational possibilities (VLOOOMOOT).

3.0005. All that multitude of personalistic development scenarios always «take place» at any moment of our eternal Existence, but the bright and very convincing static «picture» of extremely limitedly perceived by us Reality, which is formed at every moment by our one single choice, does not let us to be aware holistically and simultaneously of at least several versions from concurrently already existing options of our scenarios. Otherwise, we would have lost the Notion about who we are at every given moment, what exactly we are really doing «now» and in what «point» of linear space we are exactly. For our Perception systems it becomes possible either in the altered state of Self-Consciousness (deep Meditation — disconnecting from the process of normal Self-Consciousness, which allows us to perceive the surrounding reality with the help of visual, tactile, taste, auditory sensations) or at achieving a certain ampliative degree of the lluuvvumic Qualitativeness of our Focus Dynamics, when there begins a powerful activation of higher intuitive, psychic abilities.

3.0006. Before reviewing the principles of multi-level organization and different-Qualitative realization of energy-informational interconnection between Form-Creators of all possible types of Form-systems of Macrocosmos, let us try to figure out what we put into such a common notion as «surrounding reality,» which is the visual and mentally perceived by us process of

endless transformation of Focus Dynamics of Form-Creators of a countless multitude of different-Qualitative Form-systems (of Self-Consciousnesses Forms and of subterraneously structured by them combinations of focal Configurations — personalistic Worlds) into more and more Qualitative for them states.

3.0007. Not so many people realize that only extremely tiny part of all that energy-informational content, which through Focus Dynamics of endless variety of Self-Consciousnesses Forms creates the general «picture» of our environment (i.e. really surrounds us being manifested together with us in the same dimensional diapason), might be at least somehow subjectively perceived and estimated by us, being carefully studied, logically analyzed, and compared with something already known. The Notions put by each of us into the concept of «surrounding reality» are very subjective, and they depend first of all on the specifics and peculiarities of organization in our Focus Dynamics of energy-informational interconnections between Form-Creators of DNA and the brain, which provide so called «higher» — for the given, mixtum, analogs of NUU-VVU-Form-Types — neural activity that determines all our subterraneous characteristics and abilities to *conscious* Existence.

3.0008. To deepen the understanding of the considered subject, I would like to point out the fact that these are not Form-Creators of Self-Consciousnesses Forms of our genes (they belong to the category of *synthesizing* Form-Creators, providing auto- and hetero-catalytic functions) that are the main «writers» and «directors» in the process of initiation and Qualitative organization of those energy-informational interconnections, which each of us uses to make their choices. Gene Form-Creators represent amplificational interests of all the multitude of CCIs (and their Proto-Form), which Focus Dynamics show quite high degree of covarllertness in relation to the current Goals and Tasks common for the given birvulyarity type in the current conditions of exuberation. In other words, gene Form-Creators of our «current» NUU-VVU-Forms — in all their specific combination peculiar to the given Synthesis Scheme — *for now* represent in general those Levels of FD which we interpret as collective Unconsciousness, coded by the multitude of unrealized Interests, which are typical for a wide variety of surrounding us Proto-Forms of animals to varying degree.

3.0009. They are not initiators, but only diligent and accurate executors of more universal realizational Programs (SFUURMM-Forms) inherent in f-Configurations of Form-Creators of more Qualitative Levels of Self-Consciousness of the given NUU-VVU-Form, and specifically of collective Subconsciousness. In fact, Focus Dynamics of so called «personal» Self-Consciousness of every particular person represents a narrow-specific result of endless and active interaction of Focus Dynamics of Form-Creators of collective Subconsciousness, manifesting into informational space of Self-Consciousness ampliative SFUURMM-Forms of CCI of LLUU-VVU-Form, with Focus Dynamics of Form-Creators of collective Unconsciousness, representing basic interests of CCIs of other birvulyarity types, Which Experience adapts in a certain way to the peculiarities of our Synthesis Scheme (during kleksing, it acquires VVU-Factor), and eventually becomes a structural component of the Experience of LLUU-VVU-Form Itself.

3.0010. Who and what provides the process of adaptation of different-protoformal Experience, widely realizing through Focus Dynamics of people, to those Goals and Tasks that will distinguish radically in the future intellectually-altruistic psychology of the «future» Human from egocentric and

primitive psychology of present-day animals? the command (impulse-signal) to carry out in every moment a synthetic interconnection of a certain type is generated in DNA — through intermediary protein Forms — *svilgson* Creators-regulators which specific Self-Consciousnesses Forms structure all the *diversive* or «noncoding» DNA (what scientists call «junk» DNA). They do not participate in the process of protein coding directly (let me remind you that one gene often codes several different proteins), but together with synthesizing gene Form-Creators they actively participate in the formation (with the help of the same gene Form-Creators) of Self-Consciousnesses Forms of «their own» types of RNA, which do not carry information necessary for the process of cell protein synthesis, but provide only coordination and regulation of synthesizing function of every gene Form-Creator (strengthening or weakening of qualities peculiar to it).

3.0011. In other words, we should understand that all the gene Form-Creators, as well as any synthesizing Form-Creators, are Forms of expression of *khvasslon* ethereal Dynamics of Info-Creators. These are *khvasslons* that in our dimensional diapason represent regulators and modifiers of any Focus Dynamics, i.e. any synthesizing Form-Creators. Any coordinative activity of *svilgson* Creators-regulators are always functionally provided only by Form-Creators in the conditions of Worlds' Form-systems of the given exiberation diapason, since Info-Creators do not have a possibility to prove themselves in any other way except only through peculiar to them (to Form-Creators) focal Configurations. Therefore, it would be extremely unwise and imprudent to separate their functions (for example, of gene Form-Creators and *svilgson* Info-Creators), or even try to figure out «who of them is more important» in this process — neither first nor second cannot manifest themselves without each other. I use such functional «division» only in order to make clearer the principle of organization and realization of gene synthesizing Form-Creators.

3.0012. Why do exactly *svilgson* Creators-regulators of *diversive* space generate in DNA commands for carrying out by Form-Creators of genes? Because due to the special universal properties of their ethereal Configurations in their functional dynamics there is already initially inherent all the endless *sloogrentness* of casual interconnections, characteristic for *holochrone* Multipolarization of Focus Dynamics of all Self-Consciousnesses Forms simultaneously manifested both in many different-Qualitative versions of «now» and in any of time point of the «future.» Simply put, each of the Creators-regulators knows results of realization of absolutely all variants of the given Focus Dynamics already beforehand. For every NUU-VVU-Configuration (of «personal» Interpretation) exactly that version is *segreksally* «chosen,» which most resonates with specific peculiarities of a certain development scenario. Gene (synthesizing) Form-Creators do not have such Information — their main function is to provide the Mechanism of exiberation, and they do not care what will happen as a result of realization of this or that choice. In other words, *svilgson* Creators-regulators provide the execution of amplificational Principle of unconditional formation of Everything What ALREADY Exists, and synthesizing Form-Creators of all categories provide This Existence with all the countless multitude of corresponding Self-Consciousnesses Forms.

3.0013. Every gene Self-Consciousness Form is structured by the multitude of Form-Creators — carriers of Aspects of different PCQs combined in their activity according to certain *geyliturgent* signs (one gene can be *invaderentally* structured, for example, by carriers of PCQs ALL-Love-ALL-Wisdom and ALL-Integrity; other — by ALL-Essentiality-ALL-Permeability and ALL-Abundance-ALL-Fullness; the third — by ALL-Voidness-ALL-Vacuumness and ALL-Unity; the fourth — by ALL-Will-of-ALL-Intelligence and ALL-Primordiality-ALL-Initiality; the fifth — by ALL-Mobility-ALL-Presence and ALL-Knowledge-ALL-Informedness; the sixth — by ALL-Aspiration and ALL-

Steadiness–ALL-Stability, and so on). Since people genes are structured by different-protoformal Qualities Aspects, and noncoding DNA is structured by Qualities' Aspects of dominant Form-Creators, it becomes clear why exactly Form-Creators of diverse (noncoding) DNA (and not Form-Creators of genes themselves) are the main «writers» and «directors» of FD of every «personality,» — in our lluuuvvumic birvulyarity type exactly invaderental Form-Creators determine eglleroliftive FD, and they are the Forms of khvasslon expression of Focus Dynamics of LLUU-VVU-Form Itself.

3.0014. Therefore, depending on what exactly impulse-command will come to the given gene through RNA from its Creators-regulators, its functionality will change in a corresponding way (hence — the possibility of Multipolarization of Focus Dynamics of the same gene Form-Creators *simultaneously* through f-Configurations of all the multitude of «personal» Interpretations), which will give a certain development Direction to Focus Dynamics of karmo-klofts activated in the given act of «quantum shift.»

3.0015. In its turn, Creators-regulators get the impulse to accomplishment of synthesis of a certain type of every RNA in the matrix of DNA svilgson not as a result of direct interaction with synthesizing Form-Creators, but through Self-Consciousnesses Forms of *absolutely specific* by their functions *multi-modus* proteins, which f-Configurations are structured by Focus Dynamics of *svilgson interpretative* Form-Creators. Specific «projections» of these Form-Creators do not have to be located spatially near the gene. They can structure any part of DNA (even other chromosome!) and initiate either in a wave-way or RNA-way the necessary impulse-command in the corresponding part of our three-dimension matrix. I have called them «interpreters,» because the degree of subjectivity depends particularly on them, shown at interpretation by synthesizing Form-Creators of all the Information that is «unpacked» by them from TEC and VEC, — i.e. all the specificity of instantaneous reactions of Form-Creators of every gene to one or another situation emerging in Focus Dynamics. Suppose, in response to the same factor and the same event, attitude of something or somebody (for example, perception of bright light or darkness, rain or snow, loud cry or whisper, color, movement, somebody's reaction, and so on) one and the same gene, depending on life circumstances of «personality» and general states of the rest genes, reacts (codes protein) in a different way, in each of the case making endocrine system fill the organism slightly *differently* with the corresponding to it hormone.

3.0016. Each Creator-interpreter is simultaneously connected with many genes, which functions it directly supervises. In cell DNA molecules of various tissues and organs these Form-Creators act in a completely different way, and they are actively connected with *different spectral* fragments of its matrix. For example, in DNA of pancreas, heart, liver, and kidney cells one and the same protein is functionally connected with different parts. Every gene Self-Consciousness Form (there are about 25 thousand of them) in the human DNA accounts for approximately 150–200 (!) types of Self-Consciousnesses Forms of Creators-regulators, which transmit to DNA information both from interpreters of the most ampliative (for the given dimensional diapason!) Levels of Self-Consciousnesses (a-interpreters), and from the middle (b-interpreters) and the lowest (v-interpreters, which form RNA generally on the basis of SFUURMM-Forms of SVUULL-VVU-conglomerates). Moreover, subterransive sets of svilgson Creators-regulators and Creators-interpreters in the specific composition of DNA of every «personality» constantly change not only depending on the type of the cell but also over time — in the process of and in strong correlation with the character of realization of consistent Synthesis in its subterransive Focus Dynamics.

3.0017. I have decided to share this Information with you only because all these processes influence most directly the ability of each «personality» to subjective awareness of characteristics of «itself» and surrounding it reality. We can say that awareness is the degree of perception of something (qualitative states — starting from elementary particles, atoms, molecules and ending with Life forms of Planetary, Stellar, and Universal Entities; sensory perception of external and internal — on physiological level — events, situations, psychical and physical reaction, mental attitudes, and many others) or someone (people, animals, microorganisms), which is an integral part of Synthesis and accumulation of personalistic Experience of every «personality.» Precisely on the basis of such Experience Form-Creators of a given Self-Consciousness Form create (kleks) resonationally, through their subterransive ODS, informational interconnections of absolutely all subjective Conceptions of a given «personality» both about «itself» and about its surrounding reality.

3.0018. Awareness is a relative, subjective conception implying the potential and capability of Perception system of this or that Self-Consciousness Form in a subterransive way (visual, tactile, aural or by scent, analytical, associative, or intuitive) to cognize Reality and to interpret ongoing events noticing peculiarities of objects of surrounding reality and following necessary sensual attitudes. The consequence of sustainable development of awareness is strengthening of specificity (in contrast to randomness) of f-Configuration of Self-Consciousness Form, appearance in its Focus Dynamics of the multitude of subterransive signs of mental-sensual perception — various degree of its awareness of characteristics and conditions of own «personal» Existence, manifestation of What we interpret as Self-Consciousness. Moreover, higher degree of awareness in the subterransive system of Perception can be developed only by active and close interaction between Focus Dynamics of the multitude of Self-Consciousnesses Forms that belong to different types of birvulyarity.

3.0019. For example, at neurological level of Perception the phenomenon, when Form-Creators of brain nerve cells are «intuitively» (as if «initially programmed,» predicted in advance) aware of their functions, creates in its turn certain opportunities for bio-Creators of other nerve cells functionally connected with them to manifestation of «own awareness» effect. And vice versa, increasing the Level of Self-Consciousness of bio-Creators stimulates opening even more opportunities for manifestation and creative activation of awareness in Focus Dynamics of Form-Creators of brain nerve cells. The higher is that degree, the less it is suppressed by the activity of a-interpreters of the most Qualitative Levels of Self-Consciousness.

3.0020. Thus, functions of Form-Creators of the central nervous system, which regulates the level of concentration of Self-Consciousnesses Forms of highly developed animals (as well as humans), include not only its growth and strengthening but also execution of tasks of its weakening in the cases, when Form-Creators of the central and peripheral nervous systems start transmitting into the part of the brain (corresponding to cognitive abilities) much more different information than its Form-Creators are capable to process. In other words, the absence of such function of suppressing the intensity of TEC-unpackings of Form-Creators of our «current» — yet very primitive — mixtum analogs of NUU-VVU-Form-Types would inevitably lead to the overloading of Perception system, and its consequence would be the increase in tensoriness between FDs of Form-Creators and FDs of bio-Creators. By contrast, in more ampliative Perception systems (in FDs of highly developed «personalities» and dimidiomittense analogs of NUU-VVU-Form-Types) such system of awareness suppression by svilgson Creators is very weakened or is absent, as a result of which brain bio-Creators are capable to perceive and adopt to the given Synthesis Scheme much more Information from its environment per unit time. Similar process can be observed in so called states of «altered»

or «expanded» Self-Consciousness (i.e. during hypnosis or in deep meditation, when there occurs a local-ampliative activation of covarllert interconnections between brain Form-Creators and bio-Creators).

3.0021. Functions of awareness of the processes happening both in our «inner» Self-Consciousness and in the «outer» World, — as the creation of opportunity to interpret in various ways own and someone else's sensations and feelings in the correspondence to the closest goals and affectative Aspirations (*affectation* — powerful tendency to reach a wish quickly) — are provided by of the *brain stem* bio-Creators controlling our reactions, and also by bio-Creators of the nerve stems crossings area located under the brain stem; this area controls the eyeball dynamics and also the process of our «current» decision-making. Svilgson and a-interpretational Form-Creators of DNA and gene Creators providing functions of cortex are responsible for higher forms of our awareness (more Qualitative Focus Dynamics of Self-Consciousness). These are them who carry out in Focus Dynamics all the activity of awareness of somebody's presence in our environment and initiate all our psycho-emotional abilities. They also transmit in our Focus Dynamics the awareness of those feelings and emotions which we are just not capable either to give name to, or to interpret (determine) in any way, or to describe somehow.

3.0022. I relate such specific psychic states to «*unrealized intuitive awareness*» that is to actual knowing something without certain understanding of its meaning and lack of the ability to explain it coherently. For example, huge amount of the iissiidiological Knowledge, intuitively known by me, cannot be realized now in texts through words due to the absence among people even of the most elementary Conceptions, and in the humankind Collective Consciousness — due to the absence of notions and terminology capable at least somehow to express the true meaning of that Knowledge. As such informational basis appears and spread (particularly, through the process of writing, translation into many languages, and edition of IISSIIDIOLOGY books in different countries) the correspondent «portions» of this Information can be also offered for realization in the given conditions of exliberation, its other part can become public knowledge later — only after the development of people telepathic abilities.

3.0023. Existence of such states (of «unrealized intuitive awareness») proves that we (as Form-Creators of DNA and the brain) always possess potentially some coherent knowledge that is simultaneously «projected» into our Focus Dynamics of our «personal» Self-Consciousness by Form-Creators of collective Unconsciousness and collective Subconsciousness through interconnections, alternative to those that form our conscious feelings and intentions (awareness). In the brain structures peculiar to our ampliative «personal» Interpretations, these interconnections could already develop neural networks between qualitatively corresponding to them parts of both cerebral hemispheres, while the brain of the most modern people is literary «blinkered» by active neural networks between bio-Creators and *low nutation* (i.e. low frequency, long wave) parts of the brain, which provide execution of the most primitive functions. One of IISSIIDIOLOGY tasks is to form and to activate *primariusively* (that is overwhelmingly, forcibly) networks of ampliative neural interconnections in the brain. It is necessary for f-Configurations of bio-Creators of us «present» to be able to become one — as soon as possible — with f-Configurations of Perception system of our more ampliative NUU-VVU-Form-Types, which simultaneously structure more favorable versions of our development scenarios.

3.0024. A huge variety of sounds, smells, pictures, and inexpressible sensations is constantly perceived — on the peculiar to them Levels — by bio-Creators of our brain without being «unpacked» in Focus Dynamics through the specificity of subjectively perceived by us images and feelings. In human brain, there is a very complex system of analyzers (optic, auditory, tactile-kinesthetic), which bio-Creators functionally provide receipt from the surrounding reality to a «personal» Perception system of that Information which is necessary to it for normal vital activity. For example, only for one day the number of human visual conscious sensations exceeds one hundred thousand, while unconscious informational fixations carried out by bio-Creators of the visual system are performed much more often.

3.0025. In case of serious visual malfunctions, the formation of neural interconnections between brain centers of visual and diverse analyzers gets highly complicated or becomes impossible at all, and then bio-Creators form new neural networks, which partially replace missing or lost visual functions. A huge number of such replacements is the result of close interconnections between Form-Creators of the brain of our various «personal» Interpretations structuring development scenarios. They are those who transmit to bio-Creators of other analyzers — for example, of a blind person — missing Information about characteristics of the surrounding reality. Availability and activity (through the shared for them ODS) of these replacing interconnections explains the fact that many blind people can experience (not see, but — alternatively — *experience* in a particular way) not only what may seem an «inner» light and even color range but also various Form-images and Conceptions, which «their» *sighted* «personal» Interpretations can see in other scenarios.

3.0026. Awareness is the state that lets you understand clearly and imagine vividly what is going on with you and around you in present, i.e. in the «current» subjective moment of your Existence. It is the reflection of your Focus Dynamics — controlled by you — in the constantly changing moment of «here and now.» It is neither in the recollections about the «past,» which became ephemeral, nor in our dreams about «future» with typical obscurity and uncertainty. On one hand, the state of the highest — for our current Perception system — degree of awareness can reveal itself in Focus Dynamics in case of simultaneous purposeful interaction between Form-Creators of collective Subconsciousness and bio-Creators of all the basic brain centers participating in the formation of intuitive sensations.

3.0027. On other hand, even deeper state of awareness starts to reveal itself in Focus Dynamics during deep Meditations, when you, as a subjective Observer, go with your self-awareness beyond all the conditionally existing borders of your surrounding reality and temporarily «become» a consciousness participant of Focus Dynamics of other (both more and less Qualitative) versions of «personal» Interpretations or particular Form-Types¹, which simultaneously structure synthetic Levels of your Self-Consciousness. In that time the «current» dynamics of TEC-unpackings of the surrounding subjective Reality is fully suppressed in Focus Dynamics and replaced by SFUURMM-Forms of much more informationally saturated dynamics of VEC-unpackings

3.0028. Focus Dynamics of Form-Creators of any f-Configuration during consequent convergent refocusing (eggeroliftive Synthesis by them of ampliative covallert interconnections according to Scheme peculiar to them) every moment undergoes through Qualitative transformations in resonationally corresponding to it (FD) parts of the skrruullerrt system — the main Universal Form-structure of Macrocosmos for simultaneous-holochrone realization by all Self-Consciousnesses Forms of multipolarizational-sllougrent choices in each Worlds' Form-system. Due to that in Focus

1 About particular Form-Creators, please, read further on

Dynamics of all Self-Consciousnesses Forms there occurs simultaneous realization of different-Qualitative Creative Activity of Form-Creators of the Tertiary Energy-Plasma of all known to us functional types: synthesizing Form-Creators, karmo-klofts, and svilgsons (the last represent specific «mediators» between irrkoglictive and eglleroliftive «parts» of slloogrent FD of Macrocosmos, between Form-Creators and Info-Creators).

3.0029. When we talk about other — non-human, different-protoformal — biological Form-systems (of animals, microorganisms, plants), we can also imagine somehow that process of inner-skrruullerrt refocusings of Self-Consciousness's Form-Creators, because inertial properties of Space-Time, through which they are carried out, and also realizational SFUURMM-Forms specific to our and their types of Existence, with all their huge difference, have similar characteristics in many manifestations. If we start analyzing Focus Dynamics of Self-Consciousness's Form-Creators of some *abiotic* (i.e. nonorganic and «inanimate» in the generally understood sense) Proto-Forms, structuring together with our Self-Consciousnesses Forms all the multitude of Worlds' Form-systems, human subjective Realities, and groups of STCs, we will not be able to realize and imagine at least somehow figuratively with the help of our Perception systems the principles and sense of their Existence: Interconnections between Form-Creators of our and their Synthesis Schemes are too impersept to each other.

3.0030. «Projecting» the results of our prolonged observations of their behavior and properties of physical Form-systems onto our own Experience, we tend to think that in their states (in correspondence to *our* own subjective Notions) there are no and there cannot be any sequences of choices, because, when we change the parameters of a Form-system, it changes correspondingly. In other words, it seems to us that in their manner of Existence there is no skrruullerrt system of every moment subterransive choices with all its potential possibilities of Qualitative transformation (reorganization) of Focus Dynamics. We may have that misleading impression because the types of covarllert energy-informational interconnections structuring Focus Dynamics of Form-Creators of various abiotic Self-Consciousnesses Forms or *promiskuusive* (mixed, more abiotic but possessing some biological characteristics as well) material Self-Consciousnesses Forms — from micro-objects to macro-objects of cosmic scape — are fundamentally different from all those types of covarllert interconnection that are typical of biological beings in general. By the way, all the biological Proto-Forms (humans, animals, and plants) also belong to the mixed types, but only to *mixtum* Self-Consciousnesses Forms, because they are also structured to varying degree by abiotic Proto-Forms (minerals).

3.0031. On top of that, they all, as well as all the multitude of *mixtum* Self-Consciousnesses Forms, can be classified subjectively according to the presence of more or less possibilities for inter-Qualitative compatibility of basic for them characteristics or to subterransive attachment to this or that birvulyarity type. Do you agree that we, people — sometimes absolutely not understanding subterransive prerequisites and motivations that serve the bases for other people's choices — can much less perceive and understand underlying Causes of animals', plants', and microorganisms' behavior. Let alone absolutely different Nature of physical objects and phenomena conditioning reactions of Form-Creators of abiotic and *promiskuusive* Self-Consciousnesses Forms to this or that from internal and external stimuli subterransively corresponding to their Nature.

3.0032. It would be appropriate here to remember that different-Qualitative Focus Dynamics of all different groups of subterransive Continuums (both of abiotic, and *promiskuusive*, and *mixtum*

Self-Consciousnesses Forms) compose the single basis of slloogrentness of Focus Dynamics of promiskuusive Planetary Entity GREIYSLIISS. It means that all the types of birvulyarity, represented in FD of the given Planetary Entity through Form-Creators of these Self-Consciousnesses Forms, are — according to some special characteristics — more covarllert (geyliturgent) between each other, and they determine by their characteristics those general parameters and peculiarities that being in the joint realization mode subterraneously distinguish FD (and therefore, much more complex, than ours, birvulyarity type) of specifically GREIYSLIISS from FD (and types of birvulyarity) of other Planetary Entities. That suggests that imperseptness amidst all Proto-Forms is only apparent, and that (under certain, more correct and renitive, approach to consideration of that question about communicational possibilities between all abiotic, promiskuusive, and mixtum Self-Consciousnesses Forms of our Planet, simultaneously manifested in one groups of STCs) it is always possible to find covarllert signs of interconnections combining them and due to that to gain insight the processes forming them.

3.0033. Thus, the property and degree of awareness of each Self-Consciousness Form can be considered only from the position of birvulyarity type typical only of it, because beyond SFUURMM-Forms peculiar to the given type of relationships and interconnections, subterraneous ability of Perception systems decreases radically to understand objective Reasons of transformation of Focus Dynamics of any objects of the surrounding reality, diminishing relative to manifestations of certain — incompatible, cruvursorrt — Synthesis Schemes (especially at considering those types of energy-informational interconnections that are not peculiar to specific birvulyart set structuring Focus Dynamics of GREIYSLIISS in the given dimensional diapason). The more number of signs are involved in interaction of Form-Creators of different types of birvulyarity among each other, as if partially «overlapping» (diffuzgently «projecting» into FDs of each other) through many skloongms of birvulyart multitudes, the higher degree of awareness in relationships Self-Consciousnesses Forms show that are realized through these Form-Creators.

Chapter 2. The realization Principle of the Mechanism of NUU-VVU-Form-Types wave analogs' exhiberation from f-Configurations of doolls and flaks Self-Consciousnesses Forms

3.0034. Particular combinations of intra-protoformal and inter-protoformal Focus Dynamics of different-Qualitative Self-Consciousnesses Forms are formed in the corresponding to them resonational zones of Space-Time according to the degree of covarllertness of interconnection among Form-Creators structuring these Forms. The highest degree of covarllertness is possible only between duvuyllerrt «parts» of slloogrent focal Configurations of Form-Creators structuring by their interconnection the *same* diffuzgent (protoformal) development Direction realized through the *same* Synthesis Scheme.

3.0035. In the Multipolarization process of slloogrent Focus Dynamics of Your LLUU-VVU-Form's Form-Creators (Stereo-Form), simultaneously and subjectively fixed by personalistic FCA in the endless multitude of f-Configurations, *congenial* (from Latin *con* — together and *genius* — spirit, i.e. similarity in spirit, way of thinking, manners and like that) or duvuyllerrtly alike, similar by

many parameters of Qualitativeness changing in them, groups of exuberation in Space-Time of subterraneous Focus Dynamics of these NUU-VVU-Configurations are interpreted by us as different-Qualitative «personal» Interpretations (the same «personality» manifested in different scenarios), and non-duvuyllerrt *particular* ones, meaning, perceived through various multipolarized states of Focus Dynamics as subterraneously isolated are interpreted as separate Form-Types, which are subjectively perceived by us as «other personalities» by external and internal signs.

3.0036. In other words, those f-Configurations of one Stereo-Form that possess enough quantity of qualitatively combining them signs (what from the point of view of medical and biological science of the given s-Realities is genetically linked to «the identification of personality by its DNA-composition,» and subjectively — to its appearance, voice, qualities and character traits, inclinations, talents, tastes and so on) represent in various variants of development scenarios all the multitude of Its *congenial* «personal» Interpretations with the range of covallert energy-informational interconnection (at more ampliative approach to studying DNA, it will be inevitable to conclude about further concatenation and confluence, or qualitative «merging,» of f-Configurations of congenial and particular Interpretations). If these interconnections do not possess enough quality of unifying signs, then, they become more and more imperceptible to each other and «inside» slloogrentness of Focus Dynamics of the given Stereo-Form (LLUU-VVU-Form) and get formed into all the endless variety of f-Configurations of «personal» Interpretations that seem to be other people, i.e. into all the multitude of particular Form-Types of the given LLUU-VVU-Form, which, depending on the degree of covallertness, imperceptibility or even cruvursorrtness between each other, multipolarizationally transgress/integrate their Focus Dynamics into all the multitude of different-Qualitative groups of human (both invaderental and *vecsative* — recessive) Continuums.

3.0037. The more is Qualitative difference f-Configurations of interacting Form-Creators of one LLUU-VVU-Form among each other (i.e. The less duvuyllerrtly they are perceived by Focus Dynamics of Form-Creators of observing them «personality»), the less probable the presence is in their Focus Dynamics, organized by them in the given «point» of exuberation, of the high covallertness degree in various combinations of signs. That means that Form-Creators of these different-Qualitative f-Configurations do not have possibilities for the joint formation in the given resonance point of f-Configuration of the same «personality.» Therefore, different-Qualitative Form-Types of one Stereo-Form (various «personalities,» which f-Configurations are structured by *particular* — i.e. qualitatively separated — groups of duvuyllerrt Stereo-Types) can structure by their Focus Dynamics the *same* development scenarios.

3.0038. Therefore, we can conclude that one and the same LLUU-VVU-Entity can show different-Qualitatively all the multitude of its realizational Interests, specifically connected with the given diapason of exuberation, through the unlimited number of different-Qualitative Form-Types, which collectively form via their FDs the same development scenarios and groups of individual STCs. When studying IISSIDIOLGY more renitively, you will inevitably come to Understanding that basically all the multitude of human Form-Types, which simultaneously structure the Humankind's Collective Consciousness, are generated and *exuberated* (manifested) in the different conditions of the given dimensional diapason through slloogrent Focus Dynamics of Form-Creators of one and the same LLUU-VVU-TOO-UU-Entity.²²

3.0039. Focal Configurations of all the Form-Types of Stereo-Forms, simultaneously exhibited in various conditions of the given dimensional diapason, represent in the general focal Configuration of the LLUU-VVU-Entity only *certain* qualitative spectrum of sllougrent Focus Dynamics of all Its Form-Creators, which (spectrum) *seems* to be *conditionally* limited (*captivusal*) in its creative realization by multipolarizational peculiarities and capabilities of Focus Dynamics of Form-Creators of all the multitude of NUU-VVU-Form-Types (from 2.5 till 6.0 dimension). In fact, not a single Stereo-Form is captivusal in the process of simultaneous exhibition of its FD into any Creativity Sphere of the LLUU-VVU-Entity, because It is structured by Focus Dynamics not only of all possible qualitative Interpretations of one «personality,» but also by the uncountable multitude of all the other NUU-VVU-Interpretations, specifically *kleksing* by its Form-Creators in different Time Flows of holochrone exhibition of sllougrent FD of the Humankind's Collective Cosmic Intelligence (trilliards ages «ago» and trilliards ages «after»).

3.0040. If we consider this question from the perspective of convergent refocusings of Form-Creators of certain particular Form-Types specifically in the lluuvvumic birvulyarity type, so, we can say that the presence in their joint Focus Dynamics of the countless multitude of common signs combinations (SFUURMM-Forms, forming common creative Aspirations and final Goals) leads to consistent concatenation and confluence of the multitude of particulas (areas, parts) of their focal Configurations into one LLUU-VVU-Form. Thus, multipolarizational Focus Dynamics of Stereo-Form — in the conditions up to 6.0 dimension — can be considered as FD of CCI of Humanity, and in 9.0 dimension — as Creativity of CCI of Uniform LLUU-VVU-Entity (here you should understand that in *objective* Reality general Multipolarization of FD of Stereo-Form, as well as LLUU-VVU, is not limited in any way by the conditions of any dimension, but it gets transformed *duvuyllerrtly-sllougrently* by its ethereal-focal interconnection into f-Configuration of the Highest CCI of Macrocosmos.

3.0041. From Section 10 you will learn that on each dimension Level the structure of multipolarizational Focus Dynamics of LLUU-VVU-TOO-UU-Entity (due to the influence of the Diffuzgentness Principle) is formed by resonational «projections» of Focus Dynamics of the multitude not only of human, but also other subhuman Form-Types, which provide on the Levels up to 6.0 dimension all the realization possibilities of biological (*mixtum*), «bioplasmic» (*dimidiomittense*), «plasmic» (*translucense*), «plasmic-ray» (*dimidioclarus*) and «ray» (*luminosal*) analogs of NUU-VVU-Form-Types.

3.0042. Due to the presence of such a huge variety of all possible different-Qualitative NUU-VVU-Configurations, already now, in order even to try avoiding gross ambiguity in the considered questions, we should agree that by the terms «NUU-VVU-Form,» «Stereo-Form,» and «LLUU-VVU-Form» in our further subjective exploration we will imply only comparatively narrow spectrum of those synthetic interconnections that correspond to the highest degree to precisely lluuvvumic birvulyarity type (that is a gradual transition from 4-dimensional State of the CC Potentiality into 9-dimensional State of the CC Completeness through the following stages: ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Unity + ALL-Integrity + ALL-Aspiration + ALL-Essentiality–ALL-Permeability + ALL-Knowledge–ALL-Informedness).

3.0043. Following such qualitative prerequisites, we — of course, with a certain part of conditionality! — can speak about the high degree of identity of notions such as «Stereo-Form» and «LLUU-VVU-Form.» If we consider the given context only through development and improvement exclusively of Human signs combinations, we will inevitably come to the conclusion that in sllougrent objectiveness

of Macrocosmos in the given megadiapason (till 9th dimension) of exuberation of the considered by us signs (high-sensual Intellect and high-intellectual Altruism) there is no multitude of Stereo-Forms or LLUU-VVU-Forms. There is only one universal LLUU-VVU-Form of Existence of TOO-UU-Entity — the Humankind's Collective Cosmic Intelligence, Which different-Qualitative Form-Creators, for solution and realization of their strategic eglleroliftive Task, actively and specifically use (in the form of Experience, already synthesized in other types of birvulyarity) signs combinations that are also typical of other Synthesis Schemes. You should consider that fact already now in those cases when I — due to many factors yet strongly limiting my capacity in delivering iissiidiological Information — have to differentiate *conditionally* and to diversify one conditional notion into its many elements, each of which without its *integral* exuberation is not just able to reflect the whole Essence of provided by it, in a fragmented way, Self-Consciousness Form or CCI.

3.0044. Why there is no point for us to consider all the rest possible versions of realization of Focus Dynamics of NUU-VVU and LLUU-VVU? Because diffuzgently-protoformal interconnections existing between them (which — as *background catalyst* — are essential for carrying out inter-Qualitative Synthesis of combinations of the lluuvvumic signs according to the Scheme: «CC Potentiality» \rightleftharpoons «CC Completeness») will confuse you definitely and will not allow to form more objective Notions about «yourself» and your surrounding reality. I mean the True Human development Direction as the process of coherent refocusing from our «current,» in fact, protoformal and yet NOT Human in their realizational Essence mixtum Form-Types (among them only UYKKUYYUKSTR-VVU-, OSTROKKOLF-VVU-, and UPDUKHVASSL-VVU-Form-Types are capable to reflect less subjectively the combination of high-sensual Intellect and high-intellectual Altruism) into «bioplasmic» (dimidiomittense) human NUU-LL-VVU-Form-Types and then — into «plasmic» (translucense) Human NUU-LTTVULL-VVU-RS-Form-Types. Focus Dynamics of all the rest Form-Types in multipolarizational slloogrent FD of NUU-VVU-Form (just as through protoformal Direction of our «current» bio-analogs) is inevitably «reprojected» into all possible different-protoformal (not lluuvvumic) sub-kinds, kinds, and subtypes of various diffuzgent types of birvulyarity which integrally structure focal Configuration of GOOLGAMAA-A-Ingredient.

3.0045. The structure of «unpacking-refocusing» Mechanism of ethereal constituent (TEC) and component (VEC) of any from simultaneously focused by You Self-Consciousnesses Forms (not only NUU-VVU, but also all the rest!) is arranged so that resonationally responding to this or that specific — out of endless multitude of generated and modeled by You — SFUURMM-Form is capable to reflect instantly (through all possible Form-shapes of ODS and FLUU-VVU-doubles of FLCs structuring subjective Focus Dynamics of a «person») any objective changes, carried out in the focal Configuration used by You. It «reprojects» Your given Interest (FCA) correspondingly exactly into that «part» of Space-Time which resonates qualitatively with these changes most of all. In one and the same moment Your general Interest (for example, Self-Cognition in a specific experience) is different-Qualitatively diversified into the multitude of realizational versions engaging the whole palette of those narrow-specific peculiarities that are typical of Perception systems of all diffuzgent NUU-VVU Proto-Forms, which are also capable of having such experience.

3.0046. Out of all the variety of these peculiarities that fill TEC and VEC, in the structures of Self-Consciousness of focused by You NUU-VVU-Form, there is synthesized the specific «averaging» option of Conceptions about possible realization of that Interest reflecting in the given «point» of Space-Time the specificity only of the lluuvvumic Synthesis Scheme. All the abundance of such similar realizations of various Interests resonationally uniting into energy-informational combinations,

peculiar to a certain Synthesis Scheme, simultaneously forms — in the multitude of duvuyllerrt groups of STCs — Focus Dynamics of different-Qualitative subjective Realities and personalistic Worlds.

3.0047. It is necessary to note that between Focus Dynamics of «personal» Interpretations, dissonational distances — based on all the multitude of signs combinations uniting them (qualitatively reflected in the structure of interconnections between Form-Creators of DNA) — are considerably lower than between them and Focus Dynamics of Form-Types. Partly, this is exactly why particular parts of your LLUU-VVU-Forms are perceived by many of you as your «past incarnations.» However, if they show congeniality by the multitude of one signs, and particularity by the multitude of others signs, they can be manifested perfectly in the same with you Time Flow, in the same group of STCs, and even in the same with you development scenario organizing thus «their own» personalistic Worlds, which can considerably differ from your subjective Conceptions about «themselves» and the surrounding reality.

3.0048. In the similar cases, a multitude of Form-Types of the same LLUU-VVU-Form, different from each other not only visually but also by skills, inclinations, encouraged by similar in quality affectative Aspirations, Goals, and Will to go in the same direction of creative self-realization (who are taken with one Interest, for example, with natural science, literature, culture) can — in their FCA — get together in one place for a while, meet, and start seeing each other, not suspecting or expecting totally that they are more close to each other than their blood relatives (though, these are exactly particular transforms of Form-Types structuring LLUU-VVU-Form which represent kindred relationship).

3.0049. Not limited in quantity in any way, similar group transformations of the same LLUU-VVU at the exuberation of own joint Focus Dynamics in each STCs group can consist of people of different age categories and do not have any consistent patterns referring to their formation by gender: there can be as many of them as necessary, and it can be either only male, or only female, or mixed different ages collectives. The law of attraction of similarities arranges circumstances of Life of each of your particular Form-Types in such a way that all that different-Qualitative versions of «you» united by the same Ideas and beliefs, circumstances and choices in their subterransive rotational Cycles once inevitably meet together and form a certain «creative team» on realization of common for all of them Interest.

3.0050. Let me notice that many creative teams and even entire formations of people united by same creative goals, spiritual Ideas and actively solving the same realizational tasks are often various physical transformations of the same LLUU-VVU-Form, manifested in the given specific place in the given time for active realization of some important creative or religious Idea, spiritual or intellectual Goal, implementation of progressive socio-political principles or just for carrying out a certain social Initiative. If similar spiritual, sensual, and creative identity is realized actively and positively on the level of mutual perception of two individualities, in these cases, it is quite possible that exactly such «inner» interconnections are carried out within Focus Dynamics of the same LLUU-VVU-Form. In the result of such resonational «convergence» there often establish very stable relationships, which the most sustainable characteristics are unity, spiritual cohesion, and general commitment.

3.0051. In fact, in our surrounding reality there may not be some representatives of all possible Proto-Forms, but there ARE TO be present NECESSARILY various interpretational versions of «personalities»

generated for exuberance by Your collective Stereo-Form, which («personalities») interact creatively in each STC group to varying degree both with you «personally» and with representatives of many other Synthesis Schemes. Specific SFUURMM-Forms of Focus Dynamics of these «congeners» Form-Types can be imperceptible or even cruvursorrt according to the combinations of some signs in relation to FD of Form-Creators of the «current» f-Configuration of your «personality,» and by the combinations of other signs — covarllert. It is You, in all the endless multiplicity of versions of all possible Self-Consciousnesses Forms of Your homologous «personal» Interpretations and particular Form-Types, who compose all the qualitative energy-informational basis of the Existence of that subjective Reality, where you «now» personally perceive yourself and which could not be manifested in a way you perceive it without you and your joint (with all them!) Focus Dynamics. Each of these Self-Consciousnesses Forms of You Yourself exist around you in order to help you actively and effectively (even if unconsciously) to start perceiving yourself as a Human as soon as possible.

3.0052. These human Form-Types may be located geographically both in close proximity and at a great distance from you, but each of them influences necessarily, to varying degree, — constructively or distractively — the process of formation of FD of your Self-Consciousness in various ways potentially providing «personally» you with all the necessary opportunities for gradual reformation of depliative selfish SFUURMM-Forms into more ampliative ones. Remember: in «your» personalistic World you are always the personality you create yourself in your subterraneous relationships with «all the rest» of your «personalities» (that is the true cause of the popular saying «treat other people the way you want to be treated yourself»). All our «interpersonal» relationships with «others» — this is, perhaps, the most important moment in all the creative process of endless revelation and activation in the «current» Focus Dynamics of deeper and more qualitative SFUURMM-Forms structuring more ampliative Levels of your Self-Consciousness.

3.0053. Your so-called «interpersonal» relationships, in their Essence, reflect not your relationships with other people, but «personally» of you with «yourself,» because you are «them,» and they are «you» — only somewhat differently interpreted by your Perception system. The main and only thing that makes sense for you in each of your external and psychic manifestations is *who* you are «personally,» *what exactly* you are doing, and *as who* you have the possibility to prove yourself in every defining moment in relation to each of these «interpersonal» interactions. You will find Yourself again and again not in biased estimates of the behavior of «your other selves» in the circle of «interpersonal» interactions, but in your own reactions in response to each of their impacts. The problem of relationships of most of you is that you are not able to perceive their *sincere* Help as a real Possibility to recognize yourself as that Uniform, sllongrently forming You, Harmonious Flow of Self-Consciousness, and only therefore, in the state of forced formal fragmentation with your «other parts,» you continuously suffer, argue, criticize, hate, blame, and kill, but always and everywhere this is only *you*.

3.0054. Here «blame» lies in your yet necessary attachment to your own «personalities» which very strongly hinders each of you to feel a real disassociation from common subterraneous external signs of «yourself» in order to realize how elusive, unstable, and temporal that ego-sympathetic connection is, which does not let you even in thoughts admit the possibility that somebody else can be also «you» simultaneously (especially, if you do not like him or her by some reason). To a greater degree such «all-dividing» perception of the surrounding reality exists due to the peculiar to your Focus Dynamics steady fixation on all possible ego-tendencies emerged from your unappeased desires to get low-qualitative pleasures: If you want sex, you want it «for *you* lascivious,» if you are

happy, you are happy for «you beloved,» if you are proud of something, you should be present surely in that experience — so nice, kind, genius, lucky, special, and so on.

3.0055. Your usual «ego-perception» is still too low to give you the possibility to be honestly happy for things that do not concern you personally, to enjoy thoroughly knowing that someone else who has nothing to do with you might feel very good and joyful — that someone else you do not know is very happy. Your sophisticated «personal» ego tries someone's positive states on your own constantly and not finding inner identical response at once activates in your Self-Consciousness those SFUURMM-Forms which are realized in such low-qualitative emotions as envy, condemnation, irritation, and a desire at least somehow to lower, diminish in the other person that positive state that you cannot experience in the given moment by some reason.

3.0056. Weak ability to conscious self-disassociation and attenuation of selfish attachments to focused by You «personality» appear only with deep absorption of the iissiidiological Knowledge, when your Focus of Close Attention starts stabilizing on the «low» Levels of Focus Dynamics of AAIIGLA-MAA- and KLOORTM-Creators (that is, the same «you» realizing through 1st-3rd karmic Channels of AIGLLILLIAA- and ORLAAKTOR-Iissiidi), and already do not stop going up due to the activation of your Self-Consciousness on more and more ampliative Levels of the second pair of IISSIDI-Centers. That Self-fixation on intellectual-altruistic tendencies of your life creativity weakens «ego-conflict» of all psycho-mental processes and lets you perceive the surrounding World without distorting refraction of «personal» vanity and obsessive self-regard. Activation of «interpersonal» interactions with mentioned Levels already to much less degree fixates your FCA on all possible Form-factors. That lets you treat any forms (including other people) without false prejudice and farfetched criticism renitively understanding the causes of many inadequate behavior reactions.

3.0057. In the Conceptions peculiar to these Levels of Self-Consciousness, focused by You NUU-VVU-Form («physical body») loses that exceptional importance you give it, and you associate your choices to much less degree with «merely physical» existence, because you start to realize the true Sense of maintaining the high quality of your «inner» states — as the most safe and effective way of refocusing into even more universal Forms and Continuums. Then, as you get free of instigating activity of SFUURMM-Forms of the two low Centers, you will be able to equal perception of any other Forms (people, animals, plants, minerals, nature phenomena) projecting on them your own positive experience and starting to treat all your environment as a natural part of Yourself.

3.0058. Then, you will start to understand renitively that any negative reaction of each person towards you is only the result of what you in the given realizational Form do not just want to demonstrate in the similar primitive way and that creates a tensor in someone's attitudes to you. At the same time, you realize that General Harmony of your life Flow requires in your «physical» Existence qualitatively dual interconnections providing continuous process of steady balancing in your Focus Dynamics of all the multitude of karmic interconnections, including the most primitive ones, in which you have no Interest any more. Realization of that, already not necessary for you, low-quality experience «have taken» your other particular Form-Types, which now in the same way scrupulously fulfill entrusted on them obligations in relation to you (and others!) just like you perform your own positive and altruistic roles towards them (and others!).

3.0059. Constantly trying to see in negative reactions of other people unrealized manifestations of low-qualitative motivations peculiar to yourself, you constantly improve and stabilize your

Focus Dynamics on intellectual-altruistic Levels of Self-Consciousness inevitably approaching that harmonious state, where your «personal» Perception inseparably integrates with all the manifestations of your surrounding World, no matter how «unfavorable,» «unpleasant,» or «indecent» they seem to you now. As long as you are extremely divided in your Self-Consciousness with all the rest world and can interpret each of your psycho-mental connection only in the categories of «mine» and «not mine,» «personal» and «all the rest,» «advantageous» and «beneficial,» all your interactions with «others» become so complicated that you become just not capable to make right choices.

3.0060. Do not forget that by each of your choice you create mentally and strengthen sensually in own Self-Perception the Image of *who* you are and *who* you represent in the given moment of your «physical» Existence in the General Flow of Life. Being not able to perceive all the «rest» qualitative Flows of your own Life as «yourself,» you concentrate at best not on *what* exactly You want in every given moment of Existence (in the cognized by you multiplicity of all your realizational Forms), but on *what another* person wants or *other* people do with compulsory analysis of the possibility to benefit from the given situation selfishly.

3.0061. The less and fewer you will be able to see in something or somebody an unpleasant or hostile things for you, the faster and deeper your Perception will organize into the side of positive acceptance of any problem as a favorable possibility for your spiritual growth for increasing the activity of SFUURMM-Forms of more qualitative Levels of your Self-Consciousness. In the state of renitive Understanding of your karmic indivisibility and creative unity both with each person «individually» and with «all the rest,» your every choice in the relationships with people and your surrounding World will boil down only to determination of WHAT *you* need to realize inside yourselves that ONE whom you want to be. Because each of your step in the direction of *own spiritual growth* just cannot be bad for all the rest Flow of Life, no matter how critical or negative it is perceived by others, by *Your* less self-conscious Form-Types. For many of you the most effective way of stable increasing Qualitativeness of Creative Activity of Self-Consciousness is the Path of renitive Cognition and Understanding of Yourselves through those of Your imperfect Forms, who you are no longer in own self-perception (in your firm belief of «WHO YOU ARE»).

3.0062. Earlier I have already described (on the example of the principle of exhibition of quasicrystals in subjective Realities) the rotational mechanism of the formation in our Perception systems out of many duvuyllerrt in their Qualitativeness Stereo-Types not only of separate «personalities» (human Form-Types) but also of any other Self-Consciousnesses Forms. In specific conditions of wave exhibition on depliative Levels of 3–4-dimensional diapason of Space-Time, focal Configurations of each of these Form are structured by the multitude of doolls SVUULL-VVU-conglomerates, which represent all the energy-informational basis of wave Form-Creators, necessary for the consequent inter-Qualitative and intra-Qualitative Synthesis of Focus Dynamics of quantum «personalities» formed by them.

3.0063. For example, the process of visual, biological exhibition of wave f-Configuration of *every* NUU-VVU-Stereo-Type of current human «personalities» is provided by simultaneous covarllert focal Activity — in the given resonational point of Space-Time — with 500–300 (in average for the given type of subjective Reality — of 386) *full-fledged* doolls-quantum (irkkulligrenic and usstukkulyar) SVUULL-VVU-«personalities,» whose combined Focus Dynamics form that Qualitative tendency, which is characteristic for some realizational Levels of only *one* human Stereo-Type. Remember that visual-biological stability of exhibition of wave Perception systems of each NUU-VVU-Form in

the conditions of 3–4 dimensional diapason is provided by consistent fixation in Space-Time for one second from 250 to 400 NUU-VVU-Stereo-Types, which f-Configurations are simultaneously structured not only by doolls but also quantum and — at the most ampliative FD — even by flaks Form-Creators .

3.0064. In other words, 386 duvuyllertrly grouped Self-Consciousnesses Forms (in our Notions — FDs of self-conscious «personalities» in long-wave diapason, who by their Synthesis Scheme cannot be yet attributed to NUU-VVU-Form-Types because they participate only in intra-Qualitative Synthesis among Aspects of one PCQ), from which combined Focus Dynamics *every moment* there is completed low nutation, depliative part of general Focus Dynamics of human «personality,» — that is a certain, compatible with each another in the given mode of exhibition, combination of Focus Dynamics of irkkulligrenic and usstukkulyar SVUULL-VVU-Entities, which f-Configurations are the most covarllert in relation to the development Direction that is peculiar in the given moment to realizational tendencies of Focus Dynamics of one of human «personalities» (simultaneously, in accordance to resonational degree, they can structure multitude of NUU-VVU-Form-Types).

3.0065. These doolls-quantum SVUULL-VVU-Entities are represented every moment in our Focus Dynamics through Form-Creators of multiple different-protoformal Self-Consciousnesses Forms, which qualitative signs are able to reflect very well our every moment realizational Aspirations: Thoughts, Desires, Notions, intentions. These are they — rotationally changing each other by the principle of the highest covarllertness with each of our choice — who energy-informationally provide in the general Multipolarization of our Focus Dynamics each of the following «quantum shift,» i.e. *instantaneous* qualitative difference between our «previous» bio-psycho-mental state and some of the possible versions of «following» steps of our bio-psycho-mental process.

3.0066. The structure of energy-informational interconnections at the transition from the conditions of Focus Dynamics peculiar to Form-Creators of the highest Levels of 2–3-dimensional diapason into Focus Dynamics of Form-Creators of depliative Levels of 3–4-dimensional diapason changes due to the constant increasing in these interconnections of potentially possible for them degree of covarllertness, and this means that energy-informational volume of each of the following set of f-Configurations of doolls Entities structuring each NUU-VVU-Stereo-Type, in Focus Dynamics of a «person» also constantly increases, universalizes. When f-Configurations of doolls Self-Consciousnesses Forms are gathered in more covarllert combinations, then — at achieving via their Focus Dynamics certain energy-informational parameters — they get real opportunity to be materialized *partially* in irkkull-diapason as our psychically and visually perceived «personalities.»

3.0067. I have underlined here the word «partially» not because the biology of less developed people differs somehow from the organization of biosystem of more developed representatives of humanity (though, it also «exists»: Nervous and other systems of the latter possess by many functions more qualitative — high-vibrational — characteristics). Additionally, the matter is that Focus Dynamics of doolls SVUULL-VVU-Entities compose only the part of our Focus Dynamics that is structured by low-nutation, depliative (*irkkulligrenic* — from 2.5 to 3.0 dimension) Levels of human activity. The rest part of human Focus Dynamics of the contemporary humanity is composed by Form-Creators of middle-nutation (*usstukkulyar* — from 3.0 to 3.5 dimension) and high-nutation (*akhsuvvrollent* — from 3.5 to 4.0 dimension) Level of exhibition. Who are they — Form-Creators of these Levels? these are more qualitatively grouped (by the signs of the highest covarllertness or geyliturgentness) duvuyllertr combinations of f-Configurations of «previous» irkkulligrenic Self-Consciousnesses

Forms, which — due to the increase in qualitiveness of interconnections structuring them — have already transmuted from doolls modes of exuberation into quantum, and now, they are considered by us as the basis for realization of SFUURMM-Forms of middle- and high-nutation *wave* Levels of Self-Consciousness.

3.0068. Summing up we can say that Stereo-Types of human «personalities» of the irkkulligrenic diapason — consequently synthesized by Form-Creators of the given Synthesis Scheme into more covallert f-Configurations — are transmuted some time into NUU-VVU-Stereo-Types of the usstukkulyar diapason, which (NUU-VVU-Stereo-Types), in their turn, continue to be synthesized into even more stable (compatible) NUU-VVU-Configurations — to provide possibilities for manifestation of Focus Dynamics of our Self-Consciousnesses Forms in the akhsuvvrollent diapason of exuberation. The mode of exuberation provides our NUU-VVU-Forms in presently focused by us STCs group with wider spectrum of their spatial visualization (from 2.5 to 3.75 dimension). Therefore, in the organization of our Focus Dynamics interchangeably participate both less covallert with each other focal combinations of irkkulligrenic Form-Creators and Stereo-Types of more synthesized Levels (usstukkulyar and akhsuvvrollent).

3.0069. In other words, functions peculiar to doolls Entities in providing Focus Dynamics of people (and also all the rest Proto-Forms of 3–4 dimensional diapason) with svilgs-spherational processes of *intra-Qualitative* Synthesis are carried out by them only on the irkkulligrenic Levels, which belong to the sphere of low-qualitative realizations (both psychic and physical) of people, in the result of which in our Focus Dynamics there are manifested already more qualitative (more covallert) from f-Configurations of subjectively «previous» (towards our FD!) doollses, which have consequently transmuted into our «present» wave — usstukkulyar and akhsuvvrollentnye — NUU-VVU-Self-Consciousnesses Forms. Thus, through our Focus Dynamics as well as trough FDs of other wave Proto-Forms, there is svilgs-spherational combination of all the multitude of doolls Entities into more stable (covallert-stable) combinations of f-Configurations of our quantum NUU-VVU-Forms, which correspond to each other more by certain *intra-Qualitative* signs initially structuring our Scheme of *inter-Qualitative* Synthesis.

3.0070. Focal SVUULL-VVU-Configurations are much more «massive» than wave ones, just not by the degree of their informational density, but by the degree of inertia of structuring them focal-ethereal interconnections (i.e. by the degree of their dissonationness/imperseptness to each other) which, in fact, determines the fact of their exuberation in the conditions of exactly doolls and not wave mode of Existence. When via our inter-Qualitative 3–4 dimensional Focus Dynamics we start to kleks and to organize more covallert out of participating in TEC-unpacking doolls f-Configurations into more ampliative LUUD-VVU-conglomerates, in our FD there get exactly those from them, which in the given direction of our thinking and feeling express higher degree of adaptability and activity.

3.0071. Thus, every moment we carry out Synthesis of 300–500 doolls Self-Consciousnesses Forms instantly «projecting» summarized f-Configuration of their most covallert interconnections into f-Configuration of our one Stereo-Type, i.e. in the act of one moment of exuberation of our wave NUU-VVU-Form, which reflects «our» subjective Conceptions about «our personalities.» They are not just capable to be manifested in conglomerates for longer period in the given mode of physical Space-Time. I repeat: In our Focus Dynamics conglomerates of SVUULL-VVU-Entities there are only low-nutation tendencies of our Creative Activity (inertial physical activity, rough nearly physically felt psychical reactions: anger, aggression, jealousy, revenge, envy, and so on), while on middle- and

high- nutation (for the given dimension type) Levels — due to the increase of quantity of covallert interconnections — they are transmuted consequently into FDs of Form-Creators of quantum (mixtum or dimidiomittense) Self-Consciousnesses Forms.

3.0072. In other words, *each moment* we operatr in our FD with the quantity of 300–500 doolls f-Configurations just as the main basis of our Experience, as different-protoformal potential of diffuzgent interconnections actually available to our Perception system, which provides our *biological* (mixtum) existence on the primitive Levels of personal Self-Consciousness (mainly of collective Unconsciousness): physiological survival, physiological interactions, and instinctive psychical reactions. Let me remind that with the increasing of covallertness degree in used by us interconnections, the quantity (informational potential of FD) of doolls f-Configurations decreases, and they get transformed from the SVUULL-VVU-category into the category of LUUD-VVU-Entities and thus — *subjectively only for us!* — seem to transfer from the structure of doolls Entities into the structure of wave Self-Consciousnesses Forms. Moreover, in every quantum shift these can be completely different Self-Consciousnesses Forms of doolls SVUULL-VVU-Entities, which f-Configurations (with characteristic for them properties, signs, and creative needs) initiate, organize, and consolidate resonationally Focus Dynamics of Form-Creators of our «personalities» for a particular, peculiar to us in the given moment, type of realization.

3.0073. Out of all the endless multitude of doolls Self-Consciousnesses Forms together with Form-Creators of our NUU-VVU-Forms, duvuyllerrtly structuring our skrruullerrt system, by our Focus Dynamics (Desires, Feelings, and Notions experienced in every moment) we choose resonationally only those parts of our slloogrent f-Configuration which — from all multipolarizational possibilities — provide realization in the Direction necessary specifically to us. If there is an activation of some ampliative, high-nutation SFUURMM-Forms in our Focus Dynamics, we should understand that Focus Dynamics of doolls Self-Consciousnesses Forms are actually absent. What has happened to them? Have they disappeared from f-Configuration of our NUU-VVU-Form? No, they have not, their f-Configurations still continue structuring Self-Consciousness Form of our «personality,» but they interact with each other already via more covallert interconnections. Now, they have become *qualitatively different, i.e. have transmuted, after undergoing Synthesis based on multiple doolls f-Configurations into the combinations of Form-Creators of the highest qualitative Levels of Self-Consciousness!*

3.0074. Due to what did that transmutation happen? Due to the fact that from long wave component of diapason of exhibition of previous doolls Self-Consciousnesses Forms we attract resonationally into our Focus Dynamics, firstly, more depliative groups of duvuyllerrt Stereo-Types (SVUULL-VVU-conglomerates), and then, when they more or less adopt to the most qualitative from available to us Conceptions, we start to synthesize sequentially the *most covallert with our Synthesis Scheme* part of peculiar to us interconnections — first in middle frequencies and then on high-frequency Levels of our Focus Dynamics.

3.0075. We not only bring into our FD peculiar to them interconnections, Information, signs, — we take their Experience of Existence, which is already intra-Qualitatively synthesized into their f-Configurations by each characteristic for them type of protoformal manifestations. That Experience is very multilateral — it belongs to «animal» as well as «plant» and «mineral» — *in our subjective Notion!* — types of manifestation of doolls Self-Consciousnesses Forms. We project these, already to some degree covallert between each other, interconnections into specifics of our Synthesis Scheme

and consequently bring them into more covallert state, but (!) — only in relation to our *human* birvulyarity type, which is diffuzgently structured by the multitude of interconnections of near-lluuvvumic development Directions.

3.0076. Thus, doolls Self-Consciousnesses Forms, duvuylerrtly and consequently, due to our Focus Dynamics gain on higher Levels of exhiberation the property of liyllusceeveness among each other, becoming already integral parts (Stereo-Types) of all the multiplicity of quantum Self-Consciousnesses Forms and organized by them wave types of subjective IRKKULL-Realities (2.5–3.0 dimension), in which energy-informational basis there embedded the tendency of different Self-Consciousnesses Forms to survive exactly in physical (psychical, biological, mineral) conditions of exhiberation. That tendency is provided by Form-Creators of bordering — *dlugllemm* — resopasons of doolls-wave Levels of 2.75–3.25 dimension.

Chapter 3. The Principles of exhiberation of different-Qualitative SFUURMM-Forms in 3–4-dimensional Worlds' Form-systems

3.0077. All the 3–4-dimensional Self-Consciousnesses Forms, including us, are simultaneously manifested in all the endless multitude of quantum Worlds' Form-systems, in the basis of which Focus Dynamics there lie energy-informational synthetic interactions amidst different-Qualitative Form-Creators (i.e. Form-Creators, which are the carriers of signs — of *Info-Creators* — of different OO-UU-Entities). However, in these wave Form-systems, actually, there are not manifested (not materialized, visualized in our Perception systems) both the lowest-nutation and highest-nutation SFUURMM-Forms. Because specific SFAAYYFF- and SSFU-UNGSS-factors, characteristic both for doolls and flaks Existence modes, in Focus Dynamics of Form-Creators of our quantum Self-Consciousnesses Forms — in the first case are already, and in the second case *yet* — manifested very weakly.

3.0078. In more primitive (more depliative, low-nutation) types of human subjective Realities, the quantity of Self-Consciousnesses Forms of doolls Level structuring every moment of Focus Dynamics of undeveloped human «personalities,» turns out to be less than present-day conditional average index (386 SVUULL-VVU-Entities in every NUU-VVU-Stereo-Type), because their f-Configurations are formed by yet very unstable *impersept* (sub-Aspect) different-protoformal interconnections, which does not let FDs of such quantity of different-Qualitative SVUULL-VVU-Forms to stabilize more or less in a FD of one doolls conglomerate (f-Configurations of one NUU-VVU-Stereo-Type) by the multitude of similar for them signs. In other words, FFLUARRS-Factor and skrruullerrtness index have opposite tendencies. That question is much more complicated, than it may seem to you: On the one hand, it was said that with the increase of ampliativeness of a FD of a «person» the number of NUU-VVU-Stereo-Types, synthesized in one TEC-unpacking, decreases; on the other hand, it is said that the more depliative FD is, the less quality of doolls «personalities» it is structured with. Let us try to solve that question one more time.

3.0079. The principle of changing qualitiveness of Focus Dynamics of a «person» depending on the quantity of rotational Shifts, carried out in its f-Configuration per unit time, says: the less the number of Stereo-Types that structure FD is, the higher its qualitiveness is. In the same time

the principle of qualitiveness formation of one Stereo-Type says: the higher the number of doolls Self-Consciousnesses Forms that structure it is, the higher its qualitiveness is (possibilities appear for «joining» multitude of geyliturgent interconnections, in the result of which the number of f-Configurations seems to decrease while their qualitiveness increases). More depliative types of Focus Dynamics of people are based on the Experience of *higher number* of NUU-VVU-Stereo-Types, each of which is structured by the *less quantity of more impersept* (in relation to two-invaderental lluuvvumic Synthesis Scheme) doolls Self-Consciousnesses Forms. It is caused by the fact that Focus Dynamics of Form-Creators of any SVUULL-VVU-Form of 2–3-dimensional — octahedral — types of subjective Realities are based on *intra-Qualitative* Synthesis, while 3–4-dimensional — hexahedral — types of subjective Realities are structured through the realization in Focus Dynamics of all possible Self-Consciousnesses Forms of the processes of *inter-Qualitative* Synthesis.

3.0080. It means that inside typical Aspects of one OO-UU-Entity among FDs of Form-Creators representing It in our Worlds' Form-systems, the high degree of covarllertness is already reached (i.e. The realization of actual for the given moment Interest has been carried out), and therefore, their Creative Activity towards each other *weakens* while *increasing* towards Aspects of other OO-UU-Entities. Due to the fact that on depliative Levels of 3–4-dimensional exhiberation of Self-Consciousnesses Forms the quantity of *inter-Qualitative covarllert* interconnections is still very limited, for Focus Dynamics of Form-Creators representing different OO-UU-Entities an increased imperseptness is typical (which means inertionness). Even though our «current» NUU-VVU-Forms are really (physically) exhiberated in the conditions of 3–4-dimensional diapason, Focus Dynamics of overwhelming majority of living people (by qualitiveness of SFUURMM-Forms used by them in psychical realizations) are still actively and steadily manifested in the conditions of IRKKULL-Levels of the doolls diapason (2.5–3.0 dimension). Therefore, their life creativity is mainly concentrated on the processes of structuring of doolls (depliative, different-protoformal) part of our «current» human s-Reality.

3.0081. Therefore I *subjectively* indicated the type of subjective Reality which we jointly model by our — yet very limited — Notions about ourselves and the surrounding us reality, as IRKKULL-Reality. Of course, qualitative parameters of Focus Dynamics of Form-Creators of our «current» NUU-VVU-Forms are not limited only by irkkulligrenic sub-overtone (2.5–3.0 dimension), but manifest through the humankind Collective Consciousness in much wider range — from 2.5 to 4.5 dimension. What does it tell us about? That together with real physical (*corporal*, dense material) exhiberation of our mixtum Self-Consciousnesses Forms, which is carried out in different dimensional groups of STCs of 3–4-dimensional diapason, the majority of people, meanwhile, continue quite actively and steady to fixate by their depliative Notions and still peculiar to them destructive psychical reactions in doolls-wave modes of exhiberation (from 2.5 to 3.25 dimension). While the most progressive part of Collective Consciousness of humankind via its Focus Dynamics concurrently develops and activates interconnections of more ampliative parts of slloogrent f-Configurations of our NUU-VVU-Form-Types (from 3.25 to 4.0 dimension). Since we all through some, common for us, Levels continue to be closely interconnected with each other, jointly formed by us s-Reality possesses exactly such (somewhat «bloated» by the degree of its qualitiveness) diapason of physical exhiberation — from 2.5 till 4.0 dimension.

3.0082. Our type of subjective IRKKULL-Reality is perceived as «physical reality» due to the presence in it of that concentrated Experience and those synthesized VVU-Information, which «project» *every moment* in Focus Dynamics of each person about 300–500 doolls «personalities»:

less developed people in their life creativity use the Experience of 300–350 SVUULL-VVU-Entities, and more developed — integrated Experience of 300–500 covarllert relative to each other doolls Self-Consciousnesses Forms. Quantized (VVU-kleksed) by certain Scheme of inter-Qualitative Synthesis, doolls Self-Consciousnesses Forms provide only corporal (mixtum) manifestation, while higher potential and spiritual inclinations of any wave «personality» depends on the availability in its Focus Dynamics of stable interconnections with expiative causal UYKKUYYUKSTR- (till 3.0 dimension), OSTROKKOLF- (till 3.5 dimension) and UPDUKHVASSL-Creators (till 4.0 dimension), which function as observative Curators over FD of all lluuuvvumic Form-Creators of the given diapason of exhiberation.

3.0083. In other words, Form-Creators of our «current» mixtum NUU-VVU-Form-Types for organization of their general Focus Dynamics use Energy-Information of not only stable wave diapason, but also f-Configurations peculiar to Form-Creators of different doolls and flaks (relative to our Synthesis Scheme!) modes of exhiberation. Here I would like to remind you that we subjectively attribute to *unusual* for us types of «materialization» of Self-Consciousnesses Forms not only Focus Dynamics where the dominance of Form-Creators of the PCQ pair that determines our Synthesis Scheme (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence), but also extreme (abnormal) for possibilities of *our* usual Perception systems (and equipment developed by us) modes of exhiberation structured by qualitatively different than our protoformal Focus Dynamics, which is interpreted by us as radio- (long wave, doolls) or x-ray (short wave, flaks) diapasons. Therefore, we can mistakenly suggest that if we are not capable to perceive such modes that Self-Consciousnesses Forms with such characteristics in the surrounding us World do not exist at all. of course that is entirely not true: we make our choices by means of SFUURMM-Forms, which integral Elements (Thoughts and Feelings, emanations and psychonations) in different degree peculiar to either one or the other diapason of exhiberation (depliative choices — in long wave, ampliative — in short wave).

3.0084. Here we can instantly answer the question whether used by us structure of duvuyllerrt rotationness of Stereo-Types is peculiar to Focus Dynamics of other Proto-Forms: of course, it is peculiar. Actually, it is we — subjectively for ourselves! — who determined the given type of diffuzgent energy-informational interconnections between different-Qualitative Form-Creators as a certain Stereo-Typeness (with the purpose to gain possibilities to more specifically imagine these inertial processes and analyze, logically manipulate their integral Elements), in fact that process is characteristic for Focus Dynamics of all Form-Creators . Each moment qualitative Content of subjective Interest representing in the given specific moment energy-informational Essence of our Focus Dynamics, is simultaneously modeled and «unpacked» by the corresponding Form-Creators from that Experience (either empirical, or intuitive), which, *on the one hand*, already structures subterransive ODS of the given «personality,» and, *on the other hand* — reflects qualitative state of some resonational zone of those Creativity Spheres of ODS which SFUURMM-Forms are generally accepted for the given Worlds' Form-system (as a component of one of the existing development scenario of our Stereo-Form). Subterransively projecting in Space-Time vibrations of our every moment Interest, we simultaneously model in our Self-Consciousness certain subjective Form-image of resonational manifestation of our Focus Dynamics which we immediately use for our «current» realization that is for inertial formation of surrounding us s-Reality and all the specificity of «own» personalistic World.

3.0085. Depending on the degree of qualitiveness of psychical reactions and thinking, our every moment Focus Dynamics is not limited by energy-informational content of f-Configurations of 300 — 500 «personalities» of doolls mode of exhiberation — this is *minimal*, generally typical of the

people of the given subjective IRKKULL-Reality, energy-informational basis, starting from which there begins to realize Focus Dynamics of our wave NUU-VVU-Form-Types for the formation of subjective Realities in the given groups of STCs. When an essential need in low nutation interconnections become irrelevant and we are able to structure our choices by synthesized on their basis ampliative SFUURMM-Forms (which we cannot already call doolls, because they structure wave diapason), it will be already different subjective Realities with different properties and realizational possibilities, manifesting in which, we will be able to focus in more perfect mixtum and dimidiomittense analogs of NUU-VVU-Form-Types and gain new physiological peculiarities, and also creative abilities.

3.0086. For example, in the near future the number of known for today amino acids will increase up to 30, 40 or even 60 due to the consistent ampliatization — by Form-Creators and bio-Creators of our NUU-VVU-Form-Types — of Scheme of two-invaderental Synthesis in the midst of qualitative restructuring of SFUURMM-Forms of our Focus Dynamics. A major role in the process of determination and activation of the goal of FD of the humankind Collective Consciousness into lluuvvumic Direction should be played by IISSIIDIOLOGY. Due to renitive assimilation of that Knowledge, people of the «future» will be able to more intensively and effectively operate with much bigger, than «now,» volumes of more complex Information which amplificationally will affect not only human appearance (the brain will become bigger, part of the systems and organs will modify and change their «present» functions to more universal), but also its abilities (there will appear abilities to teleportation, telepathy, telekinesis, clairvoyance, clairaudience, levitation and so on). All these qualitative changes is the natural result of increasing of the «number» of covarllert interconnections (relative to lluuvvumic Synthesis Scheme) in Configurations of SFUURMM-Forms which «future» us will begin to actively use in our life creativity.

3.0087. Most people have negative Form-images of all possible phobias, difficult psycho-mental conditions and everything that might become the reason of depression, on the basis of available (in subterransive ODS) Experience, which fully depends on the degree of intra-Qualitative Synthesis carried out by doolls Form-Creators in each of two lluuvvumic Dominants. Let me remind you that wave Self-Consciousnesses Forms differ from doolls in the following — in their Focus Dynamics there start to appear SFUURMM-Forms with evident signs of already carried out *inter-Qualitative* Synthesis of the most covarllert — for the given conditions of exhiberation! — interconnections (on the background of yet uncompleted intra-Qualitative interconnections): the higher is the degree of inter-Qualitative Synthesis of two Dominants the more qualitative Experience structures subterransive ODS of the given «personality» and the more stable is the manifestation of the given Self-Consciousness Form in the quantum Existence mode.

3.0088. Depressions is the result of active «projection» into wave Focus Dynamics of intra-Qualitative undersynthesized signs of doolls Existence modes. In depressive states «personality» psycho-mentally seems to «fall out» with its FD for a long period of time into doolls svilgs-spherational processes consistently synthesizing those from covarllert signs which are necessary for Form-Creators to complete intra-Qualitative transformations into some low nutation resopasons of exhiberation of FD and to get opportunity to start caring out inter-Qualitative Synthesis in more ampliative resopasons. Focus Dynamics of most representatives of Collective Consciousness of «present» humanity is still very active in 2.5–3.25-dimensional diapason, therefore strong, prolonged states reflecting the process of consistent transition of FD of Form-Creators from intra-Qualitative tendencies to inter-Qualitative are typical of those «people» who continuously focus on depliative SFUURMM-Forms. The person in an altruistic and optimistic state actively realizing in intellectual

and spiritual self-development just does not know such states, because his or her Focus Dynamics is deprived of SFUURMM-Forms of low nutation Levels of Self-Consciousness (such as fear, hatred, rejection, the trait of being closed-off, jealousy, envy and similar).

3.0089. In slloogrent Focus Dynamics of Form-Creators of the given type of the humankind Collective Consciousness there still prevail SFUURMM-Forms of low-qualitative (i.e. undersynthesized by many Aspects of each PCQ) Experience which is the main reason of that increased psycho-mental imperseptness and even cruvursorrtness (moral, cultural, political, religious, national and so on), observed by us in the modern human society. Therefore f-Configurations of most people still continue to be structured by f-Configurations of only 386 (in average!) doolls «personalities.» However, those who are actively engaged in intellectual and spiritual self-development, continuously increase this indicator, and all possible signs of low nutation doolls Existence mode gradually vanish in the increased covarllertness of inter-Qualitative interconnections. Therefore in our more ampliative Self-Consciousnesses Forms the number of f-Configurations structuring each of our single-moment wave Stereo-Types, continuously increases. At refocusing into flaks modes of Existence, the number of Stereo-Types structuring f-Configuration of manifestation of each flaks «personality» will represent an integral of geyliturgent between each other f-Configurations of absolutely all mixtum and dimidiomittense Form-Types of the given the LLUU-VVU-Entity.

Chapter 4. Implementation of surrounding us subjective Reality is carried out through generations of Self-Consciousnesses Forms of elementary particles

3.0090. I have repeatedly mentioned that Focus Dynamics of each of us is simultaneously structured by not only SFUURMM-Forms of Form-Creators, but also by SFUURMM-Forms of bio-Creators of various mixtum systems programmed for harmonious performance of certain functions in organization of biological existence of any Form of Self-Consciousnesses (in the consideration of the properties of *non*-biological — *abiotic* — Existence Forms, analogs of bio-Creators are *boson* and *fermion* Fields-Consciousnesses, which form by their FD molecular Forms including mixtum).

3.0091. Here the question is possible: «Harmonious relative to what states?.» Let me answer: relative to specific two-invaderental Synthesis Scheme of the given mixtum Self-Consciousness Form. Therefore, let me emphasize once more: there is no principle difference between Form-Creators and bio-Creators — that very conditional and very subjective division is the result of discrete way of our perception of processes carried out in our Focus Dynamics. Some of them we consider principal and fundamental, and some — secondary, i.e. non-essential for eglleroliftive Process of our general amplificational development. Therefore — *exclusively for the conditions of given exhiberation mode!* — «projections» of Form-Creators on FD of Collective Consciousnesses of any cell structures we call bio-Creators (including here bio-Creators of basic brain centers and DNA itself), and more ampliative «projections» (dimidiomittense, including Creators-Curators of 2.5–4.0-dimensional diapason, and «plasmic» different-protoformal, or *transparentive*), which provide in the given diapason Focus Dynamics of any birvulyarity type — Form-Creators (in lluuuvvumic type that role is performed by *translucense* Form-Creators).

3.0092. Bio-Creators also have possibility to react in their own way to energy-informational Meaning (SFUURMM-Forms) of continuously produced by us Focus Dynamics, therefore we can say that this Meaning in the process of our life activity is simultaneously reflected both in psycho-mental and corporal (including biological) aspects of our continuous Existence. Thus, SFUURMM-Forms every moment modeled and realized by us (Thoughts and Feelings, Desired and affective Aspirations, which seem to be «projected» «outside» Self-Consciousness) constantly provoke corresponding reactions not only on the part of ourselves and mixtum Self-Consciousnesses Forms of the surrounding us subjective Reality, but also on the part of any other quantum carriers of Information — boson, fermion and molecular Self-Consciousnesses Forms, which we interpret as «elementary particle,» «atoms,» «molecules,» «physical objects.»

3.0093. Such universal synthetic interconnection between all SFUURMM-Forms simultaneously generated in different «points» of Space-Time by multiple different-Qualitative (in Synthesis Schemes) Proto-Forms, is revealed not only on psycho-mental Level of our conscious and unconscious Perception, but also through all possible in each particular case physical reactions (biochemical, neurophysiological, chemical, thermal), specifically structuring thus by its Energy and Information each objective aspect of surrounding us «materiality,» starting with the processes that determine the content of our dreams, hallucinogenic states, and finishing with any scientific experiments, and also observations of the behavior of cosmic scale objects.

3.0094. Telling examples of renitive interconnection between our psycho-mental activity and functionality of different objects of surrounding us reality are well demonstrated both through the internet in general and through the computer structure in particular. For example, every computer chip is structured by covarllert SFUURMM-Forms of its direct creators (programmers, engineers), which fully determine the mode of realization of electrical currents through the basic scheme of the given computer. Same we can say about the functional part of any gadget, device, material object and even (perhaps, — particularly!) about the realization and materialization of different SFUURMM-Forms in «interpersonal» relationships when our stable subjective Conceptions become, eventually, the reason of presence in our Life of various people, animals, objects and even certain situations and circumstances.

3.0095. Forexample,veryoftenthesurroundingusrealitystartsrealizingeitherthroughcircumstances which we have been persistently waiting (joy from emerged peace, success, luck, good health state and physical form, and also other different states), or through events that we were afraid of (disease, trauma, quarrel, war, pouring rain, flood, frost, drought, hurricane, volcanic eruption, earthquake and so on), which we detailed modeled, unconsciously «projecting» meanwhile in our Life possible consequences of such circumstances. Same concerns the nature of purposeful «materialization» (exhiberation) through our Focus Dynamics of such yet unique for people abilities as telepathy (transmission of SFUURMM-Forms at a distance from one person or group of people to the other person or group of people), clairvoyance (foreseeing future states of material events without conclusions on the basis of known facts), telekinesis (space manipulation with material objects with the help of purely mental effort).

3.0096. For example, the mechanisms of realization of such phenomena as psychokinesis is based on the ability of one person or a certain group of people (united by one general goal or Idea) to psychically stably and focused concentrate at a certain time on SFUURMM-Forms that similarly reflect the Meaning of some specific states of the observed (or detailed imagined) by them material

Form-system (from relative position of physical objects and to the characteristics of necessary for them development scenario). Given ability has opportunity to realize due to the principle identity of generated by us «nonmaterial» Thoughts and Feelings with «material» structures of the brain and objects of surrounding World.

3.0097. What does it mean? SFUURMM-Forms used by us as well as consistently formed (synthesized) by us with their help physical objects of our subjective Reality have the same common shared nature — wave. Conceptions about apparent duality of the surrounding World are formed only due to powerful limitations of our Perception systems — on more «subtle» Plane of 3–4-dimensional Existence of Macrocosmos, we in our Focus Dynamics deal only with wave type of resonational interactions between carriers of Energy and careers of corresponding to It Information (Form-Creators of Form-systems of Macrocosmos and Info-Creators of Self-Consciousness of SSS-Entity).

3.0098. Hence the possibility of exuberation in Space-Time of all possible distant effects peculiar to wave interactions (including various ways of collective realizations of Form-Creators of different Self-Consciousnesses Forms through photoreductive Ether — telepathy, telekinesis, clairvoyance and similar). However, here exists certain communicational difficulty: the same Information can be «unpacked» in absolutely different ways by Form-Creators of different Perception systems. It is very important to understand that, in fact, this phenomena (like any other) reflects only the main Principle of «materialization» in our subjective Perception system of any observed by us event — duvuyllerrt refocusing of «personality» or group of people in that part of slloogrent focal Configuration of Macrocosmos which in the most degree corresponds to the generated by them Aspirations and resonates with their «current» Notions about themselves and surrounding them reality.

3.0099. Thus, we can say that continuously projected by us SFUURMM-Forms represent countless energy-informational links of Macrocosmos which connect together catioleptic and anioleptic — *aspectable* (i.e. visible to us) and *invizusal* (invisible to us) — sides of uniform *subjective* Reality which we simultaneously form by our general Focus Dynamics, structured by endless multitude of different-Qualitative subterransive Notions typical of not only people of the given group of human STCs, but also of personalistic FD of all Proto-Forms of surrounding us (aspectably and invizusally!) in the types of subjective Realities formed by us.

3.0100. Self-Consciousness and so called «Matter» — that is only two sides of manifestation of single energy-informational basis of Macrocosmos. «Matter» with which we have to deal is the result of prolonged and stable impact on the structuring it Elements (Form-Creators of Self-Consciousnesses Forms of photons, elementary particles and atoms) of all the endless multitude of peculiar to us subjective Notions, both about «ourselves» and about other parts of surrounding us World. The more universal become Notions used by us the more manageable and flexible — for the influence of our Focus Dynamics! — becomes the material outline of formed by us subjective Reality.

3.0101. Focus Dynamics of Self-Consciousness of every «personality» — in subterransively-collective order interfering (intensifying or weakening), similar to laser unit, in peculiar to it Levels of exuberation wave combinations of own SFUURMM-Forms with narrowly specific Notions of surrounding it Self-Consciousnesses Forms — actively participates thus in specification, modification and consistent materialization of the general picture of «own» subjective Reality. The more ampliative, perfect and universal Focus Dynamics is, the more radical, active and intensive

Self-Consciousness Form (that generates it) can consciously and purposely influence the dynamic of changing the qualitiveness of both itself and Form-systems surrounding it, as it starts to intuitively and purposely use in that subterransive refocusing process more universal Laws and Principles, Which from higher Levels of Self-Consciousnesses organize all energy-informational «matrix» (feeling Meaning, Content) of «materiality» of the given type.

3.0102. The iissiidiological Knowledge lets its tireless followers radically and effectively get rid of outdated dogma, primitive Conceptions, old habits and of other results of powerful influence on Self-Consciousness of every «personality» of the processes of inertionness. It logically convince us that physic laws are not eternal dogmas and finial criteria of the Truth; they represent Universal Flow of energy-informational interconnection eternally changing under a stable influence of Focus Dynamics of our Self-Consciousness. Actively and consciously changing old Notions for new, more perfect and universal, we thereby automatically adjust to them not only our Focus Dynamics, but also «fundamental basis» and laws which as it seems to us manage not only our Existence but everything that surrounds us.

3.0103. In fact, we by our subjective and quite limited Notions about the Universe for many thousand years have been persistently «creating» («materialized» by our logic conclusions and subjective analyze) all these fundamental basis of our physical Existence, due to which they finally turned out to be so interconnected and «faultless» (i.e. accurately corresponding to our own Notions about them!). But, going through many generations, we have completely forgotten that all properties and characteristics of all physical laws depend in the first turn not on us, but on the qualitiveness of Focus Dynamics of our Self-Consciousnesses Forms: the more ampliative they are, the more universal and perfect become the laws of the surrounding us World, the more flexible and favorable for our life creativity become existing types of «materiality» under the influence of our Thoughts and Feelings. In other words no matter how strange and shocking this statement may seem to anybody, all physical laws completely and absolutely depend on the Level of Self-Consciousnesses of the most people: where we chose to be, in such circumstances we manifest. All Self-Consciousnesses Forms in spite of perceived differences — these are Entities without limitations objectively combined according to resonational Principle into the uniform Form-system in every mode of exhibition.

3.0104. With the help of IISSIIDIOLOGY you start to more renitively understand and clearly see that all the Laws and Principles are not somewhere outside, but «inside» of us, in slloogrent specificity of your synthesized through many Forms energy-informational content of Self-Consciousness, which consistently and inertially recreates all the details of surrounding you reality strictly according to your own inclinations, believes and aspirations. You yourself, as well as everything that surrounds you, continue to stay exactly as you are until in your Focus Dynamics the present Notions about «yourself» completely change into new, deeper and more perfect, more corresponding to SFUURMM-Forms of ampliative Levels of Self-Consciousnesses. Your specific Thoughts and Feelings are true basis of that type of «materiality» in which you are subterransively aware of yourself. Reality subjectively formed by you is not a single possible and stable, in every moment of your subterransive Perception it represents only constructive «projection» of most SFUURMM-Forms that model your Imagination.

3.0105. Fate — as a content of subterransive rotational Cycle of «personality» — is not «blind,» predestined, determined or imposed on us by «someone» outside, it actively realizes in our Life through peculiar to each of us subjective expectations, inclinations and preferences. Through continuously «unpacked» by us Levels of collective Subconsciousness we have opportunities not only to possess Notions about the potential moments of the awaiting events, but also to consciously chose it, in other words to control its qualitative Dynamics in the desired by us direction. In the process of subterransive TEC-unpackings many Notions about possible variants of our «future» resonationally «project» from Subconsciousness into our Focus Dynamics so that we either intuitively avoid them (in the absence of realizational Interest) or unconsciously refocused towards them in order to carry out some of our unconscious realizations or subconscious projects no matter how meaningless of occasional they may seem to us.

3.0106. It is we ourselves, and not someone else instead of us who chose those scenarios with either desired by us or undesired events. Each of «favorable» or «unfavorable» life circumstances — is always a possibility to radically — through FD-Multipolarization — increase the qualitiveness of focused by us NUU-VVU-Configuration. However, in most cases we, completely busy with more simple and primitive variants of creative realizations, are not aware of this potential in us (to carry out which we need to overcome in yourself something less qualitative) and continue to miss effective opportunities for own prompt self-improvement. Fate is not a synonym of inevitability, destiny or some strict predetermination, but only a small component of our potential «future,» which meaning is determined and constructively outlined only in a very general manner (due to our unstable Notions about it!) and is the subject of structural modification, constant improvement and all possible supplementary specification from the part of our Focus Dynamics.

3.0107. Our Thoughts and Feelings (emanations and psychonations) in Focus Dynamics — generated by us on resonational Principle — are transmuted into corresponding to them Desires (SFUURMM-Forms or karmonations — subjective Notions about things we want), which determine localization of Vector of our current (in the given moment) Interest in the specific variant of general Multipolarization of FD (subterransive scenario of development). Similar (geyliturgent) by certain signs SFUURMM-Forms are resonationally formed by Form-Creators into f-Configurations of Self-Consciousnesses Forms of elementary particles, which by even greater spectrum of peculiar to them characteristics combine into f-Configurations of atoms and molecules structuring f-Configurations of other more «large-scale» Self-Consciousnesses Forms — microorganisms, people, animals, plants, minerals and also all possible cosmic Entities.

3.0108. Any molecular or atom object in various ways manifests in Macrocosmos as a result of Synthesis of certain Thoughts and Feelings, which give energy-informational basis to all the multiple variants of certain Notions about how, when and by means of what all possible combinations of these Thoughts and Feelings can really manifest in wave mode. When their resonational Synthesis is carried out on the level of Self-Consciousnesses Forms of elementary particles, then there happen their exiberation as wave structures, — on the level of atoms, molecules and all the multitude of their different-Qualitative aggregate states (the whole combination of which we subjectively interpret as «surrounding» reality).

3.0109. As a matter of fact, the Level of Creative Activity of Form-Creators of Self-Consciousnesses Forms of elementary particles can be considered an initial (for the given diapason of dimension) wave matrix for the realization of any mental-feeling manifestations. We should not forget that f-Configuration of that matrix (in various modes of exuberation — in different degree!) is structured by not only middle speed photons, but also by higher doolls-Creators (2.75–3.25 dimension — doollses synthesize into *ernilgmanent* photons) and low FLAKS-Creators (3.75–4.25 dimension — *frazulert* photons synthesize into flakses).

3.0110. These are not f-Configurations themselves that combine between each other in the moment of Synthesis in any of 3–4-dimensional resopasons, but structuring them geyliturgent (i.e. similar by one or several diverse signs) wave interconnections. That one kleksing results in a huge multitude of different-Qualitative focal «projections» of its exuberations through various f-Configurations –elementary, atomic and molecular structures similar by their energy-informational Nature, which do not differ between each other by their Form in the general process of Multipolarization of Focus Dynamics, but are subjectively referred by us to different «personal» Interpretations, to different Self-Consciousnesses Forms. It happens because in other Self-Consciousnesses Forms one and the same kleksing (one quantum shift) serves the reason for the formation and exuberations of somewhat different (or absolutely different!) picture of just change interconnections.

3.0111. Diffuzgent groups of bio-Creators organizing the activity of organs and subsystem of organism which subterransive Synthesis Schemes are in more degree covarllert relative to our birvulyarity type, compose the main organs and main system of controlling our biological organism. In other words, they are closer to Form-Creators of human genome and realize in it through more universal functions of cerebral cortex and thalamus, hypothalamus and hypophysis, pineal gland and hippocampus. Diffuzgent groups of bio-Creators structuring our biological organism which Synthesis Schemes in more degree impersept towards lluuvvumic birvulyarity type, possess not so universal — though very important for vital activity of the body — functions characteristic not only for the human but also for the multiple types of animals.

3.0112. Functionality of our organism — as physical Form of realization of SFUURMM-Forms of our Self-Consciousness — on the deep Levels of energy-informational interconnections is determined by the activity of Form-Creators of different organs and systems, part of which is essentially important for us, while dysfunction and damage of other organs and systems do not result in losing Form. That circumstance very closely interconnected with characteristic processes of intra-Qualitative (by Each of Dominant) and inter-Qualitative Synthesis: first (sub-Aspect and inter-Aspect of one Quality) in less degree determine the dynamics of vitally important systems and organs, while the processes of inter-Qualitative Synthesis affects brain functions and central nervous system, serious disorder of which results in «post-mortem» refocusing. Any type of reaction of our biological organism (as well as psychical activity) is the result of the act of kleksing of Focus Dynamics with certain energy-informational interconnections: either covarllert relative to our Synthesis Scheme or impersept.

3.0113. Any received injury, trauma, disease — is the result of stable and continuous process of kleksing of Focus Dynamics of the given «personality» by the Notions impersept towards already synthesized interconnections of lluuvvumic pair of Dominants that is the consequence of increase of

tensoriness towards SFUURMM-Forms of lluuvvumic development Direction. The part of the body that received damage or a particular type of disease — all that is not an accident, it reflects the specifics of deviation of Focus Dynamics into certain protoformal development Direction. Because various bio-Creators of internal parts of body and systems are carriers of energy-informational interconnections, which either more synthesized by lluuvvumic type (create more favorable conditions for life and development of «personality») or represent some types of other, more protoformal realizations.

3.0114. Rotational Cycle (i.e. Cycle of certain rotational Shifts carried out in Focus Dynamics of «personality») is a certain combination of kleksings, which qualitatively and consistently «shifts» («reprojects») Focus Dynamics of «personality» into one of multiple possible development Directions, which structure general spectrum of Multipolarization. In the specificity of simultaneous «local» exuberations of Focus Dynamics of seemingly «one and the same personality» in different-Qualitative space-time conditions (groups of STCs), qualitative structure (subjective energy-informational content) of each rotational Cycle is objectively reflected through multiple development scenarios, connected into single logic unit by typical only of them cause-effect relations.

3.0115. Conditional «elements» that appear to join these interconnections into single and endless Whole («previous» part of rotational Cycle of the given Self-Consciousness Form through FD resonationally combines with FD of more ampliative variant of that Form which organizes «following» part of the given rotational Cycle) are certain states of Self-Consciousness modeled in the result of simultaneous performance of *acts of inter-Qualitative Synthesis by Form-Creators of two Dominants in the certain number of resopasons* (sufficient for providing — with «critical volume» of newly formed covallert interconnections — «reprojection» into new Self-Consciousness Form qualitatively considerably different from the previous one).

3.0116. These critical (for the «current» FD) states of «personality» we interpret as «post-mortem» refocusingings (inter-age and protoformal). Each of such refocusingings, which in every scenario is subjectively perceived by surrounding people as «Death of personality,» is always preceded by countless number of consequently carried out acts of *inter-protoformal* (svilgs-spherational) «shifts» through possible in the given conditions of exuberation scenarios of *invaderental and background* Synthesis (inter-sub-Aspect and inter-Aspect), which serve for Form-Creators of Dominants the main source for achieving by them the state of highest balance (geyliturgentness between typical of them combinations of signs) in some certain resopasons structuring the given diapason of «personality's» exuberation.

3.0117. In fact the carriers and organizers of all types of kleksings, carried by us through Focus Dynamics, are Form-Creators of Self-Consciousnesses Forms of elementary particles. Kleksings, carried out by us in the process of thinking, feeling and physical activity immediately in a certain way (through narrowly specific biochemical and neuron reactions), are reflected through Focus Dynamics of different Form-Creators of our organism, first of all, of course, through FD of Form-Creators of DNA, which control central nervous and endocrine system correcting Focus Dynamics of all bio-Creators via various ferments and hormones.

3.0118. Your deepest delusion is that you disassociate the mechanism of exuberation of your Thoughts, Feelings, and Desires from the most universal (for the given diapason of dimension) carriers

of diverse Energy-Information — Form-Creators of photons and elementary particles. As have been already mentioned in the previous volumes of «IISSIIDIOLOGY Fundamentals,» f-Configurations of Self-Consciousnesses Forms of photons, structuring the whole spectrum of wave exhibition in the given type of human s-Realities (UPDUYKK-Field-Consciousness of 3rd-4th-dimension), are formed, on the one hand, by Focus Dynamics of resonational by certain parameters (diffuzgent) different-protoformal Form-Creators which we subjectively refer to doolls diapason of dimension (DLUGLLEMM-Field-Consciousness of 2nd-3rd dimension), and on the other hand — by FD of different-protoformal flaks Form-Creators structuring more ampliative Levels of 4–5-dimensional diapason (FLAKGLAAYK-Field-Consciousness). On the basis of simultaneous realization of all possible variants of their different-Qualitative-diffuzgent focal interactions between each other, in the available for our Perception System diapason of Space-Time there is formed all the multitude of Self-Consciousnesses Forms of ernilgmanent (low speed), permanent (average, adequate) and frazulert (high speed) photons.

3.0119. That process can be schematically observed on the example of qualitative transgression of FD of flaks analogs of photons (*falkhats* and *malsons*, *klyarions* and *klastirons*, *bilurins* and *kruolons*, *duvrits* and *klivrits*, *iskons* and *tilumurs*), structuring «bordering» Spheres of creative interaction between FD of Form-Creators of FLAKGLAAYK- and UPDUYKK-Fields-Consciousnesses (Synthesis of ernilgmanent photons with light karmo-klofts can give the same obviousness). With the deepening of realization of their Focus Dynamics through svilgs-spherational activity of different-protoformal karmo-klofts of UPDUYKK-Fields-Consciousnesses, quanta of that Energy-Information begin to consistently to synthesize with each other according to most covarlert or geyliturgent signs: kleksing of frazulert photons with the participation of karmo-klofts creates increased tensoriness in jointly formed by them combinations of signs and through that «reprojects» their Focus Dynamics into rotational Shifts peculiar to FD of Form-Creators of Self-Consciousnesses Forms of elementary particles which in its turn stretches out, i.e. even more aggravates the process of increasing tensoriness between them and «reprojects» their FD into atom and molecular states of substances structuring all the surrounding «materiality.» Molecular states compose the basis of Focus Dynamics of bio-Creators of all living organisms and Form-Creators of all the rest material objects.

Chapter 5. Integration of rotational Cycles and formation of unified Worlds' Form-system

3.0120. Rotational Cycle of each photon is subterraneously formed from qualitatively multipolarized Focus Dynamics of consistent *apparent* «absorptions» (qualitative «reprojections») of its f-Configuration in one narrow resopason and equally consistent sequencing of «emanations» («reprojections») in other narrow resopasons of exhibition. Since our Perception systems simultaneously realize in a quite wide spectrum, taking into account colossal speeds of these «reprojections,» absolutely incommensurable with FD of bio-Creators of our bio systems, it turns out that we — in every «our» subjective moment — observe simultaneous manifestation in various resopasons of dimension of zillions of different-Qualitative variants of exhibition of FD of Form-Creators of slloogrent Self-Consciousness Form of *one and the same* photon!

3.0121. As a matter of fact that explains the effect of «quantum teleportation» or «quantum entanglement,» known in physics and until now not explained by scientists, at which the change in quantum state of one or two photons, located at any distance from each other, is immediately reflected on the state of other photons. It happens because we observe the illusion of existence of not one, but two (or rather, as it seems to us, multiple different!) photons, which focal Configurations in reality represent intermediate states of consistent qualitative change of Focus Dynamics of one and the same photon's «personality» (Self-Consciousness Form) in the general structure of its subterraneous rotational Cycle, which our Perception system has differentiated into multiple apparent discrete parts.

3.0122. Due to colossal inertioness of Focus Dynamics of our bio-Creators we have possibility to simultaneously observe both «past» and «present,» and even «future» states of multipolarizational transformation of its Focus Dynamics in the multitude of different-Qualitative resopasons of surrounding us reality. In other words between these *seemingly separate* (for detached Observer!) parts there exists stable cause-effect concatenation (chain of interconnections) which creates in the Perception of that Observer the possibility of manifestation of «teleportation» effect. Thus, we can say that in general the given effect is caused by the presence of objective difference in the degree of development of Perception system of two or more Self-Consciousnesses Forms due to existing significant differences in parameters of rotational Cycles peculiar to them.

3.0123. With every further «reprojecting» (under the influence of karmo-klofts) into new Self-Consciousness Form, qualitative parameters of different «parts» of f-Configuration of Form-Creators of high speed photons change in a different way, meanwhile not only getting lower (at refocusing into f-Configurations of elementary particles of UPDUYKK-Field), but also getting higher to FLAKS-Forms on the border of unstable flaks-wave energy-informational interactions between «bordering» Focus Dynamics of UPDUYKK-Field and FLAKGLAAYK-Field (4–5 dimension). Here, I think, I should underline one more time that used by us, people, subjective signs of some «decreasing» or «increasing» in qualitiveness of f-Configurations of Form-Creators of any Self-Consciousnesses Forms (including photons) represent *very-very conditional* comparison criteria, since we can subjectively estimate something and compare only relative to the qualitiveness of SFUURMM-Forms of our «own» s-Reality, which are formed by us on the basis of specific *dimensional* characteristics of those space-time conditions where we consciously manifest.

3.0124. «Mergence» of photon by Focus Dynamics of karmo-klofts of any from protoformal s-Realities, which — in parallel with our «human» s-Realities — structure FD of Form-Creators of UPDUYKK-Field, can be interpret by us as «decreasing» in qualitiveness of its further emanation, but in reality it can turn out to be its increasing (relative to narrowly specific parameters of dimension of *our* type) from the state of relative ernilgmentness into the state of relative frazulertness. And vice versa, apparent to us «increasing» in parameters of Focus Dynamics of photons cannot imply what we personally observe, but, realized through FD of other Proto-Form, represent (relative to criteria of qualitiveness of our s-Reality) certain «decreasing» of previous energy-informational indicators. Therefor I repeat: there is absolutely no and there cannot by any unambiguity and certainty (as well as in general signs of objectiveness perceived by us!) in subjective estimation of observed by us changes in FD of objects of surrounding us reality. How can we judge about what we do not know and what is not available for detailed exploration, experiencing and comparison?

3.0125. Absolutely all the multitude of rotational Shifts simultaneously carried out in the whole organism by different-Qualitative Form-Creators of elementary particles — due to resonational interaction between each other through Focus Dynamics of Form-Creators of atomic, molecular and cell structures — automatically converges and conglomerates by various types of physical and chemical processes, thus forming a certain «potential of activity» (or nerve impulse spreading through membrane of nerve fibre with a particular frequency), — a certain state of energy-informational supply, which is subterraneously typical of any biological organism.

3.0126. So, for example, the frequency of nerve impulses, transgressed in our organism through various fibre, composes in average 50–500 impulses per second (though fibers of auditory nerve might transmit up to 1000 impulses per second, and some cells are able to discharge with the frequency up to 1500 impulses per second). In general, the average frequency of nerve impulses of human organism, depending on the qualitiveness of FD of «personality» and the influence power of external stimuli on it, equals 250–400 impulses per second (the higher is tensoriness of FD, the more frequently nerve impulses origin, because Information concentration in them are less). It is also necessary to note that nerve impulses discharge not by one, but in conglomerates, i.e. in whole packages (like duvuyllerrt Stereo-Types) between which there are no any abrupt intervals. Therefore apparent for us «division» into impulses is conditional because different brain bio-Creators «unpack» coming Information entirely selectively, i.e. resonationally relative to structuring it UU-VVU-Conglomerates, focusing only on the corresponding to their functions «parts» of slloogrent «packages» of each impulse.

3.0127. Thereat the universalism and effectiveness of Focus Dynamics of Form-Creators of photons structuring observed by us s-Reality type continuously qualitatively changes. However, we cannot estimate such changes even subjectively due to the absence of more detailed Information and Conceptions about the «previous» stage (history) of exuberation of those Self-Consciousnesses Forms both outside the conditions of wave diapason (in doolls-flaks mode) and outside the specificity of interconnections typical of human s-Realities. For example, relative to FD of photon Form-Creators of some other protoformal s-Realities (of wave diapason as well) these changes can be characterized as «increase» in qualitiveness, and relative to FD of photon Form-Creators of other protoformal types — as qualitative «decreasing.»

3.0128. What is more, in both cases the Principle of conserving stable Eglleroliftivness of Focus Dynamics is not broken in any way: in any performed refocusing there always takes place only engagement in Focus Dynamics and accumulation of more and more covarllert energy-informational interconnections between different-Qualitative Form-Creators, which at subjective comparison of that process with available for us signs of different Synthesis Schemes — can be perceived by us either as more intensive or less intensive. In other words, apparent for us «decreasing» of qualitiveness of FD in reality is only a compulsory condition, a certain intermediate stage for further increasing of qualitiveness relative to own «previous» and «current» states.

3.0129. Besides, at similar comparison and analyze of observed by us Focus Dynamics of different-Qualitative Form-Creators, we rely on very limited set of available for our perception signs, which we, again, can interpret only according to SFUURMM-Forms typical of our own Synthesis Scheme: speed and acceleration, relative density, pressure and temperature of the substance; mass, impulse, energy,

spin, frequency, wave length and parity of photon or elementary particle. Regarding the question which exactly qualitative transformations happen at every change of observed by us parameters in FD of Form-Creators of Self-Consciousness of observed by us Form, it still remains unavailable neither for our Perception nor for created by us most accurate measuring device. I do not already mention that 100% of scientists will laugh at proposed by me conception that every elementary particle has a specific analog of Self-Consciousness, which lets me yet very axiomatically state: fermions differ.

3.0130. As I have already underlined, we are (as well as all the rest creatures) think via quanta, i.e. consistently and subjectively quantize (kleks) the surrounding us subjective Reality with our Thoughts, Feelings and Desires. However, bio-Creators of our mixtum NUU-VVU-Form-Types respond to these changes with certain corporal reactions, which due to peculiar to them inertionness very strongly deform informational Essence coding each of our psychical realization by narrowly specific SFUURMM-Forms.

3.0131. Focus Dynamics and subjective Realities of different Self-Consciousnesses Forms are structured by different types of diffuzgent (potentially penetrating each other) interconnections. Each of these types is formed not only by subterransive Synthesis Scheme, but peculiar only to it frequency of rotational Shifts. Via quantizing of «own» subjective Reality together with all the rest people and Proto-Forms, we each moment seem to «penetrate» with full-fledged f-Configuration of one of our multipolarized Stereo-Types into that general Focus Dynamics (and in reality just consistently «reproject» by our FD in already «initially» formed «construction» — towards realization of Interest most acute for us at the given moment), via its kleksing with a Notion peculiar to us.

3.0132. Simultaneously into the same Worlds' Form-system there also «penetrate» (refocus) via their Stereo-Types all the rest Proto-Forms of surrounding us reality: people and animals, plants and minerals, — each by own, peculiar to it in the given moment, interconnections. Zillions (10^{6xn}) of different-Qualitative and differently synthesized between each other interconnections typical of all these Stereo-Types, need in a corresponding way to enter multilateral covallert relations in order to form one conditional moment of FD of the given Planetary Entity. Taking into consideration that Vectors of all FD are summed thereat, the formed integral represents that dissonational distance which is necessary for annihilation of all tensors of general Focus Dynamics — that parameter will be qualitative expression of subjective duration of one conditional «moment» of FD of Planetary Entity manifested in the given narrow diapason. Thus via general Focus Dynamics of all Self-Consciousnesses Forms, simultaneously manifested *in the given conditional moment*, there has been formed Planetary part of the *given* Worlds' Form-system, which with its subterransive Focus Dynamics (together with FD of other Planetary Entities) «penetrates» Stellar and Galactic parts of the *given* Worlds' Form-system, and so on.

3.0133. Those zillions of informational interconnections which are potentially represented in the given moment in the whole spectrum of Multipolarization of our Focus Dynamics (through quantum potential of photon Form-Creators) by Form-Creators and bio-Creators of our «current» Self-Consciousness Form instantaneously have been «reduced» and narrowed to the level of real possibilities of our Perception system. In other words, in the given moment we have been able to subjectively «unpack» only one zillion part of surrounding us Energy-Information! All the dissipative

Energy-Information «unpacked» in parallel in the given quantum shift by all the rest «personal» Interpretations of our Stereo-Form, remained not available for us, — only one zillion part of our potential abilities (in the form of signs distinguished by us in any way) has been transformed into decoherent Energy of our «personal» Focus Dynamics. All the rest appear not to exist for us.

3.0134. Each of our other «personal» Interpretations «unpacks» its one zillionth part of slloogrent Energy-Information in the same way, but does it according to some other signs, most interesting *specifically to it* in the given moment. With the increase in qualitiveness of chosen by us Interests, Perception system of our Self-Consciousness Form gradually becomes more universal letting us «project» our «current» Focus Dynamics into even more and more harmonious «parts» of slloogrent f-Configuration of our Stereo-Form. That means that due to the increase of covarllertness in Focus Dynamics there converge multiple dissonational distances and we — personally consistently — refocus into more favorable scenarios and STCs, which structure Collective Consciousness of our civilization. Inertional dynamics in that Direction is carried out much faster in those cases when «postmortem» refocusing as a result of Synthesis in ampliative resopasons are carried out in our Existence much more rarely than our «Deaths» as a result of Synthesis in depliative Levels of Self-Consciousness.

3.0135. Why are «postmortem» refocusing carried out less often in case of more ampliative FD than of depliative? Because every system or organ of mixtum analogs of roughly synthesized NUU-VVU-Form-Types are structured by FD of bio-Creators of various narrowly specific sets of diffuzgent relative each other Proto-Forms. When another act of inter-Qualitative Synthesis is carried out in some resopason of local exhiberation of general FD of bio-Creators, newly formed thereat signs combination starts showing — relative to FD of a certain group of bio-Creators responsible for functioning of certain organ or system, strong traces of incompatibility and other cruvursorrt tendencies, thus provoking in biological organism reaction incompatible with possibilities of further continue life activity of Form-Creators through FD of the given NUU-VVU-Form-Type.

3.0136. The higher is the degree of ampliativeness of NUU-VVU-Configuration, the more is the quantity of different-protoformal interconnections between different-Qualitative bio-Creators that provide functioning of each biological system or organ (especially in dimidiomittense analogs of NUU-VVU-Form-Types). In other words, detachment between FD of bio-Creators of different organs and systems considerably decreases while the degree of universalization in the Mechanism of general controlling organism functioning increases. Therefore not every act of inter-Qualitative Synthesis in some narrowly specific resopason of exhiberation of general FD leads to origination of the state of qualitative incompatibility between it (FD) and focused in that moment f-Configuration. For the formation of such situation, in SFUURMM-Forms structuring FD of «personality» there should happen really radical amplificational perturbations, which are capable to significantly change not only f-Configuration, but Paradigm of creative realization of the given Self-Consciousness Form itself. It follows thence that the frequency of repetition of so-called «postmortem» refocusing in more ampliative Self-Consciousnesses Forms has clear tendency to *subjective* decreasing.

3.0137. However, you should also understand that it is much harder and complicated to form stable FD in the conditions of high nutation resopasons than of low- and middle-nutation types of

exhibition. Why? Because they are structured by much bigger number of covallert interconnections or even cruvursorrt. We need to bring them into full correspondence with those specific signs characteristic to lluuuvvumic Synthesis Scheme. In other words, in order for Synthesis to take place in a high nutation resopason of exhibition of FD of our Self-Consciousness, preliminary there ought to activate and interrelate with each other multiple diverse and different-Qualitative interconnections, which, consistently becoming more and more covallert relative each other, in a particular moment appear to «converge» according to peculiar to them geyliturgent signs, thus creating energy-informational basis (synthesized Experience) for manifestation of FD in more ampliative (for the given Synthesis Scheme) resopasons.

Chapter 6. Quantum of Energy-Information. The Principles of interaction of personalistic Worlds through Focus Dynamics of different «personalities»

3.0138. Everything that I have described previously has direct relevance to renitive study and understanding of such, very important for our «personal» Existence, question as principles of interaction of countless multiple personalistic Worlds (of people, animal, other Self-Consciousnesses Forms) in the conditions of one group of Continuums (in the given case — of human). Now we consider only «dense plasmic» Levels of Macrocosmos, so called 3–4-dimensional (*corporal*) Continuums. Everything that surrounds us is the result of synthetic dynamics of quanta of Energy-Information (Energy-Plasma) jointly realized in a particular way through Focus Dynamics of not only people, but also of multitude of other Self-Consciousnesses Forms.

3.0139. Let me remind you that Energy-Plasma is active interconnections between Form-Creators and Info-Creators of karmonations, which represent synthetic Form of emanations and psychonations (MENTAL- and ASTRAL-types of Energy-Plasma). However, It is not only that — in every diapason of Own exhibition, Energy-Plasma is structured by incredibly more ample and diverse Forms of existence of Collective Cosmic Intelligences than those through which now realizes peculiar to us Thoughts, Feelings and results of their interactions — Desires. Correspondingly, ourselves and everything simultaneously reflected through our Focus Dynamics seemingly «outward» us can be energy-informationally consolidated to single quantum of Energy, slloogrent in all the Directions of Multipolarization of Focus Dynamics.

3.0140. According to iissiidiological Conceptions, quantum — as minimal for each of the «current» Worlds, portion of Energy-Information — in atomic-molecular part of UPDR (Universal Plasmic-Differentiational Radiation) is structured by endless multitude of seemingly separate combinations (portions) of Energy and qualitatively corresponding to It Information. Subterransive parameters of each «separate» quantum depend on the general qualitiveness of peculiar to it energy-informational interconnections. We, as carriers of Focus Dynamics, are also initiators of manifestation of certain signs combinations typical of dissonational part of Information: focusing in a certain Self-Consciousness Form, we temporally appear to self-associate with it, however, we are not it at all, we only subjectively observe what happen in the given conditions of our endless Existence (between unbalanced and

balanced parts of Information) and making in every observed case own conclusions, become owners of certain empiric-intuitive Experience.

3.0141. In quantum mechanical language, consistently (and simultaneously in all Form-systems!) focusing on some sensations and experiences, on specific Thoughts and Feelings, we «lock in» ends of corresponding strings (of Focus Dynamics) of Macrocosmos on ourselves, on subterransive Creative Activity of our Self-Consciousness, as if locally having «outlined» thus (i.e. qualitatively having manifested in the specific conditions of Space-Time) that quantum of Energy-Information through Focus Dynamics of one of the multitude of focused by us «personalities.»

3.0142. Let me remind you that strings theory is based on the hypothesis that all the elementary particles and formed by them combinations appear in the result of interaction of ultramicroscopic quantum «strings» (in the scale of 10^{-33} – 10^{-35} m). Such compactified quantum strings are structural elements of our Self-Consciousnesses and till the moment of their activation in Focus Dynamics represent a certain «potential of activity» — as energy-informational basis for all possible our experiences and potential physical activity. As soon as we initiate it in subterransive ODS by our direct interest (Desire), at the same moment there happens its subjective modification (constructive structuration of corresponding Information) and fixation on it of our Focus of Close Attention. All that happens in one and the same moment: from «unpacked» by us «activity potential» in the Perception system there appear to be «formed» a certain Notion about what we want or do not what on which basis in Inertia of Focus Dynamics of Form-Creators of our NUU-VVU-Form there locally has appeared subjective variant of our personalistic World — in the form of our «current» attitude towards ourselves and circumstances of the surrounding us reality.

3.0143. However, Perception systems of our «current» NUU-VVU-Form-Types are deprived of the possibility to fixate in Focus Dynamics of every moment and to subjectively distinguish some of peculiar to it qualitative signs: such property as manifestation Inertia is typical of f-Configurations of all Self-Consciousnesses Forms of Worlds' Form-systems focused by us, therefore in reality it turns out that we seem to automatically stretch-out («project,» «overlay») subterransive parameters of each locally-instantaneous experience on duvuyllerrt parameters of our unconscious experiencing of the following moment, which in its energy-informational Essence already cannot be the same — it is a bit different, because that «momentary» part of the general slloogrent Focus Dynamics of Self-Consciousnesses Forms of Worlds' Form-systems is formed from countless multitude of qualitatively different types of kleksings. That means that it is structured by absolutely differently synthesized quantum of Energy-Information.

3.0144. Thus, through qualitative difference between «previous» and «following» moments, which has been inertially formed in the subjective Focus Dynamics of Form-Creators of each Self-Consciousness Form, in Space-Time there have been created conditions for the manifestation of the subjective effect of subterransive «looping» of conditional «endings» of imaginary string (quantum of Energy-Plasma) structuring «previous» moment and *apparent* (in the subjective Perception of the Observer!) formation of «close» to it (and as a matter of fact — in *slloogrentness of f-Configuration of itself!*) of next «loop» closed on Focus Dynamics of Form-Creators of the given Self-Consciousness Form (and so on — to infinity). Between those two conditional, energy-informationally looped in

Focus Dynamics, strings there is formed a certain parameter of dissonational distance or inertional «distance» (qualitative difference). At that the parameters of the first string differ from the parameters of the second in a certain degree of subterraneous «quantum activity,» which determines qualitative difference in the states of those «quantum» systems (between first and second moments of our inertial existence). It cannot be said that one separate looped string already represents dissonational distance because manifestation of its parameter (and the difference itself, subjective comparison something with something!) in the Perception system of the Observer necessarily requires the presence of the parameters of the following string.

3.0145. Thus in Self-Consciousness of each Form (and therefore, in Space-Time, which it structures) there is formed a certain rotational Shift of Energy-Information or subterraneous quantum effect, which physicists determine as one «quantum shift.» That part of Space-Time that inertially — and subterraneously! — has manifested in Focus Dynamics of each «personality» in the result of the presence of this *objective* difference — it is that «momentary» print on Bioscreen of Self-Consciousnesses of that picture of subjective Reality which the given «personality» formed by energy-informational interconnections of the peculiar to it in the given moment Thoughts, Feelings and Desires.

3.0146. That energy-informational formation which we subjectively define as decoherent World is the result of quantum effect in Focus Dynamics of Self-Consciousness of that inertional qualitative difference in the continuously manipulated by us Energy-Plasma, single and slloogrent quantum of Which we constantly and differently «unpack» in our Self-Consciousness and immediately «unfold» in Space-Time, as though transforming («projecting») its parameters into properties of our subjective Reality spreading discovered by us thereat signs up to amplissim scope of Universe (though outside our subjective Reality these signs are completely different; amplissimness — the principle of manifestation of infinitely complex qualitative multispectrality of skrruullerrt system of Macrocosmos). Observed by us decoherent World is already «initially» structured by finished scenario of one of the uncountable possible variants of our subterraneous development: into peculiar to it energy-informational interconnections literally in every moment «interwoven» strictly defined life situations and circumstances (actions, meetings, conversations, people, animals, area, nature phenomena and so on), in Focus Dynamics there set a clear sequence of possible change of all Stereo-Types of our NUU-VVU-Form, strictly determined the «geometry» of the surrounding us Space-Time...

3.0147. The main peculiarity of simultaneously focused by us (i.e. by our all multiple different-Qualitative «personal» Interpretations) decoherent Worlds is that all their energy-informational Content is modeled and constructed in it in a strictly fixed state — it is absolutely impossible to change something in that objective construction. Everything in our current and eternal Existence «is changing» only subterraneously-resonationally — under the influence of inner qualitative changes happening in Focus of Close Attention of focused by us Self-Consciousness Form which in various ways changing its Focus Dynamics does not alter and restructures Words, but only in a corresponding way changes interesting to it signs of the observed subjective Reality choosing from them only those variants that in the most degree correspond to its «current» Notions about itself and about the main characteristics of the surrounding it reality.

3.0148. The specifics of our thinking and feeling is that we, in the first turn, think and fixate with our FCA only on the details which concern moments of possible favor in our «personal» Life of various circumstances and situations, and thereat think very little in unique specificities of some undesired changes in existing interconnections which inevitably accompany many variants of desired by us realization of our «current» Interests. In reality necessary circumstances following our refocusing and facilitating realization of exactly these Desires and Aspirations can turn out for us the most unforeseen and unexpected: «Death» of relatives, close people and friends, arguments and break-up with beloved, diseases and traumas, auto- and aviation accident, loss of creative talents, activation of all possible cataclysms and so on. We completely do not think about it when we model in our FD the certain content of our subjective «want» by our immediate Thoughts and Feelings.

3.0149. The whole process of realization of our Desires is directly connected with the multitude of subsidiary and inevitably (due to objective Reasons!) accompanying it circumstances without which the realization of these Desire — whether we want it or not, whether we like it or not — becomes simply impossible. Thus, «registering» in detail in our mental activity well imagined by us Essence of the Desire itself, we very often completely do not consider and miss out the fact how its realization (in one form or another) will influence realization of social, financial-economic, «interpersonal,» professional, creative, political, religious and similar Interests of many other people or how it in general will affect the Existence of other surrounding us Self-Consciousnesses Forms. In its turn, more or less it is peculiar not only to our thinking, but also to the process of mental activity of other living creatures which also think and pursue the realization of each of subterraneously peculiar to them Interests much more detailed and careful than other specifics that inevitably coexist that realization.

3.0150. Thus, our detailed thought-out and actually experienced subjective Notions about desired characteristics of our personalistic World, not being formed into similar detailed Notions about smallest peculiarities of «interpersonal,» political, economical and other circumstanced accompanying their realization in «future,» on examination turn out to be in much degree dependable from countless multitude of similar scrupulous Notions of other people (and also animals) about not less desired by them variants of realization of their own Interests. The less details has the desired picture of our personal «future» in our Imagination, the more the possibilities and results of its direct realization will depend on the turn of «outward» events, initiated in the given scenario by someone renitively more well-thought-out and structured in details, Notions, beliefs and *affective* Aspirations.

3.0151. Here special and very important part belongs to the development of intuitive abilities that help to purposefully penetrate into FD of Form-Creators of collective Subconsciousness and, specifically «scanning» peculiar to them ampliative SFUURMM-Forms, actively involve them into «current» FD of Form-Creators of personal Self-Consciousness. It often happens that when you model in detail so usual for you *selfish* inclinations, Desires and requirements, part of which is already synthesized in certain degree in different resopasons of «current» exuberation of your «personality,» you thereby only gather additionally «parcelwise» some lacking attributes of your current Conceptions about what you specifically want to achieve, and exactly therefore deprive the desired real possibility to manifest in the given conditions, because in the process of realization of any experience in that regard, you every time inevitably borrow some part of the Experience synthesized by your other «personal» Interpretations in the scenarios where this Desires already fulfilled. Modeling the detailed peculiarities of *altruistic* personalized «future» lets to resonationally «penetrate» into resopasons

of Creativity Spheres of observative Form-Creators (Curators), which SFUURMM-Forms are not peculiar to your «current» NUU-VVU-Configurations, which encourages active shift of your FD to more ampliative development scenarios where the probability of any *altruistic* realizations is high.

3.0152. In the process of realization of energy-informational changes in Focus Dynamics, structuring it SFUURMM-Forms create more and more new quantum effects, consistently «looping» on peculiar to them combinations of different-Qualitative signs (as patterns of «looped» in a particular way quantum strings) variations of Worlds' Form-systems which resonationally most correspond to various possibilities of realizations of current Interest of «personality» generating that Focus Dynamics. Then that Dynamics of qualitative quantum «shifts» starts to subjectively being interpreted by Perception system of the given Self-Consciousness Form as a certain continuous and constantly altering «movement» of something relative to another (mechanical, chemical, thermal, baric, psychic and so on). However, all that, of course, is a very approximate and conditional scheme of the «formation» and manifestation in our Life of various variants of «*someone else's*» (i.e. *sporadic*, manifested in our Focus Dynamics occasionally) personalistic Worlds.

3.0153. Each of us thinks and feels in own way, corresponding to the Configuration of NUU-VVU-Form-Type in which we focus in the given moment — subterransive parameters of its VLOOOMOOT and NNAASSMM determine in *what way exactly* we observe the surrounding World and how renitively (intellectually, sensually, consciously) may perceive it. We all, living in one group of STCs, in every moment of our collective exuberation jointly structure via our different-Qualitative Focus Dynamics the «geometry» of Space-Time of mutual for us Worlds' Form-systems. But at that each of us, as a subjective Observer, by means of specific Energy-Information of own subterransive Notions and dynamics of own mental-feeling activity, the character of own psychisms, constantly corrects general qualitative state of the surrounding all of us quantum system, and subjectively interpreting received results, forms in general Focus Dynamics a certain specific realizational spectrum of strictly subterransive refocusing — «own» personalistic Worlds.

3.0154. Subterransively perceiving observed events happening in the surrounding reality, each of us by own Focus Dynamics «loops» on itself (on own understanding, perception, «personal» Interest) constantly «unpacked» by itself Information and, in a particular way synthesizing into specific Notions peculiar to it interconnections, immediately projects them into the general Focus Dynamics of the given subjective Reality. Moreover that inertial process of subterransive «looping of quantum strings» is carried out in parallel in various Levels of Energy-Plasma structuring the given diapason of exuberation, thereby activating different-Qualitative Creative Activity of Form-Creators, which participate in the formation of informational space of Self-Consciousness of each Form typical only of its FD of fragmented UU-VVU-conglomerates and SFUURMM-Forms. Exactly on the basis of these subjective Notions in Focus Dynamics there is formed and initiated to manifestation all our psychical reactions: estimations of the observed events and qualities, criterions for their comparison, current conclusions, possible perspectives and so on.

3.0155. Observing Focus Dynamics of the same Worlds' Form-system, working in fact with the same slloogrent quantum of Energy-Plasma, all we in the process of own mental-feeling activity come to completely different, sometimes diametrically opposed conclusions and results. Therefore,

we ourselves turn out to be so different and unique by our Essence. We constantly quantize Space-Time around ourselves with Information of our Thoughts and Feelings, and the Energy of synthesized on their basis Desires, which represent electromagnetic fields of particular Configuration. Exactly our own stable Desires (Aspirations), in its entirety reflecting the subjective Essence of our subterransive realizational Interests, take the most active part in the creation of a *particular part* of that phenomena that we interpret as «surrounding us World.» The more detailed and constructive will be our Notions about presupposed and actively expected by us circumstances of our personal «future» (with scrupulous consideration of all the details and sides of our «personal» and social Life), the more substantial and appreciable in the general Focus Dynamics of STC will be the part that entirely corresponds to our personal perspectives and expectations.

3.0156. Since quantum of Energy-Plasma possesses the properties of slloogrentness, the question whether It can simultaneously seemingly «loop» on itself (i.e. resonationally balance between each other) Focus Dynamics of one or countless number of Self-Consciousnesses Forms, just becomes irrelevant. of course, It not only can, but usually It does so! Because quantum of Energy-Plasma or quantum shift of Focus Dynamics of any Self-Consciousness Form are, by Essence, completely different notions. The first one implies potential presence of integral of synthetic combination of conditional parts of decoherent and dissipative Energy with qualitatively corresponding to them Information in Focus Dynamics of Form-Creators of Macrocosmos, and the second — subterransive and unique peculiarities of variance of correlation between Energy and Information in Focus Dynamics of any Self-Consciousness Form, which instantaneously having occurred already do not let it occupy (locally focus, be self-aware of in) previous resonational point of Space-Time, and seem to impose it to manifest in somewhat different conditions. We all (including all other Proto-Forms) continuously refocus in one and the same slloogrent quantum of Energy-Plasma, each time resonationally choosing in its structure only those from *already synthesized* «parts» of general f-Configurations of Stereo-Form (NUU-VVU, LLUU-VVU and so on) which in the most degree qualitatively correspond the current stage of our subterransive psychogenesis.

3.0157. The deepest Truth that to alter the surrounding World for the better, it is necessary, in the first place, to start radically change in that way all qualitative characteristics of own self, has already became a usual esoteric banality for many people, because, first of all, most people just want that positive changes in their surrounding happen without their active participation, in other words like in a well-known ferry-tail — «as if by magic.» But, as ancient Romans said: «*Ex nihilo nihil fit*»³³. Any activity, event or phenomena, happening in our Life, necessarily has both its own universal Reason and own subterransive consequences no matter how obscure and indistinguishable they are for us. In order to at least somehow change something unfavorable for more satisfactory construction, we should make for that certain psychical or material efforts.

3.0158. Communicational peculiarities of energy-informational dynamics of space-time structures forming usual (for depliative abilities of Form-Creators of personal Self-Consciousness) diapason of force interconnections of Tertiary Energy-Plasma, and also yet unachievable for your understanding Mechanism of universalism of Focus Dynamics of Self-Consciousnesses Forms of each of our Stereo-Forms (that let every «personality» simultaneously be a potential participant of realization of subterransive development scenarios of multitude of «personal» Interpretations of its

3 Ancient Greek: «Nothing comes from nothing.»

LLUU-VVU-Form), provide each of these «personality» (in each STC group) with all those possibilities and conditions which are necessary for carrying out in the systems of subjective Perception of general Illusion of temporal (linear) existence of all «people» in only one single decoherent World, which appear to have own natural «beginning» and own logical «ending.»

3.0159. We often use the world «Truth» to denote something qualitatively most authentic, most significant and meaningful relative to something different. Speaking about something «closer to truth,» we always imply potential presence in wave diapason of specific manifestation of the given Energy-Information of some even more «objective» reality, in other words something that is capable to exist seemingly autonomous without any dependence from the degree of our Perception (or full imperceptions) of characteristic signs of that «objectiveness.»

3.0160. However, this impression is inaccurate and has nothing in common with What ALREADY EXISTS in reality. There is just no «Truth,» no «objective Reality» — as universal Sphere of manifestation of that Truth — as any moment of our Perception is formed by completely definite, limited by their qualitiveness SFUURMM-Forms, which provide our every moment subjective point of view on every specific moment of our «current» existence. In any case, exploring and analyzing the degree if «verity» of something, we can speak only about higher Levels of manifestation of subjective «Truth,» about more qualitative subjective Realities.

3.0161. Thus, SFUURMM-Forms, strictly limited by their own diapason of creative manifestation, form in our Self-Consciousness the same limited viewpoints on all the current events of our Life and, therefore, model all limited possibilities of our «personal» Perception system, within direct activity of which out of all the events experienced by us, our current subjective life Experience is filtrated. Exactly that Experience we use in our choices and psychosomatic reactions, because in the current moment of our Existence we consider exactly it «more authentic,» and even «genuine.»

3.0162. It has been well said that each «person» has only own verity, own «truth,» which is experienced and learned on own subjective Experience or is based on someone else's retold or suggested by other «people» (for example, parents, school teachers, scientists, politicians, religious figures, philosophers, writers, cultural, art and Mass Media professionals). However, no matter how you look at it, neither someone else's empirical Experience nor intuitive preperception often have any meaning for you, until you yourself really do not experience same states or situations and make own conclusions on the basis of scrupulous and thorough analysis of accepted by you decisions.

3.0163. For example, I tell you that I receive the Knowledge of IISSIIDIOLOGY through complimentary refocusings in much more amplificational Self-Consciousnesses Forms of the LLUU-VVU-Entity (i.e. of Own Self). Yes, you believe in that, and trusting me keep that in mind in your reactions, but not a single iissiidiological postulate will become your «personal» Experience, until you experience and try yourself in the described by me psycho-spiritual states. My and your Experience might be in a varying degree a little compatible, but these two categories of the process of subterransive Self-cognition never can be equal between each other: in the conditions of typical of all us — very limiting our spiritual abilities! — dual Perception, you (for yourself and for me) are only you yourself, and me is only me and no one else. That is the specifics of FD of Form-Creators who resonationally

use for own realizations SFUURMM-Forms from Levels of personal Self-Consciousness. That process will continue till you — by consistently and purposefully cultivating in own FD the Mechanism of Intuition — get at last the possibility to stably focus in much more universal SFUURMM-Forms of collective Subconsciousness «projecting» onto every act of your «current» TEC-unpackings more ampliative variants of VEC-Dynamics.

3.0164. The world surrounding you is seen and perceived by you in a way — only in a way! — as it is seen and perceived (through peculiar to them SFUURMM-Forms) by Form-Creators of Focus Dynamics active in your Self-Consciousness. Each moment you form your own viewpoint and carry out your subterransive choices only on the basis of their — strictly limited by the conditions of «current» manifestation — subjective estimations, «creating» («unpacking») thus «own» Reality, strictly limited by synthesized by you Notions about «yourself» and peculiarities of surrounding you reality. Doing exactly the same I also «create» own reality, but — my «own,» built on the bases of own Notions, structuring Focus Dynamics of Self-Consciousness of presently focused by me NUU-VVU-Form-Type.

3.0165. In order to subjectively «create» something (i.e. to reflect focal-wise through circumstances of «own» personalistic World), it is necessary — consciously and unconsciously — believe in something specific, i.e. have own stable interpretation (viewpoint) relative particularly observed creative process. Until you finally establish your own viewpoint, you will not be able to «create» (materialize, change, improve) reality observed by you through the prism of your subterransive Notions. Observed by each of us modifies in a corresponding way, consciously and unconsciously being exposed to our subjective influence. You look at the surrounding you World through notions you sincerely believe in, thus purposefully — through qualitative content of you own refocusing — affecting different variants of its manifestation in your Focus Dynamics.

3.0166. You believe in something yours, I believe in something mine, and each of us concentrate all the potential of decoherent Energy (the main Mechanism of «materialization» of SFUURMM-Forms) of own Focus Dynamics only on what we exactly imagine the most significant and important in the realization of the «current» moment. And since our subjective Notions do not coincide on many subjects, all possible manifestations of the integral surrounding us World (general STC group) are Interpreted by us completely in a different way, each is capable to see and estimate consequently arising in it situations and circumstances in an absolutely or somewhat different way, than all the rest people (not mentioning the specifics of subjective Perception systems of representatives of different Proto-Forms).

3.0167. What is more genuine meaning of well-known Wisdom: «Change yourself — and you will change the whole world»? What does it mean — «change yourself»? Let's assume that a «person» from the particular moment begins treating own self more demanding and meticulously, orientating more on positive reactions and altruistic motivations in the relationships with people. After a while, he not without reason assumed that he had already quite considerably changed own self for the better. Then, expecting logical confirmation of heard Wisdom, he starts to attentively watch other people and things surrounding him now. «Okay, — he thinks, — I know for sure that there happen considerable qualitative changes in me, but I do not see the essence of changes in the surrounding

me world — everything that had surrounded me earlier remained the same, and even became worse: my old house became even more decrepit, my car did not become newer at all... Okay, I have been cheated! No matter how much I improve myself, nothing around me changes for the better!»

3.0168. Yes, many people cannot understand at all, in what way, on what Levels and by what Laws changes and improves the World where they manifest. In fact, general Focus Dynamics of all Self-Consciousnesses Forms structuring our subjective Reality is carried out not so rough and literally as many used to think. Qualitativeness of subterransive parameters of Creative Activity Focus (NNAASSMM + VLOOOMOOT) shown by each human «personality» in every moment of Life, — no matter if we are aware of it or not — provides its Focus Dynamics with strictly subterransive manifestation in some possible narrowly specific scenarios of development, detailed «written» for each of «personal» Interpretation of the given Stereo-Form.

3.0169. Only in some more ampliative part of these scenarios in personal Self-Consciousness of the human there start to appear and cultivate SFUURMM-Forms of rigid certainty that it is he, and not some outside forces and circumstances (God, Karma), are Creators of own Destiny. In less qualitative scenarios its «personal» Interpretations are deeply sure in the contrary: that all events of their Life are fully determined by some external, not depending on the will of the «personality» itself, conditions and predeterminacy rooted in secret and incomprehensible for human mind twists of cause-effect interconnections. It is the character of that renitive certainty itself, determined by the presence of high-qualitative life Experience, naturally and consistently fixates Focus Dynamics of Form-Creators of Self-Consciousness exactly in those STC groups (from all the multitude of existing in the given moment possibilities), where stably expected by «personality» Existence conditions (development scenarios) are already initially available in all their multi-variance and actually possible to realization through its Focus Dynamics.

3.0170. Persistently acquiring genuine Knowledge and continuously changing yourself for the better, you start referring to the problems that «terribly bothered and tormented» you earlier, with much more understanding and accepting their tutorial, sometimes even too harsh, but on the other hand radically improving you Essence. This conscious amplificational process will contribute to gradual withdrawing of unfavorable circumstances and events — from the category of those events that you would earlier perceive as regrettable life troubles into the category of now much more tolerable, acceptable and more deeply analyzed by you. One day when any difficulties, obstacles and surprises stop being the source of continuous discontent and irritation, and will be perceived by you easily and renitively without bouts of despair, hysterics and attacks of nerves, manifestation of similar events in your life creativity will become impossible.

3.0171. For example, changing internally, you modify your former relation to money flows, deeper and more fundamentally reconsider your priorities relative to material and spiritual values, and when you will be ready in much degree for that, then some material pressure at least stop being the most urgent problem of all your Existence, your material status in some «miraculous» and, as it would seem, in completely independent from you way, also will start to gradually improve: there would appear resources for making decent redecoration of old house or move to a new, upgrade your car, wardrobe, diversify nutrition and so on. But as soon as daily graft begin to entirely consume and

absorb you again, as soon as concentration of your creative attention on these material side of your Life run too high, you will inevitably get new (or old) problems with material things, finance, debts, repayment of credits and so on. Consequently, you unnoticed for yourself have already returned into previous low-qualitative Levels of Self-Consciousness, and in order to start duvuyllerrt refocusing into more harmonious NUU-VVU-Configurations you will have to start all over again.

3.0172. Along with slloogrentness and resonation of Focus Dynamics of the surrounding you reality, one of the main properties of all multidimensional different-Qualitative structures of Macrocosmos are duvuyllerrtness and rotationness. Rotationness is such universal property of Form-structures of Space-Time, which in the endless Processes of general Creative dynamics of personalistic Worlds of all possible Self-Consciousnesses Forms not only provides initially peculiar to them stability and basic energy-informational characteristics, but rotationness is also one of the consistent results of specific dynamics of different-Qualitative Time Flows, due to which all the Forms structuring Space have strict tendency to manifest exactly in the place and time where *specifically that* should inevitably and exactly happen.

3.0173. Rotational process at any frequency Level of its manifestation is in the most degree individual, and absolutely all Forms of Collective Intelligences is unconditionally submit to it, no matter what kind of vibrations in various diapasons of dimension they emanate. Those countless Levels of manifestation in Focus Dynamics of Macrocosmos of all the multitude of specifically structured vibrations in equally specific way (strictly resonationally) correspond to f-Configurations of each Self-Consciousness Form manifested in Space-Time.

3.0174. As I have already mentioned everything that surrounds us «outside» *in the given mode of exhiberation* and specifically organizes our Forms «inside» (including Focus Dynamics) consists of vibrations — countless variety of wave dynamics, formed by realizational Creative Activity of Form-Creators of various Self-Consciousnesses Forms of photons and different-Qualitative «products» of their realization — elementary particles and atoms, differently constructed and combined by them into molecular aggregates and conglomerates — Self-Consciousnesses Forms of biological beings and mineral substances. All the surrounding us world consists from a huge number of different-Qualitative vibrational energy-informational Flows (Fields-Consciousnesses) which in Worlds' Form-systems of currently focused by us STC groups also represent waves of various types and various frequencies (for example, gamma-radiations, x-ray, ultraviolet, optic, infrared radiation, radio waves and others).

3.0175. *Alfa-, beta-, gamma-, theta- and pi-*emanation of our brain activity are SFUURMM-Forms of synthesized diapasons of ASTRAL- and MENTAL-Plasma, out of which, we consistently «unpacking» in our Focus Dynamics peculiar to them UU-VVU-Forms, constantly draw, model and reconstruct «own» Thoughts, Emotions, Beliefs and Aspirations (Interests, Desires). In fact, particularly these SFUURMM-Forms are, in total, energy-informational basis of general creative coexistences of us, so different both in appearance and physiologically. Our Thoughts, Feelings and synthesized on their basis Desires — these are that invizusal and yet very weakly sensed by us wave «visiting card» of our «personality» through which we in the given moment of our eternal Existence subterraneously manifest and qualitatively suggest ourselves to all the rest Self-Consciousnesses Forms of the surrounding us World.

3.0176. Particularly this «visiting card» is the main and crucial reason in the whole process of consistent localization of our bidding place (conscious fixation of Focus Dynamics) in some duvuyllerrt group of Worlds' Form-systems and STC. Our more qualitative psycho-mental activity (relative to lluuvvumic Synthesis Scheme), causing more qualitative (intellect-altruistic) tendencies in physical realizations (choices), is accompanied by refocusings into f-Configurations of more ampliative NUU-VVU-Forms (and therefore into more favorable scenarios of development); less qualitative Thoughts and Feelings stimulating us to the realization of more selfish Desires fixate Focus Dynamics of our Self-Consciousness in more depliative variants of «personal» Interpretations thus subterraneously engaging us in powerful circle of unfavorable for us situations and circumstances.

3.0177. It is necessary to renitively understand all that in order to try to clearly explore the notion of personalistic Worlds of existence, because each of us builds «own» personalistic World on the basis of peculiar to us in the given moment life priorities, values and also corresponding to those goals and interests which we in our «personal» Life put in the first place. Every «person» on the basis of the available Experience (which is concentrated in subterransive ODS) forms own Notions about happiness, joy, well-being, their current and future image of themselves in Life.

3.0178. However, as we all live in different-Qualitative World, these Notions are very strongly differ from each other because they are structured by the signs combination peculiar to different OO-UU-Entities. Here I talk about World in singular not because it is one and single, but because we used to perceive it as «something integral,» on which background all our historical development is carried out. In reality we all simultaneously manifest in duvuyllerrt group of STCs structured by endless multitude of different types of subjective Realities (human, animal, plant, and microorganisms), the general qualitiveness of slloogrent Focus Dynamics of which, in its turn, depends on the constantly changing Focus Dynamics of the same countless multitude of personalistic Worlds of Self-Consciousnesses Forms peculiar to each of the given types (in human s-Realities — of people, in ant's — of ants, in bird's — of birds, in mushroom's — of mushrooms, in plant's — of plants and so on).

3.0179. Notions forming in each type of subjective STC groups and Realities, the qualitiveness and specificity of Focus Dynamics of dominant Self-Consciousnesses Forms, constantly, in the process of carrying out Synthesis, informationally kleksing, correct themselves and change according to own Energy-Potential (though energy-informational component of *skrruullerrt structure* of focused s-STC and s-Realities remains unchanged at that!), which initiates in slloogrent FD of all Self-Consciousnesses Forms of Collective Intelligence of Macrocosmos the process of so called subterransive rotational Shifts, in the result of which in Perception systems of all beings there is formed so powerful subjective factor as subterransive rotational Cycles, which are typical of all Self-Consciousnesses Forms (what you within our two-invaderental Synthesis Scheme interpret as «Life of a personality from its birth to the death,» and IISSIIDIOLOGY — as «eternal Existence of personality within its LLUU-VVU-Form).

3.0180. For example in human s-Realities such changes in «current» SFUURMM-Forms of Focus Dynamics of each person happen under the stable influence of many outside circumstances, situations, someone else's opinions, tastes, views, and also other, more convincing viewpoints, any new material

and Information in general. That complex and continuous process is simultaneously carried out in Focus Dynamics of absolutely all people of humankind Collective Consciousness, therefore in FD of NUU-VVU-Forms of each of the groups of Continuums and s-Realities there constantly happen natural «intercrossing» and «collision» of separate SFUURMM-Forms and established conceptions structuring personalistic World (PM) of every «personality» with the contents of countless multitude of someone else's sporadic Worlds — moreover those can be PM not only of people but also of separate animal kinds (domestic cats, dogs, aquarium fish, cattle, birds and so on), plants and even minerals (in particular in the form of jewelry, precious stones).

Chapter 7. Self-Consciousness is the Mechanism of realization of properties of Energy-Plasma through peculiarities of personalistic Worlds

3.0181. As you can see, everything in subterraneously carried out by us relationships with World is very, very complicated. Therefore, let us try to even more renitively and thoroughly figure out what exactly does that compound subjective notion — *personalistic World* — represent in its Essences? How in general and in what way do the signs of any given «someone else's» — sporadic — World reveal in our Focus Dynamics and what consequences can it have for us in every particular case?

3.0182. The answer to the first question is formed from renitive understanding that each of us has own subjective Perception of both surrounding reality itself and everything that continuously happens in it, — every event, collectively observed in the given group of Continuums and objectively manifested in equal for everyone form, is perceived by each person (animal, plant) completely differently. Each Self-Consciousness Form represents narrow-specific «projection» of different-Qualitative dynamics of Universal Self-Consciousness Focus, properties and parameters of which are determined by qualitiveness of structuring it energy-informational interconnections between Form-Creators and Info-Creators of RezoMirals corresponding to realized Synthesis Scheme.

3.0183. Focus Dynamics of photon Form-Creators is not identical to FD of Form-Creators of atoms structured by them; FD of atom Form-Creators also differs from FD of Form-Creators of molecules constructed by them; FD of molecule Form-Creators does not correspond to FD of Form-Creators of formed by them aggregate states of all possible substances and creatures, starting with protozoa and finishing with animal, human and objects of space scope. Each representative of the above mentioned categories of synthesized combinations of Form-Creators realizes (interacts with Form-Creators of all the rest Self-Consciousnesses Forms) through peculiar only to it subjective Notions about «own self» and surrounding it reality, i.e. continuously interacting with many sporadic Worlds through characteristic peculiarities of «own» personalistic World.

3.0184. Believe it or not that is exactly the case with s-Realities of any type: besides «Every» (here inverted commas are used to remind you once again about SIllogrentness Principle of all Form-structures of Macrocosmos and conditional «locality» of limitedly perceived by us Self-

Consciousnesses Forms!) Stellar and Planetary Cosmic Entities, and also «every» person, animal, plant, microorganism, «every» boson also forms surrounding it reality with the help of SFUURMM-Forms peculiar to it PM, «every» fermion — with the help of its PM, «every» atom — with the help of its PM and «every» molecule — with the help of its PM. Formational principles, type and qualitiveness of any of these personalistic Worlds are determined by Scheme of invaderental Synthesis in which realization — in the given «point» of own «current» subjective manifestation in Space-Time — any observed by us Self-Consciousness Form takes part.

3.0185. According to the deeper signs of forming us Essence (Nature) no one of us might be that NUU-VVU-Form-Type of Self-Consciousness (aspectably perceived by «personality»), in which he/she focuses in every moment of own Existence. Not a single person — physically or biologically — is just not able to at least somehow consciously comprehend own self as a certain Stereo-Type or «personally» experience «own self» even in one second vibrational «set» structured by specific frequencies of f-Configurations of 250–400 Stereo-Types. Only continuously focusing both on ourselves and on Focus Dynamics of other Forms, we acquire possibility to consciously perceive and analyze *what exactly* and *in what way* changes and realizes in the surrounding Word from all the diversity of organizing it Self-Consciousnesses Forms. However, if we are neither who we consider ourselves to be nor those we can see in the reflection of a mirror, than who we are in reality? Who provides our Focus Dynamics, who manages our Thoughts, Feelings and Aspirations, who speaks, thinks, experience, acts, chooses?...

3.0186. Self-Consciousness is extremely difficult and the most Universal Mechanism of subjective realization of Energy and Information (Energy-Plasma), which cannot be located in a particular «point» of Space-Time (any externality of phenomenal world represents only reflection of illusory effect projected by subjective Perception system of every Self-Consciousness Form), but sllougrently is transgressed into integral different-Qualitative Form-structure of Macrococosmos. In order to try to understand at least schematically organization Principles and multipolarizational realization of these Mechanism we will have to «project» ourselves via our Focus Dynamics into the most elementary Levels of controlling and coordination process of realization possibilities of SFUURMM-Forms structuring Self-Consciousness of presently focused by us NUU-VVU-Form-Types.

3.0187. Universal energy-informational bases of any of our contentious realizations in the given diapason of dimension are UU-VVU-Forms — certain sllougrent set of different-Qualitative subjective Notions, in a particular way synthesized through Focus Dynamics (in doolls-wave 3–4-dimensional diapasons) on the bases of multiple resonational combinations of sub-Aspects and Aspects of two-invaderental OO-UU-Entities with sub-Aspects and Aspects of the ten other OO-UU, vecsative in the given Synthesis Scheme. In that definition there is a very subtle, but extremely important for our Understanding detail: UU-VVU is not a Form (of Self-Consciousnesses), it represents a certain informational Potential (particle «-VVU» says about affiliation of the given part of UU-Information to human direction of mental creativity) which being the part of «unpacking» Mechanism of our Focus Dynamics, «fills» the processes of thinking and feeling with certain *undetermined* multivariate Content, which Meaning and certain value we every time form all over again, comprehending it only in the moment of subterransive TEC-unpacking. Other our «personal» Interpretations multipolarizationaly «unpack» in the same moment the same UU-VVU-Information but somewhat or absolutely different.

3.0188. In other words I use in the term UU-VVU-Forms the word «Forms» not only because they are actually being them till the moment of their manifestation in Space-Time, but due to their potential belonging to each of the locally expressed variants of our Focus Dynamics, without which any of their manifestation for us (or for Perception systems of other Self-Consciousnesses Forms) would be just impossible. UU-VVU-Information obtains Its subterransive Form (in reality the one we give it via already available for us Notions!) specifically in the moment of interaction with our biological Perception system reflecting itself in it (via biochemical reactions) through a certain multitude of stable resonational combinations of different-Qualitative info-fragments (UU-VVU-copies), whose Configurations are subjectively interpreted by our Form-Creators corresponding to already peculiar to them Experience and integrate into more significant information «sets» — SFUURMM-Forms, structuring by them all the qualitative Dynamics of their refocusing.

3.0189. SFUURMM-Forms being specific «mediators» between potential Content of Self-Consciousness and narrowly specific «projections» of these Content into Form-systems of Macrocosmos, in their turn form in the general Focus Dynamics of Energy-Plasma some intermediate (between Form-Creators and Info-Creators) aggregate states of Information (UU-VVU-conglomerates), resonationally combining with some definite carriers of qualitatively typical of them Energy, in the result of which on the basis of wave interactions between Form-Creators of Form-systems and Info-Creators of Self-Consciousness, Energy Content (unbalanced, eglleroliftive «part» of Information) and Information Content (balanced, irrkoglictive «part») duvuyllertrly combine in Space-Time into so called Fields-Consciousnesses. For example, Fields-Consciousnesses of 3–4 dimensional hexahedral diapason are represented by Self-Consciousnesses Forms of photons, *partially* structured by Focus Dynamics of both doolls and flaks Form-Creators .

3.0190. Particularly these Fields-Consciousnesses, organized between each other according to characteristic peculiarities of the presence in their f-Configurations of signs of certain qualitative tendentiousness and creative (hence, focal, synthetic) orientation are very first and most stable connecting link between Focus Dynamics of each Self-Consciousness Form (including «us» as well) and more objective (above-wave, flaks) part of slloogrent Focus Dynamics of our Universal DDIIUYIYI-Entity. We, temporarily focusing in the given mixtum analogs of NUU-VVU-Form-Types, in the long chain of subjective manifestation of these Fields-Consciousnesses, as well as all the other Self-Consciousnesses Forms, represent by peculiar to us Focus Dynamics, it can be said, some intermediate — *protoformal-combining* — variants of manifestation of «external» Levels of their creative realization:
 ... ⇄ ... flakses... ⇄ ... photons ... ⇄ ... elementary particles ... ⇄ ... atom's aggregate states ... ⇄ ... molecule's aggregate states ... ⇄ ... molecular combination of physical substances (both natural and synthetic) and biological tissues ... ⇄ ... Self-Consciousnesses Forms of cells and organs ... ⇄ ... *Self-Consciousnesses Forms of various creatures* (microorganisms, plants, animals, human) ... ⇄ ... Self-Consciousnesses Forms of Planetary and Stellar Entities ... ⇄ ... doollses... ⇄ ... loolgses ... ⇄ ... protofses... ⇄ ... ullumkses... ⇄ ...

3.0191. Such protoformal-uniting *symbiotic* properties are typical not only of Self-Consciousnesses Forms of 3–4-dimensional diapason, but also of Self-Consciousnesses Forms of any exhiberation Level because in the opposite case in Macrocosmos there would be impossible to fulfil the Principle of Diffuzgentness of any Focus Dynamics. For example, Self-Consciousnesses Forms of photons, in their turn, represent aggregate states of superuniversal Self-Consciousnesses Forms of depliative

flakses, manifested in resopasons from 4.0 to 4.5 dimension (*falkhats* and *malsons*, *klyarions* and *klastirons*, *bilurins* and *kruolons*, and many others), and subelementary Self-Consciousnesses Forms of ampliative doollses, manifested in resopasons from 2.5 to 3.0 dimension (*ulgmkrs*, *oyldgms*, *palvfkhts*, *snirdkhms*, *doykhfmstrs*, and many others). It is difficult for me to explain exactly how and in what sequence they diffuzgate between each other in order to form by joint realizational efforts exhiberational Self-Consciousness Form («manifestation body») of photon, though the Principle of formation of similar interconnections is always the same — resonational interaction. By analogy with peculiar for us Notions about «manifestation body» of any living being, these Self-Consciousnesses Forms can be conditionally interpreted as specific analogs of all possible «cells,» «molecules,» «atoms» and «elementary particles» structuring the most qualitative Self-Consciousnesses Forms for the given diapason — photons.

3.0192. In the conditions of exhiberation in Focus Dynamics of human subjective Realities of the given dimensional diapason, SFUURMM-Forms represent certain different-Qualitative sets (spectrums) of electromagnetic oscillations (as well as of plasma, chromatic, acoustic and others). I would like to underline once again particularly such circumstance that *all SFUURMM-Forms (and structured by them UU-VVU-conglomerates) have wave electromagnetic manifestation nature*. The phenomena which we determine as «human,» «personality» represents by its nature a densified «bunch» of electromagnetic waves (therefore the level of development of civilization depends on what frequency most of its representatives were able to reach). Human with its developing intellect is only a tiny part of slloogrent energy-informational Space (on our Planet — Noo-Sphere), to which it is always possible to «connect» in a particular way in order to get from there necessary for us Information, after all human Thoughts, Feelings, and Desires are material.

3.0193. It is very important to know and understand all that because you often do not think that all your Thoughts, Feelings, Desires and Aspirations (Interests) possess the same wave nature as focused by you NUU-VVU-Configuration, and as well as any other object of the surrounding your World. It is important waves from which qualitative Levels of your Self-Consciousness structure SFUURMM-Forms used by you in Focus Dynamics because that influences not only results of continuously carried out by you refocusing process, but also your health, wellbeing, psychical reactions, intellectual abilities and spiritual potential: the more all possible energy-informational signs combinations peculiar to your more qualitative «personal» Interpretations (which in your subjective «now» *already* structure more favorable variants of development scenarios) will be present in your «current» SFUURMM-Forms, the faster you will be able to resonationally «shift» your Focus Dynamics in these STC groups.

3.0194. That circumstance influences not only your interactions with surrounding reality, but also its selective attitudes towards you «personally,» which do not always turn out to be useful for you and often are not controlled by you in any way. Resonationally overlaying («self-projecting») qualitatively corresponding them wave spectrums of Focus Dynamics of your «personality,» SFUURMM-Forms, via peculiar to them nutation, actively influence the process and qualitiveness of your psychical reactions, causing either the feeling of horror, fear, stupor or the feeling of joy, passion, bliss and creative inspiration (for example, when the repetition frequency of electromagnetic field of SFUURMM-Forms of you external surrounding coincide with the frequency of alpha rhythm of your brain, in your Perception system may origin various depressed states, conniptions, panic attacks and whiplashes of fear). Any tensor attitude towards something or somebody indicates predominance in FD of the given

person of impercept interconnection relative to signs combinations of f-Configuration of subjectively perceived object, subject or phenomena. Not having possibility to enter resonational contact, the given selective dissonance forms between FD of Form-Creators of different Self-Consciousnesses Forms corresponding — *surdousive* — SFUURMM-Forms: miscommunication, criticism, disappointment, offend, irritation, aggression and so on.

3.0195. Though SFUURMM-Forms may be modeled by both magnetic and electric fields, it turns out that with the help of generators of only electrical fields it is possible to control emotional states and all possible actions (choices) of any people, suggest any Thoughts and Feelings, intrude their short-term and long-term memory in order to correct it, promptly erase their skills and develop new (in other words carry out the process of forced refocusings of «personality» into certain development scenarios changing acquired life Experience for new), and carry out many other things not only with organisms of living creatures, but even with reactions of different physical objects and separate elementary particles (for example, of electron). Such abilities activates in f-Configuration of those «personalities» which FD: a) are already quite universal for the *given* exhiberation conditions that is structured by multiple more covallert (towards the given Synthesis Scheme!) different-protoformal interconnections (at changing conditions or current qualitiveness of FD these abilities may disappear); b) realize in more degree SFUURMM-Forms of those protoformal development Directions for which Self-Consciousnesses Forms abilities of low nutation intuitive Perception are natural.

3.0196. That property of SFUURMM-Forms is already now being actively used in different psychotronic devices (microwave, generators of extremely high frequency, laser sender, ultrasonic, infrasonic, roentgen, millimeter- and submillimeter-wave length of radio and ultrasonic diapason, infrared, ultraviolet, isotopic, gamma and so on) for instant transmission of Information through any screens to submarines cruising in the oceans, for generation of messages or commands to Form-Creators of DNA molecules — both for increasing effectiveness of functioning of cell mechanisms and extension of human Life and for «self-destruction» (for example, activating «death genes»), for transmission in a wave way new incurable diseases, bringing fatal «Death» not only to separate people, but to the whole racial-national groups. Radiating units are capable to strike organism in a distance and almost in any weather. Communication lines of residential units are used as aerial transmitters of such waves from the source of radiation (generator): lighting wiring, telephone and radio-relay communication tools, heating, water supply and sanitary drain pipes, window glasses, fire alarm system, television, player, computer and so on.

3.0197. It is also known that emanation generated by brain and going «outwards» through human eyes is formed not only in aspectable wave diapason — Form-Creators of our visual organs are capable to emit roentgen rays powerful enough to be fixated even on photographic tape. Therefore, eyes — in certain psychical states — can also carry out function of more or less powerful «personal» psychotronic generators specifically modeling (through brain) and emanating on other people channeled SFUURMM-Forms in roentgen and in other wave diapasons. There have been already created highly sensitive screens on which there appear outlines of images when somebody fixedly and contemplatively looks at them. In multiple phenomenological researches, there have been registered cases of weight decreasing or full levitation of material objects during channeled spontaneous psychophysical impact of a person (psychokinesis), yogi levitation or just off people in a transcendental state.

3.0198. Every person has own f-Configuration as well as own diapason (spectrum) of emanation of psychic (decoherent) Energy, if tune into it, it is possible to influence with the help of necessary SFUURMM-Forms (i.e. carry out purposeful programming on the unconscious level or brain «installation») any person with the help of generator of so called *P*-waves (polarization waves, have frequency about 10^{40} hertz and vacuum velocity in million times more than the speed of light!). There already created devices capable to register these frequencies, in other words they can almost read in a distance people's thoughts (but not the most qualitative!) without any contact with them. In fact, these frequencies are material carriers of SFUURMM-Forms, synthesized by different-protoformal Form-Creators in diapason from 2.0 to 3.5 dimension. People can identify and adopt to their Notions only those from them which are specifically kleksed on the basis of VVU-Factor. With the help of *P*-waves it is possible to get any information from bio-objects including their «personal» feelings, specific sensations, subjective experience and even «see» with other person's eyes. For example, if in a special way (in *p*-waves frequencies) record eruption of elation from some event and afterwards redirect that SFUURMM-Form by subterransive *p*-wave canal to another person, the last one will also experience the feeling of elation.

3.0199. Healthy people in the states of strong psychical stress connected with Life threat or with dominating motivation to urgently achieve an essentially important goal, are capable to unintentionally cope with obstacles insurmountable in their usual state, lift huge weight, practically instantly move on huge distances and so on. There also known phenomena of short-time increase or decrease of weight of biological objects, including human, unrelated with usual the process of mass transferring, but spontaneously appearing at sudden and significant change of psycho-mental states (for example, in the states of somnambulistic automatism — sleep-walking — or at a powerful increase in qualitiveness of psycho-mental dynamic, the weight of a person significantly decreases).

3.0200. Affecting human brain with the help of SFUURMM-Forms generated in the form of *light impulses*, it is possible to «turn on» or «turn off» some genetically coded in the brain switches which enables to fulfill the process of direct recording of necessary Information into the memory of «personality» bypassing stages of its subterransive awareness and reasoning. That direct recording enables to get a full control over Focus Dynamics of bio-Creators of some neural chains and stimulate them to create necessary psychical state and behavior of the given «personality,» and also to implant in the memory false recollections about events which had never happen in reality, but only in imagination (through UU-VVU-conglomerates of subterransive ODS — in other parallel development scenarios). With the help of direct impact of light-coded SFUURMM-Forms it is possible to fully control operation of all motor functions of sleeping organism, control its neuronet and suppress activity of separate nerves (for example, remove painful syndromes in post-stroke states, in case of diseases which cause spontaneous movements, and also when people suffer from muscle atrophy, paralysis, amyotrophic lateral sclerosis, and other neuromuscular disorders).

3.0201. Unfortunately, we still focus via peculiar to us Interests in so imperfect STC groups where wave properties of SFUURMM-Forms serve not powerful intellectual-spiritual development of all the humankind and growth of its wellbeing, but are more and more actively being used by various military departments, intelligence agencies and criminal structures for forced processing (targeted zombieing) Levels of collective Unconscious and personal Self-Consciousness of any unwanted by

them person (or group of people), as a result of which he or she loses directing contact with own past and is programmed for unquestioning, unconscious submission to «master's» orders. In the basis of physics of that phenomena there lay Notions that all wave structures possess characteristics of so called «object» wave (object, exposed to the influence of certain emanation), or «illuminating» wave (that «projects» into space holographic image of such object and recreates on the screen of the device the configuration of its psychic). Focus Dynamics of any Self-Consciousness Form (the process of TEC-unpackings) also operates according to the principle of hologram.

3.0202. Not every person can be zombified: people with strong willpower and high nutation (spiritual) thoughts are much less exposed to purposeful sfuurmmformal influences, which being channeled to them might just not reach the goal, because in Perception system of percipient in the given diapason of modulated from the outside frequencies there does not originate powerful enough effect of resonance (however, in any case similar impact will influence their psychic state: when strong will power resists some influences, it usually expresses in tiredness, exinanition). Most people, if they are not in *highly ampliative psychical states*, can be easily controlled, being directed to almost any actions, including a suicide or a murder.

3.0203. Intensified zombieing stably and forcedly integrates SFUURMM-Forms (behavioral Notions and reactions) necessary to a «master» into Focus Dynamics of a person. That radically changes behavior of zombified person: the expression on the face becomes detached and does not correspond to emotions expressed in words, clearly changes the color of eye whites, there prevail anaemic intonation in the voice, speech becomes grammarless, the ability to concentrate is lost, reactions and movements slow down, appear gaps in memory and absurd fixedness in the behavior. Here I would like to underline once again that the best protection from such zombieing is *active* cultivation in own Focus Dynamics of such ampliative psychical states as high-sensual Intellect and high-intellectual Altruism, which makes it impossible for Form-Creators of Self-Consciousness to be in resonance with any depliative SFUURMM-Forms. In opposite case you can blame only yourself in what happened.

3.0204. While «soft» zombieing (the program realizes in a «sleeping» mode) the «personality,» in fact, does not differ from other people in any way, but in the moment necessary to the «master» it is capable in a distance to execute all its orders in full obedience. At that in Focus Dynamics there can be dominantly unpack in sequence — depending on the solution of the assigned task — qualitatively different UU-VVU-conglomerates, giving the person qualities and characteristics of seemingly several completely different «personalities.» At switching from one conglomerate of SFUURMM-Forms to the other, its voice, manners, pace, smile, eyes and face expression distinctively change, there also happen selective activation of memory and Experience, professional and creative skills and also intellectual, feeling and physical abilities.

3.0205. At the impact on Focus Dynamics of «personality» of SFUURMM-Forms of ultrahigh-frequency electromagnetic radiation (UHF — decimeter waves, wave length is from 1m to 10cm, frequency — from 300MHz to 3GHz), there happen pathological deviation in the functioning of different organs responsible for human life activity. For example, it can activate organism cancer cells and oncology disease. Exposure to SFUURMM-Forms of super-high-frequency (microwave) radiation

(SHF, wave length is from 10cm to 1cm, frequency — from 3GHz up to 30GHz) engage bioelectric current with the frequency from 1Hz to 35Hz, which can lead to failures in reality perception, tonus increase and decrease, tiredness, nausea and headache, with following full sterilization of instinctive sphere, heart, brain and central nerve system damages.

3.0206. SFUURMM-Forms modeled with the help of EHF (millimeter waves, frequencies from 30GHz to 300GHz, wave length from 1cm to 1mm) influence central nerve system and brain; they cause unfavorable pathological disturbances in the function of inner organs. For a certain period of time brainwork becomes impossible because of the difficulties in self-control (irritation appears) and orientation in the external environment. If SFUURMM-Forms are generated and intrude into Focus Dynamics with the help of roentgen (wavelength is from 10^{-8} m to 10^{-12} m; frequency 3×10^{16} Hz — 3×10^{20} Hz) or gamma-radiation (wave length — 10pm, frequency — 30EHz), they can be used to liquidate any person in a distance or through the wall imitating lethal outcome like from a usual disease. It selectively damages certain brain centers responsible for memory, heart-vascular system or other functional centers. What is more, it harms brain structures without damaging external brain lining.

3.0207. It happens because high nutation emanations are structured by more powerful by its energy-informational potential SFUURMM-Forms, which due to the peculiar to them universality (hence, permeability!) at its primariusive intrusion into FD of bio-Creators of mixtum Self-Consciousnesses Forms are capable to sharply increase in them the processes of inter-Qualitative Synthesis, inevitable result of which are «postmortem» refocusings of Form-Creators of affected «personality.» In biological organism such emanations suppress and damage functional interconnections (some of active neural chains are liquidated) between bio-Creators of those systems and organs, which f-Configurations are in more degree structured by signs combinations impercept relative to SFUURMM-Forms of the given FD. Having carried out a certain number of «postmortem» refocusings, Form-Creators of FD of the given «personality» increase the degree of covallertness of interconnections relative to Energy and Information generated by the given emanation, in the result of which bio-Creators of the brain develop completely new types of neuron interactions. Exactly therefore weak and pre-dosed acts of radioactive radiation are capable not only to immensely improve the functioning of physiological organism of separate people, but open some of the potential creative abilities.

3.0208. Human cannot hear sound frequencies higher than 20 KHz with wave length about 0.017 m. However, SFUURMM-Forms, impulsively generated in ultrasonic diapason can stop heart function leaving no signs of violent «Death,» and it is impossible to disclose without special research on a molecular level done by an expert. They usually use modulated signal for that (so called «bio-noise method») when a person is attacked by a burst of new frequencies, to which it is simply impossible to adjust. These SFUURMM-Forms are capable to cause either insane fury, or heavy apathy, or strong pain, or exuberant high spirits or absolute terror. Emanation of SFUURMM-Forms in the given diapason greatly influences the mental structures, psychic and nerve system, causing headache, faintness, vision and breathing disorders, convulsions, loss of consciousness.

3.0209. Everything above mentioned has the most direct relation to the process of formation in your Focus Dynamics of all the multitude of different-Qualitative sfuurmmformal interconnections, which, as a matter of fact, determine in your Perception system all the subjective «picture» of realization in Space-Time of specific Notions structuring your personalistic World. What we interpret as «surrounding reality» — is the area of frequency realization of endless multitude of *SFUURMM-Forms* (from acoustic and light vibrations to interference «pictures» forming psychological order), and our brain is a special wave (vibrational, frequency) transformer unifying and modeling all those different-Qualitative fluctuations into subjective Word of everything we individually perceive, see, think and experience.

3.0210. Let me remind you that in the spectrum of wave frequencies which we are not capable to see or somehow feel and experience, there also exist not less authentic types of subjective Realities with own objects, people, animals, plants, Planets, Stars and Even Universes — in brief, with all that infinitely multifarious content which Form-Creators of our brain (strictly corresponding to their abilities and potential!) constantly «cross out» from multipolarizational Focus Dynamics of Self-Consciousnesses Forms of decoherently perceived by us Reality. When yogi, psychic mediums or spiritually self-developing people enter so called «transcendence» (deep Meditation), they, in fact, purposefully adjust FCA of their Perception system to resonant interception of emanations unperceivable by them in usual state. Form-Creators of brain constantly transform sensory manifestations of accessible for them wave diapason into the language of frequencies fully or partially ignoring simultaneous dynamics of extrasensory (supersensible) realms of Perception. In reality there exist an infinite multitude of variants of our simultaneous subjective Existence: «one» variant, in which we are definitely and clearly aware of focused by us NUU-VVU-Form structuring by its f-Configuration a certain «point of exuberation» in skrruullerrt system of Space-Time, and many others, where we exist in parallel focusing in f-Configurations of NUU-VVU-Forms with some different qualitative characteristics.

3.0211. I give all these examples in order to underline once again: in the given type of subjective Reality the photon state is preceded by a certain slloogrent (doolls-wave and flaks-wave) state of *SFUURMM-Forms*, which, in its turn, is structured by an endless multitude of narrowly fragmented states of Self-Consciousness representing covarllert combinations of *potentially* (for each of acts of «local» Form of exuberation!) interconnected between each other Energy and Information. These Configurations or so called UU-VVU-copies, — emanations of Thoughts (conditionally «mental» component of Energy-Plasma: ALL-Will-of-ALL-Intelligence, ALL-Primordiality-ALL-Initiality, ALL-Mobility-ALL-Presence, ALL-Knowledge-ALL-Informedness, ALL-Aspiration + transitional ALL-Unity and ALL-Steadiness-ALL-Stability) and psychonations of Feelings (conditionally «astral» component of Energy-Plasma: ALL-Love-ALL-Wisdom, ALL-Integrity, ALL-Essentiality-ALL-Permeability, ALL-Abundance-ALL-Fullness, ALL-Voidness-ALL-Vacuumness + transitional ALL-Unity and ALL-Steadiness-ALL-Stability) — in resonational way synthesize in Focus Dynamics (in a very narrow frequency diapasons) to the state of *karmonations* with a certain Potential of qualitatively corresponding to them Energy and Information.

3.0212. I want to remind you once again that *SFUURMM-Forms* by the Principle of their formation and subterransive exuberation in specific conditions of Space-Time represent that universal «assembly material» (combinations of different-Qualitative, but covarllert relative to each other

informational interconnections) which simultaneously — through slloogrent Focus Dynamics of Macrocosmos! — structures and stimulates to exuberation both synthetic f-Configurations of all diverse karmonational formations (Self-Consciousnesses Forms and CCI of Worlds' Form-systems), and covarllert combinations of informational r-Configurations of emanations and psychonations which provide all the functionality of OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes (as well as all the other Creativity Spheres of Info-Creators of RESOSCONTIONAL Qualitational Branch). Their specific combinations are able to self-organize in a particular way (both in ODS and Form-system) only under influence of *resonational* relative to them Focus of Close Attention, in its turn FCA cannot dynamically manifest (as a part of Focus Dynamics) without the presence in subterransive ODS of Self-Consciousness of corresponding to it SFUURMM-Forms or formed by them UU-VVU-Conglomerates.

3.0213. You should understand that any specific Thoughts and Feelings do not appear in our personalistic Focus Dynamics for no reason, but are specifically chosen by «someone» or «somebody» from slloogrent Flow of multiple UU-VVU-Forms, after which they are covarllertly formed into more or less stable synthetic state, in which they are produced — on a frequency peculiar to the given combination — into general Focus Dynamics of Self-Consciousnesses Forms of the surrounding us reality. Therefore if we want to find an answer to an eternal question: «Who we are in reality? Who or what provides the whole process of our subterransive Self-Consciousness?» — we need to go into these Notions even deeper to some virtual «coordination center» which provides our manifested subjective Existence not only in the given diapason of dimension, but also in the multitude of Forms of other Levels of Self-Consciousness.

3.0214. Where is that mysterious «Spiritual Center» located? In the most universal «part» of our Self-Consciousness coordinating and svilgs-spherationally spreading through realizational spectrum of our Stereo-Form all the content of «current» qualitative component (TEC) of personalistic Focus Dynamics of our every «personal» Interpretation. That conditional «Spiritual Center» which is not possible to correspond to any point of Space-Time, I subjectively determined as VEC or variable ethereal component of any focused by Us Self-Consciousness Form, which simultaneously «projects» by its interconnections slloogrent Focus Dynamics of all diapasons of dimension of Tertiary, Secondary, and Primary Energy-Plasma seemingly «starting» with Levels of manifestation of the collective Unconscious and seemingly «finishing» with SFUURMM-Forms of Praconscious of Universal AIY-YYA-Entity — of the most universal Form of exuberation of so called Cosmic Human, Which together with endless multitude of the rest TOO-UU-Entities of universal «scope» (Levels of 36–38 dimension) structures Self-Consciousness DDIIUYI-Entity with Its Focus Dynamics.

3.0215. Functionality of synthetic multipolarizational activity of VEC — within lluuvvumic, lluuvvumic-goolgamaaaic, goolgamaaaic, ssmiysmaaaic and aiyyyaic types of birvulyarity — is provided level by level by Form-Creators of all twelve IISSIDI-Centers of our Self-Consciousness (in the systems of Self-Consciousness of Proto-Forms structuring CCIs of other types of birvulyarity, there are own analogs of similar Form-structures, which can greatly differ depending on the degree of diffuzgentness relative to the given Synthesis Schemes — starting with a small difference in some nuances and finishing with a gross difference):

3.0216. Subjectively I denoted that category of synthesizing Form-Creators as chakram personalities (in spiritual practices of Hinduism chakras or chakrams, regulating functions of body and Self-Consciousness, — are points of intercrossing of functional «projections» of subtle Nadi channels via which life Energy or prana realizes). Unfortunately, quite often I have to hear the question: «Do chakram personalities refer to the category of Form-Creators or Info-Creators?» Or such question: «Are they representations of Form-Creators of SYNTHETIC Amplificational Branch or Info-Creators of RESOSCONTIONAL Qualitational Branch?» Those who ask them have not been able to understand yet that NOT a single manifestation of decoherent Energy of Focus of Close Attention of Form-Creators of SYNTHETIC Branch is possible *in any way* without its informational supply with resonational activity from the part of Focuses of Dual Reflection of Info-Creators of RESOSCONTIONAL Branch. Therefore, when I speak about UU-VVU-copies, SFUURMM-Forms and UU-VVU-conglomerates of OLLAKT-DRUOTMM-systems (or FLC), by chakram personalities I mean Creative Activity of Info-Creators, and *in all the rest cases (observation of energy-informational interconnections) by that term I mean Form-Creators of Focal Dynamics of different Self-Consciousnesses Forms*. Besides, in vast diffuzgentness in providing Focus Dynamics of Form-Creators of SYNTHETIC Branch by different-Qualitative informational interconnections there inevitably, though in different degree (depending on the degree of objective compatibility), participate Info-Creators of the rest eleven Qualitational Branches of development.

3.0217. Informational basis of functional providing of Focus Dynamics of Form-Creators of IISSIDI-Centers is structured by Creative Activity of following Info-Creators:

- **KKKHU-LLKHU**-Info-Creators (informationally provide focal combinations of iskons and SLUIIY-SS-LAA-Creators of Quaternary Energy-Plasma),

- **SLUI-SLUU**- Info-Creators (informationally provide svilgsons in the process of exhibition of all SLAA-SS-MII-Creators of Tertiary Energy-Plasma),
- **GLLAA-GLLII**-Info-Creators (informationally provide manifestation of avvaklons and SSLOO-SS-SNAA-Creators of all Self-Consciousnesses Forms of Secondary Energy-Plasma),
- **UUYG-UUYU**-Info-Creators (due to the presence in their ethereal Configurations of high-informational Potential provide flaagtuons in the processes of Synthesis with high vibrational SSUI-SS-SFAA-Creators of Primary Energy-Plasma).

3.0218. Thus, jointly with resonationally corresponding to them synthesizing Form-Creators, they form Universal Mechanism of informational support of the Process of exhibition in all possible conditions of Space-Time of countless types of different-Qualitative Spheres (i.e. types of Creative Activity peculiar for each of the considered mega-diapasons) of deep intra-Qualitative and inter-Qualitative Synthesis:

UUKKKHL-SS-KKHKHOO — for SLUIY-SS-LAA-Creators (below conditional zero dimension),

EIYG-SS-MII — for SLAA-SS-MII-Creators (from 0.0 to 12.0 dimension),

NAA-GLLII-UU — for SSLOO-SS-SNAA-Creators (from 12.0 to 24.0 dimension),

SSUU-SS-VUU — for SSUI-SS-SFAA-Creators (from 24.0 to 36.0 dimension).

3.0219. Who are they, these Creators? these are also cognitive «interpretations» of all possible Fields-Consciousnesses, comprehensively representing in Focus Dynamics of DDIUYI-Entity absolutely all Self-Consciousnesses Forms including «You and Me» only incomparably more realistic and more self-conscious (except for Form-Creators of two lowest IISSIDI-Centers — ARGLLAAMUNI and INGLIMILISSA) than «present» us. Thanks to them («future» Us!) the whole process of simultaneous Multipolarization of Focus Dynamics of our Stereo-Form is carried out — through endless multiple different-Qualitative «personal» Interpretations structuring all possible subterraneous scenarios of our inertial (in the conditions of Tertiary Energy-Plasma), but endless by its Principle, Self-Consciousness Existence.

3.0220. What does it mean in practice of our «personal» subjective Perception? For example that «I» as «personality» consciously and different-Qualitative, *simultaneously* exist both here and in other «points» of Space-Time, in Worlds' Form-systems and subjective Realities of multiple other STC groups. Me «there,» as well as me «here,» definitely and undoubtedly consider that «I exist,» «I live.» Nothing — neither «here» nor «there» even for a single moment can shake my absolute confidence that I in my subjective self-perception — is the real «personality,» free to make any decisions regarding my own realizations, form any opinions, think and act as I choose to — from the multitude of other variants of provided to me opportunities. Those by their energy-informational Essence are main signs of what we — yet in a very primitive and superficial way — mean by the term «Existence.»

3.0221. Chakram personalities — these are Something more general, much more global, deep and universal in the Mechanism of Our eternal Existence, than any presently simultaneously focused by Us Self-Consciousnesses Forms (including all types of NUU-VVU-Configurations of «our» biological «personalities»); these is What has possibility to simultaneously and consciously manifest in the multitude of different-Qualitative Levels of Macrocosmos through Focus Dynamics of all Self-Consciousnesses Forms; these — in more qualitative Forms of their exhibitions — in fact TOO-UU-Entities of all possible (and not only peculiar to us!) types of birvularity, informationally representing in slloogrent Focus Dynamics endless kinds and types of different-Qualitative cosmic civilizations (not only human and humanoid, but also those realizing Schemes of inter-Qualitative Synthesis peculiar to other Proto-Forms).

3.0222. Their slloogrent ethereal Configurations structure all the countless Spheres of Creativity of OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes: Form-Creators of every Self-Consciousness Form of subterraneously peculiar to them FD resonationally «derive» from these ethereal Configurations in the process of their TEC — or VEC-unpackings only those combinations of slloogrent interconnections which are necessary to them in the given moment. The rest particular (areas) of their joint slloogrentness are in the same way — resonationally and simultaneously — spread between Focus Dynamics of all the rest «personal» Interpretations and Form-Types. Chakram personalities do not belong to some certain Self-Consciousnesses Forms, they differ from each other only via observing them subterraneously subjective Perception system — according to peculiar specifically to that «personality» type of psycho-mental kleksing. In reality, seemingly «one and the same» chakram personality can be simultaneously and in a different way kleksed by multiple Proto-Forms.

3.0223. Who are they? Due to the slloogrentness of their f-Configurations it is impossible just to list them. However, in the Sphere of Creativity of Focus Dynamics of SLAA-SS-MII-Creators of Tertiary Energy-Plasma (from 0 to 12 dimension) it is possible to designate separate types of *Form-Creators* directly participating in the formation of all possible Directions, sub-kinds, kinds and sub-types of lluuuvvumic birvularity type. In particular, those are the Same Fields-Consciousnesses Which I already mentioned earlier: *immnaillms* — 11–12 dimension (structured by *lyuullffs*), *ssdoistms* — 10–11 dimension (structured by *iissmms*) *akhbakkralms* — 9–10 dimension (structured by *peeppts*), *eyyeyegsses* — 8–9 dimension (structured by *iyymiyls*), *aussdvullses* — 7–8 dimension (structured by *pruuissses*), *ayassmasses* — 6–7 dimension (structured by *orfrovts*), *iillviyvs* — 5–6 dimension (structured by *vuoldses*), *iskons* — 4–5 dimension (structured by *flakses*), *photons* — 3–4 dimension (structured by *irkkulls* — «waves»), *uykkuys* — 2–3 dimension (structured by *doollses*), *afhtaksts* — 1–2 dimension (structured by *loolgses*), *urgluksts* — 0–1 dimension (structured by *protofses*).

3.0224. When I use such a subjective notion as «personalities,» not only relative to Form-Creators, but also to Info-Creators, I want, first of all, to emphasize the *potentially-synthetic* Nature of *universal exhibition* of Fields-Consciousnesses of RESOSCONTIONAL Qualitational Branch in spatial (skrruullerrt) structures of Macrocosmos (formed by Form-Creators of SYNTHETIC Amplificational Branch), which (RESOSCONTIONAL Qualitational Branch) absolutely does not depend on the substance of Time (because what we determine as «Time» is a reflection of subjective parameters of dissonational distances conditionally «separating» liyllusceve states of simultaneous «local» projection-reflection into the system of Rezomirals of different-Qualitative Information or subterraneously Interest). Secondly,

thus I would like to underline such their characteristics as the ability only to strictly subterraneous manifestation in FD of any Self-Consciousness Form, which in every system of subjective Perception inevitably «imposes» on them some «personalistic» tendencies. However, you should not forget that any specific examples of «localization» of manifestation of various combinations of ethereal Configurations of Info-Creators in Space-Time are determined for them only by their resonational peculiarities relative to specific qualitative indicators of focal Configurations of Form-Creators, and it does not matter for them in specifically which sllougment «area» of general skrruullerrtness, structured by a particular Time Flow that interaction is carried out.

3.0225. Let me repeat once again: thus all chakram personalities which represent informational part of focal Configurations of all Worlds' Form-systems cannot be viewed in isolation from Focus Dynamics of Form-Creators, through which they simultaneously realize in various Time Flows. The fact of exuberance of FDR of Info-Creators in Focus Dynamics (FCA) of Form-Creators of any system of subjective Perception already implies synthetic character of such phenomena (because we always deal not with the Information Itself, Which is always balanced in «Itself,» but only with «projections» of all possible combinations of different-Qualitative informational signs representing mercavgnational part of Its general harmonious State). In contrast to Focus Dynamics of Form-Creators, which has eglleroliftive Nature, all the analogs of manifestation of Creative Activity of Info-Creators (Focus of Dual Reflection, Universal Multipolarized Impulse and so on) are initiated by irrkoglective Impulse-Potential.

3.0226. Returning to the considered by us question of the subjective nature of personalistic Worlds of all Self-Consciousnesses Forms and principles of their interaction between each other, I would like to note that the higher (in the correspondence of the given Synthesis Scheme!) is qualitative potential of personalistic Worlds of Self-Consciousnesses Forms structuring the given group of human STC, the less tensor and more universal become the means of collective creative realization in the general Focus Dynamics of subterraneous SFUURMM-Forms of each of these Worlds (because of the increase in the degree of their covarllertness-resonance between each other, due to which rises the stability of already synthesized by them energy-informational interconnections). In Focus Dynamics of more qualitative Continuums of uncountable variants of our joint «future» on the general background of increasing in «personal» Self-Consciousness, intellectuality and altruism, in fact the antagonism between subterraneous realizational Interests of most people disappears (or considerably decreases) and at the same time increases the degree of their mutual adaptedness to all possible needs of other participants of the given STC group, including not only people but fauna, flora and environmental ecology in general.

3.0227. Now when most of you are literally too focused on the process of detailed and renitive Synthesis of only some personal selfish Interests, tendencies, views and positions, your realization abilities leave much to be desired, because at such low degree of awareness of made choices, you can — completely not being aware of that! — strongly and destructively deform not only Focus Dynamics of multiply beings surrounding you, but also Focus Dynamics of the whole group STC (though such variations of so called «degradation» Continuums also exists — on the bases of their Existence Experience there is formed more organized and effective Focus Dynamics of different groups of «progressing» STC). What you currently have to do, is carried out by you yet absolutely differently through completely other possibilities and capabilities than those which each of you in a

natural way will obtain and will be able to use already in not so distant in Time favorable variants of your subjective-subterransive «future.»

3.0228. In Levels of inter-Qualitative Synthesis of three Dominants (State CC Potentiality + ALL-Unity), formed by You in divuyllerrt groups of 4–5-dimensional Continuums, typical of your «present» life creativity personification and «individualization» is sublimated in incomparably more qualitative modes of exuberation of Focus Dynamics of the uniform Self-Consciousness of all Stereo-Forms structuring f-Configuration of the LLUU-VVU-Entity into the single Sphere of harmonious and fully coordinated collective Creativity, which is diversified and decohered inside itself only according to main development Directions of forming it Self-Consciousnesses Forms extrapolating renitively synthesized Experience of all «personal» Interpretations from subterransive realizational niches of OLLAKT-DRUOTMM-systems into Creativity Spheres of FLUU-LUU-complexes. Signs of subterransive egoism so typical of you nowadays (status seeking, envy, jealousy, resentful temper and others), as well as all the rest tendencies of synthesizing Form-Creators of both lowest IISSIDI-Centers towards depliative realizations will fully disappear in you «future» psychical reactions and intellectual-altruistic mental activity!

3.0229. In our more qualitative «future» there also will be generated own signs of personalistic Worlds, but they will reveal in general Focus Dynamics of STC in a completely different way, than how you can imagine that process now. It is determined by a whole number of specific properties and peculiarities which our «future» translucense Self-Consciousnesses Forms possess. For example, in conditional borders of typical of our FLAKS-Form-Types lluuvvumic Synthesis Direction, «We» in «future» additionally to already existing transmuted combinations of two Dominants (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) will actively start to synthesize (moreover in a much bigger degree, than Aspects of other background PCQs!) not only Aspects of third Dominant ALL-Unity (State CC Solidarity), but also Aspects of Quality-ALL-Integrity (as more perspective — for LLUU-VVU-Forms of 4–5-dimensional STCs — development Direction into next State – CC Cooperation). Different combinations of these Aspects will be in different degree typical of f-Configurations of every focused by us translucense NUU-VVU-Form.

3.0230. However, even in that case each of us will be able to clearly perceive own self only through identification with some certain Directions of realizational creativity which will add to every «moment» of Our Collective Existence a certain sign of subjective subterransiveness, «exclusiveness,» «detachment.» Each of these Direction implies in more degree Synthesis of some particular Qualities, for example, ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence with Aspects of Qualities ALL-Unity and ALL-Integrity (or ALL-Unity + ALL-Aspiration, or ALL-Unity + ALL-Essentiality–ALL-Permeability and so on). Each of these Processes is carried out in the same Levels of Creative Activity of Energy-Plasma in a completely different way, being in a huge dependence from the realization of Our Interests and preferences in those Direction which we choose «every moment.»

3.0231. Personalistic dynamics of these creative Processes in every focused by us NUU-VVU-Form is provided energy-informationally in a different way as well, because each f-Configuration possesses own activity of Form-Creators, for each f-Configuration there were initially determined own specific mechanisms for achievement a necessary result, which do not absolutely in any way

remind anything we are doing «here,» in our «current now.» The only thing that unites them with our «present» state is a compulsory presence of refocusing dynamics of Form-Creators of focused by Us Self-Consciousnesses Forms.

3.0232. Subjectively Aspects of Quality ALL-Unity might be characterized in at least such a primitive way: we in every certain «present» moment are simultaneously and in a definite way focused in a countless multitude of transgressed in Time and diversified in Space specific Self-Consciousnesses Forms. It means that in our subjective «personal» Existence there are countless multitude of signs, mutual for all the rest of our «personal» Interpretations, which in all its diversity forms in slloogrentness of Space-Time Something Uniform conditionally differentiated into some types of «localities» only in our own Perception system.

3.0233. Therefore, we can say that ALL-Unity — is the Principle providing skrruullerrt structure of Macrocosmos a certain general «similarity» and global «identical nature» of everything that we subjectively perceive as «separate,» «different» and ««fragmented.» That Unity lays not in the constructions of discrete Forms which are in all possible parameters may very strongly differ from each other, but peculiar to energy-informational content of Focus Dynamics of structuring them Form-Creators, which simultaneously «projected» into f-Configurations of all Self-Consciousnesses Forms.

3.0234. In other words, all, simultaneously focused by us, «personalities,» by their energy-informational Essence are very different: each of them is represented in Space-Time by own NUU-VVU-Form, which belongs to a countless multitude of different-Qualitative NUU-VVU-Form-Types of your LLUU-VVU-Form. It does not mean that all «you» — so different in appearance and subterransive inclinations «personalities» — can be combined into one Form having originated something single — «materially integral.» ALL-Unity is the set of specific signs subjectively manifested through the same diapasons of thinking and feeling, due to which in Focus Dynamics of multiple Self-Consciousnesses Forms there resonationally forms similarity of main Goals and Tasks, similarity of SFUURMM-Forms simultaneously used by different Form-Creators for universal creative manifestation in all possible Levels of Energy-Plasma.

3.0235. At consideration of that notion (ALL-Unity) through Focus Dynamics of Form-Creators which provide our more harmonious rotational Cycles, there is no question of creative realization of peculiar to it signs in low nutation Levels — in the conditions of exhibition of octahedral-hexahedral constructions of Forms in 2.4–3.25 dimension we deal not we inter-Qualitative Synthesis (for example, ALL-Love–ALL-Wisdom + ALL-Unity or ALL-Will-of-ALL-Intelligence + ALL-Unity), but with intra-Aspect and inter-Aspect (of the same Quality!) types of intra-Qualitative Synthesis of the given PCQ, which in our low qualitative Focus Dynamics may be reflected only through sub-Aspects or separate yet not completely synthesized Aspects that do not possess the complete set of signs peculiar to the given Quality. Therefore any of yet not completely synthesized signs of the observed by us Quality can manifest only in the most primitive way.

3.0236. For example, in the contemporary society people can form some single entities for joint commerce activity in order to fight or plunder, build something or, in the contrary, demolish. Such

primitive signs of a certain commonness and collectivism are not the signs of manifestation of Aspects of Quality ALL-Unity, energy-informational Essence of which start to consequently realize only through Form-Creators of more qualitative Levels of our Self-Consciousness forming in Space-Time hexahedral-icosahedral and icosahedral-dodecahedral modules of exuberation of our Forms (3.75–4.25 dimension).

3.0237. In any selfish type of life creativity there cannot be any manifestations of these Aspects, just in the same way as in rough sexual and aggressive realizations there are no objective conditions for entire manifestation of Aspects of PCQs ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence (there realize only separate components of Aspects — their sub-Aspects). Presently focused by us groups of STCs are formed in the conditions of 2.5–3.75-dimensional diapason (while in 3.5–3.75-dimensional resopasons there realize mostly SFUURMM-Forms of Form-Creators synthesized from Aspects of our two Dominants), therefore they provide Focus Dynamics of our (and others) Self-Consciousnesses Forms only with most primitive Levels of identification of general signs (homogeneous Aspects) of each of the rest ten OO-UU-Entities, which are vecsative (background) in our type of subjective Reality — to form more ampliative SFUURMM-Forms out of presently available for our Perception signs, Form-Creators of existing «here» Self-Consciousnesses Forms should have in their focal Configurations much more covallert combinations of focal-ethereal interconnections, more harmoniously representing in the given Synthesis Scheme all vecsative PCQs.

3.0238. In the processes of realization of our subjective Perception everything depends on the qualitiveness of used by us signs towards the specificity of carried out by us Focus Dynamics. For example, a group is working on one project: everyone does the work by itself and gets wage corresponding to the degree of participation in the given project. Everyone is interested only in doing own thing — for what he gets money. Such realizations do not reflect attributes of PCQ ALL-Unity. We can call these realizations differently: materialism, survivability, adaptability, diligence, integrity, herd mentality or, after all, primitive collectivism, but only not ALL-Unity. These can be signs peculiar to some other PCQs (for example, ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Abundance–ALL-Fullness) which are subjectively interpreted by you as «tendencies to unity.» Attributes of PCQ ALL-Unity only start to show its Creative Activity through your FD where your subjective egoism *fully* gives way to some objective, unified and much more ampliative Goals and Tasks than your own.

3.0239. Only on the higher Levels of our eternal Existence when we naturally stop fixating our FCA in presently usual for us mixtum analogs of NUU-VVU-Form-Types and Form-Creators of our Focus Dynamics *svilgs-spherationally* «reproject» into certain subterraneously-common creative Flows structured by dimidiomittense and translucense FLAKS-Forms, all the Aspects of OO-UU ALL-Unity become available to our Perception systems and activate to exuberation through collective Creativity of all high-qualitative Form-Creators of our the LLUU-VVU-Entity. In other words Aspects of OO-UU ALL-Unity, which belong to other group of PCQ-compatibility, may start peculiar to them resonationally-humanational activity with combinations of Aspects of OO-UU ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence only in the case of their high nutation — the most ampliative for the given conditions — mode of exuberation, when, as a matter of fact, in FD of «personality» there start to form real prerequisites for triple invaderentness (Synthesis of three lluuvmic Dominants) and concatenational formation in focal NUU-VVU-Configurations of all the multitude of covallert interconnections typical of State Creative Cosmic Potentiality.

3.0240. That specific State signals the Transition of Focus Dynamics of lluuvvumic Form-Creators from dimidiomittense analogs of NUU-VVU-Form-Types to translucense analogs. That specific frontier in the process of development of Collective Consciousness of humankind is typical in the given diapason of dimension only for those people whose FD is stabilized in the Processes of inter-Qualitative three-invaderental Synthesis of two basic lluuvvumic Dominants (ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence) with high nutation signs of Dominant ALL-Unity. Even more ampliative, than considered by us here, sates for the transition to translucense NUU-VVU-analogs ought to be reached by those people whose Focus Dynamics renitively «rooted» into signs Synthesis Direction of such OO-UU as ALL-Essentiality-ALL-Permeability, ALL-Primordiality-ALL-Initiality, ALL-Mobility-ALL-Presence, ALL-Knowledge-ALL-Informedness and ALL-Abundance-ALL-Fullness, which signs relative to each lluuvvumic Dominant show even greater degree of imperseptness than attributes of PCQ ALL-Unity. Three-invaderental Synthesis in those development Directions of NUU-VVU-Form-Types becomes possible only in the conditions of 4–5-dimensional diapason.

3.0241. I should note that for Self-Consciousnesses Forms representing in our s-Reality other Proto-Forms such Transitions of Focus Dynamics of Form-Creators of the given diapason from two-invaderental Synthesis Scheme into three-invaderental one are possible not only in high nutation mode (from 3.75 to 4.0 or 5.0 dimension), but also at the exhibition of FD of those Proto-Forms in less ampliative Levels (from 2.5 to 3.75 dimension). The point is that in the given diapason of exhibition of NUU-VVU-Form-Types and beginning of inter-Qualitative Synthesis of f-Configurations of human s-Realities, qualitative parameters of some protoformal development Direction duvuyllerrtly-diffuzgently transform into Worlds' Form-systems which properties (by the type of structuring focal-ethereal interconnections) in *our* STC groups can be equated with properties of 4.0–5.0-dimensional diapason. That means that the processes of inter-Qualitative Synthesis and formation of hexahedral structures from energy-informational interconnections starts realizing in those Directions much earlier — not in 3–4-dimensional diapason, but already starting from 2.5-dimensional Levels.

3.0242. In that most difficult Form-building Process a huge part is played by the factor of diffuzgentness: degree of compatibility of signs compatible in the *given specific conditions of exhibition* of OO-UU-Entities. Hexahedral RezoMirals (including human) are not something strictly limited by their parameters, properties and realizational possibilities, but represent different-Qualitative diffuzgent «combination» «penetrated» from inside by an endless multitude of focal-ethereal interconnections of octahedral, icosahedral and dodecahedral Form-structures duvuyllerrtly transiting into each other. There can be no clear boundaries in any hexahedral (and others) Worlds' Form-systems!

3.0243. In the most difficult process of inter-Qualitative structuring of f-Configurations of all possible Self-Consciousnesses Forms, everything depends on the degree of covarllertness of signs of two synthesized by Proto-Forms Dominants — covarllertness not only between each other, but also relative to the signs of one of currently vecsative for them PCQ, which — *in the given mode of exhibition* — shows all the tendencies typical of the potential candidate for the role of the third Dominant. When interconnections are formed between Focus Dynamics of Form-Creators reflecting signs of OO-UU-Entities belonging to *one* group of PCQ-compatibility, the transition from mixtum to

dimidiomittense and then into translucense (or into *transparentive* — *for other Proto-Forms*) Form-Types can be carried out also in the conditions of lower Levels of dimension (from 2.5 to 3.75).

3.0244. For example, Form-Creators of OO-UU ALL-Love–ALL-Wisdom and ALL-Integrity structuring ASTRAL-Plasma, besides of that, also belong to one group of PCQ-compatibility. Therefore, concate development of Focus Dynamics of Proto-Forms of Self-Consciousnesses synthesized by Form-Creators of these two OO-UU in the Direction of their creative confluence with FD of Form-Creators of, for example, OO-UU ALL-Will-of-ALL-Intelligence or ALL-Aspiration (which although structuring MENTAL-Plasma belong to the same group of PCQ-compatibility) already on the first stages of carried out by them inter-Qualitative Synthesis have high enough realizational Potential for the formation in the jointly structured by them f-Configurations a huge multitude of covarllert interconnection, which are capable to quite stably realize in both dimidiomittense and transparentive Forms of exiberations. The same can be said about availability of huge possibilities for joint creative — three-invaderental — realizations in our diapason of dimension among Form-Creators of such OO-UU, as for example: ALL-Unity and ALL-Essentiality–ALL-Permeability, ALL-Primordiality–ALL-Initiality and ALL-Mobility–ALL-Presence, ALL-Knowledge–ALL-Informedness and ALL-Abundance–ALL-Fullness, — which also belong to the same group of PCQ-compatibility.

3.0245. Though relative to that diapason of exiberation where we currently subjectively focus, Proto-Forms of Self-Consciousnesses synthesized by these Schemes — *visually for us!* — reveal themselves as dimidiomittense or even transparentive, this does not mean at all that their f-Configurations and SFUURMM-Forms structuring their FD represent — *in the given diapason of dimension!* — equally ampliative combinations which represent our «future» human NUU-LL-VVU-Forms and all the more our FLAKS-Forms. Due to the high degree of covarllertness between each other, the third Dominant in those Self-Consciousnesses Forms has begun to quite early take active part in the formation of FD and thus it subterraneously has determined for them less *corporal* (physical, material) types of exiberation. However, along with this the absence in their FD of multiple other covarllert interconnections with OO-UU-signs, which belong to other group of PCQ-compatibility, does not let them to form in their Self-Consciousness such SFUURMM-Forms which would lack various degree of inversuality (of duality, contrast) initiating in their FD all the possible types of selfish realizations (hatred, resentful temper, aggression, vindictiveness, cynicism and similar).

3.0246. This also regards the creativity of many others — both terrestrial and extraterrestrial — cosmic civilizations which Self-Consciousnesses Forms exiberate in our type of Space-Time as virtual or transparentive (i.e. incapable to visual manifestation in aspectable for us part of spectrum of optic diapason). Their invizuality (invisibility or amorphism — obscure visibility) for us and connected with that extraordinary abilities (permeability through material objects, teleportation, telepathy, hypnosis, telekinesis and others) does not always represent an indicator of their high (relative to our level) degree of amplificational development, but are only consequence of the specific — three-invaderental — combination of SFUURMM-Forms, which they actively manipulate in their FD. Therefore, many of these Self-Consciousnesses Forms are capable to hostile and destructive reactions and actions specifically motivated by them as ensuring of their own safety and perceived as the necessity for realization of their Interests.

3.0247. In fact, Self-Consciousnesses Forms of some Form-Creators *observative* to our Synthesis Scheme (Curators in the diapason from 2.5 to 3.5 dimension) can also be referred to the same category of transparentive exuberation, which in the process of Synthesis of two lluvvumic Dominants in a certain degree «shifted» via their FD into such development Directions where the activity of signs of the third Dominant is capable to manifest earlier than in the Direction of Synthesis with signs of OO-UU ALL-Unity. To such types of exuberation one can refer those part of lluvvumic birvularity type which is formed on the basis of joining to two basic lluvvumic Dominants (as a third Dominant) of one of the following PCQs possessing relative to them more compatibility degree, for example, such as: ALL-Steadiness–ALL-Stability, ALL-Voidness–ALL-Vacuumness, ALL-Integrity, ALL-Aspiration.

3.0248. These observative Form-Creators are also, just like us, actively focus in f-Configurations of NUU-VVU-Form-Types, but relative to our mixtum Forms, they are exuberated seemingly in three-invaderental analogs, synthesized by different, most covallert for the given Synthesis Scheme Directions of lluvvumic birvularity type. Via their Self-Consciousnesses Forms they form all the diversity of «own» types of human civilization and organize by peculiar to them ampliative FD all possible *expiative* types of «physical» Worlds' Form-systems and human s-Realities, in more degree free from those depliative realizations peculiar for our «current» groups of STCs.

3.0249. Let me repeat once again: attributes of PCQ ALL-Unity can start to synthesize in FD of mixtum analogs of NUU-VVU-Form-Types only after the results of two-invaderental Synthesis between Form-Creators of basic lluvvumic Dominants (ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence) will reach high nutation Levels of exuberation — till we are able to experience these states in our FD, we build our «current» subjective Notions about typical signs of the given PCQ on the basis of manipulating with more available for us and more covallert relative to our Synthesis Scheme signs of such OO-UU as ALL-Integrity and ALL-Steadiness–ALL-Stability.

3.0250. Particularly most depliative realizations of these two signs (corresponding to qualitiveness of our own FD) we interpret as «herd mentality,» «clanishness,» «collectivism» «creative union,» «political solidarity,» «economic community,» «mutual support» and so on. Attributes of PCQ ALL-Unity, due to their imperseptness to our Dominants, start to gradually open in FD of our Self-Consciousnesses Forms only at its continuous stabilization in ampliative SFUURMM-Forms of 7–8 karmic Channel structuring third Levels of ORLAAKTOR- and AIGLLILLIAA-Iissiidi.

3.0251. These signs providing more amplificational Levels of our Human Existence can be compared with a certain thick rope formed from countless intertwinements of very-very subtle threads, each of which is focused by us Self-Consciousness Form. Every thread is by itself very thin and very delicate in order to continuously support and stably provide focal-ethereal interconnections between FD of all NUU-VVU-Form-Types of our the LLUU-VVU-Entity in multiple Time Flows.

3.0252. Therefore, simultaneous interaction between all different-Qualitative NUU-VVU-Form-Types can be consciously carried out only via manipulation of the properties of entire «rope,» which becomes possible only at the presence of high nutation interconnections between FD. When we create in our FD potential for Synthesis of not only sub-Aspects, but also Aspects of that PCQ with already partially transmuted between each other Aspects of two our Dominants, we will be able in

our subjective Perception purposefully, without refocusing from the given Synthesis Scheme, cognize all possible different-protoformal Existence types.

3.0253. FLAKS-Forms of Our «future» collective Creativity, carried out on the level of our subjective Understanding and Perception of «ourselves» as People (with capital letter), represent what we now can refer to only the most daring and deep Conceptions about Worlds' Form-systems, revealed in Macrocosmos with an entire peculiar to them set of typical realizational properties and possibilities and also multisided different-protoformal life activity with its subterransive (relative to the rest Worlds' Form-systems) energy-informational filling conditioned by the processes of already not two-invaderental as «here» but three-invaderental Synthesis in Focus Dynamics of structuring them FLAKS-Forms of Self-Consciousnesses. Form-Creators of each Worlds' Form-system also have their specific Mechanisms for the successful realization of own part of general eglleroliftive Plan of consummatization, which (Mechanisms) also can be conditionally correlated with the functions of our IISSIDI-Centers. However that is already much more universal energy-informational formations than those from our lower Centers, which chakram persons provide our «current» Focus Dynamics.

3.0254. IISSIDI-Centers by organizing them Nature and energy-informational structure are like Stars and Galaxies, which simultaneously spread peculiar to them Focus Dynamics through different-Qualitative Form-Creators into multiple different-type Universes, into different Levels of dimension of Space-Time. They are not just some often referred to as «psychical centers» that appear to «be located» in our biofield providing all our psycho-mental and physical activity. No, they are much more than everything that is at least in some degree within our subjective Perception. When the source of local generation of «biofield» (FD of Form-Creators of Self-Consciousness of Form) disappears by some reason in the given «point» of Space-Time, there also disappears «manifestation body» of the given electro-magnetic emanation from the process of manifested vital activity of a huge group of STCs, subjective Realities and Worlds' Form-systems.

3.0255. This Universal Field Consciousness (UFC) is typical of us all and informationally, creatively interconnects Focus Dynamics of Form-Creators of our Self-Consciousnesses Forms with FD of Form-Creators of not only surrounding us Proto-Forms, but also of Form-Creators of Self-Consciousnesses Forms that structure other Planetary, Stellar and even Galactic systems! the lack or absence of some Information (SFUURMM-Forms) among bio-Creators and Form-Creators that organize Perception systems of our «current» NUU-VVU-Form-Types, is explained not by its absence in informational Space of our Self-Consciousness, but deactivation in our Focus Dynamics of focal-ethereal interconnections with Form-Creators of corresponding more ampliative by their functionality IISSIDI-Centers, which act as their specific carriers. We can say that UPS is the Mechanism of simultaneous exuberation of USCF (Universal Self-Consciousness Focus), its universal formative basis.

3.0256. With the help of this Field-Consciousness it is possible to interact in own frequencies diapason practically with any other Form of Collective Intelligence, because it is also subterransive, but connected with you via powerful force communications — invizusal, but allowing to instantaneously carry out what in which you in the given moment experience the highest necessity in creative self-realization. At invaderental manifestation of Aspects of Quality ALL-Integrity (CC Cooperation: CC Solidarity + ALL-Integrity) in the structure of Self-Consciousness in generalized Self-Perception of Your VUOLDS-Form there already does not exist any subjective division into «Own» and «someone else's»

— sporadic — Flows, but there is only holistic experiencing of «Own Self» accompanied by awareness of simultaneous creative self-manifestation in a countless multitude of some Self-Consciousnesses Forms, which are also perceived by You absolutely holistically as a part of «Own Self.»

3.0257. This experiencing of «Own Self» as a single and only Creator in Universe gives Us a real opportunity to comprehend Ourselves as WHAT we in our «present» subjectively refer to as «highest Divine Presence»... In reality these are only rough «projections» of high-qualitative spiritual vibes of «Us future» incomparably more perfect and developed than «now.» of course that Self-perception as «SOMETHING HOLISTICALLY-INTEGRAL» is not the State Which is extremely primitively interpreted by «people» as higher Notion about «God» or «Absolute»: if we can call Something «God,» it is Energy-Information realizing through Self-Consciousness of SSS-Entity. All Self-Consciousnesses Forms and CCIs, structuring by their Focus Dynamics countless different-Qualitative space-time Levels of dimension, are only component Self-Consciousness creative Elements of What should be understood by that slloogrent notion — «God.»

3.0258. Right «now» countless number of your different-Qualitative «personal» Interpretations structure (exist) via their NUU-VVU-Configurations simultaneously both the given scenario of development and multiple other scenarios, which you, decoherently focusing in «own» World, subjectively perceive as other variants of your mutual — *single and eternal* — Existence. You used to consider that you live and realize only «here» in that perceivable by you World, and if somebody from the surrounding you «people» «dies,» you consider yourself to remain alive and someone else to be «dead.» However that subjective perception is only an Illusion conditioned by imperfection and narrowness of your Perception system, which yet does not let Form-Creators include a wider spectrum of your simultaneous Existence in their Focus Dynamics!

3.0259. Presence of similar limitations indicates only low qualitiveness of these Form-Creators, which are not capable due to their strong inertness (high tensoriness of interconnections structuring their f-Configurations) to promptly process such huge volumes of Energy-Information. Therefore they resonationally «take» from the entire slloogrent TEC-Flow and «unpack» in Self-Consciousness only SFUURMM-Forms of those «current» events which are characteristic for only one variant of qualitatively multipolarized scenarios, and in particular those that most correspond to already available in their Configurations Notions (Experience). The rest variations, though are partially fixated by them, remain beyond realizational capabilities of NNAASSMM and VLOOOMOOT of the given specific «personality» and therefore cannot be anyhow subjectively reflected in its Perception system.

3.0260. In general, diapason of Worlds of you «current» presence is quite wide and includes Sphere of Creativity of chakram persons starting from the lowest Levels of ARGLLAAMUNI- and INGLMILISSA-Iissiidi and finishing, though in much lesser degree, with Sphere of Creative Activity of Creators of middle Levels of ORLAAKTOR- and AIGLLILLIAA-Iissiidi. Correspondingly, each of you in more degree inclined either to egoism, primitive deliberativeness and instinctive reactions (which include all possible protoformal manifestations that you interpret as intellect, self-sacrificing attitude) or to high-intellectual creativity and conscious Altruism, though these notions, regarding high degree of subjectivism of Form-Creators of your Perception system, are also quite relative and conditional.

3.0261. In *subjective* basis of *conditional* notion about simultaneous existence in the structures of «our» Space-Time Continuum (and also in all the rest) of countless multitude of personalistic «own» and sporadic Worlds, specifically directed for every «human personality,» I put exclusively illusory ability of each of you to put only own self first in those objective processes that actually regulate all the current circumstances of your Life. I underline here the words «subjective» and «conditional,» because *objectively* there are no such personalistic Worlds purposely formed by *Someone* or *Something* for every «person» in multi-dimensional structure of Macrocosmos. However, at the same time they belong not only to our Imagination. This illusory impression about their existence is inevitably formed as a consequence of exuberance in Focus Dynamics of Form-Creators of Energy-Plasma of the given diapason of some peculiarities of that structure, and also as a result of the presence in Self-Consciousness of every «personality» of universal mechanism of refocusing, which is activated every moment by very specific set of SFUURMM-Forms typical of life creativity and World perception of each of us in subterraneous rotational Cycles.

Chapter 8. Sporadic Worlds

3.0262. Vivid example of stable penetration of Focus Dynamics in «someone else's» (that is sporadic) personalistic Worlds and stable staying in them of Focus Dynamics of «personality» can be all little children, who do not have yet own principles and outlook on things and have to be guided in their choices, reactions and preferences only by those SFUURMM-Forms which are extensively imposed on them not only by each of surrounding them relative, but also by all the other people. Until the child learns to independently define what is «good» and what is «bad» (no matter, for himself or for his family, friends, society, world in general) he or she will have to constantly stay in a powerful dependence from qualitative state of someone else's sporadic Worlds, in fact fully relying in his choices, preferences and Interests on someone else's opinions, views, priorities in values, Notions and relations. His own opinion is almost never taken into account by adults and considered serious, as it is believed to be incompetent and naïve, i.e. is not supported by own empirical Experience.

3.0263. Seeing similar unserious attitude to own opinion child instinctively closes from the outside World and withdraws into himself trying in vain to protect «own» personalistic World from pushy, caddish and disrespectful intrusion in it from the side of adults, whoever they are for him. These fragile attempts most frequently are doomed to fail, because no adult or even teenage does not take seriously little kids. With such attitude we, in fact, have turned all little children into hostages of imperfect views, ignorant notions, selfish attitudes and status-seeking choices.

3.0264. Thus they live for the time being in «someone else's» Worlds, and if something happens to them («Death,» diseases, traumas, dramatic and extreme situations, accidents) there is not their fault in that, because all these circumstances of their «personal» Life are not the results of their conscious choices, but initially programmed by the conditions of those development scenarios, which were chosen for them by either their parents, elder brothers, sisters, or neighbors or just a teenager in the street. Very often adults forcibly make little children do what they themselves do not want to do. If the child had other Notions about a certain situation and if he had a real opportunity to refuse to make

what he «personally» considers wrong, it is possible that he would be able to easily avoid many tragic events in his Life.

3.0265. However, together with that in Life of modern society relationships of many children with their parents and relatives represent a vivid example of how easily adults themselves become constant hostages of selfish and unpredictable, far from the perfection personalistic Worlds of their spoiled and capricious children, who unhesitatingly manipulate them on the slightest of questions or pretexts, where their personal Interests are involved. These relations more resemble not relative relations, but commands of hysterical boss to their subordinates, who just do not have any right to object or have own opinion.

3.0266. Usually such dominant individualism powerfully supported by egocentric SFUURMM-Forms of greediness and resentful temper, envy or jealousy, self-conceit and arrogance results in the most dramatic and tragic outcomes for all the participants of such one-sided relations, because egoism, impulsiveness, no predictability and inexperience of manipulator definitely initiate intensification of refocusing of all «subordinated» into protoformal Directions (usually — immediately into multiple non-lluuvvumic Directions). Exactly that situation I refer to when I mention subjective «staying» of people in compelling circumstances, created by disharmonious SFUURMM-Forms peculiar to Focus Dynamics of Form-Creators of someone else's sporadic Worlds.

3.0267. Existing difference which is discovered during subterraneous psychical reactions of different people on one and the same manifestations of surrounding Life can be explained by the fact that each of us observes events based on «own» Notions, via which he or she has formed «own» personalistic World. Though these «personal» reactions qualitatively very strongly differ from each other, nevertheless they are incomprehensibly connected between each other by one and the same circumstances and events, closely «interwoven» and «connecting» all people, animal and plants with each other on the Levels of actively realized by them emanations, psychonations and karmonations (Thoughts, Feelings, Desires, Words and Actions). In addition, the more qualitative is Focus Dynamics of «personality», the clearer, deeper and sooner that «personality» will be capable to recognize — in every moment of changing each other events — those (perhaps, completely elusive for others) characteristic signs by which «its own» personalistic World (thoroughly formed by it based on its established life priorities and values) differs from sporadic Worlds of other people.

3.0268. Each of representatives of different kinds and types of animals realizing through all the multiple subjective Notions typical of their Self-Consciousness Form also forms own perception of surrounding reality in the identical way, and relative to signs of different-Qualitativeness of their Focus Dynamics we can also use such terms as «own» and «someone else's» Worlds. For example, if a person enters a stable and very close psycho-mental contact with its pet, their Focus Dynamics can intertwine on the level of SFUURMM-Forms structuring their personalistic Worlds. Experiencing a very strong attachment, unreasonable (to the demonstration of obvious foolishness) love to an animal, its owner can become just a participant of «a crowd of extras» in personalistic World of that animal and thus go to a state of huge dependency from specific wishes, needs, and even just «innocent» caprices and pranks of the pet, which may result not only in the harm from such upbringing done to other animals, but also in serious traumas, injuries and even fatal outcome done to people, in particular to little children.

3.0269. Such refocusings into Worlds of own pets are demonstrated by «people» who, for example, visit countless beauty salons for cats and dogs, where at an incredible rates their pets are washed with expensive shampoos, get hair done, a perm, a massage, recoloring, an expensive suit made, and then take them in a special and very expensive restaurant for a meal. Some of such owners leave their domestic animals entire multimillion fortune, not even having a thought that for that money they could feed and dress many people in need, build schools or hospitals, or, in the end, shelters for homeless people.

3.0270. These are just a few of existing in our Life vivid examples of not only the influence of «dog's» and «cat's» Worlds on human's, but vise or verse — forced impact of human Notions on realizational abilities of «cat's» and «dog's» personalistic Worlds, as we just cannot know, or at least even reliably suggest if these animals actually do want to live in such — comfortable from our viewpoint — conditions? these are not them who voluntarily chose how, where and with whom they live, but these are us who using our *human* Notions about well-being, forcedly place them in such circumstances, which cannot anyhow be chosen by them, who strive as cherished Life Goals to uniting with own kind and with nature.

3.0271. People who are guided in their choices by Focus Dynamics of Form-Creators of two lower IISSIDI-Centers (through which realize representatives of cosmic civilizations of ungs and argllaamurs, ssvoouns and inglimilins) and due to that entirely focused only on egoistic-materialistic perception of the surrounding reality, naturally for them consider all the Life circumstances too one-sided and categorical, based only on their own limited perception of each specific situation, and therefore either do not think about such «issues» (about «own» and «someone else's» Worlds), or just not capable to sense these evident for others difference. As a result of the existence of such subjective and often absolutely opposite by their essence views on the same events, Life circumstances of such people are often followed by many cases of misunderstanding and confusion, conflicts and divisiveness, troubles and misfortune, which in all their inevitability and predeterminacy compose for each of them main educational-empirical and spiritually-educational basis, due to which they constantly improve.

3.0272. As it was already mentioned, main Life goals and specific Notions about ways to achieve them differ in much or less degree among various people and sometimes take dually opposite positions relative to the goals and tasks of other people, which, regardless of the degree of their qualitiveness, urgency and usefulness for all the rest society, also remain not less important and valuable for them, than your own — for you. Therefore you in your Life constantly confront with attempts of the direct «interfering» or even rough aggressive «intrusion» in «your» personalistic World of powerful SFUURMM-Forms from sporadic Worlds of all the multitude of other people, not only surrounding you, but actively involved in creative dynamic of your subterransive development scenario (were you, undoubtedly, play the main and decisive role) as a certain necessary — only for you! — «meaningful content» (speaking in a «movie language» as a background, extras, side characters).

3.0273. Manifested together with you in your subterransive scenario, they all «perform» the most diverse «secondary roles»: by their subjective Conceptions, activity and choices, and also objective skills and abilities they create (through the activity of chakram persons of certain Levels of IISSIDI-Centers) a necessary background for your creative realization — as a «main character» in your

scenario. However, you should not forget that you also, as «somebody else's» for you «personalities,» in the same way, willingly or unwillingly, resonationally involve or roughly intrude by your personalistic Focus Dynamics personalistic Worlds of other people (sporadic relative to you), but now already not as a «main character,» but as a performer of a «secondary role» or a participant of various «extras.»

3.0274. In other words, subjectively *appear* not to leave with your Focus Dynamics your «own» scenario (and in reality constantly refocusing into different scenarios of your rotational Cycle that more correspond to your choices), you become participant of someone else's sporadic Worlds. Exceptions are those cases where you in any situations and circumstances continue to persistently and tendentiously hold on to (not necessarily — defend) your principled positions (views, believes, priorities) on every arising for you question.

3.0275. In circumstances of your focusing in sporadic Worlds, you inevitable face an urgent question: WHO ARE YOU? In every moment of your existence you represent either self-conscious Form-Creator, who *purposefully* and *consciously* creates «own» variant of subjective Reality by thoroughly reasoned regulating in Focus Dynamics of peculiar to you SFUURMM-Forms, Thoughts, Feelings, Desires and Aspirations, realizing through your, renitively and specifically perceived by you, choices and actions; either you (in more degree through primitive SVUULL-VVU-conglomerates) express someone else's chaotic, instinctive, impulsive realizations, who only by its own discretion, without consideration of your opinion and interests, activates Focus Dynamics of your Self-Consciousness through egoistic SFUURMM-Forms of karmic Channels of two lower IISSIDI-Centers.

3.0276. Let us assume that you set a very high Goal. In order to achieve it, you should bring your SFUURMM-Forms in full qualitative correspondence with f-Configurations of NUU-VVU-Stereo-Types which structure those Worlds' Form-systems, groups of STCs and development scenarios, where your Goal is *already* achieved. For the promptest realization of that task, you need to learn as renitively and persistently as possible to fixate with your Focus Dynamics in much more specific SFUURMM-Forms of the «picture» that describes all the details of not only your «personal,» but also surrounding your circumstances, accompanying the final realization of your Goal. If someone tries to correct your Focus Dynamics by SFUURMM-Forms and Interests extrinsic to you, you should find forces and abilities inside to be able to go own way, even in most difficult and critical situations, and continue to refocus in the chosen by you Direction of life creativity.

3.0277. It is extremely difficult to carry that out because very often the conditions of your «personal» Life (work, finance, place of residence, faith and so on) fully and in most degree do not depend on your own expectations and preferences, but serve somebody or strictly regulated by someone/something (authorities, work collective, business partners, state, religion, moral laws, rights and so on). However, the most difficult and dangerous is that you very often are mistaken when falling under someone else's strong destructive or just manipulative influence, keep thinking that you still continue moving to the set Goal. No, at insufficient fidelity to principles, resolution, determination, Aspiration to the Goal and Responsibility towards yourself, your Way to the goal will be filled with all possible interferences and obstacles — someone else's Interests and Conceptions, opinions and views, criteria and Wishes, which do not coincide with your «personal» ones.

3.0278. However, very often your impatience, uncontrollable urge to achieve the desired as soon as possible in spite of full absence of psycho-spiritual mechanisms and resources necessary for that, do not help, but powerfully restrain you from advancing to the Goal, as they focus you not on real achievements, but on ephemeral, illusory and far-fetched expectations skillfully fabricated by you Images of yourself. If you are very strongly fascinated by unreal, imaginary perspectives, but not real possibilities, and believe that the desired will manifest in your life in some «miracle» way, without much effort, usually — in the most inopportune moment of imagined by you, Life — all your dreams and plans for a favorable «future» may fall apart as a house of cards under enduring power of objective circumstances — necessary conditions for the realization in «your» scenario of «someone else's» (sporadic) Worlds. Therefore in the beginning of determination and thoroughly planning your Way to your goal you need to uncompromisingly, dispassionately and without the slightest exaggeration (this is the case when it is better to underestimate something in you, than fabricate something that does not exist, as you will not be able to practically use it) analyze and really estimate all your qualities, possibilities and perspectives.

3.0279. Very often f-Configurations of NUU-VVU-Forms which you use to carry out your subterraneous refocusing process in their quality are yet very far from the ideal, which are necessary for prompter achieving too high Goals for the scenarios of the given groups of STCs. Therefore, you should first thoroughly think, model and try to achieve many intermediate goals, go through some less qualitative *svilgs*-spherational realizations, in order to consequently focus in specifically those NUU-VVU-Forms whose f-Configurations have more and more initially insufficient to you Qualities Aspects of the synthesized Levels necessary for achieving the main Goal.

3.0280. Particularly that regards the deliverance from your Focus Dynamics of all multiple SFUURMM-Forms provoking active manifestation of aggressive, negative or rough sexual reactions, which is completely incompatible with your fulfilling highly spiritual tasks and obtaining stable extrasensory abilities, which will impose on you an increased «personal» Responsibility for every synthesized Thought, Feeling, Word and Action. Thus, using at own discretion (i.e. The *way particularly you* consider exactable!) one day «secondary characters» another day «participants of everyday extras» (at work, in a family, in a street, in transport and so on), you either move to the set Goal as the main Creator of «own» personalistic World, or — completely imperceptibly and unexpectedly for yourself — involve yourself into someone else's sporadic World and immediately turn into one of the participants of its «extras.»

3.0281. All the Worlds of your conscious manifestation ALREADY EXIST, they all — in absolute fullness of your possible subjective Notions about own existence and supposed nature of your purpose on the Earth — already initially exist in skrruullerrt system of Macrocosmos. In each Worlds' Form-system you play a certain role, possess some skills, are placed in certain life circumstances: you either somehow solve all your problems and live happily, creatively-fruitfully or give up and fall flowing into deep depressive states. Therefore initially you should clearly and hierarchically set priorities of consistent achieving your main Life Goals, then select the most urgent and top-priority, specify them in general details, combine in a certain priority ranking and consequences of achieving, gradually more and more understanding and realizing through that psycho-mental process WHO you are in your «present» and WHO you should represent in the most favorable variants of your «future» — first the «nearest» and then the more «distant» one.

3.0282. Occasionally comparing these Notions, you can better realize on what stage of the Way to your main Goal you are located in every moment of your «present.» This is the main condition for refocusing into those from already existing variants of «your» personalistic Worlds, where the given Goal has been already achieved. Every moment our Life makes us face various manifestations of life creativity of other people. Depending on the qualitiveness of our own Notions, we interpret that creativity by such words as «evil,» «rage,» «hatred,» «envy,» «indifference,» «love,» «kindness,» «understanding,» «patience,» «sympathy» and many others. However, are these people such as we interpret them in our subjective understanding?

3.0283. Of course not! their relationship with us — that is only *what specifically* in the given moment and in the given specific circumstances each of them is able to generate and «project» into the surrounding his or her World through own psycho emotional system, through the Level of Self-Consciousness temporarily activated in focused by him or her NUU-VVU-Form. It is not important by means of *exactly what kind* of Notions each of the rest people perceives them, — that is their creativity that is manifestation of their «personal» understanding of «own self,» that is their own Lives which they are free to manage at their own discretion.

3.0284. To keep the state of presence in own personalistic World, it is very important to always understand if each of your reaction to any realization of their life creativity (relative to you «personally» or to someone else) corresponds achieving your main Life Goal of that personal Interpretation to which NUU-VVU-Configuration you are consciously and persistently try to bring closer Focus Dynamics of your Self-Consciousness. If your «current» reactions do not correspond to your Notions about those variants of «yourself» in «future» who have already reached the set Goal, in that case you, thereby, completely imperceptibly for yourself, through unnoticed by you reactions and realizations, have already unconsciously refocused into «someone else's» sporadic World and now perform in someone else's scenario subsidiary, secondary role. It means that it is already not you, but someone else controls and coordinates your refocusing process, and you from the «main character» in «own» World where you play a decisive role in choosing means of achieving the set Goal, have turned into a «participant of extras,» for who someone else's scenario can unfold in a completely unpredictable way.

3.0285. In addition, if you further continue to display even more lack of principles, cowardice, inconstancy and lack of character, you can turn into «stump double,» i.e. a dubbing actor of a real «main character» instead of whom you will constantly perform all the dangerous «tricks,» in other words you will become a kind of «scapegoat.» Such situations and circumstances (accidents, disease, crime committed without premeditation, imprisonment, dismissal from prestigious job and so on) may arise, when you through uncontrolled by you reactions take responsibility for those life Lessons which that «personality» should have been carrying out, into whose sporadic World you refocused — through your subjective relation to something or someone, through some specific reactions (Thoughts, Emotions and Actions).

3.0286. Life Lessons are consequences of your actions which already do not correspond to your former life goals and tasks, your incipient Notions and your, already in a sufficient degree having been released in some previous temptations and implemented Interests, spiritual Essence, which you

have subconsciously determined for yourself as the highest priority Value. Because the fact of the presence in Focus Dynamics of your Self-Consciousness of stable spiritual Aspiration does not mean at all that in your Life there already cannot manifest all possible difficulties and obstacles, generated by high tensorness (qualitative difference) between your old regular Interests and new ones, which you yet do not understand in details. On the contrary, the number of complex and unpredictable situations in your Life, demanding from you completely other approach and qualitatively different decisions, increases like an avalanche, which makes you repeatedly think about the correctness of your new preferences.

3.0287. Because when the tensorness increases between what you have already succeeded to reach, renitively understand and profoundly learn, and that new yet unexperienced, which attracts you with its mystery and expectation of certain discoveries, in your Focus Dynamics there immediately increases engagement of SFUURMM-Forms with qualitatively new for your Form-Creators interconnections, which forms an intense dissonance between general FD of focused by you group of STCs and your own FD, which is actively busy in the search of those new evident signs absent in the given group of Continuums (or in the presently focused by you development Direction). However, you have decided to find them by all means and cognize. That is when in your Life certain circumstances appear which you interpret as Lessons (difficult choices, unexpected decisions, radical change of views, tastes, priorities, accompanied by — due to the lack of necessary Experience — all possible collisions, catastrophes, «personal» dramas, breaking-up old relations and building new ones). In such unstable physical states, it is very easy to lose important orienting points to the set Goal, start hesitating in its correctness, value, and begin searching something else, interchangeably engaging into the «ocean» of surrounding you sporadic Worlds.

3.0288. As a matter of fact, even if you have not done anything yet, but only think about something or someone far from your best Notions about «future yourself,» you immediately automatically change the earlier chosen by you Vector of qualitative orientation of subterransive refocusing, «having reprojected» your Focus Dynamics from the group of favorable scenarios (where you are the «main character») into the other — in outward appearance almost the same, but qualitatively completely different! — group of less favorable or entirely dramatic for you scenarios, where your role is to be an obedient «participant of extras,» where nothing depends on you (until you will show corresponding to your Goal principality, outstanding persistence and determination). However, as soon as you establish new priorities and decisively convince yourself that your new Life Goal is much more important and desired than previous, you immediately from someone else's sporadic World refocus into «your own» personalistic World. The same effect begins when you being disappointed in your new acquirements and progress, return to your previous Goal.

3.0289. If you by some psychical qualities quite strongly resonate with many SFUURMM-Forms peculiar to the «main character,» having got into his scenario, you — through many similar UU-VVU-conglomerates — set between Form-Creators of your Self-Consciousnesses Forms quite a huge number of covarllert energy-informational interconnections, which makes your Destinies very similar in many ways. Then you, as an active participant of «extra» of someone else's scenario, facing some negative events meant for particular reactions of the «main character,» react in the similar way or even faster than he. Now you, not him (or both of you) become killer, robber, rapper or scum making Life of many people miserable.

3.0290. Very often on a prisoners' dock we can find not real culprits of a crime but those who got into someone else's sporadic Mir, having neither strength nor willpower, nor elementary reason to resist the powerful influence of someone else's SFUURMM-Forms. In fact, you get into situations analogous to those in which «main characters» in the «neighboring» duvuyllerrt scenarios inevitably get themselves. Conviction of guiltless, forceful «imprisonment» in psycho ward or «getting hooked «in usage of illegal drugs, auto accidents and other types of crashes done not by your fault, getting tickets for the planes, trains and motor ships, which later crash, and many-many other things without which you do well in more favorable scenarios, all that I call unconscious «stunt.»

3.0291. No one can know what destiny and life span is meant for your various «personal» Interpretations in any of sporadic scenarios, as all they represent only Interests and specific conditions for the development of their «main characters.» For example, in order for the «main character» to learn something or get some subjective Experience (skills, views, psycho-mental states), it becomes possible for you either to die in aero-, auto-, railroad- catastrophe, or to sink due to someone else's falsehood or carelessness, or to «die» due to someone's greediness or irresponsibility, or to become a victim of «an accident» occurring due to someone's slovenliness, levity, or ambitions of the «main character» and so on. In other words, in every sporadic World all your «Deaths» serve only necessary informational «material» for purposeful psycho-mental influence on the «main characters,» possibilities to exert effective influence in the necessary moment on creative processes in someone's Self-Consciousness.

3.0292. If you stay in that time in «your» personalistic World, show in the necessary moment a little more persistence, determination or commitment to principles relative to the things not corresponding to your Goals and to more qualitative Notions about yourself — all the circumstances leading in someone else's scenario to your «wreck» or natural «death,» at once will qualitatively change in your Focus Dynamics and finish not so tragically and, possibly, even quite favorably.

3.0293. You can be a «main character» in «own» personalistic World, only when you take an active principled position corresponding to your Goals and Tasks, in other words when you consciously act in everything strictly in accordance with your own principles and Notions, always control your Thoughts, Feelings and Desires, and uncompromising relative to everything that is out of the estimated by your signs set of your main Goal, thoroughly filtering out from your Focus Dynamics SFUURMM-Forms which by their qualitiveness already cannot be typical of you in your favorable «future.» If in «your own» personalistic World you are an absolute master of the situation, in «someone else's» sporadic Mir, you only an unconscious participant of circumstances, where you will not know for sure the role prepared «personally» for you and how exactly you are supposed to be used. In every sporadic Mir, into where you, willingly or unwillingly, periodically refocus, there is own «main character,» for whom a specially formed scenario with your unconscious participation is performed.

3.0294. However, not only the degree of your principality, but also the qualitiveness of your subterraneous reactions in general are fully determine those circumstances which are organized around you in sporadic Worlds. The more you will try to correct your Focus Dynamics according to Notions and Configuration of Self-Consciousness of «personality,» in which personalistic World

you refocus, the more your Destiny will be formed on the basis of the development of its Destiny, the quality of which will absolutely and fully will be determined not by some outside attributes and «scene decorations» of Life, but by the quality of its choices and actions, manifested through certain specific Thoughts, Feelings, Desires, Aspirations and Actions.

3.0295. Let us assume that you are planning to make a decision on something very important for the process of your further improvement or are carrying out your current plans, but here rings a phone and someone once again radically interferes in your decisions, plans and actions. Although you do not know, what exactly might happen in the next moment, you approximately might imagine in what spectrum of development you have the closest perspectives in the planned project. Therefore, of course, it is necessary, reacting in a corresponding way to multiple calls (and also requests, orders and negative circumstances, to various aggressive information coming from newspapers, television, radio, internet), always stay in the sphere of activity of only your own Notions about the way everything should be organized around you and with you — from the point of view of creating the best perspectives and supporting conditions for the fastest realization of your cherished Goal.

3.0296. If after your conversation you will contemplate and choose more intellectual-altruistic position having reasonably motivated unforeseen Information as a possible part of your current Program of self-development on the Way to achieving your Goal that will not initiate your refocusing into sporadic World of those who has just by the phone (or in any other way) requested something from you or asked you a favor, which might negatively influence the realization of your current plans. Your reaction to every unexpected «intrusion» in your plans of someone or something should NOT be categorically negative only because just a second ago it was not included in the list of activities planned by you. Because in that case, aspiring to reach highly spiritual Goals you may refuse to help a blind or a disabled, a child or parents only because you have planned a meditation or reading a useful literature for that time, or something else, which does not include your distraction for fulfilling someone's request (you should also take into consideration its qualitiveness).

3.0297. Sincere and scrupulous fulfilling of someone's request may be much more useful for your spiritual growth, than what you have planned, and it will be able to get you much faster to a desired Goal, — you only need to notice each of these possibilities, not fixated too much on yourself, your own profit (even though, in your opinion, more «spiritual» than what you have been proposed), learn to positively motivate for yourself — as potential possibilities for your growth — many unpleasant and poorly timed requests, unexpected visits and unpredictable actions of other people. As soon as you find similar motivation and gladly accept unexpected circumstance as inevitable, but yet potentially useful and spiritually beneficial for you, you will again refocus into «your own» personalistic World.

3.0298. I would also like to note that people who constantly talk on the phone and are practically never free from phone conversations, or whose watching television too much and for too long, listening successively all the news, thereby heavily and for a long fill their Focus Dynamics with different-Qualitative content of these informational flows, — in fact, all these people most part of their life focus in «someone else's» sporadic Worlds. They completely do not realize that their «own» actual World just does not exist. «their» World, their behavior, their «future» always depend on someone and are corrected by someone: someone's calls, orders, opinions, rules, relations, laws and so on.

3.0299. Those who were not able to enter the Path of more conscious life creativity become in a huge degree depended on various circumstances, emergencies, accidents and other events, which happen in particular to them because they are yet have not been able to renitively comprehend their Path and have never seriously thought about the genuine meaning of their existence, about main Goals and Tasks of their Life. They only chaotically refocus from sporadic World of one «personality» to sporadic Worlds of many other «personalities,» changing during the day a huge number of «someone else's» Worlds, which get them not much closer to their own Goal, and, mostly, take them away from it.

3.0300. Though it is very difficult to sense and detect in time the beginning of your regular involvement in someone else's scenario and realize that you are not already a «main character» in your Life, but until you learn to do it, you will have to constantly be affected by the results of someone else's — more powerful than yours — willpower, actively influencing most of your decisions, your current plans and qualitiveness of SFUURMM-Forms forming Focus Dynamics of your Self-Consciousness. Good if that influence will come from the «personalities» more harmonious and spiritually developed than yourself, however, more often it is just the other way around: you have to almost regularly adjust your choices to «personal» interests or someone else's more primitive SFUURMM-Forms, only because your more qualitative decisions or remarks can offend, enrage, disappoint, bother someone or disarray, make someone jealous, want to revenge, criticize, argue, show contempt and so on. Very often, demonstrating your principled position, which is considered by a wider public to be critical and inappropriate, you lose friends, like-minded people and associates in some life area, and, as a rule, acquire many secret enemies, cunning detractors, for who your honesty and principality becomes just «a kick in their throat.»

3.0301. Therefore, more often you prefer not to tell people the truth about their shortcomings, mistakes, but usually keep silence in the presence of cads, impudent fellows, douchebags and scoundrels, in full obedience and slavishly obeying feeble-minded and egoistic orders of different authorities, bosses, the powerful and strongest, who are pleased to manage your Destiny at own discretion and ride roughshod over you on all the levels of bureaucratic hierarchy... It is possible to infinitely count miserable and ugly results of your everyday toad-eating, but that will not get each of you closer to a real opportunity — already from that second! — to start creating «your own» personalistic World only with the help of your own, more qualitative and perfect views, spiritual values and material priorities. Not having done it now, you will continue to stay further in your Life an unconscious prisoners and hostages of someone else's scenarios, plans, interests and Life, where something completely different from your expectations and aspirations is «written» for you, where you are surrounded by not those «people» and circumstances that should get your closer to the realization of your plans.

3.0302. How to understand, recognize and according to what criteria differ «own» Worlds from «someone else's,» how to correctly react to many compelling and unforeseen circumstances, which every moment invade your Life uninvited via unexpected phone calls, a stroke of catchwords and phrases mercilessly stealing your peace, spiritual balance and serene pleasance? Because it is not possible to get away from that, to hide or cover under a made-up mask of indifference and unconcern trying to avoid slightest disharmonious contacts, emotional arguments, important decisions and radical actions.

3.0303. There is no special wisdom here: you only need to maintain ground and not to stand down to everything that is disharmonious relative to your ideal Notion about Who You are in your favorable «future,» well-thought-out and formed by you on the basis of the most intellectual and altruistic SFUURMM-Forms and affectative Aspirations, confidently and firmly directing the process of your refocusing into the direction of the fastest achieving the Goals at hand. It means that you should learn to react to every change of circumstances (phone calls, someone's orders, directives, laws and rules, someone's remarks or actions, persuasions and threats, towards different events and so on and so forth) in such a way so that not to anyhow contradict your own principled life position.

3.0304. Your Reaction to any event in your Life determines if the frequency of vibrations of your Thoughts, Emotions, Desires and Actions in your reaction to the given event gets into that, acceptable for you, spectrum of relationships that you have a right to use if you want to as effectively as possible continue to refocus towards the cherished Goal. In that process it is not possible to do without persistent cultivation in your Self-Consciousness of a pressing need to make only intellect-altruistic choices. It means that you should learn to refer to each of your choice relatively uncompromised and biased: does it include simultaneously signs of high-sensual Intellect (or at least reasonableness) and characteristic signs of high-intellectual Altruism (or at least unselfishness)? If you are not able to find similar signs, it is better to delay making that choice, wait out, think it over, and if you continue being completely honest, soon the variant corresponding to that conditions will be sure to appear. You will spend a little more time and psychical efforts, but win in the effectiveness of more qualitative refocusing.

3.0305. Let me draw your attention to the following: there is a huge difference between the states of being *forced* to act altruistically (for example, under a powerful pressure of unforeseen circumstances or because it is benefiting you in the given situation) and *actually being* Altruistic, because the state of getting at least some «personal» benefit from an altruistic action (except moral and spiritual satisfaction) is not possible by definition. The same regards the signs of high-sensual Intellect, which are often very conveniently replaced by dogmatic intellectualizing, selfish deliberativeness and rationality, profitability, deception, mercenariness and survival.

3.0306. Here is only one criteria: mental component of the given sign should be deprived of any «personal» benefit and status seeking (selfish) interest in possible results of the choice made by you. It is clear that the prevailing majority of you are not able to make such choices, but without relentless pursuit to that, you will never be able to become a Human. That Principle of choices can be established in your Self-Consciousness only if you constantly — from hour to hour, from day to day and from year to year — will be able to live and create under the guidance of SFUURMM-Forms of lluuuvvumic Direction, which orient you to achieving the state of Creative Cosmic Potentiality — high Intellect and absolute Altruism, constantly inspiring you to exert Kindness and unconditional Love to Everything Being, to spiritual Unity with Everything.

3.0307. Throughout the ages people had to be satisfied with the Life that mostly did not correspond neither to their principled positions, nor to their Desires, necessities, Aspirations, constantly exerting cowardice and faint heartedness, experiencing strong dependence from high-handedness of imperfect laws and corrupted leadership, someone's flaws, caprice and biased selfish opinions. Does

that mean that all those people forcedly focused themselves only in someone's sporadic Worlds? It is not so, because in order to realize in «own» and not «someone else's» World, you need reactions corresponding to your «personal» life position, reflecting your SFUURMM-Forms, your notions about relationships in the society.

3.0308. It is not a secret that poor-spirited and double-faced attitudes as well as, on the contrary, caddish, cynical and unprincipled positions are main guide to action for many people, contributing the fast achieving of their self-interested and immoral goals, survival at all costs, status seeking realizations, obtaining power over others, fame and wealth. They do not recognize other criteria of life values, do not know them and categorically, aggressively cross any attempts to convince them otherwise. Their main mottos: «Man is a wolf to a man,» «An eye for an eye, a tooth for a tooth.» Therefore they are absolutely determined that for achieving their goal they need to necessarily deceive someone, bribe, «steamroll» over somebody, frighten, «move aside,» and if it does not work — to cripple, sacrifice, morally destroy or physically liquidate, exterminate at any cost. They carry out all that excitedly and with enthusiasm, fully convinced in their rightness, because such choices quite correspond to their principles and life goals.

3.0309. Therefore executing someone's kill order or pleasing someone, praising or discrediting someone, continuously making abhorrent deed, they *do not necessarily* refocus themselves into someone else's sporadic Worlds, because their reactions and decisions do not contradict to their own Notions about Life. Because the most important distinguishing sign of your focusing in «own» World is that your choices are quite agree with your principles, with which help you achieve the set goal. What kind of goal is it by its Essence — it is not important, because it determines only that protoformal Direction of your refocusing into those groups of STCs, where similar goals have a real opportunity to be reached. Such subjective notions as «good» and «evil,» moral and ethical laws do not really apply here and do not anyhow affect the process of focusing of every «personality» either in its personalistic World, or in any from the multitude of sporadic Worlds, when due to unfavorable coincidence the «personality» has to do things that do not agree with its principles.

3.0310. Very many «people» who exercise various spiritual practices and preach «kind» and humane teachings, due to the presence in their Self-Consciousness of powerful restricting «bounds» and patterns that do not let them accept the Knowledge of such high intuitive Level as IISSIIDIOLOGY, do not even suspect that they are simultaneously both Creators and main masters of «own» Worlds of their existence, because they do not possess that Information and constantly continue to make strategic mistakes in every their choice as well as in their life creativity. If you in your choices orientate on a particular person, even a very nice one, but at the same time very limited in something, orthodox, fanatically devoted to some old (or completely archaic) spiritually-religious conceptions, who even in theory does not accept that in the World there can exist more authentic Knowledge, than the teaching he worships, you can easily become a gullible participant of «extras» in his scenario, naively relying upon him always making more right choices.

3.0311. Correcting someone's SFUURMM-Forms according to your own Notions, you thereby participate in the process of potential increasing qualitiveness in someone's personalistic World, demonstrating on your most qualitative choices availability of more effective possibilities for achieving

some specific goals. It is not important if you use in that «own» or «someone else's» SFUURMM-Forms, because only the achieved result will be decisive: if it is more harmonious and in more degree corresponds to your Goals that is the state I mean by the phrase «stay in your own World.»

3.0312. Therefore you should stop protecting your Perception from a different viewpoint somehow not corresponding with your own, being afraid of getting beyond the boundaries of positional self-control over the circumstances of your Life! Thus you only show your narrow-mindedness, spiritual nonage, ignorance and bias. You should learn to separate the «wheat» from the «chaff» and do not be afraid to use in your life creativity someone else's «wheat» for own — spiritual and intellectual — self-improvement.

3.0313. Sporadic Worlds of a huge number of people may lead to the same Goals as yours, though ways of realizations and choices of these «people» might greatly differ from yours. Do not go to extremes and do not thereby cultivate in yourself a fear of falling for someone's bait that will only indicate your narrow-mindedness, good-for-nothing anxiety and low quality of represented by you Goals and Tasks of intellectually-spiritual development. You should try to find everywhere and in everything rational grain of Truth, one way or another in tune with your Worldview, and only in the situations of facing attitudes principally diametrical to your own, find in yourself strength and arguments to convince opponents that you are right in a reasoned manner.

3.0314. Imagine that some of you practicing one of scientific, philosophic or religious conception would meet me and only because I describe absolutely unimaginable for you things, would not interact with me, being afraid to get under the influence of incomprehensible by you Notions of my personalistic World. You would be guided not by the hunger of new self-cognition, not by the sincere aspiration to self-improvement, which is not possible without constant progress, but only by the fear to lose support in your faith, teaching or discipline, question your usual dogmas and conventional Conceptions, without which you are not able to anyhow think about «yourself.» Yes, if you avoid communication with me, you will not refocus into my more perfect (from my subjective, lluvvumic viewpoint) personalistic World, but therefore you would lose the possibility to improve «your own» more primitive and limited World with more qualitative SFUURMM-Forms.

3.0315. If you gain Experience from people who aspire to the same Goal as you and who have — at more qualitative, than you do, Levels of Knowledge — highly developed Will, Purposefulness, Confidence and Responsibility, it makes sense, analyzing their choices, to take a close look at their decisions and in a corresponding way correct «own» personalistic World by more qualitative decisions. Focusing on them you, in fact, configure your own Focus Dynamics to advancing in the same development Direction. In other words, you take for yourself as an example all the best from the other spiritually and intellectually more developed «personality,» who, in your opinion, in the given situation would behave more correct than you do, and act exactly the way it would do. Making such «compilations» you gradually improve the quality of your SFUURMM-Forms, which means developing focused by you NUU-VVU-Configurations that structure more harmonious groups of STCs, where in your development scenarios there is already a considerable change in your life Goals, Tasks and ways of achieving them.

3.0316. «Borrowing» someone's more perfect SFUURMM-Forms, soon you adjust to them so well that start considering them your own and forget who you used to be. Thus, constantly transforming your, less satisfying you, Notions into Notions more corresponding to your worldview, you consistently improve your «own» personalistic World. You cannot — totally and permanently — focus only in someone else's scenario, because you constantly correct your choices, and if you make a mistake you always have a chance to change situation by behaving the way you consider right.

3.0317. However, if someone's choices in principle do not contradict yours and you agree with them, you make your choices from «own» personalistic World, while the other person makes them in «own» personalistic World, and nobody depends on anyone in that. Accepting from someone something that you consider appropriate, you do not refocus in someone else's scenarios. If you see in a person something good that you do not have yet, it does not mean that you have become dependent from it, — you have just copied into «own» personalistic World those SFUURMM-Forms which attracted you in someone's sporadic Mir, because they renitively correspond to your Goal.

3.0318. Yes, it is possible that in other situations that person from whom you have taken example might not be able to act as you do, but, on the plus side, his SFUURMM-Form about the possibility itself of making such choices has already become yours. You constantly take knowledge and information from books, films, internet, Mass Media in the forms of writers', scriptwriters', producers', journalists', bloggers' SFUURMM-Forms — of many specific «personalities» who have represented their Notions in the form of Thoughts, Words, have put their Feelings, their vision of possible development of relationships. They might not act the way they wish to, but that does not make Notions stated by them less valuable for you, who has decided to improve your Focus Dynamics with their help to achieve your Goal.

3.0319. But, unfortunately, due to undersynthesizedness of Levels of your lower IISSIIDI-Centers and lack of experience necessary in the given Existence Levels, you have to periodically «shift» your Focus of Close Attention to the Levels with SFUURMM-Forms incompatible with your Goals. You understand that these Levels of your thinking and feeling do not correspond to that highly spiritual Image and Ideal in Which you aspire to realize. You should find and assimilate convincing SFUURMM-Form of positive Motivation that will reason you into the necessity to consciously go through that temporary, intermediate stage of svilgs-spherational transformational change in your Focus Dynamics in order to then, after Synthesis of lacking Experience, return to the Goal again.

3.0320. Imagine that we go along the road and suddenly there appears a swamp. We have tried to go one side around the swamp, but it is impossible to pass there, tries to go to the other side — but it is even worse there: a cliff, a precipice, a rapid river. All that is left to do is either try to go straight through the swamp or refuse from the possibility to go further. Therefore, we start crossing the swamp, but not in order to dip into it and spend the whole life in the mud, smell, among decaying rottenness and horrible stench. Having weighed all the variants we admit that it is not possible to achieve the Goal without going through that swamp — there is no other road, and it means that we will have to go through it if we actually want to reach our Goal. We scramble through thicket and mud warmed by the Thought on how thoroughly we will wash, clear and tidy ourselves after walking out of the swamp to continue going further to the set Goal along the clean road. We consciously pass

through objective circumstances not for these circumstances (sex, status seeking, negative reactions), but for achieving much higher Goals.

3.0321. It is necessary to renitively understand that, because we should firmly keep exactly that saving and sobering Though in our Self-Consciousness in every moment of lowering Focus of Close Attention into depliative realizational Levels, as if encouraging ourselves: «Yes, I agree that is against my principles, my views, my Notions about Who I should become, but I have to do it, because in the opposite case in the structure of my Self-Consciousness there will not go Synthesis of Energy-Information of necessary quality, which means that my Configuration will not be able to connect into single whole with That more perfect Form, to Which I aspire.» You just should fill that qualitative «gap» with deep and diverse Experience of self-cognition in certain situations.

3.0322. When you fall to low qualitative reactions, to some inner aggression, blame or rough sexuality, you should notice that as soon as possible and try to go through, experience these moments in such a conscious way so that to be able to transmute them, in other words to refocus from those states into more qualitative form your «personal» Interpretations. of course, the process of similar emotional experience considerably accelerates (or compresses to several seconds), if you stay in more ampliative states, because your Focus Dynamics is structured by SFUURMM-Forms which already contain subjective Experience from such emotions, and therefore you do not experience any interest in their realization.

3.0323. The Mechanism of tuning in and refocusing into ampliative psychical states is ensured by only high nutation Motivations, based on the deeper Understanding of cause-effect interconnections forming absolutely all circumstances of your Life. If such — convincing for you! — Motivations are missing or are yet unavailable for Form-Creators of your FD, in a destructive situation you need to try to «rely» at least on the deep Belief that «everything happening to you and around you *already exists* and exists *for the greater good*» (even if in that moment you cannot observe any slightest signs of that greater good). Trust this universal Motivation, and then you will be able to promptly overcome an inner crisis.

3.0324. The faster you are able to dispassionately estimate the current situation, having noticed and detected yourself in a negative state, the sooner you realize yourself being angry, outraged, criticizing, extremely excited and *sincerely* wish to «sacrifice» to your higher Goal all your demanding realization status seeking (arrogance, critical philosophy, impatience, antagonism), the higher will be the degree of transmutation of Configurations of these SVUULL-VVU-conglomerates into already peculiar for you ampliative Experience and transformation of your Focus Dynamics into SFUURMM-Forms of higher Levels of your Self-Consciousness. The quicker a destructive realization will pass, and there appear awareness that you are not interested in that any longer. You already will not react so sharply and sensitively to former unfavorable situations. Even if you allow a negative reaction, you should clearly understand that it is caused by the temporal imperfection of your «current» NUU-VVU-Configuration that you know that and take all the measures in order not to repeat previous mistakes.

3.0325. You might have a question: «Does someone's strong attachment to somebody or something (to the family or its separate members, to the motherland, to a certain collective and so on) mean that

such a person focuses in the scenario of the person to whom he is so strongly devoted to?» Actually, any of your attachments represents a mechanism of switching your Focus of Close Attention to the person you are attached to. Here you should understand as soon as possible and decide what is more important for you: either that devotion, which by its egocentric tendencies constantly distracts you from following your cherished Goal demanding your attention, time, physical and psychical efforts, or your Goal itself. Attachment of any degree by itself does not influence in any way your focusing in «own» personalistic World, because it is very often in quite a big degree is formed by interconnections of some subjective attachments to someone or somebody and based on your preferences of something towards the other.

3.0326. However, attachment as a possible reason of your refocusing into sporadic World of the person you are devoted to, stops playing that role if you continue staying on typical of you principle positions and do not decrease the general qualitative level of SFUURMM-Forms used by you in life creativity. The more your reactions correspond to the Ideal you set as a Life Goal and to the qualitative development Direction that determines a deeper Essence of all your existence on Earth, the more stable you are focused in «own» personalistic World.

3.0327. For example, mother's love to her child (or children, family) absorbs a lot of her physical strength and creative Energy, which in other conditions could be realized in much more useful way, for her own self-improvement in the chosen by her Direction of life creativity. However, if that woman in spite of additional concerns, yet keeps being not less determined and loyal to her principles with which help she wants to achieve her high Goal (that has a corresponding place for her family), then that deep attachment will not influence the stability of her focusing in «own» World. Then her Notions will be able to continue consistently organize in those circumstances of her Life she has dreamt about (along with the possibility of own creative realization, in her family there will develop and remain harmonious relationship, happiness, prosperity, understanding and mutual respect between all the members, and so on).

3.0328. However, each member of her family also have own plans, Desires, Interests and Aspirations, which each of them aspires to achieve at any cost, and which can be inconsistent with her Goal and even diametrically opposite to it. Children are, perhaps, the most perfect psychologists who are better than anyone in inventing ways of manipulation of their parents' behavior and choices. Most of them, if do not get their way peacefully or by whining and whims, quickly switch to either aggressive tactics or demonstratively close up inside (it is also a very effective way of manipulation).

3.0329. However, here the woman faces significant challenges, and sometimes just insurmountable obstacles: either uninterrupted war for own beliefs and triumph of her plans, either constant surrender to selfish demands or exorbitant claims of separate family members, falling of her principle Notions into the severe dependence and powerful manipulation from the side of less qualitative SFUURMM-Forms and, in the end, sacrificing own views, tastes, Whishes, Interests and Aspirations to the family (or its separate members). If the mother starts reacting to her child's behavior in the way not corresponding to her own high Notions, pretending not to notice his discontent, temper, rudeness, impudence and selfishness, if she does not make any attempts to change something in him with

the help of persistent influence of her own SFUURMM-Forms on his Self-Consciousness, she will soon turn into the hostage of scenario, where her child is a «main character,» and it is impossible to predict, what role will be assigned to her in his sporadic World. Most often that role turns out to be dramatic or tragic.

3.0330. Such — constantly dependent — state of mother's Focus Dynamics and her irresponsible attitude to the process of education and selfish tendencies of the child can lead to when for an effective cultivation in his Self-Consciousness of more ampliative qualities and character traits her «Death» will be «required.» For example, once the child played with matches, lighted them, and the mother did not tell him anything about the danger of such games. Next time, he, being curious, set a table on fire to find out for how long it will be burning down. Again mother just a little monished him; she never shared her Experience and did not explain him many things justifying his behavior by inquisitiveness, curiosity and vivid interest to everything. One day his imprudence and inexperience caused not only her death, but also deaths of many people, or loss of their material possessions. Now, the child will have to live with that tragic Experience all his subsequent Life building on its basis many interconnections with surrounding him sporadic Worlds.

3.0331. It is only one possible scenario from all the variety of multipolarizational development Directions of the given child, which involves Destinies of many people, one way or another connected with this family (territorially, psychically), but representing in that scenario only «working material,» social psycho-emotional background, which is intended this way or another affect the development of Self-Consciousness of both child and his mother. In the scenarios where representatives of that «background» — through their persistent concerned attitude to their Destiny and more responsible attention to the problem of improvement interconnections between them — could nevertheless defend their more qualitative principle positions and inculcate more ampliative tendencies to the members of the given family, they, in the peculiar for them personalistic Worlds, refocused to more qualitative scenarios, where such tragedy either did not happen, or there turned out to be less material losses and victims.

3.0332. That is why in more favorable variants of our with them «future» all the responsibility for the upbringing and education of growing generation is imposed not on the parents, many of who demand not less attention and help in education, but on the best specialists — psikhomodellers, pedagogues-meditologists, educators-transtsendtologists, mentors-iissiidiologists whose Experience and knowledge is formed in the process of renitive education of such scientific directions of the «future,» as, for example: aayllietics (the basis of high-sensual interconnections), sfuurmmvvulogy (art of reconstruction of s-Reality), svuullogistics (regulation of emotional connections), iisstillics (basis of mental interactions), koarddiirlogy (purposeful modeling of rotational Cycles), psikhobionics (correction of bio-systems' states), psychogenetics (influence of thoughts and feelings on chromosomal DNA mutations), vitoskopy (telepathic communication) and many others.

3.0333. Yes, your Focus of Close Attention can occasionally and for a while shift anywhere, in any Directions of life creativity, but if that strategic dynamic does not decrease the qualitiveness of SFUURMM-Forms of manifestation diapason of your Creative Activity Focus, you still continue to refocus to your Goal. Originating thereat qualitative svilgs-spherational transformations in your

Focus Dynamics, accompanied by short-term refocusing into someone's sporadic Worlds, — is a result of presence in Configuration of your Self-Consciousness of «gaps» in Synthesis in certain diapasons of Energy-Plasma of more covallert interconnections between Aspects of some Qualities, without which Synthesis it is simply impossible for you to carry out further refocusing into Levels of higher frequency, structured by those STC groups where your cherished Goal is already realized.

3.0334. At any second, as soon as you actively directs to the choices and actions of the «main character» your principle (not necessarily more qualitative) mental-feeling message reflecting the position of *your* Self-Consciousness, the situation and roles can immediately change. If in spite of antagonism of potential «main characters» of any of the surrounding you sporadic Worlds, you are able to get your own way and achieve realization of your SFUURMM-Forms, then you will become a «main character» relative to them of your own development scenario, you, and not someone else for you, correct and model situations at own discretion. Moreover, all the rest people whose Self-Consciousnesses went into *positive* or *negative* resonance with your Notions or actions, being with their Focus Dynamics in your scenario, can either stay in peculiar to them personalistic Worlds (if what you do serves their Goals as well), or refocus themselves into your «extras» (if you win, but your arguments do not correspond to their Notions about the possible solution of the given question or a conflict).

3.0335. You are very mistaken when you consider that the fact if your principle non-participation in something not corresponding to your Notions guarantees that you focus in your «own» World. No, you should reinforce that position every following moment by you specific decisions, reaction, action, preferences, opinions, which confirm (fixate in Self-Consciousness) the domination in your Focus Dynamics of principled position of specifically *yours* Notions relative to someone or to something. In the opposite case, tacitly conniving and in fact encouraging with your passivity the realization of something you crucially do not agree, you immediately turn from a «main character» into the participant of someone's «extras.» Remember that silence or inactivity in most cases represents a very active psycho-mental position manifesting in the surrounding Space the spectrum of those vibrational Qualities which in the given moment form f-Configuration of your Self-Consciousness.

3.0336. Cowardly saying nothing when you do not agree with something happening around and not trying to change the situation by declaring your «personal» opinion in public, doing nothing when your own principles are violated and even not trying to prevent someone's iniquity, crime or aggression, you by that firmly and decidedly generate in Space-Time exact «coordinates» of subsequent focusing of your rotational Cycle, as though asserting yourself that in the given moment of your Life you are capable to manifest only in these realizational Levels of Self-Consciousness. Silence disagreement, when you consider that something goes «the wrong way,» but do not pronounce that in public, by that giving those depliative tendencies opportunity to activate and develop in actions, reactions and words of other «personality» — that is also the most frequent way of your destructive refocusing in the structures of Self-Consciousness. Thus you become the participant of «extras» in the scenario of the given «personality.»

3.0337. Your passive attitude or shy (more often — just cowardly) silence in the situation when you feel that the level of reaction of some of your relatives or friends does not correspond to the notions

about the Worlds to which you aspire — is no less active position than the action that provokes the development of low-qualitative tendencies in somebody (but in the first place — in yourself!). If you do not take part in the discussion of some very important spiritual problems, tacitly conniving at somebody's mistakes, unconscious acts, deeds, seeing from outside that it can go very badly for the person or for someone from his surrounding, lead to some serious consequences, if you connive to somebody's irresponsibility, complacency, slovenliness, stinginess, jealousy, envy, deceitfulness, doublethink and so on, concealing them and justifying behavior of the other person by saying that it is his Way, then you have chosen principally wrong position.

3.0338. You should not be indifferent to anything, and especially to what does not correspond to your SFUURMM-Forms, and should try to at least state your viewpoint to the surrounding world — in order to even more structure and strengthen its Focus Dynamics by your more qualitative Notions. It means when you do not have possibility to really influence the situation, you should just disagree with that, not betray your principles in order to please someone's hypocritical approval or your desire to hear flattering words. Otherwise your Goal becomes unprincipled, turning into some game contrived by you only because of your misunderstanding of the fact that your every seemingly «casually» speculated Thought, unconscious emotion, hasty word, fleeting contemptuous glance and even unspoken agreement with someone's aggressive (silly, vicious, cynical) choices are able to immediately refocus you into the most unfavorable circumstances of your Life, whence it will be uneasy to refocus again into the previous most favorable state.

3.0339. Demureness and false bashfulness are synonyms of irresponsibility devolving to criminal connivance. Such a person does not understand to what results his silence can lead, and not only relative to the one whose deed he conceals, but, first of all, for himself. It can be compared with the situation when you, looking at the globe, exactly know your geographical location. No matter how the globe spins, you can anytime indicate a point on it. In other words, you should react in a certain way, coordinated by your conscious choices, relative to something happening around you or at an inaccessible distance from you, you always should tell exactly where you are, in which of countless multitude of possible variations of your advanced «present» you perceive and experience yourself. Only thus you can stabilize your Focus Dynamics in those levels of life creativity which in the highest degree correspond to your Goals and life Tasks.

3.0340. Subjective and conditional division of Focus Dynamics of surrounding you reality into «own» and «someone else's» (sporadic) personalistic Worlds — all that is only one of a vivid and important way of your comparing interpretation of qualitiveness of your «current» refocusing process according to spectrums of Multipolarization of Vectors of various protoformal development Directions. In any life situation the most important is not what you say and do, but what you think, feel and experience and what is the degree of your own immersiveness to everything you say. Because you can say everything you like, everything that people say and want to hear from you. It is possible that it will be said by someone from his own false, double-faced and selfish World, cautiously disguised as more perfect. So you, having believed to someone, also will start doing the same, unconsciously multiplying deception, sowing the seeds of enmity and anger, antipathy and chaos, envy and distrust.

3.0341. Thus multiplies and amplifies every deception build on beautiful words and appeals, but which has completely opposite, selfish, materialistic and sometimes carefully hidden very aggressive and misanthropic goals. Qualitativeness of your subterransive refocusing in Focus Dynamics of the surrounding you World is determined by only your «personal» inner states. In that subjective process only *what specifically* you «personally» felt thereat is important: either it was just a warning with an objective to disapprove or it was a sincere attempt from your side to make the World of other person better. In that case, even if you did a mistake telling the other person that he is in a disgraceful state, your sincere inner impulse will be natural and real, but not false. Even though your Notions are farfetched by you, however, eventually, for the stable focusings in «your» personalistic World important only what you firmly believe in, and to what you aspire!

3.0342. Someone from you often tells others right, good words, however, sometimes it is done not with a goal to help somebody to overcome some of own weaknesses, but to show once again to the rest people own excellence in more detailed understanding of something, though exact repetition of someone's clever thoughts and quotations does not imply presence of wisdom in the person who has learned them and repeat. Often even a virtuous deed is committed by you only in order to dulcify own ultra-sensitive status seeking: something like, «Look, I can do this way, I am capable of that as well; you think that I am bad, but I am good, I am already not the way as you thought about me yesterday; you would not have been able to act so altruistically.»

3.0343. Yes, it is quite possible that under that demonstration there is hidden a sincere wish of the «person» itself to change for the better, prove to own self and other people that he is better than appears to be from the sidelines, however, the drive stimulus of that action is almost fully based on status-seeking thoughts and selfish desires. Others cannot help but share their opinion and views only because, they just cannot keep them to themselves if they see that something in the surrounding them World happens not the way they imagine.

3.0344. Yes, very often, due to various subterransive unrealized desires, such people can say too subjective words and opinions, make mistakes, be categorical, maximally strict, but nevertheless — that is vividly expressed position of Form-Creators of their «own» Worlds, who know for sure, what exactly they want and imagine very well how to achieve that. If they could be equipped with high-qualitative Knowledge given a chance to cognize themselves in yet undersynthesized Levels of own Self-Consciousness, in order to shift the spheres of their Interest from status-seeking, selfish Levels of activity of Focus Dynamics of Form-Creators of two low IISSIDI-Centers into altruistic and high-intellectual Spheres of Creativity of aossouns and kroydls of the next pair of Centers, then we would already focused in much more qualitative and harmonious Worlds than these.

3.0345. The higher is the activity of Form-Creators of ampliative Levels of Self-Consciousness in Focus Dynamics, the bigger and more apparent is the degree of that necessity in the assertion of own principled viewpoints in all the Directions of its life creativity. Yes, for many others who prefer to let everything around peacefully go its usual, known and predictable way, such people are very inconvenient and therefore they represent powerful accelerators for their negative reactions. Each person who has taken more qualitative and principled position relative to any Life manifestations,

becomes an outcast, someone very inconvenient, unpleasant and irritating for those who look on the same realizations in a different way. These people immediately put a hundred of labels on him, each corresponding to own level of understanding.

3.0346. However, you should go through all that and preserve in Life the most valuable for you, bring yourself and all the rest who is present in «your own,» more qualitative, than theirs, World, to that highest Goal you set for yourself. It is important not to come off that position, no matter how others, who do not agree with you, draw you, push you and tempt with all possible benefits and privileges. Accomplishing any work you should very delicately sense what you do right and what is not, where can appear evident benefit for the rest, and where — a hidden harm. It is necessary to constantly and uncompromisingly control the process of taking and realization of your decisions constantly asking yourself: «Where in that choice is Me — the One who is already in the Center of my cherished Goal? Who am I in the given situation?»

3.0347. In «your» personalistic World there exists no one except yourself, all the rest one way or another focus in «your» Worlds only to give you real opportunities to actively approve yourself in the most diverse Directions of life creativity, to let you someday, experiencing various physical states to a greater or lesser extent, be able to sense, monitor and understand qualitative difference between various variations of «yourself.» So that you, finally, once and for all understand: in simultaneous Existence of Universe there is not only «you,» but also all the eternal multitude of various and different-qualitative Interpretations of Yourself. These — depliative and ampliative variants of exuberation of FD of your eternal «personality» (Form-Types) are united by a single, most high-spiritual, high-altruistic and high-intellectual Goal, Which is not possible to reach at any cost, and only by means of constant refocusing into more and more qualitative states of your slloogrent Self-Consciousness. All the rest is secondary, minor, «the thousand and one small worries of life.»

3.0348. Quality and specificity of the Goal play a determining role in the effectiveness of your refocusings. The lower is qualitative Level of the set Goal, the more customary and convenient becomes your comfortable existence in «someone else's» — sporadic — Worlds, because it is taking a weight of «personal» responsibility off you for decisions taken by someone (instead of you!). Such goals are quite easy to achieve, they are easily changed into other mercantile goals, meaning that they serve a credible mechanism of «switching» your Focus Dynamics from the most favorable circumstances of «your» personalistic World into doubtful opportunities and situations of «someone else's» sporadic Worlds.

3.0349. High Goal, structured by the multitude of various positive Motivations, logically and intuitively (because you, admiring It, are yet very poorly imagine yourself all Its specifics) convincing you in the rightness of your Choice, is not connected with current priorities of values, which you are ready to abandon for it, and thereby represents a powerful stabilizing factor for the process of your refocusings within more universal SFUURMM-Forms of «own» personalistic World. Depending on how firm your life philosophy is and how renitively is motivated your confidence in the importance of your Goal, of your Notions about more qualitative «yourselves,» so will reveal your inner stability, your firmness relative to the outer influences and someone else's reactions.

3.0350. If your will be stable in the Determination to reach your own Goal as soon as possible, then your «personal» position relative to anything will always be of critical importance. Understanding of the necessity of constant protection and demonstration of that position will be also the most important for you. However, you do not have to loudly prove or express through some actions own psycho-mental state, — it often happens that you can keep or express deeper own principled position in some circumstances through calmness and self-restraint, and not through wanton speech or some active actions. The process of refocusing into corresponding development scenarios is carried out only through qualitiveness of your own subterraneous states.

3.0351. In these question there is one more crucial point. Often, when you are somewhere alone and there is no one with you, no one influences you and you do not need to «pretend being someone» in front of anyone, you should not delude yourself that being alone makes you free from the possibility to refocus into someone else's sporadic Worlds. Surrounding your World, which informational space is always flooded with someone's Thoughts and Feelings, SFUURMM-Forms of someone's Desires and Interests, never stays inert, passive or apathetic relative to you. The reason of that is the Principle of Resonance, Which provides all the countless variety and eternal permanency of Focus Dynamics of any Self-Consciousnesses Forms focused by you. Your Perception system is just not capable to visually monitor and adequately fixate the entire Focus Dynamics of surrounding you reality.

3.0352. If you, being alone, surrender to your deplorative Interests, weaknesses and flaw, do not follow your principles and consider that you can let yourself come down to low-qualitative realizations, only that alone indicates the fixation of your Focus Dynamics not in «your own» personalistic Worlds, but in someone else's sporadic Worlds. It can take place under the powerful and quite stable influence on your Focus Dynamics of unconscious «projections» of SVUULL-VVU-conglomerates of «personalities,» actively engaged in analogous realization. Active sources of generation of such SFUURMM-Forms can be either your neighbors, either heroes of the film you are watching, or of authors and performers of a song, music, clip you are listening, or, eventually, «yourself» — i.e. some of parallel congenial or particular «personal» Interpretations of your LLUU-VVU-Form manifested either in one scenario with you (as other Form-Types of your Stereo-Form), or in homologous (similar by certain signs) scenarios.

3.0353. Being alone, you should with particular attention watch your Thoughts and Feelings, uncompromisingly being aware of «who I am now.» If you start blaming someone, you should catch yourself in that: «Why do I criticize?» You should try to follow up in yourself a possible Motivation of someone's action: «Yes that person did wrong, but why he were not able to take other, more qualitative decision, what had prevented him from that or what did not he know? It is possible that if I had suggested him something earlier, he would not have behaved that way now and that situation would not have happened!»

3.0354. When you understand and realize if not your own fault, than at least «personal» involvement in the fact of someone's action, your disapproval will either disappear, or will significantly weaken, and instead of that there can come more lenient realization that any connivance from your side or inopportune concealment of something important for yourself can lead to very serious consequences: someone's mistakes, quarrels, offences, failures, troubles and even tragedies. A remark said on time

or well-timed interference can turn out to be much more valuable and gracious relative to other «personality» than tirades of words said afterwards when it is already very difficult to change the other person's mind and try to direct to more truthful way of creative self-improvement.

3.0355. The quality of your creative, spiritual realizations when doing any kind of work whatever usual or routine it may seem, also lets you either stay reliably focused on the process of achieving your Goal (then you will continue to fixate in «own» personalistic World) or facilitates distraction of your attention from the content of your principled Notions and temporal activation of some from yet undersynthesized by you Interests engaging you in sfuurmmformal Dynamics of sporadic Worlds.

Chapter 9. Influence of SFUURMM-Forms of sporadic Worlds on the process of formation of SFUURMM-Forms of personalistic World

3.0356. At any rate, all, surrounding you sporadic Worlds are not only «someone else's,» but they are *also* «your» Worlds! they become *also* «yours» in the moment, when your Focus Dynamics is «projected» into them. The case is that there is a very essential peculiarity in this continuous refocusing process: everything that you call «someone else's» personalistic Worlds are — in the same time, but from various viewpoints — also different-Qualitative reflections of Focus Dynamics of «your» personalistic World. Since you one way or another appear in someone's Focus Dynamics, influencing them in this or that way, any of these sporadic Worlds also represents a scenario «written» in a particular way as though «personally» for you, but only less qualitative, than many from those that might have happened in the given situation, if you would purposefully have corrected it absolutely corresponding to your own Notions about more qualitative «yourselves.»

3.0357. These sporadic Worlds are for you «personally» various reflections (through someone's subjective Notions about your «personality») of those variations of your former choices, many of which you would like to cross off from your Way of living. They are as the Damocles' sword, hanging above every of your «current» choices, ready anytime to cross and destroy all your «current» achievements and successes. If you somewhere have done something wrong or have said something wrong, than somebody's adverse Notions about you, being somewhere outspoken and made public, will immediately mercilessly come crashing down on you through public judgments, most often bringing you into aggression or despair, offence or depression, hatred or deep rueful feelings for previous misconduct and mistakes. It can distract you for a long from Notions about the necessity to reach your Goal, and so to refocus into those multifarious, but always depending from something or someone, «extra's» states. In «someone else's» scenarios you are in a bigger degree controlled by the actions of other people and in less degree can carry out what exactly you want.

3.0358. Actively modeled and differently realized by us conflict situations are consequences of tensoriness and undersynthesizedness in lluvvumic birvulyarity type of f-Configurations of Form-Creators of the first pair of IISSIIDI-Centers, and also status-seeking SFUURMM-Forms of the lowest Level of the second pair of Centers. As a rule, all the conflict circumstances are determined by

an active influence on your Focus Dynamics of primitive SVUULL-VVU- and selfish LUUD-VVU-conglomerates, generating in «personal» Self-Consciousness tendencies to separation, discretion, destruction and selfishness. In our «future,» much more ampliative than «present» NUULL-VVU-Form-Types deprived of obtrusive influence of SVUULL-VVU-conglomerates, the state presently perceived by us a conflict, in fact, is absent, since people try to put in the bases of every choice first of all lluuuvvumic signs of high-sensual Intellect and high-intellectual Altruism, which Synthesis generates in FD of «personality» ampliative SFUURMM-Forms of immunitant (i.e. not determined by anything compulsive) Responsibility.

3.0359. What we watch in films about «star wars» and «evil alien civilizations» attacking Earth, cannot be anyhow realized in practice of interconnections between *highly-developed* cosmic civilizations. Collective Consciousnesses of absolutely all cosmic civilizations which like us yet have not reached certain development Levels providing their renitive Understanding of Universal Essence of Cosmic Laws, remain lockout (realizationally enclosed) in their own planetary systems and do not have any possibility to enter the stage of extensive interconnections in the cosmic society, until depliative Levels of Self-Consciousnesses of focused by them Forms will not be in sufficient degree synthesized in order not to harm the process of development of other civilizations.

3.0360. Not only Amplification of Self-Consciousness of an individual, but also Amplification of Collective Consciousness of an entire civilization (population) suggests a continuous and successive increasing of the number of covarllert interconnections both between different-Qualitative Form-Creators of Focus Dynamics and between separate «personalities,» groups of people, nations and states, which provides gradual harmonization, balance and raising these interconnections (and relations) onto more and more qualitative Level.

3.0361. Therefore «present» human society still faces many global challenges and spiritual «enlightenments» to accumulate that necessary Experience and also intellectual-altruistic potential, which will let the majority of earthlings not only to understand and accept new the iissiidiological Knowledge, but also to exceed the bounds of ung-ssvooun spectrum of realizations, which does not let contemporary people even in the most primitive form to join the highest Idea of intellectual-altruistic Devotion to Macrocosmos. Between the members of «future» human society, where these Levels of Self-Consciousness are already reached and activated on a global basis (thanks largely to SFUURMM-Forms of Iissiidiology), there are no such disharmonious states which at least somehow could remind modern conflicts (with aggression, violence, destruction, killings). Ability to Understanding, patience and tolerance, Responsibility and Proactiveness, intellectual-altruistic relationships and people's mass aspiration to creative cooperation in different Spheres of Creativity and development Directions are the most central and prevailing values and accumulations in favorable variants of our «future.»

3.0362. The more highly-developed interconnections are between people, the more is smoothed over the conditional-subjective division of all possible circumstances of the surrounding them reality into «own» and «someone else's» Worlds in their Focus Dynamics. In other words, the more the process of two-invaderental inter-Qualitative Synthesis is completed in Self-Consciousness of a Form, the less is the activation degree in Focus Dynamics of need in egoistic choices. Only the state of egoism provokes conflict situations!

3.0363. Behaving in a way you consider to be most necessary not only for yourself, but also for others, you start referring to your choices and actions very responsible, carefully choosing from all the provided possibilities only those variants, which would not only violate your own principles, but would not impinge upon anyone's rights. If you are wise and lluvvumic-wise in your decisions, than your actions, your choices, words and actions will take into consideration not only your «personal» needs and your «current» Interests, but also a huge number of already quite harmoniously formed states of surrounding World, which you just will not violate understanding their significance and top-priority for achieving your own Goal.

3.0364. Therefore in any relationships you will always definitely try to find exactly those variants of your next actions and your probable words out of the multitude of all possible that are less capable of triggering disharmonious states not only among those with who you directly communicate, but also among all the surrounding you people. It is possible only by means of constant integration and *covarllertization* of used by you interconnection by a huge number of different-Qualitative signs, peculiar to Form-Creators of various PCQs and various Levels. When high nutation Notions of ampliative Levels of Self-Consciousness are already quite well balanced and stabilized in your Focus Dynamics, then various manifestations of temperamental Creative Activity of low nutation SVUULL-VVU-conglomerates are much easier and faster comply with the requirements of more qualitative Experience.

3.0365. In fact, constantly focusing in your choices on the Notions of those whom you, in spite of everything, consider much more qualitative and developed, you in such a way «merge» through your Focus Dynamics with those f-Configurations of own LLUU-VVU-Form which already have identical Experience, formed by means of consistent «projecting» on each other a countless multitude of your «future Deaths» — through mistakes and failures, sufferings and deprivations, losses and gains, dramas and tragedies, happiness and success — not experiencing all that in reality but only watching and following in your Life principles peculiar to more qualitative «personality,» imitating it in the most important and the best. Each of you should eventually decide for yourself very essential question: «What is more important for me — to focus in «own» personalistic, but less qualitative Worlds, with the domination of egoistic principles (which will take very much time and psychic efforts), or spend the same efforts on the «imitation» of something better, already reached by someone, and on more effective intuitive formation of identical Experience?»

3.0366. If you actually, and not only in word, aspire to high Goals, you just cannot stay silent watching things that contradict your understanding and Notions. For example, when you see a child who is running for a ball that has flown in the direction of a traffic area, you will not start tacitly consider if he will be lucky or not, but will try to save him from possible danger and that powerful impulse will originate in you in a natural way. The same Naturalness and aspiration to correct some relationships in accordance to own, as you consider, more qualitative Notions should be present in all your everyday realizations.

3.0367. If you naturally start feeling shame for something you are still able to change or prevent, you should undertake everything you can so that afterwards you will not feel ashamed neither for yourself nor for the others. Your principled position on any case should always be active, nobody

will force you, you just will consider yourself obliged to at least try to correct someone's mistake. You should learn to activate your position in the surrounding World, influencing unfavorable situations in such a way so that people who has initiated them refocused into «your» personalistic World, where only corresponding positive reactions and altruistic actions are possible.

3.0368. Each of us, willingly or unwillingly, is a specific *mentor* for surrounding him people — a teacher and a guide, whose Life and choices evoke in others either a desire to imitate or serve a vivid example of how one should not be. However, you should not understand the words «teacher» and «guide» in these contexts literally and one-sidedly, from the position of indulgence to all your selfish unrealized desires, under the canopy that you supposedly do that only to teach somebody a good «lesson.»

3.0369. Such «mentorship» is, first of all, extremely irresponsible relative to yourselves, because this way you — slowly and insensibly — push yourself into pointed corners of own unrealized desires and weaknesses (arrogance, haughtiness, status-seeking, envy, jealousy and similar), with which you are simply not capable to cope, and therefore realize them through veiled negativism and devious duplicity of your «false lessons» meant for another person. A truthful Teacher is the one who without disapproval and with deep understanding will remind a person about the possibility of making more qualitative decisions, on time and delicately will suggest more qualitative variant and effectively, not just in words, will help somebody to shatter illusions of egoism, and get rid of everything that prevents the other person reach his high Goal quicker.

3.0370. In your scenarios there can appear such events as crisis that you did not start or a war that you did not begin and take part in, or a murder, violence, banditism, mendacious and corrupted politics and many other things which do not correspond to your SFUURMM-Forms. Your principled position should be based on clear understanding of main Reasons of origination of similar situations in the World, which renitively open in the iissiidiological Knowledge. Therefore, in order not to cultivate that dynamic by own demonstrations of utter negativism, antagonism and aggression, you need to use corresponding, more authentic informational bases, and do not follow those who benefit from panic, agiotage, outbreak of public opinion. Only thus, you can continue to actively refocus into those groups of STCs where similar insinuations just do not have any possibility to manifest.

3.0371. If some global negative or dramatic situation happened not by your hand, without your participation and you do not have any possibility to correct something by you decisive impact, then you should, first, settle your mind and start referring to it with deep philosophical understanding. Your task in any life circumstances should always resolve into not sinking into own emotions of irritability, disapproval, offence and similar negative states. You should try to find in your Experience any convincing for your positive Motivation in order not to unconsciously be involved into a destructive process and, not failing your principles, keep in your Focus Dynamics mental-feeling (intellectual-altruistic) balance. Same regards the specificity of your «personal» subjective perception of all possible cataclysms and disasters, where everything around you collapses and happens what you would not like to have in «your» personalistic World.

3.0372. In difficult and problematic situations you should just simply, confidently and calmly stick up to your rightness (if you are sure in it), your principled position (if you consider it more qualitative and harmonious than others) and, not imposing it, inform on anyone concerned. If nevertheless, in spite of all your efforts, there will be taken other decision, then you will not refocus into «someone else's» Mir, but, being sure in your rightness, keep staying in «your» personalistic World, where happened such, although unwanted by you, events. You should learn to react even to the most dramatic and tragic consequences of someone's irresponsible decisions and silly choices with deep Understanding of real Reasons of happening to you and without disapproval, in other words as yet incomprehensible for you given thing that have happened in your Life for your advantage — to gain some Experience extremely necessary at this precise point in time.

3.0373. The biggest obstacle to mastering these positive states are your yet very persistent and stable primitive Notions about «Death» as about imminence and inevitability of certain «ending» of your «personal» Existence. The entire illusion of your subjective perception of the events in surrounding Life or facts of someone's «Death» rests on the domination in your Focus Dynamics of many low nutation factors (for example, SVUULL-VVU-activity, sfuurmmformal ignorance and primitively), objectively constraining cognitive and realizational possibilities of your subjective Perception system. Therefore out of all simultaneous «kaleidoscope» of the multitude of events materializing around, you yet are capable to choose and proceed only one-single variant, out of which energy-informational content you make your subjective conclusions about what «exist» and what «do not.»

3.0374. However, actually absolutely everything that happens around you (and with you!) is completely not the way, as it may seem. If you «here» are subjectively watching someone's «Death,» it is possible that in another scenario it is not someone's, but particularly your «postmortem» refocusing has happen literary several minutes before that. You have not noticed that variant, because you are just not aware of that whole refocusing process — you are capable to distinguish only someone else's «postmortem» refocusing. Therefore, it was not you who observed your «Death» «there,» but only the people surrounding you «there,» including the person who has «died» for you «here.» Therefore, «here,» where you continue to self-consciously live, subjectively (for you and the rest people in the given scenario) it was another person who «died.»

3.0375. In the same way illusory everything happens «here,» where you live, relative to your «personal» Interpretation, who in the other scenario (for you — «there») has carried out «post mortem» refocusing, in other words has appeared to «die.» The whole problem of your relations with «Death» (or rather, not with «Death» — since it just does not exist, — but with those Notions about that process you have) is that when you talk about it, you can perceive this «event» only relative to someone, not to yourself, do not understanding that «Death» — is a very subterransive, very intimate, «personally subjective» process, which constantly and insensibly accompanies each of you during your whole Life (subterransive rotational Cycle). Your endless Life represents never ending succession of qualitative refocusing of your Self-Consciousness from the specific conditions of one rotational Cycles, multipolarizationally structuring Focus Dynamics of your universal Stereo-Form, into others, from one development scenario into another.

3.0376. In every specific scenario there can subjectively realize only one specific variant of personal

Interpretation of your Stereo-Form (but at that in it there is a multitude of different-Qualitative Form-Types of your LLUU-VVU!) whose NUU-VVU-Configuration by its subterransive properties and peculiarities (Wishes, Interests, Aspirations) in the most degree resonates particularly with the given mode of exuberation. All the rest Self-Consciousnesses Forms of the surrounding you reality — it is an objective entourage, i.e. a specific set of corresponding qualitative signs necessary for the creation in the system of your decoherent self-perception the personal Illusion of a certain «physical» movement. These unique «decorations» resonantly modeled for realizational specificity of particularly that variant (out of all the multitude of your «personal» Interpretations) represent all the necessary options and conditions for the manifestation by a «personality» in the given scenario of some aspects and peculiarities of subterransive life Creativity typical of it.

3.0377. The term «development scenario» is similar (corresponding, related, close) to the term «personalistic World,» but that is not absolutely interchangeable notions: everything that is happening to you and is subjectively experienced by you during some perceived period of time is carried out in a certain development scenario due to the presence in your Focus Dynamics of some peculiar only to you combinations of the multitude of subterransive Notions about «yourself» and about «surrounding you world.» Particularly these Notions compose the whole different-Qualitative energy-informational basis of everything (various events, all possible meetings, talks, presence or absence of certain people and animals, natural phenomena and so on) which consistently fills and gradually transforms the subjective dynamics of your personalistic World, changing in a corresponding development scenarios manifested through your Focus Dynamics.

3.0378. When the «personality» reaches the specific relatively high for the «current» condition of humanity — development stage, it is inevitably arrives to the deep belief that the most important in its Existence is to always stay self-conscious in that World, in which it perceives itself in the given moment, in other words by all means try to consciously stay in «own» personalistic World. Renitive Its understanding is a guarantee of actual realization of the most fundamental fact of constant «presence» in your Existence of the objective ability to «personal» Immortality. The way to understanding it, being accomplished collectively in the face of an uncountable multitude of Notions peculiar to someone's sporadic Worlds, nevertheless, by its realizational Essence, always stays incomparable, one-of-a-kind and absolutely subterransive.

3.0379. Everything that you perceive from the side and, having subterransively «unpacked,» again «project» into surrounding reality as potential possibilities of realization of your own «current» Interests — that all is a subjective reflection via you «personal» Perception of different-Qualitative Focus Dynamics constantly generated by other Self-Consciousnesses Forms of the surrounding your Word in the form of peculiar to them Notions and choices: by people, animals, plants, natural phenomena and so on. You immediately sort out all the multitude of these someone else's choices and reactions into those that satisfy you and appeal to your expectations and those that do not correspond to your demands towards your environment, trying to do everything in your power so that there would be more different favorable signs in your Life than unwanted consequences. That is how you subjectively form in your group of STCs objective conditions of your personal manifestation or personalistic World.

3.0380. I can describe that process more vividly, for example, on the available for your understanding circumstances. It is evident that everything that compose in the given variant of our «present» the notion «Ayfaar life» has possibility to exist and realize here exclusively because me, Oris, via Focus Dynamics — powerful and stable in its ampliative Notions — of my Self-Consciousness consciously and purposefully, every hour and every day stimulate to an active manifestation particular subterraneous tendencies and inclinations in Ayfaarians (intellectually-altruistic) and with not less effort methodically and consistently minimize the activity of other Notions and Interests (egoistic, primitive), thus gradually filling «own» personalistic World only with those signs and events which more and more correspond to my own Notions about the way the surrounding me World and people living nearby should be.

3.0381. Of course, the realization of all nuances of that creative-refocusing process demands from me (relative to own surroundings) constant and incredible — not only psycho-mental but also physical! — efforts, constantly directed by me (both «inside» and «outside of me») by powerful strong willed expression and accompanied by scrupulous analysis and comparison of showed by me results of my «current» activity with the signs of my own Interests. Out of all the multitude of peculiar to every Ayfaarian choices, inclinations, Interests and abilities, I at all cost try to develop and strengthen only those that most of all resonate with my own higher principles and Notions, and not with less persistence try to relieve my surrounding from what is against my intellectual-altruistic Interests, because it is weak or completely does not contribute the prompt achievement of the set Goal. That is a brief description of the general principle of constant reconstruction and reorganization of personalistic World by every person individually.

3.0382. Everything that one way or another is energy-informationally manifested in our mutual «present» is also represented in our personalistic Worlds, being their variable — more objective relative towards us — component which is quantitatively and qualitatively constantly changes depending on our subjective relation to it. In other words towards what exactly and how exactly surrounds us, we should always refer as to some «objective» circumstances which manifestation in our Life we, and only we ourselves, facilitated by the character of our subjective relations towards something or someone. If our relations with someone or something were different, then the circumstances in our personalistic World would also have completely different expression.

3.0383. Therefore you should never blame someone, if in your Life there occasionally arise some unfavorable situations — relative to you they are in the same degree «objective» as you are subjective relative to them. The less conscious your choices are and the more instinctive your reactions are, the more many circumstances of your Existence become dependent from someone else's will, Desires, Interests, goals and beliefs. That happens because in such a case you do not put into the process of TEC-unpackings of your Self-Consciousness enough quantity of Energy-Information peculiar to your Notions, and «your» personalistic World is reconstructed generally not according to chosen «personally» by you scenario, but according to someone else's whim provided by much bigger realizational Energy-Potential than your own Focus Dynamics.

3.0384. Each of you perceives not only «yourselves» but also all the rest from your surrounding only as a part of «own» World where everything and everybody would «circle» around you and for

you! thereat everything that «personally» you feel, everything what «personally» you create in «own» Worlds is structured only by specific Notions of your subjective Perception. You resonationally «projected» your Focus of Close Attention exactly into that part (certain development scenario) of the given group of STCs with which parameters NUU-VVU-Configuration of your given personal Interpretation displays the highest degree of identity. Concerning everything that happens around you and with you in that scenario, you should consider and perceive it as a necessary «supplement» to the process of choices carried out by you, as a certain background entourage of the variant of personalistic World willingly and independently chosen by you.

3.0385. Each of you in your subjective «present» is located exactly in the given state and exactly in the given specific place only because that qualitiveness of your own Focus of Close Attention actually corresponds to particularly that NUU-VVU-Configuration, which by own specific energy-informational parameters structures the given scene, the given part of slloogrent History of that World, given local «point» of Space-Time. We all interconnected with each other not only on the level of our conscious and unconscious interconnections (i.e. by constant quantum power impacts on each other), but also through slloogrent structure of Form-Creators of our DNA, whose wave abilities and creative possibilities of interaction with each other unbelievably exceed absolutely everything that you are capable to imagine about them.

Chapter 10. Formation of different Directions of development in the groups of human STCs based on different-Qualitative interactions between SFUURMM-Forms of all the multitude of personalistic Worlds

3.0386. Via specific FCA-dynamic of Form-Creators of your Self-Consciousness Form, each of you is solidly attached to rotational Cycles formed by those part of Collective Consciousness of «humankind» in which you in the given moment actually perceive yourself (physically stay, biologically manifest) and which you like other people «from inside» actively structure by qualitiveness of your Thoughts, Feelings, Desires and physical actions. To each Worlds' Form-system focused by that part of Collective Consciousness, strictly correspond subterransive energetic (inertial, gravitational) and informational parameters of f-Configuration of each Self-Consciousness Form, which (parameters) determine very narrow diapason of frequency of simultaneous quantum shifts in the Focus Dynamics of all personalistic Worlds of the given Form-system relative to each other. Precisely the presence (generation of each of Self-Consciousnesses Forms) of these subterransive frequency of focal «shifts» is the main reason of subjective «separation» of each Form-system (in its Perception by each of structuring it Self-Consciousnesses Forms) onto the multitude of seemingly isolated and differently interpreted personalistic Worlds.

3.0387. I have already explained that the structure of each «physical» World and also all Self-Consciousnesses Forms energy-informationally structuring it by their Focus Dynamics — form subelementary (doolls), elementary (wave) and superuniversal (flaks) Levels of manifestation and to the objects of Galactic amplissimness — represents slloogrent multi-dimension of interconnections,

which in every Level of their exuberance reflect absolutely all the properties of the given Universe. Each personalistic World in that endless variety is formed by a specific sequence of quantum interactions and reflects precise space-time dimension, which is characteristic for specific synthetic state of Energy-Plasma.

3.0388. Each personalistic World, in the most detailed way, is quantized strictly by certain SFUURMM-Forms formed by narrow-specific force interconnections between the multitude of different level Fields-Consciousnesses (Form-Creators and Info-Creators) which resonationally realizing in the general for them Focus Dynamics, in fact, form that single subterraneous Field-Consciousness of the given World which scientists determine as «electromagnetic field.» Field-Consciousness of each personalistic World has own distinct parameters of force interactions as a result of which in Space-Time there is formed subterraneous for the given Field-Consciousness size of «quantum gravitational constant» (in the «physical» diapason of interactions the gravitation is always quantized). In particular as a result of every personalistic World has its own, very-very narrow, value of «gravitational constant,» all sllogrent Self-Consciousnesses Forms, seemingly «inscribed» via their interconnections into a thin quantum geometry of its Space-Time, are very strictly attached by their f-Configurations to the structure of «own» personalistic World and by no means can appear outside peculiar to it energy-informational parameters.

3.0389. Continuous Focus Dynamics of rotational Shifts, successively and duvuyllerrtly changing in our Perception systems personalistic Worlds of our observation and Existence with an average speed of 250–400 times per second, creates the very same «planetary gravitational field,» which the scientists cannot possibly accurately calculate since the values of very subtle parameters of dimension, peculiar to each of very quickly changing one another personalistic Worlds, are also continuously changing together with Focus Dynamics of Self-Consciousnesses Forms structuring these Worlds. A bit different dimension and you have a bit different parameters of electromagnetic fields, which means a bit different meaning of natural result of their interaction between each other — gravitation. That moment is very important for explanation and understanding of that, stirring our entire Imagination, organizational order of things, of that most superfine coherence in the entire structure of Macrocosmos, which lets all different-Qualitative types of Worlds and forming them Self-Consciousnesses Forms to simultaneously realize thereat by no means obstructing each other.

3.0390. Self-Consciousnesses of NUU-VVU-Forms focused by each of you, are strictly attached to a certain sequence of changing in the rotational dynamic of duvuyllerrt personalistic Worlds, forming a more integrated sllogrent Form of Creative Activity of Energy-Plasma, which can be conditionally determined as one of an uncountable multitude of very narrow specific aspects of Focus Dynamics of Collective Intelligence of «humankind» that creatively realizes, in particular, in the conditions of the given type of 3–4 dimensional subjective Reality.

3.0391. That is basically Collective Consciousness of that «humanity» to which you — through f-Configuration of focused by you «personality» — subjectively belong in every moment of your simultaneous Existence. Being a sllogrent part of the whole Collective Intelligence of «Earth humanity» you are very strongly limited in every of your choices by the narrow diapason of dimension that is typical of even not «entire humanity,» but only of that part of the multitude of its Collective

Consciousnesses in which subterraneous Forms you in the given subjective moment are focused via your Focus of Close Attention.

3.0392. The choices you supposedly independently make in every moment of your never-ceasing Existence are, actually, not free, but represent a sequence of quite limited number of quantum possibilities, which qualitiveness is very strictly determined by subterraneous energy-informational peculiarities (parameters of Fields-Consciousnesses) of only that part of personalistic Worlds of the given Form-system to which belong NUU-VVU-Form-Types focused by you. Slloogrent f-Configuration of each of your Self-Consciousnesses Forms precisely reflects all the tiniest quantum (energy-informational) peculiarities which a typical of slloogrent f-Configuration of that part of Collective Consciousness of «humanity» in all the diversity of NUU-VVU-Form-Types of which we «presently» focus. Your main task, as conscious Creators of your own Life, is to find and choose from each of the carried out by you choices — out of the general dynamics of different-Qualitative possibilities — precisely those variations that in the most degree would be capable to facilitate realizations of your Goals.

3.0393. Slloogrent f-Configurations of all the rest Self-Consciousnesses Forms (including people and animals), energy-informationally manifesting in our choices through narrow-specific activity of Form-Creators of DNA molecules, give to every «person» equal possibilities of using absolutely all Energy-Information, by which not only the given part of Collective Consciousness of «humanity» is structured, but also the whole Collective Cosmic Intelligence of the LLUU-VVU-Entity. Except one «people» use the given possibility to choose from the entire suggested to them Energy-Information only the most qualitative and best, starting to consciously model and realize own Destiny at own discretion and understanding (i.e. consciously realizing basically in «own» personalistic Worlds) and others are very easily tempted by what the first denied as unacceptable and therefore constantly become «victims» of unfavorable circumstances (unconscious participants of someone else's sporadic Worlds).

3.0394. The reason of that «injustice» lies in the presence or absence in «people» of SFUURMM-Forms of multisided and different-Qualitative Experience which, in its turn, is transmitted into Self-Consciousness of each of us not only in the process of TEC-unpackings of personal Self-Consciousness, but also from the multi-dimensional structures of variable ethereal component (collective Subconsciousness, Supraconsciousness). That Experience in every type of Collective Consciousness of «humanity» is accumulated in the most qualitative — ampliative — Levels of its slloogrent f-Configuration, which subjectively can be determined as Levels of highly intellectual thinking and altruistic feeling. Only due to the presence in Focus Dynamics of similar high nutation SFUURMM-Forms, the Principle of unity and integrity of all the components of the general Collective Intelligence of Humankind is kept and fulfilled, simultaneously manifested in the multitude of Time Flows.

3.0395. Love, being the main basis of Intuition and initially present in each of us in the form of altruistic sensuousness, has possibility to turn into life Wisdom only at an active interaction with constantly manifested Willpower modeled and supported by high Intellect. In particular their joint Synthesis carried out in the most multifarious life situations lets people successfully overcome in

itself the slightest disharmonious states and thus constantly improve through Focus Dynamics of chosen by them Existence Forms. With the help of such stable manifestation of unity of high-quality thinking and feeling we acquire and develop the ability to high frequency SFUURMM-Forms of Intuition thanks to which you can actively accumulate in your Self-Consciousness a vast Experience of billions of your simultaneous Lives choosing out of all current suggestions only the most valuable and necessary, but not for your selfish Form but for the most fruitful, conscious and socially useful collective-subterraneous Existence.

3.0396. It is very difficult to estimate your choices from the degree of their altruism or egoism, because very often for making selfish choices there is found quite a number of convincing and logic Motivations, which, if you try, could be easily considered to be «altruistic.» If you try to orient on maximally high qualities, on Creative Potential of only your «present personality,» than you will not be able to authentically understand and determine for yourself what in reality is that conditional «limit» of your relationships with the surrounding World, because your «personal» opinion about yourself is usually too subjective (either critical or overstated). In order to be able to understand something deeper, you need to try to more objectively (dispassionately) compare this with something else, already synthesized and repeatedly realized by you.

3.0397. Until your Focus Dynamics is stably fixated in NUU-VVU-Configurations of those «human» STCs where rule dual (ambipolar) type of opinion and relationships, you can very distantly imagine the quality of choices made in the known for your circumstances by other «people,» and that Notion will be also very relative and most often false. Therefore in order not to make a mistake and not to fall between two stools, always try to make in every situation as bigger «reserve» as possible between the quality of the taken by you decision and the supposed quality of choices levels which the most developed representatives of modern humanity can make. Do not be afraid to assign yourself to them — you will never make a mistake in a choice!

3.0398. You cannot even imagine how huge or sometimes completely insignificant can be that gap between your supposed and real possibilities. But in either cases in your subterraneous rotational Cycle — as a logical outcome of realization by Form-Creators of the powerful act of inter-Qualitative two-invaderental Synthesis — there happen «postmortem» refocusing: as soon as qualitative difference between your potential creative possibilities and actually made choices begins to highly increase or, vice versa, decrease — your refocusing will start having too radical character, which will lead to the act of inter-Qualitative Synthesis.

3.0399. Let me remind you that — physiologically — at such an act in some resopasons of general exuberation there happen «projection» (resonational implementation) into Focus Dynamics of «personality» of completely *new* synthetic combination (SFUURMM-Form) and connected with its realization *powerful* (comparing with intra-Qualitative processes) energy-informational potential, and bio-Creators of some organ or system of biological organism of the given personal Interpretation turn out to be not ready to its effective processing.

3.0400. That's why at the same moment Form-Creators redirect their Focus Dynamics into f-Configuration of other homologous personal Interpretation (structuring the other scenario of

development), where are present all the possibilities for the successful realization of newly formed SFUURMM-Form. Usually every such act of inter-Qualitative Synthesis functionally develop in the organism as a powerful emotional stress, as a deep and rapidly growing psychic emotion accompanied by hormonal «storm» abruptly destabilizing already existing neural interconnections between bio-Creators of different brain parts, which provide certain functions.

3.0401. In the organism of the next «personality» necessary neural interconnections are carried out through somewhat different chains and, thus, are capable to maintain so strong mental load not destabilizing thereat the functioning of bio-Creators of the whole organism. Usually after unconscious realization of «postmortem» refocusing of «personality,» the hormonal activity of bio-Creators of its organism normalizes and destabilized psycho-mental state of «personality» becomes balanced due to the activity in its FD of more resonational (relative to the new f-Configuration) SFUURMM-Forms and formation of more ampliative Motivations on their basis.

3.0402. If choices *consistently made* by you become too egoistic (aggressive, cynical) or, vice versa, too altruistic (or high intellect-altruistic) comparing with an «average» choices potential of the humankind of the given group of STCs that will indicate their radicalism and incompatibility with Focus Dynamics of the surrounding your reality. Since the process of «reprojecting» from one group of development scenarios into the other happens successively and gradually, the intensity of «postmortem» refocusing might be completely undetermined (it depends on many factors: radicalism of choices, their consistency and orientation, and many other things). In any of these dual variants Focus Dynamics of your «personality» will be intensely structured by all possible «tragic» for you events, most part of which «personally» you will not notice or feel in any way, because you always refocusing into more corresponding to your Notions scenario will as before perceive yourself alive.

3.0403. You always «die» somewhere not because your «time comes,» but for two Reasons: either because of reaching in your refocusing conditional — for the given group of STCs — «end» of development in some protoformal (not lluuuvvumic) Direction (which is usually perceived by people as «degradation of personality»); either because VLOOOMOOT of NUU-VVU-Forms focused by you in the given group of Continuums already does not correspond to qualitiveness of synthesized by you realizational possibilities and therefore cannot provide satisfaction of our increased creative requirements. In other words the most qualitative from your SFUURMM-Forms can realize only through Focus Dynamics of NUU-VVU-Forms which structure more qualitative groups of STCs. When the dynamics and energy-informational potential of such Notions reach uttermost for the given group of STCs point, in that moment there happen «postmortem» refocusing into more corresponding scenario. Subjectively you register it as an improvement of particular conditions of your Existence.

3.0404. That Principle works in all groups of Continuums. Everywhere, wherever you would duvuyllerrtly (and multipolarizationally!) «project» via your Focus Dynamics work one and the same Mechanisms of alignment of realizational possibilities of group of STCs and realizational requirements of manifested in it «personalities.» Always *more qualitative* Choices and more qualitative state of Self-Consciousness stimulate Focus Dynamics of subterransive rotational Cycle into more qualitative personalistic Worlds, where the «personality,» correspondingly, possess

not only more favorable conditions for its creative development, but also better possibilities for the development of its biological organism: in the next group of STCs it gets sick less, decrease pathological signs earlier peculiar to it, in a «miracle way» disappears signs of «fatal» diseases and similar. However, you should not forget that all these favorable signs manifest already in a «new» group of STCs, and in the previous scenario the given «personality» nevertheless «dies» from some «fatal» disease! So not only «sinners,» but also «saints» are exposed to all possible «mortal» factors (diseases, situations, catastrophes).

3.0405. No matter how strange it may seem, the same principles are valid in the cases of realization by some «personality» of uttermost low qualitative — for the given group of STCs — «postmortem» refocusing: getting into conditions, more corresponding to the selfish Notions of «personality» about the surrounding it reality and about «itself,» the tensoriness of its «personal» Focus Dynamics relative to slloogrent Focus Dynamics of the rest habitant of the «new» (for it) group of STCs, comparing with the previous, somewhat decreases (to certain states!), which also can lead — for a shot period — to a significant improvement of existence conditions (financial, habitable, professional, social and so on) and health of the given «personality.»

3.0406. Renitively and thoroughly understanding that consistency (the degree of resonational correspondence of Focus Dynamics of «personality» and the biggest part of the surrounding it society), you can find for yourself the answer to the question why many clearly bad-tempered, undeveloped and focused only on themselves people (criminals, thieves, politicians, financiers, businessmen, show-business «starts» and others) whose choices are completely far from lluuvmic signs (high intellectual Altruism + high sensual Intellect) so often possess in the given groups of STCs good health or hold higher positions of social «ladder.» Also why living near them kinder, more altruistic and intellectually developed people continue literally leading a miserable life in the difficult and often just non human conditions? What is that: gross injustice or required and regular dynamics of the process of advance and development of any Self-Consciousness Form?..

3.0407. The thing is that general structure of Focus Dynamics of Self-Consciousness of any from NUU-VVU-Form-Types adjusts to Focus Dynamics of subterraneously surrounding it reality in quite a specific way: the highest percentage in it occupies Creative Activity of SFUURMM-Forms with characteristic signs of lluuvmic development Direction — High-sensual Intellect + High-intellectual Altruism (HSI + HIA), — the more qualitative and balanced according to potential realizational possibilities (relative to «personal» Interests structuring it) *gradually* become all space-time structures (groups of subterraneous STCs) in which similar Focus Dynamics consistently manifests.

3.0408. However, due to yet very high degree of inertionness of Focus Dynamics carried out by all us and simultaneous (together with synthesized signs according to two *human* Dominants) presence in it of yet equivalent according to own Creative Activity SFUURMM-Forms of all possible protoformal Directions (also powerfully manifested in our Life through specific protoformal — *not lluuvmic* — signs of «mentality» and «vitality,» «intellectuality» and «altruism»: deception, greediness, status seeking, suitability, cynicism, adaptivity, emotionality, self-abnegation and so on), your refocusing into STC with powerful intensification of Notions of lluuvmic Direction is carried out yet very

slowly (it is very vividly illustrated on the example of the slow spreading pace of the iissidiological Knowledge in the given group of STCs).

3.0409. That inertionness is also maintained by the thing that you, due to the presence in your Focus Dynamics of all possible protoformal activity (which is expressed through constant changes of your «current» Interests, tastes, viewpoints and preferences), are yet NOT able to focus for a long period in these high frequency SFUURMM-Forms (meaning, faster become more conscious participant of more qualitative scenarios), constantly «sinking» into some other development Directions and constantly «swinging» between them — changing groups of focused by you STCs. That's exactly what leads to your subjective perception of the qualitiveness of your subterransive Existence in the form of ups and downs: the more in your choices Notions conflicting with dominant tendencies of general Focus Dynamics of people of the given group of STCs, the less subjectively favorable becomes conditions of your Life (there appear more failures and troubles, conflicts and quarrels, dangerous situations and tragic events) and vice versa.

3.0410. The less is the activity in Focus Dynamics of lluuvvumic signs (HSI + HIA), the more the energy-informational structure of groups of STCs, consistently focused by the given «personality,» includes in itself the signs typical of various protoformal Directions, in which the biggest realizational favor (i.e. subterransive conditions of the Existence of each «personality») is attached to f-Configurations of people whose Focus Dynamics is also filled with SFUURMM-Forms with most covallert (relative to the given Direction!) signs.

3.0411. In such STC those people who in their choices firmly and actively orientate on the Synthesis of Intellect and Altruism will not live better and most satisfactory (relative to physical survival, domestic comfort, social convenience, creative realization and so on) — because between their «personal» Focus Dynamics and collective Focus Dynamics of the most people forming f-Configuration of the given group of STCs, there exist a high degree of tensorness according to peculiar to them signs; better life will have those people who in their life creativity — through corresponding Thoughts, Feelings and Desires — consistently realize in the Notions typical for energy-informational structure of specifically *given* group of STCs.

3.0412. By the way, it concerns not only the organization of the conditions of Existence of followers of intellectual-altruistic creativity, but also representatives of all the other protoformal Directions (not only from among people, but also animals and plants) which signs in subterransive Focus Dynamics, in one or another degree, are tensor relative to SFUURMM-Forms *really dominant* in the given group of STCs (through politics, religion, culture, and also social, spiritual, moral and material priorities of values). Therefore in the «present» human society there exists such a huge division of people into social classes:

1. Least significant in number part of Earth population are the most wealthy and creatively successful people, who are main carriers and stewards of all *prevailing* signs structuring the *given* group of STCs (those who through peculiar to them natural inclinations and creative realization practically fully resonate with the main value priorities, which clearly and firmly dominate in the exact given society: both in an individual country, nation or professional collective and in general

in the given group of STCs); exactly these people, concentrating in their hands all the mechanisms of influence on huge mass of people, possess all the possibilities for imposing and establishment in all the human society those laws, relationship, moral and ethics principles which fully reflect their own Notions forming in such a way in their group of STCs characteristic for it signs of qualitiveness;

2. Much more numerous part of Earth population are less lower income people not fully realized in attracting them Direction, though they are very successful and influential people who have quite easily adjusted their more qualitative (from lluuuvvumic viewpoint) Interests and SFUURMM-Forms to please requirements of the surrounding them society (those who least of all conflict with basic Notions of the given group of STCs, by all their choices demonstrating a high degree of covarllertness with the main Notions and weak degree of imperseptness relative to some tendencies);

3. The most numerous part of the humankind Collective Consciousness are middle-class and creatively unrealized (due to the absence of corresponding possibilities) people, who do not wish to sacrifice their life and creative priorities in order to please the opinion of more successful majority, constantly being in conflict with rules and norms, with mechanisms of realization of laws and principles, with conservative tendencies and Notions established in the society by this minority (those whose tensorness relative to the main — the most active — protoformal Direction structuring the given group of STCs is much more impersept and sometimes even cruvursorrt than among the representatives of the second class);

4. The second in number, and the strongest by the degree of the general state of tensorness and instability and therefore the most active, part of Focus Dynamics of the humankind Collective Consciousness are the poorest and less adjusted to the existing circumstances people for who their own principles and Notions compile the highest value and importance, who constantly stay in the state of deep and uncompromising conflict with the state, justice and also with everyone who do not live and think like them (the most impersept and also cruvursorrt relative to the dominant signs of the given group of STCs part of the population with clear predominance in its subterransive Focus Dynamics of SFUURMM-Forms of completely other protoformal Directions).

3.0413. Let me once again underline that similar subjective classification of the representatives of each type of the humankind Collective Consciousness — in every group of simultaneously focused by them STCs according to the signs of their subterransive livelihood security, favor of their creative realization reflects *objective difference* between qualitative state of «personal» Focus Dynamics of every «personality» and general Focus Dynamics of people structuring the given group of STCs.

3.0414. Let me remind you that all types of human s-Realities and STCs, at their exuberation in the conditions of 3–4-dimensional diapason, are formed on the diffuzgent — different-protoformal — energy-informational basis at any given degree of invaderentness of basic Aspects of two PCQs: ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence. However, in every duvuyllertr group of «human» STCs, on the background of these typical — for all NUU-VVU-Forms — lluuuvvumic invaderentness, in its turn, actively manifests specific type for the given group of «secondary dominancy» expressed through the increased activity — in the general mass of people — of Focus

Dynamics of the carriers of separate signs of some of ten vecsative PCQs possessing in the given specific manifestation conditions the higher degree of geyliturgentness.

3.0415. For example, such synonymous notions, as «money» and «glory,» «wealth» and «popularity» are realizational Forms of signs which belong to different PCQs. In «human» Continuums they serve — as an addition — for deeper realization and catalyzing of basic Forms of human signs — Intellect and Altruism: active realization of Intellect signs usually attracts money and wealth, and consistent realization of Altruism, as is common, is followed by glory and popularity.

3.0416. So, against the background of two-invaderental lluuvmic Synthesis Scheme, in Focus Dynamics of an endless multitude of human STCs there actively manifest all possible types of similar geyliturgent combinations: somewhere, for example, through primitive signs of intellect (mentality, rationality) and elementary altruism (instinctive survival) in life creativity of human society there prevail selfish criteria of values and actively realize aggressiveness, cruelty, practicability and physical strength; somewhere — deception, hypocrisy, intrigue, greediness and wastefulness; somewhere — status seeking, wealth, fame and so on.

3.0417. Only with the predominance in the general Focus Dynamics of people of high frequency SFUURMM-Forms possessing much higher covallertness and geyliturgentness by many different-Qualitative signs, in our Synthesis Scheme (HSI + HIA) there start to resonationally get involved SFUURMM-Forms of the highest (for us «present»!) Spirituality, Responsibility, Serving and, finally, Unity. All the above mentioned signs of selfish states are synthesize into thoroughly and renitively realized Experience relieving Focus Dynamics of highly developed people of our favorable «future.»

3.0418. Due to the considerably increased degree of covallertness between earlier impersept interconnection, in «future» STC in a following way there radically changes considered by us above scheme of diversification of Focus Dynamics of people onto antagonistic classes: less numerous, but potentially the most active and meaningful there becomes the class of intellectually-altruistic Mentors and Curators (basic iissiidiologists) Who via their strong purposeful SFUURMM-Forms set and maintain in the general Focus Dynamics of own group of STCs stable lluuvmic tendencies (HSI + HIA + ALL-Unity).

3.0419. The most numerous is the class of Servers (practicing iissiidiologists) who self-sacrificing and selflessly introduce into the Life of the entire human society the most typical lluuvmic signs — HSI and HIA. Focus Dynamics of the representatives of these two classes demonstrate a certain — *non*-principled — tensoriness only regarding to more renitive Understanding of the iissiidiological Knowledge and its implementation for inter-Qualitative Synthesis in some protoformal development Directions with the purpose of creating the most favorable conditions for the Synthesis of the State «CC Potentiality» and strengthening the influence of the most covallert attributes of PCQ ALL-Unity on the general Focus Dynamics of humanity.

3.0420. The least in quantity — after Mentors and Curators — is the class of Variators and Publishers, who use the iissiidiological Knowledge to actively and selectively develop and strengthen in the

general Focus Dynamics of people some of the most covallert diffuzgent Direction of the possible development of Collective Consciousness of «humanity.» Due to their persistent activity, based on the powerful priority in their Focus Dynamics of specific protoformal SFUURMM-Forms, in the general slloogrent structure of NUU-VVU-Form-Types, except for NUU-LTTVULL-VVU-RS-Form-Type of the main lluuvvumic Synthesis Scheme (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Unity), in even more distant variants of our dimidiomittense and translucense «future» there appear specific Form-Types of Self-Consciousnesses of LLUU-VVU-Forms synthesized on the basis of one of the following «inner» sub-Scheme:

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Integrity = NUU-YUYYSFFF-VVU-DS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Aspiration = NUU-GRUNNSS-VVU-LS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Essentiality–ALL-Permeability = NUU-RLOKKSS-VVU-MS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Knowledge–ALL-Informedness = NUU-SVVAFFT-VVU-KS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Primordiality–ALL-Initiality = NUU-MGLOYGG-VVU-TS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Abundance–ALL-Fullness = NUU-VRIFMM-VVU-VS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Vacuumness = NUU-DDREYKK-VVU-GS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Mobility–ALL-Presence = NUU-FFSARRD-VVU-KHS-Form-Type;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Steadiness–ALL-Stability = NUU-GVOSSMM-VVU-NS-Form-Type;

Chapter 11. The Mechanisms of the formation of stable illusion of surrounding reality in Focus Dynamics of Self-Consciousness of «personality»

3.0421. Let me remind you that carefully studied, but yet not understood in any way by many researchers, phenomena that is by many of you very broadly and schematically interpreted as CONSCIOUSNESS — implying thereunder only certain limited in Space-Time area in a certain linear closeness from the borders of a densely material Form — actually represents slloogrent combination

of energy-informational interconnections, which, initiated and subterraneously identified by Form-Creators of Perception system of a certain Form (f-Configuration), self-spreads via all its different-Qualitative structures (interconnections) into all the Infinity of Universal Focus Dynamics, including mechanisms which provide all the possibilities for unlimited Creative Activity in Focus Dynamics of various Self-Consciousnesses Forms (including NUU-VVU-Form-Types) of an endless multitude of different-typed and different-Qualitative Cosmic Entities.

3.0422. What we subjectively determine as *Focus of Close Attention* (SSVUU-SSMM) is the most direct and main Mechanism of the Illusion of our physical (biological, corporal) Existence, Which (the Mechanism) with the help of DNA Form-Creators models and organizes in every «point» of exuberation of Own resonational Activity the corresponding type of realizational Form, which in the most degree contributes to fulfilling the Task set for Collective Intelligence of Form-Creators of the given realizational Level of TOO-UU-Entity of more qualitative Level.

3.0423. FCA by Its energy-informational Essence is one of the Ways (Mechanisms) of transgression of «projections» of Interests (Ideas) of more qualitative interconnection into specific conditions of their possible localization (exuberation) in Space-Time. These are not Form-Creators themselves, but one of the Principles of egllorlitive Impulse-Potential initiated in them Interest to creative realization (annihilation of tensors and dissonational distances) with the objective to return Information from the State of Energy-Plasma into the balanced (i.e. pre-mercavgnational!) SSS-State.

3.0424. Multipolarizational Focus Dynamics of Self-Consciousness of every Stereo-Form relative to FD of any from the countless multitude of peculiar to It «personal» Interpretation, represent FD of Collective Cosmic Intelligence (TOO-UU-Entity). In its turn, *relative to FD of Its the* LLUU-VVU-Entity (CCI), Its own FD is perceived by us as FD of Self-Consciousness Form. Here we consider yet only 3–4-dimensional conditions of exuberation of these FD, which are carried out through all the multitude of variants of Focus of Close Attention (in 4–5-dimensional conditions, It is transmutes from the SSVUU-SSMM state into the SSLUUF-SSMM state — Focus of Integral Motivation Impulse or FIMI of translucense analogs of NUU-VVU-Form-Types). There are as many various different-Qualitative states of FCA, simultaneously modeled in the structure of Self-Consciousness of every Stereo-Form, as there are subterraneous scenarios of development (and variants of corresponding to them in ODS Duplex-Spheres) in different types of subjective Realities.

3.0425. Any «point» of resonational manifestation of this subterraneously-collective different-Qualitative transgression, being — through energy-informational interconnections — in the absolute dependence from each other, is in the state of Creative Activity, expressing in the Processes of slloogrent Cosmic Transmutation through peculiar only to it qualitative combination. Absolutely all the subjective Experience received by the «projections» of Form-Creators of every given Self-Consciousness Form in every specific f-Configuration, «momentary» integrates («reprojects») from FCA *into own* «managing center» (for example, into FIMI of LLUU-VVU-Form) wherefrom enriched with new Energy-Information, is transmitted into even more qualitative Levels of Self-Consciousnesses of even more perfect and developed Forms of CCI.

3.0426. In the moment of exuberation of realizational Forms of your Stereo-Forms (which happen instantaneously-simultaneously!), in the structure of Self-Consciousness there is initiated a universal

Mechanism of possible subterraneous adjustment (resonational regulation) of SSVUU-SSMM within a local mode of exuberation typical of the type of s-Reality of the given diapason of dimension. That lets Form-Creators of Every Stereo-Forms, without leaving the state of Multipolarization, automatically change the fixation of all Focuses of Close Attention directly in the correspondence with instant change of qualitiveness of psycho-mental activity («quantum shift») of every form simultaneously focused by them «personal» Interpretations. Thus forms that process which we determine as Focus Dynamics: every qualitative change in Focal Configurations is reflected in Space-Time in a specific dissonational distance; annihilation of each of these distances (change of less qualitative FCA into a bit more qualitative) creates in the Perception systems of duvuyllerrt f-Configurations subjective effect of a certain dynamics of Focuses.

3.0427. The Mechanism providing (through functions of bio-Creators of the brain) in your Perception unceasing — quantum by quantum — process of refocusing from less resonational «parts» of slloogrent f-Configuration of Stereo-Forms into more resonational, is called Impulse Ring (SVUU-SLII). You should understand that it is not a molecular bio-structure, but a part of slloogrent FD of Form-Creators providing the general Mechanism of exuberation of absolutely all mixtum and dimidiomittense analogs of NUU-VVU-Form-Types (for example, for Form-Creators of personal Self-Consciousness a motivational source of refocusing are Form-Creators of Collective Subconsciousness, whose FD in their turn is initiated by Form-Creators of Supraconsciousness and so on) and «projecting» peculiar to them interconnections into neural chains of bio-Creators of brain of every «personal» Interpretation.

3.0428. Speaking more precise, in these specific functions of providing subterraneous quantum by quantum refocusing of every «personality» in much degree participate bio-Creators of *limbic* system and *epiphyses* (so called «piniform» or «pineal body») which, depending on the particular ethereal-focal parameters of NNAASSMM and VLOOOMOOT, initiate in the Perception system this or that narrowly specific reaction or subterraneous line of behavior of the given person in every moment of its exuberation.

3.0429. In an extremely simple way that process is carried out in a following way: slloogrent Information (in the form of available to the given Perception system UU-VVU-Forms) is «projected» from the Perception systems of more amplificational Self-Consciousnesses Forms of the given Stereo-Forms into the special informational «collectors» (they are also transmitters) — microscopic siliceous crystals formed into the multitude of spherical micro formations (from millimeter fractions till two millimeters in diameter) in the epiphyses of the brain, where resonational (relative to the given f-Configuration) part of slloogrent UU-VVU-Form converts into nervous impulses and transmits through neural network into corresponding structures of the limbic system (hippocampus, hypothalamus, amygdaloidal and corpus mammillary, pars reticulate of mesencephalon and others). The slightest change of FD state of «personality» is carried out under a constant control of bio-Creators of its epiphyses correcting work of the whole brain, which means a continuous process of quantum by quantum refocusing.

3.0430. SVUU-SLII — is a part of general Mechanism of simultaneous USCF-realization of Form-Creators structuring all the development Directions peculiar to lluuuvvumic birvulyarity type. Form-

structures do not have any relation to your subjective Notions about a certain «circle,» because under that term is meant a certain subjective «circularity,» «closeness» (lockout) of a certain particles of slloogrent (in your Notions — endless) focal-ethereal interconnections on Focus Dynamics of Form-Creators of Collective Cosmic Intelligence of a certain type.

3.0431. The world «impulse» here is used due to the fugacity of energy-informational change (destabilization, fluctuations) generated in the moment of resonational exuberation of Focus Dynamics in the Perception system of every Self-Consciousness Form («personal» Interpretation). If we leave out some nuances, we can conditionally compare SVUU-SLII with transmitter of slloogrent quantum shift which provides Form-Creators of every Self-Consciousness Form with subterraneous kleksing. As a result of that there is carried out such a property of Focus Dynamics as Multipolarization.

3.0432. Due to the presence in the structure of Macrocosmos of such universal and slloogrent Mechanism, in the conditions of exuberation of Focus Dynamics of Self-Consciousnesses Forms in Secondary and the Tertiary Energy-Plasma, in Space-Time of our DDIUYIYI-Entity it turns out to be in fact impossible to exist for such «manifestation point» which specific qualitative characteristics Form-Creators of Self-Consciousnesses would not be able, one way or another, to subjectively analyze or decode into interpretations more or less corresponding to them in qualitiveness. Because of that, as a matter of fact, in the given groups STC Form-Creators of the brain of focused by «me» Self-Consciousnesses Forms can transmit and reconstruct into a specific words and phrases the highly nutational Energy-Information which is not «my» direct empirical Experience, but structures much more qualitative Levels of Self-Consciousness of SSS-Entity.

3.0433. «Being projected» from the Levels of Collective Subconsciousness (and also Supraconsciousness, Superconsciousness, Hyperconscious, and so on) of LLUU-VVU-Form, GOOLGAMAA-A, SSMIIYSMAA-A and even TLAASSMA-A into Focus Dynamics of certain «personal» Interpretations, from simultaneously focused by me, these Energy-Information is subterraneously unpacked and specifically adapted (in the form of the iissiidiological Knowledge) to the multitude of variants of specific conditions of exuberation becoming thus a part of Focus Dynamics of the multitude of different type Collective Consciousnesses of «humankind,» simultaneously structuring countless groups of STCs. Absolutely all Form-Creators are capable for that, regardless of Synthesis Schemes carried out by them and types of birvulyarity, but subjective limits of these abilities are strictly determined by qualitiveness of f-Configurations (parameters of VLOOOMOOT and NNAASSMM) of each of the focused by them Self-Consciousnesses Forms: the lower is the tensoriness of focal-ethereal interconnections, realized by them through Focus Dynamics, the higher is the effectiveness of subterraneously carried out by them process of Self-cognition.

3.0434. If we take DNA of only one cell of living organism, its informational supply — through the whole complex of genes and their regulators — will allow to get an Idea about incalculably more difficult Form-structure, which via its informational-genetic potential, comparing to the structure of the cell, is as much different from it as the structure of all the physical Universe is different from the structure of our Self-Consciousnesses Forms. The Presence in Self-Consciousness of That universal Mechanism provides Form-Creators with vast possibilities, depending on the qualitiveness of instantly synthesized by them Interest, to resonationally «project» into NUU-VVU-Configurations

of particularly those subjective Realities and groups of STCs where the narrowly specific properties of Energy-Plasma are capable in the most degree to reflect — through those or other psycho-mental states — the content and the meaning of that subjective Interest. Actually, particularly that provides each of the conscious or unconscious creative manifestations of FCA of any personal Interpretation in a completely specific personalistic World (development scenario).

3.0435. There are as many all possible and different-type variations of Worlds' Form-systems, subjective Realities, and STCs formed in Space-Time through slloogrent Focus Dynamics of our Planetary Entity GREIYSLIIS (till ± 12 dimension), as there are subterransive «*projections*» of these Words (Duplex-Spheres, Creativity Spheres of OLLAKT-DRUOTMM-systems) in different-Qualitative Levels of Its Self-Consciousness, which («*projections*» of these Words) provide self-conscious life activity of their inhabitants (i.e. «*Qualitative Content of the World*») with strictly corresponding to their f-Configurations «*Qualitative Offer*.» For example, absolutely everything that you «personally» have or what presently surrounds you in «your» personalistic World, is duplicated in various variations further in an uncountable multitude of personalistic Worlds of your other «personal» Interpretations, where «you» — not less realistically for «yourself» and in parallel with your «current» Life — also subjectively live further through countless «own» Lives, qualitatively different from each other in a certain realizations of all possible variations of all your «every moment» choices and relevant circumstances.

3.0436. With every of zillion (10^{6^n}) of these «personal» Interpretations of your Stereo-Form, you though *subjectively* appear to be «separated» by different-Qualitative structures of the multitude of groups of space-time Continuums, but at that *objectively* always remain *karmically* (in Thoughts, Feelings, Desires) very tightly connected through various Levels of «interpersonal» interpretational relations, which in a huge degree influence on the dynamics of circumstances of perceived by you, Life and which are very easily (but completely unnoticed and unperceived by you) can resonationally complement each other or interchange themselves with their Elements (UU-VVU-copies, UU-VVU-conglomerates, SFUURMM-Forms) depending on the properties of MENTAL- and ASTRAL-Plasma, used by Form-Creators of Self-Consciousnesses of focused by You «personality» in each of the certain episodes of your life creativity (ASTRAL-Plasma + MENTAL-Plasma = *Karmo-Plasma*).

3.0437. In these consistent energy-informational process there exist a direct interconnection between the Mechanism of exhibition of your Focus Dynamics, leading to the realization of all the «current» circumstances of you «personal» Life, and quality of those SFUURMM-Forms, which you most actively use («reproject» via your Focus Dynamics into skrruullerrt structures of Space-Time) into the given specific moment of your subterransive life creativity: the more ampliative and affectative Thoughts, Feelings and Aspirations you will use to consistently structure your Focus Dynamics, the higher will be the degree of resonational interaction of your Focus of Close Attention of your Self-Consciousness with SFUURMM-Forms of more qualitative Duplex-Spheres of ODS, supplying your Life not only with balanced harmonious states, but also more corresponding possibilities for the realization in the chosen by you direction of creativity and self-development.

3.0438. For example, if your «current» Interests will begin more intensively gain mental or high intellect attributes peculiar to MENTAL-Plasma (PCQs ALL-Will-of-ALL-Intelligence, ALL-

Primordality–ALL-Initiality, ALL-Mobility–ALL-Presence, ALL-Knowledge–ALL-Informedness, ALL-Aspiration) in the Dynamics of your Focus of Close Attention (through the decisions made by you) gradually will appear higher resonational deviation towards Creativity Spheres of ODS which specific SFUURMM-Forms can in a greater degree contribute *exactly such type* of creative self-realization. The same happens at more or less stable saturation in your Focus Dynamics of feeling and emotional attributes peculiar to ASTRAL-Plasma (PCQs ALL-Love–ALL-Wisdom, ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Abundance–ALL-Fullness, ALL-Voidness–ALL-Vacuumness).

3.0439. In each of these variants in «your» personalistic World there gradually will begin to appear people with identical Interests and the same affectative Aspirations who will become your «new acquaintances,» you will receive unexpected offers of changing the place of your current work, there will appear new possibilities for mastering a certain profession, requiring the change of your current geographical surrounding, which in a much higher degree will contribute the realization of your established Interests and creative intentions. As soon as at least something in these intentions will start to change in another direction of life creativity, at once the interconnections of Form-Creators with the closest in quality Duplex-Spheres will also change, which in its turn, will change «points» of the local exuberance of your Focus of Close Attention in the skrruullerrt structures of Space-Time. In other words, eventually you will definitely get a real opportunity to more self-actualize corresponding to the altered parameters of your «current» choices. You «personally» will only need to realize that in time, notice and do not miss that favorable moment (in which, by the way, it is not always possible to clearly understand and distinguish the potential presence of the attributes of realized by you Interests).

3.0440. You should never forget that You ALWAYS EXIST simultaneously in the whole Macrocosmos not as a primitive or more universal Self-Consciousnesses Forms, or even as TOO-UU-Entities, with which you, due to Your energy-informational Nature, just have to temporarily self-identify, but as Universal Self-Consciousnesses Focuses (USCF) of SSS-Entity, for Whom every conscious «moment» of Your exuberance in the local conditions of any from subterraneous Lives is immediately lost in an endless Flow of general Creative Cosmic Existence. You, in the whole *timeless* integrity of single-moment-wise focused by You Self-Consciousnesses Forms, represent a Single energy-informational Flow of Macrocosmos with an endless multitude of different-Qualitative characteristics, which are figuratively (not literally!) combined into an endless multitude of multi-dimensional synthetic «complexes,» simultaneously self-spread into all Levels of Energy-Plasma. Actually, exactly these «complexes» form everything That you are inclined to interpret either as Holistic Life (MUULLG-SSS-MAA) or as Self-Conscious Cosmic Existence (MAAIYG-SSS-MAA) filling all the Collective Cosmic Intelligences with all possible rational realizations and creative emotions.

3.0441. Therefore after each of the «Deaths» of countless Self-Consciousnesses Forms which You simultaneously focus, Nobody from You, — just like Forms themselves — is NEVER destroyed, no matter how authentically (for you «present») these processed of Forms' «decay» visually may seem, because there just, as a matter of fact, NO ONE and NOTHING to be «destroyed.» Every time when in some «point» of Space-Time such Illusion will seem for you convincing and authentic, remember that in «your own» reality, in «your» personalistic World, each of you ALWAYS stays in own subjective «present» no matter how that event is perceived by the others. If at least one variation of «present» (and there are always zillions of them!) continue to exist in your Self-Consciousness, your subterraneous

Focus Dynamics does not stop for a moment. It totally does not matter for your USCF through which from simultaneously existing Self-Consciousnesses Forms «your» subjectively experience «your present.» That process of your different-Qualitative refocusing done every moment in Space-Time from f-Configurations of one Forms into f-Configurations of the other Forms is endless! Till Time exists, You jointly with Your rest USCF-variations, structure Space with Your Energy-Information.

3.0442. Always, when You wish to experience Yourself in that or other Form of Your Universal Self-Consciousness out of their countless number (and it does not matter if these Forms are considered — in «your» personalistic World — «dead» or «not born yet»), You in a certain way focus in the necessary vibration diapason peculiar only for the Form chosen by You, absolutely fully and specifically experiencing thereat any moment of its «personal» existence. These «practical» possibility of continuous, conscious and different-Qualitative experiencing «Own Selves» lets You to actively manifest — as USCF — simultaneously and in all possible variations of subjective «past» and in all variants of subjective «future» perceiving peculiar to them energy-informational parameters as «own» subterransive «present.»

3.0443. Thereat, each time, when it is essential, necessary for You Self-Consciousness Form is not created again, IT ALWAYS ALREADY EXISTS, representing an unceasing in Time and Space dynamic Synthesis of zillions of more or less covallert between each other attributes of Energy and Information into one slloogrent focal Configuration, in which You, as USCF, resonationally choose (in the conditions of 3–4-dimensional diapason — by Focus of Close Attention) an interesting for You «part» (Self-Consciousness Form), subjectively experiencing thereat specific Notions about What and Who You are in the given specific circumstances.

3.0444. All Fields-Consciousnesses of Form-Creators of any planetary Form-systems, structuring all the types of wave subjective Realities are organized between each other through an endless network of different type and different-Qualitative covallert focal-ethereal interconnections, which spheroidally penetrate each other in qualitatively identical Levels of Mental and Astral Plan-Overtones, but directly do not «intersect» in any way (i.e. do not have other mutual parameters of manifestation, except for special resonationally-functional points) in the Levels of joint exhiberation of Focus Dynamics of Form-Creators of Form-Matter (till 4.0 dimension) and Plasma-Matter (till 6.0 dimension). It cannot be said about Fields-Consciousnesses (SFUURMM-Forms) of Info-Creators of Duplex-Spheres of ODS or FLC, whose ethereal Configurations structure simultaneous manifestation of different-Qualitative and different-type Focus Dynamics of all the multitude of Self-Consciousnesses Forms of one and the same s-Reality.

3.0445. Ethereal interconnections of both different-levels (i.e. reflected in STC through different Levels of Self-Consciousness) and one-level (i.e. different-Qualitative manifesting through one and the same Level) Duplex-Spheres are so intricately and in a complicated way «interweaved» via SFUURMM-Forms of multileveled causal Flows that it will be practically impossible even for a very experienced «outside observer» to distinguish from each other subterransive attributes of energy-informational formations structuring them, particularly in resonational zones of localization of the multitude of identical Notions (i.e. in the «points» of Multipolarization of scenarios). Indeed, agree that no one from you just is not able to notice when Focus Dynamics of your «current» «personal»

Interpretation, having left in the previous scenario your former — already «dead»! — body, in the same moment «reprojects» into one from the possible for the given situation variants of the following scenarios of development, which in the best case can reflect in your Perception system as a sudden abrupt change of the circumstances of your Life.

3.0446. If you unconsciously «shifted» your Focus Dynamics into the other part of Duplex-Sphere, it does not mean that where you literally «have just been,» you are already not present, — you (as one of your «personal» Interpretations) still, beyond any dependence on the constantly changing modes of fixation in Space-Time of Focus of Close Attention of your Self-Consciousness, always remain (for all personal variations of «yourself» — both «present» and «future!») in potentially manifested state, realizing ethereal-focal potential of only that NUU-VVU-Configuration which is initially assigned to every development scenario of your LLU-VVU-Form.

3.0447. In duvuyllerrt scenarios your homologic or congenial «personal» Interpretations are attached to very similar in quality energy-informational interconnections, which determine for each of them almost identical (but by far NOT always the same!) related, friendly, sympathetic, antagonistic, social, official, political, religious, geographical and other relations and states, which due to a slight difference in f-Configurations of «previous» and «current» STC groups have though very similar, but «*differently interpreted*» subterransive «narrative lines» individual to each manifestation of Fields-Consciousnesses (i.e. to each of people, animals and plants type, as well as to each of egregore formation: creative collectives, political parties and religious confessions, nationalities and nations, countries and continents and so on).

3.0448. As an example, let us consider one variant of similar Multipolarizational organization of one from a multitude of narrow specific types of Form-Plasma, which is characteristic for the given type of human subjective Reality — DS-VVU-U-LLU-VVU-DS (in which we all simultaneously and subjectively focus as in our mutual «present») Each of the multiple resonationally interacting between each other realizational Form-systems of the given Reality is specifically (via two-invaderental Synthesis) formed in Focus Dynamics of all human Self-Consciousnesses Forms by means of covarllert and geyliturgent by their attributes of interconnection combinations, which are peculiar to certain mental Matrixes (Thoughts-Ideas) and their vital resonational analogs — «informational cliché» (Archetypes).

3.0449. These stable interconnections are formed in Duplex-Spheres of ODS and FLC with the help of the presence in Focus Dynamics of *modern* people of all possible and common for them affectative Aspirations, Desires, Interests and Notions, peculiar to different Levels of Self-Consciousness. Due to them, milliards of people in the given STC groups by means of their simultaneous creativity constantly organize and adjust mental-feeling, karmic and physical basis of Collective Consciousness of the given part of Collective Cosmic Intelligence of the Humankind — PROOFF-RRU (the «*humankind*» of the given *s-Reality* or *Collective Consciousness of «humanity»*).

3.0450. Each of the multitude of focused by us NUU-VVU-Forms forming by its psycho-mental realizational creativity all the karmic (focal-dynamic) bases of surrounding us Worlds' Form-systems, has in a bigger or lesser degree stable resonational interconnections with UU-VVU-conglomerates which

simultaneously realize through other LLUU-VVU-Form-Types of our Self-Consciousnesses Forms, structuring different historical epochs and specifically manifested in Focus Dynamics of not only given (contemporary for us) humanity, but also through SFUURMM-Forms of thousand generations of our distant ancestors, who — via peculiar to them way of thinking and Levels of feeling — during millions of years, like we, actively initiate for manifestation «own» Worlds' Form-systems.

3.0451. In multilevel multivariance and multifunctional specifics of general Physical Plan-Overtone of GREIYSLIIS, holochronely-simultaneously together with us and in parallel with us in Space-Time there develop hundreds of human civilizations with attributes of *primariusiveness* (dominating relation towards something) in their slloogrent Focus Dynamics of SFUURMM-Forms of somewhat different than ours protoformal Directions structuring two-invaderental lluuuvvumic Synthesis Scheme. Even at purely external similarity of Self-Consciousnesses Forms of representatives of several such civilizations with our Forms, they in peculiar to them realizations manipulate not only «their own» (i.e. typical only of their Focus Dynamics) parameters of Space and Time, but also quite different from ours criteria of values, moral and ethical laws, principles of laws, have their own analogs of politics, economics, philosophy, science, art, culture, which in many respects are absolutely different from the results of our life creativity (as well as from the specifics of creativity of our ancestors). Correspondingly models of Worlds' Form-systems synthesized by them (just like each of us — in own STC group!) at all their, *apparent for us*, uniformity and similarity, also very significantly differ from everything we observe in our «present» environment.

3.0452. Just like you experience your «current» Life «here and now and in parallel continue your, not less conscious, personal existence in *other* development *scenarios*, which «storylines» of Focus Dynamics are «interweaved» in *other* historical moments and development epochs of other types of Collective Consciousnesses of «humankind,» everyone you consider to be your distant or close «departed relatives» continue their conscious «personal» existence simultaneously with you «present,» focusing via their Focuses of Close Attention in other Duplex-Spheres of ODS and therefore being reflected by their Focus Dynamics in others than your skrruullerrt structures of Space-Time through peculiar to them informational parameters of Focuses of Dual Reflection. In your subjective Perception they are considered «dead» while they continue to consciously live in their Time Flow subjectively refer to you as not born yet (you in the same way perceive all possible variants of manifestation on Earth of all your «future» descendants).

3.0453. Never and under no condition any Self-Consciousness Form (from photon to atom, cell and bacteria to Planets and Stars, Galaxies and Universes) DOES NOT HAVE A SLIGHTEST POSSIBILITY to be objectively «destroyed» in any microscopic or cosmological Processes, because these «Processes» subterraneously occur only in the systems of subjective Perception of Self-Consciousnesses Forms while actually there «take place» only continuous (i.e. never ceasing!) different-Qualitative refocusing (multipolarizational «reprojections») of Form-Creators of Self-Consciousness from one «parts» of slloogrent Focal Configuration into its other «parts.»

3.0454. Thereat «personalities» themselves who initiate in Perception systems the whole dynamic of these refocusing are not aware of those qualitative changes that they undergo in the process of their «postmortem» refocusing. Because in Reality (i.e. objectively) there happens no «TRANSITION» at all because absolutely all Self-Consciousnesses Forms of Macrocosmos and organizing them Collective

Cosmic Intelligences in every from countless levels of their Cosmic Creativity *instantaneously* Exist through Focal Dynamics of zillions of their different-Qualitative analogs, structuring all the endless multitude of subjective space-time Continuums, Conversums and Universums.

3.0455. Aspectability (visibility) of any process of «disappearance» of evident for us attributes of existence of something or someone from the parameters of manifestation of Time Field of the observed by us subjective Reality (for example, facts of perceived by us «Deaths» of any «personalities,» «elimination» of animals, plants, minerals, populations, civilizations, Planets, Stars, Galaxies) is only natural consequence of duvuyllerrt qualitative «shifts» of Focuses of Close Attention of each of these Self-Consciousnesses Forms from «zones» structuring f-Configuration of the given group of STCs into already existing «zones» of f-Configuration which structure other groups of STCs. «Disappearances» and «origins» of new civilizations, Forms and Types of Planet and cosmic Life — all that only «outside,» the most available for your Perception, Metamorphoses of *one and the same* slloogrent Life, Self-Consciousnesses Forms of the *same* slloogrent Collective Intelligences, instantaneously-simultaneously transforming via their Focus Dynamics in various spectrums of an endless multitude of own different-Qualitative Interpretations, realizing in the same endless multitude of subterransive Time Fields.

3.0456. Evidence of «Death» of a human «personality» (or an animal, a plant) appear in our Self-Consciousness only because the subterransive parameters of «reprojecting» of FCA among different Self-Consciousnesses Forms (bacteria, fungus, cells, molecules), which by their joint efforts — according to the unvarying sequence of interconnections! — provide creative realization of their collective Form of exhibition (for example, of a human «personality») very strongly differ from each other. Due to that in the Perception systems of those who observe that process from the same subjective Reality there appears an effect of aspectable preservation of the given Form (but actually — fragmented existence of the multitude of structuring it Forms) in the given STC group, but already without subterransively peculiar to it attributes of manifestation of collective functioning of all Forms (what you interpreted as «Life of the given personality»). If these parameters were the same for all Self-Consciousnesses Forms, which provide functionality of their *collective* Form of exhibition, in one moment the given Form would completely and fully disappear from your range of vision and sensing (i.e. Form-Creators of absolutely all Self-Consciousnesses Forms would simultaneously refocused into the scenarios with the possibility of their joint functioning).

3.0457. All the «previous» and «following parts» of your subjective refocusing into slloogrent f-Configuration of your LLUU-VVU-Form (Stereo-Form) are inseparably connected between each other by a countless energy-informational interconnections. Since every similar focal «shift» happens in a very narrow exhibition resopason of recently changed attribute, due to the absolute insignificance (in the given moment!) of previous interconnection in all the other manifestation resopasons of the given NUU-VVU-Form, similar — extremely slight — space-time «shift» of bio-Creators of your Perception system is just not traced in anyway, and at best is interpreted as a certain change in the general «picture» of surrounding your reality.

3.0458. Due to very narrow specific peculiarities of your Perception system, you just cannot observe the general «picture» of the same Processes simultaneously occurring in the zillions of

possible variants of Your eternal Existence, because your own Self-Consciousness is focused every moment only in one of such possibilities and you just do not register all the rest, happening to you at the same time in the parallel development scenarios.

3.0459. In the general multipolarizational dynamics of your qualitative transformations, you in a natural way, consistently and successively, «shift» via Focus of Close Attention of your Self-Consciousness between the most resonant «parts» (NUU-VVU-Forms) of slloogrent f-Configuration of Your LLUU-VVU-Form, at that completely not noticing and not being aware that in every conditional moment of exuberation of your FD in skrruullerrt system of Space-Time «you» have *already* become qualitatively different. Here, probably, it does make sense to underline one very important for understanding of that process detail. As you already know, the most resonational between each other «parts» of f-Configuration are different from the rest by the least degree of tensorness. If in the Mechanism of refocusing there would be involved only that characteristic, in that case FCA practically would never be able to fall outside the limits of interconnection of one factor axis, and the processes of Synthesis would undergo only within one resonational zone, consistently shifting into other resonational zones.

3.0460. But together with the influence of the Resonation Principle, the FCA-Dynamics is not less powerfully influenced by eglleroliftive perturbation initialized by Focus Dynamics of more developed Self-Consciousnesses Forms (for example, of FIMI-UMPI-Dynamics of FLAKS-Forms) which forces FCA to activate in those conditional «points» of f-Configuration, which in the given moment are less balanced (most tensor) relative to integral Focus of the given Self-Consciousness Form (Creative Activity Focus). Thus FCA dynamic is conditioned from one side by transitions between the most resonating duvuyllerrt «parts,» and from the other side — eglleroliftive tendency to increase resonance between different «parts» of f-Configuration.

3.0461. Due to the insignificance of qualitative changes happening in Focus Dynamics at every act of refocusing from one groups of Stereo-Types into other duvuyllerrt groups, you continue to inertially-subjectively perceive yourself «the same» (with the same people, in the same environment of objects and attachments, though you might structure via your Focus Dynamics already other type of Reality and other STC group). In the process of consequent «reprojections» of your Focus Dynamics chosen by you countless variations of manifestation of these subjective Realities appear to «superimpose» each other by the multitude of resonating with each other «projections.» Due to the relative insignificance for your general Focus Dynamics of those changes in parameters which are introduced into it with every new quantum shift, attributes (energy-informational Content) of other s-Realities and groups of STCs completely unnoticed for you literally bit by bit are included into the spectrum of exuberation of your FCA, creating in your Perception system the effect of gradual change of seemingly «one and the same» s-Reality.

3.0462. In every variant of quantum manifestation (and psychical reflection) of component elements of observed by you s-Reality *in the system of your subjective Perception*, absolutely all the signs of peculiar to it focal-ethereal interconnections (what we determine for yourself as objects, subjects, relations and so on), having undergone a corresponding resonational modification, «reprojects» through your Focus Dynamics into the next — subjectively chosen by you — variant of

quantum manifestation. Therefore each time, *something* or *someone* from surrounding your reality «personally» by you is subjectively interpreted «slightly» different and is perceived in a somewhat different way.

3.0463. Constant presence and accumulation in your Focus Dynamics of all possible «slightly different» subterraneous characteristics become the underlying Cause of refocusing of each of you into life conflicts, circumstances, situations and «twists of Fate.» Thereat you should never forget that in every «present» moment Focus of Close Attention of your «current» Self-Consciousness Form straightway appear to «scan» an unaccountable multitude of all possible variants of «your» Existence, only for a moment resonationally fixating in qualitative Offers of *one* of them. That happen to you constantly and endlessly — from the state of «previous» moment into the state of the «following» moment.

3.0464. Here it will be also appropriate to remind you that every variant of inertial manifestation of subjectively perceived by you s-Reality represent Worlds' Form-system, structured by absolutely unique informational Configuration (therefore all Worlds' Form-systems are fundamentally different from each other). In Focus Dynamics the process of adding into one f-Configuration seemingly «new» informational fragments combinations (though in practice, in the process of consistent klesing there happen only amplificational modification of already existing) after every quantum shift, fully and irreversibly (for Form-Creators of your subjective Perception!) restructures «current picture» of focal-ethereal interconnections in your Focus Dynamics.

3.0465. Thus, in your Focus Dynamics none of the variations of manifestation of s-Reality can be either duplicated or identical (i.e. absolutely and fully equivalent). If it would be different, you would be able to observe only the difference between these variants, while the «elements of repetition» would appear to be deprived of Energy-Potential for their manifestation — the mechanism of dissipative-decoherent transformation would not be able to apply for them.

3.0466. Each of you does not have absolutely any perspective for subterraneous «one single» Life, because You, as USCF, according to the Principle of Your Existence, *simultaneously* «live through» zillions of truly *never-ending*, duvuyllerrtly proceeding to each other and therefore never intermitting in their duration, Lives, subjectively motivationally and resonationally connected to the life span of zillions of your «personal» Interpretations: *«in the same time»* (in the conditions of all the multitude of STC groups) you somewhere already «die,» and somewhere are just «born,» somewhere «achieve a success,» and somewhere «fail,» somewhere «grow old,» and somewhere «are in your prime,» somewhere «go wrong,» somewhere «actively spiritually succeed,» somewhere «get married,» somewhere «get divorced,» somewhere «feel ill,» somewhere «are full of strength and in good health,» somewhere «die again,» somewhere «are born again» and so on — in all possible creative Directions of Your eternal Existence.

3.0467. Focus of Close Attention of your Self-Consciousness, as interspatial and intertemporal «slider» instantaneously reacting to qualitative changes (protoformal Directionality) of your Creative Activity and change of psychological states, constantly shifts into the most resonating with its f-Configuration «points» of skrruullerrtness (group of duvuyllerrt STCs), initiating to the

sequential manifestation in each of these «points,» SFUURMM-Forms of corresponding to it Levels of Self-Consciousness, changing Forms of Self-actualization, events and circumstances, friends and enemies, family and beloved, countries and continents, Planets and Star Systems, Galaxies and even Universes... For the whole Universal History of endless Existence of Macrocosmos not a single Form of exuberation of Self-Consciousness of Collective Cosmic Intelligence has ever and will be able to have absolutely any possibility to perceive itself «dead» — its Focus Dynamics always «instantly» (already in the moment of «postmortem» refocusing) find possibilities for the following realizational manifestation through Perception systems of corresponding Self-Consciousnesses Forms.

3.0468. Even specific states of your Form-copies and SFUURMM-Forms in so called «stress zones» and realizational niches of OLLAKT-DRUOTMM-systems represent only your personal subjective assumptions and all possible interpretations of assumed by you theoretical capability of implementation of such realizations, which have been formed for a thousand generations of people on the bases of their complete ignorance and incompetence in that question, conditioned by their lack of more authentic Information. We should notice that all the multitude of Duplex-Spheres that provide with FDR-Dynamics of peculiar to them SFUURMM-Forms the very possibility of simultaneous exuberation in Space-Time of all Worlds' Form-systems in the given subjective Reality (DS-VVU-U-LLU-VVU-DS), «penetrate» (i.e. qualitatively inter-complement and inter-provide) Focus Dynamics of each other not chaotically, but strictly corresponding to Resonation, Diffuzgentness and Duvuyllerrtness Principles, placed in the bases of formation in Space-Time of stable combination and interconnections between heterogeneous r-Configurations of Pure Cosmic Qualities and f-Configurations of corresponding to them Rezmirals of exuberation.

3.0469. Apparent to us «chaotic state» of all interconnections in the surrounding us reality is only a consequence of the strong limitation of our Perception systems. In the objective Form-structure of Macrocosmos any interconnections under consideration represent the highest degree of orderliness and absolute correspondence of subjectively observed Consequences to the objective Reasons, which are beyond our understanding. There are just no «accidents» in our Life, because any quantum shift in Focus Dynamics is naturally determined and deeply connected with its other variants via many subterrassive signs.

3.0470. So, for example, narrowly specific construction of presently focused by all of us groups of STCs is structured only by such types of subjective Realities which have not only strictly determined diapason of qualitative vibrations and a special dynamic of energy-informational interconnections (f-Configuration of Space-Time), but also a particular (not necessarily very similar) indicators of such parameters, as, for example: SNOO-SSS (*dimension* of Space-Time), KKV-OOO-LTT-UU (Mechanism of subterrassive svilgs-spheration of FD), OOO-TT-UU (Coefficient of FD *quantum shift*), YYYUULLARGG (rotational Coefficient of subterrassive FD), TRO-UU-DS (subterrassive informational Coefficients of the given group of STCs; reflect Configurations of Duplex-Spheres, structuring FD of the given group of STCs), SSAA-AASS-FF (rotational Cycle of PROOFF-RRU), SSVUU-R-VVU-R-FF (rotational Cycles of NUU-VVU-Form-Types of LLUU-VVU) and SS-KHOOR-SS (rotational Cycles of Stereo-Types of LLUU-VVU — from 250 to 400 quantum shifts per second), and also several other subterrassive characteristics.

3.0471. Only as a result of that, realizational SFUURMM-Forms and UU-conglomerates structuring different-Qualitative and different-protoformal Duplex-Spheres, do not experience any spatial and temporal difficulties at resonational interactions through Focus Dynamics of particular and homologic «personal» Interpretations, simultaneously manifested in different Spaces and Time Flows. It can be said that subterransive Notions of each of you about «yourself,» about «your personal» Life and about surrounding reality in general are formed in your Perception system by Form-Creators of Self-Consciousness who resonationally combine slightest moments of «your» (as a «personality») qualitative self-determination (i.e. uncompromising answer to such questions as: «Who am I in the given moment?» and «Wherefore do I exist in the given moment?»), in which they have to — consciously and unconsciously — measure and correlate the degree of qualitiveness of the basic factors of their Existence (affectative Desires and Aspirations, inclinations and Interests), thereby stabilizing in their choice and actively shifting Focus of Close Attention into mental-feeling Content of one or another Duplex-Sphere. Only having received «therefrom» a corresponding realizational impulse (in the form of automatic initiation of the reaction of Focus of Dual Reflection in ODS), you, subjectively «having unpacked» SFUURMM-Forms «projected» into SSVUU-SSMM (from subterransive ODS), start to perceive «yourself» in some certain Worlds' Form-system.

3.0472. Consistently uniting with each other subterransively «being unpacked» parameters of *duvuyllerrt* «point localizations» of your FCA, you acquire the possibility to fixate as long as desired via your Perception system in the specific conditions of exuberation of your subterransive part of ODS (whose SFUURMM-Forms are already «marked» by the previous results of *kleksing* of your Focus Dynamics), depending on how important or attractive for your creative self-expression you will consider the properties and peculiarities of chosen by you subjective Reality. If some nuances of developing around your events or surrounding will start by some reason to dissatisfy you, in your Self-Consciousness there immediately will activate specific *Factors of Creative Antipathy* (SYUU-ORRT) which in informational Space are fully balanced by *Factors of Creative Sympathy* (VVOO-YYFF).

3.0473. These very difficult for the explanation regulative Mechanisms of «moment by moment» exuberation and concatenational realization of your subterransive Focus Dynamics in that or other development Direction are jointly provided by *svilgs-spherational* Creators-motivators and interpretational Creators-regulatory of all functions of genic DNA Form-Creators, about which I earlier have already mentioned in that section. At their active interaction in the Direction of more resonance, you start to *svilgs-spherationally* change «current» parameters of your FCA in the Direction of prevailing of either protoformal signs, trying to resonationally include it into «unpacking» dynamic (possibly, from qualitatively different variants of Duplex-Spheres) of SFUURMM-Forms of more satisfying you conditions of exuberation which intensity and stability provide you the process of your subterransive refocusing into these or other situations or life circumstances.

3.0474. The whole complexity and unpredictability of your refocusing process is in the following — making some specific choice for some subjective reason satisfying you in the given moment, you immediately fall under the power of conditions of the certain development scenario — of a particular personal Interpretation of your Stereo-Form — structuring the given STC group, which afterwards might lead you either to full satisfaction of your affectative Desires and Aspirations, or dissatisfy you, or fill your Life with huge difficulties (which in the end also might lead to the complete realization

of the given Interest). No one can definitely know what in each of the situation is «better» and what is «worse» because each of an uncountable multitude of scenarios of Your simultaneous Existence including a certain episode (situation) as a consequence of some of your choice, can further develop into completely unpredictable for your Direction without considering your «personal» Desires and subterraneous opportunities.

3.0475. To minimize the number of unfavorable circumstances of your choices, there is only one infallible method: try to motivationally put into your every decision as many as possible signs of high-sensual Intellect and high-intellectual Altruism, which in infinite realizational possibilities of multiple protoformal Directions, potentially structuring your Focus Dynamics, are peculiar specifically to human Existence principle. Such choices provide your Focus Dynamics the least tensors Not to the conditions of your exuberation in the given STC group (because they, powerfully structured by protoformal SFUURMM-Forms, leave much to be desired), but towards the general f-Configuration and Focus Dynamics of some of more favorable for your development STC group structuring variants of your potential «future.»

3.0476. Absolutely all possible variants of certain consequences are always potentially *already* included in interconnections of skruullerrt system, which multipolarizationally reflect through your choices and your every action. Each of these consequences is already detailed «written» in one of the unknown to you development scenario, with consideration of laws of surrounding you «there» human society, the specificity of qualitative direction of Synthesis, resonational interconnections with realizational niches of other Duplex-Spheres with scenarios of other subjective Realities and many-many other beyond your conscious Perception. Therefore the only unaltered rule which you can at least somehow use to orient in your expectations after another choice is that less selfish and more thoughtful decisions in the longer term always lead to refocusing into more qualitative life circumstances, and more selfish actions (Thoughts, emotions) always fill your (and not only your) Life with all possible tensors, thereby increasing your inner discomfort and proneness to conflict of your Focus Dynamics with the surrounding reality.

3.0477. It is because in more qualitative subjective Realities social laws and moral principles organizing your altruistic existence are more perfect, more fair and harmonious, than in more primitively organized communities, where rule insufficiently synthesized flaws, under-realized egoism, mass mercenariness and legal violation against others. Therefore the escape from any difficult situations is rather simple in its Essence (though very difficult for fulfilling): in order to refocus into the scenario with more well-minded relations, you should actively use SFUURMM-Forms that are most typical of these scenarios.

3.0478. Consequences of constant disharmony in Focus Dynamics of people are not only all possible pathological changes in the functional activity of biological systems (diseases and bad ecology), but also deep stress conditions inflicting to people physical, psychical and unbearable mental suffering. Therefore the only way out of difficult life circumstances for each of you is in the increasing of qualitiveness of your thinking and feeling, in increasing the effectiveness and elongation of the states of own intellectuality and altruism, unselfishness, optimism and spiritual determination, which soon will help your Focus of Close Attention to stabilize in the full degree in

high level subjective Realities and groups of STCs where more perfect laws and principles gradually more and more actively will appear in your Life.

3.0479. Hundreds and thousands of people in small towns, as well as hundreds of thousands and millions of people in cities living nearby each other for many years — due to a huge diversity and predominance in informational spaces of their Self-Consciousnesses of different-protoformal diffuzgent tendencies — focus thereat in SFUURMM-Forms of various Duplex-Spheres, only for a short period of time sometimes resonationally superposing with the activity of their Focuses of Close Attention in the same informational structures (subterransive ODS), in order to positively solve some «intrapersonal,» domestic and social conflicts, as well as interstate, politic, religious and science problems. Therefore in the contemporary society the degree of misunderstanding and aloofness, cynicism and brutality, distrust and emotional «obduracy,» on which depliative bases in the given type of subjective Reality there the most actively are capable to realize only SFUURMM-Forms of extreme aggressiveness, antagonism, exacerbation, selfishness and ineradicable desire to subdue, subjugate to fit own «personal» needs Minds of as many people as possible at whatever the cost, using for these purposes power, money, bureaucracy, deficient «laws,» religious dogmatism, jingoism and also accomplishments in scientific, military fields, information technique and even in the cosmos.

3.0480. The lower is qualitatively-informational characteristics of Duplex-Sphere through which SFUURMM-Forms your Focus Dynamics realizes most actively, the higher is the possibility that to the manifestation in your life creativity there will consciously and unconsciously join people with the same low-qualitative principles, views, relations and Notions as yours. Representatives of the most part of modern variant of humankind Collective Consciousness (I cannot call them people yet, as they are people only in a Form, and in the Essence they represent in two-invaderental lluuvmic Synthesis Scheme generally typical signs of all possible protoformal development Direction) are, by the way of their thinking and feeling, stable carriers of the most primitive SVUULL-VVU-conglomerates which not in the best possible way affect the qualitiveness of the whole Paradigm of Collective Consciousness of the modern human society (PROOFF-RRU).

3.0481. Presently focused by all us subjective Reality — DS-VVU-U-LLU-VVU-DS, in accordance to peculiar to it relationships and interconnections, is yet not human, but different-protoformal subjective Reality, in the most degree controlled and actively modelled by all possible primitive civilizations of ungs and ssvooons (realize in the Focus Dynamics of people through 1–4 Levels of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi). Surrounding us World with All its low-qualitative Content is a realizational foothold modelled by their Notions, it is their imperfect creation (from the viewpoint of Form-Creators of more ampliative «personal» Interpretations), structured by the dually reflected dynamics of primitive SVUULL-VVU-conglomerates of an uncountable multitude of low-qualitative Duplex-Spheres and functionally adjusted to synthetic processes typical particularly of these specific Levels.

3.0482. You should understand that always when we say that Self-Consciousness Form belongs to a certain type of subjective Reality manifested in the creativity conditions of Form-Creators of Energy-Plasma Tertiary State, our subjective definition is very conditional and relative, because

we can talk only about those Forms which exhibitional signs we have the possibility to at least partially perceive and identify with already known to us Notions. Each of you — *always* and *simultaneously* — configurationally (i.e. according to structure of energy-informational interconnections, which form focused by them NUU-VVU-Form) «belong» to absolutely all types of Realities — powerful Cosmic Forces of TUURR-MOORR («the Law of Self-balancing Reactions») and FFLUUFF-LLIIRR («the Law of Dynamic Consistency of Projections») function in Focus Dynamics of all Self-Consciousnesses Forms in the same way as in Focus Dynamics of Planetary, Stellar and Universal TOO-UU-Entities (actually, combined realizational activity of simultaneously all the diversity of Focus Dynamics is the qualitative bases of the Creation AYFAAR — our Universal DDIIUYYI-Entity).

3.0483. However in that collective protoformal dynamics of the *general Creative Activity Focus* (DYYUUTT-YYYU) space-time peculiarities of subterraneous exhibitional activity of Collective Cosmic Intelligences Forms structuring subjective Reality of the given type (DS-VVU-U-LLU-VVU-DS), by peculiar to them Focus Dynamics, let them to initiate their own Creative Activity only in the strictly determined spectrum of *Plasmic Forces Diapason*, between which conditional vibrational «borders» there is formed a maximal degree of RUUORRTT-Factor (the intermediate phase of the most — for the given specific conditions! — dual tension), which represents a certain *objective* (i.e. «initially already existing») difference between qualitative signs of the given Reality Content and multipolarized in its Focus Dynamics qualitative signs of the multitude of diffuzgently peculiar to its f-Configuration *duvuyllerrt* parallel Realities (which Content is yet beyond the possibilities of our Perception system and our existing Notions about surrounding reality).

3.0484. Qualitative difference between «what already exists» and «what may exist» (both for the better and for the worse) creates in our subjective Perception specific Notions about the presence in Space-Time of certain conditional «borders» between all focused by us types of human Realities. In the absolute objectivity of *skrruullerrt* system of Macrocosmos there are no and there cannot be any «borders» or «limits» between any different-Qualitative Form-systems and between structuring them Duplex-Spheres. The degree of similar «delimitations» depends only from subterraneous possibilities of Perception system of each individual and qualitiveness of the Notion about own self and the surrounding reality.

3.0485. The Principle of simultaneous Multipolarization of these attributes, starting from *geyliturgent* and *covallert* to *impersept* and *cruvursorrt*, allows most diverse different-Qualitative SFUURMM-Forms from a wide variety of Duplex-Spheres — from the most depliative (*impersept* and *cruvursorrt* towards the specific two-invaderentalness of the given Synthesis Scheme!) up to the most qualitative from the possible once for the given interactions spectrum — in the different degree to engage in realizational processes of each type of subjective Realities.

3.0486. In the «points» of active «intersection» in the general Focus Dynamics of NUU-VVU-Forms of the given Reality of the most *impersept* or *cruvursorrt* between each other attributes there are formed subjective states of a powerful tensor opposition of simultaneously available in it — *dual by their qualitiveness* — needs and their realizational possibilities, which one way or another neutralize through interactions of Focus Dynamics of different-Qualitative carriers of these Interests

(people of different nationalities, states, social classes, religious denominations, political parties, creative and work collectives and so on).

3.0487. On the bases of simultaneous — mutually exclusive and complementary! — interaction of all possible attributes of above mentioned Factors (Creative Sympathy and Antipathy), representing by their Essence dually outermost degrees of subjective manifestation of Resonation Principle, in the general Focus Dynamics of Collective Cosmic Intelligence of DS-VVU-U-LLU-VVU-DS (as well as in Focus Dynamics of any from structuring it Self-Consciousness Form — from photon to Universe) there is carried out the process of consistent svilgs-spherational balancing of countless multitude of different-Qualitative «pluses,» as a result of which some part of general Focus Dynamics gradually «reprojects» into scenarios of more qualitative Existence conditions while the other part of NUU-VVU-Forms finds stronger stimulus in low qualitative realizations.

3.0488. Therefore in the given type of Reality, literally «side by side» with people whose Focus Dynamics are actively and stably structured by SFUURMM-Forms of Duplex-Spheres with relatively high qualitative (characteristic for the given Synthesis Scheme) Configuration, may live people in outward appearance no different from them whose Focus Dynamics also qualitatively strongly differ. It is not only because they manipulate less qualitative SFUURMM-Forms, but also because their Notions express other development Directions attributes and structure completely different Duplex-Spheres.

3.0489. Relative lluuvvumic Synthesis Scheme they appear to us less qualitative, but from Proto-Forms Focus Dynamics viewpoints corresponding to these Directions, the given Notions would be perceived with more understanding. Therefore the Experience, consequently synthesized in informational Space of Self-Consciousness of every «personality,» I denominate as Experience «being projected» into its Focus Dynamics from its *subterransive ODS* (specific set of *already* synthesized earlier — in the different scenarios of rotational Cycle — interconnections, structuring the multitude of different Duplex-Spheres).

3.0490. Such statement can create in your understanding false impression as if for every person in OLLAKT-DRUOTMM-system there exist own *subterransive Duplex-Sphere*. It is not so, because each personality only selectively (resonationally) engages in own Focus Dynamics from the universal ODS-sll oogrentness only those ethereal combination of specific attributes (SFUURMM-Forms), with which help it can carry out in the given exhibition diapason of peculiar only to it «current» Interest. Specifically this way it klekses by own FCA every ethereal combination which it at least once has used.

3.0491. Information about that combination, initiating though neuronal network of hippocampus bio-Creators, become a part of its long-time memory, gradually accumulating into corresponding «individual Experience.» Therefore I use such word combination as *subterransive ODS* — own bases of accumulated Experience of the given person. In reality any Duplex-Sphere represents only very narrow spectrum of qualitative resonational interaction of sll oogrent informational Content of ethereal Configurations of ODS Info-Creators with corresponding to them Energy-Potential (realizational possibilities) of Form-Creators f-Configurations structuring Worlds' Form-systems.

3.0492. Specific interconnections of every such spectrum are transgressively-integrationally spread into all the general Focus Dynamics slloogrentness of the Highest Intelligence of Macrocosmos and is subjectively interpreted by us as «different» Duplex-Spheres, only due to the powerful limitedness of our «present» Perception systems' possibilities. It is the joined Creative Activity of fragmented Self-Consciousnesses of chakram persons of all possible Duplex-Spheres and Form-Creators structuring Focus Dynamics of Self-Consciousnesses Forms of all the multitude of Worlds' Form-systems that creates in Focus Dynamics of Macrocosmos all the integral subjective «picture» of interconnected and interdependent Self-Consciousnesses Forms Cosmic Creativity of zillions different-typed Collective Cosmic Intelligences (and vice versa).

3.0493. ODS Duplex-Spheres is an informational part of any resopasons where Form-Creators consistently focus. In Duplex-Spheres we focus through informational component of realized by us Focus Dynamics (Focus of Dual Reflection or FDR), which ethereal Configuration we at once (simultaneously) reflect through decoherent Energy-Potential of Focus of Close Attention into corresponding diapason of our «current» exhiberation. Objective attachment of Focus Dynamics of various Self-Consciousnesses Forms (people, animals, plants and other) to Duplex-Spheres of specific type determine not their «spatial geographic» localization in the given s-Reality type, but stable identity of peculiar to them characteristic attributes of subterransive psycho-mental creativity, specifically expressed in the specific orientation of their emotional-mental Interests and preferred ways of actualization activity.

3.0494. People belonging to a certain nation or religious activity, civic organization or political party, to philosophical or esoteric movement, to a profession or creative collective also cannot serve a «unifying» criteria, because all above mentioned subterransive peculiarities of the «personalities'» existence cannot coincide in the main — qualitiveness of specific SFUURMM-Forms, which firmly stabilized in Focus Dynamics of every considered by us Form Self-Consciousnesses and are generating in Space-Time waves of strictly determined qualitative Configurations.

3.0495. Unique space-time properties of subjective Realities of all types give possibility to every Self-Consciousness Form structuring it by its realizational Focus Dynamics with the help of narrow specific duplex-spherical structures (OLLAKT-systems, DRUOTMM-systems, FLUU-LUU-complexes and others), to model (via SFUURMM-Forms) in informational Space of own Self-Consciousness and at once subterransively materialize in personalistic Worlds (in Space-Time) those principles of «intrapersonal» relations, to which Configurations of the used SFUURMM-Forms correspond.

3.0496. One way or another «reprojecting» along Worlds' Form-systems through Form-Creators Focus Dynamics of own Self-Consciousness, each of you every following moment turns into a functional carrier of that or other Duplex-Sphere characteristic properties, becoming simultaneously both a transmitter and amplifier of some its qualitative attributes, specifically manifested by you through culture and sport, religion and politics, science and manufacture, philosophy and art, and also many-many other, what find its unique reflection in the general Focus Dynamics of the given subjective Reality beings through your life creativity.

3.0497. An uncountable multitude of Duplex-Spheres, informationally structuring different-Qualitative resopasons of dimension, simultaneously participates in that «unpacking-projecting» process, therefore the functional mosaic of each of s-Reality represents an extremely difficult «picture» of realization of very heterogeneous between each other combinations of energy-informational interconnections forming «inside» according to covarllertness principle, but at the same time capable to functionally interact between each other according to the attributes of imperseptness and cruvursorrtness (for example, in 3–4-dimensional s-Realities there simultaneously in an equal activity degree can manifest such antagonistic states, as «love» and «hatred,» «good» and «evil,» «blessing» and «suffering,» «bluntness» and «genius»).

3.0498. Exactly therefore in «Qualitative Content» and «Realizational Offers» of focused by you s-Reality there present all the attributes corresponding not to narrow resopasons, but a definite diapason of Aspects exhiberation (and resonational with them Form-Creators) of different OO-UU-Entities — from very selfish, aggressive SFUURMM-Forms of their creative expression (through behavioral reactions of underdeveloped, primitive «personalities,» and also through the formed by them culture, sport, religion, politics, science, manufacture, philosophy, art and others) and till the most ampliative, and high-consciousness personal manifestations (out of all possible for VLOOOMOOT of the given PROOFF-RRU), expressed though people demonstration (probably even by those mentioned in the first case!) attributes of high culture and self-sacrifice, intellect and altruism (with the help of the same self-actualization means — philosophy, religion, art, politics, science and other).

3.0499. Due to the similar universal structure of different-Qualitative interaction with each other, Form-Creators of different qualitative Self-Consciousnesses Levels possess not only a huge different-protoformal realizational possibilities for own creative realization in the conditions of quite huge diapason of different-Qualitative dimension combinations, but also have exclusively favorable conditions for simultaneous realization of very difficult svilgs-spherational (amplificational) perturbations (consistent strengthening of covarllert interconnections «inside» own f-Configurations) in the dynamic Processes of both intra-Qualitative (between sub-Aspects and Aspects of one PCQ) and inter-Qualitative (between Aspects of different PCQs) Synthesis.

3.0500. With the help of universal properties of such *virtual* (invizusal and in no way realized by you) Form-structure of your Perception system as «BIOPENDULUM» (ILLGRII-TO-O), you — during forced communication process, professional or some other physical, psychic, or mental activity — can periodically «switch» your Focus of Close Attention dynamics to the areas far beyond your current Interests manifestation sphere. In this way you change activity degree of existing FFLUARRS-Factor (qualitative directivity of rotational Shifts modelled now by you) and start, completely without noticing to yourselves, to focus in SFUURMM-Forms, which ethereal Configurations structure already other Duplex-Spheres.

3.0501. This, in turn, will cause, with the rate corresponding to the «Coefficient of inertial shift» (OOO-TT-UU) of the given s-Reality, change of «rotational spatial Coefficient» (YYYUULLARGG) subterransive parameters peculiar to your «person» «current» f-Configuration. In your Existence, this will entail full chain of concatenationally successive events: change of some priorities by the others, qualitative rearrangement in your environment (relatives, friends, collective, community),

space movements (change of housing, residence), and also other changes of your «current» Life particular circumstances. Each of these changes and innovations (these include habits, attachments, propensities) will reflect in your Focus Dynamics mostly those signs, which qualitatively more correspond to SFUURMM-Forms of Duplex-Sphere of your quite long lasting focusing on the immediate Interest (at the same time SFUURMM-Forms of the previous Interest, first, lower down own activity, and only after that, synthesized completely, disappear).

3.0502. In accordance with the «General Cosmic Law of Dynamic Permanence of Projections» (FFLUUFF-LLIIRR), no one semblance of «this person leaving the world» (which you verify as «*Death*»), even the most evident and «real» one to your subjective Perception, can anyhow denote your self-conscious «person» Focus Dynamics extinction from the successive-multipolarizational Process of Creative Activity «spheroidal» manifestation of human Collective Consciousness of this s-Reality, which is simultaneously accomplished by Form-Creators of your Self-Consciousness Form in many qualitative Levels of this dimension diapason.

3.0503. You interpret this universal Law as «Leaving stay forever.» Though, this is Its over-simplified and shallow understanding, because the term «leaving» is used here to refer not only to «existence prolongation by means of lifetime creative work results» (for example, in people's memory, who knew and remembered the deceased by his/her deeds), but also to instantly (at the same instance of refocusing from one NUU-VVU-Configuration to another) offered opportunity for each of you to infinitely and consciously continue all unfinished Processes on Qualities subterransive Synthesis via Focus Dynamics of a new, slightly more qualitative Self-Consciousness Form (besides, not only within this Synthesis Scheme opportunities, but also — simultaneously — in other Proto-Forms!).

3.0504. These opportunities are provided by resonational «reprojection» Mechanism of the most active and stable UU-VVU-conglomerates ethereal Modules in your Focus Dynamics (which, actually, combining somehow between each other in focal Configurations of gene Form-Creators, represent external and internal signs peculiar to your «current person» in Space-Time different conditions — features, skills, and propensities) from some «sections» of exuberation spectrum of slloogrent focal Configuration of your LLUU-VVU-Form (resonational zones) to the other «sections» of the given spectrum. Such UU-VVU-conglomerates qualitative «redeployment» to various simultaneous manifestation spheres of Self-Consciousnesses Forms of one LLUU-VVU can be accomplished as within the same dimension diapason (for example, from 2.757 to 3.528 dimension), as towards the other diapasons (for example, from 2.757–3.528 dimension to 2.789–3.615 dimension, or to 2.796–3.641 dimension).

3.0505. Such UU-VVU-conglomerates resonational transformations can be accomplished not only as part of the integrated Module of sort of «the same person» (duvuyllerrt «postmortem» refocusing through multi-level Focus Dynamics of homogeneous «personal» Interpretations), but also as level-by-level ones — from the certain Self-Consciousness Level of one NUU-VVU-Form-Type to the identical Level of another NUU-VVU-Form-Type (or to many other LLUU-VVU Form-Types structuring simultaneously various s-Realities, various human STC groups, and various Time Flows). I subdivide such UU-VVU-transformations types on inter-age «intra-personal» and inter-formtype refocusing.

3.0506. It is about holochrone realization of sort of «the same» UU-VVU-conglomerate in Focus Dynamics of Form-Creators of *diverse development Directions* of the two-invalderental lluuuvvumic Synthesis Scheme; but in every particular case, this conglomerate is differently subterraneously kleksed, and thus, differently interpreted in the corresponding circumstances by Form-Creators of FD of every «person» realizing through it. As a result of such different-Qualitative kleksing, some of interconnections, which are covarllert with respect to some development Directions, but impersept with respect to the other Directions, sort of «fall out» of FD of his/her Form-Creators (or being replaced by the more covarllert ones).

3.0507. Therefore, manifesting in some «persons» Perception systems, the contents of the given UU-VVU-conglomerate can be interpreted as ampliative one (hence, the higher-level «sections» will be activated in its ethereal Configuration through the given FD), while the other «person» will subjectively perceive the same contents as more depliative one, which will automatically lower down the dimension of this UU-VVU-conglomerate in the given FD. Since every UU-VVU-conglomerate is structured by interconnections peculiar to UU-VVU-conglomerates of many Proto-Forms (covarllert with respect to our Synthesis Scheme), one can say that the particular parameters of its manifestation in STC (its dimension) depend to the highest degree from the intensity in this «person» FD of these or those from the protoformal interconnections structuring it: more covarllert ones upgrade exhiberation dimension (in conditions of this birvulyarity type!), and more impersept ones lower it down.

3.0508. Absolutely all qualitative changes and perturbations in your Life, which are directly connected with them, happen not because «*you are absent already in the place you have been before*» (nothing ever changes in skrruullerrtness of Form-systems), but namely because of alternating, greater or lesser FCA stabilization of «your» realizational Form in the particular Space-Time «points,» specifically structured with different-Qualitative energy-informational combinations. No «physical displacements» of NUU-VVU-Forms, focused by you, from some space-time structures to qualitatively others ever occur during svilgs-spherational refocusing; and all your «linear redeployments» and life circumstances change are just only the external result of those active qualitative changes visible by you, which are accomplished in Focus Dynamics of Form-Creators of your Self-Consciousness continuously, resonationally, and unconsciously to you.

3.0509. This type of subjective «physical» Reality, as well as all other types, is structurally modelled, focal-wise formed and psycho-mentally organized out of energy-informational constitutions (SFUURMM-Forms) peculiar only to it, which have strictly defined vibrational diapason of qualitative realizations, which are the greatest possible in these exhiberation conditions (both to the maximum and to the minimum). This diapason cannot exceed the limits of FIIYY-SS-FUUMM acceptable values — «*Creative Compatibility Factor*» for Self-Consciousnesses Forms representing the certain multitude of different-Qualitative Collective Cosmic Intelligences synthetic combinations in this particular Energy-Plasma State. FIIYY-SS-FUUMM vibrational Index, which is subterraneously to every s-Reality, reflects by itself that difference between *maximal and minimal* degrees of creative (for people — psycho-mental) tension, which can be *productively* (to the benefit of Synthesis creative micro-processes) implemented in this s-Reality type between separate formations (Self-Consciousnesses Forms) of the CCI's multitude, which generate to Space-Time such manifestations SFUURMM-Forms, which are not only geyliturgent and covarllert, but also impersept and cruvursorrt with respect to each other, and which represent sort of «the same» qualitative combinations.

3.0510. The higher «*Creative Compatibility Factor*» Index, the greater opportunities for SFUURMM-Forms different-Qualitative creative self-realization can be provided by this s-Reality type, because it allows Form-Creators of any of Self-Consciousnesses Forms to get deeper (via detailed processes of PCQs intra-Qualitative and inter-Qualitative Synthesis) into own Self-Consciousness informational space diverse Levels. One should note that FIIYY-SS-FUUMM-Index for your wave s-Reality (and others of the same type) is already quite high (compared to *doolls* types) and comprises 833 760 000 STRIFFMELL, which points to the great opportunities for the processes of internal harmonization of different-Qualitative Flows and accomplishing of purposeful deep Synthesis via Focus Dynamics of Self-Consciousnesses Forms of various CCI.

3.0511. One STRIFFMELL is a conditional index of informational «saturation» of exuberation «point» f-Configuration of skrruullerrt system subjectively examined by us (which is structured, as everything else, by some part of slloogrent focal Configuration). In other words, it is «fractality,» «branching» degree of energy-informational interconnections of space-time structure. It equal to the quantity of Duplex-Spheres actively *resonating* among each other by some signs, which SFUURMM-Forms have rather high compatibility with respect to Focus Dynamics of different-Qualitative Self-Consciousnesses Forms structured by them in order to produce stable joint UU-conglomerates in these f-Configurations. Such properties in human s-Realities now focused by all of us are possessed by SFUURMM-Forms of people of one race and ethnicity, of people and domestic animals cultivated by them, of people and vegetables selected by them, of people and minerals used by them (including water), of people and fire.

3.0512. Though, along with these covarllert interconnections, our Conceptions have quite high imperseptness or cruvursorrtness to many specific SFUURMM-Forms structuring Focus Dynamics of some Self-Consciousnesses Forms unclear to us or out-of-our-Perception in this s-Reality type (for example, the features of bacteria and viruses biocenosis, processes inside the globe, many Nature phenomena, near and outer Space, Space and Time).

3.0513. A certain amount of Duplex-Spheres very similar to each other by quality of development scenarios produced by them can simultaneously resonate more or less on every *striffmell* specific parameters in every type of subjective Reality. In every development scenario, «you» (via own «personal» Interpretations) have real opportunities to profound Synthesis of some qualitative Self-Consciousness Levels of your LLUU-VVU-Form. For example, the given s-Reality type FIIYY-SS-FUUMM-Index features offer to each of its habitants *theoretical* opportunity to consciously or unconsciously interact on sfuurmmformal level with UU-VVU-conglomerates of more than two millions of different-Qualitative variants of homogeneous or particular «personal» Interpretations of your LLUU-VVU-Form, which, simultaneously and concurrently with you, actively realize by their subterransive Focus Dynamics through diverse Form-Types in the other development scenarios of the given s-Reality.

3.0514. Owing to «General Cosmic Law of Equal Possibility of Creative Self-Determination» (AAKK-BRRRAA), in every moment of own conscious Existence, you have opportunity to choose exactly that «personal» Interpretation out of many potentially accessible ones to your multipolarizational Focus Dynamics, which is able to supply your essential necessities and current realizational abilities

with corresponding circumstances to the more degree than your «current» Interpretation. And if your «future» life Interests sphere is connected with realizations in more qualitative Levels of your Self-Consciousness, then each of your choices should be more qualitative by lluuvvumic signs (meaning, more intellectually-altruistic one), than the previous one: only in this way your Focus Dynamics will be able «to reproject» more steadily to the more and more ampliative NUU-VVU-Configurations.

3.0515. And vice versa: your stable fixation on the more egoistic choices or on the negative reactions always «dresses up» your Focus Dynamics into NUU-VVU-Forms of some protoformal development Directions, which are structured with less qualitative (with respect to the given Synthesis Scheme) energy-informational interconnections, and their VLOOOMOOT-Index has trend to restrict your Creative Activity in this human s-Reality type. Exactly quality of your every-instant choices defines the fact, will you refocus to NUU-VVU-Configuration with higher or lower VLOOOMOOT-Index at the next instant of your Existence. This factor is the most decisive during reaching your cherished goal, because one can reach It only by means of «alternate» and qualitatively successive (in space-time terms) «shift» of own Focus Dynamics to those NUU-VVU-Configurations, which qualitiveness mostly corresponds to subterransive features of that Self-Consciousness Form, which has ALREADY reached this Goal in some of development scenarios.

3.0516. The features of such purposeful NUU-VVU-Forms change consist in the fact that, along with every regular qualitative rising of *Focus of Close Attention* parameters, the upper limit of possible manifestation of your Creative Activity Focus (DYYUUTT-YYYU) also rises, increasing in this way opportunities of the more active participation of SFUURMM-Forms of the more high-qualitative Self-Consciousness Levels in your subsequent choices. Since VLOOOMOOT-Index has strictly subterransive value for f-Configuration of every Self-Consciousness Form («human,» «animal,» «vegetable,» «Planet,» «Star,» and other Forms), the process of its Potential growth becomes possible only due to concentration lowering of SFUURMM-Forms activity in Focus Dynamics, which are typical to any of development Directions diffuzgent to LLUU-VVU (protoformal ones). The Energy of impersept interconnections «released» at that ceases to serve as «distraction» for «person» Focus of Close Attention, and owing to that activity of SFUURMM-Forms of his/her Self-Consciousness ampliative Levels increases, and therefore, the same does his/her psycho-mental creativity quality.

3.0517. This regularity convinces us once more that no one and in no way is able to refocus to the sufficiently more qualitative levels of life creativity, but through successive — conscious and purposeful — refocusing from depliative Self-Consciousnesses Forms to the more and more ampliative f-Configurations of NUU-VVU-Forms of more qualitative diapasons. When you are steadily realized (saturated) with that, the potential activity of SFUURMM-Forms of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi lowest karmic Channels is gradually synthesized, decreased, and finally annihilated in many exhibition resopasons of your Focus Dynamics. It allows activation of SFUURMM-Forms of ORLAAKTOR- and AIGLLILLIAA-Iissiidi Form-Creators, Whose creative work, in turn, serves as catalyst for the further increase of ULGLUU- and SSAASSFATI-Iissiidi «chakram personalities» Creative Activity in your Focus Dynamics.

3.0518. Once again: no any «moving» of the more qualitative SFUURMM-Forms to the less qualitative s-Realities ever occur, as well as no any *objective* «shift» of NUU-VVU-Forms exist in Space-Time and

no any «physical» redeployment of anything is accomplished from some Form-systems to the others. In Macrocosmos, absolutely everything already is — in all different-Qualitative multi-variance of Self-Consciousnesses Forms peculiar to It. All Worlds' Form-systems (and everything else in them, which you cannot imagine) exists always concurrently, simultaneously with us. We can realize our eternal Existence only due to simultaneous endless variety of diverse subterraneous states in our Focus Dynamics: making more qualitative refocusingings, we become a part of the more qualitative varieties of Worlds' Form-systems and s-Realities types, where opportunities for manifesting SFUURMM-Forms used by us are dominating over opportunities of the less qualitative Conceptions.

3.0519. Qualitatively changing your Conceptions «about yourselves» and about surrounding you reality, you constantly just *resonationally choose* — out of all present Existence conditions variety of your LLUU-VVU-Form — exactly those things, which represent the greatest Interest «personally» to you at the moment. First, you gain appropriate fixation of your Focus of Close Attention Dynamics in necessary to you Energy-Plasma Levels, thus, resonational co-adjustment of the more active Form-Creators of your Self-Consciousness on qualitatively corresponding to them f-Configurations of Stereo-Types occurs within this STC group, where interesting to you signs combinations are intensified to required degree.

3.0520. Also, your Creative Activity Focus frequency dynamics gradually stabilizes in these s-Realities, and only after that, your «stay» in some scenario becomes conscious. Therefore, it is not you, who attracts your «future.» At the beginning, you «start to be» the unconscious *part* of some particular scenarios, with which Focus Dynamics you completely merge later. Having met your «current» Interest, you start again to successively and unconsciously — as if «in parts» — refocus to scenarios, which more correspond to the newly acquired signs of your «new» Self-Consciousness Form.

3.0521. Everything, absolutely everything in any of life situations depends only on your psychic state, on the degree of your Belief in the fact that nothing bad could happen to you at all. This Belief should not be farfetched, but should naturally manifest and become reliably established in your Self-Consciousness during the process of renitive analysis of consecutively mastered by you iissiidiological Knowledge owing to its multiple testing in certain complicated life situations, during highly dramatic concourse of circumstances. When all your Thoughts, Feelings, Intensions, and Convictions become real and active IISSIIDIOLOGY carriers, all your Life will naturally transform for the better, your Perception will become still more deep and conscious, and the Life will acquire more harmonious, intellectual-altruistic directivity. You will feel positive-trusting trends in relations with surrounding you reality and experience necessity in striving to get to know «your» Worlds, based only on essentially positive approach and deep comprehensive Understanding of the more authentic Essence of everything what happens around you and with you.

3.0522. Your psychic-emotional state in any situations is the determining Mechanism of qualitateness of your refocusingings. If you are in the fear, then, most probably, you will refocus to that variant of many similar situations, where everything is highly complicated and dramatic to you. However, if you are in the positive state with internal confidence in objective Fairness of everything, which happens to you, and if you keep calm in any case, you will soon realize yourself as a part of favorable to you consequences of the given situation.

3.0523. I have emphasized already that all sporadic Worlds are also «*your*» personalistic Worlds, with the only difference that you are mostly unscrupulous in them and suffer from anxiety, depression, self-doubt, diverse failings and vices, egoism and ambition. In any following moment of your Life, everything changes depending exclusively on which will be real condition of your psycho-mental state. This will define qualitiveness of f-Configurations of the Stereo-Types, newly focused by you, and development scenarios, structured by them. To faster, steadily, and safely refocus into exactly that part of «humankind» Collective Consciousness, where Immortality, Intellect, and Altruism have become natural attributes of the more harmonious Existence for the most people, one should try hard to make own choices at the higher qualitative Level regarding his/her previous trends.

SECTION X

Influence of the Diffuzgentness Principle on the process of Focus Dynamics formation of Form-Creators of the Iluuvvumic Synthesis Scheme

Chapter 1. Vibrational different-leveled Nature of Energy-Plasma

3.0524. You already know that all the duvuyllerrtly-sloogrent structure of the infinite variety of Universal CCIs, which form all the skrruullerrt (space-time) system of Macrocosmos by Focus Dynamics of their Own Form-Creators, is constituted by the infinite multitude of all possible vibrations generated by Focus Dynamics of diverse Self-Consciousnesses Forms (SVOO-UU-Entities). Being originated inside the Self-Consciousness of the SSS-Entity in strict compliance with Universal Cosmic Laws, these vibrations form (for themselves!) «the manifestation environment» of Everything Being, which we interpret subjectively as the UPDR — the Universal Plasmic-Differentiational Radiation (an individual vibrational analog of the UPDR is inherent to every modus of Space-Time. For example, within the 3–4-dimensional diapason, presence of the «physical» analog of the UPDR — so-called «relic electromagnetic radiation» — serves as a basis for exhibition of every nutation or fluctuation frequency).

3.0525. In IISSIIDIOLOGY, the term «vibration» means not only mechanical fluctuations implemented on the level of molecules, atoms, or nucleons, but also all possible results of implementation diverse and different-Qualitative energy-informational interconnections in the UPDR among Form- and Info-Creators, which form all the infinite diversity of types of dimension in Space-Time under various conditions of joint resonational interaction. By the term «vibrational,» I mean not only some frequency characteristics of the object under consideration (which manifests as a *nutation* — a frequency of fluctuations inherent to it — just in conditions of exhibition in the given dimension diapason), but the definite type of resonational interconnections between Energy and the corresponding part of Information.

3.0526. Every act of exuberation of unbalanced (consummative) State of Information (which represents the Focus Dynamics of the whole Macrocosmos in Its Essence) is a vibration expressed in one or another way in the given «point» of Space-Time. If we fix, by our measuring instruments or by our Perception system, disappearance of the weakest signs of fluctuations frequency of an object investigated by us that does not mean that vibrations of its other «projections» disappear in the given «point» of STC. Simply, the given conditions of the environment (or measuring instruments used by us) cannot provide capabilities necessary for exuberation of more complex and deeper («sublime») interconnections between Energy and Information, which are manifested in different — more ampliative — variants of our Focus Dynamics. Besides, the ability of bio-Creators of our Perception systems to fix or completely ignore the vibrations of various Self-Consciousnesses Forms in the surrounding environment also depends on the presence, in our Focus Dynamics, of the energy-informational interconnections (SFUURMM-Forms) common to our and «their» Synthesis Schemes and on the degree of resonation with each other.

3.0527. There would be nothing out of the borders of the Sphere of simultaneously-holochrone exuberation of any vibrations (if such borders existed in other types of Macrocosmos) — nothing that could be reflected in the Self-Consciousness of the SSS-Entity anyhow. Therefore, we can speak only about the *primogenitive* (absolutely balanced — *pre-mercavgnational*) State of Information which is free from any «projection» and Forms because all the energy-informational interconnections are annihilating there getting rid of inherent to them dissonational energy constituent and being redistributed along skunkktions of reconverstive Configurations.

3.0528. If Focuses (compensators of dissonational types of interconnections or Energy) disappeared in the Self-Consciousness of the SSS-Entity, there would be *liyllusceevization* (that is resonational «merging» of the f- Configurations in all the multitude of inherent features) of Form-Creators (because of lack of Energy-Potential for origination of Self-Consciousnesses Forms), and Info-Creators (because they would have nothing in order to get in resonational interactions), and realizational Focus Dynamics of the Self-Consciousness of the very SSS-Entity. We identify the Latter with functions of the Highest Cosmic Intelligence of Macrocosmos (Its Sound Cosmic Code — SS-AYIYLG-SS-SS-AYY-SSS; it must not be confused with the MUULLG-SSS-MAA SCC which is interpreted as «Holistic Life» and quite differs from the HCI of Macrocosmos essentially).

3.0529. Thus, each type of vibrations — from the simplest UUKKKHL-SS-KKHKHOO-Forms in the Quaternary Energy-Plasma to the zillion-dimensional Levels of Macrocosmos — represents the very complex structure of conditionally stable (in Focus Dynamics of a Self-Consciousness Form who perceives them) energy-informational interconnections that were simultaneously implemented in the post-mercavgnational State among different-Qualitative Form-Creators and Info-Creators. Every Self-Consciousness Form is first and foremost certain spectrum of energy-informational (that is focal) interconnections originated resonationally in one or another analogs of the UPDR. In disparate conditions of Space-Time all the sum of parameters of those energy-informational interconnections can be reflected in diverse particulas (from Latin — *particula* — a particle, piece of something) of slloogrent focal Configuration as subterraneously expressed by Form-Creators' Focus Dynamics (sequential manifestations of acts of covarlertness increase of energy-informational combinations generated by a Self-Consciousness).

3.0530. Vibration is a result of subjective qualitative shift which distinguishes parameters of any randomly selected particular of f-Configuration from all the rest particulars. This effect caused by shift in qualitiveness of Focus Dynamics, in our diapason of exuberation, is called *nutation* («fluctuation,» «frequency»); it is *ullumksation* in the megadiapason below 0-dimension; it is *profofsation* in the 0–1-dimensional diapason; it is *loolgsation* in the 1–2-dimensional one; it is *doollsatation* in the 2–3-dimensional one; it is *flaksation* in the 4–5-dimensional (translucence) one; it is *vuoldsation* in the 5–6-dimensional (luminosal) one; it is *orfrovttation* in the 6–7-dimensional one; it is *pruuissation* in the 7–8-dimensional one; it is *iymiyllsatation* in the 8–9-dimensional one; it is *peepptation* in the 9–10-dimensional one; it is *iissmmation* in the 10–11-dimensional one; it is *lyuullffatation* in the 11–12-dimensional one. Overall, within megadiapasons: it is *slaassmiatation* in the Tertiary Energy-Plasma (from 0 to 12 dimension); it is *ssloossnaatation* in Secondary Energy-Plasma (from 12 to 24 dimension); it is *ssuissfsaatation* in Primary Energy-Plasma (from 24 to 36 dimension); and it is *uuyyuzatation* in the megadiapason above 36 dimension.

3.0531. However, whatever part of zillion-dimensional superdiapason of our Macrocosmos we would consider, we always deal only with *vibration* in every case of Focus Dynamics exuberation. Regardless of type and conditional number of dimension, this vibration always represents the result of presence of signs of qualitative difference among particulars of one and the same slloogrent f-Configuration, on which Focus Dynamics focuses of either of Self-Consciousnesses Forms. Meanwhile, the Form Itself, as a part of the skrruullerrt system, is also manifested due just to presence of a vibration effect in Macrocosmos. The vibration effect is some dissonation between objective (potentially balanced) State of the SSS-Entity and subjective State of Its Focus Dynamics realized simultaneously along the whole hyperdiapason of Its exuberation in various types of Macrocosmos.

3.0532. That means that multipolarized slloogrent Focus Dynamics of Form-Creators of SS-AYIYLG-SS-SS-AYY-SSS-Entity fills, with different-Qualitative vibrations (Forms) of Its Existence, all the skrruullerrt system which simultaneously structures absolutely all varieties and types of Macrocosmoses with different-Qualitative energy-informational interconnections. In the whole multitude of different-Qualitative Directions of its possible development, this Focus Dynamics acquires some new features, attributes, and tendencies in any option of Its exuberation and duvuyllerrtly converges into zillions of other Macrocosmos types. For Those, the basis for energy-informational interaction and manifestation is also vibrations. Focus Dynamics slloogrentness of our synthetic Macrocosmos's HCI is structured totally or partially with Form-Creators' Focus Dynamics of zillions of different-Qualitative Extra-developed SSS-Entities (these are both Its «own» SSS-Entities as well Entities of HCIs of other Macrocosmoses types). All of Them are also structured with specific kinds and types of vibration.

3.0533. No one Self-Consciousness Form can exist subterraneously, without inherent only to it, resonational manifestation inside the Focus Dynamics of the SSS-Entity, and without corresponding «projecting» some of properties inherent to Its slloogrent Energy-Potential into its own Focus Dynamics. Likewise, nothing can avoid the presence, inside of its f-Configuration, of all the diversity of Its Form-Creators — the Cosmic Entities of various Self-Consciousness's Levels simultaneously manifested in all possible realizational Directions of Its Own Cosmic Creation. Owing to that, everything manifested objectively and existing subjectively in the «material» World around us reflects only certain versions of fixation of some properties of Universal Self-Consciousness Focus in relatively

«local» Time and Space parameters. The Universal Self-Consciousness Focus appears functionally in each specific case (through the Focus Dynamics of all Proto-Forms of GOOLGAMAA-A) as the unique concept (product, creature) of the common form-making Principle typical only for the given «physical» s-Reality.

3.0534. Energy-informational interconnections always (regardless of their snap to subjectivity of any Perception system) remain, in that forming Principle, qualitative and objectively neutral as much as they are in the original primogenitive Information State regardless of how they are interpreted — from the positions of inherent to them Synthesis Schemes — by Form-Creators of one or another Self-Consciousness Form. These energy-informational interconnections are generated as versatile Energy types by Form-Creators of various Self-Consciousnesses Forms and form all infinite multipolarization of simultaneous manifestation of the USCF-Dynamics. I remind you that, when we talk about Self-Consciousnesses Forms, we mean, without any relation to any certain diapason of dimension, all infinite variety of Forms of creative Self-Manifestation of different-Qualitative Form-Creators of all possible types of Collective Cosmic Intelligences Who structure, with their specific Focus Dynamics, various amplificational Development Branches for absolute realization of all Interests of the SSS-Entity, beginning (in the given exuberation regime) from CCI of photons and other Forms of Existence of the given DDIIUYI-Entity (AYFAAR) and finishing with CCI of zillion-dimensional Levels of SS-AYIYLG-SS-SS-AYY-SSS-Entity.

3.0535. This is only Creative Activity of Form-Creators of all possible kinds and types of Collective Cosmic Intelligences which is only possible to consider as something really existent in everything that structures visibly or invisibly to us the Focus Dynamics of our own Form-Types and any objects of the Worlds' Form-systems around us. Because, apart from the CCIs (or rather, apart from different-Qualitative Focus Dynamics generated and made up by Them. «Projections» of these Focus Dynamics are perceived by us as locally expressed Self-Consciousnesses Forms), there is nothing more subjectively Existent in Macrocosmos. Initiated in every exuberation regime of «local» parameters of Space-Time as one or another Form, each creative Element of their slloogrent Focus Dynamics is unconditionally self-conscious, meaning, perceives «itself» specifically regarding the subterrassive Form of creative self-manifestation inherent to this Element.

3.0536. Applying the term «Self-Consciousness,» you have used to mean just few psycho-mental characteristics of individual human creativity (of «a person»), which are accessible for your Perception and comprehension, while you forget that Self-Consciousness as a universal property of any particle (Element) of the of Macrocosmos's CCI is totally caused by collective creativity of the infinite multitude of different-Qualitative Forms who are self-conscious in exuberation regimes inherent to them. These Forms provide every kind of your Creative Activity, and comprehensive functional opportunities for your biological organism, and all specific peculiarities of your surrounding reality. They are not only realizational Forms of «chakram personalities» of your IISSIIDI-Centers, but also Form-Creators of many CCIs' Types : «Mineral,» «Herbal,» «Animal,» which structure, with their Focus Dynamics, the CCIs of all Worlds' Form-systems, all types of s-Realities, and STC groups of the given Planetary Entity, which provide participation of all the multitude of the rest Proto-Forms of GOOLGAMAA-A during their own amplificational Processes of Self-Cognizing through the Synthesis of all various combinations of diverse Aspects of the Pure Qualities.

3.0537. Still having no opportunity to look at the deep forming plasmic-structure of photons and elementary particles, which make the whole aspectable materiality of the surrounding reality, people used to attribute the features of awareness and Self-Consciousness only to the limited amount of Forms which, in manifestations inherent to them, can demonstrate some features created and assumed by us as «true.» Such features are considered by us as if usual for all «living beings,» meaning, they are able to function in the way similar to ours at something, at least. That is the proof for they possess certain degree of «animation.» In other words, scientists recognize the right for subjective Self-Consciousness in creatures which are able — one way or another — to witness some evidences and clear signs of their awareness in accordance with our subjective Conceptions about presence of Life in a Form.

3.0538. Only because «people» are just incapable of perceiving, cognizing, recognizing other living beings by features understandable to «humans,» all the Forms of self-conscious creatures, who perceive themselves narrow-specifically, in different way as compared to us, in specific exhibition conditions of s-Reality of the current type, remain totally «unconscious,» «inanimate» for «people.» Being not capable to follow the sequence of Life appearance and development of Self-Consciousness in Life in details and renitively, people strike easily and recklessly the whole infinite diversity of Forms of material objects and appearances from the group of Cosmic Entities. Though, near to them, thanks to them, and together with them, all possible Form-Types of our NUU-VVU-Forms coexist eternally and self-develop actively.

3.0539. Even if many of them appear in our Life with logics and intelligence inherent to them and unusual for us, people persistently continue to accord their meaningful actions to «unconscious» Nature without even thinking that Existence of the Nature Itself is totally structured with Lives of the infinite multitude of Elements of Its Collective Self-Consciousness (including us) which actively fill absolutely all Forms of Its manifestation with focal dynamism of their own subterraneous creative realizations. Each of appearances, as well as each of objects making all Focus Dynamics of the World around us: Mountains and stones, woods and trees, oceans, seas and rivers, buildings constructed by us, bridges, mechanisms, and all other results of our lifetime creativity, possess specifically «fragmented» (that is, concentrated on everything tied with existence of their own Form) Self-Consciousness. The word «fragmented» is used here not because every Element of subjective exhibition of slloogrent Focus Dynamics (this is Stereo-Type for us) is able to have Self-Consciousness during just very limited period (during one relative instant, «fragment»), but because our Perception systems can fixate only *intermediate* combinations of these «fragments» in the whole Focus Dynamics.

3.0540. Without the Mechanism of Self-Consciousness and out of It, nothing can show features of the process interpreted by us as «subjective Existence.» Nothing can either be, or self-realize itself creatively in any other way, anyhow, in any of uncountable types of s-Reality. When We use such expressions as Energy-Information, Energy-Plasma, Matter, Space-Time, and many others, we mean just intermediate dynamical results (Forms) of Creative Activity of Self-Consciousness Levels of all possible degrees of freedom and development, which provide the subjective Process of total realization of diverse Interests of the Highest Cosmic Intelligence of Macrocosmos with simultaneous activity by their countless Forms in each of «points» of their resonational application/reflection.

3.0541. No matter how negligible and insignificant it seems to us, every Form (f-Configuration), which has a certain function in any subjective process, is one of zillions of Self-Consciousnesses Forms because Focus Dynamics of its Form-Creators is structured with infinite multitude of self-conscious Elements of any of Collective Cosmic Intelligences each of whom concise itself subjectively on the level of peculiar to it, sphere of subterraneous application of its own functionality. All surrounding reality including all Form-Types of our NUU-VVU-Forms represents intermediate results of the huge amount of realizational activities versions of Collective Cosmic Intelligences' Form-Creators from the Tertiary Energy-Plasma part which we determine as «Form-Matter» (to 4.0 dimension).

3.0542. In our types of s-Realities, the f-Configurations of these Form-Creators represent reconstructions figuratively-sensually and mentally-logically modeled by us (that is, auxiliary «means,» necessary «forms,» typical «tendencies» specifically synthesized of combinations of many protoformal SFUURMM-Forms), which allow TOO-UU-Entities of certain qualitative Levels of s-logrent Focus Dynamics of Energy-Plasma to Self-Realize actively through the given Form-systems of existence with the purpose of maximal deepening and diverse detailing of the general amplificational Process.

3.0543. Regrettably, the «current» state of science does not permit scientists to comprehend the true Essence of *self-conscious* existence of countless Form-Types («mountains,» «woods,» «oceans,» «typhoons,» «tornadoes,» and so on) which represent, in human types of s-Realities, the Focus Dynamics of all kinds of protoformal CCIs that are radically different from our Focus Dynamics. To the more extent, this categorical rejection of the fact of possessing, by every Form, the Level of Self-Consciousness peculiar to it appears in relation to very specific Forms of creative realization of Self-Consciousnesses Forms' FDs of various cosmic «radiations,» as well as to the matter of existence possibility of some analogs of «interpersonal» relationships among elementary particles, atoms, molecules, and molecular combinations (both biological and abiotic) consciously arranged by them.

3.0544. This difference in the Principles of formation and realization of *our* and *their* Focus Dynamics being insuperable on the current stage of our development is observed not only in the specifics of manifestation of diverse energy-informational interactions inside Proto-Forms themselves, but also in the main differences in distinctive properties of our and their Self-Consciousnesses Forms. By those Principles of formation of Focus Dynamics, the main peculiarities of organization, by different-Qualitative Form-Creators, of diverse protoformal analogs for our human Perception systems are manifested in corresponding types of s-Realities. For example, if cutting such Self-Consciousnesses Forms as «a rock» or «a stone slab» in many particles, it will result in the multitude of smaller Self-Consciousnesses Forms of «stones» which still reflect the main characteristics of their original Form before grinding.

3.0545. That means that such Form of creative realization of different-Qualitative Form-Creators, as the Self-Consciousness Form of «a rock,» is different from mixtum analogs of our NUU-VVU-Form-Types so much radically that such Form is hardly changed qualitatively during breaking into smaller components. It continues to appear in STC as Self-Consciousnesses Forms of all the multitude of chemical elements combinations which represent themselves as a part of the rock and allow Form-Creators of protoformal CCIs to synthesize some certain Experience of convergence of sub-Aspects

and Aspects of certain Pure Qualities through realization of physical-chemical properties of stone. If turning a stone into fine dust (up to a certain particles size), every dust particle will consist of the same chemical elements and perform the same physical-chemical properties as a separate stone slab. Only gravitational and electromagnetic properties, which depend on mass, will change.

3.0546. Given the fact that «there are not two fermions alike,» during the subsequent process of inertial formation of a new Self-Consciousness Form (a stone or another Proto-Form) from those separate dust particles, certain conditions of that process will proceed with new fermion contents in each distinct case, what will influence very much on the creative direction of the Focus Dynamics (therefore, qualitative structures included) of every of the newly organized Self-Consciousnesses Forms of the given CCI. Almost the same happens to the internal transformation of Self-Consciousnesses Forms of «oceans,» «seas,» «rivers,» or «lakes»: Each water drop from such Form-system (for instance, an ocean) will have different chemical composition and possess different Energy-Information; the same result will appear in cutting the more mobile («air,» «methane») and more inert Forms («metallic compounds,» «glass») in components.

3.0547. If you broke a plant or cut a tree in half, the picture of the consequences of these actions would change totally: the more developed the plant is (meaning, the more amount of covallert interconnections constitute the Focus Dynamics), the more intensively the Self-Consciousness of Form-Creators of the given Form aspires to keeping its species collective peculiarities (subterraneity), and the harder the given Form of intelligent Life maintains the current Self-Consciousness level while heavy mechanical separation. Nevertheless, it should be noticed that there are Self-Consciousnesses Forms of primitive plants and animals, which are much better capable of complete regeneration after mechanical cutting them out. Besides, they keep the Self-Consciousness level, which was inherent to them before cutting. For example, the kind of starfish *Lunckia columbiae* can replicate the functionality of its body completely from any cut part in a size of 1cm. However, if you saw an insect in half, even if as small as a flea, there is no way you can get two well-functioning Self-Consciousnesses Forms of flea.

3.0548. Focus Dynamics of animal Self-Consciousnesses Forms realize themselves with assistance of Form-Creators of many complex-structured Self-Consciousnesses Forms of separate living cells, which perform, in the general Form, various realizational functions of supporting body organs and systems of the integral biologic organism, which are structured by these cells. Each of these Forms is already very complex in organization of covallert interconnections by Collective Self-Consciousnesses' structures of their organisms. These structures is much more complex than Collective Consciousnesses of a rock or a stone. All Form-Creators of cellular Forms constitute and functionally provide interconnections among different body organs, whose Self-Consciousnesses Forms are still more complex, because they support all realizational abilities and possibilities of the Perception system of the holistic Self-Consciousness Form of an animal: they allow it to move independently, to eat, to breed, to reproduce similar Forms always and to combine, inside of them, all creative interconnections among organic and inorganic substances, and so on.

3.0549. As I have noticed before, each of animal Self-Consciousnesses Forms is aware of itself on its own, peculiar to it, level of subjective Perception, while the realizational Focus Dynamics of

Form-Creators of Self-Consciousnesses Forms of mountains, oceans, plants, or «inanimate objects» demonstrate, in STC, specific peculiarities of totally different Synthesis Schemes inherent to the Aspects of the Pure Qualities converged by those Forms. Combinations of the Aspects determine all the qualitative and functional specificity of Focus Dynamics implemented by those Forms. Mountains, and rivers, and woods, and diverse objects, and human — they all exist consciously in their own manners, realize their signature features (FD) in Space, and undergo the inherent to them, eglleroliftive perturbations in Time (change of scenarios in subterransive rotational Cycles). However, between Levels and degrees of their individual and collective awareness, there are gaps unbridgeable in any way, which do not allow one kind of Proto-Forms to experience (that is to synthesize one and the same Experience) exactly the same things peculiar to Form-Creators of other Focus Dynamics and Perception systems.

3.0550. Even the most «elementary» particles of Energy-Plasma, which structure the current s-Reality type, are NOT so «dense» as we perceive this, but they represent covarllert combinations of boson Self-Consciousnesses Forms of diverse qualitative structures, subterransive Configurations, and vector orientation of constituent force tensions. By «individually» peculiar to them features and creation types, which are actively manifested in Focus Dynamics of Form-Creators of UPDUYKK-Field, namely elementary particles structure, in a very specific way, the holistically formed by them, realizational Self-Consciousnesses Forms of various, more large-scale Proto-Forms (from molecules and microorganisms to Planetary and Star Entities), modifying them to the particular extent when their Focus Dynamics are interpreted in someone's Perception systems as «dense substances,» and in someone else's are interpreted as «gaseous» or «liquid» states. Moreover, in some other systems, these Focus Dynamics will not be either fixated, or identified in any way.

3.0551. No one Form has even a chance to appear in Macrocosmos beyond the slloogrent energy-informational Process of Focus Dynamics realization, which allows any part of f-Configuration to be subjectively aware of itself being actively involved into some kind or type of functionality peculiar to it «originally.» The fact of exhiberation of Energy-Plasma in a Form is the consequence of availability, in it, of slloogrent Focus Dynamics, each structure Element of which (through resonational interconnections between Form- and Info-Creators) can manifest, in Space-Time, only those Self-Consciousness features (Level and type) which support analogs of subjective Perception systems composed by each Element. Thus, for example, Self-Consciousnesses Forms of photons are provided with analogs of Perception systems inherent just to them; SCFs of elementary particles are provided with their own ones; SCFs of atoms and molecules are provided with their own ones; SCFs of cells and crystals are provided with their own ones; FS of humans, animals, plants, and minerals are provided with their own ones; SCFs of Planets and Stars are provided with their own ones...

3.0552. Universal Principles of Slloogrentness and Diffuzgentness of Energy-Plasma enable Focus Dynamics of Form-Creators of these Self-Consciousnesses Forms to organize themselves consistently in f-Configurations of the manifestation realizational spectrums common for them. In the skrruullerrt structure of STC, the Principles form all possible diverse kinds and types of temporal concatenations — from f-Configurations of atomic and molecular beings to f-Configurations of Planetary and Stellar Entities. Absolutely everything in Macrocosmos subjectively appears as the result of realization of specific creative dynamisms peculiar to all the Forms. There is not more

permanent Process than endless qualitative changes of the eternal Life which duvuyllerrtly forms, revives, and endows each of these Forms with their own Self-Consciousness.

3.0553. You can perceive all phenomena and processes only through subjective analysis of your observations of intermediate results of their continuous multilateral (and multilevel!) creative interactions which may appear very superficially as created by you, Illusion of «infusion,» «introduction,» «integration» of one thing into another thing or, on the contrary, «outflow,» «differentiation,» «leaving» of something through metamorphosis of more global processes observed by you which you determine as «emergence,» «development,» and «death» of something (or someone) at your own Perception level. In other words this is perceived as continuous conversion of some «current» Self-Consciousnesses Forms into the other Forms.

3.0554. In every holistic manifestation, you are able to see and recognize only some of details of countless effects of the general slloogrent Process. These details subjectively look like specific multilevel perturbations and transitions into each other of all possible different-Qualitative tendencies, mutually exclusive inclinations, dual affectative Aspirations, and subterransive creative efforts which often can seem confused and uncoordinated. Meaning, any Form of any phenomenon observed by you and subjectively determined by you as something «holistic» always represents just an intermediate dynamic result of Creative Activity in the given group of STCs of many as if «contradirectional» (from your subjective perspective!) varieties of decoherent Energy. Each of them manifests itself through Focus Dynamics of the given Form as if regardless of others, strives to realization of only its own purpose, and emanates changes peculiar only to it in this «holistic» something.

3.0555. Being elusive for your Perception and thus, in no way identified by you, all these varieties and types of the holistic Energy fill all your Existence so organically and naturally that you do not even notice, when you get involved in close and uninterrupted even for a moment, interconnections with zillions of various Forms of creative realization of all possible Collective Cosmic Intelligences during your vital activity (breathing, nutrition, thinking, sensation, and so on). This way, you are essentially the multifunction «factory» of Synthesis and multilevel processing of countless different-Qualitative Forms of this holistic Energy. Gravity, electricity, magnetism, any radiations, thoughts, feelings, air, water, fire, sounds, smells, herbal and animal worlds, you yourself, just like absolutely everything else are various Forms of creative manifestation in the current type of s-Reality of the whole infinite number of self-conscious Cosmic Entities we interpret as «Forces» and «Energies.»

3.0556. All of them are — certainly and absolutely! — united, in all the diversity of subterransive peculiarities of their Creative Activity, regardless of «physical,» «mental,» or «psychic» manifestation of these Forms in specific conditions of Focus Dynamics of the current s-Reality. Only owing to all-dividing tendency of your «mind,» this multidimensional content of the AYFAAR Collegiate Cosmic Intelligence's FD is subjectively classified and diversified into as if separate, more or less accessible for your Perception, kinds of Energy-Information (that is Self-Consciousnesses Forms). This Energy-Information is transformed inertially somehow at the high-powered «nuclear reactor» hearth of your organism into many other varieties of Forms peculiar to it. Bio-Creators of your biologic organism are continuously engaged in conversion of some Forms of that holistic Energy into its other Forms: «Water» and «dense food» are radically altered at digestive system; «air» is altered at lungs; «solar

rays» are altered at skin and hair; «thoughts,» «feelings,» «smells,» and «sounds» are altered at central nervous system, and so on.

3.0557. Even principle structure of your «digestive tract» mostly resembles nuclear mini-reactor where the role of «combustion products» is played not by radioactive substances, but by «the food» brought to your stomach. The Self-Consciousnesses Forms interpreted by you as «water» constitute 80 per cent of your biologic «body's» mass. Owing to their unique dipole and energy-accumulating properties, they play the primary role in this process. Being differentiated in the reactor of esophagus into atomic Self-Consciousnesses Forms of «hydrogen» (which are rapidly excreted from the organism through the respiratory system) and «oxygen» enriching blood, they allow Form-Creators of the brain to proceed all physical, physiological, and psycho-mental realizational activities. The same process of fission of «live food» Energy into more highly specialized Self-Consciousnesses Forms concerns also all the Self-Consciousnesses Forms of «lipids,» «proteins,» and «carbs.» Atomic Self-Consciousnesses Forms of «air» are especially important for our life support. They are split at «the reactor» of lungs and are converted into «the fuel» on the higher qualitative level.

3.0558. Everything you attribute to «solar rays» (wide range of diverse — alpha, beta, gamma, theta, and many other — cosmic radiations) is also split at «the nuclear reactor» of skin and hair into corresponding Self-Consciousnesses Forms in order to be synthesized immediately into those Self-Consciousnesses Forms of physiological organism, without which your usual creative existence would be either very difficult or just impossible. Nowadays, you devote very few attention to such type of your «nutrition» and treat various cosmic radiations as insignificant factors that provide the existence of your «current» NUU-VVU-Form-Types. However, many of you, who get stable on the more ampliative Levels of Focus Dynamics, are about to feel all the importance of powerful influence of certain Self-Consciousnesses Forms of cosmic radiations both on their whole life creative work and on qualitiveness of their Existence.

3.0559. Implementation of total Universal Laws including LLAASS-LLUUSS («the Law of ALL-Unity of multiplicities»: «there are many of You, and You are the One») and SSALLASST-UUSST («the Law of ALL-Integrity and multiplicities»: «ALL-Dependence and ALL-Permeability of all the creative diversity of Life Forms in Everything») is also supported owing to permanent presence of universal energy-informational interconnections among all «creative centers» of Self-Consciousnesses Forms of absolutely all Types of the Whole Life. Any physical demolition of what you evaluate as «the whole,» due to high limitations of your Perception systems, should never be interpreted as its real destruction. In the already existing Form-structure of Macrocosmos, EVERYTHING IS IMPOSSIBLE TO ELIMINATE IN PRINCIPLE because there are always only *qualitative changes* of certain parameters of energy-informational interconnections inside Focus Dynamics of particular components of the Single Whole. Form-Creators of these components are involved in endless Processes of «reprojection» from the Self-Consciousnesses Forms of some qualitative Levels of Energy-Plasma into the Self-Consciousnesses Forms the other Levels of Energy-Plasma.

Chapter 2. Variety of Self-Consciousnesses Forms structuring Iluuvvumic birvulyarity type

3.0560. To understand more renitively the process of formation and manifestation of the personalistic and sporadic Worlds characteristics through your Focus Dynamics in the surrounding reality, you should understand well and imagine clearly the Mechanism owing to which all possible energy-informational interconnections are transformed, in the subterransive Perception of your «personality,» into holistic and logic «depiction» of the subjective Existence which we all interpret as «the surrounding reality.»

3.0561. Similar metamorphoses would be impossible without really infinite diversity of Self-Consciousnesses Forms of all sorts of CCIs, owing to which, at a «point» of Space-Time, seemingly incompatible manifestations of Creative Activity of Form-Creators get an opportunity to unite for certain realizational activity in incredible — for us! — way. So, we will talk exactly about them: Forms and principles of exhibition of all possible qualitative features in the skrruullerrt system.

3.0562. Permanent diversity and variability are the most significant characteristic of energy-informational interconnections of slloogrent Focus Dynamics of Collective Cosmic Intelligences of infinite multitude of GOOLGAMAA-A-Ingredients which develop *simultaneously* at different-Qualitative Levels of Tertiary Energy-Plasma through Focus Dynamics of zillions of realizational Proto-Forms of Self-Consciousnesses (Form-Types synthesized in various Schemes and sub-Schemes). That means that, in the Focus Dynamics of each of Self-Consciousnesses Forms, all multitude of interconnections, while getting *holochronely the* eglleroliftive Impulse-Potential for their further development, «reproject» to other spectrums of Its (that is GOOLGAMAA-A-Ingredient) slloogrent ethereal Configuration thus providing Form-Creators of the Self-Consciousness with more and more functioning regimes.

3.0563. In an endless series of different-Qualitative refocusingings, there is neither ambiguity nor any definiteness peculiar to your current Conceptions about the Amplification process: As a result of influence of Principles of qualitative Diffuzgentness on the Focus Dynamics of all Self-Consciousnesses Forms, the process of their subterransive development (refocusingings), in every subsequent moment of their eternal subjective Existence, becomes equally possible in each of the infinite multitude of protoformal Synthesis Directions structuring the given regime of Energy-Plasma exhibition. I defined this Universal Effect of Self-Consciousness conditionally as the property of *simultaneous multipolarization* of Focus Dynamics of absolutely all Proto-Forms which are initiated for exhibition by GOOLGAMAA-A-Ingredients in different-Qualitative regimes of Focus Dynamics of all sorts of Planetary and Stellar Entities.

3.0564. That means, *firstly that* in achieving a sufficient (for the given exhibition regime!) degree of geyliturentness or covarlertness, all types of energy-informational interconnections structuring various Rejomirals can be initiated *jointly* and simultaneously in different spectra of Focus Dynamics of diverse Self-Consciousnesses Forms irrespective of Synthesis Schemes peculiar

to them. Meaning, if a certain resonational effect dealing with a manifestation type of some separate features is achieved in energy-informational interconnections inherent in Focus Dynamics of Self-Consciousnesses Forms of *various* Proto-Forms, so the SFUURMM-Forms specifically reflecting these features in a subjective Reality will possess equal capabilities for their own active exuberation through subterransive Focus Dynamics of each different-Protoformal Self-Consciousnesses Forms (for example, through humans and some kinds of animals; animals and plants; certain kinds of plants and minerals; molecules and separate atoms; atoms and elementary particles structuring them).

3.0565. *Secondly*, similar SFUURMM-Forms of these resonational interconnections can be activated simultaneously in Focus Dynamics of some Proto-Forms as by specific, unique properties, as directly by the whole spectrum of different-Qualitative features which structure various protoformal Directions in these Synthesis Schemes. In other words, you can never answer the question about the original Direction of SFUURMM-Forms which support your Focus Dynamics at one or another moment of our Life: Usually, we deal with complex-structured *different-Qualitative* UU-conglomerates in whose Configurations the Form-Creators of our NUU-VVU-Form-Types find resonationally Their inherent (whenever narrow-specifically kleksed by Them) VVU-Factor or KLEKS-Factor. The latter is inherent only to the Self-Consciousnesses Forms «projected» to various manifestation conditions of the skrruullerrt system through the slloogrent Focus Dynamics of LLUU-VVU-Entities.

3.0566. It should be noted now that NUU-VVU-Forms of «yet not humans,» humans, and Humans (manifested from 3.0 to 6.0 dimension) are not the only Self-Consciousnesses Forms, through which the Creative Activity of LLUU-VVU-Entities is realized in the given megadiapason. There is also the infinite multitude of other Forms who provide Form-Creators of the lluuuvvumic birvulyarity type, within the same Synthesis Schemes (2, 3, 4-, and 5, 6, 7-invaderental Synthesis Schemes), their focal «reprojection» process to quite wide spectrum of different combinations of the signs synthesized by them. I would graphically compare all these Forms with lots of various «stencils,» using which it is easy to depict, in the slloogrent Focus Dynamics of LLUU-VVU-Entities, the general and more universal «picture» of the Creativity Sphere made by Them in various space-time exuberation regimes. It is actually impossible for me and you to catch, what exactly unites all these, seemingly, completely different in their realizational essence, Self-Consciousnesses Forms to the holistic Creative Origin (LLUU-VVU-Form) because Form-Creators of all twelve OO-UU-Entities are involved into their specific Focus Dynamics in different ways and to varying degree.

3.0567. Regardless of Form-Creators activity of various Self-Consciousness Levels in any Form of creative realization of CCI of any type, the Focus Dynamics of this Form represents (in the particular STC conditions) some part of slloogrent dynamic processes of different-directional Synthesis of some signs peculiar to varying degrees to various OO-UU-Entities. For example, those Form-Creators of various Form-Types of our NUU-VVU- and LLUU-VVU-Forms, which are manifested specifically in many «physical» s-Realities of other Planetary and Stellar Entities, are engaged into synthetic Processes differing very significantly. That has a big impact not only on the appearance of the Forms, but also on the difference in «internal» content of their Focus Dynamics appearing through extremely different-qualitative life creative work demonstrated by such Form-Types.

3.0568. If you were given an opportunity to communicate by means of speech with those of your NUU-VVU-Form-Types, whose Focus Dynamics are formed in quite different sub-Schemes of lluuvvumic inter-Qualitative Synthesis, as compared to you (meaning, at the elevated catalyzing activity, in FD, of Form-Creators of either of ten remaining PCQs except ALL-Unity), so you just would not come to an agreement and mutual understanding because there would be total misunderstanding concerning not only views on Macrocosmos, Space, Life, but also the most elementary things: conceptions about yourself, society, various systems of values, and so on.

3.0569. As for the universal meaning of Sound Codes, owing to specific characteristics of speech organs of humans of various races and civilizations, they are distorted quite significantly and peculiarly at pronouncing in different languages and by different means. Thus, SCCs become really effective in use only in achieving the amplificational ability for communication on the level of telepathemes by the majority of people. Indeed, Focus Dynamics of Collective Consciousness of our «current» human community is just structured with the different-Qualitative Focus Dynamics of namely these differently synthesized mixtum analogs of your NUU-VVU-Form-Types.

3.0570. If we, humans, can neither understand, nor accept each other very often, so what can we say about perspectives of our possible relationships with such Form-Types of the Collective Intelligence of LLUU-VVU-Entity, which differ — as in their Form, as in qualitiveness of their specific «psycho-mentality» type — very much in means of Their own subterransive manifestation and are active participants of completely different creative Processes? All that is valuable and makes a big Interest for you and me has not the slightest value for them because it is excluded either partially, or totally from the Focus Dynamics of Form-Creators of their NUU-VVU-Forms of Self-Consciousness due to significant difference among our and their sub-Synthesis Schemes.

3.0571. Thus, LLUU-VVU-Form represents the conditional «crossing point» of Vectors and Directions of simultaneous application of Creative Activity of the huge amount of other different-type CCIs in every diapason of its exuberation and in every type of s-Realities, which are formed diffuzgently by the Focus Dynamics of Form-Creators of all the multitude of Its different-Qualitative Form-Types (including our NUU-VVUs). It becomes either a convenient field for their harmonious interaction, or a specific arena for settlement of their impersept, destructive relationships. This diffuzgent development factor is inherent not only to formation and realization processes of LLUU-VVU-Entity, but also to exuberation of Self-Consciousnesses Forms structuring all remaining CCI types.

3.0572. In each dimension diapason, the slloogrent Focus Dynamics of LLUU-VVU-Form is organized by the joint creative activity of Form-Creators of the large number of different-protoformal Self-Consciousnesses Forms who realize themselves at the same time at uncountable Levels of the given megadiapason of Energy-Plasma and simultaneously «project» their Focus Dynamics along with Creative Potentials inherent in each of them over all amplificational Vectors. This principle of the common energy-informational complementarity during the process of simultaneous realization of all Self-Consciousnesses Forms of different-protoformal CCI types is universal for all exuberational Energy-Plasma Levels.

3.0573. Each of the NUU-VVU-Form-Types focused by us represents some combination of Focus Dynamics of Self-Consciousnesses Forms which are interested in the implementation process of our creative life activity. It is exactly the internal «field of creative self-realization» where, every moment of Time, various different-Protoformal Conceptions (including Self-Consciousnesses Forms) have real chances to appear in Space. These Conceptions and Self-Consciousnesses Forms acquire gradually the features of namely *human* Thoughts, experiences, habits, and inclinations while interacting specifically (kleksing) with Form-Creators of the lluuvvumic pair of Dominants. Meanwhile, focal Configurations of different-Protoformal Self-Consciousnesses Forms also become universal and improve svilgs-spherationally in Synthesis Schemes *peculiar to them* at the expense of involving the most covallert lluuvvumic interconnections into their own FD.

3.0574. So, except the NUU-VVU-Configurations, slloogrent Focus Dynamics of Every LLUU-VVU-Entity is structured also with a lot of other Forms, such as, for example (here I emphasize the middle part of SCC for you to see the difference among them more easily): NUU-LL-VVU (the next of more ampliative Forms of us; these are the same as dimidiomittense NUULL-VVU), NUU-SM-VVU, NUU-LG-VVU, NUU-YF-VVU, NUU-DL-VVU, NUU-BKH-VVU, NUU-TT-VVU, NUU-RL-VVU, NUU-NN-VVU, NUU-PK-VVU, NUU-SS-VVU, NUU-UU-VVU, NUU-AO-VVU, NUU-VKL-VVU, NUU-RTM-VVU, NUU-FSL-VVU, NUU-AIA-VVU, NUU-OEI-VVU, NUU-OOO-VVU, and others whose Focus Dynamics are able to synthesize variously and reflect specifically, in FD of their surrounding reality, the implementation of the main signs of the lluuvvumic birvulyarity type which you subjectively interpret, in terms of the given subjective Realities' organization, as high-sensual Intellect and high-intellectual Altruism (HSI and HIA); however, they direct the process of your refocusing not to achieving the State «Creative Cosmic Potentiality,» but to various Protoformal versions of your «future» development.

3.0575. That's why, as soon as possible, you should learn to distinguish intuitively and «to filter out» thoroughly in your FD the true signs of HSI and HIA from far-fetched ones. The latter may also seem to you both socially efficient, and reasonably convincing during defining more qualitative versions of choices, because they discord far less with your selfish Interests and Conceptions, with your ambitious tendencies, and possessive preferences.

3.0576. In two-invaderental Synthesis Schemes the first of these signs (HSI) can be reflected at ampliative Levels of Focus Dynamics of human and humanoid Self-Consciousnesses Forms by means of active prevalence of one of PCQs of Energy-Plasma *mentoplasmic* spectrum (ALL-Will-of-ALL-Intelligence, ALL-Primordiality-ALL-Initiality, ALL-Mobility-ALL-Presence, ALL-Knowledge-ALL-Informedness, ALL-Aspiration) over any of the rest seven PCQs which play an equally important role of the second Dominant in the given Synthesis Scheme. The second sign (high-intellectual Altruism) can be reflected through not less ampliative Levels of Focus Dynamics as a result of significant prevalence of one of the PCQs from the *astropasmic* group (ALL-Love-ALL-Wisdom, ALL-Integrity, ALL-Essentiality-ALL-Permeability, ALL-Abundance-ALL-Fullness, ALL-Voidness-ALL-Vacuumness) over any of the rest seven PCQs, which also play the role of the second Dominant.

3.0577. For example, in the Focus Dynamics of our NUU-VVU-Forms, the stable prevalence of the ampliative characteristics of the invaderental Quality, such as ALL-Will-of-ALL-Intelligence, over the

ampliative characteristics of *equally* invaderental PCQ ALL-Love–ALL-Wisdom generates, into the surrounding reality, namely these subjective Conceptions which we define as high-sensual Intellect. It should be clear to you as to what the Intellect is, but why have we named such of Intelligence manifestation as a high-sensual one? Because *resonational* synthetic combination with ampliative *mental*-Levels can involve different-Qualitative signs of the same ampliative *astro*-Levels which are associated with «high experiences,» «deep Feelings» in our Perception.

3.0578. However, as for the other *diffuzgent* development Directions (not towards achieving the «CC Potentiality» State), ampliative combinations of invaderental characteristics of the given PCQ (ALL-Will-of-ALL-Intelligence) with invaderental characteristics of other PCQs (ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Abundance–ALL-Fullness, ALL-Voidness–ALL-Vacuumness, including «borderline» PCQs — ALL-Unity and ALL-Steadiness–ALL-Stability) are not less qualitative in this regard. These combinations are considered as *different*, specific manifestation versions of the high-sensual Intellect signs. In the *realizational Essence* peculiar to them, they reflect, in the Focus Dynamics, virtually homogeneous SFUURMM-Forms which we perceive logically and intuitively as different versions of the high-sensual Intellect realization.

3.0579. Similarly, this is the case with our subjective Conceptions about different-Qualitative manifestations of specific combinations of high-intellectual Altruism signs in ampliative Focus Dynamics of our surrounding reality: In their realizational Forms, these manifestations can be very different, but in their containing Essence, they can be very similar and of equal value, although, not so radical from the standpoint of evaluating them on the ground of the «CC Potentiality» State.

3.0580. Why are more amplificational (for us!) variants of HSI- and HIA-signs more radical against the rest variants, which are close to them in Essence? Because in our types of s-Realities there are exactly they, which facilitate implementation of highly-effective subchakram refocusings by us to more ampliative groups of namely *human*, not any else STC. These signs allow us to avoid intuitively (meaning, applying, in our choices, a bitter Experience of our «personal» Interpretations which is already synthesized from protoformal development Directions) the infinite multitude of time loops and prolonged «slavery» in captivity by egoistic illusions and depliative ambitions.

3.0581. So, we can say that beginning from a certain stage in development of the Self-Consciousness, all sorts of different-Qualitative NUU-VVU-Form-Types become the sources for appearance, in sllloogrent Focus Dynamics, of Every LLUU-VVU-Entity (in the given exhibition diapason) of all the protoformal diversity of realizational creative tendencies activated in a direction of deep and perfect reflection of lots of specific combinations of features in their surrounding reality; among them, there are also the most precious ones for you and me which we interpret as high-sensual Intellect and high-intellectual Altruism to various degree of credibility.

3.0582. In the meantime, in various exhibition conditions, realizational Form-Types of every LLUU-VVU-Entity may vary greatly in different-type dimension diapasons, beginning from the most primitive — «*human*» and «*humanoid*» ones (LLUU-NUU-VVU-Form-Types) — and finishing with the most highly developed — *steriic (iymyillic) ones* whose LLUU-RRAYGRALS-VVU-Form in the *pruuiss*

(7–8 dimension) and LLUU-FULSSMIRG-VVU-Form in the *iymyllis* (8–9 dimension) exuberation diapasons «project» their Focus Dynamics (along with GOOLGAMAA-A's CCI's of Planetary systems formed by them) consciously and purposefully to activities of Collective Cosmic Intelligences of dozens of Stellar Entities (within the given dimension diapasons).

3.0583. To make clearer for you what I never can tell in words, I would advise you to reflect upon the following fact. Each of zillions of people, who structures every Time Flow and represents some common features (for example, appearance and physiology, way of thinking and feeling) in the Focus Dynamics of peculiar to them, types of Collective Consciousnesses of «humanities,» remains an exceptional subterraneity, meaning «personality» which has own character, tastes, inclinations, Interests, views different from the same features of other people. By the way, these thoughts will help you to make your own Conceptions much deeper about Nature and «internal» diversity of all types of birvularity, their qualitative unclosedness (ability to turn into each other, depending on a type of Focus Dynamics), functional openness (universality — due to participation of Form-Creators of all OO-UU), and diffuzgent «inexhaustibility» (different-Protoformness) with respect to parameters of the other birvularity types in every local exuberation regime.

3.0584. To recognize it all, you should strive to understand very deeply that every Form of Self-Consciousness Creative Activity manifestation can never be either «close,» or anyhow *locked-out* system, which is closed by its relations at «itself.» To the contrary, it represents lots of incomplete synthetic interconnections of signs combinations interacting among each other to more or less extent, which are covarllert to each other and simultaneously peculiar to Synthesis Schemes and *sub*-Schemes of an infinite multitude of different-Qualitative protoformal Form-structures (Form-generations, Form-Types) manifested with the help of GOOLGAMAA-A. This universal circumstance is supported by the fact that Form-Creators of *all* the OO-UU-Entities are certainly involved in each of energy-informational interconnections combinations. Owing to that, the implementation of the Diffuzgentness Principle is provided. The Principle consists in possibility of qualitative inter-complementarity and inter-substitution among different types of Energy and Information combinations in Focus Dynamics of all Macrocosmos's CCI's.

3.0585. It is totally impossible either to define objectively, or to understand subjectively, where Spheres of Creativity of some CCI's and their Self-Consciousnesses Forms «end,» and where Spheres of Creativity of other CCI's and their Self-Consciousnesses Forms «begin» in this endless diversity of focal Configurations and interconnections structuring them, which as if «turn» and «reproject» to each other on a variety of signs. For example, while continuously increasing the qualitiveness of Focus of Close Attention of a biologic Form considered by us, we will «come» consistently to its dimidiomittense, transparentive, flaks, translucense, dimidioclarus, vuolds, luminosal, and other versions of more ampliative analogs of simultaneous exuberation of its slloogrent f-Configuration. The same concerns the process of consistent refocusing of our FCA to doolls-loolgs (two- and one-dimensional) development Directions of the wave Forms considered by us subjectively.

3.0586. Each of the infinite multitude of subjectively observed by us, Universes, manifested narrow-specifically and concurrently through different-Qualitative Focus Dynamics of Form-Creators of

Self-Consciousnesses Forms focused by us, represents by Itself just a particular version of the general reflection effect of the whole spectrum of multipolarizational modification of *some* of properties of the Universal Plasmic-Differentiational Radiation (UPDR) in the Perception systems of all our «personal» Interpretations; these properties resonate to varying degrees with the Configurations of «the current» Conceptions peculiar to us. However, each of these versions is not only a consistent outcome of creative realizations of the integral Focus Dynamics of all people, who structure the given diapason of Space-Time, but, additionally, a result of creativity made by all other Proto-Forms of Self-Consciousnesses who appear in the same dimension conditions (besides, it is made by absolutely all Forms, and not only by those who are considered by you as «living beings»).

3.0587. The Universe observed by us is just a very limited (not by itself, but by capabilities of our Perception!) particula of a sllougrent and Universal in its Essence, Sphere of simultaneous exhibition of integral realizational creativity of zillions of Proto-Forms. This Sphere is structured with different-Qualitative Experience of their coexistence in various Time Flows. The physicists are wrong who argue that we *created* by ourselves the laws directing our Universe. No, all the Laws and (Universal Impulse-Potentials) and inherent to them, Principles of Macrocosmos's organization and structure represent the functional prerogative of the UPDR. Laws and Principles were originated together with the Self-Consciousnesses Forms focused by us in one and the same Moment of Eternity. With the qualitiveness of our Focus Dynamics, we can just «choose» *resonationally*, from all this variety of potential opportunities, only those particulas of Macrocosmos where the current Impulse-Potentials are able to Self-manifest *in exactly this way* (from physical laws to chemical composition of Galaxies).

3.0588. It is high time for you to understand that these are not bio-Creators of the brain who organize the Self-Consciousness Focus Dynamics of NUU-VVU-Forms focused by us, but, on the contrary, these are Form-Creators of various Levels of Self-Consciousness who create and provide the terms for local exhibition (meaning, for aspectability, illusion of reality) of our subjective Perception system along with body — biologic organism — in one or another «area» in Macrocosmos. Also, They support visibility of everything else that is typical for our environment. Consistently increasing the activity of SFUURMM-Forms of the more ampliative Self-Consciousness Levels in our Focus Dynamics, we refocus to other particulas (subjective Realities and STC groups) of the sllougrent Creativity Sphere where the new qualitative future opens for us. That future is specified by greater opportunities for appearance of Cosmic Laws and their Principles Which are not stable and unbreakable at our local contact with Them. We can consider only the Self-Consciousness of SSS-Entity to be truly unchanged (and then only just regarding Our Focus Dynamics!) Which is reflected through the sllougrent Focus Dynamics of the Macrocosmos's Highest Intelligence.

3.0589. We and objects around us (Proto-Forms of the GOOLGAMAA-A's Self-Consciousness) are also just the results of «our own» and «their own» Conceptions about «ourselves» and «themselves.» Beyond the limits of the given abilities of our and their Perception systems both we and they possess different exhibition parameters which, in the further perspective of our and their appearance, go out of all currently used by us and them, Conceptions about density of matter and the limits for our opportunities set by us. Only having permanently emerged from our far-fetched illusions, beyond the limits of our obsolete Conceptions, we develop new, more universal, realizational capabilities.

As soon as we correct the Focus Dynamics of our own Self-Consciousness radically, the Universe around us with all Its Forms and Laws is renovated immediately in a more perfect state.

3.0590. Therefore, it is not the Universe, which directs us, as it seems to us, unilaterally and strictly, but it is us who choose — by means of our Focus Dynamics — the qualitiveness of our *interrelationships* with some kinds of Its absolutely stable structures. Indeed, we are implementing such global focal «modifications» and qualitative «perturbations» during our Life on countless occasions during which our «current» Conceptions improve consistently being realized in the structures of our Self-Consciousnesses as various amendments to already discovered Laws and as deepening our knowledges about features and subtleties of the World around us. Owing to this, someday, altogether we will come to the incredible discovery: Visible bodies and objects (as well as «ourselves!») do not represent what we see and perceive at all because they are just a tiny part of the infinite multitude of disparate and different-Qualitative «projections» of the original energy-informational interconnections of Self-Consciousness. At the same moment (!), the latter can be annihilated under the influence of our Focus Dynamics at one «place» of Space-Time to «be materialized» in another one.

3.0591. Different combinations versions of these energy-informational «projections» form all possible Energy-Plasma appearance effects in our Perception systems — in the form of all variety of the surrounding Form-Matter, Form-Plasma, or Plasma-Form which structure both us as well as all the rest Self-Consciousnesses Forms specifically perceived by us. These virtual «projections» always stay beyond capabilities of Perception systems of our mixtum NUU-VVU-analogs, reorganize continuously, and transform qualitatively in the process of our Focus Dynamics (though, psychics and very sensitive devices can detect their presence as specific dynamics of color — so called «aura» — inherent to every object of dense matter) while allowing us permanently — easily, and totally invisibly for «ourselves» — to refocus resonationally from some NUU-VVU-Form-Types to other NUU-VVU-Form-Types, or even to the Form-Types of other Proto-Forms initiated to appearance by one GOOLGAMAA-A-Ingredient.

3.0592. All possible types of interconnections of these energy-informational «projections,» which form all the diversity of «manifestation bodies» of people and many other human and humanoid NUU-VVU-Form-Types of Self-Consciousnesses, are modeled and organized by Collective Cosmic Intelligence of SKKLUAFF-VVU-LLRRU-Entity (Whose FD is structured by FDs of all LLUU-VVU-projections manifested simultaneously in FDs of various Planetary Entities). Its specificities partially perceived, discretely analyzed, and subjectively interpreted by us as *Collective Intelligence of Humanity (LLUU-VVU-LLUU-RRU which includes many other protoformal-diffuzgent sorts of CCI's)*. In this infinite variety of Time Flows structuring 3–6-dimensional megadiapason of the skrruullerrt system exuberation, LLUU-VVU-LLUU-RRU acts via the infinite multitude of different-Qualitative LLUU-VVU-analogs — Collective Cosmic Intelligences of TOO-UU-Entities specialized in the processes of inter-Qualitative Synthesis of strictly defined birvulyarity type (lluuvvumic type).

3.0593. In terms of 3–4-dimensional exuberation regime, on the basis of Focus Dynamics of all Self-Consciousnesses Forms of LLUU-VVU-Entities, the infinite multitude of different-Qualitative

types of Collective Consciousnesses of humanity were formed, within the Focus Dynamics of one of which we live consciously at present. It has its own Cosmic code PROOFF-RRU as well as all the rest types of human Collective Consciousnesses have. Here, one fact catches the eye: the characteristic human VVU-factor is absolutely absent in the given SCC. My only possible explanation for this fact is that the slloogrent Focus Dynamics of the PROOFF-RRU representatives (through the NUU-VVU-Form-Types) is formed mostly by Form-Creators of all possible protoformal CCIs while sustainable combinations of the lluuvmic signs (high-sensual Intellect and high-intellectual Altruism) are actively applied and creatively performed by very few people (no more than by 3% of population).

3.0594. When the Paradigm of the «current» humankind Collective Consciousness is radically changed to a more amplificational Paradigm for the current Synthesis Scheme, our SCC is transformed into PROOFF-RRU-VVU (the lluuvmic Factor is activated there). However, until choices of the vast majority of Earthly people are based on aggression and egoism, dullness and ambitions, mendacity and evils, which are not inherent even to predatory beasts, there is no way to name us as HUMANS in the true Meaning of this word.

3.0595. I remind you that kleks-factor (in this case — the VVU-factor) is one of zillions of types of complex configurational combinations of features, which reflect narrow-specific peculiarities of Form-Creators realization of specific Self-Consciousnesses Forms through whose Focus Dynamics the common to these Self-Consciousnesses Forms, Synthesis Scheme of interconnections is implemented on the basis of many sub-Schemes in Space-Time. These interconnections are peculiar to the lluuvmic birvularity type. In the description of a Form's general characteristics, the VVU-factor follows right after the narrow-specific Sound Code which reflects the qualitative parameters of this Form and is separated by a hyphen from the mentioned Code.

3.0596. For example, from among Self-Consciousnesses Forms diversified in the Focus Dynamics structures of the LLUU-VVU-Entity's CCI, Self-Consciousnesses Forms most interesting and significant to us are combinations of the kleks-factor with the lluuvmic signs of NUU-VVU-Form-Types of those people and humanoids (mixtum ones including facticially synthesized, as well as dimidio-mittense ones), whose Focus Dynamics, in its turn, represents both human (high-sensual Intellect + high-intellectual Altruism, HSI + HIA) and some diffuzgently-ultimate (that is border, transitional to other Proto-Forms) states in various exhiberation conditions. These states are peculiar to various protoformal development Directions of the given two-invaderental Synthesis Scheme. Such NUU-VVU-kinds of the lluuvmic birvularity type, which actively perform different-Qualitative tendencies in their life creativity, include 3–4-dimensional NUU-VVU-Form-Types, such as:

- NUU-LGUU-VVU (*mafits, vergons, glumids*) and NUU-GREYS-VVU (*greystses* — «the lowest» Creators-Curators of 1–3 karmic Channels of AIGLLILLIAA — from 2.5 to 3.0 dimension), also NUU-LAUFR-VVU (*skvaasstses, llyuudds, llimmilsstses*), and NUU-ENN-VVU (*enniristses* — «the lowest» Creators-Curators of 1–3 karmic Channels of ORLAAKTOR — from 2.5 to 3.0 dimension) — implement the Synthesis of PCQs ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence in the Direction of consistent combination with the Dominant ALL-Primordiality–ALL-Initiality;
- NUU-KHAALG-VVU (*ftuvumullrs, krosstmls, vellmgrs*) and NUU-ALLGSS-VVU (*allgsses* — «the lowest» Creators-Curators of 1–3 karmic Channels of AIGLLILLIAA — from 2.5 to 3.0

dimension), also LYYUYU-VVU (*shortses, klokses, glepmins, mahoits*), and NUU-OURFF-VVU (*ourffgolluftses* — «the lowest» Creators-Curators of 1–3 karmic Channels of ORLAAKTOR — from 2.5 to 3.0 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of combination with the Dominant [ALL-Mobility–ALL-Presence](#);

- STSYUGL-VVU (*ebbls, evvloytses, klimms*) and NUU-LLAV-VVU (*llavollovaloffts* — «the lowest» Creators-Curators of 1–3 karmic Channels of AIGLLILLIAA — from 2.5 to 3.0 dimension), also NUU-RR-VVU (*appr, dlokgrs, tirrktzes*), and NUU-UUFF-VVU (*uuffluustses* — «the lowest» Creators-Curators of 1–3 karmic Channels of ORLAAKTOR — from 2.5 to 3.0 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant [ALL-Integrity](#);
- Within the same diapason of exuberance (to 3.5 dimension) through the Focus Dynamics of Form-Creators of NUU-YUURS-VVU (*eykkulavds, ployfftses, kleyymffs*) and TSUU-VVU-Form-Types (*triffittses* — «the lowest» Creators-Curators of 1–3 karmic Channels of AIGLLILLIAA — from 2.5 to 3.0 dimension), also NUU-RDUU-VVU (*mirdms, staffs, skrutts*), and NUU-RRAOU-VVU-Form-Types (*rraoulls* — «the lowest» Creators-Curators of 1–3 karmic Channels of ORLAAKTOR — from 2.5 to 3.0 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant [ALL-Essentiality–ALL-Permeability](#);
- NUU-KHVUO-VVU (*skargovorts, skargonts, slugupses*) and NUU-NGUNM-VVU (*ngunms* — «the medium» Creators-Curators of 4–6 karmic Channels of AIGLLILLIAA — to 3.5 dimension), also NUU-DDRU-VVU, and NUU-AIYF-VVU (*aiyfullugrs* — «the medium» Creators-Curators of 4–6 karmic Channels of ORLAAKTOR — to 3.5 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant [ALL-Abundance–ALL-Fullness](#);
- NUU-YAIKHSS-VVU (*iykhrs, inniinns, ksilgbs*) and NUU-FILL-VVU (*ffillistses* — «the medium» Creators-Curators of 4–6 karmic Channels of ORLAAKTOR — to 3.5 dimension), also NUU-SSM-VVU (*klaakssords, bigvvs, plovvts*), and NUU-BOLLF-VVU (*bollls* — «the medium» Creators-Curators of 4–6 karmic Channels of AIGLLILLIAA — to 3.5 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant [ALL-Knowledge–ALL-Informedness](#);
- PIIYKKH-VVU (*guurluusses, luuyussts, illiirssts*) and NUU-GORRFF-VVU (*skradomulyats or stablozantss* — «the medium» Creators-Curators of 4–6 karmic Channels of AIGLLILLIAA — to 3.5 dimension), also NUU-DDVUU-VVU (*vaduludms, gnoyttts, chellks*), and NUU-IISS-VVU (*iissorfs* — «the medium» Creators-Curators of 4–6 karmic Channels of ORLAAKTOR — to 3.5 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant [ALL-Voidness–ALL-Vacuumness](#);
- PPUURPU-VVU (*priffrs, olds, lyuimms*) and NUU-PAARR-VVU (*paarruurses* — «the highest» Creators-Curators of 7–8 karmic Channels of ORLAAKTOR — to 4.0 dimension), also

NUU-GOORR-VVU (*klungrs, pfitty, prekkrs*), and NUU-LOVRG-VVU (*lovirgydtses* — «the highest» Creators-Curators of 7–8 karmic Channels of AIGLLILLIAA — to 4.0 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the ALL-Unity Dominant (with the following refocusing to the human *dimidiomittense analog* — NUU-LL-VVU-Form-Type and therefore — to the State «CC Potentiality»);

- NUU-TAO-VVU (*aails, armaarks, fruutts*) and NUU-AILGG-VVU (*ailggillufts*es — «the highest» Creators-Curators of 7–8 karmic Channels of ORLAAKTOR — to 4.0 dimension), also MMUU-VVU (*poalldionns, fallgaagorrs, tlaands*), NUU-PRIDLM-VVU (*pridmls, sviills, pridds*), and NUU-LOVRG-VVU (*lovirgydtses* — «the highest» Creators-Curators of 7–8 karmic Channels of AIGLLILLIAA — to 4.0 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant ALL-Aspiration.
- NUU-YAIYG-VVU (*sunny, gallds, sfoffrs*) and NUU-REGO-VVU (*regosporruts* — «the highest» Creators-Curators of 7–8 karmic Channels of AIGLLILLIAA — to 4.0 dimension), also NUU-RROO-VVU (*ddaayfttses, lerrvuymisstses, kaultaffls*), and NUU-AAMM-VVU (*aammorfs* — «the highest» Creators-Curators of 7–8 karmic Channels of ORLAAKTOR — to 4.0 dimension) — implement the Synthesis of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs in the Direction of consistent combination with the Dominant ALL-Steadiness–ALL-Stability.

3.0597. Also, an infinite multitude of other Form-Types of NUU-VVU-Form's Self-Consciousnesses are engaged into this process who diffuzgently-protoformally structure the Form-Creators' Focus Dynamics of the NUU-VVU-Form's different-Qualitative analogs. However, except the above mentioned Self-Consciousnesses Forms, I could not determine such NUU-VVU-Form-Types whose Focus Dynamics would facilitate humans' refocusing to the State of «CC Potentiality» to the same extent as the refocusing of the NUU-PPUURPU-VVU Creators-Curators' FD (ones mostly *high-feelingly* aspired to ALL-Unity) and NUU-GOORR-VVU (ones mostly *high-intellectually* predisposed to ALL-Unity). They enable purposefully the humans, who resonate with Them, to refocusing to the mixtum analogs harmonized in the given — real human — Direction of the NUU-LL-VVU-Form-Types (NUU-LUL-VVU, NUU-LOL-VVU, NUU-LIL-VVU, NUU-LEL-VVU, NUU-LAL-VVU, NUU-LUL-VVU, NUU-LTL-VVU, NUU-LML-VVU, NUU-LPL-VVU, NUU-LKHL-VVU, NUU-LFL-VVU, NUU-LDL-VVU, NUU-LSL-VVU, and so on).

3.0598. It should be noted that, though the Form-Creators' Focus Dynamics of the above mentioned analogs covers only 3 per cent in the slloogrent Focus Dynamics of all diversity of different-Qualitative combinations of the NUU-VVU-Forms' Form-Creators, but these are exactly They Who form the whole energy-informational basis for the Synthesis of following, more and rather more amplificational signs combinations of the lluuvvumic birvulyarity type. While Form-Creators' Focus Dynamics of Form-Types of all remaining diffuzgent development Directions provide all infinite diversity of different-Qualitative interconnections the lluuvvumic Form-Creators need for implementation of the two-invaderental Synthesis towards the State of «CC Potentiality» (it is comparable to an example of gold mining in amount of just 2–3 g from one ton of copper, zinc, silver, or lead ore).

3.0599. The remaining types of Focus Dynamics, in which there is not a tendency for active Synthesis of the two lluvvumic Dominants signs (HSI and HIA) with the characteristics of ALL-Unity PCQ, facilitate consistent humans' refocusings from NUU-VVU-Forms to the Self-Consciousnesses Forms who sustain the Synthesis Schemes of other birvulyarity types with the qualitiveness of Focus Dynamics peculiar to them (in the same manner — with assistance of a huge number of different-type Forms!).

3.0600. Form-Creators' Focus Dynamics of every those Form-Types represent the narrow-specific combinations of different-Qualitative features which reflect, in definite terms of Space-Time, only the specific subjective Conceptions peculiar to their cosmic civilization (whose relationships with other kinds of NUU-VVU-Form-Types in no way depend on either distances, or their «involvement» in any historical epochs, or groups of STCs, or Star-Planetary systems; these relationships depend only on the degree of qualitative resonation among the UU-VVU-conglomerates structuring these civilizations). The higher the covarllertness is of the currently focused by you, particula of slloogrent NUU-VVU-Configuration with one or another kind of Form-Creators of the Form-Type which potentially structures these particula, the more the SFUURMM-Forms of your Focus Dynamics will demonstrate exactly the combinations of different-Qualitative signs which are inherent to subjective Conceptions of Form-Creators of any above mentioned civilization.

3.0601. It is not only about alien cosmic civilizations, which, in one way or another, influence remotely (telepathically), by inherent to them SFUURMM-Forms, on the development of the whole diversity of different-Qualitative versions of Collective Intelligence of Humankind in each of dimension diapasons where simultaneously — in different historical eras, periods, and development scenarios — all physiological Form-Types of the NUU-VVU-Form are appearing. Perhaps, it would have been much easier for you to understand if I said that a countless multitude of all possible, *having very similar content*, psychic (sensual and emotional, egoistic and altruistic) realizations are common to modern people, as well as to representatives of almost all people from the «antediluvian» and ancient world.

3.0602. As all our Conceptions about «ourselves» are implemented in our Focus Dynamics *by conglomerates* (that is by «sets» of duvuyllerrt-covarllert SFUURMM-Forms), and while they do not depend on the Time Factor at all (because their Configurations structure not Form-systems, but ODS), so it is of no importance for similar UU-VVU-conglomerates which Time Flows (historical epochs, development scenarios) the Self-Consciousnesses Forms belong to, through whose Focus Dynamics the UU-VVU-conglomerates manifest concurrently. For their exhibition, only the presence of a resonational factor among them and corresponding NUU-VVU-Configurations is needed.

3.0603. There is a short list of Form-Types of world's nations whose UU-VVU-conglomerates are still able to influence actively on the choices and preferences of modern people: *Sumerians, Etruscans, Tavrini, Kaska, Kassites, Taurini, Tjeker, Yuezhi, Huns, Camunni, Contestani, Xiongnu, Hurrians, Goths, Celts, Aryans, Scythians, Leleges, Edetani, Lycians, Sarmatians, Antes, Turdetani, Maya, Amorites, Vandals, Aramaeans, Celtiberians, Cimmerians, Bastetani, Barbarians, Khazars, Thracians, Laietana, Assyrians, Vyatichi, Krivichi, Radmichi, Alans, Colchis, Ugric peoples, Kipchaks, Russ, Cessetani, Syanbi, Tabgaches, Latina, Lusitanians, Zsuzsanna, Ilergets, Cumans, Göktürks, Merjalaiset, Vepsians,*

Chud, Sordones, Ceretani, Aquitani, Vasconi, Oestriminis, Cynetes, Ausetani, Ilercavones, Indigetes, Castellane, Latsetani, Oretani, Elisyces, Iacetani, Tartessians, Turduli, Muroma, Burtas, Cheremis, Pechenegs, Normans, Ausones, Babylonians, Hyksos, Ligurians, Sicani, Balares, Dingling, Pelasgians, Raeti, Roxolani, Sabines, Saka, Sicels, Tibaranoi, Urartu, Falisci, Hittites, Yezidis, Iberians, Issedones, Caucones, Lucani, Lullubians, Massagets, Meotians, Minoans, Nairi, Oski, and many-many more.

3.0604. If you live in a megalopolis, study various sciences, read books and press regularly, and break away from TV and computer rarely, it does not mean that there is nothing in common between your psychic responses and Conceptions and the same of any Etruscan, Scythian, or Sumerian about possible methods of solving various situations because you are «divided» by whole historical epochs. Interaction between your and their Focus Dynamics happens unconsciously-resonationally for some, common for you and them, features which are initiated simultaneously in lots of Time Flows by «chakram personalities» of the IISSIID- Centers (more often of the first pair of Centers). The bigger amount of similar features causes resonance, the more active and obtrusive the interrelation is between their manners of thinking and feeling and yours. Many of the mentally ill, who are treated for schizophrenia and various phobias, are the victims of stable and active to some degree, conglomerate interactions between Focus Dynamics of these and other «personalities» who are living concurrently in other STC's groups.

3.0605. At the same time you should understand that not only «they» influence on you potentially, but «you» are also predisposed to the same extent to possible creative appearance. You «cut into» the Focus Dynamics of other nations' and civilizations' representatives with your own SFUURMM-Forms, and step-by-step, more sustainably, you identify yourselves qualitatively with the particula of slloogrent NUU-VVU- Configuration which is inherent in some particular group of Form-Types. Since in different-Qualitative regimes of exuberation, your subterraneous Conceptions can concurrently reflect many diverse informational spectra of the TEC-Flow unpacked by you, your Focus Dynamics also appears to be deeply suggestive for choices made not only by all NUU-VVU-Self-Consciousnesses Forms, but for the Form-Creators Who structure diffuzgent (as related to NUU-VVU) Proto-Forms. Exactly in this way the Mechanism of simultaneous Multipolarization of your «personal» Focus Dynamics is performed actually along the countless amount of different-Protoformal development Directions.

3.0606. As soon as the state of stable resonance comes in your Focus Dynamics by definite type of *sfuurmmformal interconnections* peculiar to any Form-Type of any Proto-Form (meaning, there is an activity levelling of Form-Creators of any one Dominant from the lluuuvvumic pair — ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence — with the activity of Form-Creators of any of remaining ten OO-UU), the so called «compensation splash» (activation) of the inter-Qualitative Synthesis in the given protoformal development Direction occurs immediately in some of resopasons of the current exuberation of your Self-Consciousness's Focus Dynamics. It is followed by the «reprojection» of Form-Creators' Focus Dynamics from the given NUU-VVU-Form-Type's mixtum analog, for example, to the mixtum LLARTTUURFF-Form-Type. The latter represents some mammal species (it happens in easier way if reprojecting to more explored and beloved kinds of domestic animals, but «switching» of Focus Dynamics to another animal species — fish, birds, amphibians, reptiles, insects — is theoretically possible, too; although, it requires very long and, mainly, conscious «getting» into the behavior specificity of some definite kind and so strong self-identification with

the animal that, as a result, its inherent SFUURMM-Forms could structure the Focus Dynamics of a human «person» reliably and lead him or her to the opportunity of the real implementation of «the compensation splash»).

3.0607. At the same time, I emphasize that there are absolutely no changes in the structure of «personal» Interpretations of your Stereo-Form — all similar inter-protoformal transformations are implemented not at the level of «personal» Self-Consciousness's Focus Dynamics, but by means of unconscious resonational correction of the «current» *interconnections* typical to a certain Synthesis Scheme. There is the replacement with the *subjective Perception system* Form-Creators' interconnections which are determined by peculiarities of another Synthesis Scheme. Since such correction affects an infinite multitude of different-Qualitative signs, which duvuyllerrtly-covarllertly transform into each other (that's why it is impossible to enumerate them — the corresponding notions are absent in our current Conceptions, yet; for example, ... ➔ conditioned reflex ➔ unconditioned reflex ➔ reasonableness ➔ mind ➔ awareness ➔ intelligence ➔ genius ➔ clairvoyance ➔ Intuition ➔ ...), so, after the correction, the manifestation of human SFUURMM-Forms is impossible in the Focus Dynamics of a protoformal Form-Type.

3.0608. An individual type of Information kleksing is inherent to Form-Creators (including bio-Creators) of every Proto-Form. On the basis of the type, the Form-Creators make very specific SFUURMM-Forms inherent only in the given Self-Consciousness Form. At the biological Perception levels, the kleksing process depends to a greater extent on features of neuron impulses coming to the brain coordination centers from bio-Creators of diverse brain parts which are responsible for hearing, sight, smell, tactile and muscle sensations, and so on. On the basis of those impulses (their parameters are different for every Proto-Form!), different-functional bio-Creators of every Perception system construct Their Own Conceptions about «Themselves» and the reality that surrounds a Self-Consciousness Form aggregated by Them.

3.0609. For example, diapasons of determination of sound and color waves vary for different animal species. Smell and vestibular centers of the brain function in different ways and are directly involved into SFUURMM-Forms' generation. Therefore, having refocused to the Focus Dynamics of another (inhuman) CCI, none of the former «personal» Interpretations of a human could be ever (he or she is simply incapable of doing this!) aware of such inter-protoformal transformation, meaning, be present in state of «self»-experiencing like «a former human personality turned to the body of an animal.» Every Proto-Form has its own type of structuring Self-Consciousness's Focus Dynamics (peculiarities of TEC-«unpackings» allow to use only SFUURMM-Forms which were specifically kleksed in the Creativity Sphere of its own ODS). That type facilitates realization of exceptionally its subjective Conceptions about «itself» and the World around it.

3.0610. Owing to the fact that some of above mentioned Form-Types' SFUURMM-Forms actively initiate different-Qualitative Levels of people's Focus Dynamics of all possible races and nations (of diverse earthly and alien civilizations that structure various Time Flows), there is not possible anyhow to classify and specify, by Sound Codes, these characteristic manifestations in various human Self-Consciousnesses Forms. So, I have to summarize all the diversity of human Self-Consciousnesses Forms to a single — common for all people! — Sound Code, namely NUU-VVU. I remind you that

SFUURMM-Forms of Creativity Spheres, which structure human subjective ODS parts, duvuyllerrtly-diffuzgently and multipolarizationally-spheroidally transform to Creativity Spheres of various Proto-Forms. However that does not strictly reflect the true state of extremely different-qualitative and polytypic by its manifestations, slloogrent Focus Dynamics of all the multitude of the humankind Collective Consciousnesses.

3.0611. Besides, this fact makes it very difficult for me to explain logically and to perform renitive analysis of cause-effect interconnections which exist in common human and interpersonal relations. In some cases they appear like complete understanding and mutual agreement between interfacing parties, and in other cases they are implemented just through extreme hostility and absolute impossibility of parties to reach agreement or consensus. To my deep regret, it does not seem real to me to describe only by myself all the diversity of NUU-VVU-Form-Types which structure an infinite multitude of CCI's of various Stellar-Planetary systems. Therefore, we will settle for that Self-Consciousnesses Forms of absolutely all physical people (who have characteristics recognizable by all of you) will be determined by us as NUU-VVU-Forms (or of NUU-VVU-Form-Types' mixtum analogs) whatever Time Flows they simultaneously appear in and howsoever they act qualitatively.

3.0612. Among above mentioned mixtum analogs of NUU-VVU-Form-Types, there is a countless number of different-type *factical* NUU-VVU-Form-Types (that are deliberately synthesized by lots of signs ampliative for the given Scheme). With all their similarity to people, they have significant (either explicitly expressed, or hidden) differences which allow them to implement their realizational creativity in the conditions where other people cannot exist (for example, in rivers and lakes, in depths of seas and oceans, in hot deserts and permafrost, highlands, areas of polluted air or higher radiation, as well as in all possible specific conditions of extraterrestrial existence during discovering other Planets and Stellar systems). As the human development level increases, the process of their refocusing turns gradually to the amplificational STCs' groups where properties of Form-Matter (from 0.0 to 4.0 dimension) are duvuyllerrtly changed to properties of Plasma-Matter (from 4.0 to 6.0 dimension). That makes additional opportunities and development perspectives for Focus Dynamics of corresponding NUU-VVU-Self-Consciousnesses Forms.

3.0613. In «the boundary» human STCs' exhibition groups (from 3.75 to 4.25 dimension) between Form-Matter and Plasma-Matter, dimidiomittense analogs of NUU-VVU-Form-Types organize themselves naturally. All the multitude of translucense and dimidioclarus (4–5-dimensional), as well as luminosal (5–6-dimensional) analogs of NUU-VVU-Form-Types are formed through amplificational slloogrent Focus Dynamics of NUU-VVU-Form-Types' Form-Creators within the lluuvvumic birvulyarity type. For example, during a Meditation I managed to select such different-Qualitative *flaks* analogs of NUU-VVU-Form-Types Each of Whom is also structured by the infinite multitude of Its own versions of transparentive and translucense Form-Types «inside» the interconnections inherent to It:

- NUU-LTTVULL-VVU-RS are synthesized by the Scheme: «CC Potentiality» + ALL-Unity; in Its essence, it is the amplificational FLAKS-Form to which f-Configuration everyone refocus who steadily synthesize high-nutational intellectual-altruistic characteristics with the characteristics of ALL-Unity PCQ in the FD of their own Self-Consciousness;

- NUU-SVVAFFT-VVU-KS are synthesized by the Scheme: «CC Potentiality» + ALL-Knowledge–ALL-Informedness; this Direction of Synthesis is supported by NUU-FLIRRF-VVU (*ulloroffs, lyabburiytsets, dladds*) and NUU-DZEYDZ-VVU (*dzeydzttsets*) — Form-Creators of the 9th karmic Channel of AIGLLILLIAA — to 4.5 dimension, as well as by NUU-ASSORF-VVU (*mnuungrasses, ylevurrts, iysfsls*) and NUU-TRUU-VVU (*truustsets*) — Form-Creators of the 9th karmic Channel of ORLAAKTOR — to 4.5 dimension;
- NUU-FFSARRD-VVU-KHS are synthesized by the Scheme: «CC Potentiality» + ALL-Mobility–ALL-Presence; this Synthesis Direction is supported by NUU-DOUVT-VVU (*trruolldrs, llaondiruses, klautffrons*) and NUU-OLDR-VVU (*trruuksses, olldrins*) — Form-Creators of the 9th karmic Channel of ORLAAKTOR — to 4.5 dimension, as well as by NUU-SS-KKAF-VVU (*stuanngs, flauakstuins, gmmellingtarrs*) and NUU-TT-AAYI-VVU (*krringrs*) — Form-Creators of the 9th karmic Channel of AIGLLILLIAA — to 4.5 dimension;
- NUU-GRUNNSS-VVU-LS are synthesized by the Scheme: «CC Potentiality» + ALL-Aspiration;
- NUU-YUYSSFF-VVU-DS are synthesized by the Scheme: «CC Potentiality» + ALL-Integrity;
- NUU-RLOKKSS-VVU-MS are synthesized by the Scheme: «CC Potentiality» + ALL-Essentiality–ALL-Permeability;
- NUU-MGLOYGG-VVU-TS are synthesized by the Scheme: «CC Potentiality» + ALL-Primordiality–ALL-Initiality;
- NUU-VRIFMM-VVU-VS are synthesized by the Scheme: «CC Potentiality» + ALL-Abundance–ALL-Fullness;
- NUU-DDREYKK-VVU-GS are synthesized by the Scheme: «CC Potentiality» + ALL-Voidness–ALL-Vacuumness;
- NUU-GVOSSMM-VVU-NS are synthesized by the Scheme: «CC Potentiality» + ALL-Steadiness–ALL-Stability.

3.0614. Even more diversity is in presence of all possible combinations of different-Qualitative features is presented by *vuolds* analogs of NUU-VVU-Form-Types Whose Form-Creators «reproject» to *not* lluvvumic types of birvularity having completely synthesized certain types of «Creative Cosmic States» in their Focus Dynamics. Unfortunately, all my attempts to identify somehow the Sound Cosmic Codes of these Form-Types failed yet. The exception is identifying the Codes of Those Form-Types Who could synthesize invaderentally Aspects of ALL-Integrity PCQ in their Focus Dynamics and turn to the State «CC Cooperation» after they had reached the State of «CC Solidarity» («CC Potentiality» + ALL-Unity).

3.0615. These vuolds superior NUU-VVU-analogs have the code — ULKRATTUYFF-VVU-LFF (qualitative combinations corresponding to the set of letters «NUU» were synthesized to some other combinations, but the VVU-Factor has still been playing a significant role in the Synthesis processes of the signs of various diffuzgent Self-Consciousnesses Forms on the four-invaderental lluvvumic

Scheme: ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Unity + ALL-Integrity = the «CC Cooperation» State).

3.0616. Thus, the presence of «-VVU» set of letters in the Sound Cosmic code of NUU-VVU-Forms and their Form-Types shows activity of their Form-Creators in terms of specific kleksing of Focus Dynamics of Self-Consciousnesses Forms from 2–8-invaderental Synthesis Schemes formed in all possible diffuzgent (protoformal) development Directions of the lluuvvumic birvulyarity type within the diapason from 3.0 to 9.0 dimension. However, SFUURMM-Forms from many different-protoformal ODSs are still being used at depliative Focus Dynamics Levels of those Form-Types' categories of NUU-VVU-Forms' Self-Consciousnesses where now we are focused temporarily (not to mention rather «earlier» representatives of the humankind's CCI, such as Cro-Magnon, Neanderthals, Pithecanthropus, or even humans who exist as if «few thousand years ago» in relation to us). Such SFUURMM-Forms are structured with the energy-informational interconnections which we attribute to the diapasons until the 3.0 dimension in accordance with specific qualitative features (depliativeness or ampliativesness) characteristic for the Focus Dynamics of human types of subjective Realities.

3.0617. But that does not mean at all that another (not lluuvvumic) different-protoformal Focus Dynamics is structured only with SFUURMM-Forms of this depliative diapason of NUU-VVU-exhiberation (1.5–2.0–2.5–3.0 dimensions). Different-protoformal Directions are inherent in every appearance diapason of CCIs of the lluuvvumic birvulyarity type. Here I have highlighted especially the SFUURMM-Forms of exactly these not nutational and weakly vibrational Levels only for you to compare easier aggression and egoism typical for them with intellectual-altruistic human signs. However, it is much more difficult for you to distinguish *other protoformal* creativity signs from the typical lluuvvumic signs in manifestation conditions of Form-Creators' Focus Dynamics from the higher Levels of 3–4-dimensional exhiberation diapason of our NUU-VVU-Form-Types. The difficulties are caused by the fact that they already structure human SFUURMM-Forms about *Immunitant Responsibility* and *Humanitarian Freedom* rather covarllertly (which have been originated in a Self-Consciousness as the logical outcome of realization process of sustainable series of exclusively only intellectual-altruistic choices through the «person's» FD for a conditionally long period of his/her existence).

3.0618. Someone of you can ask, «How can Form-Creators of 1.0–1.5–2.0–2.5-dimensional Levels of Self-Consciousness take part in the Focus Dynamics of Self-Consciousnesses Forms which structure 2.5–3.5-dimensional and even 3.75–4.0-dimensional Levels?» That is related to subtterransive peculiarities of different-Qualitative combinations of protoformal signs essentially different from those which we use to structure the dimension type of our human subjective Realities. I remind you that s-Realities structured with inhuman combinations initiate quite different types of Self-Consciousnesses Forms and relatively other dimension parameters to exhiberation in Space-Time. Depending on their covarllertness or imperseptness in relation to specific combinations formed in our Synthesis Scheme, those Self-Consciousnesses Forms may actively resonate with lower or higher dimension parameters inherent to our s-Reality.

3.0619. That means that, having different dimension parameters as compared to ours, Form-Creators of even 1.0–1.5-dimensional Levels may get involved resonationally into the Focus Dynamics of Form-Creators of 2.5 or even 3.5–4.0-dimensional Self-Consciousness Levels peculiar to life creativity of the most developed modern people. When we characterize any «person» as the one having primitive thinking or being underdeveloped that means the only thing: His or her Focus Dynamics is creatively initiated to a very small extent by specific Conceptions deeply synthesized on the signs of the two Dominants of the Iluuvvumic Synthesis Scheme if he or she has the excess of already synthesized Experience (SFUURMM-Forms) from the «previous» *different-Protoformal* focusing (conscious Existence in various Proto-Forms).

3.0620. So, such «person» is still educated very weakly in human SFUURMM-Forms of surrounding reality. That happens because the Focus Dynamics of Form-Creators of his/her Self-Consciousness is not adapted and does not suit to the specific rules of relationships and requirements, knowledges and laws which were formed in the given human community. It can be said that the state of Focus Dynamics of Self-Consciousness Form-Creators of the NUU-VVU-Form-Type's mixtum analogs (that state is defined by us subjectively as «primitiveness») is rather the predominance of protoformal-instinctive reactions over consciously motivated behavior which has been traditional in the current humanity. You should figure out this fact very well.

3.0621. Through the Form-Types' Focus Dynamics of NUU-VVU-Forms' mixtum analogs from 2.5–3.5-dimensional diapason, the Form-Creators of diffuzgent Proto-Forms (in relation to the Iluuvvumic birvularity type) can express Themselves most actively. From those mixtum Form-Types, we can select the IRKKULLIGR-VVU-Form-Type of humans which is structured by the Form-Creators' Focus Dynamics of the 10th karmic Channel of ARGLLAAMUNI- and INGLIMILISSA-Iissidi — *immls* and *rrorroks* (astral LLAVOLL-DRUU-Creators and mental UUFFLUU-Creators, civilizations including SKARRLD, ANGSS, MAYYT, MURD, KREKKS, TVIRL, MOLLMIT, and others). The life creativity Qualitativeness of these Form-Types of human representatives, mostly primitive on the psycho-mental development, is based on the jointly synthesized Experience of such Form-Creators as: *iffillins* and *bayks*, *isskullins* and *sfillks*, *innagullins* and *krokks*.

3.0622. It is necessary to notice that Form-Creators' Creative Activity of the given mixtum versions of NUU-VVU-Form's Self-Consciousness manifestation, due to a heavy intra-Qualitative unelaborations of the PCQs synthesized by them, is still caused by powerful interactions on intra-Aspect and inter-Aspect interconnections with Form-Creators of even more depliative UFFLUMMURG-VVU- and IFDOVVORG-VVU-Form-Types (1.5–2.0–2.5 dimension). Their Focus Dynamics is resonationally structured with SFUURMM-Forms of «chakram personalities» of the 7–9 karmic Channels of both lowest IISSIDI-Centers: *ovvilins* and *hoorrs*, *ollumins* and *ravarrs*, *offaldins* and *dossurrs*, *kmelliins* and *rrins*, *klammainins* and *bullns*, *ksulluins* and *harns* (belong to civilizations including GRORRRDs, OOSSES, PRUBIDs, GLAVVRs, LIFFRs, ATTAIRs, ONKs, SFOLLIMs, BBAAAs, STUUYSes, KHKHONGs, SPLINGLLIYIs, GROONNGLs, IYGGVIYIs, IINSTIEYLLs, SLIIPsEs, TOORLINGTONTSes, AIAMMs, OOINGLIYIs, and others).

3.0623. For example, the stable combination of active SFUURMM-Forms of *bayks* in the Focus Dynamics of a «person» stimulates, in the its Self-Consciousness, a propensity for destruction, anger,

cruelty, aggression, irritability, touchiness, envy, vengeance; SFUURMM-Forms of *iffillins* stimulate arrogance, lewdness, pride, conceit, peacockery, and ostentation, develop passion for luxury, money, and richness in general; SFUURMM-Forms of *sfillks* stimulate greed, avarice, cupidity, mercenariness, miserliness, addiction to eating (gluttony, gulosits), and stubbornness; SFUURMM-Forms of *isskullins* stimulate laziness, naivety, credulity, lack of initiative, flakiness, and irresponsibility; SFUURMM-Forms of *innnullins* stimulate cowardice, pusillanimity (resulting from chronic ignorance), mendacity, hypocrisy, and conviction; SFUURMM-Forms of *krokks* stimulate jealousy, violence, reckless impulsiveness, and recklessness. Owing to the exuberant conditions and current circumstances, Form-Creators of these civilizations can actively establish temporary resonational interconnections with each other. As a result, in human Focus Dynamics, a lot of different-Qualitative depliative states are initiated which define their choices, views, habits, tastes, skills, abilities, and priorities.

3.0624. On the base of characteristic features of joint creativity of Form-Creators of various kinds of protoformal combinations, the «whole picture» of international, domestic, inter-ethnic, political, social, religious, interfaith, relationships, including «interpersonal» ones, appear in the cases when such relationships are based exclusively on primitive, instinctive, and selfish Conceptions in different-type versions of Collective Consciousnesses of biologic humanity that structure various STCs' groups. Besides, the human division is shown very much in four basic races (*Australoid*, *Negroid*, *Caucasian*, and *Mongoloid*), as well as in lots of sub-races, nations, and peoples due to the specificity of resonational combinations of these Form-Creators in the Focus Dynamics. This division concerns not only psycho-mental, cultural, and social, but also biological (on the level of the DNA construction) aspects in the given diapason of life creativity manifestation.

3.0625. Mental and astral Form-Creators of the three above mentioned, NUU-VVU-Form-Types may be named as human ones only in appearance, but They represent different-protoformal features in nature of Their Focus Dynamics. In close collaboration with the causal Form-Creators resonationally corresponding to Them, They actively structure the Focus Dynamics of Self-Consciousnesses of the *most primitive* (conditionally depliative, latal) «human» SVUULL-LUUD-VVU-Forms — the *least developed* representatives of the class of *humans* who belong to various races, sub-races, nations, and peoples (by the way, including the *undeveloped* humans who live in the given dimension diapason on other Planets).

3.0626. By the principles of creative realizations peculiar to them, the «personalities» of these «yet not humans,» in their Essence, are inclined to focus more stably either in SVUULL-VVU-Form-Types (who provide instinctive-intuitive, depliative-emotional realizations to the most extent), or in LUUD-VVU-Form-Types of NUU-VVU (instinctive-mental, depliative-intellectual to the most extent). During the process of the Synthesis Scheme execution common for all people (ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence), these objective differences in the very character of their realizational potential are the basis for origination of fundamentally different types of relation to life creativity — male (left-brained, logical) and female (right-brained, intuitive) — in the Focus Dynamics of all the humankind's representatives. Owing to this fact, in the Amplification process, it became possible to form much more ampliative human Focus Dynamics along with the intermediate life creativity — intellectual-intuitive one.

3.0627. The IRKKULLIGR-VVU-Form-Type represents the elementary transitional phase of people's development from the primitive state of semi-humans-semi-animals (SVUULL-VVU- and LUUD-VVU-Form-Types) who look like people physiologically and externally very much. By their psycho-mental egoistic creativity in the human community, they show only all the vilest and the most disgusting — an explosive mixture of the most depliative different-protoformal tendencies for surviving and satisfying all possible self-centered needs. IRKKULLIGR-VVU is not a separate Form-Type, but various versions of combinations of depliative Form-Creators' Focus Dynamics, based on SFUURMM-Forms of the 1–9th karmic Channels, with more ampliative SFUURMM-Forms of Info-Creators of the 10th karmic Channel of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi.

3.0628. Focal Configurations of these NUU-VVU-Form-Types' mixtum analogs are simply unable to provide realization of various combinations of exactly *real human* signs (high-sensual Intellect and high-intellectual Altruism) due to their organization principle. They represent a difficult diffuzgent mechanism of preparatory-adaptive life creativity of Form-Creators (adaptation to specific peculiarities of Synthesis in the lluuvvumic Scheme) from lots of different-protoformal Synthesis Schemes; these Form-Creators energy-informationally provide formation of diverse protoformal development Directions in the Self-Consciousnesses structures in specific terms of human Focus Dynamics Multipolarization.

3.0629. One can say that these «yet *not* humans» focus sustainably in SVUULL-VVU- and LUUD-VVU- versions of the NUU-VVU-Form and appear before society in the guise inherent to all people while they are still able to bring, to the Focus Dynamics of diverse types of humankind's Collective Consciousnesses, only all sorts of diffuzgent Experience having been synthesized during the process of their «previous» protoformal Existence. Although, due to a high imperceptness of these interconnections concerning characteristics combinations of the lluuvvumic Synthesis Scheme, they increase significantly the tensoriness of SFUURMM-Forms made by people. However, they are extremely required for the svilgs-spherational implementation of deeply-synthesized qualitative transformations in the slloogrent Focus Dynamics of all NUU-VVU-Forms. Along with their own depliative realizations, these «yet not humans» look out instinctively and try unconsciously on the peculiarities which lead the Focus Dynamics of all human Self-Consciousnesses Forms to active participation in execution of the lluuvvumic Synthesis Scheme.

3.0630. Exactly those among them, who perform heavy devastating and destructive tendencies in own Focus Dynamics, provide these tendencies from Proto-Forms' representatives of carnivorous predators. The given Form-Creators are «reprojected» from those Proto-Forms to Their «current» human Form-Types, and now They are the main initiators of all possible military conflicts, bloody strife, wars, longtime aggression, irreconcilable confrontations, assassinations, massacres, quarrels, grievances, and other negative relationships equating such human society with a pack of bloodthirsty beasts. As is customary in the animal world, in the new (for their still animalistic Perception) human society, their victims usually appear to be «former» representatives of herbivores Proto-Forms whose Synthesis Schemes cardinally differ by forming characteristics' combinations from the Synthesis Schemes implemented by their eternal oppressors and persecutors.

3.0631. By organizational structure of their Focus Dynamics they can be kind and friendly peace-loving and meek, trusting and altruistic, what makes them totally unprotected and vulnerable to unstoppable pressure of «former beasts,» who were functionally adapted to the ugliest and warped means of «human» existence, which they modeled, imposed, and established in human society by themselves. Such their «predatory» and «animalistic» realizations are significantly facilitated by the fact that they are no different from other people.

3.0632. All the activity spectrum of Focus Dynamics of such «yet not humans» is arranged basically by very simple and unambiguous SFUURMM-Forms structuring weakly-nutational SVUULL-VVU- and LUUD-VVU- conglomerates which initiate only self-centered tendencies and instinctive abilities for self-survival inherent in various Proto-Forms. If there is obvious quantitative and power (money, authority, resources) predominance of those «inhumans» over more developed people in the Paradigm of the human community's Collective Consciousness, so, based on such primitive Conceptions, there appear morality and ethics of the human community in general, characteristic features of its legislative framework what affects to a large extent the other sides of social life: socium, economics, culture, politics, science, religion, and so forth. It is out of question that perfection and harmony would appear in relationships in communities where the main directions of life creativity and life support as a whole are governed by representatives of SVUULL-VVU- and LUUD-VVU-Form-Types of NUU-VVU.

3.0633. Focus Dynamics of the most active Form-Creators of Self-Consciousnesses of mixtum analogs of NUU-VVU-Forms being exhibited in conditions of 3.0–4.0-dimensional diapason form the following main human Form-Types:

- USSTUKKUL-VVU-Form-Type which is structured with the Form-Creators' Focus Dynamics of the synthetic 11th karmic Channel of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi — *glemms* and *dluolls* (astral SKRAD-DRUU-Creators and mental IISSORF-Creators, civilizations including INNGTS, OOLLDRV, OOOYGTS, DRAYYYA, Y-Y, BUURM, SHLORRSS, PLOFF, STURKD, MERGD, and others); the life creativity qualitiveness of these Form-Types of undeveloped people is based on jointly synthesized Experience of these Form-Creators: *glluusmins* and *maholls*, *gllaallins* and *fulls*, *gleeffins* and *hills*;
- AKHSUVVROLL-VVU-Form-Type which is structured with the Form-Creators' Focus Dynamics of the 12th karmic Channel of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi — *mirroms* and *iissmms* (mental AAMMORF-Creators and astral REGOSPOR-DRUU-Creators, civilizations including VOTT, YAGSS, PLIFR, TRUTT, YURIOT, GVIDELLIND, TERRA, ORR, and others); the life creativity qualitiveness of these Form-Types of undeveloped people is based on jointly synthesized Experience of these Form-Creators: *mirms* and *iimmlins*, *lerms* and *iinnglins*, *ssimms* and *iillvins*.

3.0634. Owing to specific properties of «our» NUU-VVU-Forms, Form-Creators of all the multitude of the above mentioned cosmic civilizations have an opportunity to perform «themselves» creatively and to cognize Themselves subjectively through such, inherent to people, characteristics, as:

- Countless degrees and manifestation forms of self-centeredness that makes up, in the Focus Dynamics of each human «personality,» a powerful Illusion of disunity and separation from «Everything Existing» and as if envelops the Self-Consciousness in a heavy curtain of ignorance of the true Essence and Meaning of human Existence;
- In-depth disclosure and Synthesis (self-knowledge) of all SFUURMM-Forms from Levels of the lowest mentality (intellect) and vitality (instinctivity) which are characterized by very limited opportunities of perception of specific values peculiar to all multitude of varieties of imperfect human s-Realities (similar to «ours current» s-Reality). Also, these SFUURMM-Forms consist in too much powerful centrifugal dynamics of selfish thinking and formal logics, which is carried to the point of absurdity.
- Extreme degrees of primitive emotionality and sensuality manifestation which are initiated in the Focus Dynamics by SFUURMM-Forms of primitive altruism as well as selfish necessities and passions which are hard to overcome, heavy ambitions, affectative aspirations, and so on.

3.0635. Besides, our biological organism is a huge foothold for self-development of Form-Creators of other cosmic civilizations playing the role of the Creators of mixtum, dimidiomittense, and translucense analogs of NUU-VVU-Form-Types. Self-development is provided by a process of in-depth study of specificities and features of multilevel functionality of our organism which might be compared to a collective «remote control» used by them for parallel Experience accumulation in implementation of depliative SFUURMM-Forms of all Pure Cosmic Qualities. This kind of activity is inherent in the following NUU-VVU-Form-Types' analogs:

- UYKKUYYUKSTR-VVU-Form-Types of humans; in relation to the synthetic activity of Form-Creators of the two lowest Centers of all, above mentioned Form-Types, they functionally manifest themselves within the diapason to 3.0 dimension as «the lowest» Creators-Curators (they realize themselves collectively in the people's Focus Dynamics through the 1–3rd karmic Channels of the first synthetic Level of ORLAAKTOR- and AIGLLILLIAA-Iissiidi; they are attributed to *kroydls and aossoons* classes); they are *emffliissts*es (mental SKVAASS-MAA-Creators: *enniristses, ourffgollufts*es, and *uuffluusts*es which represent, in the Focus Dynamics of medium-developed — on modern criteria! — people, characteristic features of the least developed civilizations from those who are supervising us: SKVAASSTS, LLYUDD, LLIMMILSSTS) and *prafaits* (vital OOSMM-DRUU-Creators: *greystses, allgsses,* and *llavollovaloffs* representing, in our Focus Dynamics, the features of about the equally developed civilizations: OOSMM, FAYG, and TRIFFTTTS).

3.00636. I must notice that specific subclasses of Form-Types emerged «inside» every Form-Type in the conditions typical to exuberation diapason of every civilization's FD. These subclasses reflect mostly needs and abilities characteristic exactly for civilization's representatives. This is about conditional division of people of any race or nation in sanguine, choleric, phlegmatic, and melancholic persons, yet, in this case, there are much more not only visible, but functional differences in their Form-Types. For example, *allgsses (kakrikontses, pravins, eldons, and lamits)* form their own UULL-VVU-Form-Types by their specific realizational features; *greystses (maklaks, mafits, vergons,*

and glumids) form their inherent LGUU-VVU-Form-Types; *stablozantses* (*guurluusses, luuyussts, illiirssts*) form PIIYKKH-VVU-Form-Types; *ngunms* (*skargovorts, skargonts, slugupses*) form KHVUO-VVU-Form-Types; *bollfs* (*klaakssords, bigvvs, plovvts*) form SSM-VVU-Form-Types, and so forth. Other analogs of the NUU-VVU-Form-Types are:

- OSTROKKOLF-VVU-Form-Types of humans; they are emerged in the diapason from 3.0 to 3.5 dimension by Focus Dynamics of the «middle» Creators-Curators of 4, 5, 6th karmic Channels of the second synthetic Level of ORLAAKTOR- and AIGLLILLIAA-Iissiidi: by *mistsents* — mental FFROOGSS-MAA-Creators (*iissorfs, ffillistses, aiyfullugrs*), and by *gorrrffts* — vital DLLOOM-DRUU-Creators (*ngunms, bollfs, skradomulyats*); they represent AIYFR, CHELLK, GORROSS, STABLOZANTS, SKALLAUR civilizations;
- UPDUKHVASSL-VVU-Form-Types of humans; they are emerged in the diapason from 3.5 to 4.0 dimension by the Focus Dynamics of the «highest» Creators-Curators of 7–8th karmic Channels of the third synthetic Level of ORLAAKTOR- and AIGLLILLIAA-Iissiidi: by *stroolgs* — mental RRUURSS-MAA-Creators (*paarruurses, ailggilluftsas, aammorfs*), and *tloonds* — vital SVIILL-GRUU-Creators (*lovirgiydtases, pridmls, regosporruts*); they represent PAARRD, RRUURSSTS, TLOONFR, SVIILL, PRIDD civilizations.

3.0637. I should stop with this rather limited list of available to my Focus Dynamics, diffuzgent, mixtum, and dimidiomittense Form-Types' analogs which structure an endless diversity of different-Qualitative Creative Activity of NUU-VVU-Forms' Form-Creators. I just add that there are different phrases with different sets and numbers of letters for marking other Synthesis Schemes (on *every* kind of animals and plants) which are simultaneously manifested in all types of VUOLDTM-Realities (belonging to the «Physical» Globe of GREIYSLIISS).

3.0638. VVU-combinations are characteristic also for the Sound Codes of subjective Realities which emerged in the conditions of the highest Levels of Form-Matter by the Form-Creators' Focus Dynamics of various NUU-VVU-Form-Types (including FLAKS- and VUOLDS-Forms of the «modern» people): VUOLDTM-U-VVU (to 6.0th dimension) — in the Globes of GREIYSLIISS, DROURRKHLASS, and STRIIYLLGSS; FROORM-U-VVU (to 5.0th dimension) — in the Globes of SLIIMPFLIISS and PROVOUDDSS; SKRAACCI-U-VVU (to 5.5th dimension) — in the Globes of VRAALSVISS, KUULDVUDDSS, STRULLMSS, and SLUUIISS; FLAKFFO-U-VVU (to 4.5th dimension) — in the Globes of KROUVDSS, GNUIYRRSS, and LKHVAAYFFSS. The VVU-combination is present in some other Sound Codes, as such: TTUTTVVUTTU-TT-VVU («ALL-Unity» PCQ), SKHVUUKHKHSSM-UU-VVU («CC Profoundness» State). I find it difficult to comment its essence and meaning here.

3.0639. For example, in the current s-Reality, plants classes have all sorts of different-Qualitative signs as most prevalent, so their Sound Codes are compiled by the principle — *three consonants + one vowel*: SSKA, SSPA, SSNU, SSVU, SSLO, SSFI ...; KKFO, CCII, KKME, KKLK ...; KOKF, KIKR, KEKM, KUKL ...; SASM, SOSG, SIMF, and many others; mammals classes have *two consonants + one vowel*: VUV, UVV, VVA, AVV, VAV, VVO, VOV, OVV ...; LLA, ALL, LAL, LLU, LLI ...; MME, MEM, EMM, MMO, MOM ...; KKU, UKK, KUK, KKA, KAK...; PPI, PIP, PPU, PUP ...; FFA, FAF, FFU, FUF, and many others; birds classes have *two consonants + two vowels*: OKKO, OKOK, KOKO; IMMI, IMIM, MIMI; AFFU, FAFU, UFFA, FUFU; ILLO, LILO, LOLI, OLIL, and many others; fish classes have *three vowels + one consonant*: AARA, ARAA,

AAAR, RAAA; UOMA, OMUA, MAUO, MOUA, and many others; mineral classes have *two outer vowels + one or two consonants in the middle*: ORO, ALA, IMI, UNU, EDE, OBA, OFI, OKU, OLE, ASSE, ALTI, ARVU, IGRE, IDDU, INFA, and many others.

3.0640. The presence of narrow-specific KLEKS-Factor, expressed in the above mentioned sound compilations, provides sustainable implementation of only specific SFUURMM-Forms in a Self-Consciousness of every Form-Type, in the slloogrent Focus Dynamics of every Proto-Form. These are SFUURMM-Forms which are able to express only qualitative features combinations inherent just in the Collective Intelligence of the given Proto-Form in all the different-Qualitative specificity of local exuberation conditions in every STCs' group. Yet, this occurs only in the *given* diapason of dimension because, in each of the more ampliative exuberation Levels of a Self-Consciousness Form, there is *multi-directed* unification and universalization of diffuzgent Conceptions — the inter-Qualitative Synthesis of the most covarllert among each other, interconnections inherent in different- protoformal SFUURMM-Forms).

3.0641. That is why, during conditionally boundary «mortal» refocusings lead from the Focus Dynamics of Form-Types of a Proto-Form (for example, of any human NUU-VVU bioanalog) to the Focus Dynamics of the least impersept Form-Types of another Proto-Form (for example, to bioanalogs of animal LLARTTUURFF-Form-Types), the Configuration of previous SFUURMM-Forms is heavily recoded and strongly deformed by Form-Creators of a «new» Proto-Form in strict compliance with Their inherent Synthesis Scheme. Along with this, all the specificity of the previous (human) Experience disappears and becomes «smeared» under unstoppable pressure of absolutely new feelings and impressions. It is as if «masked» with details of new characteristics combinations, and it does not allow «new» Self-Consciousness Form to remember at least anything certain from «the past» (human) existence.

3.0642. However, the Experience synthesized before does not leave the Self-Consciousness completely. It is just complemented with new details and Meaning while the Self-Consciousness becomes involved in new covarllert or geyliturgent (as for humans and animals of the given kind) interconnections in the Focus Dynamics of an animal. Which specifically interconnections would be «cut off» there, and which ones would be developed anew and qualitatively, depends, first of all, on the degree of compatibility among kleks-factors structuring both different- protoformal Form-Types (for example, «-VU» and «-OVV,» or «-LAL» and «-KKU,» and so on).

3.0643. According to the fact that Iissiidiological classification of Self-Consciousnesses Forms takes into account completely different features than existing knowledge systems about living organisms (traditional and phylogenetic) and crystallochemical classification of minerals do, so there is a lot of exceptions in the specified list of principles of subterransive kleksing of various Self-Consciousnesses Forms' Focus Dynamics. However, it is too early to speak about creation and demonstration of such classification since I am simply unable to overcome it alone — there are much more important questions, which I must answer thoroughly, in details and without delay. This will require extensive and in-depth research made by hundreds of thousands of professionals from diverse Disciplines which will be carried out in the altered states of Self-Consciousness (deep Meditations).

3.0644. In the nearest «future» versions favorable for people's development, this task almost impossible now is implemented by creation of credible devices which generate special wave regimes modeling altered states (deep Meditation). That allows bold seekers of Truth to explore inexhaustible cellars of Information and synthesized by *various Synthesis Schemes*, Experience without extra efforts and risk (meaning, to integrate resonationally the Experience, which structures diverse Duplex-Spheres, into the Collective Consciousness of «humankind» not only from «human» OLLAKT-DRUOTMM-systems and FLUU-LLUU-complexes but also from their different types).

3.0645. But how difficult and diverse in its creative manifestation, the Focus Dynamics seems to you of all possible NUU-VVU-Forms (mixtum, dimidiomittense, translucense, dimidioclarus, and luminosal Forms) manifested simultaneously in many different-Qualitative Form-structures of Macrocosmos (from 3.0 to 6.0 dimension), this FD represents just the most «primitive» part of the general multipolarizational manifestation spectrum of Creative Activity of the Collective Cosmic Intelligence of the LLUU-VVU-Entity. The slloogrent Focus Dynamics of the latter is structured with an infinite multitude of specifically synthesized interconnections and Experience having been accumulated by Form-Creators of the countless amount of different-protoformal CCIs' types (and their Self-Consciousnesses Forms) in the diapason to the 9.0 dimension (if considering the lluuvvumic type of FD formation). The Focus Dynamics of the LLUU-VVU-Entity, as well as the Focus Dynamics of the NUU-VVU-Form are transgressed to all the variety of simultaneous inertial states of Space-Time (Time Flows) through the Focus Dynamics of Form-Creators of myriads of different-Qualitative (on the *sub*-Synthesis Schemes implemented by Them) Self-Consciousnesses Forms.

3.0646. Although, Info-Creators have a not less important role than Form-Creators have in generating structures of the given Form and in the whole synthetic Process. The Info-Creators are represented in all interconnections of the Quaternary (under-0 dimension types) and the Tertiary (from 0 to ± 12 dimension) Energy-Plasma with the infinite diversity of OODMM-DDMOO- and SLUI-SLUU-Creators; in Its Secondary (from ± 12 to ± 24 dimension) and Primary (from ± 24 to ± 36 dimension) States They are represented with GLLAA-GLLII- and UUYG-UUYU-Creators. Resonationally acting collaboratively with SLUIY-SS-LAA-, SLAA-SS-MII-, SSLOO-SS-SNAA-, and SSUI-SS-SFAA-Form-Creators through energy-informational structures of IISSIDI-Centers, by means of the UU- and SFUURMM-Forms generation, Info-Creators are equally inalienable participants of any Focus Dynamics as Form-Creators are. Therefore, the relative notion of «chakram personalities» (in relation to all types of NUU-VVU- and LLUU-VVU-manifestations) concerns both Creators' categories of the slloogrent Focus Dynamics of the Macrocosmos's Highest Intelligence.

3.0647. The result of their joint performance is certainly what each of you considers while using pronouns «me» or «mine,» when you associate various versions of life creativity of the World around you with intermediate results of exuberation of one or another Form-Type of your NUU-VVU- or LLUU-VVU-Forms. All those Creators (Who are «you»!) jointly act in an endless Creative Flow of diverse and different-Qualitative Forms originating everything mentioned by us as «Life.»

Chapter 3. Info-Creators and Form-Creators of aiyyaic birvularity type

3.0648. We are interested most of all in collective Creativity of SLUI-SLUU-Creators together with Form-Creators of the Tertiary State of Energy-Plasma. This Creativity may be conditionally classified by Their ability for Synthesis of sub-...-Aspects and Aspects of the 12 different-type OO-UU-Entities in conditions of the 12 basic (for s-Realities of the NUU-VVU-Type) different-Qualitative dimension diapasons of Energy-Plasma. An infinite multitude of Info-Creators of various types (including SLUI-SLUU-Creators) are involved in formation of the slloogrent Focus Dynamics of Macrocosmos, but in our further study, we will take into consideration only the Info-Creators of RESOSCONTIONAL development Branch (VKRTSYYY-YY-KKR), which are mostly compatible on their properties with the Form-Creators of SYNTHETIC Branch (AGLLAA-A-ALLAA).

3.0649. In terms of the lluuvvumic, lluuvvumic-goolgamaaaic, and goolgamaaaic birvularity types (the Tertiary Energy-Plasma), every kind of SLUI-SLUU-Creators acts through the karmic Channels (Factor axes SS-SSVU) of an IISSIDI-Center whose energy-informational structure mostly corresponds to the qualitiveness of Information peculiar to it. So, for example, GROOMPF-SLUI-SLUUs resonationally arrange the Focus Dynamics of Form-Creators of ARGLLAAMUNI-Iissiidi through the PRTTTS-SSVU Factor axes, PLIISMA-SLUI-SLUUs do Form-Creators of INGLIMILISSA-Iissiidi (SSVOOUU-SSVU Factor axes), KLOORTM-SLUI-SLUUs do Form-Creators of ORLAAKTOR-Iissiidi (CCIOYYDL-SSVU Factor axes), AAIIGLA-MAA-SLUI-SLUUs do Form-Creators of AIGLLILLIAA-Iissiidi (YUUSMII-SSVU Factor axes), UULDMS-SLUI-SLUUs do Form-Creators of ULGLUU-Iissiidi (GRROOFF-VVU Factor axes), SSOUISST-SLUI-SLUUs do Form-Creators of SSAASSFATI-Iissiidi (SSMILSS-VVU Factor axes), LOOMGD-SLUI-SLUUs do Form-Creators of OLGOOLLONI-Iissiidi (PLUUGS-VVU Factor axes). The Info-Creators, which provide the Focus Dynamics of Form-Creators of AANI-Iissiidi, are not included yet to the SLUI-SLUU-Creators category — they are qualitatively modified to GLLAA-GLLII-Creators of the Secondary Energy-Plasma (the Factor axes functions are integrated into a multi-factor Axis of GOOLGAMAA-A).

3.0650. I should also notice that there are Factor axes common for the two resonational IISSIDI-Centers (identical by exhibition diapason), through which Form-Creators perform directly the Process of their Synthesis with Info-Creators: SSPROUTTS-SSVU Factor axis for the 1–2 IISSIDI-Centers, FLUULF-VVU for the 3–4 Centers, IILLGM-VVU for the 5–6 Centers, PKUOLLGS-VURRLS for the 7–8 Centers. These common Factor axes exist in order for origination of sustainable different-Qualitative combinations of all sorts of heterogeneous features (UU-VVU-copies, SFUURMM-Forms, and UU-VVU-conglomerates originated by them) in ODS and FLC and their concurrent manifestation in Focus Dynamics, in the structures of Self-Consciousness (for example, in RRGLUU-VVU — the Primary Temporal Axis of Self-Consciousness of every «personality»).

3.0651. GLLAA-GLLII-Creators of the Secondary Energy-Plasma are also different in realizational kinds. These Creators form Focus Dynamics of SSLOO-SS-SNAA-Form-Creators with qualitatively corresponding Information. For example, GLOOGOLM-GLLAA-GLLII-Creators participate more actively in the Focus Dynamics Synthesis of Form-Creators of AANI-Iissiidi (the common multi-factor axis of GOOLGAMAA-A is KOAYLLT-RRGLS), SSILMII-GLLAA-GLLII participate in the Synthesis of Form-Creators of RAAKLIMA-Iissiidi, DILLII-GLLAA-GLLII participate in the Synthesis of Form-

Creators of ULUUGUMA-Iissiidi, STSILVII-GLLAA-GLLII participate in the Synthesis of Form-Creators of SVAAGALI-Iissiidi. Notably, starting from the RAAKLIMA-Center, the karmic structures of Factor axes are transformed into some universal analogs (ALRAYYSKR-UOYY) peculiar to each of the more and more ampliative Forms of the SSMIYSMAA-A manifestation. Those Forms structure Self-Consciousness of the AIY-YYA-Entity (the Cosmic Prototype of Human in conditions of the 24-dimensional exuberation diapason).

3.0652. In the previous volumes, I have already discussed quite thoroughly the basic principles of origination of specific realizational opportunities in diverse subjective Focus Dynamics of all Proto-Forms of GOOLGAMAA-A-Entity. Those opportunities determine energy-informational parameters of «local» exuberation of any Focus Dynamics (in relation to all the multitude of the rest Form-Types related, for example, to the given LLUU-VVU) in certain conditions of Space-Time. In this regard, every Self-Consciousness Form has objective opportunities for *duvuyllerrt* appearance and subjective implementation of its Focus Dynamics either in some, principally different by their properties, dimension types (GLEIIYO-diapasons, *catioleptic* — conditionally «positive» — dimension), or in other types (UDDVOO-diapasons, *anioleptic* — conditionally «negative» — dimension).

3.0653. I remind that *catioleptic* dimension types of Space-Time mean such narrow-specific exuberation conditions for each Self-Consciousness Form which satisfy most of all qualitative interconnections formed within tightly defined Synthesis Scheme in its focal Configuration. You should consider the *anioleptic* dimension type as any manifestation conditions which to the most degree do not satisfy sustainable interconnections existing in f-Configuration of the given Self-Consciousness Form.

3.0654. The presence of all possible signs of this objective difference among different-Qualitative Self-Consciousnesses Forms in the *skrruullerrt* system provides each Proto-Form of GOOLGAMAA-A with opportunities of *characteristic* consistent manifestation of Focus Dynamics inherent in it *only* in the *duvuyllerrt* groups of single-type STCs and in Form-Types characteristic to it (for example, in NUU-VVU). No one «human person,» whose *majority* of SFUURMM-Forms possesses characteristic human VVU-sign, can suddenly and *consciously* appear with the given set of SFUURMM-Forms either in another Proto-Forms, or in some protoformal STC. Although, across the whole Multipolarization spectrum of our Focus Dynamics, we appear *consciously* only within the GLEIIYO-type of dimension. However, at the same time we appear unconsciously (as for the *catioleptic* Form-Types!) in many Self-Consciousnesses Forms of the UDDVOO-type of dimension (in the meantime — we do consciously for the *anioleptic* Form-Types).

3.0655. In the specific GLEIIYO-diapason of dimension of the Tertiary Energy-Plasma, all the diversity of subjective Realities types of SLAA-SS-MII-Form-Creators is provided resonationally with Information of the following types of SLUI-SLUU-Creators:

A) «**the Lowest**» Levels of the Tertiary Energy-Plasma — *Form-Matter* (from 0.0 to +4.0 dimension) and *Plasma-Matter* (from +4.0 to +6.0 dimension):

PFUURG-VU (to +0.5); STOILG-VU, AAOLL-MAA, TVAARR-DRUU, AALL-GA-LLUF (to +1.0);

FRAARG-VU (to +1.5); LOOLG-VU, NAOLLM-DRUU, ASSFFAL-MAA, UINNG-GU-LLUF (to +2.0); VVUURRRU-VU (to +2.5); DTOOLL-VU, OOSMM-DRUU, SKVAASS-MAA, OURFF-GO-LLUF (to +3.0); CCIROOSS-VU (to +3.5); PPTTAADDD-VU, SVIILL-GRUU, RRUURSS-MAA, AILG-GI-LLUF (to +4.0);

FLAKFFO-U-VVU (to +4.5); FROORM-U-VVU, ULLU-GRUU, SPLUUM-MAA, Of-ORR-TOY (to +5.0); SKRAACCI-U-VVU (to +5.5); VUOLDTM-U-VVU, PROUG-GRUU, POOLG-MAA, OLLMI-TOY (to +6.0);

B) «**the Middle**» Levels of the Tertiary Energy-Plasma — *Form-Plasma* (from +6.0 to +9.0 dimension):

OLLMO-MO-MTR (to +6.5); ORFOR-VO-FT, FROOMM-GRUU, LOUNG-MAA, UBB-LLU-TOY (to +7.0); UMTUSS-KHU-ST (to +7.5); USSTU-LL-USTR, VRIIV-GRUU, DRAARRG-MAA, SSMALL-MMA-TOY (to +8.0); ARNARR-DU-GGS (to +8.5); ILLRI-LL-MIRT, AARGS-SRUU, MMAARG-MAA, USS-LISS-FLUYF (to +9.0);

C) «**the Highest**» Levels of the Tertiary Energy-Plasma — *Plasma-Form* (from +9.0 to +12.0 dimension):

LLOOFF-SRUU, KNUAKK-MAA, ADD-MADD-FLUYF (to +10.0); IIFFS-SRUU, ELGFFLUM-MAA, OFF-ROSS-FLUYF (to +11.0); SSMAALL-SRUU, EMFFLII-MAA, IYY-KIRR-FLUYF (to +12.0).

3.0656. Similarly, the Processes of level-by-level Synthesis of all the diversity of subjective Realities of UDDVOO-range by SLAA-SS-MII-Form-Creators are informationally provided by the following SLUI-SLUU-Creators:

A) Form-Matter: KRROUKK-SS (to -0.5); NNUULL-SS, KHLAA-A-LDR, LALL-MAA-MMA, LAOLL-GLA-UFF (to -1.0); STTSUUFF-SS (to -1.5); SLOORR-SS, LMOO-O-LDR, FALL-LAA-MMA, NIGLU-GLU-UFF (to -2.0); IRRNGG-SS (to -2.5); TTROKR-SS, SMOO-O-LDR, SAVV-VAA-MMA, FRUU-GLO-UFF (to -3.0); SKLUMM-SS (to -3.5); ARFLL-SS, LLII-I-LDR, SARR-RAA-MMA, GLAA-GLI-UFF (to -4.0);

B) Plasma-Matter: GLLAA-A-SSM (to -4.5); LKHRUU-U-SSM, LLUU-LLU-GR, PSULL-MUU-MMA, ROFF-TOR-UYF (to -5.0); FLTOO-O-SSM (to -5.5); SMMII-I-SSM, GROO-RRO-GR, GLOPP-POO-MMA, KAFF-LAF-UYF (to -6.0);

C) Form-Plasma: TROOT-MO-TTR (to -6.5); FTRO-VO-FORT, MMOO-MMO-GR, GLUNN-NUU-MMA, BULL-TUL-UYF (to -7.0); MUUTTKH-KHU-ST (to -7.5); PTIRRI-LL-ISTR, VVII-VVI-GR, GRARR-RAA-MMA, KIGG-LIR-UYF (to -8.0); DRAAN-DA-RGS (to -8.5); LLIYLI-LL-IYT, GRAASS-AA-RS, RAMM-MAA-MMA, NA-ARR-FRUSS (to -9.0);

D) Plasma-Form: FLOOFF-OO-RS, KANN-NAA-MMA, RO-IMM-FRUSS (to -10.0); FRIIFF-II-RS, FULL-LUU-MMA, GE-ELL-FRUSS (to -11.0); MLAAMM-AA-RS, FILL-LII-MMA, YYU-USS-FRUSS (to -12.0).

3.0657. As you see, no matter how subjectively the above mentioned process of conditional differentiation of common Focus Dynamics of SLAA-SS-MII-Form-Creators is considered by us, but somehow inconceivably for us, this process is objectively structured with absolutely different types of SLUI-SLUU-Info-Creators. It is actually impossible to explain, what the interconnections among Creators of catioleptic and anioleptic (in relation to each manifested Self-Consciousness Form!) dimensions depend on and how they act. Also, due to the total absence of relative basis, it is impossible to describe them because you imagine yet too simply and primitively the principle of subjective emergence of the diapasons of Forms' simultaneous exuberation throughout the whole Multipolarization spectrum of *our* Focus Dynamics (not to mention specificity of emergence of other Proto-Forms' FDs). Yet, if *sort of* «the same» dimension Levels of sort of «the same» types of subjective Realities are structured with different kinds of SLUI-SLUU-interconnections that means there are some distinctive signs among those sort of «identical» Form-structures (s-Realities).

3.0658. All Sound Cosmic Codes of SLAA-SS-MII- and SLUI-SLUU-Creators, including Form-Types of NUU-VVU-Form constructing subjective Realities of our Planetary Entity, as well as all titles of Levels and sub-Levels of the Plasmic Forces Diapason manifestation are presented to you so minutely not in order for you to remember them, but for everyone could get any additional Information about them independently, with assistance of methods suggested in the section «Meditation on Sound Codes.»⁴

3.0659. All «chakram personalities» simultaneously appearing through of the Form-Creators' Focus Dynamics of all diversity of Self-Consciousnesses Forms of NUU-VVU- and LLUU-VVU-Form-Types (the «personalities» do not act through FDs of other Proto-Forms since their kleksing Scheme is different the from humans' one) arrange their Creativity in conditions of narrow-specific properties and characteristic spatial peculiarities. The latter are imposed on the «personalities» by the Time Field of a SVOUR-SSV-VVURR-Entity in whose Time Flows all subjective Realities of people and all groups of «human» STCs are emerged alongside results of creation by many other GOOLGAMAA-A's Proto-Forms. It is not possible for me to let you know, what exactly the difference is between the appearance specificity of unique parameters of TOO-UU-Entity in the informational space of NUU-VVU- and LLUU-VVU-Forms' Self-Consciousness from features of the infinite multitude of other Temporal Entities. However, in various Space-Time regimes, exactly that specificity emerges all those energy-informational interconnections which structure the lluuvvumic and lluuvvumic-goolgamaaic birvulyarity types in so complex and varied way.

3.0660. For those who learn to meditate on the Sound Cosmic Codes, I would add that, alongside lots of other diverse TOO-UU-Entities of Time, the structure of the given SVOUR-SSV-VVURR-Entity is qualitatively integrated to a Time Field of even more universal in its properties, SKRO-OFF-UTT-Entity (the Holistic Time Field within which absolutely all Self-Consciousnesses Forms are realized of the VUOLDTM-Entity — the Collective Cosmic Intelligence of all different-Qualitative Form-Creators of the Tertiary Energy-Plasma).

3.0661. The most complex, spreading into Slloogrentness of all Form-systems of the Tertiary Energy-Plasma, construction of immanent (inherent to VUOLDTM-Entity CCI's internal Nature) energy-informational interconnections, which structure the Collective Cosmic Intelligence of Each

of the infinite amount of GOOLGAMAA-A-Entities, has a huge Energy-Potential. It does not influence destructively on qualitative states of subjective Realities, which were made by any GOOLGAMAA-A-Entity's CCI and Proto-Forms of Self-Consciousnesses, just because those interconnections mutually compensate (harmonize) each other dynamically in Its sllougrent Focus Dynamics with the different-Qualitative Creative Activity of all «chakram personalities.» While this Creative Activity is simultaneously implemented by these «personalities» through diverse Self-Consciousness Levels of each of the GOOLGAMAA-A-Entity's Form-Types.

3.0662. For example, during the process of general creative manifestation of all LLUU-VVU-Entities (through the Form-Creators' Focus Dynamics of all multitude of NUU-VVU-Forms and their Form-Types and through many other Forms diffuzgent in relation to signs of the given birvularity type), energy-informational interconnections are duvuyllerrtly synthesized in different-Qualitative Levels of Self-Consciousness of SSS-Entity and reflected to various exhibition conditions by Form-Creators of diffuzgent different-Qualitative Self-Consciousnesses Forms. These interconnections are *mutually leveled* on all types of subjective Realities and become qualitatively balanced in general by the degree of covarllertness and resonation among each other. The leveling is accomplished by corresponding signs of Form-Creators of many other GOOLGAMAA-A's Proto-Forms whose realizational creativity, in s-Realities and STCs typical to them, appears not less actively than our *human* life creativity in the earthly World we perceive.

3.0663. That principle of mutual equilibration of all different-Qualitative exhibition Levels of the sllougrent Focus Dynamics of the SSS-Entity's Self-Consciousness is performed through diffuzgent-compensatory properties of any types of s-Realities irrespective of the development degree of Form-Creators (for example, from a physical man to the AIY-YYA-State) Which form and arrange Focus Dynamics of Their Collective Consciousnesses. The realizational Creativity Levels of the Collegiate Cosmic Intelligence of the AIY-YYA-Entity (the Universal Ethereal Plasmic Forces Diapason — from +36 to -36 dimension) also represent opportunities only for the one among zillions of realizational Forms which are engaged jointly in implementation of the creative Process of Self-manifestation, Self-knowledge, and Self-development of all Levels of the AYFAAR Collegiate Intelligence.

3.0664. In these general interconnections, the sllougrent Focus Dynamics of all realizational Forms of Collegiate Cosmic Intelligences structuring AIY-YYA represents an integral synthetic part of the general Cosmic Process which is accomplished collaboratively by Form-Creators of the SYNTHETIC Amplificational-Eglleroliftive Branch (AGGLLAA-A-ALLAA) and Info-Creators of the RESOSCONTIONAL Qualitational-Irrkoglictive Branch.

3.0665. You can imagine in extremely elementary and very schematic way the Essence of Process of Creative Activity origination and manifestation of the AYFAAR Collegiate Intelligence in Macrocosmos (through the multipolarizational Focus Dynamics of the DDIIUYI-Entity) as follows. In Each of the twelve Galactic «Sectors» (NNIILG-NNI) of the Pure Cosmic Qualities manifestation, there is a concurrent (yet very original in its Scheme!) «reprojection» of universal properties and characteristics' combinations which qualitatively structure Vectors (birvularity Directions) of all basic development Branches on the Schemes available for the CCI of the given «Sector» (I remind

you that there are 12 Amplificational SSNOO-SS-FFL Vectors and 12 Qualitational AEYY-SSMAA-EYSS Vectors).

3.0666. The term «Galactic Sectors» should not be considered through Conceptions about some their space-time (in other words, physical, linear) scale — you should interpret them as specific amplissimness manifestations of the Macrocosmos's skrruullerrt system. Rather, they are Universal Manifestation Spectrums (or realizational Diapasons) of certain intermediate results of the slloogrent Process of simultaneous implementation of inter-Qualitative Synthesis of Energy-Plasma in all dimension Levels which structure the given — Universal — megadiapason. Why is it exactly «Universal»? Because now we are examining the Focus Dynamics of our *Universal 36-Qualitative* (24 CCQs + 12 PCQs) DDIIUYI-Entity; so the word «Galactic» placed in this expression must emphasize and subjectively reflect, in your Perception, the highest extent of possible (from +36 to -36 dimension) *qualitative* (not on its involvement in one or another PCQ, but on the extent of Its inherent *amplificationality*) manifestation of all characteristic features of this Focus Dynamics.

3.0667. Notably, although the Focus Dynamics of Collegiate Cosmic Intelligence of Each of the 12 NNILG-NNI-Sectors, which structure the slloogrent f-Configuration of our DDIIUYI-Entity, penetrates absolutely all diverse Self-Consciousnesses Forms and CCIs of hyperdiapason of the AYFAAR's Creation (from the lowest Levels of the Quaternary Energy-Plasma to the highest Levels of the Primary Energy-Plasma — IYISSISSLIIY-SSS), in the meantime, the Creative Activity of SSUI-SS-SFAA-Creators appears actually only within the megadiapason from ± 36 to ± 24 dimension. That Activity subjectively operates only in relation to the Focus Dynamics of SVOO-UU- and TOO-UU-Entities which structure the highest (as for the present DDIIUYI) Sphere of Cosmic Creation (SSUU-SS-VUU).

3.0668. Yet, in conditions of the Secondary Energy-Plasma (the NAA-GLLII-UU-Sphere manifested from ± 24 to ± 12 dimension), Focus Dynamics (along with f-Configurations) of the highest universal SSUI-SS-SFAA-Creators transgress, level-by-level and by every Quality (by duvuyllerrt-covarllert combinations among various birvulyarity types), to all diversity of f-Configurations of Their Own «projections» — SSLOO-SS-SNAA-Creators. The Focus Dynamics of the latter support all the functionality of the NAA-GLLII-UU-Sphere of Cosmic Creation (these Creators, in turn, transgress to the EIYG-SS-MII-Sphere of SLAA-SS-MII-Creators from the megadiapason from ± 12 to 0 dimension, while the latter Creators transgress to the pre-zero UUKKKHL-SS-KKHKHOO-Sphere of exhibition of the SLUUIY-SS-LAA-Creators' Focus Dynamics of the Quaternary Energy-Plasma).

3.0669. Countless Vectors of active application (simultaneous implementation) of covarllert combinations of Focus Dynamics within the hyperdiapason examined by us (to ± 36 dimension) provide the sequence of emergence and multilevel inter-birvulyart concatenation of the precious Experience of Self-conscious Existence of Universal Intelligence AYFAAR in Its slloogrent Focus Dynamics as a Form of DDIIUYI-Entity. This universal Energy-Information is gradually resynthesized (specifically revived) in the Quaternary, Tertiary, and Secondary States of Energy-Plasma, and then converged to the structures of Its Primary State (for 36-Qualitative Universes). After that, the Energy-Information is concentrated in the Focus Dynamics of UUYU-UU-YY-Creators (SUPRA-Universal Creators of

the 48-dimensional IYYYYUULLCSMI-Entity — for those birvulyarity types which are synthesized in the Focus Dynamics of our DDIIUYI-Entity).

3.0670. It is extremely difficult for me to respond on the question, why it works exactly in this way (that is why the quintessence of all Experience is concentrated not in the Highest Intelligence of AYFAAR — if conditionally comparing these Levels to our «personal» Self-Consciousness — but in as if more amplificational analog of Its Collective Subconsciousness). SFUURMM-Forms of the Focus Dynamics of Universal SSUI-SS-SFAA-Creators from the Primary State are beyond any adaption and diversification in my Meditations. Thinking in the similar way, one can assume that those Form-Creators (as well as in our case) do not possess more ampliative Experience of all duvuyllerrt-multipolarizational refocusing at once. Rather, they «unpack» it step-by-step from some VEC-analogs which structure not the highest Levels of the AYFAAR's Focus Dynamics, but depliative Levels of the Focus Dynamics of general (meaning, independent of birvulyart combinations peculiarities) I-IIYTY-I-AA-A-Creators from SUPRA-Universal (48-Qualitative) Cosmic Plans.

3.0671. The skrruullerrt Form-structure of the Cosmic Creation Sphere of SSUI-SS-SFAA-Creators of the AYFAAR Highest Intelligence is organized in a single Focus Dynamics of the twelve NNILG-NNI-Sectors' Form-Creators Whose space-time systems are interrelated energy-informationally very tightly (that is resonationally) with Each of Their comprising functional Elements («Sub-Sectors»). The main structures (as if specific amplificational analogs of the IISSIDI-Centers) for distribution of Energy-Information throughout Each of the 12 NNILG-NNI are:

- ILLSSS-SSUU-SSS — *the Perfolonimator* — performs slloogrently-adaptive functions, in other words, perfolonimates (transgressively-convergently transforms, adaptively transcodes, and narrow-specifically converts) universal slloogrent focal-ethereal interconnections from any Level to certain SFUURMM-Forms which can be available in corresponding exiberation conditions for Perception systems of any Self-Consciousness Form and any CCI type; it provides decoherent properties of Energy-Information. At endlessly vast systems of ILLSSS-SSUU-SSS penetrating absolutely all Levels of the AYFAAR Self-Consciousness, owing to the presence of the Perfolonimator functions, a single-moment process is performed of the «own differentiation» of the 12 PCQs attributes in corresponding Vectors Branches of AEYY-SSMAA-EYSS (Qualitational Branch) and SSNOO-SS-FFL (Amplificational Branch); after that, the following Synthesis takes place of the certain PCQ with each of the reference Qualities from the other «Sectors.»
- YUYU-IIY-SSS-YUYU — *the Mobillurascite Doublescator* — performs transgressive-convergent functions of simultaneous duplication of stable-covarllert combinations of different-Qualitative features in various exiberation conditions; provides coherent properties of Energy-Information. Form-structures of the Primary Energy-Plasma generated in ILLSSS-SSUU-SSS are «projected» and processed in YUYU-IIY-SSS-YUYU then being qualitatively reflected (as if being «duplicated» level-by-level) at STC through an endless multitude of SSS-TAIY-SSS (Primary Principles) a part of Which (synthesized to the least degree) is «archived» at the encoded structures of AYFAAR as the «own creative Experience» (to full liyllusceevization in the corresponding Levels). The more ampliative part comes to synergy with the Focus

Dynamics of the next amplificational State (the 48-dimensional IYYYYUULLSSMI-Entity's Self-Consciousness).

- SSSV-UUIY-SSSV — *the Sector's Repository* — performs focusing-diversifying functions in all energy-informational interconnections; it is universal derivative of the UPDR, and it provides properties and peculiarities of all «locally focused» environments of Self-Consciousnesses Forms' and CCI's exuberation. Along special birvulyart combinations, infinite SSS-TAIY-SSS-Flows generated by ILLSSS-SSSUU-SSS are transmitted to SSSV-UUIY-SSSV where they are actively modified among each other, get engaged in the Synthesis with the Qualities of SSS-TAIY-SSS-Flows of Each of the rest 11 NNILG-NNI; also, they are relayed to special receiving LLUURRSS-systems present in the structure of Each of 144 «Sub-Sectors» (LLIING-LLI).
- AIY-SSS-M-SSS — *the Transpellerative Transmuter* — by means of iksons, svilgons, avvakkions, and flaagtuons performs regulative-coordinating functions of attractory organization of Focus Dynamics for all synthesizing Form-Creators; it provides all the USCF-Dynamics. AIY-SSS-M-SSS implements multilateral exchange of Experience of Each of 11 remaining NNILG-NNI and of own synthesized Experience (that is an *invaderental* Experience of a Pure Quality which structures the given «Sector»).

3.0672. There is a *Lurvectortional* Sphere (UUYT-SSS-UU) within structures of every AIY-SSS-M-SSS; it is inherent only in the given Transpellerative Transmuter. Form-Creators of the Sphere carry out *desclonvertization* of each Level of the Primary Energy-Plasma (level-by-level decoding, sorting, and kleks-cloning the Ideal Matrixes along with thorough comparison of SSS-TAIY-SSS-Flows from other «Sectors» to the Reference Pure Quality of the given «Sector»), and then Transmutation occurs of the Sphere with the main PCQ of a «Sector» and Transformation takes place of the emerged quintessence of Energy-Information to special multichannel *Consovectional Concentrators* (PPAAKHKH-TT-SSS — energy-informational combinations representing *Experience Accumulators* and consisting exceptionally of interconnections of the highest qualitative Levels of the Primary Energy-Plasma) which structure each of 12 SSSV-UUIY-SSSV.

3.0673. Each of the Lurvectortional Spheres, which structure Each of the 12 Galactic «Sectors,» is emerged by means of covallert concatenation of many Primary Elements (TTT-III-UU-Entities) representing the Supreme Principles of Galactic TOO-UU-Entities, who develop within the systems of Each given NNILG-NNI (this is about the SAME as WHAT OOL-GLOO — «the Real Ones» — are for AIY-YYA). Each of the Consovectional Concentrators is actively tied by narrow-specialized Channels not only with ILLSSS-SSSUU-SSS, but also with identical structures of Each of 144 «Sub-Sectors» (LLIING-LLI). This way, it implements multilateral energy-informational connection among Either of Galactic «Sectors» and Its 12 «Sub-Sectors.»

3.0674. Each of those twelve Galactic «Sectors» provides Collective Cosmic Intelligences manifested inside of It with *absolutely specific conditions* for inter-Qualitative Synthesis of all Self-Consciousness Levels. Those conditions are fundamentally different from conditions of any of other eleven NNILG-NNI. Due to this fact, results of concurrent development of as if «the same» Models of Collective Intelligences (for example, Intelligences of aiyyaiaic type) are rather exceptional within each «Sector» and not similar to the Experience synthesized in the remaining Galactic «Sectors.»

3.0675. Form-Creators of the SYNTHETIC Amplificationally-Eglleroliftive development Branch (AGLLAA-A-ALLAA), the multitude of different-Qualitative CCI's of Which also includes LLUU-VVU-Forms, GOOLGAMAA-A, SSMIIYSMAA-A, and TLAASSMA-A alongside Collective Cosmic Intelligences of the rest parallel Branches, simultaneously «project» inherent to the Branch, synthetic combinations of heterogeneous attributes (in a form of specific interconnections not only with the Qualitational-Irrkoglective RESOSCONTIONAL Branch, but with the rest eleven types of Qualitational Branches!) to the CCI's Creative Activity of the rest development Branches. Characteristics and properties of the letter are performed in the Form-structures of the current Universe's type through universal features and opportunities of the twelve Galactic «Sectors» of Qualities. That means that subterransive rotational Cycles of evolvment of Collective Cosmic Intelligences of all synthetic TOO-UU-Entities are potentially formed from specific interconnections inherent in combinations of the Amplificational SYNTHETIC Branch and twelve varieties of the Qualitational development Branches of Cosmic Qualities.

3.0676. In order for any Self-Consciousness Form could have an opportunity of sustainable focusing in either of more ampliative dimension diapasons, its Form-Creators have to perform truly grandiose activity on Synthesis and *qualitative balancing*, in Own Self-Consciousness, of absolutely all types of energy-informational interconnections peculiar to the following combinations of the Amplificational-Eglleroliftive SYNTHETIC Branch with the Qualitational Branches:

SYNTHETIC Amplificational Branch + RESOSCONTIONAL Qualitational Branch

SYNTHETIC Amplificational Branch + PRIMENTIVE Qualitational Branch

SYNTHETIC Amplificational Branch + REGENERATION Qualitational Branch

SYNTHETIC Amplificational Branch + RESUMING Qualitational Branch

SYNTHETIC Amplificational Branch + HETERORIZING Qualitational Branch

SYNTHETIC Amplificational Branch + TRANSSCANNING Qualitational Branch

SYNTHETIC Amplificational Branch + DIPOLARIZING Qualitational Branch

SYNTHETIC Amplificational Branch + GENERATIVE Qualitational Branch

SYNTHETIC Amplificational Branch + MONOMIGRATING Qualitational Branch

SYNTHETIC Amplificational Branch + POLYMIGRATING Qualitational Branch

SYNTHETIC Amplificational Branch + POLARIZING Qualitational Branch

SYNTHETIC Amplificational Branch + HARMONIZING Qualitational Branch

3.0677. All the diversity of CCI's Forms initiated through each of those specific combinations represents a countless multitude of different-type birvulyarities which structure, with their inherent

synthetic interconnections, the sllougrent Focus Dynamics of Universal SSUU-SS-VUU-Creators of a particular Galactic «Sector» (exactly — ORFDLUMIYTAND-NNIILG-NNI; there is no way to identify the Sound Codes of non-synthetic combinations, so, as necessary, I will use them in further in the alphabetical order). This means that, on the Highest exhiberation Levels of Focus Dynamics of the given DDIIUYI-Entity (from +36 to -36 dimension) *all birvularity types become interbalanced in different-Qualitative conditions of the ORFDLUMIYTAND-Sector*. Additionally, the latter concentrates all other *synthetic* sets of interconnections, which structure absolutely all manifestation Levels of Focus Dynamics of the Macrocosmos's Highest Intelligence. Yet, except from them, on the Diffuzgentness Principle, features combinations of CCI's of the rest eleven *NON-synthetic* Amplificational Branches, which are covallert related to the SYNTHETIC Branch combinations (ampliative analogs of diffuzgent Proto-Forms of TLAASSMA-A), are also «projected» to the given «Sector.» According to this Principle, characteristic features combinations of Form-Creators of the SYNTHETIC Branch are presented to some extent at each of the eleven Galactic «Sectors.»

3.0678. It should be noted that formation of various combinations of different-Qualitative signs in the remaining Galactic «Sectors» (apart from the ORFDLUMIYTAND-Sector) proceeds by the same Principle for Each of the rest eleven Amplificational Branches:

«Sector» A: Accumulative Amplificational Branch + 12 types of Qualitational Branches;

«Sector» B: Hermaphroid Amplificational Branch + 12 types of Qualitational Branches;

«Sector» C: Fluoliscide Amplificational Branch + 12 types of Qualitational Branches;

«Sector» D: Polaroid Amplificational Branch + 12 types of Qualitational Branches;

«Sector» E: Dualiritive Amplificational Branch + 12 types of Qualitational Branches;

«Sector» F: Manifestation Amplificational Branch + 12 types of Qualitational Branches;

«Sector» G: Formative Amplificational Branch + 12 types of Qualitational Branches;

«Sector» H: Representative Amplificational Branch + 12 types of Qualitational Branches;

«Sector» I: Communicational Amplificational Branch + 12 types of Qualitational Branches;

«Sector» J: Spurlent Amplificational Branch + 12 types of Qualitational Branches;

«Sector» K: planetoid Amplificational Branch + 12 types of Qualitational Branches.

3.0679. This Form-Creators' activity on the Synthesis and balancing of different-Qualitative interconnections in Self-Consciousnesses of all sorts of mixtum NUU-VVU-Form-Types is carried out through an infinite multitude of particular Form-Types and homological «personal» Interpretations of each of Stereo-Forms. Meaning, Form-Creators of all protoformal-diffuzgent Self-Consciousnesses Forms represent, in the sllougrent Focus Dynamics of LLUU-VVU, all possible parameters peculiar to above listed combinations to some extent. For each of those combinations the Synthesis execution

sequence is implemented on a principle of advantage and priority of those which show the most covallertness with each other in the conditions of a certain exiberation diapason.

3.0680. You have to admit that such multi-directed different-Qualitative Synthesis of Self-Consciousness just could not be completed without the Focus Dynamics Diffuzgentness Principle which initiates a universal property of simultaneous Multipolarization in these Dynamics. Owing to that, in each of versions of those synthetic combinations, there appear quite specific varieties of *subjectively as if* «the same» Forms of SVOO-UU- and TOO-UU-Entities who differ from each other very much on the specific signs even at seemingly «identical» (differently vibrational) exiberation Levels (certainly, full identity of structuring «the same» dimension types in different «Sectors» is out of question due to emergence of significant difference in the Synthesis sub-Schemes and Schemes). A Focus Dynamics of every Self-Consciousness Form has to be «reprojected» through all the diversity of those different-Qualitative combinations while *concurrently* self-realizing in a strict sequence particular for it (birvulyarity type) at each of Levels of dimension structuring specifically Each of the Twelve Galactic «Sectors.»

3.0681. Whatever your Self-Consciousness would face in your surrounding reality, the true Essence of everything does not consist in a Form specifically perceived by you. On the contrary, it is reflected as a Content still not comprehensible for you! All the Form-Creators of the SYNTHETIC Branch, including its twelve main Synthesis Directions in each of the Twelve Galactic «Sectors,» generate an infinite multitude of *intermediate* Self-Consciousnesses Forms and CCIs. The Main Creative Function of Those Cosmic SLUIIY-SS-LAA-, SLAA-SS-MII-, SSLOO-SS-SNAA-, and SSUI-SS-SFAA-Entities (among them, there are Form-Creators of our NUU-VVU-Forms) is to play the role of *Mediators* between Collective Cosmic Intelligences representing various types of Universal Entities in the given exiberation diapasons of Energy-Plasma (to 36 dimension). This function is fulfilled in order for heterogeneous cosmic civilizations of Form-Creators could actively interact with each other in joint Cosmic Creation (in accordance with their development level) while not only improving Themselves within the combination of PCQs synthesized by Them, but also consistently structuring Their Own creation with signs of the other Qualities brought to their Focus Dynamics by Mediators of other cosmic civilizations.

Chapter 4. Subterransive classification of LLUU-VVU-Form

3.0682. Thus, slloogrent Focus Dynamics of the Macrocosmos's Highest Intelligence gets enriched by an infinite multitude of Forms which reflect intermediate results of the system Synthesis processes or all possible synthetic States interpreted by us as CCSes (AAFF-TLUU-LLU — «Creative Cosmic States» of different-Qualitative signs combinations). That means that, in every type of Focus Dynamics of Self-Consciousnesses Forms and CCIs, in each of exiberation Levels, not Form-Creators of Each of covallert PCQs get involved into resonational interaction, but Their already steadily synthesized combinations — «Creative Cosmic States.» Exactly these CCSes involve and activate, in their inherent interconnections, covallert or geyliturgent signs related to them (sub-Aspects and Aspects) of any

PCQ which begins to prevail within the structure of that combination against the background of Focus Dynamics of Form-Creators of all other signs.

3.0683. This State of *temporary* invaderentness continues until, in the current exuberation conditions of Focus Dynamics, all existing interconnections get balanced in an appropriate way, until another dissonational state comes in a newly appeared combination due to the presence of Inertia. This state would become a new reason for resonational involvement of Focus Dynamics of Form-Creators of another PCQ into it. Signs of that PCQ would also dominate for a while in new manifestation conditions of the given f-Configuration because these are they who are able to balance different-Qualitative disorder emerged in new energy-informational interconnections. In each of the birvularity *types*, such «distortion» becomes leveled by resonational means, with assistance of invaderentness of various PCQs Form-Creators. As a result, in a birvularity type, there appear many different internal *subtypes*, *kinds*, and *subkinds*, which are structured with narrow-specific different-Qualitative *Directions*.

3.0684. For example, the general Focus Dynamics of all possible diffuzgent Collective Intelligences of the LLUU-VVU-TOO-UU-Entity — in the slloogrent exuberation conditions of Form-Creators' Focus Dynamics of the GOOLGAMAA-A- Ingredient to the 9th dimension! — represents the *lluuvvumic birvularity type* whose characteristic interconnections, alongside interconnections of many other diffuzgent Proto-Forms of GOOLGAMAA-A, structure general, much more complex and diverse, slloogrent signs combinations of the lluuvvumic-goolgamaaaic (9–10 dimension), and then — goolgamaaaic (11–12 dimension) types. This is about Proto-Forms of GOOLGAMAA-A, as following: SSUU-DDU, VVUU-SSU, GGUU-LLU, FFUU-BBU, KUUU-RRUU, YYU-FFU, MMUU-NNU, DDUU-TTU, RRUU-MMU, BBUU-KHKHU, TTUU-GGU, PPUU-YYU, NNUU-KKU, KHKHUU-PPU, and others, also OOUU-OOU, AAUU-AAU, IIUU-IIU, EEUU-EEU, and others, as well as OOYY-OOY, AAYY-AAY, IYYI-IYY, UUYU-UUY, EYYE-EYY, and many other *types*.

3.0685. SUBTYPES OF LLUU-VVU:

- specific lluuvvumic (human and some of humanoid) *luminosal* LLUU-NUU-VVU-Form-Types or simply NUU-VVU-Forms which are consistently structured with «projections» of Focus Dynamics of Form-Creators of translucense NUU-LTTVULL-VVU-RS-Form-Types (synthesized from transparentive NUU-LTTU-VVU and NUU-VULL-VVU), dimidiomittense NUU-TUUL-VVU and NUU-LUUV-VVU, facticial dimidiomittense NUU-LL-VVU, ampliative mixtum highly-intellectual GOORR-VVU, and ampliative mixtum highly-sensual PPUURPU-VVU — they originate a *nuuvvulluum subtype* within the lluuvvumic birvularity type;
- differently directed (by protoformal characteristics) *luminosal* LLUU-KAA-VVU, LLUU-LOO-VVU, LLUU-MII-VVU, LLUU-LFTO-VVU, LLUU-ORRS-VVU, LLUU-TLAA-VVU, LLUU-TTUU-VVU, LLUU-SNATT-VVU, LLUU-VVOLM-VVU, LLUU-DFA-VVU, LLUU-OYYG-VVU, LLUU-RRAYG-VVU, LLUU-RALS-VVU, LLUU-FULSS-VVU, LLUU-MIRG-VVU, and many other Form-Types — they form a multitude of *subtypes* of lluuvvumic birvularity with all sorts of signs of different-protoformal directions (for example, lftovvulluum, orrsvvulluum, tlaavvulluum, ttuuvvulluum, snattvulluum, vvolmvvulluum ones, and so forth).

3.0686. KINDS OF NUU-VVU-Forms:

- facticial human NUU-VVU-Form-Types (the most ampliative of the mixtum ones on the HSI- and HIA-signs), transparentive and dimidiomittense NUU-LL-VVU-Form-Types (from 3.0 to 3.75 dimension); are originated from the Form-Creators' Focus Dynamics of ampliative mixtum highly-intellectual (GOORR-VVU) and highly-sensual (PPUURPU-VVU) Form-Types who, by means of the dimidiomittense NUU-TUUL-VVU- and NUU-LUUV-VVU-Form-Types' Focus Dynamics (from 3.75 to 4.0 dimension) come to synergy in the «CC Potentiality» State and then come to the depliative-translucense NUU-LTTU-VVU- and NUU-VULL-VVU-kinds of NUU-VVU-Forms (from 4.0 to 4.25 dimension), after that they converge to the 4–5-dimensional amplificationally-translucense NUU-LTTVULL-VVU-RS («CC Potentiality» + ALL-Unity); form a specific *nuullvvuic species* of the lluuvvumic birvulyarity;
- multidirected facticial NUU-SM-VVU, NUU-LG-VVU, NUU-YF-VVU, NUU-DL-VVU, and many other Form-Types — they form lots of *species* of the lluuvvumic birvulyarity: nuusmvuic, nuulgvvuic, nuuyfvuic, nuudlvuic, and many others.

3.0687. SUBSPECIES OF NUU-VVU-FORMS:

- human ampliative mixtum GOORR-VVU and PPUURPU-VVU-subspecies (highly-intellectual and highly-sensual ones are the basis for the future lluuvvumic signs of NUU-LL-VVU); in the Focus Dynamics of NUU-LL-VVU, they generate the *goorrvvur and ppuurpuvvur* subspecies of the lluuvvumic birvulyarity type;
- different-protoformal mixtum subspecies: RR-VVU, LYYUYYU-VVU, YAIKHSS-VVU, FLIRRF-VVU, RDUU-VVU, MMUU-VVU, TAO-VVU, TSUU-VVU, and many other NUU-VVU-Form-Types; they represent many *subspecies* of the lluuvvumic birvulyarity type: rrvvvur, lyyuyyvuvvur, yaikhssvvur, flirrfvvur, rduuvvur, and so forth.

3.0688. Development DIRECTIONS of the NUU-VVU-Forms' mixtum analogs: within the boundaries of the Form-Creators' Focus Dynamics of each of Self-Consciousnesses Forms of each of subspecies of NUU-VVU-Forms — for example, from the amount of those in which the least developed (IRKKULLIGR-VVU), medium-developed (USSTUKKUL-VVU), and the most developed people (AKHSUVVROLL-VVU) are focused now — all possible *Directions* of the lluuvvumic birvulyarity (certain «individualities,» «personalities») are sorted subterraneously. Focus Dynamics of such people reflects characteristic peculiarities and properties of the given *type* just to the least extent.

3.0689. That means that, at the «individual» level of own creative manifestation, each of the «modern» people is just unable to perform at least somehow, through the Focus Dynamics of their own Self-Consciousness Form, those synthetic skills, peculiarities, and tendencies characteristic for the lluuvvumic birvulyarity type. This is so because, primarily, in your and my life creativity, there is really no all multitude of specific (for the given Synthesis Scheme) signs combinations of different-protoformal energy-informational interconnections synthesized (in the given dimension diapason) by Form-Creators of the first lluuvvumic pair of Dominants (ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence) to the state of their absolute balance among each other. That is why

Form-Creators of our NUU-VVU-Configurations are still as if in «free floating» and always have an opportunity to «reproject» to the Focus Dynamics of either of diffuzgent Proto-Forms. Therefore, during our evolvement, we can still choose not types of birvulyarity themselves, but only available protoformal Directions of consistent refocusing to those types.

3.0690. Currently popular statement that DNA of all people match by 99.9%, irrespective of their skin color and hair texture (such expressions of contemporary orthodox genetics are based on extremely superficial investigation of DNA and total ignoring the role of diversive or «rubbish» part, excluding epigenetic mechanisms), is not true. The reason is that not only separate individuals, but, moreover, human races, nations, and nationalities sufficiently differ from each other by a type of organizing chromosomal structures of DNA by gene Form-Creators. Specific differences in the features of genetic constitution of people of various racial or national affiliation are due not to any set of genes and to their total amount, but to very delicate and complex features of sustainable energy-informational interconnections among genes. Such interconnections provide all nuances of interactions regulation among each other and the presence of various functional capabilities. However, this fact does not diminish anyway the influence of role of subterransive existence conditions (social-economic, ecologic-climate ones) on the «individuals'» Focus Dynamics in various ethnic and racial groups.

3.0691. Among representatives of any race and any nation, there are always «adherents and supporters» of various signs combinations peculiar to some sub-kinds, kinds, and sub-types of the lluuvmic birvulyarity type. Why do we highlight only conjunction of high-sensual Intellect and high-intellectual Altruism among all the multitude of these combinations? *Firstly*, because conjunction of exactly these two signs is available for our analysis and logical comparison, in our Perception system, with the characteristics of other protoformal Directions where the lluuvmic combinations are impossible in the conditions of the current exuberation diapason.

3.0692. *Secondly*, namely they are geyliturgent to the most degree in relation to the Form-Creators' Focus Dynamics of our «future» dimidiomittense NUU-LL-VVU-Form-Types which are mostly resonational to the «Creative Cosmic Potentiality» State at the highest Levels of their creative manifestation (translucense NUU-LTTVULL-VVU-RS-Form-Types). This State is characterized as the first step on the Path of our mastering the lluuvmic birvulyarity type. *Thirdly*, the further evolvement and renitive cultivation of high-nutational SFUURMM-Forms from the combinations of HSI and HIA in the Focus Dynamics creates the most favorable opportunities for ampliative creative realizations of a «person» within the given sort of the humankind Collective Consciousness, and also for focusing in the most perspective conditions for his or her Existence in the given groups of «human» STCs.

3.0693. The basis for consistent resonational involvement, into the Focus Dynamics of any Self-Consciousness Form, of covallert interconnections, which are necessary for its creative realization (Synthesis) and peculiar to many different-Qualitative Form-Creators, is specific resonational-generating systems subterransively formed inside of each Integral Form of synthetic manifestation of Self-Consciousness in Space-Time (human Form is SSLUU-L-LUU, animal Form is LLART-T-LUU, herbal Form is SSKAA-KH-MOS, elementary particles' Form is OOML-A-ADD). This Form is also

called «manifestation body» (people identify it with «personality»). «Manifestation body» differs from Self-Consciousness Form, firstly, by the fact that the «body's» f-Configuration is structured sllloogrently-diffuzgently with f-Configurations of many different-protoformal Self-Consciousnesses Forms whose Form-Creators (including bio-Creators) take part to various degrees in implementation of the joint Focus Dynamics of «a person.»

3.0694. Secondly, unlike a Self-Consciousness Form, which may be considered by us arbitrarily, meaning, separately from any of diapasons of its possible manifestation, and only in conjunction with any Proto-Form, any of SSLUU-L-LUU can be analyzed by us just in conditions of some *local* exhibition of the given f-Configuration — in conditions peculiar to some *specific parameters* of Space-Time. Yet, the other qualitative characteristics of a «person» would match different parameters.

3.0695. The main «triggering» Mechanism allowing any «body» (that is, Self-Consciousness Form) to exhibit, at a corresponding «point» of Space-Time, a kind of Creative Activity which is inherent to the Form-Creators of its f-Configuration, is a system of very sophisticated energy-informational interconnections among Form-Creators of ILLGRII-TO-O (which is «Biopendulum» for biosystems) and SVUU-SLII which is «Impulse Ring» for biosystems) on one side and chakram transponders (GRUU-LLF) of Info-Creators of ODS — on the other side. The Form-Creators' Focus Dynamics of our SSLUU-L-LUU could not be carried out in any way without these interconnections (in the given diapason of exhibition!).

3.0696. Being initiated by *specific means*, certain particulars of those interconnections commence to be activated correspondingly. Owing to this, they stimulate resonationally, within the sllloogrent Focus Dynamics, exactly those Energy-Plasma states (different-Qualitative signs combinations) which are peculiar to some *specific* f-Configuration structuring the skrruullerrt system. As a result of every such initiation (quantum effect), there is qualitative liyllusceevization among activated interconnections combinations of the informational space of the given SSLUU-L-LUU and corresponding interconnections of Rezomirals of exhibition.

3.0697. For example, features combinations kleksed by VVU-Factor in a certain way, which are peculiar to PCQs ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence, were activated and resonationally liyllusceevated (that is, sort of «merged,» «blended» on many resopasons) inside a Focus Dynamics. Therefore, SFUURMM-Forms peculiar to humans would be initiated inside this Focus Dynamics. Additionally, subterransive parameters of localization of the given Focus Dynamics in Space-Time (that is, certain particula of sllloogrent NUU-VVU-Configuration, a «person») would fully comply with the character of the given Focus Dynamics's qualitative (informational) content (SFUURMM-Forms).

3.0698. Specifically organized DUU-LLI (karmic Channels of IISSIIDI-Centers structured with corresponding Factor axes and closely related to RRGLUU-VVU and FD of each of subterransive resonational-generating systems; all animals, plants, and elementary particles have corresponding analogs of DUU-LLI, ILLGRII-TO-O, SVUU-SLII, and GRUU-LLF) allow to perform thorough selection from the whole spectrum of focal interconnections which have more or less resonated to the given activity of SFUURMM-Forms. DUU-LLI move the Focus Dynamics exactly to the NUU-

VVU-Configuration where this creation has more real opportunity (as compared to the previous f-Configuration) to manifest through the Interest shown to the creation by certain «chakram personalities» — Form-Creators and Info-Creators of the IISSIIDI-Centers (or their analogs), which structure, with their creative work, f-Configurations of specific types and kinds of subjective Realities (of humans, animals, plants, elementary particles) in various Time Flows (or Time Fields — MOURSS-FULLG).

3.0699. I would point out that development scenarios of s-Realities, constructed by the Focus Dynamics of different, diffuzgent to each other, Proto-Forms, are sort of «packed» into each other by the degree of implementation of their creative capabilities depending on the dominating or oppressing force of Focus Dynamics of structuring them, Form-Creators in relation to the Form-Creators' Focus Dynamics simultaneously manifested in different scenarios of the same STCs' group. For example, in the given group of «human» STCs, specific Content of many scenarios formed within s-Realities of some animal kinds (or herbal, mineral kinds) depends to a great extent on the Focus Dynamics of separate people or on the qualitiveness of SFUURMM-Forms of society as a whole. These SFUURMM-Forms form «the human» type of subjective Reality: a «person» in a position of power or self-centered on greed can easily exterminate a whole population of animals or plants. In its turn, the specificity of development scenarios of people or all the human community in the given diapason of exiberation is strongly dependent upon development scenarios of s-Realities, for example, of many kinds of insects (locust, moths, mosquitos, flies, lice, bedbugs, fleas), spiders, ticks, worms, clams, mushrooms, and microorganisms (viruses, bacteria) or upon the development scenarios of our Planetary Entity Itself.

3.0700. At the creative intersection of mutual Interests of Form-Creators of various diffuzgent Self-Consciousnesses Forms, firstly, there is their qualitative «recognition» (distinction) of each other by signs, really perceived by them, along with concurrent awareness and motivating of own and strange necessities, creative intentions (at the lowest levels, this always turns to open confrontation and submission of Interests of one species to another one). Only after creation of quite sophisticated mechanism of consistent annihilation of emerged tensors and finding common active point of application of joint realizational Interests, gradual *emerging* (from «*emergent*» — describing suddenly appearing resonational mutual growing of existing features) occurs of qualitative characteristics, peculiar to each of the interacting CCIs (or their Self-Consciousnesses Forms), along with appearance of synergistic or over-additive effect in their joint Form-Creators' Focus Dynamics (when, during coordinated cooperation of their FDs, their realizational opportunities exceed the amount of opportunities for their individual realization).

3.0701. As a result of the consistent covarlertness increase of energy-informational interconnections jointly carried out by Them, the degree of Their geyliturgentness on diverse signs also increases. So, at the more ampliative Levels of their Self-Consciousnesses' informational space, the transmutation process of SFUURMM-Forms of different-type CCIs happens towards a single synthesized TOO-UU-Entity (these CCIs represent characteristics of different-Qualitative OO-UU-Entities at depliative Levels). The TOO-UU-Entity's Focus Dynamics is implemented in the given exiberation diapason already on the basis of Existence Experience of different OO-UU-Entities' Form-Creators. At the lowest implementation Levels of SFUURMM-Forms of the TOO-UU-Entity originated in this way, in its Focus Dynamics, there is always some dominating Creative Aspect whose degree of manifestation

depends on how much the intensiveness of attributes of some of the Pure Qualities could neutralize (oppress) peculiar realizational tendencies of other OO-UU-Entities' Form-Creators.

3.0702. Such internal qualitative imbalance of interconnections encourages Form-Creators of the CCI's depliative Levels of the given TOO-UU-Entity actively to enter more and more deep energy-informational interactions among each other (for the purpose of annihilation of the originated tensorsness in various resopasons of Focus Dynamics) namely through the DUU-LLI whose vibrational structures more facilitate the implementation of the given invaderental attributes. Since creative Interests of all components of the given TOO-UU-Entity match fundamentally, so, despite of the current temporary predominance of attributes of one (or some) of the OO-UU-Entities, in every frequency of Its Focus Dynamics manifestation, there are consistent resonational convergence, active *solvation* (interaction by means of dissolution, diversification of attributes into each other), and concatenation of Form-Creators' f-Configurations of invaderental and vecsative features to some more or less levelled *emergent* state.

3.0703. All the above mentioned process of resonational «convergence,» «recognition,» realizational «motivating,» consistent «solvation,» and final «merging» of different-Qualitative sub-Aspects and Aspects in each of exhibition resopasons of slloogrent Focus Dynamics of the given TOO-UU is carried out step-by-step, svilgs-spherationally, sort of «in a new way» with each of the signs jointly interacting in the FD (considering already synthesized interconnections). As a result, one after another, Form-Creators of Each of the OO-UU, initiated for solvation, as if «absorb» signs of Form-Creators of the rest PCQs while being transmuted, through a jointly organized Focus Dynamics, to some third qualitative state which is completely different on its properties and abilities from the states preceding the given Synthesis Scheme.

3.0704. This way, as a result of multilevel resonational selection and multiple convergences of the Focus Dynamics of some TOO-UU-Entities with the Focus Dynamics of the other, there is amplificational perturbation of exhibition Forms of Form-Creators of diverse CCIs at the 3–4-dimensional diapason within the limits of wide spectrum of nutations peculiar not to a single, but to two OO-UUs. The latter equally (although, it seems to us differently) predominate in the Focus Dynamics of Every TOO-UU. This is what I mean by the term «*amplificational emergentization of Focus Dynamics.*»

3.0705. I remind you again that the Synthesis Process, as well as origination of all Form-systems of Macrocosmos, are implemented simultaneously throughout the whole diversity of slloogrent-duvuyllerrt Focus Dynamics of different-Qualitative Form-Creators. That is why you should take and understand the above mentioned sequence not literally («something originates something another gradually»), but just as an involuntary tribute to powerful inertionness of the Form-Creators' Focus Dynamics from the lowest Levels of Energy-Plasma; these Form-Creators initiate and model various extents of illusory manifestation of Space-Time inside our Perception systems. Sequentially-simultaneously synthesizing Creative Experience over all the Twelve Galactic «Sectors,» We embody absolutely all kinds of Forms of Self-manifestation of the Highest Cosmic Intelligence of the given Universe (DDIIUYI). At the superior Levels of Our Cosmic Self-Consciousness (AIY-YA), we converge Our Focus Dynamics absolutely and holistically to FDs of all the remaining realizational

Self-Consciousnesses Forms and different-type CCIs generated and transgressed to the UPDR by the DDIIUYI-Entity's Collegiate Cosmic Intelligence — AYFAAR.

3.0706. Noticing that the DDIIUYI-Entity (integral amount of Focus Dynamics of all SVOO-UU- and TOO-UU-Entities which structure all the qualitative exuberation Levels of the 36-dimensional Universe in the current birvularity type), AYFAAR (the DDIIUYI-Entity's Highest Collegiate Intelligence), and YYU-II-USSLI-II (the Primogenitive Transcendent Constituent — PTC) represent (within the current exuberation hyperdiapason of the Macrocosmos's FD — to ± 36 dimension!) a certain Creative Principle of triple (only in our subjective-limited mind; indeed, Each of the three Components of this Principle is originated by the countless number of Reasons!) functional Form-making and simultaneous appearance of sllloogrent f-Configurations of Universal Cosmic Entities in the holistic subjective skrruullerrt system of Macrocosmos.

3.0707. In the given hyperdiapason of dimension, this Principle reflects the «projections» of the Main Universal Form-making Mechanism, which organizes and provides energy-informationally the amplificational basis for immanent manifestation of all transitional Self-Consciousnesses' states of any SVOO-UU- and TOO-UU-Entities. It determines collective Principles of their Existence (birvulyart tendencies, peculiarities of Synthesis Schemes, svilgs-spherational sequence in Focus Dynamics, and many other things) as well as all means of Their possible creative realizations in all infinity of interconnections among duvuyllerrt Forms of Universes of the current type.

Chapter 5. Characteristics of the Primogenitive Transcendent Constituent

3.0708. Since it has already been written much about the DDIIUYI-Entity and Its Highest Intelligence (AYFAAR), in order to investigate renitively the Principles of their functionality, I am dwelling just on characteristics of the third Component — YYU-II-USSLI-II. Inside the sllloogrent structure considered by us (AYFAAR's Focus Dynamics and DDIIUYI's focal Configuration), this Transcendent Constituent provides the presence of all necessary to their joint creative manifestation, Form-«projections» of all infinite diversity of different-Qualitative signs combinations of the primogenitive Information State; these signs were originated and projected to the skrruullerrt system of Macrocosmos as the result of consummative (or post-mercavgnational) interactions among all Its balanced and imbalanced particulas.

3.0709. That is What stays outside Existence of every subjective Experience. That is What is on the other side of each of focally-inertially formed subjective Realities which is totally unknowable and incomprehensible in Itself for any researches by means of Mind because It represents the *objective* informational Basis for Macrocosmos of any type.

3.0710. In our subjective Conceptions, we can compare the PTC extremely conditionally to some highest *spiritual Origin* Which organizes the Level of Universal functionality defined by us — on

very primitive and limited signs — as «the most harmonious from all possible,» «divine,» «absolute» Level. So, a religious man would, most likely, determine YYU-II-USSLI-II as the «Holy Spirit,» while modern people would name It «the Universal Everlasting Origin» which qualitatively precedes the slloogrent Process of simultaneous manifestation of the SSS-Entity's Consciousness appearing as the f-Configurations and Focus Dynamics of Everything Being (that is, manifested Creation, the skrruullerrt system). Without the informational basis specifically coded in the PTC, neither AYFAAR (as VCCI), nor DDIIUYI-Entity focused by It simply could not be formed structurally and perform Self-Consciousness's Levels *jointly peculiar to Them* inside the Macrocosmos's Focus Dynamics.

3.0711. It must be noted that this Sound Cosmic Code (YYU-II-USSLI-II) is related only to the terms of the current exuberation hyperdiapason, as well as all other SCCs (AYFAAR, AAUUSMM, IYY-YAA-YY, DDIIUYI, NNILG-NNI, SSVAA-FAA, I-IFLOOLL-FOO, IYISSISSLIIY-SSS, OO-UUILLI-I-UULL, OOO-LLUI-O-OOLL-SS, and others). For different space-time exuberation conditions (and in different types of birvulyart combinations!), subjective «projections» of all these Cosmic Entities have different SCCs. For example, in the 48-dimensional gigadiapason, the Focus Dynamics of the Highest Cosmic Intelligence of AYFAAR eglleroliftively converges to the Focus Dynamics of Form-Creators of AULMNIYSS — VCCI of the 48-Qualitative Universal IYYYYUULLSSMI-Entity. In the 60-dimensional hyperdiapason, It converges to the Focus Dynamics of Form-Creators of SYYUILGSNAIYY — the Highest Intelligence of the 60-Qualitative Universal AYYALLDMAAYTS-Entity. By the way, for the same reason — meaning, due to different-Qualitativeness and different-protoformness of every f-Configuration of Self-Consciousnesses Forms focused by us — an objective content of the same frequency conglomerates is perceived by our «personal» Interpretations totally subjectively and subterraneously. Therefore, a specific meaning of the same SCCs is interpreted by each «person» differently, too.

3.0712. The PTC unites informationally all the skrruullerrt system of the Macrocosmos Highest Intelligence's Creation (SS-AYIYLG-SS-SS-AYY-SSS) to the Single slloogrent Whole duvuylerrtly structured with zillions of different-Qualitative Universes with their infinite-dimensional STCs, Conversums, and Universums. A thing modern scientists ascribe to *ether* (as some analog for vacuum) represents just immeasurably miserable part of properties and functions originated in Space-Time owing to the presence of This Component — the Primogenitive Transcendent Constituent — in the Focus Dynamics of every Self-Consciousness Form and CCI.

3.0713. In conditions of the 36-dimensional exuberation megadiapason of Focus Dynamics of the Highest Intelligence of AYFAAR, the PTC plays a role of the Universal Form-making Principle providing absolutely all opportunities for simultaneous manifestation of slloogrent f-Configuration of the 36-Qualitative (24 CCQs + 12 PCQs) Universal DDIIUYI-Entity. A thing defined by us as Photoreductive Ether is one of Form-structures by means of which the ethereal PTC-Potential is implemented in specific exuberation conditions of Self-Consciousnesses Forms from 3–4-dimensional diapason. It represents the UPDR informational structure. Owing to presence of that structure, different-protoformal types of CCIs are able to interact with each other informationally while the PTC facilitates appearance of absolutely all Self-Consciousnesses Forms and CCIs.

3.0714. Within the given (3–4-dimensional) megadiapason, This Principle is reflected through the TLAASSMA-A SCC characteristic only to It. The latter can be conditionally interpreted as an *Idiopathic T-Ingredient* (meaning, the *primary, objectively existing* for the given megadiapason; its short form is the IT-Ingredient) Which has neither Form, nor any numerical value since It supports simultaneously Focus Dynamics of an infinite multitude of different-Qualitative (different-birvulyart) Universal Highest Intelligences.

3.0715. TLAASSMA-A is Universal transcommunicational structures of the AYFAAR Highest Collegiate Cosmic Intelligence; these structures connect energy-informationally Its Creativity Sphere with Form-Creators from any Levels (including us) all over the megadiapason of simultaneous exuberation of our DDIUYI-Entity's Focus Dynamics (until 36th dimension). Owing to Their presence, the holochrone Process is performed of transgression-convergence of ethereal Information «projections» between Form-Creators' Focus Dynamics of Inter-Galactic Complex-Plans and Focus Dynamics of Cosmic Plan-Levels.⁵

3.0716. Through the infinite multitude of many-functional SSVA-SS-UU-systems («Channels») and ethereal structures of the Idiopathic Ingredient, all Galactic SSLOO-SS-SNAA-Creators of our DDIUYI-Entity's Secondary Illusion Focus Dynamics actively support energy-informational interconnection with SSUI-SS-SFAA-Creators of Its Primary Illusion Focus Dynamics (therefore, also with AYFAAR VCCI). All Galactic SSLOO-SS-SNAA-Creators integrate amplificationally Their Own Experience of Creative Self-realization into SSUI-SS-SFAA-Creators and qualitatively take from Them initial Informational encodings which allow SSLOO-SS-SNAA-Creators to unify continuously and «to upgrade» ampliatively Focus Dynamics of Their Own Self-Consciousnesses Forms. Thus, SSLOO-SS-SNAA-Creators simultaneously focus on the Levels of both Secondary and Primary Energy-Plasma.

3.0717. The IT-Ingredient differs from YYU-II-USLI-II in the more narrow range of functionality peculiar only to It (just like the Levels of «personal» Self-Consciousness differ from the Levels of collective Subconsciousness). However, we are talking exactly about TLAASSMA-A, because this is exactly It, Who defines all Focus Dynamics of the AIY-YYA-Entity. Lluuvvumic, goolgamaaic, and smiiysmaaiaic birvulyarity types converge exactly into the universal (aiyyaic) birvulyarity type of the AIY-YYA-Entity (other functions of the IT-Ingredient are reflected through different particulars of YYU-II-USLI-II). In its turn, in conditions of the Secondary Energy-Plasma, TLAASSMA-A delegates functions peculiar to It to zillions of different-Qualitative PTC-versions — SSMIYSMAA-A (a *Transcendent S-Ingredient*, shortly — TS-Ingredient), and in conditions of the Tertiary Energy-Plasma It delegates Own functions to zillions of GOOLGAMAA-A (the *Immanent G-Ingredient*, shortly — IG-Ingredient). Due to their presence in the Focus Dynamics, all mentioned States of Energy-Plasma function as the Single Whole.

3.0718. Thus, neither the Source of Focus Dynamics generation of the Universal Highest Intelligence (SSUI-SS-SFAA-Creators of the AYFAAR HCI), nor the SSUU-SS-VUU-Sphere of Cosmic Creativity of SVOO-UU- and TOO-UU-Entities (of the DDIUYI-Entity) are Those all-uniting Factors Which stipulate the Superior Concept (Sense) for manifestation of Universal Creation within the

given (3–4-dimensional) megadiapason. Yes, the presence of some *signs* (creative tendencies) and certain peculiarities of the Universal Highest Intelligence inside the Form-Creators Focus Dynamics provides Their choices — depending on the degree of urgency of Interests implemented by Them — with opportunities of *selective* orientation in all the diversity of multipolarizational development Directions and birvularity types.

3.0719. Universal creation objectively reflects only the specificity of appearing during that Process, focal Configurations of energy-informational interconnections generated among Form-Creators and structuring the skrruullerrt system. Informational basis for implementation of each of these interconnections is provided due to presence of such Universal Compound as YYU-II-USSLI-II inside the UPDR. I would even say that the PTC performs «mediatory» service among Form-Creators' Focus Dynamics (dissonational, meaning, consummative Information particulas) and «aspects-composition» functions of Info-Creators Which reflect resonationally the primogenitive (absolutely balanced) State of Information in every part of Focus Dynamics of Creation.

3.0720. At the level of Existence of NUU-VVU, LLUU-VVU, and either Proto-Form within the 12-dimensional megadiapason, the role of that Factor is played by GOOLGAMAA-A (the IG-Ingredient) Which provides all necessary functions of the PTC in the given exhibition regimes and determines absolutely all realizational opportunities for the SLAA-SS-MII-Creators' Focus Dynamics. Within conditional limits of the 24-dimensional megadiapason, the same functions (though, at the more ampliative Levels) are carried out by SSMIYSMAA-A (the TS-Ingredient) for of SSLOO-SS-SNAA-Creators' Focus Dynamics. Within the conditional limits of 36-dimensional Universal Creation, TLAASSMA-A (the IT-Ingredient) provides SSUI-SS-SFAA-Creators with all required Information. Exactly SSUI-SS-SFAA-Creators fill and animate with Themselves absolutely all qualitative manifestation features of the AYFAAR Highest Intelligence in Their Universal Creation.

3.0721. Thus, none of GOOLGAMAA-A, SSMIYSMAA-A, or TLAASSMA-A are related directly to the Macrocosmos's Form-structures — these are differently functional particulas of the *cognitive* Principle inherent in the primogenitive State of Information implemented through the amitsissimal Information State. These Ingredients perform functions on providing general sustainability among all energy-informational interconnections which simultaneously support these States (by means of simultaneous annihilation of every *post-mercavgnational* — meaning, consummative — expressions). Without their participation, no one Self-Consciousness Form or Collective Cosmic Intelligence could be *focally* implemented anyhow (that is, to Exist as a part of Creation). Figuratively, these Ingredients can be compared with some Universal Informational Flows which acquire own features and functions only at the moment of appearance of qualitative «movement» of Focuses (meaning, Focus Dynamics). This is the main feature of the Universal Plasmic-Differentiational Radiation. If there is the UPDR, there are opportunities for the PTC activation. No UPDR, no PTC.

3.0722. People used to put a part of properties and peculiarities of the IG-Ingredient Focus Dynamics (GOOLGAMAA-A) in the notion of a«Soul.» Specific realizational functions of this Ingredient gather the creation of SLAA-SS-MII-Creators of the infinite number of Proto-Forms of Self-Consciousnesses to the holistic and integral system of different-dimensional and different-Qualitative energy-informational interconnections. Through the IT- and TS-Ingredients

(TLAASSMA-A and SSMIIYSMAA-A), these interconnections provide opportunities for amplificational realizational manifestations of even more Self-conscious Forms of Unity while these manifestations are simultaneously implemented at various Levels of the Universal Entities' Focus Dynamics.

3.0723. The most interesting thing for us lies in the fact that the GOOLGAMAA-A-Ingredient is not tied to a Form completely since every interaction of Self-Consciousness Form-Creators' Focus Dynamics with the IG-Ingredient is carried out by the Resonation Principle: what particula of the joint birvulyarity (that is, an integral for all covarllert birvulyarity types) IG-Ingredient peculiar to the current diapason is chosen to establish the highest resonation of SFUURMM-Forms of your Focus Dynamics that Self-Consciousness Form structuring the given particula is chosen by Your USCF to self-identify with as «itself.»

3.0724. However, in peculiar to us subjective Perception systems, it is just impossible either to determine, or to differentiate (to separate) the interaction Spheres of SLAA-SS-MII-Creators' Focus Dynamics with the PTC-Ingredient corresponding to them. These Spheres are simultaneously performed through lots of *focal* Configurations, so, when talking about the GOOLGAMAA-A-Modus, I have to treat subjectively all possible different-protoformal manifestations and interconnections provided with features of the given IG-Ingredient, as a certain conditional Cosmic Entity structured with joint covarllert Focus Dynamics of Form-Creators of the infinite amount of CCIs' Self-Consciousnesses Forms diffuzgent to each other. That means, despite of the fact that the IG-Ingredient represents an ethereal structure, we can consider all Its manifestations in the skrruullerrt system of Macrocosmos in the only way — through the Form-Creators' Focus Dynamics.

3.0725. Namely for this reason, in order to manipulate our Conceptions comfortably, we have to endow all ethereal Ingredients with the features of *as if* Cosmic Entities (similarly, the 12 PCQs transform subjectively to the 12 different-type OO-UU-Entities inside our Perception system). It all reminds me a talk of a particular individual: it is impossible to imagine any «person» irrespective of his or her *existence* or inspiring Sense (so-called «Soul») since, otherwise, we would have to link to totally another exhibition Form (the dead body — the environment for Self-Consciousnesses Forms of protozoa and microorganisms, molecules and atoms). Outwardly, it keeps its similarity to a «person» for a while, yet, it has no relation to characteristic vital creativity.

3.0726. This is also the case with the GOOLGAMAA-A-modus: speaking about the interconnections results peculiar to the given IG-Ingredient, which are expressed via particularly examined by us focal Configurations in various Space-Time regimes, we will always *conditionally* imply a certain Cosmic Entity. Via Creative Activity of this Entity the extra-additive (meaning, more than summarized) synergetic effect manifests, which refers to resonational interaction of Focus Dynamics of different-Qualitative Form-Creators of the CCIs countless number structuring diverse birvulyarity types.

3.0727. As a result of such slloogrent effect appearance, all multidimension of simultaneous manifestation of the Tertiary Energy-Plasma Space-Time is structured duvuyllerrtly-diffuzgently by Focus Dynamics of the countless number of different-Qualitative Self-Consciousnesses Forms, which we define as Proto-Forms of GOOLGAMAA-A or Primary Causes of exhibition of the Energy-

Plasma Tertiary State (Stars, Planets, people, animals, vegetables, microorganisms, molecules, atoms, fermions, bosons, and also sub-elementary, super- and hyper-universal Self-Consciousnesses Forms).

3.0728. Focal Configurations of all these Proto-Forms, duvuyllerrtly-diffuzgently transforming to each other with peculiar to them, interconnections both in each of diapason and in each of conversum Levels, differentiate and diversify specifically only in narrow-specific conditions of subjective Perception different-Qualitative systems, which are subterraneously peculiar to every Form-Type of every Proto-Form. These f-Configurations form in such way infinite multitude of Rezomirals varieties (Stellar, Planetary, flora- and fauna-generating, molecular-atomic ones, and so on) and types («octahedral,» «hexahedral,» «dodecahedral» ones, and so on) of different Level SLAA-SS-MII-Creators simultaneously-multidimensional manifestation.

3.0729. For example, in this dimension diapason, it is just impossible to draw more or less clear lines between human and many other — animal — Proto-Self-Consciousnesses Forms on the level of energy-informational interconnections, which diffuzgently structure Focus Dynamics of their Form-Creators . That's because the same Form-Creators, realizing simultaneously in various sub-Schemes and Schemes of intra-Qualitative and inter-Qualitative Synthesis and creatively organizing themselves via various combinations of the *same* sub-Aspects or Qualities Aspects, simultaneously manifest in Space-Time various regimes (including those ones, which are generated by different dimension types) in the way of Self-Consciousnesses Forms strongly differing between each other.

3.0730. Thus, concurrently with this and not less actively than in Focus Dynamics of our mixtum NUU-VVU-Form-Types, Form-Creators of Dominants lluvvumic pair (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) are occupied also with sequential implementation of all possible two-invaderental sub-Schemes and Synthesis Schemes typical to many other animal Proto-Forms, which manifest simultaneously with us in 3–4-dimensional diapason diverse conditions. For example:

ALL-Love–ALL-Wisdom + ALL-Primordiality–ALL-Initiality;

ALL-Love–ALL-Wisdom + ALL-Mobility–ALL-Presence;

ALL-Love–ALL-Wisdom + ALL-Knowledge–ALL-Informedness;

ALL-Love–ALL-Wisdom + ALL-Aspiration;

ALL-Love–ALL-Wisdom + ALL-Unity;

ALL-Love–ALL-Wisdom + ALL-Steadiness–ALL-Stability;

ALL-Will-of-ALL-Intelligence + ALL-Integrity;

ALL-Will-of-ALL-Intelligence + ALL-Essentiality–ALL-Permeability;

ALL-Will-of-ALL-Intelligence + ALL-Abundance–ALL-Fullness;

ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Vacuumness;

ALL-Will-of-ALL-Intelligence + ALL-Unity;

ALL-Will-of-ALL-Intelligence + ALL-Steadiness–ALL-Stability and many other variants.

3.0731. In each of the more amplificational exuberation Levels based on 3–9-invalderental Synthesis Schemes, all energy-informational interconnections (synthesized «earlier» signs combinations) between different-Qualitative different-protoformal Form-Creators, which have been synthesized by them concurrently in various Schemes, also resonationally-diffuzgently solvatizes among each other increasingly (meaning, geyliturgently as if «inter-dissolve» in each other), while reorganizing and transforming to the more universal Self-Consciousnesses Forms of the new, still more complex birvularity types structured by more covarllert interconnections. In the 12–13-dimensional diapasons Levels, all these signs combinations acquire *relative* steadiness and equilibrium constituting the basis for GOOLGAMAA-A-Ingredient slloogrent Quintessence.

3.0732. It should be noted that, *objectively*, all qualitative (informational) basis, required for implementation of the overall Focus Dynamics of SLAA-SS-MII-Creators in the *given DDIUYI-Entity* f-Configuration, is provided by availability of the unified and overall Immanent GOOLGAMAA-A-Ingredient, whereas all possible SFUURMM-Forms are created in *subjective* Perception systems of Self-Consciousnesses Forms and CCI's structuring different-Qualitative Form-structures of the given megadiapason (to 13th dimension). These SFUURMM-Forms concern the presence of the countless number of different-type GOOLGAMAA-A-Ingredients, and also Planetary, Stellar, Galactic, and Universal Entities initiated by them to exuberation.

3.0733. Such illusive Conceptions are realized in various Self-Consciousness Levels of all possible Proto-Forms because of the typical feature of any Focus of Close Attention (or its ampliative analogs) to accentuate only on the qualitative difference between something known and something, which is still under-synthesized for Form-Creators of the given Self-Consciousness Form, meaning, which is unknown in all its complexity and universality. Therefore, sometimes, to facilitating explanations of something (especially, when there is a comparison of Focus Dynamics of the two or several Planetary, Stellar Entities) I *still* have to use such subjective Conceptions.

3.0734. You have to renitively comprehend and understand that there is no such multidimensional «point» in Space-Time of our Universe and there is no such among Its countless Self-Consciousnesses Forms (or s-Realities, STC types), where functions of three PTC-Ingredients would not manifest slloogrently in one kind or another, by one way or the other. This means that specific signs of subjective Self-Consciousness are *objectively* inherent in every Form of exuberation, whether boson, fermion, molecular complex, «black hole,» or Universe.

3.0735. Owing to the universal resonationally-concatenational properties of this Forming Principle (and also supplement to It functionality of the other Cosmic Laws and their Principles!), every version of subjectively considered by us Collective Cosmic Entity (whether «subject» or «object»), despite of our interpretation, is always «Everything manifested simultaneously in Everything.»

At that, objectively, there is no question about any «beginning» or «end» of Its Focus Dynamics manifestation, because All This — always and at once — is qualitatively «projected» in Macrocosmos slloogrent skrruullerrt system to all exhiberation Levels having ability for simultaneous (though, subjectively-successive!) fixation of Focus Dynamics in the more amplificalional among qualitative states peculiar to this Macrocosmos.

3.0736. Hence, there is no and cannot be such «place» or such state anywhere in the whole Universe, where «you» could have definitely «ended,» «disappeared» (*not* as NUU-VVU- or LLUU-VVU-Self-Consciousness Form, but as self-conscious structural Element of Everything) out of Focus Dynamics of Form-Creators of Macrocosmos the Highest Intelligence, because all infinite multitude of You, Who represent Universal Self-Consciousness Focus (particular Form-Types and «personal» Interpretations of Your slloogrent Stereo-Form transforming duvuyllerrtly-slloogrently to Macrocosmos f-Configuration all Levels) — Are them, and all degrees of their creative manifestation Are all possible Forms of You generated correspondingly in the diverse Space-Time conditions via subterransive features of subjective Perception different-Qualitative systems.

3.0737. Any of these versions of You is much «deeper» and more «universal,» than you could subjectively imagine, because, specifically and purposefully using zillions of different-Qualitative realizational Self-Consciousnesses Forms, You — simultaneously and self-consciously — exist everywhere, in every space-time exhiberation «point» of Energy-Plasma collective Creative Work, and qualitatively-successively organize Worlds' Form-systems, s-Realities, STCs, Conversums, and Universums absolutely all variety with own simultaneous USCF-Dynamics. At the same time, You do not face any restrictions on Your creative manifestation, whilst concurrently acquiring zillions of variants of «life Experience» from the whole countless multitude of own Form-Types.

3.0738. General Focus Dynamics of Form-Creators of all Your Form-Types (meaning, of Your Stereo-Form) manifests via slloogrentness particular part of Your GOOLGAMAA-A-Entity. Its Focal Configuration also represents energy-informational interconnections universal structure, which allows this Entity to manifest absolute subterransiveness in the countless number of Forms of Cosmic Creative Work peculiar to It. This universal structure is an essential functional part (*signum*) of the whole assembly of «the other» subjective GOOLGAMAA-A-Entities diversities, Who duvuyllerrtly generate a Single Whole through birvulyart combinations *various* types. Own personal qualitative features and realizational opportunities are typical to Each of these permanent Entities (in each of their exhiberation diapasons), which depend on specifics and Synthesis Schemes diffuzgentness types of the countless multitude of different-birvulyart CCI's, which summarily provide all Multipolarization of their subjective Focus Dynamics.

3.0739. I must point out that energy-informational interconnections specific combinations (Collective Conversum Fields-Consciousnesses) between Form-Creators of the countless number of the most covarllert between each other different-protoformal CCI's are amplificalionally generated, in fact, *in every conditional exhiberation diapason* of Focus Dynamics of SLAA-SS-MII-Creators of Tertiary Energy-Plasma. Equally specific focal Configurations of all subjective variety of *different-type* Universal Entities of the *given* exhiberation diapason are formed by Focus Dynamics of these CCI's Form-Creators . I deliberately underlined here the word «conditional,» in order to particularly

draw your attention to the fact that we always can subjectively consider Focus Dynamics only from the standpoint of a single dimension type, which is «ours» (meaning, subjectively «human»), and synthesized by invaderental focal activity of Self-Consciousnesses Forms of lluuuvvumic birvulyarity type (as regards 3–4-dimensional diapason, I would call it «*nuuvvumic*» type, because SFUURMM-Forms, which dominantly structure wave «human» STCs, qualitatively dramatically differ from the Contents of Focus Dynamics of subelementary, super-universal, and proto-universal STCs).

3.0740. You should never forget about the fact that Focus Dynamics of Form-Creators of the *other* protoformal Synthesis Schemes create — within Perception systems limits peculiar to their Proto-Forms! — the *other* vibrational diapasons types in *sort of the* same Space-Time «localization points,» which we particularly consider from the standpoint of the Synthesis Scheme peculiar to our Perception systems. These diapasons types are structured with completely different qualitative dimension parameters, which could be expressed, concerning «our» dimension type, via as much as «lesser» or «bigger» indices.

3.0741. Thus, «our» 3–4-dimensional diapason could be subjectively assessed in the Perception systems of various Proto-Self-Consciousnesses Forms as 0–1st, or 1–2nd, or 2–3rd, or 4–5th, or 5–6th, or 10–11th, or even higher (or lower) dimensional one. This subjective difference in different-protoformal Perception systems depends on not only covarlertness or imperseptness degree of the signs combinations typical to «their» and «our» Synthesis Schemes, but also on energy-informational interconnections organization specifics in the combinations themselves, which can reflect to the more or less degree — *in the same vibrational conditions!* — various amplificational trends in the surrounding reality structures.

3.0742. For the sake of clarity in your already very conditional and shallow Conceptions about Universes in general and about DDIUYI-Entity in particular, I have identified these *diapason* (meaning, formed in manifestation conditions of conditional boundaries of one vibrational diapason) categories of Collective Cosmic Intelligences specific combinations not as «Universal Entities,» but as already earlier mentioned by me Collective Conversum Fields-Consciousnesses representing integrals of Focus Dynamics of different-protoformal Form-Creators in each of diapasons dimensions:

OURTTUKHKHS-Field (0–1st dimension),

DROUOLLFFL-Field (1–2nd dimension),

DLUGLLEMM-Field (2–3rd dimension),

UPDUYKK-Field (3–4th dimension),

SSMAYK-AYKK-Field (4–5th dimension),

IILLAY-Field (5–6th dimension),

FRAMMAUSS-Field (6–7th dimension),

AKHBAKKUUY-Field (7–8th dimension),

IIFYFULL-Field (8–9th dimension),

IRTTAMLANG-OFFM-Field (9–10th dimension),

VIALLKHSSVIS-ORKH-Field (10–11th dimension),

PRAYYALL-KVARIS-Field (11–12th dimension),

YYUSSGMIILSS-YYUSS-Field (12–13th dimension).

3.0743. Notably, one can also subjectively single out specific CCIs combinations in sllougent different-protoformal Focus Dynamics of Form-Creators of each of these conversum Fields-Consciousnesses, Which harmoniously inter-balance realizational trends of many different-Qualitative Proto-Forms in exhibition diapasons peculiar to them. These CCIs combinations represent different Directions of convergentional solvation of many birvularity types in the given Space-Time conditions, with generation of the joint, most covallert Form-structures (as if subterransive Interpretations of diapason Universal Entities).

3.0744. For example, the whole amount of interconnections with various Proto-Forms CCIs, which is the most possible for lluuvvumic birvularity type in 4–5-dimensional exhibition diapason (lluuvvumic birvularity type is not organized yet in the 3–4-dimensional Conversum of UPDUYKK-Field that is, *before* «CC Potentiality» State Synthesis occurs) represented in FD of SSMAYK-AYKK-Field Form-Creators, is implemented via Focus Dynamics of FLAKGLAAYK-Field FLAKS-Creators (4–5th dimension); in the 5–6-dimensional Conversum, the more amplificational lluuvvumic trends are provided by FUAYYFF-MEYR-Field Form-Creators ; in 6–7-dimensional — by RANDAALL-TAYR-Field; in 7–8-dimensional — by PAYLAVVP-KHAYP-Field; in 8–9-dimensional — by RAYKHTVALLT-PAAS-Field (further, lluuvvumic type «reprojects» into lluuvvumic-goolgamaaaic and goolgamaaaic birvularity types).

3.0745. Typical manifestation energy parameters of Focus Dynamics of Form-Creators of Each of these conversum Fields-Consciousnesses correspond qualitatively to the particular combinations of all multitude of informational «projections» initiated out of primogenitive State with the help of GOOLGAMAA-A-Modus. Meaning, stable combinations of Energy (Focuses) with Information have opportunity to realize in Space-Time conditions only via Focus Dynamics of the particular Fields-Consciousnesses: the whole variety of synthetic creative work, which is possible, for example, for SSMAYK-AYKK-Field Form-Creators (4–5th dimension), can in no way manifest via Focus Dynamics typical to Self-Consciousnesses Forms of UPDUYKK-Field (3–4th dimension), and vice versa. The opportunities of SSMAYK-AYKK-Field Itself can in no way manifest in conditions of Focus Dynamics of IILLAY-Field Form-Creators (5–6th dimension), and vice versa.

3.0746. In each case of Focus Dynamics «reprojecting» from one exhibition diapason to another diapason, strong deformation of stable interconnections takes place — either their differentiation

on the less covallert combinations, or their convergence to the more amplificational types — which dramatically changes f-Configurations of the previous SFUURMM-Forms in accordance with parameters peculiar to Focus Dynamics of Universal Entity of the other diapason (to conversum Field-Consciousness).

3.0747. Notwithstanding the above, for the more convenient operating with terms and notions, I classify the whole infinite multitude of Universal Entities varieties, Who successively «reproject» own Focus Dynamics into slloogrent FD of 36-Qualitative (24 Combined Qualities solvate together with each of the 12 PCQs in the Synthesis Direction priority for the given Type: ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) Universal DDIIUYI-Entity in the following way: 3-Qualitative UPDUYKK-Universes (two Dominants prerogatively synthesize with the most covallert PCQs), 6-Qualitative FRAMMAUSS-Universes (5 Dominants + 1 PCQ), 12-dimensional YYUSSGMILSS-YYUSS-Universes (11 Dominants + 1 PCQ), 24-dimensional YI-LLI-IYLL-Universes (selective solvation of each of the 12 PCQs with each of the most covallert PCQs). We will conditionally define all other different-conversum Universes (from 1.0 to 4.0; from 4.0 to 7.0; from 7.0 to 13.0; form 13.0 to 25.0; from 25.0 to 37.0 dimension) as «Inter-Universal Entities.»

3.0748. In 3–4-dimensional diapason, qualitative differences between Focus Dynamics of Form-Creators supplied by the whole multitude of GOOLGAMAA-A-Modi different-protoformal interconnections manifest rather clearly (for our Perception systems!) on the level of the obvious difference between Self-Consciousnesses Forms and Collective Cosmic Intelligences types of *physical Globes* («material» Creativity Spheres) of Planetary, Stellar, Galactic Entities, Who structure slloogrent f-Configuration of the infinite number of 3-dimensional UPDUYKK-Universes of DDIIUYI-Type.

3.0749. In the more universal conditions of the flaks-vuolds 4–6-dimensional diapason, the definite particulas of f-Configurations of Form-Creators of the Highest Intelligence of 3-dimensional UPDUYKK-Universes (from 0.0 to 4.0 dimension) converges geyliturgently to the more general to them synthetic Forms of CCIs, Which differ to Each Other by already much less number of the signs peculiar to them due to covallert concatenation of many different-protoformal birvulyarity types (in these conditions, the Highest Intelligence of all possible variability of CCIs of 6-dimensional FRAMMAUSS-Universes of DDIIUYI-Type consolidates).

3.0750. Starting from 6-dimensional megadiapason, this synergetic process of geyliturgent concatenation of different-Qualitative particulas of different-birvulyart CCIs into the united system intensifies strongly (due to emergence effect growth) and continues until the particular stage of inter-birvulyart (between birvulyart multitudes various types) solvation occurs in 11–13-dimensional diapasons and Focus Dynamics of united the Highest Intelligence of 12-dimensional YYUSSGMILSS-YYUSS-Universes of the *given Type* is formed. This Focus Dynamics should converge absolutely all energy-informational interconnections between Tertiary Energy-Plasma SLAA-SS-MII-Creators of the *given DDIIUYI-Entity* into coordinated Focus Dynamics of all Proto-Forms. It is informationally initiated by Creative Activity of GOOLGAMAA-A-Modi all multitude structuring this exhiberation megadiapason of Macrocosmos HCI FD and supplying it (this slloogrent FD) with *corresponding* Information particulas.

3.0751. What kind of *certain* particulas are those? of course, there is nothing to say about some *objective* partiality against the background of extremely subjective and conditional character of mental-sensuous manipulations realized by us; but if I will not try to put this elusive coherence and slloogrentness of the surrounding reality (Energy-Information) still completely inconceivable by you into Conceptions apprehensible to you, there will not be anything for us to consider. Hence, I continue to subjectively model abstract UU-VVU-Forms into the more or less particular SFUURMM-Forms and to adapt them to Form-shapes already known to you with the hope that their slloogrent Configurations deeper Levels will become more accessible to you once.

3.0752. It should be noted also that Focus Dynamics of the Highest Intelligences of Universal Entities of the *other types* is supplied by qualitatively other informational «blocks» in exhibition diapasons peculiar to them (meaning, «blocks» generated by the other GOOLGAMAA-A-connections). In slloogrent Focus Dynamics of Form-Creators of skrruullerrt system structuring integral f-Configuration of Universal Entities of *absolutely all birvulyarity types* in the 12-dimensional megadiapason of Macrocosmos (DDIIUYI, SSYY-ILFFST, PPAAL-TT-UUYF, LEMMS-GARLLD, RULLS-A-NNILV, YGUR-O-RMIIYN, SFF-AA-YNTALL, IYASSANFLATTU, and the infinite multitude of Universal Entities other types), these informational «blocks» also ultimately duvuyllerrtly-diffuzgently combine into the United Immanent GOOLGAMAA-A-Modus of Macrocosmos HCI Focus Dynamics, Which has Its Own SCC — RIISSTDRRAALLMAA-A. But when we talk about Focus Dynamics of Form-Creators of Tertiary Energy-Plasma various Levels peculiar to our Universal DDIIUYI-Entity (because we do not know qualitative characteristics and Laws of the other Universes), we will use only one term — GOOLGAMAA-A.

3.0753. As already mentioned, Focus Dynamics of each of conversum Universal Entities listed above represents integral of Focus Dynamics of Form-Creators of absolutely all protoformal CCIs (and their Self-Consciousnesses Forms) simultaneously structuring all STCs of the given exhibition diapason. Informationally, this Focus Dynamics is provided by «projective» Mechanisms of the corresponding particular Modi of United Immanent GOOLGAMAA-A-Ingredient. In the specific case of Universal UPDUYKK-Entity and Focus Dynamics generated by It, such GOOLGAMAA-A-Modus providing Its Form-Creators with absolutely all Information particulas, which correspond to objective qualitiveness of different-protoformal SFUURMM-Forms of 3–4-dimensional diapason, is universal (to this Conversum of YYUSSGMILSS-YYUSS-Entity!) GAMALGORRAA-A-Modus — the actual Source of Existence of absolutely all Self-Consciousnesses Forms (Stars, Planets, vegetables, animals, minerals, fermions, and bosons) manifested simultaneously-concurrently in all Time Flows of this diapason.

3.0754. Metaphorically, one can say that GAMALGORRAA-A-Modus represents Existential Principle of manifestation (meaning, «Soul» in extremely primitive understanding) of all protoformal focal Configurations and all Focus Dynamics of Form-Creators producing this materiality type. In the boundary Levels, it duvuyllerrtly synchronizes with existential functions of LIIRTUULLAA-A-Modus of 2–3-dimensional doolls conversum DLUGLLEMM-Entity and with functions of SSIYULLSMAA-A-Modus of 4–5-dimensional flaks conversum SSMAYK-AYKK-Entity.

3.0755. Therefore, taking into account diffuzgent Principle of any dimension generation, one can say that, in real, Sphere of GAMALGORRAA-A-Modus informational functionality (as of all

other Modi of IG-Ingredient) is not strictly confined by one exuberation diapason conditions, but partially supplies Continuums and Conversums adjoining to it with necessary Information particulars, while duvuylerrtly «reprojecting» into Focus Dynamics of their CCIs. It is not possible to tell, how conditional boundaries of these informational functions can be expressed via particular dimension indices, because there is no subjective division of Information for the given Immanent GOOLGAMAA-A-Modus (as for all others) on different-protoformal Synthesis Directions — this is exceptionally the prerogative of Focus Dynamics of Form-Creators of Self-Consciousnesses Forms.

3.0756. GAMALGORRAA-A-Modus, in turn, is *informationally* structured by the narrow-specific Immanent GOOLGAMAA-A-Signum infinite multitude, which provide f-Configuration of the given Conversum with all possible informational functions via Focus Dynamics of Form-Creators of different-type CCIs. There are Stars (STSILLU-OFF-MAA), Planets (TAYSS-DDORS-MAA), animals (LLAISSMMA-A), vegetables (SSAALM-MAA), minerals (OOLLM-MAA), fermions (ARFF-ORST-MAA) and bosons (FFAOLL-FS-MAA), doollses (SSOLLAS-MAA), flakses (TASSILLU-URS-MAA) Immanent GOOLGAMAA-A-Signum. One cannot imagine all possible manifestations of these Immanent GOOLGAMAA-A-Signum informational «projections» as certain partial (tending to subterraneous isolating) multitudes having precise boundaries between informational functions fulfilled by them — Diffuzgentness Principle leaves possibility for any Information particulars to simultaneously realize in Focus Dynamics of Form-Creators of the given Conversum via the infinite multitude of f-Configurations structuring different-protoformal CCIs types.

3.0757. Thus, in this exuberation diapason, due to availability of the infinite variety of Immanent GOOLGAMAA-A-Signum diffuzgent by their functions, the *same* Information particulars can simultaneously — though, very differently! — realize in this Conversum via Focus Dynamics of Form-Creators of different-type Self-Consciousnesses Forms, such as: flakses and doollses, bosons and fermions, atoms and molecules, vegetables and minerals, animals and microorganisms, Planets and Stars.

3.0758. Further aggravation of transgression accomplished by us to GAMALGORRAA-A-Modus universal projective Mechanism functioning leads us to appearing in each of Immanent GOOLGAMAA-A-Signum of even more narrow-specific signs of informational interconnections between Focus Dynamics of different-Qualitative Form-Creators, which are conditionally restricted by f-Configurations of various Proto-Self-Consciousnesses Forms. For example, LLAISSMMA-A-Signum informational functions diffuzgently differentiate on much more partial varieties of informational functions, which are provided in Focus Dynamics of Form-Creators by of this Conversum by availability of the countless number of Immanent GOOLGAMAA-A-Sources representing Mechanisms of collective convergence of diffuzgently synthesized Experience inside of Focus Dynamics of some particular animals kind. The most interesting thing here for us is just one of these varieties, specifically, PRAALLU-LAA-A — Immanent GOOLGAMAA-A-Source of Humankind CCI (in particular, *people*) and other humanoid CCIs structuring Focus Dynamics of various Stellar Entities with own SFUURMM-Forms.

3.0759. All informational combinations narrow-specific multitude typical for PRAALLU-LAA-A-Source is presented — in all slloogrentness of mental-vital «projections» simultaneously generated

by It — by the infinite multitude of stereoformal (meaning, consolidated on the basis of cumulative Experience of one Stereo-Form) *FATTMA-NAA-A-Articles* — Continuum Existential Principles, which informationally supply Focus Dynamics of Form-Creators of all particular «personal» Interpretations (Form-Types) of one human Stereo-Form. Figuratively, this could be — although, very, very conditionally! — compared with such esoteric notion as «Soul of kin.» Yet, unlike Contents of the latter (its Essence is always considered just on the base of already existing Experience synthesized by many ancestors generations), *FATTMA-NAA-A-Article* of Each of human Stereo-Form is informationally structured with Experience of subjective Existence of absolutely all Its particular «personal» Interpretations holochronely manifested in Time Flows of both «the past» and «the future.»

3.0760. *FATTMA-NAA-A* typical feature is that all this subjective Experience is kleksed in Focus Dynamics of Form-Creators of the given diapason only by ALL-Love–ALL-Wisdom plus ALL-Will-of-ALL-Intelligence Synthesis Scheme including diffuzgent Experience all specific features, which is multipolarizationally synthesized in all possible protoformal development Directions of the countless number of NUU-VVU-Form-Types of this Stereo-Form. The most active initiators of this Experience are *ASTTMAY-RAA-A-Parvulas* — partially personified Existential Principles, which informationally provide concatenation of covarllert interconnections of every manifested human «person» into empiric Experience of subterransive Existence in many development scenarios.

3.0761. *ASTTMAY-RAA-A* is psycho-mental Existence Quintessence of any human Self-Consciousness Form. More or less pertinent comparison of «*ASTTMAY-RAA-A-Parvula*» term with Conceptions already available to you is esoteric notion of «Soul of a man,» availability of which in Focus Dynamics of Form-Creators of NUU-VVU-Form-Types allows any «person» to subjectively realize themselves in the surrounding reality as exclusive subterransiveness, as unique human being. Being projected to Focus Dynamics of the particular NUU-VVU-Form-Type, *ASTTMAY-RAA-A* does not allow Form-Creators of «person» Self-Consciousness to loose active and deep interconnection with *FATTMA-NAA-A*. It provides their Focus Dynamics with the most covarllert empiric and intuitive Experience synthesized in the other development scenarios by many other *duvuyllerrt* «personal» Interpretations.

3.0762. This different-Qualitative Experience «reprojection» Mechanism into Focus Dynamics of every «person» is *ASSTLLAA-MAA-A* — absolutely nonlocal Self-Consciousness structure thoroughly branched by informational interconnections peculiar to it, which provides steady generation of complex-configurational (multi-level and multi-vector) spheroidal-ray *beta*-impulse radiated by *GOOLGAMAA-A-Modus* to all space-time structures via «*Biopendulums*» of Self-Consciousnesses (*ILLGRII-TO-O*) of each of Proto-Forms. You know from textbooks that beta radiation is electron or positron corpuscular ionizing rays with continuous energy spectrum, which are produced at transformations taking place inside atomic nuclei.

3.0763. On the other hand, *iissiidiological* Knowledge treats radiation as one of the signs accessible to our subjective Perception, which characterize manifestation in various Space-Time conditions of results of Creative Activity of *uyyyuyyic* Fields-Consciousnesses representing ALL-Essentiality–ALL-Permeability Pure Quality in Focus Dynamics of Form-Creators . This PCQ provides Form-Creators with absolute universality and resonational accessibility of all energy-informational interconnections,

wherever they are simultaneously manifested in slloogrent Focus Dynamics of Macrocosmos's HCI. The fact that via iissiidiological Conceptions, you can obtain and subjectively adopt this highly unique and complex Information structuring SSS-Entity Self-Consciousness highest Levels, is a direct indication of importance of that specific UPDR constituent part for Everything Being, which we interpret as «radiation» (it also represents one of the necessary manifestation conditions of simultaneity Principle of Focus Dynamics of absolutely all Self-Consciousnesses Forms and manifestation conditions of that Information Creative Activity universal realization, which we define as photoreductive Ether).

3.0764. One should note that radiation is differently peculiar to all Self-Consciousnesses Forms, because it constitutes the radiative basis of all Existence. Scientists know around 1500 beta radioactive isotopes (although, there are incalculably more of them in the surrounding Cosmos). But not a lot of people know that human organism is in itself also radioactive, meaning, it constantly generates personal beta radiation, without which our normal existence could not be possible. Its source is radionuclides (potassium-40 and carbon-14), which get into our body far back at birth and continue constantly accumulate through our Focus Dynamics (interconnections with the surrounding reality). Besides that, all live organic matter, which we eat, like meat and vegetables, is also — albeit in minute quantities — contains radiocarbons. It is actually impossible to get rid of these radionuclides, and the same with the most important elements in our organism.

3.0765. Well, there is no need for this, because due to the background (both internal and external) availability of ALL-Essentiality-ALL-Permeability PCQ signs in our Focus Dynamics, ASTTMAY-RAA-A gives opportunity to Form-Creators of our NUU-VVU-Form-Types to constantly exchange between Each Other with Information necessary to them (to resonationally activate these or those interconnections with Form-Types of various scenarios via uyyyuyyic Fields-Consciousnesses), which is generated into Focus Dynamics of absolutely all Self-Consciousnesses Forms by United Immanent RIISDTRRAALLMAA-A-Ingredient (via all countless multitude of conversum GOOLGAMAA-A-Modi, and also their Signums, Sources, Articles, and Parvulas).

3.0766. Availability of ASTTMAY-RAA-A-Parvulas constant generative activity in Focus Dynamics of all Form-Creators of NUU-VVU-Self-Consciousnesses Forms provides them with virtually unlimited communicative abilities, which allow them to freely accomplish any inter-age, inter-prototypical, inter-formtype, and «postmortem» sorts of focal «reprojections,» and allows human «persons» formed by them (after release from excessive Focus Dynamics of all possible prototypical bio-Creators of physiological organism during moments of successive «postmortem» refocusing) not to connect subjectively to subterraneous characteristics of those NUU-VVU-Form-Types, which sequentially fall out of their concatenational Focus Dynamics. Thus, one can say that typical feature of each of ASTTMAY-RAA-A-Parvulas is their ability to initiate stable trend to geyliturgent solvation of already synthesized informational particulas (SFUURMM-Forms) in Focus Dynamics of all «personal» Interpretations of Stereo-Forms with the aim of forming more and more perfect Parvulas.

3.0767. Only actively and effectively interacting between Each Other, Focus Dynamics of Form-Creators of different-birvulyart GOOLGAMAA-A-Modi all multitude (via the Highest Intelligences of different-diapason Universes Types all multitude — from conditional 0-1-dimensional duvuyllerrtly

to 11–12-dimensional Ones) acquire abilities to form unified sllongrent Form-structure of Causal Plan-Overtone (AASMII-I) out of many ethereal and focal «projections.» This Plan-Overtone resonationally unites Creativity of SLAA-SS-MII-Creators of Secondary Energy-Plasma, Which Focus Dynamics are organized by SMIIYS-MAA-A-Modi countless number. In the same way, level-by-level, all these TS-Ingredients consolidate between Each Other (right up to 24–26-dimensional diapasons) via consecutive solvation of energy-informational interconnections of much more universal different-birvulyart combinations structuring DDIIUYYI-Entity sllongrent f-Configuration.

3.0768. Each of zillions of various realizational Form-systems of amplificational «training» of the Highest Cosmic Intelligence is structured with energy-informational interconnections of zillions of different-Qualitative Self-Consciousnesses Forms and CCIs, which consolidate in their f-Configurations — aspectably and invizusally for us, by some special signs combinations — covarllertly-diffuzgent interconnections of zillions of other Cosmic Entities, Which Focus Dynamics also functionally provide manifestation of United subjective Reality diverse Types and Levels. But at the same time, in HCI Self-Consciousness Levels, there is no such universal Mechanism, which could provide Focus Dynamics simultaneous orientation in absolutely all Forms of Its creative manifestation (meaning, which would allow some Form to subjectively realize both in the most depliative and the most ampliative Levels *at once*).

3.0769. In all variety of Focus Dynamics Multipolarization of any Self-Consciousness Form, there is always countless number of different-Qualitative Form-structures, Form-Creators of which mostly specialize in some realizational creativity Direction (usually representing some aggregate of diffuzgent different-Qualitative Directions).

3.0770. Your assumptions about the fact that HCI of any Level can simultaneously and equally *seize* (meaning, adequately realize and react) Focus Dynamics of Form-Creators of absolutely all megadiapason of own subjective manifestation are very illusive. Exactly because of that, there is subjective differentiation of Form-Creators by Self-Consciousness Levels and realization diapasons. In the particular limits, the comprehension process of the rest Multipolarization patterns becomes impossible because of generation of the state of strong imperseptness or cruvursorrtness in Focus Dynamics with respect to the certain particulas of potentially available interconnections. In such cases, Focus Dynamics transforms from coherent-multipolarized state, which is characterized by objectivity greater degree, to decoherent one that is, subjective state modelling illusion of subterransiveness and separativeness with Everything in Self-Consciousness.

3.0771. This Focus Dynamics property is typical both to all Self-Consciousnesses Forms and to Collective Intelligences structured by them, including also «the highest» degrees of their manifestation in some of objective space-time regimes. This steady dynamic state is the regular result of influence on Focus Dynamics of eglleroliftive Impulse-Potential, which initiates trend in it to continuous self-improvement, unshakable affectative Aspiration of Form-Creators of every Self-Consciousness Form to resonational reunion and qualitative solvation in conditions of even more harmonious focal Configuration. This property allows Form-Creators of any CCI type not to fix on the most depliative Levels of own Creative Work (leaving their realization and Synthesis to the less developed out of own «projections» all multitude), but to concentrate more on the most ampliative Directions of own

Creative Work to obtain ability of subterransive creative Self-Awareness in even more amplificational Levels. Metaphorically, «every god always wants to become even more significant god.»

3.0772. Usually, Form-Creators of every Self-Consciousness Form implement this process in the following way: when their «current» Focus Dynamics conditioned by VLOOOMOOT subterransive character has already exhausted all realizational opportunities built in the given NNAASSMM, the Synthesis of the most covarllert interconnections takes place in the definite resopasons, and as a result liyllusceve «merging» occurs between f-Configurations of these interconnections, which as if «restricts» the given Form total exhiberation diapason. Although, any kind of «restriction» (meaning, decrease of active resopasons quantity in Focus Dynamics) is out of the question, because — due to SFUURMM-Forms of synthesized resopasons — the most covarllert part of SFUURMM-Forms of the more qualitative among duvuyllerrt sub-Levels is activated in Focus Dynamics (which was passive before the Synthesis moment). This rises «the current» Potential of Creative Activity Focus of Form-Creators of Self-Consciousness «reprojecting» their FCA to the more amplificational modus of slloogrent f-Configuration.

3.0773. By own amplificational Essence, all «macrocosmoses» (TOO-UU), representing in turn «microcosmoses» (SVOO-UU) of the even more universal TOO-UU-Entities, are complementary for each other patterns of the united simultaneous Process of creative realization of Form-Creators of all Self-Consciousness Levels, which all-unite via Multipolarization of own Focus Dynamics in the countless multitude of synthetic birvulyarity all possible Directions. Cosmic races all varieties (cosmic civilizations unions by the signs peculiar to them) and CCIs Types, and also Self-Consciousnesses Forms and their Form-Types, structuring this Process with their Focus Dynamics, constantly transmute and «reproject» to each other while concurrently and multi-directionally «shifts» from some birvulyarity types to the others.

3.0774. And this happens always — infinitely-simultaneously, at once and within everything, in all different-Qualitative inertionness of the endless rotational Cycles, which duvuyllerrtly, rhythmically, and naturally alternate each other. Any Form of «one thing» never disappears anywhere, exists eternally and «reprojects» infinitely to duvuyllerrt states of something qualitatively different while successively-diffuzgently inter-transforming to each other and deeply inter-expressing (inter-reflecting) through each other.

3.0775. By means of self-realization of own SFUURMM-Forms, via energy-informational structures of the lowest IISSIDI-Centers two pairs (ARGLLAAMUNI and INGLIMILISSA, ORLAAKTOR and AIGLLILLIAA), SLAA-SS-MII-Creators of some civilizations actively participate in the Process of the overall Self-Cognition of the Highest Intelligence in the given exhiberation diapason due to own narrow specialization in improving those transformation mechanisms, which occur inside the cells and crystal lattices creating various realizational Proto-Self-Consciousnesses Forms (both mixtum and abiotic ones). The other Form-Creators creatively manifest themselves via functioning of the more organized Form-systems while focal-wise manifesting through peculiar to them wave structures (Self-Consciousnesses Forms and their Form-Types), which more or less qualitatively differ from the rest of Proto-Forms.

3.0776. Let me remind you that there is no Self-Consciousness Form, which represents «the pure» realization variant of Form-Creators of only one Synthesis Scheme. Focus Dynamics of Form-Creators of any birvulyarity type is provided by Focus Dynamics of the countless multitude of Form-Creators of the Synthesis Schemes diffuzgent to it, which represent in it peculiar to them birvulyarity types exhiberated in this dimension diapason. As regards Synthesis Scheme particularly examined by us, we consider all multitude of these f-Configurations as Proto-Self-Consciousnesses Forms, which secure realization of Form-Creators of the given Self-Consciousness Form. For example, FD of any of examined by us human «persons» is formed on the base of active realization of bio-Creators of its biological organism many systems starting from limbic system structures (the most important ones are amygdala, hippocampus, cingulate convolution) and ending with the other organs systems (urogenital, haematogenic ones, and so on).

3.0777. Consecutively realizing by so called «Papez circuit,» FD of bio-Creators of various Proto-Self-Consciousnesses Forms reflect specific states peculiar at the moment to bio-Creators of the fear and aggression, pleasure and aversion centers, and as a result, these of those psycho-emotional states (desires, intentions, aspirations, Conceptions) are formed in the «person» Perception system with various periods of creative realization (duration) peculiar to them. of course, in every particular case, the question on necessity of emergence in «person» FD of some of these states and its duration is regulated and corrected by gene Form-Creators (or rather, through them, by Creators-interpreters), Who launch realization mechanisms of all bio-Creators with the help of endocrine system Form-structures.

3.0778. That is, qualitiveness degree of realization of FD of Form-Creators of lluuvvumic Synthesis Scheme (simultaneously in all possible Directions of its Multipolarization via all variety of FDs of different-Qualitative «personal» Interpretations) directly depends on realizational activity of Form-Creators (and bio-Creators) of many Proto-Self-Consciousnesses Forms structuring biological constituent of NUU-VVU-Form-Types alternately focused by us. In turn, FD of any of these bio-Creators depends on availability and realization in it of FD of Form-Creators of molecular and atomic Proto-Self-Consciousnesses Forms, which are initiated by FD of Form-Creators of fermionic and bosonic Proto-Self-Consciousnesses Forms, and those ones — by Focus Dynamics of all possible Form-Creators of flaks Proto-Self-Consciousnesses Forms, and so on.

3.0779. As you see, it is virtually impossible to find exactly that realizational part in all this infinite consequence of focal-ethereal interconnections, which we could define with full confidence as «Focus Dynamics of the given person» (meaning, of the given Self-Consciousness Form) — in every instant, Focus Dynamics of any Self-Consciousness Form reflects a certain degree of realizational Creative Activity of Form-Creators of different-Qualitative Proto-Self-Consciousnesses Forms infinite variety.

3.0780. By the way, one should not particularly dwell on the difference imaginary to you in such subjective notions as «Form-Creators «and «bio-Creators» — I use such division for reference purposes only that you could easier and faster imagine, what it is all about, when we examine functioning peculiarities of all possible biological systems including also our organisms. In essence, in such — dissonational — Creators category, there are only *Form-Creators* (meaning, different-Qualitative Focuses, which simultaneously-eglleroliftively realize via all possible Energy-Information

consummative states), Who are holochronely exhibited in absolutely all Space-Time manifestation conditions, and Who, in fact, provide subjective presence of this Form-structure (Space-Time) in this Macrocosmos type by means of own focal Configurations diversity. And those active carriers of focal-ethereal interconnections, which we subjectively define — for convenience — as bio-Creators, are also represented as Form-Creators on the more subtle levels of organization peculiar to them. Thus, I urge you to clarify once and for all, finally, with these notions and not to be confused with them anymore.

3.0781. Functionally providing Focus Dynamics of your Self-Consciousness Form, every Proto-Self-Consciousness Form (cell, organ, or system) generates typical only to it vibration frequency. In such way, through each of Form-Types of your NUU-VVU-Form, the process of successive (in subjective Perception) improvement and multi-directional diffuzgent development of Collective Intelligences of many Proto-Forms of GOOLGAMAA-A-Ingredient are continuously accomplished. These Collective Intelligences acquire — via slloogrent Focus Dynamics of different-Qualitative Form-building Processes typical to the given Energy-Plasma diapason — the most valuable Experience, which they (simultaneously with this) use in the other Proto-Forms including not only people, animals, vegetables and minerals, but also Planetary and Stellar Entities all multitude.

3.0782. As I have already mentioned, Focus Dynamics of Form-Types of NUU-VVU-Forms focused by us represent integrals of Focus Dynamics of Form-Creators of DNA and RNA (svilgson-regulatory Creators-interpreters, Creators-modifiers, and synthesizing gene Form-Creators), and also of bio-Creators of the whole multitude of different-type Collective Consciousnesses of our organisms internal organs and systems (PLAAURFF). In biological Form-structure of our exhiberal bodies, the latter accomplish at least two tasks: sustain own temporary existence in the physical organism providing at that its learning on the part of the other Creators of Proto-Forms, and also support vital activity of our organism, in general, by means of the particular part of the energy-informational Potential (Experience) peculiar to them, while providing creative specialization diverse functions — protective, motor, nerve, respiratory, hematopoietic, reproductive, digestive, excretory ones, and many others.

3.0783. Numerous Creators of Self-Consciousnesses Forms of homogeneous cells (neuronal, muscular, adipose, sex, dermal, blood cells, and so on) form own types of Collective Cosmic Consciousnesses (CCC is the component part of any CCI type), which consolidate to the more complex Focus Dynamics of CCCs of bio-Creators of all organism cells (STOYI-LLI UORD-VUORD) produced by Focus Dynamics of Form-Creators of more developed groups of controlling CCCs, which organize cell functions of all systems and organs providing our biological organism life activity. I will note that for just the most primitive functioning of our biological system, continuous efforts of CCCs of Form-Creators presenting many cosmic civilizations are required. For example:

GRGLOYGLs and STOOYLISTRITs — curate creativity processes of all Form-Creators of CCCs of the digestive system organs including esophagus, stomach, appendix and duodenum;

TSMERIIRRGMs, RLOORGKs, and OOLDTMs — functionally direct activity of Form-Creators of CCCs of organs of urinary and excretory systems, and also of a part of Form-Creators of intestinal path CCC (straight, large, and blind intestines);

TSEFKTRs, LUURSFIDs, SPIILGSTs, and KROOYKLTs — responsible for creativity of Form-Creators of CCCs of haematogenic and cardiovascular systems.

3.0784. Collective Consciousnesses of the other cosmic civilizations (KLUUNKRDs — liver; POILLISes — gallbladder; TSMIYSes — hormone system; LLIIRTMs — vegetative system central part; TRAPPTKHTs — female genital system reproductive part; PTIURRs — male genital system reproductive part; TSKLSTs — right hemisphere; TROONFRDTSes — left hemisphere; KRIIRRs — cerebellum, and many others) play an equally important role in development and perfection of mixtum (not only carbonic!) different-protoformal Self-Consciousnesses Forms of many various systems of amplificational training of SLAA-SS-MII-Creators not only in s-Realities and STCs of the lowest GREIYSLIIS Globes (VUOLDTM, AAYLLILIESS, and GRIISSTMM), but also in Form-systems of CCIs of other Planetary and Stellar Entities of various development level.

3.0785. As you know already, as a result of «person Death,» after active creative functioning discontinuation of Focus Dynamics of Form-Creators of «the lowest» IISSIDI-Centers in «the current» NUU-VVU-Form-Type, their Focus of Close Attention *at the same instant* «reprojects» to Configuration of the next among duvuyllerrtly-covarllert Form-Types producing multipolarizationness Principle realization of the given Focus Dynamics. But also after the fact of «Death,» creative work of Form-Creators of many protoformal CCCs of diverse functionality levels continues no less actively, than it was realized before that: what you perceive as «decomposition,» «annihilation,» and «decay» of «the dead» physical organism, is indeed just the beginning of functioning of PRI-I-SSM-Creators of various Proto-Forms mixtum analogs (jointly with STOYI-LLI-, SSMMI-I-, DVOO-O-, and PIIKL-SS-OO-Creators) in the new creative regime.

3.0786. Such activity is the main kind of these Forms Creators creative work during laying the genetic foundation for generation of new qualitative diversities of not only NUU-VVU-Form-Types, but also many other Proto-Forms (including those, which equally with NUU-VVU-Forms also structure slloogrent LLUU-VVU-Configuration). Having lost the joint supervision on the part of the brain and DNA Form-Creators, Who guided the main functional processes in the live «person» organism, Form-Creators of Self-Consciousnesses Forms of many microorganisms organize and launch dissociation process mechanism of the entire contents of the body cells on the Self-Consciousnesses Forms of molecules (SSMMI-I SVOUFF-VV) and atoms (DVOO-O AIYKVOOF) comprising them. Form-Creators of these Forms following peculiar to them signs reunite again into specialized CCCs types, but now in the other realizational Forms. This takes place, for example, in SSKAAKHOOLLM («Vegetable Worlds»), in LARTTUURFF («Animal Worlds»), or in OOMLAADDODD («Substances and Minerals Worlds»).

3.0787. The phenomenon, which you directly interpret as somebody's physical «Death,» represents just only one among countless number of opportunities for active manifestation and realization of Focus Dynamics of Form-Creators of the other Self-Consciousnesses Forms, because these phenomena themselves serve in these Space-Time conditions as the main functional exuberation Mechanism of all subjective Realities *necessary* to form energy-informational basis for simultaneous co-existence of many other Proto-Forms initiated by GOOLGAMAA-A. These Proto-Forms should by more or less ampliative as regards structures of the Self-Consciousnesses Forms manifested «earlier.»

3.0788. After «reprojecting» Focus Dynamics to f-Configuration of another Form-Type, Form-Creators comprising physiological basis for conscious existence of the previous «person» reorient within the Interests peculiar to them (because inter-Qualitative Synthesis implementation Act has brought particular changes to the Focus Dynamics). They enter the new energy-informational inter-combinations among Each Other through karmic Channels of the new Form-Type and represent qualitatively new conditions with own narrow-specific activity for creative self-realization of bio-Creators of the hundreds of billions of cells functioning in an orderly manner.

3.0789. All Focus Dynamics of Form-Creators, providing Space-Time of molecular CCCs (various substances SVOUFF-VV-Entities), continuously and narrow-specifically model zillions of Form-Creators of atomic CCCs with own features, Whose Space-Time, in turn, is provided with FD of Form-Creators of elementary particles and photons. Qualitativeness of interconnections between them (covarllertness or imperseptness signs domination in them), actually, conditions what scientists define as substance molecules or atoms properties. At the same time, «internal» Form-systems providing manifestation effect of any among Creative Activity «points» of inter-atomic structures Form-Creators represent Creativity Spheres of zillions of Form-Creators of the super-universal Fields-Consciousnesses, Who are being even more developed and perfect CCCs.

3.0790. In this way, CCCs of all different-type bosons and fermions are «plenipotentiary Representations» or the whole Worlds' Form-systems consisting of numerous SLAA-SS-MII-Creators communities, Who organize own Cosmic Self-Cognition Process due to the active participation in the complicated form-building processes, which take place both in «the organisms» of any mixtum Forms and systems (cells) generating them and in any other abiotic atomic-molecular complexes. Behind aspectable (for us) creative activity of any Self-Consciousness Form — whether it be human, animal, vegetable, microorganism, or something interpreted by us as «natural phenomenon» — there are always invisible and invariable Focus Dynamics of the countless number of Form-Creators of all possible Cosmic Entities from the other multidimensional s-Realities providing fundamental existence of all Worlds' Form-systems produced by us on the level of dynamic manifestations of Self-Consciousnesses Forms of molecules and atoms, fermions and bosons, and also Focus Dynamics of the assembly of Form-Creators of completely different — *non-wave like* — Forms of doolls and flaks CCIs, which represent the authentic energy-informational basis of all our earth existence as NUU-VVU-Form-Types mixtum analogs.

3.0791. To form the more subjective, but yet more clear to you image in own Perception about the Essence of the realization process of peculiar to you Conceptions about yourselves and the surrounding you reality, I offer you to imagine that Collective Cosmic Entities numerous group has «projected» itself to the given type of human subjective Reality with the aim of not only overall cognition of specific features of those Energy-Plasma Levels, which are generated by Form-Creators of this group of duvuyllerrt Worlds' Form-systems of the GREIYSLIISS Planetary Entity, but to understand some sides and features of own Cosmic Essence via typical features of these Worlds. At the same time, representatives of each of the separate groups of these CCCs and CCIs have their own, peculiar only to them, specific ways and abilities for Self-Cognition process subterransive realization, which allow them to achieve the planned goal.

3.0792. For example, the most natural Form of Self-Cognition to some Cosmic Entity is what we used to call «ocean,» «sea,» «lake,» «river,» «spring,» «puddle,» — in general, «water.» Such way of creative realization is the most convenient and natural to It — by Its Own Conceptions about Itself. Functions, which are being fulfilled by the outer shell of our physical body, are provided to this Cosmic Essence by the world ocean; and all seas, lakes, and rivers are similar to the functions assigned in our biological organism to various internal organs and systems. All oceanic flows are «arterial and venous vessels» providing normal life activity for all «physical body» of this giant (by our standards) Entity, which is embodied via these Self-Consciousnesses Forms in these STC groups conditions. Rivers are extensive system of energy-informational balancing of Its «internal organs» (multiple lakes and seas). Besides that, This Collective Cosmic Entity actively realizes with the help of Self-Consciousnesses Forms countless diversity, which constantly change physical form of own realization (steam, fog, rain, snow, ice) and enrich Its Collective Consciousness with peculiar to them existence Experience in this s-Reality type, which sufficiently differs from the world Ocean, seas, rivers, and lakes CCCs Experience.

3.0793. Concurrently, but with features peculiar only to own Self-Consciousnesses Forms, various Form-Types of people and animals, vegetables and minerals, fermions and bosons implement the process of subterransive Self-Cognition «independently» and «separately» in this s-Reality type in the permanent joint interconnections with each other. In slloogrently-diffuzgent different-protoformal Focus Dynamics of the GREIYSLIISS Planetary Entity, each of these CCI is not better or worse than all the rest, because It performs rather particular and vital function in the global planetary physical organism. Naturally, each of Self-Consciousnesses Forms of these protoformal CCI has potentially active and much higher realizational Levels; but in specific conditions of this s-Reality type, All of them can manifest themselves only in *such* and no other way. Besides, in subterransive process of creative and throughout Self-Cognition, each of Self-Consciousnesses Forms of these CCI uses ways and realization methods peculiar exclusively to It, which are usually totally unacceptable to Self-Consciousnesses Forms of any other Entity.

3.0794. Though CCI of minerals (including also water), vegetables, and animals (including also people) demonstrate profound lack of concern for all those conventionalities, laws, and orders, which we, people, used to develop own way of existence, they are subjectively, in their own way interested in the highest possible energy-informational interactions compensating each other to be accomplished among Focus Dynamics of Form-Creators of various Synthesis Schemes in the Space-Time parts structured by these CCI.

3.0795. Remember, what are you doing in cases of emergency, when some organ or system in your own organism begins to falter of function to the detriment of all other organs? If no other preventive and therapeutic methods help, you have to run surgical procedure and completely (or partially) ablate this harmful part of your body, or to replace it with some other part, which is healthy and performs the same functions. Understand, the mentioned above Cosmic Entities in no way take revenge on us for all our global and inhuman madness by such extreme ways of their manifestation as tempests, tsunamis, storms, inundations, whirlwinds, and tornados. This is at least because such aggressive realization form, which is used by people in plenty (revenge, jealousy, hatred, meanness) is just unbeknown to them (or rather, concatenational processes occur in their Focus Dynamics

by completely different Synthesis Schemes, than people have; therefore, identical worries types are performed by them via qualitatively other SFUURMM-Forms).

3.0796. Form-Creators of Each of them perceive this or that danger *exclusively in own way*, which comes from the human (or any other protoformal) activity, and try to level possible threat for the Planetary Entity integral organism on the Collective Self-Consciousness Level peculiar to them; they act much the same as you would do intuitively with bacteria, infections, aggressive predators, and natural disasters dangerous to our Life — they try either to get rid of pathological manifestations in any way, or just to effectively protect themselves from looming danger bringing specific adjustments, which are peculiar to their Perception systems, to the general Focus Dynamics.

3.0797. Though, while giving ourselves over to superfluous emotionality, which follows every stressful situation, we interpret such various Forces of Nature defense reactions exceptionally in our own way, in accordance with understanding Levels peculiar to us, and very often we attribute those signs and features to the surrounding reality, which it just cannot have. In this way, various tales, myths, and legends are born about angry and insidious representatives of diverse elements («spirits»), which farfetched contents finds its concentrated expression in OLLAKT-DRUOTMM-systems reflected by corresponding Form-shapes in Focus Dynamics of ignorant people, who actively participate in forming of the human subjective Realities types.

3.0798. Our current — so called «human» — Existence is just only regular *transitional* stage needed for our further development in the other, much more perfect mixtum, dimidiomittense, translucense, dimidioclarus, and luminosal Forms of creative Self-Realization of Humankind Collective Cosmic Intelligence. In the general Focus Dynamics of multifaceted and different-Qualitative GREIYSLIISS-Entity Cosmic Existence, humankind Collective Consciousness current type (PROOFF-RRU) represents the least of the given Planetary Form-system of the training Self-Cognition of many protoformal CCIs, Which simultaneously realize in formed by us «human» STCs by completely unclear to us methods and ways reflecting specific signs of peculiar to them Synthesis Schemes in the joint Focus Dynamics. And these Schemes turn out to be more or less impercept in respect with lluuvmic birvularity type.

3.0799. Our main amplificational Task is to thoroughly — successively and level-by-level (meaning, literally in every resopason of initiated by us interconnections with other Proto-Forms, and also with all possible protoformal manifestations in behavior of the people surrounding us) — annihilate and level those psycho-mental tensors in own FD, which appear between «our» and «their» SFUURMM-Forms types, while constantly converging existing depliative Conceptions into the more and more covarllert and deeper energy-informational interconnections. We just will not be able to annihilate absolutely all tensors in the given particular exhiberation diapason owing to the fact that, among different-type diffuzgent CCIs jointly structuring Focus Dynamics of Planetary Entity, besides covarllert ones with respect to our Synthesis Scheme, there are also impercept (and also cruvursorrt!) CCIs types, Which actively stimulate consequential refocusing to the different-protoformal Synthesis Schemes in the people's Focus Dynamics.

3.0800. This multipolarizational — *anti-lluuvvumic* — process is implemented the more intensively, the more actively «person» Focus Dynamics is structured by psycho-mental efforts directed towards annihilation of the tensors of not covarllert, but impersept or cruvursorrt (as regards lluvvumic Synthesis Scheme) Directions. Since it is virtually not possible in such conditions to find compromises retaining invaderentness of lluvvumic signs, the process of such tendentious refocusing begins unambiguously and successively to orient more and more people's Focus Dynamics towards Creativity Spheres of various protoformal (non-human) STCs. At the same time, striving for annihilation of tensors appearing with covarllert CCI types (while retaining trends in the «person» Focus Dynamics towards lluvvumic SFUURMM-Forms domination), allows «person» to avoid refocusing into protoformal STCs and successively leads his/her Focus Dynamics to still more deepening into the lluvvumic or some of the near-lluuvvumic development Directions.

3.0801. To faster approach the covarllert types of tensors annihilations, we should understand as quickly and as deep as possible that countless number of Self-Consciousnesses Forms of Collective Cosmic Intelligences, which are the most mean, «primitive,» unimaginable, and uncommon to our Perception, have equal with us legitimate right on subterransive self-expression and creative realization in this diapason. Their necessity and purposefulness in the general Focus Dynamics of Planetary Entity is as important as our activity. Only in this way — via amplificationally reasoned level-spread invaderental solvation of the human SFUURMM-Forms with protoformal SFUURMM-Forms and successive concatenation of Conceptions synthesized on this basis into lluvvumic birvulyarity type — subterransive Creative Activity Focus of each of us can successively «reproject» to the even more ampliative Self-Consciousness Levels offering in this way the new prospects of conscious Existence in the more prefect human STC groups.

3.0802. At the same time, one should understand that even if this highly complicated process of conscious amplificational refocusing is purely subterransive for each of us, but its efficiency (the main indicators of which are obviousness degree and manifestation speed of radical ampliative changes in the s-Reality surrounding us) depends on how many people together with us equally actively participate in generation of an identical amplificational Factor for «the current» human Collective Consciousness Paradigm cardinal modification.

3.0803. Once again, I remind you that until this quantity reaches 8–10% of the total number of global population, effectiveness of creative efforts in this Direction subterransively undertaken by us will remain disastrously low, because psychic efforts spent in every instant by all people on «unpacking» and «current» realization of all possible protoformal SFUURMM-Forms, which are obviously impersept or cruvursorrt as regards our Conceptions, will be significantly higher than those modest results of focal advances in lluvvumic development Direction.

3.0804. This is because fundamental energy-informational basis of slloogrent Focus Dynamics of Planetary Entity in the given diapason of exhiberation (and in the «human» subjective Reality given type) is provided by not so big, as you think, number of different-protoformal CCIs, among Which one third constitutes either covarllert, or weakly impersept (with respect to two basic Dominants of *lluuvvumic birvulyarity type*) parts maintaining common realizational Interests in the Focus Dynamics of not-lluuvvumic CCIs within some «averaged» near-lluuvvumic Direction.

3.0805. That is, figuratively speaking, with some global Idea or Knowledge appearing in the human Collective Consciousness Paradigm, Form-Creators of these tolerant CCI's find it far easier «to agree» with Each Other and, after making some sacrificing, certain concessions, to reach mutual understanding with respect to many tensors, resolving which with other CCI's is just impossible in the given exhibition conditions. Their consolidation around an integral Idea or Knowledge leads to significant effectiveness lowering of existing refocusing towards anti-lluuvvumic Direction. But when the number of permanent associates of this Idea implementation reaches mentioned above concentration level of SFUURMM-Forms in the Focus Dynamics of PROOFF-RRU, this means that the major part of near-lluuvvumically oriented people of the Earth starts to make their psycho-mental efforts towards approximately one amplificational Direction (which is structured by the joint Focus Dynamics of Form-Creators of covallert to each other protoformal Directions) putting the bigger part of refocusing decoherent Energy into own SFUURMM-Forms. Starting from this point — while retaining or rising steadiness of the formed intentions of this number of people — effectiveness rising of egleroliftive influence of the general signs of lluuvvumic and near-lluuvvumic Focus Dynamics on the qualitative directivity of the common to mankind Focus Dynamics will start to develop exponentially.

SECTION XI

LLUU-VVU as integration of realizational Focus Dynamics of the multitude of different-Qualitative Self-Consciousnesses Forms

Chapter 1. Info-Creators of Ethereal (informational) Component of FLAAGG-TUU

3.0806. Focal Configuration of the LLUU-VVU-Entity and sllougrent Focus Dynamics of different-Qualitative Form-Creators, structuring it, are holochronely-simultaneously organized by a variety of focal-ethereal interconnections between the countless number of diverse different-type diffuzgent Self-Consciousnesses Forms that can be drastically different from each other. The presence of these qualitative differences occurs due to the complexity of the two-invaderental Scheme of the inter-Qualitative Synthesis carried out by Form-Creators of the lluuvvumic birvulyarity type: before acquiring an opportunity to realize covarllert interconnections among Each Other, these Form-Creators have to make a number of catalytic svilgs-spherational transformations in their Focus Dynamics with the help of SFUURMM-Forms peculiar to Form-Creators of other eleven OO-UU-Entities.

3.0807. Therefore, before proceeding with the consideration of all diversity of Self-Consciousnesses Forms structuring Collective Cosmic Intelligences of NUU-VVU-types to the 6.0 dimension (Which, in turn, represent different-qualitative implementation systems of manipulation of specific properties and peculiarities of Form-Creators' FDs of even more perfect CCIs — up to 9.0th dimension — of the LLUU-VVU-Type), let us clarify the conventionally accepted interpretation of «human body» concept (as a direct implementer of our Self-Consciousness's Focus Dynamics in a certain manifestation diapason).

3.0808. It cannot be considered only from the point of view of the biological body analysis, as that biological NUU-VVU-Form, which we visually perceive, is not the man himself, but it is only a functional molecular mechanism of exhiberation (dimensional manifestation of an f-Configuration)

more or less adapted to the existing conditions of Space-Time. With the help of this mechanism, a certain part of of Self-Consciousness's Form-Creators («personal» Interpretations initiated by the ASTTMAY-RAA-AA-Parvulas) is able to perform Their specific realization Interests in the Macrocosmos's Focus Dynamics. Though a modern man is referred to the animal kingdom, but traditionally he is regarded separately, and there are reasons having substantial, not only mental and social, but also morphological character for this.

3.0809. When we are speaking not about a particular «personality» (as a psycho-mental basis that ensures functioning of a human body), but about a human body itself, we traditionally mean a certain physical structure, a human organism formed by different types of cells that are characteristically organized in tissues and organs and fill the space between them, cover them outside in the Form of a specific construction and configuration. Within this Form, a set of spatially united with each other and peculiar only to people, systems and organs are formed; they are characterized by a common structural plan, origin and common functions: nervous, endocrine, skeletal, cardiovascular, muscle, integumentary, respiratory, digestive, excretory, immune, and reproductive.

3.0810. That is, in the biological sense, this concept («Human Self-Consciousness Form») is entirely based on the features of the symbiotic combination of functional interests and capabilities of many types of different-protoformal bio-Creators which organize, in Space-Time, implementation of some quite specific mental, biological, and morphological features which have formed the basis of genotype and phenotype of each individual thereby providing radical difference of his/her constitution from all other representatives of the terrestrial fauna.

3.0811. The more active realization opportunities for «chakram persons» of the highest levels of the first pair and the lowest levels of the second pair of IISSIDI-Centers are received in the Form-Creators' Focus Dynamics of the NUU-VVU-Form-Types' biological analogs, the more these features, emphasizing the difference between a man (as *Homo sapiens*) and surrounding apes and other animals, are manifested in his/her external and internal images. The more ampliative SFUURMM-Forms simulate consistently Focus Dynamics of a «personality,» the more consistent conditions are created for purposeful genome mutations in the lluvvumic Direction and the tendency is produced towards replacement of bio-Creators' functions with the implementation of «bioplasmic» Form-Creators .

3.0812. Appropriately, the Focus Dynamics manipulation mechanism is modified and changed, revealing, in the «human body,» much more opportunities for creative realizations, and increasingly widening the range of the unique features by which every person differs from surrounding Proto-Forms. And if you could visually compare your biological NUU-VVU-Form-Type's state, in which you are focusing now, and properties characteristic of — Your own! — «bioplasmic» or especially «plasmic» and «ray» «manifestation bodies,» you would marvel at the enormous discrepancy between your «current» notions of «yourself» and the specific features of the real Self-Consciousness Form, in which you are consciously and concurrently focusing in the more amplificational versions of your simultaneous «future.»

3.0813. You should understand already that any clearly local and specifically discrete delimitation between any of duvuyllerrt Spheres of Collective Creation of different-Qualitative Form-Creators

of different-protoformal Self-Consciousnesses Forms, as you subjectively imagine (due to strong constraints of your biological Perception systems capabilities), is out of the question throughout the infinity of different-type variations of any «manifestation zones» of our Universal Entity's megadiapason. The world around us and we ourselves do not really look like we imagine because, from the whole spectrum of electromagnetic radiation (gamma rays, X-rays, ultraviolet light, visible light, infra-red light, and radio waves), the light-sensitive human retinal cells properties allow us to catch only waves generated in a very narrow range of visible light (for comparison, the longest radio waves are 10^{14} times longer than visible light, and the most energetic gamma quanta are 10^{10} times more energetic than waves perceived by us).

3.0814. Although the visible spectrum waves having different lengths are subjectively perceived by us as different colors (as seven rainbow colors from red to purple), there are no clear physical boundaries between waves of any part of the electromagnetic spectrum. In the human body, only three receptors types, which are sensitive to red, green, and blue parts of the total spectrum, are responsible for the perception of different colors and shades of visible light. Mixing these three main color types in different options and proportions allows bio-Creators of the brain visual center to reproduce the entire color range peculiar to the human Perception system.

3.0815. According to the Slloogrentness Principle of their ever-changing properties, those specific Configurations of countless Fields-Consciousnesses, which are conditionally called «bodies» and somehow visualized in their characteristic resonational exuberation zones of different-qualitative Focus Dynamics of Form-Creators of the particular dimension diapason, in no way fit your traditional concept of a «human body» as a biological subject of synthetic creation specifically organized by them in this type of human subjective Reality. But we just *have to* call these endless energy-informational *AIYS-SSS-radiations* (Light Flows structuring the UPDR) as «bodies.» In every conditionally local zone of Space-Time, these radiations represent specific «crossing points» of realizational Interests of Form-Creators of many different-type CCIs sequentially self-organizing into the lluuvvumic birvulyarity type common for Them. I emphasized the word «have to» because there is nothing in the notions of the modern humankind's Collective Consciousness which would be even remotely comparable to them and adaptively perceived by you.

3.0816. The main information basis for the implementation of Form-Creators' Focus Dynamics of any among Self-Consciousnesses Forms and their Collective Cosmic Intelligences simultaneously manifested in the AYFAAR HCI (via AAUUSMM — the Central Focus of Creative Attention) in the 36-dimensional SSUU-SS-VUU-Sphere of Creativity is various Self-Consciousness Levels of this DDIIUYI-Entity while these Levels have been slloogrently assembled by Info-Creators of the Ethereal (informational) Component (FLAAGG-TUU) of the Universal Analog of the Universal Plasmic-Differentiational Radiation — Plasmic Forces Diapason (PFD). Info-Creators of these levels provide information for the Mechanism of simultaneous resonational exuberation of Form-Creators' Focus Dynamics of all Worlds' Form-systems of absolutely all space-time Continuums which, by their r-Configurations, structure duvuyllert groups of conversum-level Universes involved in the Processes of an inter-qualitative Synthesis Scheme common to this DDIIUYI-Entity (in the megadiapason from 0th to $\pm 3^{\text{rd}}$ dimension).

3.0817. In the Integral Cosmic Human Body (SSLUU-L-LUU) structuring the AIY-YYA-Entity's f-Configuration (up to the 36.0th dimension), there is no a certain separate «ethereal shell» strictly tied to the space-time visual manifestation of any «separate» Proto-Form (including humans) in the 3–4-dimensional diapason because the universal properties of each of innumerable varieties of the universal Transcendent Principle (the Immanent GOOLGAMAA-A and Transcendent SSMIIYSMAA-A Modi of the Idiopathic TLAASSMA-A-Ingredient), which, by their Creative Activity, form the Cosmic Ethereal Plan-Level, simultaneously penetrate the entire set of PFD-Levels by their specific *informational* interconnections thus providing all the Cosmic TOO-UU-Entities with the opportunity to create actively (together with other CCI's) through Focus Dynamics of any realization Forms covarllert-diffuzgent towards them in every manifestation diapason.

3.0818. Usually, the term «ethereal body» (or «ether»⁶ if applied to the STC-structures) implies a certain substance or environment that enables the process of «reprojection» (through the Form-Creators' Focus Dynamics) of Information particulas between subjectively partial «points» of Space-Time and somehow supports self-conscious existence of all Self-Consciousnesses Forms in the World around them. The fallacy of such Conceptions of the ether functions is that *«it» is neither the environment nor even some universal substance* which fills absolutely all variability of focal Configurations of Self-Consciousnesses Forms including any space-time intervals between molecules, atoms, and fermions structuring them. All these functions are performed by the UPDR (Energy-Information) and its numerous analogs in each of zillions of manifestation Levels of the Macrocosmos's Focus Dynamics.

3.0819. Concerning the general relativity theory, A. Einstein wrote the following. «The general relativity theory endows space with physical properties; thus, in this sense the ether exists. According to general relativity theory, space is impossible without ether...» This opinion coincides with the iissiidiological Conceptions of absolute importance of ether in the exhiberation Mechanism providing simultaneous manifestation of the universal subjectivity of the Form-Creators' UPDR-Dynamics, and therefore of Space and Time closely associated with it. That phenomenon, which we interpreted as «ether» — as, indeed, any of innumerable varieties of its manifestation in the absolute singularity of Worlds' Form-systems — is a *«projection»* of the universal properties of the primogenitive State of Information on the Form-Creators' Focus Dynamics of the SSS-Entity's Self-Consciousness. I have emphasized here the word «projection» to show you that ether is not primogenitive Information itself, but only a natural result of its inherent internal Activity; this result is completely canceled along with the annihilation of the informational SSS-Entity's Focus Dynamics.

6 In the scientific lexicon, I could not find another, more appropriate term that could somehow reflect the properties of amorphousness, imperceptibleness, shapelessness, and intangibility typical of ether. That is what they say about it in the dictionary: Latin word ether (the aether) is of Greek origin (aer) and means the air (that is traditionally associated with flexibility, versatility, conditional independence from material structures), lightness, high origin (in iissiidiological interpretation, this would be adjacency to the First Cause — primary, Primordial Information); it has the same root with «aura» that means shadow and echo (according to Iissiidiology, this would be «projection» of primogenitive State). The role of ether in TEC- unpackings can be commented by the Latin phrase: *ferre sub auras* — to make something known, to disclose (or more literally, to transform from the air). Rather conditionally, using the duality of one of the founding fathers of this concept, Descartes, who considered that the basis of what he understood as the universe is two principles — spiritual (*res cogitans* — a thinking thing) and material (*res extensa* — a thing extended in space) with the absolute domination of the first one (*mens agitat molem* — a thought sets the Matter in motion), we can designate a place of ether «inside» intercorrelation of primogenitive State of Information and the dynamics of Info-Creators by the term *Ens Rationis*, that is, a Thinking Being.

3.0820. We can say that ether is an *inanisal* State of Information which is something as if *potentially-subjectively* present in each Self-Consciousness Form, *as if* latently (*spatiumally*) structuring each particula of any focal Configuration manifested in any of zillions of dimension Levels. But at the same time, *objectively*, this State is always absent (disappearing together with the Focus Dynamics). It is a Universal Mechanism of absolute settlement of all interconnections among Information and Energy, that is, among all skunkktions and their *altssimus* (i.e. intra-skunkktional) particulas (*microstrs*), simultaneously «staying» both in the primogenitive (Resonationally Active) and in the consummative (Dissonationally Passive) SSS-States. *Consummatization* is that «part» of the United Instant of Eternity which is formed by the eglleroliftive Impulse-Potential; however it is not only that subjective process of post-mercavgnational eglleroliftive perturbations of energy-informational interconnections which is implemented holochronely-simultaneously in each of the Levels, but also the final mercavgnation Act itself anticipating *instrauration* or absolute return of the SSS-Entity's FD into the general primogenitive SSS-condition.

3.0821. *Microstrs* are infinite diversity of particulas («sections,» «parts») of heterogeneous informational interconnections, which altssimously structure every skunkktion. They are not some structures (in your habitual Conception about anything manifested), but rather *objective-potential* set of some primordially-coordinated by some signs informational properties, which are separated among each other *in common to them* SSS-fragment reconverstive Configuration with nothing but *potential* realizational opportunities, interactionally initiated through them in Focus Dynamics. Actually, they differ to each other by peculiar to them heterogeneity.

3.0822. Imagine, what would happen to the skrruullerrt system of Macrocosmos if this would be possible somehow to exclude from this Form-structure its energy constituent even for a moment (meaning, Focus Dynamics)? It would just «merged»! And what would happen to Information filling it? It would not «disappear» anywhere, but transform to peculiar to it integral-balanced state, which we — with reference to our Focus Dynamics — interpret as Creative Potential.

3.0823. Thus, it is fairly useless to examine any Information properties via primogenitive State, because r-Configurations of all heterogeneous SSS-fragments together with infinite multitude of potentially producing them skunkktions and microstrs acquire opportunity to our subjective consideration of them only in general to them Creative Activity State initiated by some of the Impulse-Potentials specific properties (which are irrkoglective and eglleroliftive ones to our Macrocosmos).

3.0824. Otherwise (without availability of Creative Activity) we (who, by the way, also could not manifest ourselves at the same time!) would deal only with infinite primogenitive Potential of in no way manifested and structured realizational opportunities, which *provenate* (manifest holochronely-simultaneously absolutely everywhere), transgress, and diversify to skunkktional SSS-compositions all multitude (microstral heterogeneous inter-skunkktional combinations structuring each of reconverstive Configurations) only as a result of mercavgnation.

3.0825. This effect could be conditionally compared with the color peculiar potentially to the torch even in the turned off state: until we create conditions to its manifestation (switch it on), battery electric potential will not be implemented and will not manifest its properties through the lamp as

electromagnetic radiation. This is also the case with Information «structure» and potential properties (or rather, not with Itself, but with Its «projections» — ether and Info-Creators): the Prime-Cause is needed (IIP, mercavgnation) in order for opportunity itself to appear for implementing of the act of subjective understanding and distinguishing of specific generation processes, and also of realizational sense, which are typical to different-level informational Ingredients all possible variants. Though, these will be indefinitely illusive Conceptions, which have absolutely nothing in common with what provides *provenation* subjective effect itself (universal ability of slloogrent Focus Dynamics of Form-Creators to holochronely-simultaneous manifestation in Macrocosmos all dimensional Levels) of all Form-structures of skrruullerrt system, which jointly produce energy-informational basis for objective Reality.

3.0826. If one would figuratively compare possible realizational Potential of altssimus interconnections of one skunkktion with original informational «Galaxy,» then all its microstrs — *on these subjective comparison Levels!* — could present «Stellar systems» in it — each one with peculiar only to its potential abilities and heterogeneous interconnections combinations. And then, SSS-fragment configured with the infinite number of skunkktions could be compared with very specific «Universe.» The main problem here to your abstract Imagination consists in the fact that during considering the question of different informational functions execution opportunity in these or those Focus Dynamics conditions, «Galaxy» Potential — due to the high imperceptness or cruvorsortness of produced combinations — can be «reduced» to the «Stellar system» significance, and some other microstral interconnections Potential can «advance» — due to covarllertness or liyllusceeveness — to «Galactic» or even «Universal» scales.

3.0827. When we consider Information properties in general or of any of Its particulars, we should not forget about the fact that we always deal with «Everything within Everything» universal State. This means that one could enter the subjective authenticity highest Levels via any skunkktional microstr depending on amplificationality degree of efforts put into Focus Dynamics. And this can happen to the extent of *aiyyyaic* Levels (the lowest degree of subjectivism for Macrocosmos's HCI).

3.0828. During inter-skunkktional interactions modelling processes, authenticity degree of the result, which is subterraneously interpreted by Form-Creators of Self-Consciousnesses Forms in different exuberation regimes, always depends on specifics of signs, which interact via microstrs initiated in used skunkktions, and on the character of Info-Creators creative SSS-activity, Who are involved in Focus Dynamics: the more number of microstrs of idiopathic — balanced, primogenitive — Information part will be included to the mental process, the more authentic (less subjective) will be the result of generated at that Focus Dynamics (SFUURMM- and LLAASS-Forms and their ampliative analogs).

3.0829. For example, I have obtained studied by you now iissiidiological knowledge about Informational «internal» functions by means of activation in my Self-Consciousness of strictly defined skunkktional and microstral interconnections (they are purposefully-resonationally formed by me into the «Galaxies»). And at the same time, the *same interconnections* can be used by me in the other psycho-mental states for certain routine decisions (then, their potential opportunities are deliberately «reduced» to the level of «Stellar» or even «Planetary» system). Therefore, one could say

that any thinking process is basically the same as using one and the same infinitely elastic material for implementing different-scale purposes; everything depends here on proficiency and purposefulness of the thinker.

3.0830. Altssimus microstrs of different skunkktions — highly conditionally! — «divide» among each other on the two intercomplimentary to each other categories — *resonomorphic* and *dissonomorphic* ones. *The* first are microstrs, which are objectively not touched by mercavgnation Act (allomoglof or tendentionously coordinated — covarllert, geyliturgent, and liyllusceeve with respect to each other, but impersept and cruvursorrt with respect to the other microstrs; *they have kept peculiar to them stability after mercavgnation Act*; they can belong to different skunkktions and SSS-fragments), and the second are amplificationally initiated by eglleroliftive Impulse-Potential (*ellitimoglofic* or tendentionously uncoordinated — impersept or cruvursorrt between each other, but covarllert, geyliturgent, or liyllusceeve towards the other microstral interconnections; they also can reflect in one r-Configuration different-skunkktional interconnections or to be arranged with different SSS-fragments).

3.0831. Resonomorphic microstrs «always» reflect universal primogenitive State, which reflect in Macrocosmos skrruullerrt system via Creative Activity of UPDR ethereal «projections,» whereas dissonomorphic microstrs (via SFUURMM-Forms of OLLAKT-DRUOTMM-systems, FLUU-LUU-complexes and LLAASS-Forms of their ampliative analogs) constitute the basis of Info-Creators all variety, Who structure all Focus Dynamics of Self-Consciousnesses Forms and CCIs via ethereal «projections» combinations. Meaning, Info-Creators are «projections» of resonational Information part structuring UPDR focal-ethereal interconnections all variety, and Form-Creators are Information dissonational part «projections» providing resonational exhiberation of these focal-ethereal interconnections (in the way of SFUURMM-Forms, LLAASS-Forms, and so on).

3.0832. In this context you should clearly imagine the following «process»:

a) as a result of holochrone Initiation of Information primogenitive State by irrkoglicatively-eglleroliftive Impulse-Potentials, some Potential of possible Creative Activity has been excited «inside» of This absolute State, Which (to not disturb general heterogeneous SSS-balance) has organized «inside» of each of heterogeneous SSS-fragments objective Mercavgnation Act — holochrone compensational «shift» of inter-skunkktional and inter-microstral interconnections along with «projecting» of *sort of* «released» at that ellitimoglofic interactions (which — *objectively* — have restored «outright» in their previous state!) to a certain partial Information Creative Activity (SSS-Entity Self-Consciousness, UPDR, and Energy-Plasma with implications following It: Form-Creators, Energy, Space and Time);

b) holochronely with this — again, for the purpose of compensation and annihilation of qualitative «shift,» which has appeared due to partial SSS-perturbation — all allomoglof SSS-particulas duplicate own «projections» (ether), which provide, during resonational involvement into sort of «shifted» variants of their «previous» interconnections (which have become now ellitimoglofic in respect of them), the process of level-by-level eglleroliftive annihilation of produced perturbation and sort of «return» by this act SSS-Entity Self-Consciousness to initial primogenitive State;

c) holochronely with this — as a result of interaction of ether with constructive UPDR component (Focuses of manifestation Rezomirals) — level-by-level algorithmic (meaning, in a certain sequence) «reprojection» of liyllusceve and geyliturgent allomoglof interconnections takes place «inside» of these ethereal «projections» (their diversification on more or less covallert ones happens) together with generation of SSS-Entity Self-Consciousness Levels and peculiar to them infinite multitude of narrow specific dissonomorphic r-Configurations combinations, which we interpret within Focus Dynamics as Info-Creators.

3.0833. It could also be said that Info-Creators are ether self-realization «reprojected» Form, which is organized in a special way via diverse Energy-Plasma dissonational States and owing to that possessing some specific — *timeless!* — statefulness, which allows them to actively interact with any «materiality» types with the help of SFUURMM-Forms ethereal combinations (to 12th dimension), and also with the help of their more ampliative analogs — LLAASS-Forms (to 24th dimension), YYYUULLUYG-Forms and SSNUUYLL-Forms (to 36th dimension), SKKAY-AFFT-Forms (to 48th dimension), MMIY-UYLLS-Forms (to 60th dimension), and so on. Ether, being the main basis of SSS-Entity Self-Consciousness informational space and the only possible spatiumal (latent) source of Information in Macrocosmos skrruullerrt system, enters any energy-informational interactions with all Energy-Plasma Form-structures (Form-Creators) not directly, but only with the help of own «projections» — Info-Creators.

3.0834. You should successively and purposefully annihilate absolutely all different-protoformal tensors in used by you SFUURMM-Forms with respect to any manifestations in your Perception system of realizational activity of bio- and Form-Creators of various Proto-Forms to make ellitimoglofic interconnections transform in Focus Dynamics of Form-Creators of focused by You «person» into allomoglof (more authentic) ones. Only in this way can Your Focus Dynamics the most effectively qualitatively integrate into Tertiary Energy-Plasma more and more amplificational Levels, and later — also into LLAASS-Forms of SSLOO-SS-SNAA-Creators.

3.0835. It should be noted that in these human STC groups this can be done by the only way: Focus Dynamics successive immersion to the Essence of iissiidiological Conceptions with their active use in the practice of own Existence via cultivation in Self-Consciousness of the main lluuvvumic signs — high-sensual Intellect and high-intellectual Altruism. The more lluuvvumic will be your Focus Dynamics, the less number of all possible signs of different-protoformal tensoriness will concentrate in it (which is the main reason of refocusing to protoformal Synthesis Schemes and development Directions). This means that the greater number of psycho-mental opportunities and skills will «unpack» and implement by you in the process of establishing more amplificational interconnections with any kind of manifestations of the surrounding you reality.

3.0836. Gradually rising degree of Focus Dynamics ampliativity, while regularly and purposefully practicing profound Meditation, you will be able one day to achieve *spatiumal confluence* modified state (psycho-mental merge, overall self-identifiability) with very high SSS-Entity Self-Consciousness Levels in order to *subterraneously* draw out of ethereal component the more ampliative to this s-Reality information. I'd like to note that the biggest difficulty with this will be not only spontaneous *alexithimia* activation (subterraneously experienced states definition, description, and verbalization

difficulties), but also extremely restricted abilities on informational Codes decoding and sense adaptation to already existing Conceptions, which can inconceivably strongly reflect on distortion of the true Essence of spatially experienced by «you» confluence.

3.0837. UPDR (as Universal manifestation Medium of absolutely all CCIs and their Self-Consciousnesses Forms) and structuring It Energy-Plasma (all heterogeneous focal interconnections), in principle, represent manifested Information tensor state — meaning, those microstral «*projections*» (ether), which are disturbed from overall equilibrium and, due to energetic influence on them, organized to certain focal Configurations sllongrently structuring all subjective Forms. One can say that Energy-Plasma is the state of a certain potentially possible ether subjective statefulness, at which this ether virtually sort of absent in the Form-system (that is, for Perception systems), though no one Form-system could exist without it.

3.0838. The notions of «ether» and «UPDR» in no way should be confused with each other, because the latter functionally provides reflection of just *dissonational* (that is, ellitimoglofic — initiated «inside» of SSS as a result of mercavgnation) part of all microstral interconnections (though, due to concurrent presence of allomoglof part!), and ether at the same time, representing «projections» of resonational (allomoglof) skunkktional particulas, completely informationally provides the presence of UPDR Itself and Macrocosmos Itself, which is jointly organized by Form-Creators and Info-Creators.

3.0839. Ether carriers in the way of all possible informational Ingredients, initiated in Macrocosmos HCI Focus Dynamics, are its own dissonomorphic «projections» — Info-Creators, Who provide, due to simultaneous availability of resonomorphic «projections» in ether, all SSS-interactions by own universal informational distribution «medium,» which is the base of informational space for SSS-Entity Self-Consciousness (and thus, for any Self-Consciousness Form). This notion — «Info-Creators» — is much more complicated and multivalued, than you can imagine. If to decipher it literally, one could say this is Information capable of creative conversion. Though (!) this ability manifests in It only in the presence of interaction with corresponding to It Energy, which initiates It on this conversion. Without Energy application (Focus Dynamics), we just have no possibility to consider Info-Creators.

3.0840. Until this interaction is absent, «potential Info-Creators» represent some inactive Status, or what we subjectively define as Information RA-State. But once resonational interaction of RA-States primogenitive signs is initiated in Self-Consciousness with corresponding consummative part of *the same Information*, interconnections of this unstable Status «project» to the definite Creative Potential (transform to ether), which combines with f-Configurations of Form-Creators, while we subjectively interpret it as Info-Creators (active particulas of Information amitsissimal State). One could say, inactive, but potentially ready to Creative Work Info-Creators represent RA-State, and *the same Info-Creators*, involved to Focus Dynamics of Form-Creators as its ethereal component, represent DP-State.

3.0841. Info-Creators, initiated in SSS-Entity Self-Consciousness by irrkoglictive Impulse-Potential as «*projections*» of definite Information particulas, specifically *sort of* «structure» Creative

Activity of all ethereal interconnections in the infinite multitude of different-Qualitative Levels (of not dimension, but Self-Consciousness!), which resonationally correspond to realizational Potential (VLOOMOOT) of Focus Dynamics of these or those different-Qualitative Form-Creators. Exactly in this way they provide slloogrent presence in any Self-Consciousness type and Level of own universal «*informational interactions medium*» (meaning, informational space — ODS and FLC different-level analogs).

3.0842. Informational interactions medium of SSS-Entity Self-Consciousness differs from «*focal manifestation medium*» or UPDR by the fact that, in peculiar to it Creative Activity — owing to its absolute dis-tensoriness! — such parameters as Energy, Inertia (the reason for Space manifestation), and Time subjective factors are totally lacking, and the main Form-systems Principles (Duvuyllerrtness, Multipolarizationness, Simultaneity, Diffuzgentness, and Slloogrentness) are compensated by the only universal Property — *Potential Informational Simultaneity* (holochronely-singular multi-parallel activity of any of informational interconnections with opportunity to interact by *unikommunisational* principle — «*always-with-everything*» and «*everywhere-within-everything*»).

3.0843. The result of resonational interaction of Info-Creators (resonational SSS-projections) with Macrocosmos Form-Creators (dissonational SSS-projections) is simultaneous manifestation of slloogrently-subjective Focus Dynamics of the infinite multitude of CCI's different-Qualitative Self-Consciousnesses Forms informationally structured by all possible different-level SFUURMM-Forms analogs, which produce ethereal «projections» of Info-Creators (that is, Temporal ethereal constituents and variable ethereal components of Form-Creators) in Form-systems.

3.0844. Ether, which structures TEC, in no way differs from ether, which structures VEC, though no separations and differentiations among various slloogrent Information particular really exist. All seeming to you subjective «differences» appear just due to availability of our different-Qualitative Perception systems, functionally provided by different-protoformal Focus Dynamics and which therefore have diverse realizational abilities. In this regard, temporal ethereal constituent specific composition is characterized by very narrow realizational spectrum, which is imposed on the general Focus Dynamics by *pronoontive* (meaning, accentuated in some particular Self-Consciousness Level or in some protoformal Direction) activity of Form-Creators, Who aim on implementing at any cost only Interest peculiar to them at «the current» moment.

3.0845. There inevitably appears invaderental (dominating in some Direction) tensoriness among them and the other diffuzgent Form-Creators, Who are, for various reasons, not so strongly concentrated on their Interests. This tensoriness forms in Focus Dynamics definite vecsative (forcedly suppressed, recessive) state, meaning, some predetermination (fateness, doomness, preoccupation), which does not allow «person» Perception system bio-Creators to undertake deep logical analysis allowing for many other realizational factors and to react in this situation with some other, more ampliative way. Hence, this ether part (as TEC-«unpacking»), being «projected» to very narrow Focus Dynamics, reflects extremely narrow realizational abilities in the «person» Perception system.

3.0846. The less number of conditions for diffuzgent inversusality (tensoriness, inconsistency) exists in Focus Dynamics interconnections, the higher degree and more quantity of more covarllert

development scenarios, which are actively enabled in this «person» Self-Consciousness structure. That reveals in front of «person» Perception system Form-Creators more broad spectrum of all possible variants of potential choices with opportunity of more deep cognition of the attendant consequence (Experience).

3.0847. That is, the features of those ether particulas, which are involved into Focus Dynamics to structure SFUURMM-Forms of variable ethereal component, consist in their just more universal influence on the Perception system, resulting also in universalization of «person» Focus Dynamics itself. But invaderentness state of VEC-processes as compared with TEC-«unpackings» in Focus Dynamics correspond to more convenient (more balanced) state of Perception system, which allows to «unpack» (to analyze and choose) per unit time incommensurably greater number of development scenarios peculiar to slloogrent multipolarizational Focus Dynamics of this «person.»

3.0848. For the same reasons ODS ether structurally has no difference from FLC ether (and from ether of FLC more amplificational analogs), because the main part of Mechanism of informational properties exuberation (specific manifestation) in every particular case is not ether itself (*since it by its own Essence is the same in any UPDR «point»!*), but focal Configuration of Self-Consciousness Form providing absolutely all informational abilities of its Perception system bio-Creators. Subjective TEC-«unpackings» of Focus Dynamics of Form-Creators of NUU-VVU-Form-Types biological analogs is mostly initiated via SFUURMM-Forms of ODS, while the source of VEC-«unpackings» in this case is SFUURMM-Forms of FLUU-LUU-complexes.

3.0849. Therefore, one can say that the main informational source of TEC-«unpackings» for Form-Creators of FLAKS-Forms are Info-Creators of FLC of flaks diapason (4–5th dimension), and generators of «plasmic» Self-Consciousnesses Forms VEC-Dynamics are FLC SFUURMM-Forms vuolds varieties. In the same way, VEC-Dynamics of vuolds dimension diapason (5–6th dimension) Form-Creators is provided by Self-Consciousness orfrov Levels (6–7th dimension) Info-Creators, while TEC-«unpackings» are accomplished due to SFUURMM-Forms, resonating with vuolds diapason Form-Creators, and so on.

3.0850. The main difference of ether exuberation Mechanism in TEC-«unpackings» from its states in ODS is that it is energetically structured by typical features of a particular «person» focal Configuration, which has segregatiratedly (in a subterransive way) initiated and arranged in a certain way by own Focus of Close Attention (from many heterogeneous interconnections) its «local» Creative Activity (Focus of Dual Reflection), whereas ether in ODS conditions is presented in the way of the infinite multitude of latent variants (Form-copies and SFUURMM-Forms) of its simultaneous usage by the countless number of the other Self-Consciousnesses Forms (both people and other Proto-Forms). Besides, these Self-Consciousnesses Forms structure with their Focus Dynamics not only this type of Macrocosmos, but also all other types, where the given ether particulas are used by someone and for something irrespective of any Temporal characteristics.

3.0851. Virtually, TEC-Dynamics is ether manifestation «locally» expressed in Space-Time particular «point,» whereas ODS-Dynamics represents multi-variant realizational potential, which is simultaneously spread among development scenarios infinite number. And everywhere, ODS

ethereal Information main realization Mechanism is Perception systems equally particular both to microscopic and macroscopic (within our Conceptions!) Self-Consciousnesses Forms.

3.0852. As you see, all Form-Creators TEC-Dynamics is provided by ODS Info-Creators, structuring their manifestation diapason, while VEC-Dynamics is organized by FLC Info-Creators of more ampliative diapason, which also critically depends on Perception system qualitiveness degree: Focus Dynamics of highly organized «persons» tend more to VEC-«unpackings,» and depliative Focus Dynamics is more to TEC-«unpackings.» The example of writing and appearing in our 3–4-dimensional STCs of detailed information on iissiidiological Knowledge, which refers to much more amplificational Levels of lluvvumic development, indicates that VEC-Dynamics can be initiated in Focus Dynamics of Self-Consciousnesses Forms by not only Info-Creators of the next ampliative dimension diapason, but also by SFUURMM-Forms most qualitative analogs, which structure *plyurimusive* (the highest, the most amplificational) SSS-Entity Self-Consciousness Levels.

3.0853. It speaks to potential accessibility of Information to Form-Creators of any Level if there are of corresponding mechanisms of subjective adaptation and ability of relative identification with already existing Conceptions in Self-Consciousness Form Perception system. With increasing verification (empirical confirmation), this VEC-Information becomes more active part of slloogrent Focus Dynamics of Form-Creators of duvuyllerrtly «following» manifestation diapason of our Self-Consciousnesses Forms.

3.0854. It follows that there is no sense to argue about any ether characteristics (by analogy with frequency of dimension), which correspond to different development scenarios, because any of its properties are initiated every time in the «person» Perception system just through abilities of generated by him/her Focus Dynamics. In turn, these abilities completely depend on ampliativeness degree of implemented at the moment energy-informational combinations. We can observe and subjectively assess just consequences of these or those ethereal interconnections projected into conditions of the surrounding us reality. Ether properties are infinitely more complex than everything we are able to imagine, and they are not limited to only dimensional characteristics.

3.0855. Thus, for example, the iissiidiological Knowledge has appeared in this dimension diapason via FD of Form-Creators of my Self-Consciousness. And while «the current» (subjectively perceived by me) part of my «person» Focus Dynamics belongs to this dimension diapason, but ether, which is its potentially-informative Essence, structures also Self-Consciousnesses Forms in the other exhibition conditions providing absolutely all informational space in FD of simultaneously focused by Me Self-Consciousnesses Forms. Hence, it can concurrently structure both depliative and much more ampliative Levels.

3.0856. Ether structures all informational base of holochronely-simultaneous manifestation of the infinite multitude of different-type Macrocosmoses formed by Impulse-Potentials of not only SYNTHETIC and RESOSCONTIONAL Development Branches, but also by IPs of all other Branches and their combinations, and besides that, by the multitude of other exhibition Universal Mechanisms, which are beyond our restricted imagination and still very primitive — in cosmological relation — understanding. Regulation of absolutely all ethereal interconnections is implemented by Impulse-

Potentials, Which define all multipolarizational vectoriness of Macrocosmos every type development, and therefore, defines absolutely all Its properties, features, and creative realizations opportunities of organizing It CCI's.

3.0857. Thus, now you can see that ether (for conditions of 0–36-dimensional megadiapason — FLAAGG-TUU) «projectively,» meaning, keeping peculiar to it balance and objectively not involving into focal Configurations of any among Form-structures (subjectivity of this interaction is modelled by Perception system Form-Creators of each of Self-Consciousnesses Forms), does not produce, but «distantly» *provides* this manifested dissonational part (for every Space-Time «local point,» generated by dissonomorphic microstrs) with slloogrent informational Potential of all possible allomoglof interconnections, which — owing to peculiar to them high covarllertness and liyllusceeveness — have retained own stability after mercavgnation Act, and they virtually represent the basis of primogenitive SSS-State (because no any subjective disturbance — for Information Itself — of peculiar to It objective balance has really happened).

Chapter 2. Characteristics of amitsissimal and confective SSS-States

3.0858. This holochronely-amplificational Initiation Act has been subjectively-slloogrently realized by only «ellitimoglofic SSS-projection» *imaginable* by Form-Creators . This SSS-projection is contegerently (forcedly) initiated «inside» of primogenitive Information State via definite types of peculiar to It particularity, and now we interpret it subjectively as «synthetic SSS-Entity Self-Consciousness.» Until this focal consummative State «exists» in the way of United conditional Instant of Eternity, such *non-differentiated* state of all Fields-Consciousnesses structuring Energy, Space, and Time (and also Matter and Anti-Matter) also has opportunity to Exist, which we define as «ether.» It will be quite difficult for your to study this case profoundly if you do not formulate in your Imagination abstract, but clear Conceptions on *inter-particular holochronely-simultaneous Information activity*, which reflect the Essence of Everything Being single-moment simultaneity iissiidiological Principle.

3.0859. While examining in the third Section the question on infinite conditional character of subjectively perceived by us *amitsissimal Information State* (that is, «relaxed-excited,» primogenitive-consummative one), I wrote⁷ that the whole Essence of irrkoglectively-eglleroliftive Initiation of absolutely balanced Information State is activation in Its skunkktional-microstral interconnections of those orders, which, due to extreme heterogeneity of peculiar to them signs, weakly reflect realizational opportunities manifested in Its primogenitive State. Whereas these opportunities are conditioned by imperseptness and cruvorsorttness factors between SSS-signs. It is availability of these potential, but weakly manifested opportunities that is the main Reason of dissonational state appearing (in conditional Instant of Eternity!) «inside» of reconverstive Configuration of each of SSS-fragments. This brings to primogenitive State a certain «superfluous» informational Potential, and as a consequence, some *sort of* violation of the order takes place, typical to the given State.

7 see «IISSIIDIOLOGY. The Fundamentals,» v.1, p. 1.0429.

3.0860. As already mentioned, amitsissimal SSS-State is simultaneously balanced and excited State of Information initiated internally in It by Impulse-Potentials. It is sort of absent (because stable balance inside of every r-Configuration has been instantly «restored»), though It would be a mistake to argue for its objective existence. It could be compared conditionally with that imaginary image of the surrounding reality, which is kept for a while in front of our eyes after we close them: it is absent already, but with eyes shut we still somehow have opportunity to perceive and realize it in detail, before it starts to dim, blur, and finally «melts away.»

3.0861. You should understand that — in holochronely-simultaneous terms! — nothing objectively happens in amitsissimal Information State (from the standpoint of its absolute balance). Though, we who realize ourselves in the lowest Levels of this consummative Process believe that something changes in Information Itself in a particular way (although, yes, in principle, some of the interconnections *redistribute* and modify; while at that Information general balance is not broken at all, because all possible perturbations variants in amitsissimal State — taking into account simultaneous manifestation of Macrocosmoses absolutely all types — already exist!).

3.0862. I think that you just will not be able to form more or less correct abstract Conception without illustrative example. Amitsissimal Information State (from the standpoint of our considering It as SSS-Entity) can be conditionally compared with highly developed human «person» steady experience. Zillions of all possible bio-chemical intra-cell reactions are accomplished every second in his/her organism, which are initiated by incessant neuronal impulses; and zillions of energy-informational interconnections between systems and organs are being restructured. But «person» Self-Consciousness at that remains psycho-mentally balanced, purposeful, and virtually in no way involved into all these physiological processes details. For all that, you should not forget that f-Configuration of the given «person» simultaneously manifests in even more amplificational Forms — flaks, vuolds, and so on.

3.0863. Roughly the same can be said of amitsissimal SSS-State: universal qualitiveness of simultaneously balanced and impulse-initiated Information State in no way depends on the processes accomplished during one conditional Instant of Eternity in skrruullerrt systems of zillions of Its different-type Macrocosmoses (let me remind you that *humanational* or synthetic Form-Types Self-Consciousnesses constitute just only 0,0001% of the total number of slloogrentness of all Macrocosmoses types: humanational and *propriusal* or non-synthetic, which also exist in the infinite types variety). This is a natural consequence of the presence in Information of zillions of different-functional Impulse-Potentials, Each of Which, resembling neuronal signals, influences holochronely-simultaneously on r-Configurations of corresponding to It SSS-particulas for a specific Purpose and Sense.

3.0864. In this United Instant of Eternity we (as well as biological organism researchers) completely unable to subjectively define, where and, above all, how some «neuronal impulses» finally «finish,» and where (and how exactly!) the other SSS-Initiations «start,» which duvuyllerrtly and multi-vector-like «reproject» to SSS-States infinite multitude. But as a result, Something really «matures» in amitsissimal Information State, It is *modificationally supplerizes* (is replaced by something else to achieve absolute universality)! In this way, general primogenitive SSS-State considered by us — due to availability in

Information Itself of United Superuniversal Impulse-Potential (USIP) — concatenationally modifies to absolutely universal — confective — SSS-State characterized by absolute completeness of any intrainformational States (both humanational, synthetic, and propriusal, non-synthetic).

3.0865. We can subjectively perceive this confective SSS-State as absolute one, meaning, the highest among potentially possible States to Information. As a matter of fact, this State is actually USIP. This is It, Which countless variants holochronely-simultaneously initiate both confective SSS-State and internous («internal») to it amitsissimal SSS-State, owing to Which all infinite multitude of manifestation (Existence) Acts of diverse Macrocosmoses humanational and propriusal types was made possible.

3.0866. For example, the pair of such, well known to us, Impulse-Potentials as irrkoglective and eglleroliftive, owing to their segregatirated properties and universal features, *peculate* (meaning, initiate to manifestation some forms with particular properties and abilities) in the overall «mass» of USIP-Initiations only «our» type of humanational Macrocosmos. And humanational Macrocosmoses new types originate at geyliturgent interaction of informational interconnections produced by our Impulse-Potentials with the most covarllert towards them Impulse-Potentials structuring USIP. A part of them, in some of the sections of the general multipolarizational spectrum of slloogrent Focus Dynamics, successively *amitsirates* (evolves, modifies) to different Macrocosmoses propriusal types.

3.0867. Parallel to this, all infinite multitude of the rest of Impulse-Potentials, depending on the covarllertness or imperseptness degree between Each Other, organizes the whole absolute *pictusness* (different-type Macrocosmoses unified picture reflecting their general informational multi-spectrality) of amitsissimal SSS-State, Which is characterized, in every particular case of own manifestation, by the definite *consummativeness* parameters (misbalance regarding general primogenitive SSS-State). Consummativeness — in every own manifestation Act — reflects informational interconnections dissonation degree of generated Macrocosmos type towards general primogenitive State of absolute SSS-balanced state supported by overall interconnections between the whole infinite multitude of different-type Macrocosmoses constructions. Moreover, these interconnections are peculated in the generated Macrocosmos during Process of segregatirated mercavgnation.

3.0868. «Mercavgnational Initiation» and «peculational Act» are different notions by their Essence. Let me remind you that *mercavgnation* is *compensational qualitative shift*, generated holochronely-simultaneously inside of the skunkktions and microstrs of every SSS-fragment in United Eternal Instant of irrkoglective Initiation. The role of mercavgnation ends here and peculational Act enters to the force, which is characterized in Macrocosmos HCI multipolarizational Creative Work through the infinite multitude of different-qualitative and different-type consummative (post-mercavgnational) states (from the most elementary to the most complicated ones), which we interpret as Self-Consciousnesses Forms and Collective Cosmic Intelligences.

3.0869. As a result of mercavgnation in microstrs of each of SSS-fragments reconveritive Configurations, the definite potential of peculiar to It, *but not quite appropriate to the Nature of exactly This Impulse-Potential*, interconnections has been *sort of* (from a subjective prospective!) released (and instantly restored!). These interconnections holochronely self-organize to all

multitude of simultaneously manifested «projections» (*focal Configurations* of Form-Creators and ethereal Configurations of Info-Creators), which structure by themselves SSS-Entity Universal Self-Consciousness generated at that.

3.0870. What is happening during peculational Act? This Act provides exuberant Mechanism functioning opportunity, which really implements all potential variants of highly complicated concatenational egleroliftive perturbations of post-mercavgnational states generated simultaneously. You know already that in primogenitive SSS-State, due to the infinite heterogeneity of structuring it SSS-fragments, some of skunkktional-microstral interconnections of each of reconveritive Configurations manifest towards each other heavily-impersept or cruvursorrt properties (meaning, they interact extremely weakly between each other or completely ignore each other, demonstrating just a certain potentiality).

3.0871. Similar relations do not allow primogenitive SSS-State (which is potentially balanced in the total mass of interconnections peculiar to It) to become *absolutely* balanced that is, USIP-confective One, at Which *every* skunkktion of *every* SSS-fragment have *equal* interaction activity *with every* skunkktion of *all other* SSS-fragments independently from the degree of their heterogeneity among each other.

3.0872. For this purpose, irrkoglictive IP all functional Analogs (*simplificational* IPs — to all Macrocosmoses types), *in strict compliance with segregatirated characteristics peculiar to Each of them*, activate in general primogenitive SSS-State those types of inter-skunkktional interconnections, which have hardly an opportunity to enter active informational relations (that is, to sort of «experience» each other in an appropriate way) without specific IP-peculization due to own heterogeneity, which is in no way matching directly (immediately).

3.0873. All simplificational IPs (including also «our» irrkoglictive IP), not interacting to some extent with covallert and liyllusceve r-Configurations, allow all impersept and cruvursorrt SSS-fragments to enter non-particular to them interconnections between each other and sort of «expose» in front of conditional USIP-Observer the overall pictusness of absolute Harmony by each of inter-skunkktional interconnections (the definite difference is observed just on the altssimus activity levels between microstrs of each of skunkktion of one SSS-fragment).

3.0874. Coordinating function in USIP-Initiations all variety, realizing via the Process of spreading of the standard (confectional) ethereal interconnections in the general amitsissimal SSS-State, is provided by *Universal Creators-Supermodifiers* (US-Creators). I also want to note that this — absolutely harmonious! — «picture,» *reflecting in ether universal properties*, is the main reason for generation in amitsissimal SSS-State of «the secondary ethereal projections» all diversity or Info-Creators of Macrocosmos humanational types (for example: Quaternary Energy-Plasma OODMM-DDMOO-Creators, Tertiary Energy-Plasma SLUI-SLUU-Creators, Secondary Energy-Plasma GLLAA-GLLII-Creators, Primary Energy-Plasma UUYG-UUYU-Creators).

3.0875. Info-Creators themselves resonationally activate in focal Configurations of Form-Creators of Macrocosmoses via *ethereal Configurations of Universal Creators-Pictusators* or UP-

Creators (for example: *lyyuyyussigms* — carriers of irrkoglective IP absolute result in our type of Macrocosmos, *Primary Energy-Plasma uuyuum*s, *Secondary Energy-Plasma liyllims*, *Tertiary Energy-Plasma fmillims*, and *Quaternary Energy-Plasma oodmmoons*). Absolutely all pictusness of inter-skunkktional informational amitsirations (inter-skunkktional changes), which are carried out in primogenitive SSS-State, is specifically coded exactly in their *ethereal Configurations*. To be sure, UP-Creators and US-Creators are, in Essence, Info-Creators of the first and the second categories (by analogy with synthesizing and svilgson Form-Creators).

3.0876. Universal Creators-Pictusators «reproject» (at each of resonational interconnections) contents of own ethereal Configurations to focal Configurations of synthesizing Form-Creators, where these codings convert to Universal Creators-interpreters amplificational versions (UI-Creators), Who provide realization of the general «picture» of absolute Harmonicity in all infinite multitude of different-type humanational Macrocosmoses (*lyyuyyullons* — UI-Creators in our Macrocosmos type, *flaaggtuons* — Primary Energy-Plasma UI-Creators, *avvakklons* of Secondary Energy-Plasma, *svilgsons* of Tertiary Energy-Plasma, and *iksons* of Quaternary Energy-Plasma).

3.0877. I also note that, in propriusal Macrocosmoses types, analogs of irrkoglective Impulse have much more complicated manifestation mechanisms, thus, generation process of Universal Creators-Pictusators functional analogs is implemented by the Scheme much more complicated than humanational types Schemes. This is just impossible to understand it due to absence in our Conceptions of any analogs (because even availability of Form-Creators beyond humanational Schemes boundaries remains questionable to us; unlike them, Info-Creators are presented absolutely everywhere, in any amitsissimness states). Anyway, it is clear that all functional ethereal interconnections with US-Creators (and also with UP-Creators!) in propriusal Macrocosmoses types are supplied by *Universal Creators-Motivators* (UM-Creators).

3.0878. So, we have found out that the whole multitude of simplificational (that is, Qualitational, analogous to irrkoglective IP functions) varieties of United Superuniversal Impulse-Potential create — in the total «mass» of USIP-Initiations peculiar to them — sort of «masterplan» or original «demonstration model» of impending USIP-Confectization out of primogenitive interconnections all multitude (with highly detailed «working drawings» for every Macrocosmos structure). All weakly active part typical to the general primogenitive SSS-State should be holochronely modified into this «masterplan.»

3.0879. *Constructational* USIP-varieties concurrently initiated with them (meaning, Amplificational, eglleroliftive IP-Analogs) — via consummative SSS-States all infinite multitude — instantly «fix» (scan) each of interconnections (to the point of separate altssimuly-microstral ones!) of «masterplan,» which has been demonstrated by simplificational IPs full set. These USIP-varieties holochronely implement this general Harmony «picture» by means of properties and abilities peculiar to Each of constructational Impulse-Potentials.

3.0880. Acting via UI-Creators and UM-Creators as «Customers,» UP-Creators interact very closely with US-Creators providing different-type Macrocosmoses all multitude. One can say that amitsissimal SSS-State appeared in primogenitive SSS-State exactly as a result of joint Creative

Activity between «Customer» Universal Idea and «Contractor» boundless Abilities. This amitsissimal SSS-State is the variety of Its active transition to absolute USIP-confectiveness (Which could not be named already, by Essence, as State, because r-Configurations of absolutely all Information particulas «merge» in produced overall liyllusceeveness!). Meaning, Information confectiveness — as United Universal Impulse-Potential Main Goal — happens right after the highest consummativeness degree is produced in all Macrocosmoses interconnections.

3.0881. Here, of course, we could consider the Reasons quite long and lengthy, which caused the USIP-Activity Itself. We could, for example, approach this question from the standpoint of the Perfection degree availability, which is insufficient to USIP «definitive» Absolutization. Thus, It reaches own Goal in such a way via absolute Self-Knowledge Process by means of invaderental Initiation of amitsissimal SSS-State. Though, my impression during profound Meditation process was that USIP is Absolutely Self-Reliant and that the Essence of SSS-Confactization lies in Its internal exhiberation Mechanisms, Which have nothing to do with Self-Improvement Process. Therefore, I will answer on the frivolous question about what precedes USIP-Activity Itself, «This is Its Superuniversal internal State, and nothing more perfect exists. Both Information Itself, and absolutely everything connected with It are generated out of It. Absolute Limit of any Creative Activity is right here.»

3.0882. As an example of the infinite multi-variance of amitsissimal State, I can say that among other «even» (by the number of invaderental Impulse-Potentials) Macrocosmoses humanational types, there are not only single-paired ones, as «we have,» but also much more complicated ones — double-paired, triple-paired, tetra-paired (and even more!) Initiation Mechanisms of Information particulas dissonational manifestation. For example, initiators of some of double-paired Macrocosmoses duvuyllerrtly-covarllert with respect to «us» are harmonious combinations of the following two pairs of Impulse-Potentials: avariterrnost + intrinsessive and aviditasive + divinurtive ones. Entering diffuzgent interaction with Impulse-Potentials of the other double-paired Macrocosmoses (parrikative + abundative and sollertive + enentiative ones), they create sort of «inside themselves» conditions for manifestation of the infinite multitude of such single-paired humanational Macrocosmoses types, like «Ours.»

3.0883. Here I can give examples of just some of IPs pairs the most covarllert to «Us,» which initiate duvuyllerrt types of propriusal Macrocosmoses: functionally corresponding to irrkoglictive IP (that is, Qualitational Ones) — artificational IP (initiated by Primentive Branch IPs), imitarizational IP (initiated by Monomigrating Branch IPs), pekurnative IP (initiated by Heterorizing Branch IPs), effictive IP (initiated by Dipolarizing Branch IPs), intrinsessive and parrikative IPs (the most compatible Ones among double-paired humanational IPs), and Others; functionally corresponding to eglleroliftive IP (that is, Amplificational Ones) — susceptumic IP (initiated by Accumulative Branch IPs), simbolitive IP (initiated by Formative Branch IPs), actsessive IP (initiated by Polaroid Branch IPs), interventive IP (initiated by Dualiritive Branch IPs), divinurtive and sollertive IPs (the most compatible Ones among double-paired humanational IPs), and Others.

3.0884. But which Principles are really used by double-paired combinations among each other and how exactly «our» irrkoglictive and eglleroliftive IPs interact with both them and IPs of other Amplificational-Qualitational Branches of Development? I could not find this out by means of

meditation. It is known only that mediating role in this Process belongs to Impulse-Potentials of the «odd» humanational Macrocosmoses types, which are differently compatible by their features with some of the propriusal types. *Formamentation Mechanism* (simultaneous organization of Overall Sll oogrentness) is produced in amitsissimal SSS-State in such a way, conditionally.

3.0885. I used this example here only that you could form at least some general Conception about the infinite Macrocosmoses heterogeneity: single-paired combinations Impulse-Potentials (like «Ours»), originating under the aegis of double-paired and «odd» combinations IPs, first of all, actively interact with IPs of the same, but qualitatively different single-paired combinations. They duvuyllerrtly and diffuzgently modify own Macrocosmoses to double-paired ones so that they later could somehow unify successively to triple-, tetra-, penta- and even more multi-paired Macrocosmoses. IPs of humanational Macrocosmoses «odd» types, and also propriusal Macrocosmoses IPs penetrate in a special way to this global humanational Process as very original catalysts-mediators.

3.0886. Of course, any interactions captivusality (meaning, their closedness, seclusion, hermeticity) structuring different-type Macrocosmoses is out of the question, because Duvuyllerrtness Principle is maintained everywhere. Concerning propriusal Macrocosmoses types organization Mechanism, any information about this turned out to be completely inaccessible (because, to describe this process, one should be at least conscious part of those manifestation Configurations). One thing is clear that interconnections of each of these Macrocosmoses «penetrate» in quite a particular way to humanational interconnections. But how this happens, and what exactly is generated at that, are still completely impossible to understand.

3.0887. I would like to note here one more issue, understanding of which is extremely important to more deep revelation of the true Essence of both primogenitive SSS-State Itself and the most ampliative one for Information in total — confective USIP-State. The point is, *beyond* opportunities of holochronely-simultaneous exhiberation of the whole infinite multitude of different-type Macrocosmoses, any Information Creative Activity is excluded. Any Its particula cannot be «all by itself,» meaning not connected to anything: all skunkktional-microstral interconnections typical to any of reconverstive Configurations — holochronely and equally — informationally provide simultaneous manifestation and parallel Existence of Macrocosmoses absolutely all types, regardless of which original Information carriers structure them.

3.0888. Extra-additive effect emerged as a result of emergence of this Absolutely Everything summary existence represents What we consider as overall Information amitsissimal SSS-State (primogenitive-consummative One), which is internously («internally») absolutely balanced, because It is *congregarated* (aggregated) out of all interconnections structuring all infinite multitude of different-type Macrocosmoses — both humanational and propriusal Ones.

3.0889. Illusive ability of this total SSS-State speculative demarcation on primogenitive and consummative Ones appears for us only at Its consideration with respect to «our» humanational Macrocosmos type (initiated by irrkoglective and eglleroliftive IPs). In this case, we subjectively sort of oppose irrkoglectively-eglleroliftive exhiberation Mechanisms to the other Mechanisms of

humanational Existence formamentation (which are initiated by some other USIP variants), and also to all possible propriusal (non-synthetic) manifestation ways.

3.0890. Owing to subjectivity peculiar to all of us, we divide this absolute Harmonicity on «our Macrocosmos» with all Self-Consciousnesses Forms and CCIs of Its multi-zillion dimension Levels, and on «Everything Else.» Developed representatives of Macrocosmoses all other types do the same, though, from the standpoint of exceptionally their own USIP-variants, during explanation of exhiberation Mechanisms peculiar to them. Nevertheless, it has absolutely no effect on the general primogenitive SSS-State of «Everything Being.»

3.0891. Confective USIP-State is the most universal One among States fundamentally possible to Information. This is, so to speak, «the very early» stage of Its origination, when opportunity of Its differentiation on skunkktional and microstral interconnections is not «yet» possible. Hence, there are neither harmonious primogenitive SSS-State, nor disbalanced amitsissimal One; there are neither Sll oogrentness Principle, nor Resonation Principle; there are no Principles at all, because conditions for their manifestation are absent.

3.0892. Confectiveness is *potential* realizational State of Impulse-Potentials infinite multitude, which have not entered a conditional stage of own Creative Activity. Since exhiberation Mechanisms of SSS-Entity different-type Self-Consciousnesses Assembly are absent, there is no subjective division of Information on humanational and propriusal Macrocosmoses types. Confectiveness is a conditional «Instant» before «the Start» of holochrone emerging «out of nothing» of That absolute Harmony, Which will manifest «Absolutely Everything.»

Chapter 3. United Idiopathic SS-TOO-IIYS-SSS-Ingredient of Macrocosmos

3.0893. However, we will return to the question of the ether and its «derivatives» — Info-Creators — Nature. Explaining in the previous section objective Essence of Info-Creators functional activity on the example of universal properties of Immanent GOOLGAMAA-A-Ingredient (from 0.0 to ± 13.0 dimension), I have stressed on the fact that NNAASSMM of any Self-Consciousness Form manifested in Macrocosmos Focus Dynamics possesses this or that degree of informational accordance (VLOOOMOOT), which is assured by availability in Energy-Plasma of general Universal Mechanism of Fields-Consciousnesses absolute informational transgression or United Idiopathic SS-TOO-IIYS-SSS-Ingredient of Macrocosmos, representing SSS-Ether of «Everything Being.»

3.0894. Already known to you Universal DDIIUYI-Entity IT-, TS-, and IG-Ingredients together with all infinite set of Modi initiated by them present in 36-dimensional Ethereal Plasmic Forces Diapason (that is, FLAAGG-TUU; should not be mixed with DDIIUYI-Entity TLAASSMA-A-Ingredient!) the most simplified categories of ethereal interconnection of Info-Creators with Focus Dynamics of Form-Creators . I will add also that in Macrocosmos Ethereal Complex-Plans and

Plan-Levels manifestation conditions (to $\pm 24^{\text{th}}$ dimension) these interconnections are provided by Transcendent IIYY-YY-SS-MM- and OULLGNOO-SS-ST-Ingredients, and in Form-structures of Fields-Consciousnesses Plan-Overtones (from $\pm 12^{\text{th}}$ to 0^{th} dimension) — by RIISSTDRRAALLMAA-A-Ingredient (there is own kind of ethereal component in aiyyyaic birvulyarity type — to $\pm 36^{\text{th}}$ dimension — provided by UUOLL-SLAILLI-I-Ingredient specifics).

3.0895. The universal ethereal «projections» in UPDR structure have defined the same Info-Creators universal properties during their *resonational* interacting with Form-Creators (with appearing of Macrocosmos amplificational Focus Dynamics resopason-dimensional different-Qualitative perturbations). It is availability of these «projections,» which provides all infinite diversity of all possible variants of Self-Consciousnesses Forms and CCI's different-level «material» (energy-informational) manifestation, and also duvuyllerrt combinations of countless Worlds' Form-systems, subjective Realities, STCs, Conversums, Universums, and subjectively produced by them continuum (protoformal-diapason), conversum (general-protoformal), and universum (different-birvulyart) Universes versions. Each of these variants is holochronely-simultaneously formed as a result of Energy-Plasma *amplificational induration* — heterogeneous SSS-signs different-Qualitative covarlterly-geyliturgent *combination-compression* at UPDR universal properties induced influence on them.

3.0896. In this regard I would like to remind you that Universal Plasmic-Differentiational Radiation (or SSLOOR-SSS-LLAASS, meaning absolute manifestation medium providing joint Info- and Form-Creators resonational interconnections in Macrocosmos space-time regimes all infinite variety) has been generated as a result of simultaneous interaction between irrkoglictive and eglleroliftive Impulse-Potentials, or rather as natural reaction of primogenitive SSS-State on mercavgnation initiated by irrkoglictive IP. That is, eglleroliftive IP just has provided instrauration (*sort of* «return») of peculated (provoked) amitsissimal (that is, *ambivalent* with respect to the given Macrocosmos) SSS-State into primogenitive one. During joint holochrone interaction of absolutely all different-type Impulse-Potentials structuring USIP (and thus, Macrocosmoses all types), primogenitive SSS-State qualitatively instraaurates to absolutely universal to It State that is, confective State (which could not be called as «State» already).

3.0897. Therefore, despite of the presence in the name UPDR of only Differentiational sign (there are special reasons for that), one could say that UPDR is holochronely structured both by Info-Creators *irrkoglictively-qualitational* Creative Activity (FDR, UMPI, and all their ampliative analogs), and by Macrocosmos Form-Creators's *eglleroliftively-amplificational* Focus Dynamics (FCA, FIMI, and all their ampliative analogs). That is why, from the standpoint of Info-Creators' Creative Activity, only qualitational nature is peculiar to UPDR (heterogeneous signs combinations transgression from Energy-Plasma primogenitive SSS-State to consummative State). And from the standpoint of Form-Creators FD (including us) — only amplificational nature (as heterogeneous SSS-Signs different-Qualitative convergence from consummative State to primogenitive One). Although, considering this, every Act (of Focus Dynamics or Creative Activity) implementation in one of these Directions is in no way possible without an Act holochrone implementation (in the same manifestation conditions!) in another Direction.

3.0898. Namely this UPDR Universal property — providing all opportunities for simultaneous realization of Creators of both Development Branches (SYNTHETIC and RESOSCONTIONAL) in the given Macrocosmos type — is conditioned by the presence in It of Macrocosmos HCI variable ethereal component (SS-TOO-IIYS-SSS), Which defines absolutely all informational filling (multipolarizational contents) of any particula of Form-Creators slloogrent focal Configuration in any among their manifestation Levels. Though, in this case (with respect to UPDR) Ethereal Component informationally provides just general SSS-State internous stability and functionality of Mechanism of annihilation «inside» Information of all possible consequences of mercavgnation Act (meaning, «the return» of all consummative dissonational «projections» structuring this Macrocosmos type to primogenitive State; concurrently with this, transformation of absolutely all Macrocosmoses into primogenitive State and transition of absolutely all Information to confective State take place).

3.0899. Not a single Self-Consciousness Form could manifest in Space-Time «local» conditions without subterraneously peculiar to it «ethereal» structure (peculiar not by manifestation Form, which can have many parallel analogs or looking similar to each other «doubles,» but by interconnections quality organizing its focal Configuration). The main role in forming any energy-informational combinations (where Information is presented by ether, and Energy — by focal Configurations that is, NNAASSMM) is played by, first of all, qualitative features of that diffuzgent set of different-protoformal dimension parameters (diapason), in specific conditions of which the given combination is realized, and, second, by Focus Dynamics typical properties (its creative Potential that is, VLOOOMOOT). That is why such different-Qualitative and dual manifestations of Focus Dynamics generated by different focal Configurations (from photons and fermions to vegetables, animals, and macro-scale Cosmic Entities) become simultaneously possible in sort of «one and the same» dimension type of sort of «one and the same» diapason.

3.0900. For example, «ethereal bodies» (TEC and VEC) informational structure organizing Self-Consciousnesses Forms of inhabitants of the huge multitude of cosmic — *extraterrestrial* — Existence types sufficiently differs in *sort of one and the same diapasons dimensions* (I recall that different Space-Time slloogrentness «points» dimension is never «one and the same,» because it is produced by specifics of inter-protoformal interconnections structuring Focus Dynamics of Form-Creators), from the structure of «ethereal shells» of Self-Consciousnesses Forms peculiar to GREIYSLIISS inhabitants.

3.0901. Because to form their SFUURMM-Forms all of them use different informational particulas structuring them energetically (meaning, realizationally) by unique features, which are peculiar to each of Proto-Forms representatives, who develop in Focus Dynamics exceptional manifestation conditions of other Planetary and Stellar Entities. Namely this specifics allows creatures of diverse subjective Realities to comfortably realize and feel themselves only in conditions of the surrounding World modelled with their own Conceptions and to naturally experience (outwardly and inwardly) all specific forms of its (meaning, their *own!*) creative self-expression.

3.0902. Due to the presence of their «own» ethereal conductors, people like every other Earth creatures have real opportunity to fix and analyze in own subjective Perception systems (via common Focus Dynamics of DNA Form-Creators, brain, systems and internals, cells bio-Creators, molecules

and atoms Creators) different-protoformal Focus Dynamics different types. This Dynamics is diffuzgent with respect to those energy-informational interconnections, which structure their own Self-Consciousnesses Forms manifested for providing the two-dominant Synthesis process initial stage in lluvvumic birvulyarity type (ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence).

3.0903. This means that we — as biological carbon creatures (in other Planetary systems the same role is assigned to absolutely other Self-Consciousnesses Forms) — would not be able to normally exist and creatively realize if there would not be countless number of bacterial and virus Proto-Forms in our NUU-VVU-Form-Types biological analogs structures. These Proto-Forms are, in turn (depending on more or less covarllertness degree), interconnected with all diversity of different cells bio-Creators' Proto-Forms, which structure functional systems, organs, and brain of our biological organism.

3.0904. We have to pay the appropriate price for this opportunity of full realization of our amplificational trends (development in lluvvumic Direction via successively implementing background different-protoformal Synthesis): we have to grant in our Focus Dynamics to other Proto-Forms' Form-Creators the base for partial realization by them of their own Synthesis Schemes. This, along with the global process of acquiring by us different-Qualitative Experience, has conditioned the presence in the process of our refocusings in lluvvumic Synthesis Scheme of diverse deviations to protoformal development Directions.

3.0905. These continuous qualitative deviations in our FD are the true reasons of appearing in it of such tensor manifestations as numerous deceases, physical and psychic suffering, and others (although, thanks to namely these svilgs-spherational realizations, the necessary Experience accumulation and convergence are carried out). That's because among different-protoformal Form-Creators, Who manifest via all multitude of our organism bio-Creators, there are both more and less covarllert interconnections. This is expressed through various tensor processes and phenomena, which are segregatiratedly coordinated and realized by our DNA Form-Creators (hereditary and congenital deceases, gene, chromosomal, and «molecular» deceases, and so on).

3.0906. Focal NUU-VVU-Configurations of our Form-Types («human persons») and f-Configurations of all Proto-Forms surrounding us (animals, vegetables, minerals) are produced by many common to them narrow specific focal-ethereal interconnections typical to chemical elements atoms. These highly-developed — to the given diapason — *atomic* (or *ionic*) Entities have already synthesized in own f-Configurations the physical existence Experience of the huge amount of Proto-Forms simultaneously manifested in this diapason. That's why they have acquired universal ability to simultaneously structure all molecular combinations both on the Earth and other Planets (in different degree and composition!). They act as all-joining mechanisms to all physical s-Realities different-protoformal types.

3.0907. Though, one should take into account here that generation from atomic Self-Consciousnesses Forms of molecular Self-Consciousnesses Forms all innumerable multitude is governed only by those physical laws and conditions (gravitational, thermal, baric, radiative, and other regimes), which define all specifics of physical (dense material) Existence of our and other

Planets during their different development ages. In «human» STCs the 3–4-dimensional diapason is their Creativity Sphere. At the same time, their manifestation dimension parameters will be absolutely segregated in STCs generated by Focus Dynamics of other Proto-Forms' Form-Creators .

3.0908. Here I would like to remind you one of the iissidiological axioms: «there is no two fermions alike.» This means that each of Self-Consciousnesses Forms of one and the same substance atoms, despite of common to them structure (the same mass and nucleon-electron composition), still — *by own realizational «nature»* — are unique and inimitable, because every atom (as we are) at the given stage of its amplificational development has managed to assimilate in own focal Configuration that segregated Experience, which is mostly peculiar to some particular Proto-Forms.

3.0909. Covarllertly combining between each other by available focal-ethereal interconnections, many atomic Entities similar by some basic signs have been formed to particular groups — diverse substances atoms. But owing to Duvuyllerrtness Principle, some intermediate f-Configurations multitude has been formed from these diffuzgent groups. These Configurations depending on their manifestation changing regimes (pressure, temperature, gravitation, radiation, and so on) are able to demonstrate properties typical to other substances atoms. These subterransive features — so far too much subtle and indiscernible for our measuring instruments — are peculiar to atoms Self-Consciousnesses Forms, which structure diverse Stellar and Galactic Worlds' Form-systems. For example, hydrogen or carbon atoms having the same physical features demonstrate different creative trends in radically different conditions of their galactic manifestation.

3.0910. That particular circumstance is the main reason of generation in the given Space-Time slloogrent «point» of that narrow specific conglomerate of energy-informational signs combinations conditioned by Self-Consciousnesses Forms overall diffuzgentness Principle, via which interconnections diverse Synthesis Schemes and birvularity types simultaneously realize. All surrounding us reality, like ourselves, represents intermediate product of simultaneous realization of different-protoformal Experience of atomic Entities infinite variety. Owing to DNA limitless combinational diversity, every human biological organism (like other bio-creatures) represents unique Configuration of these different-protoformal focal-ethereal interconnections organized on different levels of ionic Form-Creators : molecules, cells, systems, internals, and brain.

3.0911. Let me remind you that NUU-VVU-Form-Types biological analogs are not We as People, because Our lluuvvumic birvularity type is qualitatively based on focal Configuration, which has achieved already «Creative Cosmic Potentiality» State. This State of deep — to this diapason! — Synthesis of two OO-UU (ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence), which allows their Form-Creators to steadily involve to own general Focus Dynamics ampliative Form-Creators from impersept group (ALL-Unity), represents starting «point» of Our introduction into LLUU-VVU-Entities slloogrent Focus Dynamics.

3.0912. Thus, through the process of focusing in biological NUU-VVU-Form-Types each of people conditionally acquires just potential opportunity needed during accumulating different-protoformal Experience to finally identify own realizational Interests, among which only specific and stable combination in Focus Dynamics of high-sensual Intellect and high-intellectual Altruism typical

signs allows to be introduced to the process of obtaining those — still just most elementary! — properties and skills, which distinguish lluvvumic birvularity type from all the others. Those of the «present» people, who could not finally to identify exactly this choice, will gradually (via steady concatenation and solvation with the signs of some of protoformal Directions) refocuses from NUU-VVU-Form-Types to other two-dominant Synthesis Schemes and accentuate their «current» and «future» Interests in completely different birvularity types.

3.0913. One should note that covarllert ethereal «projections» of common to many Proto-Forms atomic interconnections underlie the Diffuzgent Unity and Sll oogrentness Factors of general Focus Dynamics of Form-Creators (of both our Planet and the others), which in turn conditions availability of realizational Unity of all Proto-Self-Consciousnesses Forms simultaneously structuring in this diapason focal Configurations of many Planetary Entities. Impersept and cruvursorrt interconnections between atomic Self-Consciousnesses Forms, which extend in the given manifestation conditions beyond their Creative Activity particular parameters (simultaneously in ampliativeness and depliativeness directions of general vibrational regime, meaning, to doolls and flaks diapasons), duvuyllerrtly structure that part of the surrounding reality, which we conditionally call «dark matter» and «dark energy.»

3.0914. Though, all Planetary and Stellar Entities are interconnected between Each Other — via each of *dimensional* varieties structuring the given manifestation diapason — by means of not only atomic, but also by photon-fermionic focal-ethereal interconnections levels, what represents integrating framework for forming in the given Space-Time sll oogrentness «point» of interprotoformal Conglomerate of interconnected between Each Other focal Configurations of all these different-Qualitative Cosmic Entities (Planets, Stars, Black Holes, Quasars, and so on), Which — by degree of diffuzgent covarllertness or imperseptness of their definite Self-Consciousnesses Levels — have produced all diversity of astronomic Universe large-scale structure: Planetary systems, Stellar clusters, Nebulae, and also Galaxies groups, clusters, and super-clusters.

3.0915. Thus, all this diversity of Self-Consciousnesses Proto-Forms (including also our manifestation bodies) has opportunity to jointly co-exist just due to availability in this different-dimensional manifestation diapason of common to all Proto-Forms Energy and Information (Ether) carriers — different-Qualitative photons and fermions Self-Consciousnesses Forms. If it was not for peculiar to them universal Experience of different-protoformal wave Existence on the conditional boundaries with doolls and flaks STCs groups, there would not be any opportunity for different-Qualitative Form-Creators simultaneous manifestation via Focus Dynamics of those Existences Forms all multitude, which constitute structural firmware of both «ourselves» and surrounding us reality.

3.0916. Other Planets focal Configurations can be structured *to some degree* by Focus Dynamics of the same atomic Form-Creators, Who are peculiar to the Earth focal Configuration. Though, unique conditions providing their photon-ethereal interconnections manifestation (temperature, pressure, radiation, and others), can so strongly influence on the segregatirated morphogenesis processes that Self-Consciousnesses Forms engaged in realization of the *same* different-protoformal Synthesis Schemes can outwardly strongly differ from those, which we are able to observe around us

(including also Iluuvvumic Scheme). One should take into account the fact that these extraterrestrial focal Configurations comprise interconnections of the large number of atomic Self-Consciousnesses Forms, which are completely inconsistent with our Planetary Entity.

3.0917. Hence, at times extremely huge difference (in comparison with what we know) in unique properties and segregatirated features of ethereal shells, which structure creatures diverse Self-Consciousnesses Forms dwelling within different Planets. If we are able to perceive them at least somehow (due to the presence of *common* atomic Entities in our and their manifestation bodies), their usual properties being expressed in alien to them manifestation conditions loose in our Focus Dynamics a part of peculiar to them interconnections. Because of that, their creative self-expression ways are realized in our s-Realities narrow specific conditions in a completely different way, than this occurs in their own s-Realities (this seems to us to be exclusive plasticity, fluidity, ephemerality, proportion and volume, excessive dynamism, and so on).

3.0918. As we have found out already, all described above different-protoformal interconnections produced by atomic and photon-fermionic UPDR Form-Creators are implemented owing to availability in the Macrocosmos structure of universal informational «projections» or ether. For example, 36-dimensional Ethereal Plasmic Forces Diapason (FLAAGG-TUU) Info-Creators provide simultaneous realization of completely all types of Self-Consciousnesses Forms and structured by them CCIs, reflecting informationally in every Space-Time manifestation «point» the Main Principles of dynamic self-organization of their Form-Creators via jointly realized by them diffuzgently-collective creative work.

3.0919. In each of these countless manifestation Levels just strictly defined resonational zone of different-Qualitative energy-informational Flows dominating modulation has the largest activity. This zone is typically combined with realizational abilities of this or that among Creativity Spheres, segregatiratedly formed in each of four main Energy-Plasma States of the given DDIIUYI-Entity (Primary, Secondary, Tertiary, and Quaternary).

3.0920. Specifically, informationally-connecting link between all Forms of Collective Cosmic Intelligences, Who structure by their own Focus Dynamics all these States, is Ethereal Variable Generative or EVG (SLAILLI-SVUU), which comprises in an immutable state all standard (for every resopason dimensions) codings. They reflect in Macrocosmos HCI slloogrent Focus Dynamics the Main Principles of Its Self-Organization in Space-Time. I have used the word «variable» in the term «EVG» not because these Cosmic Codes are by themselves inclined to steady alteration (if that were the case, there would not be any sense in their standardness!), but owing to the fact that depending on the way and conditions of this or that dimension type manifestation conditions, these codings informational Configurations automatically acquire in Focus Dynamics of Self-Consciousnesses Forms, which use them, more and more notional meanings (that is, manifest slloogrentness property).

3.0921. EVG-codings could be compared with original informational «matrices» necessary to generation of completely all Self-Consciousnesses Forms. Any consummative (form-building) Process Act just could not be accomplished without them (owing to the absence at synthesizing Form-Creators of standard Information about this Act scheme and realization principles). For example,

penetrating all Secondary Energy-Plasma focal Configurations (Inter-Galactic Ethereal Complex-Plan, IYY-YY-SS-MM-Level — from +24th — through 0-ingredient — to -24th dimension), SLAILLI-SVUU provides in each of focal-ethereal interconnections absolute immutability of consummative (meaning, peculiar to conclusive mercavgnation Act) Macrocosmos codings reflecting in amitsissimal SSS-State corresponding «projections» of Information overall USIP-Confectization.

3.0922. In doing so, the most important role in the standard «projections» «distribution» process by particular Directions of this manifestation diapason (to $\pm 24^{\text{th}}$ dimension) is assigned to known to you Transcendent SSMIYSMAA-A-Ingredient, Which in turn is informationally fully supplied by ethereal «projections» sll oogrently generated into IYY-YY-SS-MM-Level specific conditions by joint interconnections (humanational efforts) of Universal Creators-Pictusators and Creators-interpreters of AYFAAR the Highest Collegiate Cosmic Intelligence Idiopathic TLASSMA-A-Ingredient. I still cannot trace «the origination» and manifestation Process of namely IT-Ingredient ethereal Configuration (to have the detailed Access to it, there should be specifically initiated exhibition and adaptation Mechanism in Focus Dynamics of Self-Consciousness Form in the Primary Energy-Plasma highest Levels, what in turn requires ability of «leaving» beyond the limits of DDIIUYI-Entity Focus Dynamics).

3.0923. About as much as described above (though, by more simplified Schemes), the Process of successive primogenitization of Information consummative (dissonational) State — via EVG-manifestations all diversity — in different-Qualitative Focus Dynamics of Tertiary State Form-Creators is implemented. In conditions of Cosmic Ethereal Plan-Level (from +12th — through 0-ingredient — to -12th dimension) Ethereal Variable Generative transgressively «reprojects» Its form-shaping role to Configuration of peculiar to It ethereal analog converting to *variable ethereal component* or VEC (OULLGNOO-SS-ST), which informationally binds between each other absolutely all Proto-Forms of Immanent GOOLGAMAA-A-Ingredients of the given DDIIUYI-Entity.

3.0924. Availability of VEC in ethereal Configuration of Each of IG-Ingredients allows absolutely all multitude of different-protoformal Form-Types, producing with own ethereal interconnections Immanent GOOLGAMAA-A-Modus of 0–12-dimensional Focus Dynamics of Macrocosmos HCI (RIISSTDRRAALLMAA-A), to maintain among each other — more or less actively — all possible ethereal interconnections that promotes sufficient deepening of different-Qualitative synthetic Processes of creative realization of all different-type Collective Cosmic Intelligences, implementing via all Self-Consciousnesses Forms, which structure with own Focus Dynamics different-protoformal dimensions types in the given manifestation diapason.

3.0925. I wish to highlight particularly that every human «person» is provided with own realization Mechanism of his/her Focus Dynamics via peculiar to him/her VEC-Activity. This exhibition Mechanism initiation occurs with the help of FATTMA-NAA-A-Articles Info-Creators, Who informationally provide Focus Dynamics of Form-Creators of all particular «personal» Interpretations (Form-Types) of *every human Stereo-Form*. As was reported in the previous section, exhibition providing Mechanism of Focus Dynamics of *each of Form-Types* of any Proto-Self-Consciousness Form along with VEC possesses also «personal,» meaning, «individually» synthesized energy-informational base, which reflects by itself all minute details of its subterransive rotational

Cycle, structured with development scenarios countless number, which concatenationally-multipolarizationally successively replace each other in «individual» Focus Dynamics.

3.0926. This highly detailed Information, by every instant «expanding,» in «the current» variant of multipolarizational Focus Dynamics of *every human «person,»* specific inertial circumstances of his/her Life, is presented by Configuration of own ethereal «projection» of variable ethereal component, owing to which every Form-Type is objectively provided by «local» manifestation in Space-Time particular resonational point. Since every Form-Type focal Configuration manifestation is attached (via the whole multitude of «personal» Interpretations) to particular Time Flow, the carrier of this Information in every «person» FD is *temporal ethereal constituent* or TEC (UUOLL-SLAILLI-I), which realizes through subjective Perception system with the help of subterransive to every «person» ASTTMAY-RAA-A-Parvula. «Personal» realization is accomplished by every instant via specifics of the most active in «the current» Focus Dynamics subjective SFUURMM-Forms, generated by focal Configurations of the whole multitude of protoformal bio- and Form-Creators, Who structure the given NUU-VVU-Form-Type of Self-Consciousness.

3.0927. One should also bear in mind that besides VEC-Activity realization stereoformal Levels (via the whole multitude of «personal» Interpretations), there are also such ethereal interconnections, which provide slloogrent Focus Dynamics of Each of Planetary Entities in each of Tertiary Energy-Plasma Self-Consciousnesses Forms manifestation diapasons. Meaning, Every Planetary Entity during Multipolarization of peculiar to It Focus Dynamics uses own *Planetary variable ethereal components* (PVECs), Info-Creators of which actively participate in resonational structuring of creatures all Forms dwelling simultaneously in all countless Worlds and Realities of the given Planet. For every diapason of Its manifestation there are own types and abilities of creative VEC-realization. For example, this informational function in GREIYSLIISS-Entity Self-Consciousness is accomplished by GROO-MM-SVUU.

3.0928. In the process of subterransive organization of NUU-VVU-Form-Types Form-Creators Focus Dynamics, Info-Creators of this PVEC-«projection» actively manifest via realizational activity of Form-Creators of *luta*, *christal*, and *equally synthesized* NUU-VVU-Self-Consciousnesses Forms, and in Focus Dynamics of Form-Types of the other Proto-Forms — via Form-Creators of peculiar only to them focal structures. Due to the close and deep collaboration of universal PVECs (GROO-MM-SVUU) and «individual» («personal») TECs (UUOLL-SLAILLI-I), which resonationally activate and diffuzgently structure with the necessary informational Codes karmic Channels of each of the six «lowest» lluuuvvumic IISSIIDII-Centers, Each of Tertiary Energy-Plasma Cosmic TOO-UU-Entities has opportunity to simultaneously Self-Realize in any of GREIYSLIISS subjective Realities types both via Own personal Self-Consciousnesses Forms and via LLUU-VVU-Form-Types of typical to It narrow specific manifestation diapason.

3.929. So, now we can list ethereal-focal Form-structures potential composition, which — with more or less portion of peculiar to them Creative Activity — participate not only in generating Focus Dynamics of all NUU-VVU-Form-Types biological analogs of this diapason, but also in organization of Focus Dynamics of SSLUU-L-LUU — Integral Cosmic Body of Human that is, Us as SSUI-SS-SFAA-Creators of Universal AIY-YAA-Entity.

Chapter 4. Some subjective criteria of affiliation of Self-Consciousnesses Forms to simultaneous focal realization of Collective Cosmic Intelligence of the LLUU-VVU-Entity

3.0930. In the previous two sections of this volume the Conception of the infinite diversity of creative realization Forms was given in sufficient detail, with the help of which Collective Cosmic Intelligence of countless LLUU-VVU-Entities in close creative interaction with Self-Consciousnesses Forms of many other, diffuzgent with respect to It, different-protoformal CCIs types, forms in Space-Time — in every resopason of Its simultaneous manifestation — peculiar only to It lluuvvumic birvularity type, which specifically realizes not only with the help of NUU-VVU-Form-Types (human, human-like and humanoid) all possible diversity, but also (in narrow specific manifestation conditions of many different-galactic Planetary and Stellar Entities) via Focus Dynamics of Form-Creators of many other Self-Consciousnesses Forms implementing the same Synthesis Schemes. These Forms could vary excessively from everything, your «current» Perception is capable of. But nevertheless, by their humanational character, all of them perform in different Existence regimes functions of exactly lluuvvumic birvularity type.

3.0931. I'm forced to speak about the LLUU-VVU-Entity in plural because of the strong subjectivism of Form-Creators of our biological Perception systems, Who are still just not capable of evaluating and analyzing different-Qualitative realizations of all variety of lluuvvumic Form-Types Self-Consciousnesses. These Form-Types are simultaneously realized in many Space-Time resonational points (in Worlds' Form-systems, subjective Realities, and STCs) as creative manifestations of the same TOO-UU-Entity, Which slloogrent Focus Dynamics penetrates countless number of completely different Time Flows and different Universes at once.

3.0932. Such fundamental separation of some Self-Consciousnesses Forms with others — which is peculiar to our brain bio-Creators providing our Perception systems all functions — does not exist at all on the level of energy-informational interconnections between any different-type focal Configurations, due to overall informational interconnectionship and interdependency of Focus Dynamics of all diffuzgent Collective Cosmic Intelligences types.

3.0933. That is, there are no any strict unambiguity and distinctness, as you imagine it, in the Macrocosmos structures — owing to both availability of Diffuzgentness Principle and slloogrentness property of any of simultaneously manifested focal Configurations. Each of Synthesis Schemes functionally peculiar to this or that of the infinite CCIs multitude (in every resopason of own manifestation via Focus Dynamics of corresponding to it Self-Consciousnesses Forms) transgressively-convergently «comes apart» in each of skrruullerrt system «points» on many other, duvuyllerrtly-covarllert to each other Synthesis Schemes (as more simple, as more complex), generating in this way

in Space-Time unified and infinite conglomerate of «spheroidally» spreading different-protoformal focal-ethereal interconnections, which I define as «bivulvularity.»

3.0934. There is neither our far-fetched inversuality (opposingness, dualness), nor any sort of other trends to inconsistency, but only complex-structured covallert transitions between *different-Qualitational* signs different-Qualitative combinations, which provide the process of their total convenientization (balancing, harmonization of existing different-protoformal interconnections) in sllougent Focus Dynamics of each of narrow specific manifestation resopasons.

3.0935. Consider, for example, Focus Dynamics of Form-Creators of the two invaderental (dominant) OO-UU-Entities, Which provide the lluuvvumic bivulvularity type simplest Synthesis Scheme — ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence. Owing to the difference in *catalyzing* processes of background Synthesis, Form-Creators of each of these OO-UU, while *multipolarizationally* realizing via different-Qualitative Focus Dynamics of diverse NUU-VVU-Form-Types, — on sub-...-sub-Aspect levels of own «internal» interaction — structure invaderental combinations signs completely differently in every human subjective Reality type and resonationally involve peculiar to these OO-UU «tetrahedral» sub-...-sub-Aspects of each of the rest ten OO-UU-Entities to the causal interconnections structure.

3.0936. In the given manifestation conditions (including not only continuum-like, but also psycho-mental, social!), with respect to some of inter-Aspect invaderental combinations, some of the OO-UU ALL-Unity Aspects reflect higher degree of covallertness, in other conditions they are ALL-Aspiration Aspects, in the third conditions they are ALL-Integrity Aspects, and so on. All this strongly affects the structure of focal-ethereal interconnections, which organize subterransive composition of each of invaderental OO-UU-Entities.

3.0937. Thus, within the limits of one and the same Synthesis Scheme — though, in different manifestation regimes! — different realizational opportunities or Focus Dynamics development Directions are produced, which I have identified as different-protoformal ones, because in own boundary states each of these protoformal Directions concatenationally transmutes to Focus Dynamics of Form-Creators of some of many Proto-Self-Consciousnesses Forms, meaning, it undergoes eglleroliftive *pronoontivization* — accentuation on some other bivulvularity type, where *the same* invaderental OO-UU-Entities (but in completely another Synthesis Scheme!) are presented in own qualitatively different (than NUU-VVU has) subterransive composition.

3.0938. This *retardational* (meaning, degrading, with respect of an existing Synthesis Scheme) process of replacement of some focal-ethereal interconnections to the others, which are mostly covallert regarding not the given Synthesis Scheme, but some other one, starts in Focus Dynamics long before *suppozitation* (complete and radical replacement) of this Self-Consciousness Form to another (protoformal) one occurs in it, because there are Form-Types countless number in the NUU-VVU-Form structure, and focal Configurations of these Form-Types, manifesting simultaneously in many STC groups, correspond to the different degrees to some of the signs combinations typical to Focus Dynamics of Form-Creators Self-Consciousnesses of these or those Proto-Forms. The whole

multitude of these different-Qualitative by own refocusing trends NUU-VVU-Form-Types are the realizational basis of all different-protoformal development Directions.

3.0939. So, in the meantime, it is impossible for us to really understand, where some ethereal-focal interconnections end and completely another energy-informational activity begins. Though, if we do not start to subjectively split all this — completely inconceivable for our brain bio-Creators — Unity on many signs convenient to our abstract Conception and logical Understanding, selecting from them certain subterransive properties, features, conformities and non-conformities, then we'd have nothing to talk about. Gradually and successively, getting more and more deeper into iissiidiological Conceptions, you will accustom yourselves to lesser concentration of your FCA on all possible discretenesses, trying to focus more on their all-uniting Essence (Laws, Principles, trends), which still invisibly hides from you behind each of observed by you particular manifestations.

3.0940. Typical to the LLUU-VVU-Entity Schemes of inter-Qualitative Synthesis in every manifestation diapason of Its Own Focus Dynamics are [... ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence ↔ ALL-Unity + (ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) ↔ ALL-Integrity + (ALL-Unity + ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) ↔ ALL-Aspiration + (ALL-Integrity + ALL-Unity + ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) ↔ ALL-Essentiality-ALL-Permeability + (ALL-Aspiration + ALL-Integrity + ALL-Unity + ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) ↔ ALL-Knowledge-ALL-Informedness + (ALL-Essentiality-ALL-Permeability + ALL-Aspiration + ALL-Integrity + ALL-Unity + ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) ↔ ALL-Primordiality-ALL-Initiality + (ALL-Knowledge-ALL-Informedness + ALL-Essentiality-ALL-Permeability + ALL-Aspiration + ALL-Integrity + ALL-Unity + ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) ↔ ...]. The subjective definition problem for the LLUU-VVU-Entity (as for any other TOO-UU-Entity) consists in the fact that It (as all other TOO-UUs) activates to the varying degrees and uses Focus Dynamics of Form-Creators of many other different-protoformal Self-Consciousnesses Forms for successive-holochrone realization of these Schemes. Though, this brings for us very severe problems to the definition process of those qualitative features, which would accurately show affiliation of examined by us Focus Dynamics to LLUU-VVU-signs.

3.0941. I previously gave an example that all structuring our biological organism Proto-Forms (atoms, molecules, cells, germs), though not being Us directly (for example, being People), actively help Us (in this case, Us as Form-Creators synthesizing human genome type) on the basis of peculiar to them differentiated Experience to carry out Our own function in the general amplificational Macrocosmos Process. of course, to determine factors, showing involvement of some NUU-VVU-Form-Type Focus Dynamics to the LLUU-VVU-Entity Creative Activity, we can assess the presence in «person» choices of the stable HSI- and HIA-signs (high-sensual Intellect and high-intellectual Altruism), which are typical to ampliative manifestation forms of mental (logical thinking) and vital (sensuousness, emotionality) activity.

3.0942. I will add also that deep Synthesis of these two signs with ALL-Unity OO-UU-signs inevitably leads to activation in «person» Focus Dynamics of SFUURMM-Forms of the third lluuvmic sign — Immunitant Responsibility (IO), which in own subterransive realizations is self-sufficient and free from the presence of any opportunities of violence manifestation in Focus Dynamics of «personal» Self-Consciousness.

3.0943. Meaning, Immunitant Responsibility typical signs activation in «person» Self-Consciousness implies unconditional state of fundamental necessity to take responsibility not only for own deeds and actions, but also for their consequences, and also state of personal willingness of an individual to any self-sacrifice acts for the sake of the early achievement of the overall welfare of the people, for the sake of whole-hearted Service to the highest Idea and the most ampliative implementation of Its SFUURMM-Forms in the surrounding reality. The presence of this sign in Focus Dynamics Self-Consciousnesses allows «person» to never forget and deeply realize the fact that all quality of his/her life and creative self-realization abilities depend just from him-/herself and from no one else.

3.0944. It is very hard to us to distinguish in practice, in what way ampliative mentality type of OO-UU-Form-Creators of ALL-Will-of-ALL-Intelligence PCQ differs from ampliative mentality of the same Energy-Plasma mentoplasmic components, what are the signs of additional six OO-UU — ALL-Primordality–ALL-Initiality, ALL-Mobility–ALL-Presence, ALL-Knowledge–ALL-Informedness, ALL-Aspiration (and also ALL-Unity and ALL-Steadiness–ALL-Stability — as diffuzgently-transitional between ASTRAL-Plasma and MENTAL-Plasma). The same applied to the search of subjective differences between ampliative vitality type of OO-UU-Form-Creators of ALL-Love–ALL-Wisdom PCQ and the signs of ampliative vitality typical to Form-Creators of the other six OO-UU — ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Abundance–ALL-Fullness, ALL-Voidness–ALL-Vacuumness (and also ALL-Unity and ALL-Steadiness–ALL-Stability — as diffuzgently-transitional between ASTRAL-Plasma and MENTAL-Plasma).

3.0945. The search of typical differences between human and different-protoformal signs of HSI and HIA is something we have yet very, very much to learn from our Experience, while enhancing not only our persistent improving in iissiidiological Knowledge (the base of achieving «Creative Cosmic Potentiality» State), but also own intuitiveness, which helps us — via more and more ampliative SFUURMM-Forms of Human collective Subconsciousness — to successively refocus to lluuvvumic birvulyarity type. In this regard I want to say some words with the aim of facilitating your search of reliable Motivation to studying and mastering so complicated intuitive Knowledge, such as IISSIIDIOLOGY. Your brain bio-Creators perceive it as extremely difficult one, because convenient neuronal interconnections logical chains already acquired by them earlier lose own efficiency and start to heavily «glitch» during detailed examination and thorough analysis of iissiidiological Information.

3.0946. This malfunction in harmonious work of both cerebral hemispheres occurs due to the fact that all your previous Conceptions about yourselves and the surrounding you reality appear to be too much outdated and completely inconsistent during IISSIIDIOLOGY mastering to be useful in comprehending the Essence of what you read. Though, new iissiidiological Conceptions, which listlessly manifest in your Self-Consciousness Focus Dynamics, are still very unsteady and weekly active, because they did not have time to become «overgrown» with that multitude of new neuronal interconnections, which are necessary to form in your Imagination clearly conceivable and large-scale abstract constructions.

3.0947. What is the way out, you ask? Is that the more often and persistent will be your pressure on the brain bio-Creators with iissiidiological images of high-frequency thinking and feeling, the more

you will force them — with the aim of search for new ways of comprehending completely new to them Information, which is continuously involved to your Focus Dynamics — to radically change habitual neuronal interconnections functional chains and strive to pave exactly those neuronal ways instead of the previous ones, which are typical to the brain of the more amplificationally developed among your «future» biological NUU-VVU-Form-Types, Whose Focus Dynamics are already more steadily fixed in the process of Synthesis of the signs of not some of the possible protoformal development Directions, but namely lluuvvumic birvulyarity type, meaning, HSI and HIA.

3.0948. And if each time the process of your systematic IISSIIDIOLOGY studying represents not a tranquil fiction reading going on without unremitting attempts at achieving deep and thorough immersion to the core Essence of the writing, but powerful mental squall, epic «battle» between old and new SFUURMM-Forms, thus you will be able to force your brain bio-Creators to experience prolonged stress and to actively apply to their existing abilities of assimilation of previously not used by them neuronal chains (which are already activated in the brains of your «future» more ampliative «personal» Interpretations) in the search of the earliest possible way out. Owing to this process of radical qualitative renewal (or rather, inbrauration — amplificational regeneration of own primordial Essence) of functional interconnections between both hemispheres bio-Creators, one day you will trace in your Life facts of your unexpected manifestation of all possible extrasensory skills, which will promote more productive results obtained by you in meditation practice.

3.0949. Then you will not need to attempt by logical and analytical way to define very intricate differences between protoformal and human varieties of mental-sensuous activity, because intuitive iissiidiological Knowledge the most actively influences on development in your Self-Consciousness of mechanisms of not only logical, but, above all, intuitive interconnections of brain bio-Creators with *human* collective Subconsciousness type (and also with Supraconsciousness, Superconsciousness Levels Form-Creators, and so on). Purposefully developing inside yourself not only the new Knowledge, but also successively unfolding extraordinary skills in «personal» Self-Consciousness, which you possess already in your «future» most favorable variants, you will be able intuitively and without any doubt to include to your Focus Dynamics peculiar to People HSI- and HIA-signs in order to more confidently and actively self-develop in lluuvvumic birvulyarity type.

3.0950. To achieve this goal you now simply cannot do without clear Conceptions of joint work of Form-Creators and Info-Creators of that refocusing Mechanism of exhibition, which is totally typical to all LLUU-VVU-Forms realizing in this dimension diapason with the help of NUU-VVU-Form-Types all possible analogs. Objective difference between them consists in the degree of manifestation in Focus Dynamics of Form-Creators of invaderental OO-UU-Entities for lluuvvumic Synthesis Scheme and specific directivity in it of Creative Activity of SLUI-SLUU-Creators of these or those karmic Channels (DUU-LLI), structuring Levels of Self-Consciousnesses of all NUU-VVU-Form-Types. Let me remind you that SLUI-SLUU are Tertiary Energy-Plasma Info-Creators, Who, resonationally interacting with SLAA-SS-MII-Creators of focal Configurations, produce all EIYG-SS-MII-Sphere of realizational Creativity of absolutely all Proto-Forms in megadiapason from 0.0 to ± 12.0 dimension inclusive. Their more ampliative analogs — GLLAA-GLLII-Creators — provide ethereal-focal interconnections for manifestation of more developed SSLOO-SS-SNAA-Creators FD in Secondary Energy-Plasma (from ± 12.0 to ± 24.0) via active participation in Cosmic Creativity NAA-GLLII-UU-Sphere.

3.0951. Each of IISSIIDI-Centers functionality is provided due to availability in Its energy-informational structure of the twelve main DUU-LLI types, representing original space-time «tunnels,» which join between each other resonational zones (identical by qualitiveness) of Info-Creators of the definite Duplex-Spheres of collective informational Creativity (OLLAKT- and DRUOTMM-systems, FLUU-LUU-complexes) and realizational Creativity Spheres of corresponding to them Form-Creators . Under a wide range of conditions of Tertiary Energy-Plasma, DUU-LLI represent functional part of informational (ethereal) supplement critical systems of Focus Dynamics of Form-Creators of the whole multitude of GOOLGAMAA-A-Ingredient Proto-Forms. They could be compared by these signs with grand (limitless) and different-protoformal Existence Experience universal integrators, which by resonational principle are subterraneously generated into Focus Dynamics of every «person» during Temporal ethereal constituents (TEC) narrow specific «unpackings.»

3.0952. One should note that, depending on karmic Channels affiliation to this or that IISSIIDI-Center, the following different-Qualitative DUU-LLI-types could be highlighted in the slloogrent Focus Dynamics of any human «person:»

- 1st IISSIIDI-Centers resonational pair — TROOFT-LLI (for ARGLLAAMUNI-Iissiidi) and GLIILSS-LLI (for INGLIMILISSA-Iissiidi);
- 2nd IISSIIDI-Centers resonational pair — GRAALG-LLI (for ORLAAKTOR-Iissiidi) and IISTL-LLI (for AIGLLILLIAA-Iissiidi);
- 3rd IISSIIDI-Centers resonational pair — OLGRUU-LLI (for ULGLUU-Iissiidi) and SVUUSSL-LLI (for SSAASSFATI-Iissiidi);
- 4th IISSIIDI-Centers resonational pair — PLIIFM-LLI (for OLGOOLLONI-Iissiidi) and LIYYU-GLLI (for AANI-Iissiidi).

ARGLLAAMUNI-Iissiidi GROOMPF-Creators (SLUI-SLUU) realize in the 1st pair interconnections via TROOFT-LLI-Channels, and INGLIMILISSA-Iissiidi PLIISSMA-Creators (SLUI-SLUU) — via GLIILSS-LLI-Channels;

ORLAAKTOR-Iissiidi KLOORTM-Creators (SLUI-SLUU) realize in the 2nd pair interconnections via GRAALG-LLI-Channels, and AIGLLILLIAA-Iissiidi AAIGLA-MAA-Creators (SLUI-SLUU) — via IISTL-LLI-Channels;

ULGLUU-Iissiidi UULDMD-Creators (SLUI-SLUU) realize in the 3rd pair interconnections via OLGRUU-LLI-Channels, and SSAASSFATI-Iissiidi SSOUISST-Creators (SLUI-SLUU) — via SVUUSSL-LLI-Channels;

OLGOOLLONI-Iissiidi LOOMGD-Creators (SLUI-SLUU) realize in the 4th pair interconnections via PLIIFM-LLI-Channels, and AANI-Iissiidi GLOOGOLM-Creators (GLLAA-GLLII) — via LIYYU-GLLI-Channels.

3.0953. One should also note that eglleroliftive svilgs-spherational Dynamics within the limits of Creative Activity of every SLUI-SLUU-Creators and Form-Creators resonational pair (in diapason of

their active interaction) is provided by specific interconnections between causal Creators-Curators of the given karmic Channels (DLLUU-LLI-GLLAA), which are peculiar only to this manifestation diapason. For example, energy-informational dynamics between SLUI-SLUU and Form-Creators of the first three TROOFT-LLI- and GLIILSS-LLI-Channels (in up to 1.0 dimension diapason) is provided due to curation by their causal URGLUKSTR-Creators (*ally and emffliissts*); from the fourth to sixth Channels (up to 1.5 dimension) — due to causal OGVOKSTR-Creators (*mimms and mmuunds*); from the seventh to eighth Channels (up to 2.0 dimension) — due to causal AFFTAKSTR-Creators (*argorrs and ogguls*); ninth Channel (up to 2.5 dimension) — due to causal IRKHMAKSTR-Creators (*ksulls and llollons*); tenth Channel (up to 3.0 dimension) — due to causal UYKKUYYUKSTR-Creators (*rrorroks and immls*); eleventh Channel (up to 3.5 dimension) — due to causal OSTROKKOLF-Creators (*dluolls and glemms*); twelfth Channel (up to 4.0 dimension) — due to causal UPDUKHVASSL-Creators (*iissmms and mirroms*), and so on.

3.0954. Ethereal Configurations of each of karmic Channels are arranged so specifically that allow activation in Factor axes of RRGLUU-VVU of every Self-Consciousness Form (in each of their manifestation resopasons) of SFUURMM-Forms of only the strictly particular type, which correspond to subterransive kleksing type peculiar to the given SVOO-UU-Entity focal Configuration (for example, this is «-VVU»-factor for NUU-VVU-Form-Types). This conformity degree could be compared with nuts and bolts, which have the same thread pitch and diameter. Stable UU-VVU-conglomerates of SFUURMM-Forms run through several DUU-LLI, which belong to the one resonational IISSIIDI-Centers pair, thus they capture with their ethereal Configurations the broader manifestation diapasons in Focus Dynamics. No one else (alien to this pair) SFUURMM-Form can manifest in Focus Dynamics via particular resopason DUU-LLI-combinations of this pair. Meaning, once activity of some IISSIIDI-Centers pairs in «person» Focus Dynamics is too weak compared to other pairs activity, then Conceptions typical to the passive pair will not be able to implement via this Form-Type.

3.0955. Owing to availability of common karmic Channels in Focus Dynamics exuberation Mechanism of each of diffuzgent Proto-Self-Consciousnesses Forms (for us, this Mechanism appears to be all IISSIIDI-Centers Form-structures joint activity), all Experience of simultaneous «internal» co-existence of all «personal» Interpretations of one Stereo-Form has opportunity to instantly re-translate not only «inside» of its slloogrent Focus Dynamics, but also between Form-Creators Self-Consciousnesses of diffuzgent with respect to It Proto-Forms, which Focuses of Close Attention have also managed to resonationally activate at least in some of the narrow «sections» of this frequency diapason.

3.0956. As mentioned above, this refocusing DUU-LLI-Mechanism is informationally provided in Tertiary Energy-Plasma conditions by availability in focal Configuration every «section» of corresponding Potential of the two ethereal Components — temporal ethereal constituent (TEC or UUOLL-SLAIILLI-I — from 0.0 to ± 9.0 dimension) and variable ethereal component (VEC or OULLGNOO-SS-ST — from 0.0 to ± 12.0 dimension). All their Contents exist in close and indissoluble informational interconnections with each other, and also with even more powerful cosmic communications ethereal system, which is spread out to the whole Universe Infinity — Ethereal Variable Generative (EVG or SLAIILLI-SVUU — from 0.0 to ± 24.0 dimension).

3.0957. I repeat that TEC, VEC, and EVG, by peculiar to them organizing Essence, are not what you traditionally associate with the notion of «body.» Though, without Info-Creators properties and features, Who structure their ethereal Configurations, just no one Form-Creators focal manifestation in Macrocosmos Space-Time could occur. Therefore, one should consider them not as «bodies,» but as specific exuberation Mechanisms used by diverse Form-Creators Self-Consciousnesses for simultaneous realization via Focus Dynamics of one or another among multiple «manifestation bodies» generated by the LLUU-VVU-Entity Collective Cosmic Intelligence to the whole multitude of peculiar to It Form-Types, among which the most visually usual to us are NUU-VVU-Form-Types of the Earth people.

3.0958. I remind you that in specific development conditions on the Earth (millions years «ago» or in the same far-future perspective) or on the other Macrocosmos Planets implementation processes of the *same Synthesis Schemes* of lluuvvumic birvulyarity type are supplied with invaderental Form-Creators via Focus Dynamics of completely different Form-Types, many of which — both outwardly and subterraneously — have little to do with common to us human attributes.

Chapter 5. Form-differentiating Temporal shells of NUU-VVU-Form-Types

3.0959. It was mentioned earlier that the main realizational Mechanism of exuberation of slloogrent Focus Dynamics of the LLUU-VVU-Entity in diapason to 6.0 dimension is the whole diversity of NUU-VVU-Forms, which are *divoulgated* (multipolarizationally widespread) with own Form-Types in all multitude of different-protoformal development Directions, and also in all subsorts, sorts, and subtypes peculiar to lluuvvumic birvulyarity type. All categories of these Form-Types could be conditionally divided on many conditional (subjectively speculative) depliative and ampliative Form-analogs: biological ones (from 2.5 to 3.75 dimension), «bioplasmic» ones (from 3.75 to 4.0 dimension), flaks ones (from 4.0 to 5.0 dimension), and vuolds ones (from 5.0 to 6.0 dimension). All these Form-analogs represent Form-differentiating Temporal Shells (FDTs), which duvuyllertrly *transcendate* (inter-transform) into one another with their focal NUU-VVU-Configurations in general slloogrentness of Focus Dynamics of the LLUU-VVU-Entity.

3.0960. That's where the whole conditionalness of our subjective Conceptions about these NUU-VVU-analogs comes from: in different-protoformal Directions and sorts of *one and the same manifestation diapason* Focus Dynamics of Form-Creators of all possible NUU-VVU-Form-Types will be differently structured by focal-ethereal protoformal interconnections, which means that peculiar to it dimension type will differ more or less from Focus Dynamics of the rest of NUU-VVU-Form-Types. Thus, neither of us would argue with some clarity that, for example, examined by us NUU-VVU-Form-Types, which structure with their Focus Dynamics different development Directions, are exuberated in *one and the same* dimension sub-diapason (suppose, from 2.75 to 3.5).

3.0961. This objective circumstance complicates very strongly the process of description of Form-structures, which provide simultaneous realization of the LLUU-VVU-Entity's Focus Dynamics.

Therefore, remembering about all conventionality of examined by us question about general structuring of Form-differentiating Temporal shells of NUU-VVU-Forms, we will consider only those among NUU-VVU-Form-Types, which Focus Dynamics are steadily active in lluvvumic development Direction (and also in this given sub-sort, sort, and sub-type).

3.0962. Let's start from the most primitive from depliative biological Form-analogs — UU-L-VVU-, IRKKULLIGR-VVU-, and USSTUKKUL-VVU-Form-Types. And one thing to notice is that the first two of them only outwardly — in the image of their manifestation — similar to people more or less, but represent by their extremely primitive psycho-mental development very heterogeneous combinations of different-protoformal depliative interconnections, which still have been based mostly on sub-Aspect and inter-Aspect intra-Qualitative Synthesis, and just partially — on inter-Qualitative two-dominant Synthesis. This is why, meaning, owing to the impossibility of generation of ampliative to this Scheme combinations, these unsteady interconnections still in no way can reflect the two main lluvvumic signs — HSI and HIA, not to mention synthesized with their help Immunitant Responsibility.

3.0963. This lower type of our «human» manifestation in no way manifests that amplificational Essence peculiar to US as People, but serves just only as temporary, more or less suitable to Us exhibition Mechanism (conductor, shell) of Our Focus Dynamics in this depliative manifestation diapason for the purpose of comprehensive study and acquiring diversified different-protoformal Experience by means of adaptation of ethereal-focal interconnections peculiar to other birvulyarity types. This Experience will necessarily prove useful to Us in the most favorable variants of the lluvvumic «future» (on the more ampliative development Levels of human Collective Consciousness) for implementation in conditions of this given dimension diapason Scheme of inter-qualitative Synthesis («CC Potentiality» + ALL-Unity) peculiar to Us.

3.0964. Until we («the current» us) synthesize to a great degree in our Focus Dynamics the main signs of the two lluvvumic Dominants (HSI+HIA+IR), one cannot seriously argue on conscious involvement of now focused by us biological analogs of NUU-VVU-Form-Types (UU-L-VVU, IRKKULLIGR-VVU, and USSTUKKUL-VVU) to this birvulyarity type — Focus Dynamics of bio-Creators and Form-Creators of the brain of the major part of human Collective Consciousness representatives are still active most powerfully only in some «boundary zone» (from 2.5 to 3.5 dimension) between doolls and wave s-Realities while getting svilgs-spherationally deeper into SFUURMM-Forms of the ones or the others among all multitude of protoformal Directions. In fact, despite of outwardly peculiar to all of you human Form-image, egoistic Interests, Aspirations, Dreams, and Conceptions, which are now extremely actively generated by the most people, still have very little in common with lluvvumic birvulyarity type.

3.0965. To reiterate one more time: this profound discrepancy between the outward human Form-image and actively realizing through it different-protoformal essence is objectively connected with that fact that the most people's Focus Dynamics of this group of human STCs is still steadily fixed in the most primitive variants of absensive (that is, virtually sort of absent to the lluvvumic type) biological analogs of FDTS (from 2.5 to 3,25 dimension). That's why the essential role in such Focus Dynamics is played so far by depliative (to our Synthesis Scheme!), long-wave realizations' types,

which are based on sub-Aspect and inter-Aspect (within the boundaries of one OO-UU!) energy-informational interconnections of still unfinished *intra-Qualitative* Synthesis (including also both lluuuvvumic Dominants) and only to a small degree — on inter-Qualitative Synthesis.

3.0966. So, these «our» biological analogs of NUU-VVU-Form (UU-L-VVU, IRKKULLIGR-VVU, and USSTUKKUL-VVU), each of which we subjectively perceive during refocusing as «our current body of manifestation,» represent aggregative variant of focal Configurations structured with many depliative different-protoformal signs' combinations. At the same time we do not have to forget about the fact that all of them are essential to synthesizing Form-Creators of our Focus Dynamics for informational providing of the process of the background two-dominant Synthesis of Configurations of invaderental OO-UU ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence to the basic lluuuvvumic State — «Creative Cosmic Potentiality.»

3.0967. «the current» depliative state of Focus Dynamics of Form-Creators of our biological NUU-VVU-Form-Types is so far able to the most degree to reflect in the general refocusing Process just the most base (animal-protoformal), instinctive trends, which provide all fundamental base of egoistic «personal» realizations of Form-Creators of protoformal (*diversive*, so called «junk») part of human DNA. Yes, of course, coming through this primary stage of the Process of refocusing to the Human development Direction is indispensable to Us as the «future» People. But you also have to be clear about the fact that in this inertial process, without necessary Information one can refocus very, very long while time and again sliding with own Focus Dynamics over the infinite «time loops.» That's why no more than 8–10% of all the people of the Earth will be able to refocus in the general slloogrentness of Focus Dynamics of Form-Creators of lluuuvvumic birvulyarity type from the «current» masses into the «plasmic» lluuuvvumic State («CC Potentiality»), which I subjectively interpret as «flaks Worlds.»

3.0968. I should say that even these numbers are listed here without regard to the fact that many NUU-VVU-Form-Types of one Stereo-Form, which are qualitatively oriented by their Focus Dynamics in diverse protoformal Directions, can manifest simultaneously in each of the wave STC groups. Meaning, one should mention that every Stereo-Form can be quantitatively and qualitatively presented within inhabitants of one STC group by many Form-Types of different-Qualitative biological «persons» (UU-L-VVU, IRKKULLIGR-VVU, USSTUKKUL-VVU, AKHSUVVROLL-VVU, LUUD-VVU), among which Focus Dynamics of just one or some of them is steadily fixed in near-lluuuvvumic realization Direction.

3.0969. Hence, people belonging to the most developed biological (PPUURPU-VVU, GOORR-VVU, NUU-PAARR-VVU, NUU-LOVRG-VVU) and «bioplasmic» human «persons» (NUU-LL-VVU, NUU-TUUL-VVU, NUU-LUUV-VVU), whose Focus Dynamics possess clearly arising trends of HSI-, HIA-, and IR-signs, will refocuses in this Direction. Though Form-Creators of the rest NUU-VVU-Form-Types' biological analogs after acquiring necessary to them Existence Experience will «return» through «the boundary» (the maximum permissible, cruvursorrt) states of different protoformal development Directions to Focus Dynamics of peculiar to them Proto-Self-Consciousnesses Forms (a small part of them, which is the most covarllert with this Scheme — around 16–18%, will supply background Processes of *near-lluuuvvumic* types of three-dominant Synthesis in «the plasmic» State).

3.0970. In the physical types of subjective Realities (TRUURRGURRDT), which structure sllougrent f-Configuration of CCI of our Planetary Entity, all creative base for realization of SFUURMM-Forms of the most depliative part of Focus Dynamics of different-protoformal SLAA-SS-MII-Creators, Who provides exhiberation Mechanism of each of biological NUU-VVU-Form-Types of FDTS in this manifestation diapason, has been functionally organized by means of joint activity of many sorts of CCIs and their Collective Consciousnesses, which «specialize» in the Processes of rough inertial eglleroliftive perturbations of Form-Matter and Synthesis in it of various Pure Cosmic Qualities Aspects. Innumerable types of Form-Creators of these realizational absensive Form-Types (UU-L-VVU, IRKKULLIGR-VVU, USSTUKKUL-VVU) comprise focal-ethereal base of everything, to which school books on anatomy, physics, and chemistry are devoted: Collective Consciousnesses of internal organs and systems of human body (PLAAURFF), different body parts and cells (UORD-VUORD), molecules' (SVOUFF-VV) and substance atoms' (AIYKVOOF), and also all comprising them elementary particles' (PIIKL-SS-OO) CCIs.

3.0971. Their functional creativity highly depends from the activity of other sorts of SLAA-SS-MII-Creators of Form-Plasma (NAAKHGRASST), Who self-realize in various types of «physical» Worlds' Form-systems and STCs with help of SFUURMM-Forms' resonational combinations peculiar to the twelve energy-informational (karmic) Channels of ARGLLAAMUNI-Iissiidi and twelve DUU-LLI of INGLIMILISSA-Iissiidi. of course, these lowest (to lluuuvvumic Synthesis Schemes) IISSIIDI-Centers the most actively function via Focus Dynamics of Form-Creators of examined by us absensive biological Form-Types. But continuous organization of interconnections, which take place in them, is provided via specific structures of astropasmic and mentopasmic — lital and chrital — Temporal ethereal constituents (TEC). Without this highly complicated Mechanism of «current» (and which do not cease for a moment!) TEC-«unpackings» in Self-Consciousness of every «person,» their Focus Dynamics would not be able to realize.

3.0972. You know already that in the system of infinite diversity of Focus Dynamics of all biological NUU-VVU-Form-Types (starting from energy-informational Levels of 1st to 12th DUU-LLI of this IISSIIDI-Centers' pair), all realizational Aspects (Info- and Form-Creators) of OO-UU-Dominant ALL-Will-of-ALL-Intelligence are actively, profoundly and fully involved in the Processes of different-Qualitative Synthesis with Aspects of the second OO-UU-Dominant — ALL-Love–ALL-Wisdom.

3.0973. Despite of seeming simplicity and primitivism of examined by us interconnections between Info- and Form-Creators of these Self-Consciousness Levels, they play the major and irreplaceable by anything role in sllougrent Focus Dynamics of our Macrocosmos's HCI: via sllougrent exhiberation Mechanisms peculiar to specific Configurations of karmic Channels of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi of biological analogs of all multitude of NUU-VVU-Form-Types, holochronely-simultaneous Process of qualitational (irrkoglictive) instrauration of Info-Creators and amplificalional (eglleroliftive) definitioning of Form-Creators in resonational combinations of RESOSCONTIONAL and SYNTHETIC Development Branches has been realizing in a variety of contexts of Space-Time. And we still subjectively do not perceive this Process in any way.

3.0974. It characterizes all specifics of multi-Vector (that is, qualitatively multidirectional) «restoration» of internousness of primogenitive SSS-State at the expense of convenintization

(balancing of mercavnational interconnections) of consummative State of those Energy-Information particulars, with the same humanational signs as of our Macrocosmos type has.

3.0975. The representatives of many cosmic civilizations are the most impersept with regards to specific features of ethereal-focal processes peculiar to two-dominant lluvvumic Synthesis Scheme. Despite of that, they rather actively realize via low- and mid-vibrational manifestation resopasons of karmic Channels of IISSIDI-Centers' first pair. Among them the most numerous (for TROOFT-LLI-realizations) are: *parrgs* — 1–3rd DUU-LLI (TRUUL-GULs, TRUUL-GUNs, UR-OO-GGs, UR-OO-Ns, UR-OO-Ls, UR-OO-PPs, KAY-KULLs, KULLs, O-O, and others), *mmuunds* — 4–6th DUU-LLI (KROKSTRs, UNKGRs, MOCCIOUTs from a Stellar system SMMUUFFTL, AKRGROFOTs of a Stellar Entity KRRIIMSSMLISS, STERRDs, and others), *argorrs* — 7–8th DUU-LLI (GRORRRDs, OOSs, PRUBIDs, GLAVVRs, LIFFRs, Self-Consciousnesses Forms of Collective Cosmic Intelligences GLOOFFORRGGM and TVUUTSTM, and others), *lloollons* — 9th DUU-LLI (ATTAIRs, ONKs, SFOLLIMs, BBAAAs, STUUYSs, KHKHONGs, and others) and *rrorroks* — 10th DUU-LLI (MAYYTs, MURDs, KREKKSeS, TVIRLs, MOLLMITs, and others).

3.0976. The following civilizations realize concurrently and resonationally with them (and in 1–8th DUU-LLI — at the expense of their Focus Dynamics!) via GLIILSS-LLI-Channels of INGLIMILISSA-Iissidi: *ally* — 1–3rd DUU-LLI (KLAURRIYAs, GLAMMELLIYAs, PSIUNGRIYAs, and others), *mimms* — 4–6th DUU-LLI (GLUANDRIYAs, AYSTINGLIYAs, AYGVIYAs, and others), *ogguls* — 7–8th DUU-LLI (SPLIINGLLIYAs, GROONNGLAs, IYGGVIYAs, IINSTIEYLLs, and others), *ksulls* — 9th DUU-LLI (SLIIPs, TOORLINGTONTSeS, AIAMMs, OOINGLIYAs, and others). There is no sense to iterate them all because of complete absence of your Conceptions about their functions and realizational Essence. Though low-vibrational Levels of Energy-Plasma modelled by SLAA-SS-MII-Creators of these Levels in no way reflect fundamental base of Spheres of Cosmic Creativity of AIY-YYA, but nevertheless we cannot ignore their activity on implementing Synthesis of the whole infinite diversity of NUU-VVU-Forms (and concurrently — of other Proto-Forms!) of Self-Consciousnesses, which manifest in conditional bounds from zeroth to 4.0-dimensional diapason, because now we are also active participants of this inertial Process.

3.0977. Here I would like to draw your attention once again to the fact that seeming to us «primitiveness,» «irrationality,» «destructiveness,» «aggressiveness,» «roughness,» and other manifestations in our Focus Dynamics of typical signs of depliativeness of representatives of above-listed cosmic civilizations are not their true states. These states realize *exactly this way* owing to the absence in their focal Configurations of those typical SFUURMM-Forms (Experience), which are synthesized on the base of our two-dominant Synthesis Scheme. I'm sure you will agree if you ask a genius in medicine to make steel in a blast furnace, no good can come of it, until they comprehend all niceties of the melter work while step-by-step training and acquiring needed skills.

3.0978. While refocus by resonational Principle into specific manifestation conditions of our *human* subjective Realities from doolls (that is, non-wave) different-protoformal STCs types, and having almost no *human* Experience, they introduce to our Focus Dynamics all imperseptness (with regards to our Synthesis Scheme!) of focal-ethereal interconnections, which is peculiar to many of their own protoformal subjective Realities (or the others, where they simultaneously participate). In

their Realities they can be not less and even more developed than ourselves! And in our conditions they are just devoid of «existing out there» exhibition Mechanisms via high-creative realization, and therefore they are just forced in their choices to be guided by those few of common (to them and to us) covallert interconnections, which have become the reason of contegerent (forced) involvement of their certain part of Focus Dynamics into Focus Dynamics of all multitude of the human NUU-VVU-Form-Types.

3.0979. In the same way ampliative Form-Creators of our more developed NUU-VVU-Self-Consciousnesses Forms, while resonationally involving (as impersept to different degrees with regards to other Synthesis Schemes!) into Focus Dynamics of s-Realities and STC groups, which are modelled not by people but by some other Proto-Self-Consciousnesses Forms, have ability to really be guided in the choices by only those from the whole multitude of focal-ethereal interconnections of own «current» f-Configurations, which are the part of the dimension type newly focused by them. Owing to such strongly restricted access to already synthesized ampliative interconnections, they have to manifest themselves in Focus Dynamics of Proto-Forms of alien s-Realities not so amplificationally as they realize in human STC types.

3.0980. Meanwhile, concatenationally assimilating in different-protoformal s-Realities the more and more covallert types of focal-ethereal interconnections, their Focus Dynamics gradually reach also in non-human STC groups more ampliative states, which are synthesized over corresponding Schemes and in this way constantly refocuses from focal UU-L-VVU-, IRKKULLIGR-VVU-, and USSTUKKUL-VVU-Configurations to different-protoformal f-Configurations peculiar to corresponding Synthesis Schemes. Thus many SFUURMM-Forms peculiar to different-type human Collective Consciousnesses (meaning, manifested in essentially different Space-Time regimes) simultaneously «reproject» by means of Focus Dynamics of synthesizing Form-Creators of all possible biological NUU-VVU-Form-Types to the multitude of diffuzgent different-protoformal STC groups. While SFUURMM-Forms peculiar to Form-Creators of other protoformal Synthesis Schemes no less actively «reproject» into the structures of Focus Dynamics of Form-Creators of our bio-analogs of FDTS.

3.0981. In the most covallert (geyliturgent) «points» of joint focal interconnections ethereal Configurations of similar different-protoformal SFUURMM-Forms «merge» and create some third — intermediate — synthetic states, which are more covallert between each other, than their «initial» (previous) Self-Consciousnesses Forms. It turns out that Form-Creators of different Synthesis Schemes differently, though no less actively participate in the process of joint formation of Focus Dynamics of not only many Proto-Forms, but also of slloogrent Focus Dynamics of all diversity of different-protoformal STC groups.

3.0982. Focal Configurations of absensive biological Form-Types could be conditionally compared with infinitely divaricate net of electric wires. Yes, they are undoubtedly extremely rough and primitive by their functions and implementation, but Form-Creators of such more ampliative Energy types as, for example, electromagnetism phenomenon would not be able to provide without them different cosmic civilizations with peculiar signs of their highly developed Existence (philosophy, science, manufacture, communications, transport, habitation, sustenance, and so on). Therefore you have to have more objective attitude to functional significance of Form-Creators of these seemingly very primitive Form-Types in the general Macrocosmos's amplificational Process.

Chapter 6. Astropasmic latal temporal ethereal constituent of NUU-VVU-Form-Types FDTs (SVUULLMII-SVUU-VVU)

3.0983. This «part» of slooprent focal Configuration of NUU-VVU-Form should be considered without fail only from the standpoint of its inseparable functional unity with another *latal* (that is, depliative, low-vibrational) «part» of the common to them exiberation Mechanism — mental-plasmic latal temporal ethereal constituent (LUUDMII-SVUU-VVU). Both of them are inter-dependent towards each other. That is because none of these «parts» in conditions of two-dominant Synthesis Scheme is in no way able to manifest *liberatively* (that is, independently, apart from another) in Focus Dynamics of different-protoformal Form-Creators of absensive biological Form-Types.

3.0984. In specific manifestation conditions peculiar to this given dimension diapason and this given Synthesis Scheme, functions of one of the general exiberational Mechanism constituent «parts,» which generates all infinite multitude of SVUULLMII-SVUU-VVU-Configurations of NUU-VVU-Forms, have been implemented by 12 karmic Channels of INGLIMILISSA-Iissiidi. Their SLUI-SLUU-Creators informationally provide the Synthesis process by resonant to them Form-Creators of the roughest ASTRAL-Plasma types with vibrationally corresponding to them MENTAL-Plasma types.

3.0985. In Existence conditions of humanational Worlds' Form-systems, astropasmic latal temporal ethereal constituent (TEC) is not some independent and self-sufficient «manifestation body» (so called «*exiberational body*») — its ethereal configuration structured with many vital SFUURMM-Forms even in OLLAKT-DRUOTMM-systems is able to manifest itself somehow through the Focuses of Dual Reflection Dynamics only as a result of direct interaction with mental SFUURMM-Forms of the second part of the exiberational Mechanism — LUUDMII-SVUU-VVU (mental-plasmic latal TEC) generating at the same time the infinite multitude of different-Qualitative SVUULL-VVU-conglomerates.

3.0986. There is one other important point: since this wave vibration diapason has been generated by narrow-specific different-protoformal dimension types — by Focus Dynamics of such CCI as LLAISSMMA-A (animals), SSAALM-MAA (vegetables), OOLLM-MAA (substances and minerals), PROOFF-RRU (this given biological humankind variety), and SGOOFF-RRU (humanoids) — the most of Form-structures generating SVUULLMII-SVUU-VVU are common to Self-Consciousnesses Forms of these CCI types and represent joint Creativity Sphere of different-protoformal SLUI-SLUU-Creators Who realize specifically via the first 6–8 DUU-LLI of ARGLLAAMUNI- and INGLIMILISSA-Iissiidi of absensive biological Form-Types.

3.0987. Within the limits of common Focus Dynamics reflecting different realizational Directions of this given Creativity Sphere, Form-Creators of the two lowest Levels of these IISSIIDI-Centers are still unable to qualitatively distinguish and accordingly reflect in the surrounding actuality all those highly creative signs, through which all of us realize «ourselves» as people. In other words, active participation of Form-Creators of these depliative Levels of SVUULLMII-SVUU-VVU in TEC-«unpackings» of our Focus Dynamics most closely «links,» inter-enriches, and subjectively combines Interests (tastes, passions, habits, attitudes, at cetera) of every human «person» with those psycho-

mental trends, which are peculiar to Focus Dynamics of many other Proto-Self-Consciousnesses Forms. Thus, opportunity of simultaneous accomplishment of general realizational dynamics between Form-Creators representing different Synthesis Schemes has been provided through availability in all Proto-Forms' Self-Consciousness structures of a specified number of common karmic Channels.

3.0988. This explains the presence in the undeveloped people psychics of the strong layer of unrealized wishes and propensities typical to animals. Especially, such contegerent (suppressing, forcing) influence of all possible depliative SFUURMM-Forms typical to animal realizations manifests in Focus Dynamics of many people through sexual sphere busily inducing «person» — physically or imaginarily (psychically) — on experiencing particularly strong thrills and experience, which can appear only during intercourse of a human with one or another animal. Besides, the presence of common DUU-LLIs at people and animals is the main manifestation Mechanism in human Focus Dynamics of clear signs of blood-thirstiness, brutality, and unmotivated aggression, which induce many people to consciously and unconsciously commit murders, mutilations, unjustifiable violence, and demolition. Many fanatic participants of diverse animal, plant, ecology movements can easily commit the most severe crimes on the base of their ideology without even thinking on the true reasons of their such aggressive actions.

3.0989. The reason of so clearly expressed non-human behavior is high degree of undersynthesizedness of the six lowest karmic Channels of the first resonational IISSIIDI-Centers pair. For example, once interconnections with Form-Creators of mineral Proto-Forms have been excessively activated in Focus Dynamics of such «person,» then such individual can easily dare to the most severe crime «in the name of saving the ecological situation» without thinking, while being under the influence of absolute self-rightfulness either in the place of their living, or in own country, or in the whole world, or even in the space. In this case they will realize not at all conglomerates of human Conceptions (where the idea about the environment protection necessity is also actual, but it is achieved not by such dramatic and aggressive ways), but primitive SFUURMM-Forms, which reflect «predatory» propensities of Focus Dynamics of mineral Proto-Forms' Form-Creators .

3.0990. The same happens at excessive activity in human Focus Dynamics of narrow-specific SFUURMM-Forms peculiar to one or other animal and vegetable Proto-Forms: the most radical representatives of Green Movements (for example, «Greenpeace») are willing to do what that takes to protect green belts from deforestation, and vegetarians and animal-rights group take the most extreme measures on animal protection and fight for animal rights to be almost equal to human ones. Virtually, it is very difficult to find Intellect signs, which dispose to the search of rational compromise and common sense, in any of these manifestations, when there are certain variants of protoformal altruism. This clearly shows the absence in such Focus Dynamics sorts of lluuuvvumic trends and continuous refocusing to some of protoformal development Directions. By the way, exactly this Mechanism of the strong inter-influence (through availability of the common karmic Channels) between Focus Dynamics of Form-Creators of radically differing among each other different-protoformal Self-Consciousnesses Forms serves as basis of duvuyllerrt transition of one STC groups (for example human) to other animal STC groups.

3.0991. So, all this indicates that SVUULLMII-SVUU-VVU is the Sphere of resonational interaction of different-type SLUI-SLUU-Creators and Form-Creators, Who reflect by different degree with own ethereal and focal Configurations typical signs of some background to our Synthesis Scheme OO-UU-Entities in «person's» Focus Dynamics. Actively using animal, vegetable, and mineral Self-Consciousnesses Forms, they aim via Focus Dynamics of Form-Creators of all multitude of absensive biological NUU-VVU-Form-Types at introducing into peculiar to them Self-Knowledge process of completely new to them psychic relations, sensuous sensations and experience, which in general — because of the difference in Synthesis Schemes — are not peculiar to representatives of Collective Cosmic Intelligences of LLAISSMMA-A (animals), SSAALM-MAA (vegetables), and OOLLM-MAA (substances and minerals).

3.0992. Due to amplificational influence of Creators-Curators of AIGLLILLIAA- and ORLAAKTOR-Iissiidi, Who initiate and stimulate specific creativity of all PLIISSMA- and GROOMPF-Entities of Forms of INGLIMILISSA- and ARGLLAAMUNI-Iissiidi, these SLUI-SLUU sequentially embrace more ampliative interconnections, sensuous experience, and emotions Levels typical to human community. This in turn (in the way of synthesized Experience) informationally promotes processes of deepening and extending of Focus Dynamics spectrum between Self-Consciousnesses Forms of people, higher order animals, vegetables, and minerals.

3.0993. In this regard, I would also like to draw your attention to the more and more spreading today in medical community practice of transplanting to the ill people of the organs of not only «dead» or healthy people, but also of separate types of genetically close or inbreeding-like (obtained through close-relative specimen interbreeding) animals. As you already know, Focus Dynamics of Form-Creators of any Self-Consciousness Form in this manifestation diapason has been informationally supported due to the presence of such fundamental phenomena as atomic, molecular, and cell memory types, which inter-organize between each other into the whole diversity of protoformal Form-Types specified by each individual's genotype. Meaning, such Forms of Collective Consciousness as «organs» consisting of «cells» represent on genetic level active conductors of energy-informational force interactions of the definite diapason of Creative Activity of CCIs of some animal Proto-Forms or human being.

3.0994. Bio-Creators' functional activity of any internal, in each particular case, appears to be the specific «innervation zone» of realization of some particular functions and has been resonationally «projected» to the corresponding part of slloogrent focal Configuration of Form-Matter of this dimension diapason by means of powerful Focus Dynamics of Form-Creators of these or those of IISSIIDI-Centers reflecting certain typical signs of separate SLUI-SLUU-Creators, Who specifically realize via f-Configuration of this Self-Consciousness Form. While giving too much of attention to the brain and central nervous system activity, scientists (owing to yet the strongest discreteness of our Self-Consciousness conditioned, in particular, by the narrow intra-professional differentiation on studying the «separate» human body parts) often overlook extremely important activity to the qualitative NUU-VVU-Form-Types realization of other organs and systems of biological organism. Without this realization, psychic and «physical» Form existence quite often becomes either impossible or strongly restricted.

3.0995. For example, heart bio-Creators provide continuous generation of electromagnetic Fields-Consciousnesses with specific, peculiar only to this internal organ, focal Configurations, which Energy-Potential by its power is 7000 times higher than magnetic Fields-Consciousnesses generated by the «brain» bio-Creators. Owing to that, they can deliver Information translated to them by gene Form-Creators literally to every cell of the biological organism. Besides, many other biological Self-Consciousnesses Forms actively realize directly through them. They are hormones and neurotransmitters («stimulation» or «inhibition» processes in «the nerve cells»), which establish among heart and brain bio-Creators direct neuro-chemical, electric-chemical, and ethereal ways of communication.

3.0996. Specific SFUURMM-Forms (or rather, peculiar to them ethereal interconnections!), while being continuously formed through the brain nerve activity and corrected by Focus Dynamics of Form-Creators of the definite IISSIDI-Centers, have been translated via these communicational interconnections — at focusing in biological part of Form-Types of this given rotational Cycle — to the structures of the heart «cell memory» and preserved in them as the broad database about all psycho-biological features of that «person,» to which organism this internal belongs. The example is the phenomenon of neuropathic or «phantom» pains, when amputated body part continues to be felt or to ache, because nerve cells keeping once acquired information about pain symptomatology continue in particular cases to transmit these signals to the brain bio-Creators even after amputation.

3.0997. I would add that the most active role in implementation of this process in organism is played by the spinal cord bio-Creators, in particular, bio-Creators of the dimethylsphingosine metabolite — intermediate biochemical reactions product (of synthesis and decomposition of sphingomyelin phospholipid, which is a part of the cell membranes and is directly involved in the «cell memory» correction). When a failure in the interconnections between Form-Creators of the SCN9A gene and bio-Creators of the corresponding brain sections happens (as a result of the experienced stress, neurosis, tumor), the latter cannot distinguish information about some body part loss and do not execute abruptation in proper time (which is the existing interconnections rupture, the former interaction type cessation), but continue to activate those neurons chains, which are responsible for the work of already non-existing limbs or body parts. Dimethylsphingosine metabolite is generated in the spinal cord as the response on raised inconsistency in interconnections among gene Form-Creators and brain bio-Creators. Owing to that, it appears to be «the initiator» of not only phantom, but also of so called neuropathic pains. Besides, it also takes part in much more complicated biochemical reactions, which decode refocusing process.

3.0998. Since all psycho-mental filling of every «person» realized via physiological (neuronal) interconnections between Focus Dynamics of gene Form-Creators of different Proto-Forms is provided via ethereal Configurations of not only the lowest karmic Channels, but also of the rest of DUU-LLI of the first pair of IISSIDI-Centers (and of the 1–6th DUU-LLI of the second pair for developed «persons»), the recipient in addition will inherit some part of peculiar to them ethereal interconnections between Form-Creators of donor's Self-Consciousness Form at transplanted organ successful naturalizing. These interconnections even after transplantation to the new organism continue to actively interact between each other in many other scenarios, where other donor's «personal» Interpretations are still alive and develop in accordance with peculiar to them Interests. Thus, having not lost their activity even a bit, donor's Form-Creators and bio-Creators start to

persistently influence and correct in the ill person's brain already acquired neuronal interaction chains imposing on their bio-Creators own variants of choices.

3.0999. If recipient neuronal system bio-Creators are not able to suppress translational activity of the donor organ Collective Consciousness's bio-Creators, Who continue to generate in the corresponding sections of the new «owner's» brain peculiar to them SFUURMM-Forms, then such «person» will soon be able to radically change not only own previous common habits and professional skills, but even to noticeably change psychically — in creative views, political convictions, spiritual development directions, and so on, reflecting in this way the world outlook peculiar to the donor. Once alien trends and SFUURMM-Forms prove to be in bio-Creators' Focus Dynamics stronger than some of neuronal chains available in the brain, their change happens with the lapse of time. As a result, not only recipient's former line of behavior can change dramatically, but radical revision of former interests, priorities of values will occur, which will influence at the unconscious Perception level on their habits, character, trends and even on individual facial features, biological body constitution while «interposing» in mysterious way some of the donor's characteristic signs to existing f-Configuration.

3.1000. This refers not only to the heart or its separate valves bio-Creators, but also to bio-Creators of other essentially important internals (cells, tissues, lungs, liver, kidneys, spleen, gastrointestinal tract, ductless glands, and others), via specific f-Configurations of Collective Consciousnesses' Forms of which Form-Creators of different IISSIDI-Centers realize their Focus Dynamics in peculiar only to them sensation, thinking, and physical activity diapasons of every particular «person» (including his/her inclination to goodwill or to increased aggressiveness, sympathy and antipathy, attachments and propensities, common habits, creative skills, and much more). For example, when a donor occurs to be suicide, violator, recidivist, or executed killer, then some of the more active and peculiar to his/her way of life trends, psychic reactions, aspirations, and views could become to recipients almost insuperable phobias and complexes, which will strongly interfere via specific SFUURMM-Forms of the donor's subterraneous ODS to the Focus Dynamics of Form-Creators of the ill person's Self-Consciousness.

3.1001. If the donor is an animal, in many cases some part of peculiar to its genotype interconnections with Form-Creators of its other «personal» Interpretations, Who continue their existence in other development scenarios, also can via different-protoformal Configurations of the common to all Form-Types 1–8th DUU-LLI of the first IISSIDI-Centers' pair influence more or less actively on Focus Dynamics of Form-Creators of the lowest Self-Consciousness Levels of «person» who had surgery. These interconnections realize in this way abilities laid into our absensive biological Form-Types for joint creative interaction between Form-Creators of SVUULLMII-SVUU-VVU (and LUUDMII-SVUU-VVU) and Form-Creators of animal Self-Consciousnesses Forms (LLAISSMMA-A) diffuzgent with regards to our Synthesis Scheme. On the gene level this process of different-protoformal energy-informational inter-exchange is supplied by availability in the DNA structures of every biological Self-Consciousness's Proto-Form of the common to them set of gene Form-Creators, f-Configurations of Whom structure *diversive*, or so called «junk» part of every genotype.

3.1002. One should also note that all bio- and Form-Creators of astrophysical latal temporal ethereal constituent have been actively involved not only in the processes of life activity of every human

«person» and of all their internal organs and systems functioning, but also serve as powerful factor providing self-survival of all human population as intelligent species in order to let NUU-VVU-Form-Types, along with rising ampliativeness of Focus Dynamics of Self-Consciousness's Form-Creators, to keep stable ability to continuous self-reproduction and to have in diverse manifestation regimes assured opportunities to recreation of similar geno- and phenotype. This process largely depends on availability in the general human database (DNA) of some kind of different-protoformal interconnections, through which all possible Experience of the total co-existence resonationally translates to Focus Dynamics of every Self-Consciousness Form. This Experience has been simultaneously synthesized by all diversity of diffuzgent Self-Consciousnesses Forms in different STC groups and in different Time Flows.

3.1003. Exactly different-protoformal Form-Creators of human realizational astro-and mento-plasmic lital Temporal ethereal constituents, peculiar also to our, and to humanoid, and to many other Self-Consciousnesses Forms of animal CCIs, bring to Focus Dynamics of our UU-L-SVUU-VVU those powerful trends and abilities to survival, self-preservation, and reproduction of own kind, which inevitably weaken at too intensive displacement of FCA and CAF to the more ampliative Self-Consciousness Levels.

3.1004. When activity of these — «imperfect» from our standpoint — Form-Creators is considerably decreased in Focus Dynamics at its reaching the most ampliative to biological Existence Levels of «personal» Self-Consciousness, then gene Form-Creators of the more qualitative Levels start more and more actively to join in the process of amplificational development of subterransive rotational Cycle directing refocusing trends of this given «person» to Creativity Spheres of «bioplasmic» variants of his/her focal NUU-VVU-Configurations, where processes of human Self-Consciousnesses Forms self-reproduction and life support are resolved already in a completely different way with the help of invaderental joint activity of SLUI-SLUU of karmic Channels of the second IISSIIDI-Centers pair and of resonationally corresponding to them Form-Creators -Curators.

3.1005. Depliative SFUURMM-Forms of SVUULLMII-SVUU-VVU are the most active informational base for life creativity Sphere in slloogrent Focus Dynamics of biological types of human Collective Consciousnesses of all number of diverse tribes and populations with primitive-communal Living arrangements and domination of low-sensuous perception over intellect, which has been hardly awakening in their Form-Types' Self-Consciousness. Not only weakly developed people, but also higher animals most representatives, which simultaneously with us are manifested in conditions of this dimension diapason, interact among each other on so low-organized level via f-Configurations of 1–8th karmic Channels. SVUULLMII-SVUU-VVU is mostly active in those of absensive biological NUU-VVU-Form-Types, which we relate to «primitive» or «cave» people.

3.1006. Aborigines and representatives of different tribes with established communal Living arrangements interact with each other in the primitive manner just described; all possible sex maniacs, bloodthirsty violators, and religious fans, and also people who are not used to think, who mostly trust their self-preservation instinct and animalistic impulse, draw their narrow limited «inspiration» among SFUURMM-Forms of this TEC. Because of this, their psychics is often brought to the specific negative state of «temporary insanity.»

3.1007. Taking this into account, we can say that all Conceptions, which are invariably related with something unpleasant and terrifying, brutal, and cruel, lustful and aggressive, and are also associated with in no way predictable instinctive behavior peculiar to yet undeveloped «half-human-half-animal,» rather than to «homo sapiens,» could be attributed to associative sphere of the surrounding reality via unconscious Focus Dynamics of Form-Creators Who resonate with astropasmic latal temporal ethereal constituent. Both *latal* TEC-structures of Self-Consciousness of NUU-VVU-Form-Types (astral and mental ones) serve to people as mechanisms of low psycho-emotional and mental egoistic realizations with the aim of acquiring profound Experience of the joint co-existence of SLUI-SLUU-Creators and Form-Creators of all multitude of different-protoformal Synthesis Schemes, Who actively achieve self-knowledge in the lowest Levels of invaderental manifestation of OO-UU ALL-Will-of-ALL-Intelligence and ALL-Love-ALL-Wisdom Aspects.

Chapter 7. Mental-plasmic latal temporal ethereal constituent of NUU-VVU-Form-Types FDTS (LUUDMII-SVUU-VVU)

3.1008. As I have underscored before, LUUDMII-SVUU-VVU Creators along with SVUULLMII-SVUU-VVU Creators do not have opportunities of *segreksal* (isolated, autonomous) realization in Worlds' Form-systems, though they are able to resonationally manifest peculiar to them ethereal Information only *ambigulyarly* that is, reciprocally, concatenationally «impregnating» (synthesizing) to their mentoplasmic interconnections (ALL-Will-of-ALL-Intelligence) the most covarllert combinations of sub-Aspects or Aspects of astropasmic ALL-Love-ALL-Wisdom OO-UU-Dominant.

3.1009. therefore, the most appropriate statement is that ethereal Configuration of this lowest ethereal constituent typical to all biological NUU-VVU-Form-Types analogs without exception, being structured by SLUI-SLUU-Creators of the 12 karmic Channels of ARGLLAAMUNI-Iissiidi, serves just as a part of the general Mechanism of the Synthesis of Fields-Consciousnesses of MENTAL-Plasma and of the Process of their joint exhibition in Space-Time via this given Synthesis Scheme conditions. The second part of this process has been provided by SVUULLMII-SVUU-VVU SLUI-SLUU-Creators Who realize via 12 karmic Channels of INGLMILISSA-Iissiidi.

3.1010. I draw your attention once more to the fact that neither LUUDMII-SVUU-VVU, nor SVUULLMII-SVUU-VVU are «the bodies» (in the ordinary sense), because they execute in the structures of Self-Consciousness of any «person» only informationally providing functions combining by the resonational feature focal Configurations of Form-Creators and ethereal Configurations of SLUI-SLUU-Creators. As a result, narrow specific focal-ethereal (that is, energy-informational) combination has been generated, which is represented in Worlds' Form-system by Focus Dynamics, and in subterrassive ODS by Focus of Dual Reflection.

3.1011. Naturally, it would be more correct for you to imagine this process in the following way. Once SLUI-SLUU-Creators obtain resonational eglleroliftive initiation owing to additional quantum of decoherent Energy, they contegerently translate peculiar to them «projections» (SFUURMM-

Forms) to the Macrocosmos Focus Dynamics *sort of* subjectively «turning» (but only for us, for *our* subjective Perception!) from Info-Creators to Form-Creators (actually, they do not change in any way at that neither by own Essence, nor by own Form!).

3.1012. You focus in the lowest sub-Levels and Levels of Creative Activity of depliative LUUDMII-SVUU-VVU SFUURMM-Forms during your manifestation of clear signs of irreconcilable ambitious persistence and arrogance, when ineradicable craving for proving something to someone darkens both mind and elementary logics, bringing out your Focus of Close Attention to that part of Self-Consciousness where unpredictable impulsiveness dominates peculiar to the deepest egocentrism or aggressive, unshakable fanaticism.

3.1013. All possible ways of own inane «recklessness,» irreconcilability, willingness «to go all the way,» whatever it takes for you or anyone else, accepting any victims for the sake of certain temporary personal results, for the sake of proving own physical, social, material, spiritual, or any other superiority, which choses power methods of settling disputes — all of this represents evidences of the strong activity in «person» Focus Dynamics of primitive LUUDMII-SVUU-VVU SFUURMM-Forms realizing in implacable straightforwardness and insuperable harshness, in infinite stupidity, unconsciousness and unpredictability, which are not peculiar to developed individual, but very typical to illogical and primitive animal behavior.

3.1014. While the SFUURMM-Forms signs of astrophasic lital TEC are unbridled, thoughtless, and blind passion, irrepressible emotionality unconsciously turning in Focus Dynamics to unrealized by «person» aggressiveness, or to unruly and unpredictable euphoria, then mental-plasmic lital TEC SFUURMM-Forms manifest mostly signs of primitive instinctive deliberativeness, elementary mentality, which allow resonating with them Form-Creators to become actively and purposefully convinced in realizations of their powerful egocentric passions and unbridled Desires.

3.1015. The process of synthetic interaction between SLUI-SLUU- and Form-Creators is implemented in the first six karmic Channels of both IISSIIDI-Centers very hardly perceptibly, in a transient way, polymorphously, and multidirectionally (from our focus-dynamic and intra-scheme-synthetic standpoint) owing to domination in their joint Focus Dynamics (FCA + FDR) of all possible and insufficiently covallert between each other internous («internal») sub-...-sub-Aspect interconnections by each of invaderental to this Synthesis Scheme OO-UU-Entities. Therefore, clear (to us!) signs of elementary rational interaction between Form-Creators of these Dominants are very hard to detect and trace in Focus Dynamics of the most primitive humankind part representatives (although, they, undoubtedly, exist!).

3.1016. Although, starting from 7–8th joint DUU-LLI (to 2.0 dimension), the results of similar combined interconnections begin to reflect more and more in mental-emotional activity of undeveloped people and in their impulsive choices. For example, «persons» with elevated activity in Focus Dynamics of specific SFUURMM-Forms of 7–8th karmic Channels already manifest typical striving for less egocentric feeling-sexual relations. Although disorganization and peculiar to animals gregariousness are in the process of their forming yet determining factors, and occasional gleams of deliberativeness manifest yet very primitively — as cunning, which reinforces instinctive feeling of survival and self-preservation at any cost.

3.1017. And only successive connecting to undeveloped individual's Focus Dynamics of Form-Creators of 9–10th DUU-LLI wakens in their Self-Consciousness elementary need for manifestation with respect to people (including sexual partners) of timid altruistic choices and unconscious facts of self-sacrifice and gradually forms in the Perception system of such «person» intuitive desire for maintaining connections with the only sexual partner (which is peculiar not only to developed people, but also to many higher animals).

3.1018. That is, starting from these interconnections Levels (to 3.0 dimension), not only intra-Qualitative sub-Aspect and inter-Aspect trends begin gradually to implement among Form-Creators of both Dominants, but also much more compound process activates — *inter-Qualitative* Synthesis between two-invaderental (meaning, different-dominant) Aspects, which brings to behavior and psychics of people's «interpersonal» relations more clear signs of thinking logics and own choices analysis. Thus, this becomes the reason for more stable influence on their Focus Dynamics of such factors as mental deliberativeness (rudimentary egoistic mind) and vital ordering (psychic steadiness).

3.1019. At this stage of development a trend to separation in «person» Self-Consciousness of all constituents of his/her environment on «mine» and «not mine» manifests most actively (besides, «not mine» can potentially become mine when I take all necessary efforts for this). Passion and unrestrained urge towards possessing something are the main activity signs in «person» Focus Dynamics of depliative SVUULL-VVU-conglomerates of LUUDMII-SVUU-VVU.

3.1020. While doing very simple, yet painstaking and scrupulous work, which does not require your skills to challenging abstracting and anticipation of the future trends of the mental activity carried out by you, you also automatically activate in your Self-Consciousness SFUURMM-Forms of «the upper» creative diapasons of LUUDMII-SVUU-VVU (10–12th DUU-LLI), which structure depliative part of space-time structures of STROOLLGORF-ASSFOLLFORDTS-UOLDMII-I-Level of Mental Plan-Overtone (from +4th — through 0.0 — to -4th dimension). Besides, ampliative part of this Plan-Overtone has been formed by slloogrent Focus Dynamics of causal Form-Creators -Curators of the three «lowest» Levels of the second pair of IISSIIDII-Centers (kroydls and aossoons), which organize focal-ethereal interconnections of 1–8th karmic Channels of ORLAAKTOR and AIGLLILLIAA.

Chapter 8. Other ampliative Bodies and Forms of the LLUU-VVU-Entity

Astroplasmic Christal Planetary Body of NUU-VVU-Form-Types of FDTS (STOOLLMII-SVUU-VVU)

3.1021. This is one of the first resonational pair of «functional bodies» of simultaneously-multipolarizational exuberation of FDTS of NUU-VVU-Form-Types, which focal Configurations are structured by Self-Consciousnesses Form-Creators Who are actively and steadily occupied in the

peculiar only to human being (in this given s-Reality type of GREIYSLIISS Planetary Entity!) intellectual-altruistic creative work. It is level-by-level accomplished in PROOFF-RRU Collective Cosmic Intelligence (this biological humankind variety) in the Process of inertial Synthesis of this pair of invaderental OO-UU-Entities.

3.1022. Initiation to STOOLLMII-SVUU-VVU Form-Creators 's exhibition in peculiar to them regimes is accomplished by SLUI-SLUU-Creators of 1–12th karmic Channels of AIGLLILLIAA-Iissiidi. The main sign of their Creative Activity in Focus Dynamics of Form-Creators of diverse biological, «bioplasmic,» flaks, and vuolds analogs of NUU-VVU-Types of FDTS (from different-protoformal development Directions) is activity in it of those subjective Conceptions, which most of developed people realize via such notion as Love (with the capital letter). Let me remind you that the true sense of this word completely excludes the presence of any «personal» egoistic-possessive realizations (jealousy, envy, hatred, and others).

3.1023. What is the difference between realization Mechanism of astral-mental christal TECs pair, which synthesize so called «exhiberational body,» and manifestation Mechanism of astral-mental lital TECs first pair, which synthesize Focus Dynamics of Form-Creators of Form-Differentiating Temporal Shell (FDTS)?

3.1024. Firstly, absence of selfishness and aggressiveness in SFUURMM-Forms of both christal constituents, and absence of trends to sexual activity indicates that these ethereal structures already do not have direct relation to biological way of human reproduction. Hence, they are created to replace these functions in Focus Dynamics of «bioplasmic» analogs of our NUU-VVU-Form-Types, which using own ampliative skills and broad opportunities of more qualitative human STCs are capable of recreating human population already not with the help of biological reproductive organs, but through purposeful incrementation (development, definite features recreation) of *seklyustsells* (stem cells «plasmic» analogs).

3.1025. Secondly, Focuses of Dual Reflection of SLUI-SLUU-Creators of the first pair are organized in the diapason from 2.75 to 3.75 dimension, whereas Creative Activity of SLUI-SLUU-Creators providing this exhiberational body functions reflects in the much more broad manifestation spectrum through Focus Dynamics of Form-Creators in the more ampliative dimension Levels — from 2.5 to 6.0. In this connection, exhibition in the 2.5 to 4.0 dimension diapason is realized not in common conditions, but via *expiative* f-Configurations synthesized already not by Form-Creators of the IISSIDI-Centers first pair, but via *observative* (supervising) Creators-Curators of the second pair — kroydls and aossoons (1–8th DUU-LLI). Therefore, they are free from importunate activity of SVUULL-VVU-conglomerates and from any depliative (to this diapason) SFUURMM-Forms.

3.1026. Thus, we can say that the first focal-ethereal pair (lital TECs) represent in Space-Time depliative variant of Form-Creators 's lluuvvumic exhibition, while the second pair (christal TECs) are ampliative variant of this Process examined by us in these particular conditions.

3.1027. these two christal TECs varieties are called «Planetary» ones, because peculiar to them exhibition Mechanisms of all possible NUU-VVU-Form-Types of FDTS are adjusted only to narrow

specific Synthesis conditions typical to the definite (to 6.0 *lluuvvumic* dimension) Spheres of realizational Creativity (Globes) of GREIYSLIIS Planetary Entity. The further refocusing process (from 6.0 to 9.0 dimension) of Form-Creators of even more amplificational LLUU-VVU-Configurations (FOOLL-ORFROVT-Forms) is accomplished in narrow specific realization regimes of Focus Dynamics of Form-Creators of SLIIMPFLIIS Planetary Entity (Physical Globus — Venus) CCI, where focal-ethereal interconnections of so called the LLUU-VVU-Entity «equally-synthesized» State — NIISSLII-SLII-VVU (Transmutational Plan-Overtone — from +9th — through 0.0 — to -9th dimension, SSAASSFATI-Iissiidi 1–12th Channels + ULGLUU-Iissiidi 1–12th Channels) are the base of exhiberational Mechanism.

3.1028. Such — equally synthesized in *lluuvvumic* birvulyarity type with all possible protoformal development Directions — Self-Consciousness States cannot be reached by Form-Creators in the corresponding GREIYSLIIS Creativity Sphere, because activity of appropriate signs of *lluuvvumic* birvulyarity type in the mentioned manifestation regime (from 6.0 to 9.0 dimension) of our Planetary Entity either does not have opportunity for exhiberation, or manifests only indirectly (through other Synthesis Schemes).

3.1029. That is, in the next megadimensional diapason, f-Configurations of vuolds Self-Consciousnesses Forms of some of different-protoformal Directions (sub-sorts and sorts) of LLUU-VVU-Form possible development, which correspond in varying degrees to amplificational Purposes and Tasks of GREIYSLIIS Form-Creators's Focus Dynamics, acquire ability to manifest in the given Creativity Sphere via f-Configurations of Form-Creators of the more ampliative Levels. Whereas further development of *lluuvvumic* birvulyarity type Form-Creators (as well as Form-Creators of many deeply connected with this type near-*lluuvvumic* Synthesis Schemes) require completely different conditions structured by absolutely different focal-ethereal interconnections. Exactly these conditions in 6–9-dimensional megadiapason belong to Focus Dynamics of SLIIMPFLIIS-Entity Form-Creators .

3.1030. I also add that SFUURMM-Forms peculiar to ethereal Configuration of examined by us exhiberational body permanently activate in «person» typical signs of altruism, high sensuality, heartfulness, cordiality, friendliness, mercy, empathy, and loving-kindness, which initiate during his/her making decisions processes trend to understanding, self-derogation, meekness, tolerance, and self-sacrifice. Such «persons» have a lively interest at their life creativity not only in the Love theme and friendly relations among people, but also do their best for responsible and unconditional Spiritual Serve to people, for ampliative interconnections real strengthening both among all nations and peoples of our Planet and among all cosmic civilizations.

Mentoplasmic Christal Planetary Body of NUU-VVU-Form-Types of FDTS (UOLDMII-SLII-VVU)

3.1031. This exhiberational body Information, along with STOOLLMII-SVUU-VVU, is also activated in Focus Dynamics of biological, «bioplasmic,» flaks, and vuolds Form-Creators of NUU-VVU-Form-Types of FDTS (*kroydls and aossoons, orlaaktors and aaygllaamans*). Though this occurs not via Univer-

sal Multipolarized Impulse (UMPI) of FLUU-VVU-doubles of AAIIGLA-MAA-Creators, but via resonational Creative Activity of ORLAAKTOR-Iissiidi 1–12th karmic Channels' KLOORTM-Creators (and their SFUURMM-Forms). By means of energy-informational structures provided with UOLDMII-SLII-VVU, Form-Creators have all opportunities for organization and realization of their *mental* creativity in the cumulative Self-Consciousness system of NUU-VVU-Form-Types manifested in this Energy-Plasma megadiapason (to 6.0 dimension), and also for active participation in the processes of concatenational and different-Qualitative Synthesis of the first four (out of eight!) Iluuvvumic OO-UU-Dominants (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Unity + ALL-Integrity).

3.1032. The fact of disclosure and activation in «person» Focus Dynamics of stable Creative Activity of SLUI-SLUU-Creators of mentoplasmic exhiberational body, which represents slloogrent etheral-focal structure of Integral Cosmic Body of Human (SSLUU-L-LUU), indicates the high degree of activity in psycho-mental creativity of this «person» of SFUURMM-Forms of highly-vibrational altruistic sensuousness and strongly developed Intellect already free from roughly egoistic trends.

3.1033. Typical individual's psycho-mental behavior features indicating activation of both exhiberal bodies synthetic signs in Focus Dynamics of his/her Self-Consciousness Form Form-Creators are his/her stable demonstration of the high degree of personal Immunitant Responsibility and natural to him/her necessity to self-actualization via self-sacrifice acts. Availability of these characteristic signs of Iluuvvumicality in «person» Focus Dynamics stimulates in his/her Perception system manifestation of the highest, already never disappearing and ineradicable aspiration to Spiritual Service to EVERYTHING. This completely excludes opportunities of whatever realization of any egoism signs in all his/her Self-Consciousness intellectual-emotional manifestations.

3.1034. So far, Form-Creators of Self-Consciousnesses of very, very few people (and even then, quite unsteadily!) can access SFUURMM-Forms of these given Human Creativity Levels, since Focus Dynamics of even the most «perfect» (by the «current» extremely subjective criteria!) «person» has objective manifestation conditions in these human STC groups: the very strong factor of forming refocusing trends is additional regular Form-Creators's necessity for alternating svilgs-spherational perturbations (periodic change of background PCQs relative invaderentness) in Self-Consciousness — in parallel with ampliative astro-mental activity — of SFUURMM-Forms, which support «person» survival in the surrounding World and with this essential goal impose on Form-Creators's Focus Dynamics trends to egoistic thinking, procreation, nutritional needs, self-defense, and so on.

3.1035. Thus, in conditions of these given s-Realities only «the lowest» of the main signs of UOLDMII-SLII-VVU and STOOLLMII-SVUU-VVU ethereal-focal manifestation could be activated to various degrees in Self-Consciousness structures for intellectual-altruistic realization in Focus Dynamics of the great thinkers, philosophers, true planetary Teachers, and generally recognized Spiritual Messiahs, Who actively and purposefully influence on the human Collective Consciousness Focus Dynamics improvement processes and radically change its Paradigm on more ampliative one to this Synthesis Scheme.

3.1036. For the present, the most stable and powerful source of plyurimusive SFUURMM-Forms in these STC groups is the Knowledge of IISSIIDIOLOGY, which allows human brain bio-Creators to

purposefully acquire — instead of already outdated depliative neuronal interconnections — completely new ampliative chains of high-vibrational psycho-mental activity, which allows Form-Creators of TEC-«unpackings» to become linked to plyurimusive SFUURMM-Forms of VEC (collective Subconsciousness and Supraconsciousness).

Equally synthesized Equital LLUU-VVU-Form (NISSLII-SLII)

3.1037. It is activated in Self-Consciousness at availability of stable Focus Dynamics of Form-Creators of NISSLII-I-Levels of Transmutational Plan-Overtone (from +9.0 to -9.0 dimension), Who synthesize with the help of SSOUISST- and UULDMM-Entities (through SSAASSFATI- and ULGLUU-Lissiidi 1–12th Channels) Aspects of the following PCQs: ALL-Love–ALL-Wisdom, ALL-Will-of-ALL-Intelligence, ALL-Unity, ALL-Integrity, ALL-Aspiration, ALL-Essentiality–ALL-Permeability, and ALL-Knowledge–ALL-Informedness. In fact, NISSLII-SLII is the most amplificational Body out of all possible variants of the LLUU-VVU-Entity slloogrent exhiberation, because its further eglleroliftive «projections» already differ sufficiently by their structure from lluuvvumic birvulyarity type and after structuring SLIIMPFLIISS f-Configurations represent *extsederic* (transitional) Forms of the general Process of «reprojection» to the more universal type (later on, lluuvvumic type solvates, meaning, sort of regularly «dissolves» with peculiar to it interconnections in goolgamaaaic type).

3.1038. Focal Configuration specifics of this realizational Form of Collective Cosmic Intelligences manifested via Focus Dynamics of Form-Creators of the two Planetary Entities (GREIYSLIISS and SLIIMPFLIISS) allows Its Form-Creators to concatenationally fulfill own eglleroliftive «reprojections» process from «CC Cooperation» State to the next States more ampliative to lluuvvumic birvulyarity type: «CC Activity,» «CC Resultativeness,» and finally «CC Completeness.» Looking slightly ahead, I will notice that after reaching this State, Focus Dynamics of Form-Creators of this TOO-UU-Entity, having undergone particular eglleroliftive perturbations (in the diapason of 9–10th dimension this is «CC Passivity,» in 10–11th dimension this is «CC Dissatisfaction,» in 11–12th dimension this is «CC Harmonicity»), successively acquires many universal signs, the presence of which dramatically deepens and broadens Sphere of Its Collective Creativity to the Level of realizational abilities of Immanent GOOLGAMAA-A-Ingredient.

3.1039. Consequently, equital LLUU-VVU-Form, having synthesized specific Experience of Form-Creators of SLIIMPFLIISS-Entity CCI corresponding Levels, is configurationally and qualitatively already very strongly differ from the previous exhiberal bodies structuring NUU-VVU-Form-Types of LLUU-VVU-Form's Form-Differentiating Temporal Shell (FDTS), not to mention both lital TECs, which signs combinations have become a part of much more complicated f-Configurations. In outline, one can say that It does not have even a bit of common signs and resonational zones with Creative Activity of SFUURMM-Forms of those Self-Consciousness Levels, which in your subjective Conceptions are associated with such notion as «intelligent human activity.»

3.1040. In Its Form-Creators' Focus Dynamics something peculiar to us, or something typical to Us as flaks and vuolds Form-Types of NUU-VVU-Form already in no way can reflect in specific

and more universal manifestation conditions of 6–9th dimension via common and clear to us Conceptions about Human realizational Creativity possible variants. Therefore, trying to describe at least somehow this part of Our «future» manifestations with the help of your now available SFUURMM-Forms absolutely does not make any sense.

3.1041. The most important feature of this Process is that Focus Dynamics exuberation Mechanism of NISSLII-SLII-Creators of LLUU-VVU-Form in megadiapason from 6.0 to 9.0 dimension can functionally manifest only in those narrow specific conditions, which are generated by Form-Creators of Collective Cosmic Intelligences of SLIIMPFLIISS TOO-UU-Entity (Physical Globus is Venus). Though all energy-informational basis of different Self-Consciousnesses Forms of lluuvvumic birvularity is synthesized by GREIYSLIISS TOO-UU-Entity's observative VUOLDS-Creators (*sslaassfs and gluurfs*) in collective Subconsciousness and Supraconsciousness *finitimus* (boundary) Levels — *ilmofits and ekkdogruars* (to 5.0 dimension, 1–3rd DUU-LLI), *ukklofits and efflivgruars* (to 5.5 dimension, 4–6th DUU-LLI), *ssaulfits and ukkvummgruars* (to 6.0 dimension, 7–8th DUU-LLI).

3.1042. Only after completing the given *finitimus* phase of this convergent Process, *ulgluusses* and *ssaassfats* actively join in the LLUU-VVU-Entity Focus Dynamics for «Creative Cosmic Completeness» State forming. The first ones are FOOLL-ORFROVT-Creators (*grooffgruusts* and *nnuungsiddasts*), and behind them — OOFF-PRUIISS-Creators (*froommgruusts* and *loungmaasts, vriivgruusts* and *draarrgmaasts*), Who *duvuyllerrtly*-concatenationally synthesize «CC Activity» and «CC Resultativeness» States. After that NISSLII-IYMIYLL-Creators (*mmaargmaasts* and *aargssruusts*), structuring with their focal Configurations ampliative Levels of SLIIMPFLIISS TOO-UU-Entity CCI's *sloogrent* Focus Dynamics, join in the LLUU-VVU-Entity Focus Dynamics to provide in It «CC Completeness» State Synthesis. This is the last State, in which Form-Creators of LLUU-VVU-Form 8–9-dimensional manifestation diapason still have opportunity to structure GREIYSLIISS Self-Consciousness Focus Dynamics. Having «reprojected» own Focus Dynamics after that to «CC Passivity» 9–10-dimensional State, they conditionally sort of «abandon» Creativity Sphere of This Planetary Entity and come under the strong influence of PROVOUDDSS («Uranus») Creativity Sphere specific features.

3.1043. Does conditional sort of «return» of Focus Dynamics of the LLUU-VVU-Entity Form-Creators to corresponding 9–10-dimensional Levels of GREIYSLIISS f-Configuration occur after completing all these amplificational processes? No, it does not: after accomplishing so complex humanational manipulations, LLUU-VVU-Form-Creators «forever» *excurate* (meaning, abandon, release) the given Planetary Entity Self-Consciousness — Resonation Principle does not allow them to combine in these manifestation Levels even with some particula of GREIYSLIISS *sloogrent* f-Configuration because of the absence in It of corresponding signs combinations acquired by the LLUU-VVU-Entity during Its realization in Focus Dynamics of SLIIMPFLIISS CCI Form-Creators . Finally, is it at all possible to identify «newly-founded» TOO-UU-Entity with the LLUU-VVU-Entity after all these amplificational perturbations?

3.1044. I should note that, virtually, starting from tenth «lluuvvumic» dimension narrow specific conditions, there is already not lluuvvumic, but another — more universal — birvularity type in Space-Time *skrruullerrt* system, which I define as *extsederic* (meaning, transitional, intermediate) type in lluuvvumic-goolgamaaic Direction. Therefore, we should consider from here not LLUU-

VVU-Principle, but *extselsive* («the highest» to these dimensional conditions) Form of Its exhibera-tion — Focus Dynamics of AASMII-TOO-UU-Entity Form-Creators .

Balanced Extseive Form of LLUU-VVU-Principle (AASMII-SLII-SUU)

3.1045. The structure of slloogrent Dynamics of Creative Activity Focus of AASMII-SLII-SUU-Form Collective Cosmic Intelligence is provided by ethereal-focal interconnections peculiar to SLAA-SS-MII-Creators f-Configurations, Who are relatively stabilized and balanced in own realiza-tional Creativity in universal SFUURMM-Forms of Causal Plan-Overtone KOARDDIIRFF-AASMII-I-Levels (from +12th — through 0.0 — to -12th dimension). Focal Configuration of this TOO-UU-Entity is composed of synthetic signs combinations generated into space-time structures by LOOMGD- and GLOOGOLM-Creators through all Levels of OLGOOLLONI- and AANI-Iissiidi 1–12th karmic Chan-nels.

3.1046. This Form of further LLUU-VVU-Principle amplificational exhibera-tion in goolgamaaaic birvulyarity type is just only one of innumerable variants of concatenational realization of many dif-ferent-protoformal Synthesis Schemes manifested simultaneously in general Space-Time slloogrent-ness via specific SLAA-SS-MII-Creators' Focus Dynamics of all possible GREIYSLIIS and SLIIMPFLIIS s-Realities. These Form-Creators actively realize via humanational properties of corresponding to them Causal Plan-Overtone Levels and thus generate by own joint creative activity in 10–12th dimen-sion conditions necessary opportunities for exhibera-tion in Space-Time of *aasmiic* Form of AIY-YYA Collective Cosmic Intelligence.

3.1047. Although, prerequisites for implementation of this Process are provided due to successive Focus Dynamics of AASMII-Form-Creators amplificational convergence to very specific ethereal-fo-cal manifestation conditions (from 9.0 to 12.0 dimension), which are peculiar to Focus Dynamics of Form-Creators of PROVOUDDSS (Physical Globus — Uranus) and VRAALSVISS (Physical Globus — Chiron; Its orbit is located between Saturn and Uranus) Planetary Entities. Purposefully influenc-ing on Focus Dynamics of LLOOFF-PEEPPT-Forms Form-Creators (9.0–10.0 dimension), Who stay at «CC Passivity» State, PROVOUDDSS-Creators at first create conditions for manifestation in them of invaderentness of the signs peculiar to ALL-Voidness–ALL-Vacuumness OO-UU-Entity, whereas VRAALSVISS-Creators activate signs of ALL-Steadiness–ALL-Stability OO-UU-Entity.

3.1048. As the result of such simultaneous influence, the following amplificational State is initi-ated in 10.0–11.0-dimensional diapason in AASMII-Entity Focus Dynamics. It is «Creative Cosmic Dissatisfaction» peculiar to lluuvvumic-goolgamaaaic birvulyarity type AVVUUR-IISSMM-Creators [... \rightleftarrows (ALL-Voidness–ALL-Vacuumness + ALL-Steadiness–ALL-Stability) + ALL-Primordiality–ALL-Initiality + ALL-Knowledge–ALL-Informedness + ALL-Essentiality–ALL-Permeability + ALL-Aspiration + ALL-Integrity + ALL-Unity + ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence \rightleftarrows ...]. Concurrently generating in this State f-Configuration further invaderentness of the signs of ALL-Mobility–ALL-Presence (PROVOUDDSS-Creators) and ALL-Abundance–ALL-Fullness (VRAALSVISS-Creators) OO-UU-Entities, the Highest AASMII-Creators attain «CC Harmonicity»

State [... \rightleftarrows (ALL-Mobility–ALL-Presence + ALL-Abundance–ALL-Fullness) + (ALL-Voidness–ALL-Vacuumness + ALL-Steadiness–ALL-Stability) + ALL-Primordiality–ALL-Initiality + ALL-Knowledge–ALL-Informedness + ALL-Essentiality–ALL-Permeability + ALL-Aspiration + ALL-Integrity + ALL-Unity + ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence \rightleftarrows ...] and in this way conclude amplificational Cycle of their svilgs-spherational refocusing in conditions of Tertiary Energy-Plasma lluuvvumic, lluuvvumic-goolgamaaaic, and goolgamaaaic birvulyarity types.

3.1049. Of particular note is that fact that all SLAA-SS-MII-Creators' Focus Dynamics structuring AASMII-Entity different-Qualitative Collective Cosmic Intelligences are not something *reconditive* (separate, self-sufficient), but serve as general focal-ethereal base both to Causal Globes of GREIYSLIIS (AMGLALAA) and SLIIMPFLIIS (OULLTMSS) CCIs realization, and to Causal Globes of all other Planetary Entities, Which form Focus Dynamics of SLAA-SS-MII-Creators of MAALLAA-Entity — our Stellar AIILLIIS-Entity Causal Globus.

3.1050. Despite «CC Harmonicity» Universal Creative State jointly synthesized in this Cosmic Creativity Sphere by various Planetary Entities is typical to all Causal Globes, which structure AIILLIIS Star CCI, there are essential distinctions in the causal interconnections Principles among Collective Cosmic Intelligences of Each of Planetary Entities on the level of specific exhiberation of SFUURMM-Forms peculiar to them. This is explained by the fact that Form-Creators' Focus Dynamics of each of 12 CAUSAL Levels is structured by Creative Activity of different-type Proto-Forms SFUURMM-Forms, which are in addition synthesized from different-Qualitative and different-dimensional Energy-Plasma Levels.

3.1051. Besides that, all karmic interconnections between LOOMGD-Creators (OLGOOLLONI-Iissidi SLUI-SLUU) and GLOOGOLM-Creators (AANI-Iissidi SLUI-SLUU) of this Stellar Entity various Planets are carried out by means of narrow specific interconnections peculiar to each of ethereal-focal UPDR-Flow variants, which simultaneously penetrate by themselves and form all types of subjective Realities of Astral, Mental, and Causal Globes of these Planetary Entities. For example, AIILLIIS Causal Globus SFUURMM-Forms are produced in vibrations diapason of 9th Causal Plan-Overtone — OOSLLOOLLS (from $\pm 9^{\text{th}}$ — through 0.0 — to $\pm 12^{\text{th}}$ dimension), in particular, by means of combined Focus Dynamics of Form-Creators of Its two sub-plans — IYY-KIRR-FLUYF (from 0.0 to +12.0 dimension) and YYU-USS-FRUISS (from 0.0 to -12.0 dimension). This means the only causal Form-Creators of such Planetary Entities as DROURKHLASS («Kinyotta»), SLUIIIS («Proserpina»), VRAALSVIIS («Chiron»), and STRIYLLGSS («Jupiter»), can directly enter karmic interconnections with AIILLIIS Causal Creators.

3.1052. For example, ADD-MADD-FLUYF-Level Form-Creators organizing the highest AMGLALAA GLEIYO-Realities and providing all highest karmic interconnections between GREIYSLIIS Collective Cosmic Intelligences and other Planetary Entities CCIs can actively and directly enter karmic creative work only with resonationally corresponding to them PROVOUDDSS («Uranus») and SLIIMPFLIIS («Venus») Karmo-Creators, because exactly these three Planets are connected between Each Other by inter-Planetary karmic Channels system structured by covallert combinations of different-Qualitative signs. For the same reason LKHVAAYFFSS («Neptune») Karmo-Creators are karmically connected with KROUVDSS («Mars») and GNUIYRRSS («Pluton») Karmo-Creators, and

STRULLMSS («Mercury») Karmo-Creators constitute creative cosmic «pair» with KUULDVUDDSS («Saturn») Karmo-Creators.

SECTION XII

Ethereal-focal structure of Plasmic Forces Diapasons

Chapter 1. Complex-Plans, Plan-Levels, Plan-Overtones, and interconnections between them

3.1053. Plasmic Forces Diapasons (TUU-LLT-TUU) or PFD are conditional subjective set of all possible variants of humanational (we know nothing about propriusal Macrocosmos's structure) combinations of different-Qualitative focal-ethereal interconnections, which have been holochrone-ly-simultaneously realized between Form-Creators and Info-Creators in slloogrent Focus Dynamics of this given Universal DDIIUYI-Entity (up to ± 36.0 dimension) as the result of consummative manifestation of Universal Plasmic-Differentiational Radiation (UPDR). PFD are those resonational-ly arranged interconnections, which simultaneously realize through Focus Dynamics of Form-Creators of an infinite multitude of different-Qualitative Self-Consciousnesses Forms. And they natural-ly generate in the Perception systems of these Forms all objective diversity of Form-structures, which we have been subjectively interpreting as Worlds' Form-systems, subjective Realities, space-time Continuums, Conversums, and Universums. Ethereal component of PFD provides functioning of all multitude of OLLAKT- and DRUOTMM-systems, FLUU-LUU-complexes and their amplificational analogs.

3.1054. We will start to investigate these Diapasons and their depliative derivatives' main varieties not in usual to us manner of the subjective implementation of the whole Process of eglleroliftive Synthesis (from the most simple Schemes to the most complicated ones), but vice versa, in tendency of qualitational part of simultaneous UPDR-Dynamics (Info-Creators) to lowering of subjectively perceptible by conditional Observer qualitateness (simplification) of focal-ethereal interconnections provided by them. We will follow the qualitative transgression of Focus Dynamics of Form-Creators from the more amplificational Primary State to the less amplificational Secondary, Tertiary, and Quaternary States of Energy-Plasma. And you have also to take into account that Diapasons, Com-

plex-Plans, Plan-Levels, and Plan-Overtones examined by us demonstrate only definite part of possible options of these States. There is infinite multitude of intermediate interconnections' «phases» between them, which connect between each other States subjectively examined by us to the united slloogrent Focus Dynamics of the 36-qualitative Universal DDIUYIYI-Entity.

3.1055. Another very important question, which can cause you misunderstanding, is the presence of the signs «+» and «-» at parameters of diapasons dimensions examined by us. I should mention that this question is not only very important but also extremely complicated for detailed explanation, because the signs used here have nothing to do with what usually has been meant (for example, positive and negative electric voltage variety; typical duality state). They reflect only some insignificant part of subjective Conceptions people have nowadays about potential opportunities of the whole multitude of diversities of simultaneously exhiberated Focus Dynamics of different-level and different-Qualitative Form-Creators to creative compatibility and focal collocation (or to non-compatibility and non-collocation) between each other in *kind of* «one and the same» diapasons dimensions. The sense of these signs is mostly concerned with the presence of specific adversoppositional states — catioleptic and anioleptic — in the simultaneously-slloogrent Focus Dynamics of Form-Creators .

3.1056. these states are by no means associated with the objective Act of mercavgnation-consummatization of holochronely realized primogenitive Information State. They represent the result of subjective inertial Processes, which are feature of any Focus Dynamics. Due to the presence of these states specific Energy-Plasma's focal Configurations and Self-Consciousnesses Forms, which have been structured by them, are not able to occupy one and the same Space-Time's «spot» but organize different subjective Realities' and STC groups' types. These Configurations and Forms possess very similar focal-ethereal parameters (meaning, they have formed kind of «one and the same» dimension), but they have been initiated to the «local» manifestation with different, in Essence, exhiberation Mechanisms (realization tendencies).

3.1057. these adversoppositional states do not exist in the holochrone Dynamics of United Instant of Eternity when amitsissimal State of Information is replaced with primogenitive one. All created different-Qualitative dissonational states, which generate slloogrentness of Macrocosmos's focal Configuration, eglleroliftively-concatenationally «merge» to the most amplificational Configuration with transition to the primogenitive SSS-State. But it is impossible not to take into account this issue during examining of inertial Existence of any exhiberation range of Focus Dynamics of Form-Creators .

3.1058. This question could be explained also by comparing all «*moment-by-moment*» variants of *multipolarized* manifestation of Focus Dynamics of one «personality.» The closest variants at their qualitiveness, which *simultaneously* realize through different development scenarios, have greater opportunities for the mutual creative interaction. And at the same time in parallel with them such partial variants have been formed, which have absolutely no opportunities to interact with each other. We should not forget about the fact that «time» difference between all these simultaneous variants of slloogrent Focus Dynamics is just only one «quantum shift,» which has been realized literally in one dimension diapason and has generated at that innumerable assembly of one «personality's» different-qualitative Interpretations and of all possible variants of their development scenarios.

3.1059. Due to the presence of this different-qualitativeness, one and the same dimension diapason kind of subjectively «delaminated» to conditional universal Observer on two different and absolutely incompatible to each other realization poles. Kind of «one and the same personality» — at one and the same chronological time! — makes radically opposite choices. And completely different subjective Realities and STC groups have been formed out of them. And it is exactly the presence of such huge qualitative difference between FDs of one Self-Consciousness Form's particular variants, which dictates us necessity during examining of any dimension diapason to take into account simultaneous existence of «different-polar» variants in Space-Time's Form-structures.

3.1060. If to consider this multipolarizational Process from the standpoint of very limited opportunities of our Perception system, one can easily find out that every «personality» in one of their simultaneous Existence's variants in the same dimension diapason always has parallel variants, which could be considered in accordance with their activity as opposite. Here «this» man is kind, and «there» they are angry; here they love, and «there» they hate; here they are active in something, and «there» they are passive, and vice versa. The same as mirror Stereo-Types, it is possible to subjectively interpret known properties of Planets, Stars, Galaxies, Universes, and Macrocosmoses. Taking into account all this I had to represent in any way these Multipolarization features of slloogrent Focus Dynamics in each of its diapasons of multivariant exuberation. The most simple and clear way to make this for you was by using the signs «+» and «-».

3.1061. I should note that active «retransmitting-transforming» function during the process of generating Focus Dynamics of Collective Cosmic Intelligences in conditions of synthetic Levels of exuberation of Self-Consciousnesses Forms and CCI of Tertiary Energy-Plasma has been provided by Creators-Astroids of Astral Plan-Overtone and Creators-Plasmoids of Mental Plan-Overton. Exactly their mutual creativity in slloogrent FD of synthesizing Form-Creators of Tertiary Universal Creation actively supports *illusional adversopositional* state, which allows *us* — as conditional Observers! — to subjectively separate all Worlds' Form-systems on the base of properties inherent to them on catioleptic (GLEIIYO -dimensions, conditionally positive) and anioleptic (UDDVOO -dimensions, conditionally negative) — towards each other's FDs! — qualitative states.

3.1062. To reach the goals, which will be set in the deep meditation on these specific and as yet very hardly explainable notions, I offer you to consider the following Sorts of Creators-Astroids of groollugorff Astral Plan-Overton:

a) catioleptic Worlds' Form-systems (GLEIIYO): SSMAALL-SRUU (from 0.0 to +12.0 dimensions); IIFFS-SRUU (from 0.0 to +11.0 dimensions); LLOOFF-SRUU (from 0.0 to +10.0 dimensions); AARGS-SRUU (from 0.0 to +9.0 dimensions);

b) anioleptic Worlds' Form-systems (UDDVOO): MLAAMM-AA-RS (from 0.0 to -12.0 dimensions); FRIIFF-II-RS (from 0.0 to -11.0 dimensions); FLOOFF-OO-RS (from 0.0 to -10.0 dimensions); GRAASS-AA-RS (from 0.0 to -9.0 dimensions).

3.1063. their Functioning is achieved in conditions of the full resonational accordance and consistency with activity of the following Creators-Plasmoids of vvuurlikht Mental Plan-Overton:

a) catioleptic Worlds' Form-systems (GLEIYO): EMFFLII-MAA (from 0.0 to +12.0 dimensions); ELGFFLUM-MAA (from 0.0 to +11.0 dimensions); KNUAKK-MAA (from 0.0 to +10.0 dimensions); MMAARG-MAA (from 0.0 to +9.0 dimensions);

b) anioleptic Worlds' Form-systems (UDDVOO): KNUAKK-MAA (from 0.0 to -12.0 dimensions); FULL-LUU-MMA (from 0.0 to -11.0 dimensions); KANN-NAA-MMA (from 0.0 to -10.0 dimensions); RAMM-MAA-MMA (from 0.0 to -9.0 dimensions).

3.1064. Thus, by means of long and repeated deepest Meditations I have managed subjectively to transgress general energy-informational Contents of Energy-Plasma, which has been manifested in different conditions of 36-dimensional megadiapason, on the multitude of different-Qualitative Levels of simultaneous exuberance of Focus Dynamics of Self-Consciousnesses Forms and CCI's of all birvularity types. They generate by inherent in them focal-ethereal interconnections each every from the 12 conditional Inter-Universal Diapasons (TUU-LLT-TUU) of diffuzgent different-type Energy-Plasma, from the 12 Universal Inter-Galactic e Complex-Plans (SSAA-SS-MM) of the Primary E-P, from the 12 Universal Cosmic Plan-Levels (SSOULG-SS-ST) of the Secondary E-P, and from the 12 Universal Plan-Overtones of Fields-Consciousnesses (IIY-UUSSM) of the Tertiary E-P. All these Form-structures are listed below in the order of Qualitational expansion of the UPDR-Dynamics that is, in the Direction of the qualitiveness lowering Vector (energy-informational capacity degree) of the focal-ethereal interconnections, which structure them.

3.1065. Here one should mean by the word «Universal» not qualitiveness degree of this given Form-structures, but only the fact that they represent a definite intermediate result of simultaneously-sillogent creative realization of the Focus Dynamics of *exactly* our Universal DDIIUYI-Entity (but not of all multitude of *other* DDIIUYI-Interpretations!), which has initiated their holochrone exuberance in different conditions of Space-Time. You should remember this issue, because in future I will use all PFD-terms without this important specification. As regards origin of the twelve Inter-Universal Diapasons themselves, here one could reliably state only that they are regular consequence of transgressive realization of FD of 48-qualitative Universal IIYYUULLSSMI — Entity and its Highest Intelligence — AULMNIYSS (the more universal analog of AYFAAR). Meaning, they represent all focal-ethereal basis for generating of absolutely all Form-structures of Primary, Secondary, Tertiary and Quaternary States of Energy-Plasma (*our* DDIIUYI-Entity!).

3.1066. When you thoughtfully and carefully study above-listed Form-structures of Energy-Plasma, you will understand one very important feature of their sll oogrent formation and interconnection. Basically, one can say that starting from the typical configurational altitudeness (level spread

state, a certain diapason-like state) of Focus Dynamics of Form-Creators of Cosmic Complex-Plan specific things take place in the Self-Consciousness of DDIIUYI-Entity. They are the most ampliative subjective-subterraneous reactions on «produced» to these Levels basic codings of Inter-Universal PFD, which transform in conditions of exuberation of Plan-Levels and Plan-Overtones to the more depliative tendencies. The task of these tendencies is to unbalance settled ethereal interconnections of PFD by means of qualitatively lowering them to the opportunities of FDs of Form-Creators of different Perception Levels of Each of the infinite amount of ipsius (similar to «personalistic») DDIIUYI-Entity Interpretations. This can be conditionally compared with the issue, when one and the same Information has been differently interpreted by different people, which defines qualitative-ness of subterraneous choices of each of them.

3.1067. Roughly the same happens in the Perception system of Each of the ipsius Interpretations of our Universal Entity. While Each of them subterraneously «unpack» ethereal «projections» of stable *Inter-Universal* SSNUUYLL-Forms, they resonationally react only on a certain — specifically limited by their ipsius Self-Consciousness (the Analog of «personalistic» Self-Consciousness) — part of their slloogrent Configurations. Therefore, their slloogrent Contents has been simplified to the qualitiveness of Conceptions characteristic to them (YYUULLUYG-Forms, LLAASS-Forms, and SFUURMM-Forms). Owing to such qualitational transgression, Every ipsius Interpretation uses to reach their «current» realization in Creativity characteristic to them already not «initial» SSNUUYLL-Forms, but exactly those ones, which are defined only by their subjective Experience. That's why these configurational altitudeness types are defined by me as *disbalancing ones: their* Form-structures provide definite degree of breaking the steady balance of «initial» codings of Inter-Universal PFD in subterraneous Focus Dynamics of Each of ipsius Interpretations of 36-Qualitative Universal Entities.

3.1068. And this subterraneous deformation of ampliative Information starts from the specific Form-structures characteristic to altitudeness of Cosmic Complex-Plan, which still continues to keep Inter-Universal codings of Cosmic PFD. In *Atmic PFD*, which is the next in the order of the highest covallertness (meaning, It is «lower,» relatively «more depliative») to the Cosmic PFD, this Process of subjective deformation of ampliative Conceptions is aggravated even worse. As focal-ethereal interconnections have been simplified, Form-structures of Inter-Universal Atmic PFD transform to their more depliative variants — *Harmonizing Complex-Plan, Harmonizing Plan-Level and Disintegrational (Buddhi-Cosmic) Plan-Overtone*. Here depliative tendencies occur literally at once in conditions of altitudeness of Harmonizing K-P, which YYUULLUYG- Forms structure Focus Dynamics of Form-Creators of ipsius Self-Consciousness of DDIIUYI-Entity.

3.1069. In conditions of exuberation of Harmonizing Plan-Level of Secondary Energy-Plasma these Conceptions are correspondingly leveled (brought to qualitative correspondence) with Energy-Plasma's LLAASS-Forms. And after that, in specific conditions of Form-structures of Disintegrational Plan-Overtone subjective «decomposition» on constituent parts of more integrated ethereal Configurations of LLAASS-Forms takes place. Those are already SFUURMM-Forms, which structure Focus Dynamics of Form-Creators of Tertiary Energy-Plasma.

3.1070. This Process of qualitative differentiation of UPDR-«projections» acquires even greater «globality» and «proportion» due to the fact that the following Inter-Universal PFD — Disintegra-

tional — is functionally supposed for generating the best conditions for subjective «disintegration» of *figmentative* (unified, integrated in their slloogrent Essence) focal and ethereal Configurations on constituent parts, and because this PFD actively promotes implementing of such Qualitational tendencies in Focus Dynamics of Form-Creators of all possible Universal Entities. This given Disintegrational Mechanism penetrates through all Form-structures of Complex-Plans and Plan-Levels and allows by that to manifest in slloogrent Focus Dynamics of Every DDIUYI-Entity of unique features of *buddhic Form-Creators, which specialize* purely on realization in Energy-Plasma of all possible transgressive processes. Although, we will talk in detail about that a little bit later.

3.1071. In addition, I will also say that Form-structures of transgressive variants of UPDR-«projections» of *all* twelve Universal Diapasons are potentially represented in each of «local spots» of subjective exuberation of Focus Dynamics of Form-Creators of any Self-Consciousnesses Forms or CCI. Specific features of the infinite multitude of these focal-ethereal projections create all diversity of universal Creative Activity, which has been manifested by Form-Creators of our DDIUYI-Entity through Its slloogrent Focus Dynamics.

3.1072. For example, ethereal «projections» of Inter-Universal slloogrently-diffuzgent Information diversify in specific conditions of exuberation of Form-systems investigated by us in the following way. Ethereal SSNUYLL-Forms of Inter-Universal Ethereal Diapason (FLAAGG-TUU) transgress to ethereal YYYUULLUYG-Forms of Inter-Galactic Ethereal Complex-Plan (IIYY-YY-SS-MM), which in turn transgress to LLAASS-Forms of Cosmic Ethereal Plan-Level (OULLGNOO-SS-ST) of the Secondary Energy-Plasma and manifest in Ethereal Plan-Overtone (UUOLL-SLAILLI-I) of the Tertiary Energy-Plasma in the way of all possible SFUURMM-Forms. In the same way UPDR-«projections» of focal-ethereal interconnections also qualitatively diversify (with features characteristic to them!), which are typical to Form-Creators of Form-structures of other eleven Inter-Universal PFD.

3.1073. When I use the term «Form» with respect to SFUURMM-Forms and their ampliative analogs, then you should not understand this as some Form-structure, because they are not. But I have to use this word, because all these ethereal «projections» *structure by information (supply)* every focal Configuration exactly at the moment of its exuberation in the corresponding to it Space-Time conditions. These ethereal «projections» kind of «merge» with the Focus Dynamics, but, actually, they just «ephemerally reflect» in it with definite part of their Essence! And then, each of these «projections» instantly has been provided by Form-Creators of the Perception system with some subjective «expression Form.» And peculiar to it Information has been specifically expressed through this Form in the current local exuberation conditions (by means of Thought, Feeling, Intention, sound, action, deed).

3.1074. Do not forget that «Form» is very relative notion. In one exuberation conditions it has an opportunity to exist and manifest itself somehow, but in other conditions it has not. For example, some of SFUURMM-Forms in the usual to us «materialization» regimes can manifest only as invisible to us Thoughts and Feelings. Whereas the same them in other regimes more actively and with kind of more «saturation,» more «concentration» structure Focus Dynamics of Self-Consciousnesses Forms and therefore have much more propitious conditions for their «material» exuberation. They virtually instantly transform from SFUURMM-Form to Self-Consciousness Form. From this point of view

one can say that NUU-VVU-Forms focused by us now represent in this given subjective «materiality» type depliative SFUURMM-Forms of the more ampliative our Form-Types, which we accept as the most qualitative of our Thoughts and Feelings.

3.1075. Also, I should mention that Inter-Universal Ethereal Diapason does not have Its own Form-structure, though peculiar to It ethereal interconnections have been «projected» to all eleven Inter-Universal Diapasons and by information structure Focus Dynamics of their Form-Creators . No one from PFD could not realize Itself (as skrruullerrt system or Space-Time) without this issue. Taking into account this circumstance, I consider necessary to underline its importance. And I've separated It to the independent Ethereal Diapason. Though you should not forget about the fact that peculiar to It ethereal Information has been just slloogrently «distributed» (through *Ethereal Complex-Plan*, *Plan-Level* and *Plan-Overton*) by Focus Dynamics of Form-Creators of all other Diapasons.

3.1076. Since all these Form-structures have subterransive (that is, «individual») AIIYVVFF-expressions (Sound Cosmic Codes, or SCC), the opportunity of their conditional classification on diapasons dimensions has appeared due to the deep insight by my Focus Dynamics to the Essence, which constitutes them. This dimension is structured by focal-ethereal interconnections characteristic to the aiyyaiaic birvulyarity type. This mans that interpretation of all possible heterogeneous (that is, different-Qualitative) signs of every of the Levels examined here is subjective, but not objective, because this process could really have been realized in Self-Consciousness of focused by Me human «personality» starting just from those humanational premises, which are peculiar to the general — for aiyyaiaic birvulyarity type! — concatenational interconnections' sequence between Form- and Info-Creators (lluuvvumic type ↔ lluuvvumic-goolgamaaaic ↔ goolgamaaaic ↔ ssmiysmaaaic ↔ tlaassmaaic type).

3.1077. Though, while I had been classifying all slloogrent Energy-Information of FD of this given DDIUYI-Entity so minutely on *kind of* «discrete» Form-structures of Plasmic Forces Diapasons (Complex-Plans, Plan-Levels and Plan-Overtones), my task was to give you an ability to meditate on these SCC and to continue further to expand individually the process of Your Own Cosmic Self-actualization trying to describe Information acquired in this way by the terms clear to other people. But this refers only to those of you, who has become proficient already in the method of the more comprehensive intuitive Cognition by means of insight to the information space of your Self-Consciousness through specific psychic states (profound Meditations). of course, any of created by you Conceptions at that will be absolutely wide of «the actual situation,» although even such notion as «the actual situation» simply cannot exist in the multilevel dynamics of the infinite transformational Universal Processes.

3.1078. And nevertheless, this attempt to express in words Something, Which is dependent on neither auding, nor Embodying, give some opportunity to your mind's Form-Creators to come in touch with more qualitative sides of the Cosmic Slloogrentness and to comprehend at least in the most rough, acceptable to your Perception feelings your own eternal Inseparability within Everything and your indissoluble creative Unity with Everything Being. Whenever you try to describe by words something, which you are able to sense internally in Meditations on Sound Codes-Definitions,

you will approach increasingly other people to the more expanded Conceptions about themselves and to the more deep Comprehending of their own indissoluble relations with inhabitants of many other Worlds' Form-systems and subjective Realities, which have been «hidden» beyond entourage of common to you things and phenomena.

3.1079. It would be desperately senseless to cram and to memorize those SCC, which have no connection with the Essence of phenomena examined by us, because new and essential to understanding terms will be able very soon to lay in your memory levels naturally, just like everything else, which enters as necessary your conscious Life. All SCC are presented in the Iissidiology only for subterransive Meditation on vibrations of f-Configurations peculiar to them with the aim of extending the abilities of the deep revelation of the more qualitative Self-Consciousness Levels via specific psychic-mental states. Once you have some question or you've become really interested in some Level of the Knowledge represented here, you may try to meditate on the needed Sound Code. And this really could happen that necessary answer or even the whole block of a new to you Knowledge will «emerge by itself» in your Creative Interest application zone.

3.1080. You should take into account that all enlisted Complex-Plans, Plan-Levels and Plan-Overtones cannot give you full clearance about OO-UU-Entities objective structure. At that, Form-Creators of your Self-Consciousness Form simultaneously converges with their continuous Focus Dynamics to all infinite diversity of the ethereal Configurations of these Entities' sub-Aspects and Aspects. Actually, each of the twelve *Plan-Overtones of Fields-Consciousnesses of Tertiary Energy-Plasma* represent specific humanational combination of the infinite diversity of heterogeneous signs of the most simplified (down to the ± 12 dimension) solvation of the twelve OO-UU-Entities' sub-Aspects and Aspects.

3.1081. The most ampliative results of all these focal-ethereal interactions, which have been realized by Form-Creators of different Proto-Forms in each of the twelve exhiberational diapasons, transmute between each other sivilgs-spherationally and transform concatenationally into humanational combinations of f-Configurations of Collective Cosmic Intelligences, which structure twelve *Cosmic Plan-Levels of Secondary Energy-Plasma*. In the same way all infinite multitude of the most ampliative combinations of interconnections of each of the Plan-Levels qualitatively transform to the even more universal properties of the twelve *Inter-Universal Complex-Plans of the Primary Energy-Plasma*.

3.1082. At that, one should note that organizing of focal-ethereal inter-Qualitative combinations of f-Configurations of PFD is implemented not only between FDs of Form-Creators of conditionally *mental* PCQ group (ALL-Will-of-ALL-Intelligence, ALL-Primordiality-ALL-Initiality, ALL-Mobility-ALL-Presence, ALL-Knowledge-ALL-Informedness, ALL-Aspiration, and also ALL-Unity and ALL-Steadiness-ALL-Stability) and conditionally *astral* PCQ group (ALL-Love-ALL-Wisdom, ALL-Integrity, ALL-Essentiality-ALL-Permeability, ALL-Abundance-ALL-Fullness, ALL-Voidness-ALL-Vacuumness, and also ALL-Unity and ALL-Steadiness-ALL-Stability) but also between Form-Creators of covallert between Each Other PCQ inside of each of these groups.

3.1083. As the result of such ambigulyar interactions between peculiar heterogeneous signs of all twelve PCQs, *humanational amitsiration* of absolutely all focal-ethereal interconnections (simultane-

ous-multipolarizational initiation of repeatedly new and new Self-Consciousnesses Forms) occurs, which allows in every particularly examined instance to manifest mutually f-Configurations with the most covarllert (to the conditions of this given Level!) focal-ethereal interconnections.

3.1084. Because of the incredible complexity and multiplicity of this overall Process we do not have opportunity to follow all interconnections' multitude, which have been realized *inside* of each of the conditional PCQ groups (mental and astral). That's why we can investigate the process of generating in the PFD of all causal Self-Consciousnesses Forms only from the standpoint of the possible interactions between Info- and Form-Creators of these two groups. For example, 2nd physical *usstukkulyar* (from +3.5 to +3.0 dimension) sub-overtone of Physical Plan-Overtone is generated mutually in the PFD by Form-Creators of Astral *skradomulyative* sub-overtone (from 0.0 to +3.5 dimension) and Mental *iissorf* sub-overtone (from 0.0 to +3.5 dimension). At that f-Configuration of Form-Creators of 131st Causal sub-overtone — OSTROKKOLF (from 0.0 to +3.5 dimension) is generated in parallel.

3.1085. Naturally, intra-group (separately between mental and separately between astral PCQ) interconnections of Form-Creators also take part in this process. Though, we can say nothing about them, because FDs of Form-Creators of our own Self-Consciousnesses Forms invaderentially structured due to the inter-group interaction (ALL-Will-of-ALL-Intelligence is conditionally mental PCQ group; ALL-Love–ALL-Wisdom is conditionally astral PCQ group). At that, this Process in FDs of our Self-Consciousnesses Forms is implemented roughly in the following svilgs-spherational sequence:

- 1) the launching for the lluuvvumic Synthesis Scheme is started by the, Form-Creators, which reflect homogeneous signs of each of these PCQs (ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence), because they, due to the high degree of covarllertness, the most easily enter the interactions between each other through all resopasons of the general exhibition (the first Round);
- 2) after realizing a certain degree of humanation between each other, homogeneous signs of the ALL-Love–ALL-Wisdom Dominant acquire ability to synthesize partially with homogeneous attributes of PCQ ALL-Primordiality–ALL-Initiality (mental group; conditionally incompatible group with intermediate imperseptness degree); and homogeneous signs of the second ALL-Will-of-ALL-Intelligence Dominant synthesize partially with homogeneous attributes of PCQ ALL-Aspiration (mental group; conditionally compatible group with the lowest covarllertness degree);
- 3) only after reaching essential degree of inter-Qualitative Synthesis between heterogeneous signs of these four PCQs, homogeneous signs of ALL-Love–ALL-Wisdom Dominant acquire ability to generate in FD stable (for this diapason!) combinations with homogeneous signs of ALL-Abundance–ALL-Fullness PCQ (astral group; conditionally incompatible group with extremely high imperseptness degree), and ALL-Will-of-ALL-Intelligence Dominant acquires ability to start active interconnections with homogeneous signs of ALL-Integrity PCQ (astral group; conditionally compatible group with intermediate covarllertness degree);
- 4) due to the presence of these stable states in FD, ALL-Love–ALL-Wisdom Dominant acquires ability to interact actively with homogeneous signs of ALL-Mobility–ALL-

Presence PCQ (mental group; conditionally incompatible group with intermediate imperceptness degree), and ALL-Will-of-ALL-Intelligence Dominant starts to create mutual combinations with homogeneous signs of ALL-Essentiality–ALL-Permeability PCQ (astral group; conditionally incompatible group with not high imperceptness degree);

- 5) only after accomplishing all these preliminary conditions, ALL-Love–ALL-Wisdom Dominant starts active creativity with homogeneous signs of ALL-Unity PCQ (conditionally incompatible group with not high imperceptness degree), and at the same time ALL-Will-of-ALL-Intelligence Dominant acquires ability to interact actively with homogeneous signs of ALL-Voidness–ALL-Vacuumness (astral group; conditionally compatible group with intermediate covarllertness degree);
- 6) only after reaching essential degree of compatibility between corresponding heterogeneous signs of all above mentioned PCQ conditions arise to form in it (in FD) amplificational State «Creative Cosmic Potentiality.» Ampliative homogeneous signs of ALL-Love–ALL-Wisdom Dominant actively combines with equally ampliative homogeneous signs of ALL-Knowledge–ALL-Informedness PCQ (mental group; conditionally incompatible group with the highest imperceptness degree), and mental ALL-Will-of-ALL-Intelligence Dominant actively combines with homogeneous signs of ALL-Steadiness–ALL-Stability PCQ (astral group; conditionally compatible group with high covarllertness degree);
- 7) when NUU-VVU-Form-Type's FD has been micro-specifically «packaged» with heterogeneous signs of all twelve PCQs combinations, all conditions have been built up in the Self-Consciousness for mutual interaction of SFUURMM-Forms created by the most ampliative (for the 3–4-dimensional diapason!) Form-Creators of ALL-Will-of-ALL-Intelligence and ALL-Love–ALL-Wisdom PCQ with SFUURMM-Forms, which are resonationally correspond to them and have been synthesized on the basis of ALL-Unity PCQ Form-Creators 's FDs. Exactly at these — and no any other! — conditions the latter acquire priority and invaderentness state in the lluuvvumic Synthesis Scheme to continue this process of the further humanization of heterogeneous signs in the 4–5-dimensional diapason of NUU-VVU-Form-Types exhuberation (the start of the second Round of three-invaderental Synthesis of ALL-Will-of-ALL-Intelligence and ALL-Love–ALL-Wisdom Dominants: «CC Potentiality» + ALL-Unity).

3.01086. To help you analyze this sequence of implementing two-invaderental lluuvvumic Synthesis Scheme, I remind you of the composition of the two PCQs compatibility groups (the division on the groups by astral and mental signs has already been given above).

the first group (as the covarllertness degree reduces): ALL-Love–ALL-Wisdom, ALL-Will-of-ALL-Intelligence, ALL-Steadiness–ALL-Stability, ALL-Voidness–ALL-Vacuumness, ALL-Integrity, ALL-Aspiration.

the second group (as the covarllertness degree reduces): ALL-Unity, ALL-Essentiality–ALL-Permeability, ALL-Primordiality–ALL-Initiality, ALL-Mobility–ALL-Presence, ALL-Knowledge–ALL-Informedness, ALL-Abundance–ALL-Fullness.

3.1087. During analysis you will certainly have questions concerning the issue, why so expected and logical regularity is not tracked in the specified sequence of implementing inter-Qualitative interconnections. Actually, it should be correct, when firstly the most covarllert homogeneous signs are activated in FD; these signs should refer to the PCQs peculiar to one conditional compatibility group. And only after that, after covarllertness degree increase, more and more impersept interconnections should be activated.

3.1088. For example, mental ALL-Will-of-ALL-Intelligence Dominant starts Creative Activity with medium-covarllert homogeneous signs of ALL-Voidness–ALL-Vacuumness PCQ (item 5), and with highly-covarllert homogeneous signs of ALL-Steadiness–ALL-Stability PCQ only after that (item 6). And before that ALL-Love–ALL-Wisdom Dominant implements medium-impersept (items 2 and 4) and even strongly-impersept combinations (item 3). Why is that?

3.1089. My answer to such question might sound something like this. «When I saw such discrepancies, I could even not set them as an example, in order to not embarrass your extremely fragile confidence in credibility of this Knowledge. With my own concept of this sequence, I would build it necessarily in full compliance with expected results. They mean obviously primary synthesis of the most covarllert, and then less and less covarllert interconnections. After them comes the turn of the least impersept, and then more and more impersept interconnections.

3.1090. But for some reason the order of svilgs-spherational implementing of lluvvumic Synthesis Scheme (as well as in others) in subjective Reality turns to be completely unexpected and in many respects contradictory to our logics. Obviously, if we follow it as usual, we miss something important, because there's still too much we do not know. Perhaps, similar «irregular» (from our point of view) sequence is the result of specific influence on generating Focus Dynamics of different-Qualitative human Form-Types of all multitude of other birvularity types. Their representatives in this dimension diapason are other Proto-Forms. Meanwhile we have to take this fact for granted.»

3.1091. We occasionally use such notional comparisons as depliative («the lowest»), modicative («medium») or ampliative («the highest») at the mention of Plans and s-Realities, which properties are the most suitable for interaction with Form-Creators of your Self-Consciousnesses Forms. And you should not forget that approved here comparative technique of any creative manifestation evaluation is always conditional and subjective to the degree caused by the qualitiveness of own active Levels Self-Consciousnesses of the «personality.» While examining general features and characteristics of Plan-Overtones (*sub-plans* of Cosmic Plan-Levels) you should remember that properties of the «highest» Qualities of Universal DDIIUYI-Entity differ from Its «lowest» Energy-Plasma Levels to the same extent as diamond structure is more perfective from the usual glass structure.

3.1092. While using such notions as «Inter-Galactic e Complex-Plans,» «Cosmic Plan-Levels,» and «Plan-Overtone of Fields-Consciousnesses,» you should at least roughly imagine differences in Energy-Plasma organization Levels in each of these qualitative Diapasons and try not to mix properties typical to each of them in your Conceptions. You should at least theoretically understand this incommensurable qualitative difference, which exists not only between Focus Dynamics of Form-Creators of different Diapasons' Levels, but also «inside» of these Levels.

3.1093. More than that the expression «Form-structures of the PFD,» which I use here, in no way corresponds to your «current» subjective Conceptions about any Form-structures, which manifest anyhow in the wave diapason spectrum visible to people. But since any focal-ethereal humanational combinations' type inevitably transforms right now to the Self-Consciousness Form, which corresponds to this given exuberation conditions, we will not forget about the fact that all Form-structures represent different variants of slloogrent FDs of Form-Creators, who structure some Worlds' Form-systems and STCs. And this will hold however far these Form-structures will be from SFUURMM-Forms of them, peculiar to you.

3.1094. I ask you to focus on this, because some of you, who investigates Inter-Universal Plasmic Forces Diapasons in the states of profound Meditations on their SCC, may seem, just like me in the beginning that they do not have any structure at all (in our understanding), because they demonstrate universal properties and unique features. In these exuberation Levels of CCIs of Universal Form-Creators (up to $\pm 36-38$ dimension) it is very and very difficult for us to delimit effects of Focus Dynamics's manifestation from Creative Activity of the Info-Creators, which provides this Dynamics.

3.1095. In our s-Reality we are accustomed to the fact that Self-Consciousness Form at its own manifestation does not necessarily have to expose Its subterraneous Essence — focal and ethereal components. These components in examined by us dimension Levels manifest simultaneously in one «spot» of Space-Time in the state of the strong resonational unity and harmoniously complement not only each other, but also all their «surroundings.» Though, again, so-called «surroundings» of every Self-Consciousness Form represents not only «themselves,» but also reflects subterraneous Contents of the Form Itself.

Chapter 2. Interconnections between Cosmic Qualities at manifestation in different Levels of Energy-Plasma

3.1096. Twelve exuberational versions of TUU-LLT-TUU, which represent all Multipolarization of Focus Dynamics of DDIUYI- Entity, correlate with all other Its Form-structures at roughly the same balance as Focus Dynamics of Form-Creators of *Our* Form-systems, which are structured by SFUURMM-Forms of Supraconsciousness, qualitatively prevail over Focus Dynamics of Form-Creators, which have been supplied by SFUURMM-Forms of our collective Subconsciousness, «personal» Self-Consciousness and collective Unconscious. We talk about that fact that 12 Inter-Universal PFDs to FD of our DDIUYI- Entity are the Sources of the most amplificational among accessible to It variants of realizational SSNUYLL-Codings (I conditionally compare them with the influence of SFUURMM-Forms of Supraconsciousness on our FD). In turn, the influence of YYYUULLUYG-Forms of Inter-Galactic e Complex-Plans could be conditionally compared with the influence on our FD of SFUURMM-Forms of Subconsciousness, and influence of LLAASS-Forms of Cosmic Plan-Levels could be compared with FD of «personal» Self-Consciousness. As regards SFUURMM-Forms of Plan-Overtones of Fields-Consciousnesses strongly deformed by Inertia, their role in FD of DDIUYI-Entity

reminds me a lot tendencies of collective Unconscious. Though, you should understand, of course that this is very, very subjective comparison.

3.1097. Just as ampliativeness of Focus Dynamics of Supraconsciousness has no any real ability to subjectively «materialize» via our Perception systems in conditions of this given depliative (with respect to 5–7-dimensional Levels) dimension diapason, SSNUUYLL-Forms of TUU-LLT-TUU cannot *immediatively* (directly, straight on) reflect themselves with peculiar to them Essence through f-Configurations and Focus Dynamics of Form-Creators of Inter-Galactic e Complex-Plans, Cosmic Plan-Levels and Plan-Overtones of Fields-Consciousnesses. This holochronely-simultaneous process is carried out through UPDR's universal properties by means of transgression of focal-ethereal «projections,» which have been concatenationally generated by the Focus Dynamics of Form-Creators of Inter-Universal Diapasons to the Focus Dynamics of Form-Creators of each of the mentioned Form-systems.

3.1098. SSNUUYLL- Forms of each of the 12 Inter-Universal Diapasons are the highest Information for the Form-Creators of this given DDIUYI-Entity (meaning, for the HCI — AYFAAR) about absolutely all opportunities of creative multipolarizational realization in this given megadimensional diapason. Without such basic supplement not a single Self-Consciousness Form just would not be able to manifest in accordance with Its specifics in Space-Time conditions. Form-Creators 's TUU-LLT-TUU functions could be compared in principle with the Form-Creators regulators' functions, who svilgs-spherationally provide with all necessary Information FDs of Creators-interpreters and gene Form-Creators in the structures of our human DNAs and RNAs.

3.1099. Exhiberion mechanism of Universal Entity reflects by itself the Principle of multipolarizational holochronely-simultaneous realization of Cosmic subjectivism through the Focus Dynamics of the infinite multitude of ipsius Interpretations, Which just from the standpoint of their focal-ethereal formation could be compared with «personal» Interpretations of our Stereo-Form. In f-Configuration of every Universal Entity amplificational analogs of our Form-Types are represented by complex exhiberions of Form-Creators, whose Focus Dynamics specifically reflect certain combinations of focal-ethereal interconnections between all twelve OO-UU- Entities.

3.1100. For example, combinations peculiar to this given Universal DDIUYI- Entity are absolutely unique and do not repeat elsewhere in the whole Macrocosmos's slloogrentness, because Each of the Twelve Pure Cosmic Qualities (LIY-FFMI-LLI) is represented in the Focal structure of Form-Creators of Its the Highest Cosmic Intelligence (AYFAAR) NOT equally, but through the infinite diversity of all possible force proportions and combinations. These combinations generate in this given exhiberion megadiapason absolutely unique and inimitable in its subjectivity picture of ipsius Universal Cosmic Creativity as a result of specific interactions between Each Other (and also with combinations of other Universal Entities both of DDIUYI-type and others!).

3.1101. Let me remind you that SCC «DDIUYI» in Essence could be compared very conditionally with what you mean by the words «human» (or any specific animal type), «personality.» Imagine some extra-advanced «Human Personality,» who manifests their «individual» Creativity in the same way as zillions of simultaneously exhiberated together with them «Personalities» not in our

3–4-dimensional, but in 0–36-dimensional megadiapason. Along with people all these Entities are similar in some special way to each other (that is, they reflect with their FD typical heterogeneous signs of SSNUUYLL-Forms of common to them DDIIUYI-Form-Type). And at the same time they subjectively differ with something very strongly not only from each other, but also from all other Universal «Proto-Forms,» which have been exhibited together with them in «the same» Dimension diapason. In addition, Each of these Cosmic Entities via Focus Dynamics's Multipolarization *in different Space-Time conditions* has been manifested simultaneously together with zillions of other ipsius DDIIUYI-Interpretations.

3.1102. To some extent such — *extremely relative!* — comparison of Universal Entity with people and human society could be extend in general on organization principles of some — common to all the multitude of these given DDIIUYI- Entities — Creative Cosmic Activity, which has been implemented simultaneously and differently by all of them in different Development scenarios and in different ipsius Rotational Cycles. But this comparison is not given here so that you could «project» many features of our human Existence on the properties of our Universe's FD. It is given in order that you could more definitely imagine (let it be absurdly subjective!) the Sense of the term «DDIIUYI-Entity.»

3.1103. It is not possible yet to find even more subjective differences between them (how we could do this, for example, with different people's «personalities,» who belong to different races and nations). Therefore, the only thing we can do to emphasize specific subterraneous signs of some Universal Entity, in f-Configuration of which the process of exhibition of our «current» human Forms Self-Consciousnesses takes place as opposed to the whole multitude of other DDIIUYI-Entities «individualities,» is to use in such cases phrases «our DDIIUYI-Entity» or «this given DDIIUYI-Entity»

3.1104. TUU-LLT-TUU are the innermost, ipsius part of f-Configuration of this given Universal Entity, which veritable Essence can be accessible only to Form-Creators of the most ampliative Levels of Focus Dynamics of AYFAAR VCCI. The whole the Highest focal-ethereal Basis (for each of the twelve PFDs) has been represented by SUPRA-Universal UUYU-UU-YY-Creators («the lowest projections» of FD of the I-IIYTY-I-AA-A-Creators of the 48-dimensional Universal Entities), Who transgress their SSNUUYLL-Forms to FD of the SSUI-SS-SFAA-Creators of Primary Energy-Plasma, which structures Inter-Galactic e Complex-Plans. Even more amplificational (then already known to you 12 Pairs of Combined Qualities or EI-YY-UI-YY) focal-ethereal combinations underlie this Energy-Information, and they are structured internally, in addition to Each of these Harmonious Pairs with even more complicated Schemes of inter-Qualitative Synthesis. That is, variants of possible interconnections with Each of the 21 PCQs have been added to Each Pair in a special way.

3.1105. These SSNUUYLL-Forms in specific conditions of exhibition of Focus Dynamics of SSUI-SS-SFAA-Creators transgress to all diversity of ethereal YYYUULLUYG-Forms of Primary Energy-Plasma. So if slloogrent Focus Dynamics of TUU-LLT-TUU reflects in the Focal Configuration of this given DDIIUYI-Entity qualitative (Creative) Essence of Its Primary Image configured in detail (and ethereally «projected» to this given megadiapason) from the diffuzgent combinations of the heterogeneous signs, which are peculiar to the whole multitude of other Universal (and Inter-Universal) Entities, then Focus Dynamics of Form-Creators of Inter-Galactic e Complex-Plans (SSAA-SS-MM)

reflects by Itself, in Essence, the same in Space-Time, but it is already in the «personally conscious» and «subjectively stated» view. This will be some intermediate variant, which represents one of the infinite number of the same different-Qualitative components mutually structuring holistic Cosmic Creation in this given megadiapason.

3.1106. Thus, as I mentioned earlier, YYYUULLUYG-Forms in all their heterogeneous diversity and total compatibility represent universal basic codings of the SSUU-SS-VUU-Creative Sphere of the SSUI-SS-SFAA-Creators. These YYYUULLUYG-codings embrace absolutely all Program of possible amplificational development of multipolarizational Focus Dynamics of this given DDIIUYI-Entity in different conditions of the 0–36-dimensional megadiapason. SSUI-SS-SFAA-Creators resonationally involve to own subterransive Cosmic Creativity from this focal-ethereal base only those specific combinations of PCQ-signs, which allow to realize their essential Interests and initiate by this all the multitude of f-Configurations of subterransive Interpretations of different-Qualitative DDIIUYI-Entities to the process of exuberation in different Space-Time's regimes. Though these DDIIUYI-Entities should simultaneously structure with their Focus Dynamics common to them megadimensional diapason.

3.1107. Ipsius Creativity of Each of these Universal Entities in general does not extend beyond the limits of these given codings and uses in its own way their Contents for amplificational development in a Synthesis Scheme peculiar to these Entities. One could compare this with an example when a person perfects their FD in the lluuvvumic Direction of refocusing (due to cultivation in own Self-Consciousness of codings of HSI and HIA), and becomes capable of steady refocusing from f-Configurations of own mixtum NUU-VVU-Form-Type to certain more qualitative Interpretations of own Stereo-Form including dimidiomittense and translucense Self-Consciousnesses Forms. In any of other cases, when «an alien» combinations' activity starts to prevail in the Creativity of this given Universal Entity, this spectrum of Its Focus Dynamics's Multipolarization transforms to f-Configurations of other types of Universal Entities. It is important that these combinations are typical to Universes of other types and are included to the codings of this Universal Entity only for providing catalizational process peculiar to It. This reminds a situation when a human «personality» due to the strong violation of lluuvvumic Synthesis Scheme conditions refocus resonationally to an f-Configuration of some of protoformal Form-Types.

3.1108. Specific combinations of different-Qualitative Aspects underlie these codings, which are subterransive to Universes of every type. These Aspects reflect with their ethereal «projections» all informational Essence of this given Universal Entity and simultaneously structure all qualitative Levels of Creative manifestation of slloogrent Focus Dynamics of AYFAAR — Its Highest Intelligence. While entering resonational interconnections with corresponding to them Form-Creators, these focal-ethereal combinations of Aspects (which already have acquired in the Focus Dynamics the functions of Info-Creators) absolutely precisely «project» to every «spot» of exuberation in Space-Time of this given Universal Entity the Essence of Its «initial Code,» which provides Its Synthesis Scheme.

3.1109. The result of the mutual Creativity of UUYG-UUYU-Info-Creators with SSUI-SS-SFAA-Creators is that qualitative State of Energy-Plasma, which is the main basis of SSUU-SS-VUU-Sphere of their resonational subjective Creativity. We interpret It as «*Primary Illusion of this given Universe's*

Creation» (It is OIYAOOMM; unlike the *objective* Nature of SSUU-SS-VUU-Sphere's Form-structures, It reflects in the Perception systems of different Self-Consciousnesses Forms only typical to them *subjective* tendencies). The functions of this Illusion's simultaneous realization in definitive (appointed) exuberation conditions are carried out by Focus Dynamics of Form-Creators of Inter-Galactic e Complex-Plans (SSAA-SS-MM).

3.1110. The whole Contents of Self-Consciousness of this given Universal Entity is manifested from focal-ethereal interconnections, which represent subterraneously transformed codings. It includes qualitative reflections of Primary Energy-Plasma within Itself via incalculable number of codings reflected in It; Fields-Consciousnesses of Secondary, Tertiary and Quaternary Energy-Plasma; other Cosmic Entities (CCI), which have been exuberated in all possible conditions in up to 36th dimension (for example, AIY-YYA) with incalculable number of Collective Cosmic Intelligences peculiar to them, Whose Focus Dynamics have been organized into «Sectors,» «Sub-Sectors,» «Flows,» «Rays,» and «Channels,» which structure all Inter-Galactic e Complex-Plans, Cosmic Plan-Levels, and Plan-Overtones of Fields-Consciousnesses.

3.1111. In this way, for example, Collective Cosmic Intelligence of Inter-Galactic Transforming Complex-Plan (LLOUY-SS-MM) is organized by harmonious focal-ethereal interconnections of Form-Creators of the twelve Qualities' «Sectors» (NNIILG-NNI), in every Each of them Collective Cosmic Intelligences of zillions of Galactic Entities Co-Exist Self-Consciously. In turn, Focus Dynamics of Form-Creators of Collective Intelligence of Each of the Twelve NNIILG-NNI is supplied by Focus Dynamics of Form-Creators of the twelve Qualities' «Sub-Sectors» (LLIING-LLI), Which have been generated by the Focus Dynamics of Form-Creators of the infinite multitude of CCIs of Stellar Entities (TLOO-U-UU) of all kinds of qualitative types and subterraneous development levels. Focus Dynamics of Collective Intelligence of Each of the TLOO-U-UU-Entities, in turn, is also structured by FD of many Planetary Entities (SSV-UU-UU) CCIs, Which provide internal differentiation of FD of own CCIs and their Collective Consciousnesses on their Planetary creative manifestation Levels by specific combinations of heterogeneous signs and Schemes of inter-Qualitative Synthesis.

3.1112. All general Focus Dynamics of Form-Creators of Cosmic Plan-Levels (SSOULG-SS-ST) — with respect to the qualitiveness of Focus Dynamics of Form-Creators of Primary Illusion of Inter-Galactic e Complex-Plans — provides exuberation Mechanism of *Secondary Illusion of this given Universe's Creation* (UIYUVIIMM). And mutual Focus Dynamics of Form-Creators of Plan-Overtones of Fields-Consciousnesses (IYY-UUSSM) — with respect to the qualitiveness degree of the Focus Dynamics produced by Form-Creators of the 12 Harmonious Pairs of Combined Pure Qualities of Secondary Energy-Plasma — produces by Itself all diversity of Self-Consciousnesses Forms and CCIs of the *Tertiary Illusion of this given Universe Creation* (AIYYALUUMM). There is also *Quaternary Illusion* (SLOUYGOOMM), which manifestation and functioning Mechanism I can neither understand, nor explain because of enormous instability (for the Focus Dynamics of our Self-Consciousnesses Forms) of SFUURMM-Forms, which structure *sub-«tetrahedral»* f-Configurations.

3.1113. By the term «Illusion» I mean specific reflection of different Energy-Plasma States in the definitive Space-Time conditions. This is not Energy-Plasma by Itself (though, It structures by Its own interconnections any Illusion type!), Which Universal States we have no any ability to perceive

subjectively. But these are focal reflections of the most accessible to our Perception «projections» of resonational combinations between Form-Creators and Info-Creators, which have been subterraneously formed in our Imagination through specific Focus Dynamics of the Self-Consciousness Form focused by us. Some variety sorts the Universal Illusion differ from the Spheres of Cosmic Creativity, which represent objective structures of the skrruullerrt System of Macrocosmos, in such a way that they are able to generate in the Focus Dynamics of the different Self-Consciousnesses Forms completely different subjective impressions (Conceptions) about the environment, which surrounds them, and corresponding reactions on external changes, which they subterraneously perceive.

3.1114. Thus, SSUI-SS-SFAA-Creators of Primary Energy-Plasma — in the Levels of Inter-Galactic e Complex-Plans — form Primary Illusion (OIYAOOMM) via Form-structures of SSUU-SS-VUU-Creativity Spheres (from 36th to 24th dimension). In turn, SSLOO-SS-SNAA-Creators of Secondary Energy-Plasma simultaneously form Secondary Illusion (UIYUVIIMM) via Focus Dynamics of Form-structures of NAA-GLLII-UU-Creativity Spheres (from 24th to 12th dimension, represented by Cosmic Plan-Levels). As regards SLAA-SS-MII-Creators of Tertiary Energy-Plasma, they — via Focus Dynamics of Form-structures of EIYG-SS-MII-Creativity Spheres (from 12th to 0th dimension, represented by Plan-Overtones of Fields-Consciousnesses) — provide exuberance of the Tertiary Illusion (AIYYALUUMM). But the subjective process of subterraneous Perception of the Forms of surrounding existence does not finish here. SLUUIY-SS-LAA-Creators of Quaternary Energy-Plasma — via peculiar to them Levels of focal-ethereal interactions in UUKKKHL-SS-KKHKHOO-Creativity Sphere (below zero dimension, down to the point of the reconverstness state) — form Quaternary Illusion of this given Universe Creation (SLOUYYGROOMM).

3.1115. I describe all this so precisely in order that you could understand the following important thesis. Inter-Galactic e Complex-Plans of Primary Energy-Plasma are structured with the same, in Its Essence, Energy-Information, as Inter-Universal Plasmic Forces Diapasons are. You can ask, why is there a need to call them with different terms? That's because differences in Cosmic Creativity between different DDIIUYI-Entities are caused not by the Contents of the common to them Energy-Information, which represents all their realizational-creative Potential, but by the features of the Focus Dynamics of Form-Creators of each from the DDIIUYI-Form-Types of Universal Entities.

3.1116. In this context the word «Inter-Universal» means kind of a «sum» of all focal-ethereal interconnections, which are peculiar to the whole infinite diversity of f-Configurations of different-Qualitative subterraneous Interpretations of DDIIUYI-Entities. Besides that, of course, they are also structured with combinations peculiar to 36-Qualitative diffuzgent Universal Entities *of other types*, for example: SSAASSYIIMS, SLLAAVSSAAMMS, SSORRILLIFULLS, SSRRIIMSSLLAYYSS, SSOOLGOOSSTM, SSPOORRRRUULLSS, DIIMMFALGG, DARREYUUVVSS, DRRULFFUOLLFFT, DSIMMSTAALFMSS, DLLIULLSSLL (which focuses in the same «Sector» with our Universe), and also to Universal Entities (which focuses in other «Sectors») of the following types: SSYY-ILFFST, YASSANFLATTU, LEMMSGARLLD, RULLS-A-NNILV, YGUR-O-RMIYN, SFF-AA-YNTALL, PPAAL-TT-UUYE, VVOYOYY, LLAYAYY, UUFFLLURR, AAFFLLARR, IILLGGIFF, LOOMGD, RRAUFFAAG, LGAILLG, and to many others. Besides differences in invaderentness of the Pairs of OO-UU-Entities, which have been involved in the subterraneous Synthesis Schemes, f-Configurations of Universes of each of these types represent different combinations of Amplificational and Qualitational Branches of Development (both with each other and «inside» of their own Form-structures).

3.1117. That's why YYYYUULLUYG-Forms of Form-Creators of Inter-Galactic e Complex-Plans of Primary Energy-Plasma virtually do not differ by the structure of the most ampliative (to this megadiapason) part of the peculiar to them Essence from the «initial» SSNUUYLL-Forms (38–36th dimension) of Form-Creators of Inter-Universal Diapasons besides typical heterogeneous signs of subterraneous Creativity of Each of DDIIUYI-Entities' Interpretations, which have been subjectively manifested within the limits of the common to them Synthesis Scheme. Why then all this Energy-Information is «attached» to the one megadiapason (from 38–36th to 26–24th dimension), you ask? No, we «attach» it to this megadiapason only subjectively in accordance with opportunities, which we have as AIY-YYA-Observers.

3.1118. That's because Focus Dynamics of Form-Creators of different DDIIUYI-Entities structured with many different-diffuzgent SSNUUYLL-Forms correspond to *different* parameters of dimension in peculiar to them exuberation Levels (like, for example, diffuzgent f-Configurations of doolls and flaks types at the interaction between each other generate intermediate wave NUU-VVU-Configurations, Form-Creators of which already generate in Space-Time dimension of exactly our — *human* — type). YYYYUULLUYG-Forms roughly in the same way, just specifically reflect via subterraneous Focus Dynamics of every DDIIUYI-Entity some (among common to all SSNUUYLL-Forms) features and tendencies, which We subjectively express (through properties of Our ayyyyaic birvularity type) as specific dimensional parameters — from 38–36th to 26–24th dimension.

3.1119. So speaking of subjectivity of perception by us of examined PFDs' dimensional parameters, I will draw your attention to the fact that qualitative transition of Focus Dynamics of «projections» of SUPRA-Universal Form-Creators of 48-Qualitative IYYYYUULLSSMI-Universes to the States peculiar to FD of DDIIUYI-Universes has been implemented not at once but duvuyllerrtly, by means of successive transgression through properties of the three Diapasons of 38, 37, and 36th dimensions. In the same way transformation of FD of Form-Creators of Primary Energy-Plasma to Its Secondary State duvuyllerrtly takes place through 26, 25, and 24th dimensions. Transgression to the Tertiary Energy-Plasma is implemented through 14, 13, and 12th dimensions. Processes, which take place in the mentioned Levels of exuberation of Focus Dynamics, differ quite drastically, with something special from those ones, which are peculiar to every state. It's very difficult to say something particular here, because these processes are very subterraneous to Form-Creators of every birvularity type, and taking into account difference in the dimension type between their f-Configurations examination of this question reaches a deadlock.

3.1120. Though, I will try to explain you this by the elementary sample. All jewelers know that one can get different types of quartz out of the smoky quartz *by means of its heating*, because there is aluminum in the crystal structure, which can influence on the stone color at the heating up to small temperatures. Thus, if one heats smoky quartz up to 350 Celsius degrees, it will become absolutely transparent and turn into rock crystal. At the more precise temperature control and heating duration one can get light-yellow citrines. Brazilian topazes, when heated, lose their yellow color, getting in return now brighter, and now darker pink color, which makes them look like pale rubies. Colorless and green crystals could be obtained from amethyst by firing, and amethysts, on the contrary, could be obtained from crystal. If agates before firing are exposed for a long period (over several weeks) to drying in the sun, they come out red. And by means of ignition of greenish berils and aquamarines one could change their color to blue, whereas bluish tourmalines at that acquire green tones. There

are innumerable examples of such radical qualitative transformations of Forms: obtaining metal from ore, paper and fabric from wood, perfume and foodstuff from oil, and so on.

3.1121. Similarity in our example is that strongly complicated crystal formation and growth process in the nature could be conditionally compared with processes typical to many diapasons, which create some Energy-Plasma State (for example, Tertiary). As a result of this, Form-Creators of any Self-Consciousness Form, coming in different diapasons dimensions through concatenational number of sequential amplificational perturbations, «reproject» duvuyllerrtly to f-Configurations with some definite energy-informational parameters in order to radically change their previous Essence and to acquire opportunity to participate in completely new creative realizations after accomplishing some powerful changes over themselves. Preliminary preparation to this decisive stage takes place in boundary resopasons of every pair of diapasons dimensions with the participation of all possible Planetary, Stellar and Galactic Factory, which coordinate and guide all humanational processes.

3.1122. Examples would be possibly more clear to physicists, which deal with phase transitions (phase transformations) of substances thoroughly examined in thermodynamics. Let me remind you that phase transition characterizes substance transition from one thermodynamic phase to another at external conditions' change. It takes place when system parameters exceed the bound, which divides its two possible states. Inherently, any aggregate state's change represents phase transition, which can be realized both at pressure parameters' change, and at constant temperature and pressure, and also at components concentration change (for example, small crystals of salt precipitation in saturated solution). Besides that, for example, if we compare all elements of the periodic table with Information Entity, and all diversity of gas, liquid and solid states of matter with multi-diverse Macrococosmos types, which have been generated holochronely-simultaneously out of this Entity's primogenitive State at mercavgnation, then we will see visually that infinite number of many possible phase transitions appear during their interaction, which realize with the presence of different parameters, conditions, catalysts, inhibitors, and so on.

3.1123. The primary Components in formation of slloogrent ampliative Focus Dynamics of Form-Creators of DDIIUYYI-Entity — in the mutual Creativity Sphere of UUYU-UU-YY-Creators of Inter-Universal Diapasons (TUU-LLT-TUU) and SSUI-SS-SFAA-Creators of Inter-Galactic e Complex-Plans (SSAA-SS-MM) — are 36 Idiopathic Multimodi of Pure Qualities (KSTAYY-SS-TAA). Each of them has been formed with very complex (to your Imagination) variations of resonational combinations of each of the 12 Pairs of Combined Pure Qualities with each of the 12 Pure Cosmic Qualities.

3.1124. The main ethereal Components of Focus Dynamics of Form-Creators of Cosmic Plan-Levels of PFDs are 12 geyliturgent Pairs of Combined Pure Qualities (24 EI-YY-UI-YY), which highly covarllert combinations serve as distinctive realizational basis for generating stable Focus Dynamics between all «projections» of SSUI-SS-SFAA-Creators of Inter-Galactic e Complex-Plans exhiberated in conditions of Secondary Energy-Plasma through f-Configurations of SSLOO-SS-SNAA-Creators. Their generation principle has been described in detail in «the Iissiidiology Fundamentals» second volume. Exactly these twelve types of EI-YY-UI-YY-combinations structure UPDR and consecutively more and more deform (diversify) in the qualitational (subjectively «descending») part of information Flow of simultaneous consummatization of Energy-Plasma under the influence of the strong

destructive Factors (Inertia, subterraneous dissonation), which belong already to the 14–12-dimensional diapasons of space-time exuberation. And these twelve types of combinations constitute 12 already known to us Pure Cosmic Qualities (LIYY-FFMI-LLI).

3.1125. I also draw your attention to the fact that 24 Combined Qualities have been generated in Form-structures and FD of our Universal Entity as a result of successive Synthesis and concatenational convergence of all 12 Pure Qualities in the mixed PAIRS of different Vectors of Cosmic Creativity (Amplificational Branch + Qualitational Branch). Besides, one should not forget that LIYY-FFMI-LLI represent the most universal part of sllougrent f-Configuration both our DDIIUYYI-Entity and Macrocosses of all types (both humanational and propriusal). Focus Dynamics of zillion-dimensional Levels of exuberation of VCCI of our DDIIUYYI-Entity are structured with zillions of variants of all possible combinations of *twelve* PCQs, which produce 12 combination types of Combined Pure Qualities (up to 24th dimension) and also Idiopathic Multimodi PCQ (up to 36th dimension), Immanent Supermaxims PCQ (up to 48th dimension), Transcendent Dissimiluses PCQ (up to 60th dimension), and so on. Although, these variants of inter-Qualitative interactions in that UPDR spheroidal section, which we subjectively interpret as «diapason from 12.0 to 0.0 dimension,» depliatize (qualitatively decrease) down *to almost* the lowest their limit. Only Quaternary E-P's diapasons could be «lower.» This allows opportunity to Form-Creators of NUU-VVU-Self-Consciousnesses Forms now focused by us to realize creatively just through very tensor (primitive, unstable, dissonational) SFUURMM-Forms.

3.01126. Even though each of the possible inter-Qualitative interactions of Each of initial lluuvvumic Dominants *in the 12-dimensional exuberation diapason* are realized (via Focus Dynamics of corresponding Form-Creators) kind of collectively (jointly), but this interaction in every specific case possesses many signs of subterraneousness (individuality). At the same time Self-Consciousnesses Forms from lluuvvumic to goolgamaaaic birvulyarity types are generated only in those cases when invaderental combination of Aspects of these two OO-UU (separately!) with Each of the rest ten OO-UU does not become stronger than already existing interconnections between two of them in every diapason of their possible exuberation (meaning, this combination does not go beyond *catalyzing* interactions). Alternatively, produced invaderental combination of Aspects realizes through other Proto-Forms whether in 3–4th dimension, or in some other definite — from 4.0 to 12.0 — dimension diapason through 3–10-invaderental Synthesis Schemes:

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence (the first — *depliative, up to 4.0 dimension* — Amplificational Round);

ALL-Love–ALL-Wisdom + ALL-Steadiness–ALL-Stability;

ALL-Love–ALL-Wisdom + ALL-Voidness–ALL-Vacuumness;

ALL-Love–ALL-Wisdom + ALL-Integrity;

ALL-Love–ALL-Wisdom + ALL-Aspiration;

ALL-Love–ALL-Wisdom + ALL-Unity;

ALL-Love–ALL-Wisdom + ALL-Essentiality–ALL-Permeability;

ALL-Love–ALL-Wisdom + ALL-Primordiality–ALL-Initiality;

ALL-Love–ALL-Wisdom + ALL-Mobility–ALL-Presence;

ALL-Love–ALL-Wisdom + ALL-Knowledge–ALL-Informedness;

ALL-Love–ALL-Wisdom + ALL-Abundance–ALL-Fullness;

ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence (the second — *ampliative, 12th dimension* — Amplificational Round);

ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom (the first — *depliative, up to 4.0 dimension* — Amplificational Round);

ALL-Will-of-ALL-Intelligence + ALL-Steadiness–ALL-Stability;

ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Vacuumness;

ALL-Will-of-ALL-Intelligence + ALL-Integrity;

ALL-Will-of-ALL-Intelligence + ALL-Aspiration;

ALL-Will-of-ALL-Intelligence + ALL-Unity;

ALL-Will-of-ALL-Intelligence + ALL-Essentiality–ALL-Permeability;

ALL-Will-of-ALL-Intelligence + ALL-Primordiality–ALL-Initiality;

ALL-Will-of-ALL-Intelligence + ALL-Abundance–ALL-Fullness;

ALL-Will-of-ALL-Intelligence + ALL-Knowledge–ALL-Informedness;

ALL-Will-of-ALL-Intelligence + ALL-Mobility–ALL-Presence;

ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom (the second — *ampliative, 12th dimension* — Amplificational Round).

3.1127. Such not examined by us earlier notions as the first and the second Amplificational Rounds, which have been mentioned separately for Each of the two invaderental (to lluuvmic Synthesis Scheme) OO-UU-Entities, are of special interest to us in above-listed interconnections. This means the only thing that the beginning of the Synthesis of inter-Qualitative interactions typical to lluuvmic-goolgamaaaic birvularity type has been originated in some focal-ethereal conditions and comes to the end in other, more favorable ones (due to the higher covarllertness between Aspects). And those inter-skunkktional interconnections, which were impossible to this given pair of Dominants (due to their high imperseptness) or became partially possible in the intermediate diapasons dimensions (from 4th to 12th), have managed to realize in the highest Levels of Tertiary Energy-Plasma.

3.1128. On close examination of these interactions, some of you will possibly have lack of understanding of difference occurrence between such «absolutely the same in Essence» Synthesis Schemes as, for example, (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) and (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence). Yes, from the point of view of elementary logics, which now inherent in the majority of people, «changing the order of the addends does not change the sum.» Since we deal not with simple numbers, but with highly complex particulars of slloogrent Information, where literally every *as if* «separate» interconnection plays its own role in the qualitiveness of the result received by us, then, from the standpoint of objectivism of accomplishing inter-Qualitative interactions, the difference between like schemes may appear to be enormous.

3.1129. But for all that one should take into account that catalyzing processes, which conduct every such humanational Act, proceed in every case of *kind of* the same (from our point of view) interaction schemes completely differently, then those ones, which seem to us «identical.» The point will be more clear if you consider examples of commutation violation in cases of chemical reactions. The sequence of adding ingredients to the chemical process is crucially important, and if you mix up at least one of the stages, then something unanticipated will be on the output. And even in the case of two substances the change of sequence of interaction between them can lead to radically different consequences. For example, everybody knows that one should not add water to sulphuric acid. This should be done vice versa, in other case there will be an explosion.

3.1130. hese inter-skunkktional interconnections become even more complex and highly significant in the conditions of exhibition of Focus Dynamics of Form-Creators of Secondary Energy-Plasma. Each of the twelve Pairs of Combined PCQs, which have been manifested in PFDs of *our* DDIIUYI-Entity via properties of Inter-Galactic e Complex-Plans, represents by Itself the result of the successive TWO-Vector (with participation of Form-Creators of SYNTHETIC Amplificational Branch and Info-Creators of RESOSCONTIONAL Qualitational Branch) mutual interaction of Aspects of two OO-UU-Entities (ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence), which have been already synthesized to a certain extent in Tertiary Energy-Plasma, with Aspects of Each of the rest 10 OO-UU, and also — twice! — with Each other (by two qualitative Rounds from 12th to 24th dimension). It is possible to express these interactions subjectively-schematically in this way:

A) the first — *depliative, from 12th to 24th dimension* — Amplificational Round:

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Love–ALL-Wisdom;

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Steadiness–ALL-Stability;

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Voidness–ALL-Vacuumness;

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Integrity;

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Aspiration;

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Unity;

(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Essentiality–ALL-Permeability;
 (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Primordially–ALL-Initiality;
 (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Mobility–ALL-Presence;
 (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Knowledge–ALL-Informedness;
 (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Abundance–ALL-Fullness;
 (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Will-of-ALL-Intelligence;

B) the second — *ampliative, from 12th to 24th dimension* — Amplificational Round:

(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Will-of-ALL-Intelligence;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Steadiness–ALL-Stability;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Voidness–ALL-Vacuumness;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Integrity;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Aspiration;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Unity;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Essentiality–ALL-Permeability;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Primordially–ALL-Initiality;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Mobility–ALL-Presence;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Knowledge–ALL-Informedness;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Abundance–ALL-Fullness;
 (ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Love–ALL-Wisdom.

3.1131. As you can see, the Dominants' commutation process in the conditions of Secondary Illusion's exuberance has been implemented differently from the Tertiary Illusion, where the two non-commutative Synthesis variants exist, in each of which one qualitative Round has been organized in depliative Levels (up to 4th dimension) and another qualitative Round in ampliative Levels (up to 12th dimension). Though I have to bring your attention once more to the fact that such Synthesis Schemes, which seem to be identical, as [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Will-of-ALL-Intelligence] and [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Will-of-ALL-Intelligence], and also [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Love–ALL-Wisdom] and [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-

Love–ALL-Wisdom], one should accept just as the most covallert (to these given exhibition conditions!) Schemes of consummative humanation of all possible combinations of heterogeneous between twelve different-Qualitative OO-UU-Entities. Generation of the 12 Harmonious Pairs of Secondary Energy-Plasma of *our* DDIIUYI-Entity has been carried out along the following lines:

1. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Will-of-ALL-Intelligence] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Will-of-ALL-Intelligence]
2. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Steadiness–ALL-Stability] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Steadiness–ALL-Stability]
3. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Voidness–ALL-Vacuumness] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Voidness–ALL-Vacuumness]
4. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Integrity] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Integrity]
5. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Aspiration] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Aspiration]
6. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Unity] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Unity]
7. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Essentiality–ALL-Permeability] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Essentiality–ALL-Permeability]
8. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Primordiality–ALL-Initiality] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Primordiality–ALL-Initiality]
9. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Mobility–ALL-Presence] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Mobility–ALL-Presence]
10. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Knowledge–ALL-Informedness] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Knowledge–ALL-Informedness]
11. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Abundance–ALL-Fullness] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Abundance–ALL-Fullness]
12. [(ALL-Will-of-ALL-Intelligence + ALL-Love–ALL-Wisdom) + ALL-Love–ALL-Wisdom] + [(ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) + ALL-Love–ALL-Wisdom]

3.1132. One should note that there are other variants of Paired OO-UU-Entities' combinations, like: (ALL-Steadiness–ALL-Stability + ALL-Voidness–ALL-Vacuumness), (ALL-Integrity + ALL-Aspiration), (ALL-Unity + ALL-Essentiality–ALL-Permeability), (ALL-Primordiality–ALL-Initiality + ALL-Mobility–ALL-Presence), (ALL-Knowledge–ALL-Informedness + ALL-Abundance–ALL-Fullness), (ALL-Aspiration + ALL-Unity), (ALL-Steadiness–ALL-Stability + ALL-Essentiality–ALL-Permeability), (ALL-Voidness–ALL-Vacuumness + ALL-Primordiality–ALL-Initiality), (ALL-Integrity + ALL-Mobility–ALL-Presence), and so on.

3.1133. As you can see, Focus Dynamics of peculiar to them Form-Creators have been producing in the same slloogrent «points» of focal-ethereal exuberation of Self-Consciousnesses Forms and CCIs of Secondary Energy-Plasma *other* birvulyarity types, which have some common heterogeneous signs both with our lluuvvumic and with many other types. Focus Dynamics of Form-Creators of every type simultaneously produce in peculiar to them Time Flows the infinite multitude of diverse subjective Realities and space-time Continuums.

3.1134. Therefore, you must clearly understand that pointed here combinations of the 12 Pairs of Combined Pure Qualities are not indispensable and stable to Each of the infinite multitude of YI-LLI-IYLL-Entities of Secondary Energy-Plasma, which structure slloogrent f-Configuration of different-type 36-dimensional Universal Entities. Depending on Direction of peculiar to them refocusing Process they can widely vary the composition of Form-structures, which generate them. Described types of possible interconnections are peculiar to *our* DDIIUYI-Entity. Also I want to remind you once more that skunkktional combinations between OO-UU-Entities, which have been realized holochronely in our Universe's Primary Energy-Plasma, represent much more complex humanational Schemes, even though general Principle of their generation is the same: successive deepening of inter-Qualitative Synthesis between all 12 OO-UU-Entities on the background of the evident invad-erentness of heterogeneous signs of some PCQ Pair.

3.1135. For DDIIUYI-Entities it is the Pair ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence; for others, which focuses in the same Qualities' «Sector» with them, it is other Pairs of PCQ, which complement each other the most. For example, for SSAASSYIIMS it is the Pair of ALL-Steadiness–ALL-Stability and ALL-Voidness–ALL-Vacuumness, for SLLAAVSSAAMMS — ALL-Integrity and ALL-Aspiration, for SSORRILLIFULLS — ALL-Unity and ALL-Essentiality–ALL-Permeability, for SSRRIIMSSLLAYSS — ALL-Primordiality–ALL-Initiality and ALL-Mobility–ALL-Presence, for SSOOLGOOSSTM — ALL-Knowledge–ALL-Informedness and ALL-Abundance–ALL-Fullness, for SSPOORRKRRLUULLSS — ALL-Love–ALL-Wisdom and ALL-Primordiality–ALL-Initiality, for DIIMFFALGG — ALL-Will-of-ALL-Intelligence and ALL-Integrity, and so on.

3.1136. Due to subterransive property of emergence, the general Focus Dynamics of Form-Creators of all diversity of Form-Types of Universal Entities of this given megadiapason (up to 36th dimension) produces that additive effect (when Creative Potential of their coordinated interactions significantly exceeds their subterransive focal efforts), which allows them to start to concatenation-ally generate Focus Dynamics of the 48-dimensional Universal Entities.

Chapter 3. «SECTORS,» «SUB-SECTORS,» «FLOWS,» and «RAYS» of combinations of Pure Cosmic Qualities. The General Principle of the formation of Universal Karma

3.1137. All ethereal base of focal exhibition of Form-Creators of Primary Illusion of Inter-Galactic e Complex-Plans, which has been holochronely carried out at «the moment» of post-mercavgnational consummatization Act, comprise 12 types of ethereal interconnections, which in their totality generate spheroidal information spaces of «Sectors» (NNIILG-NNI) of all possible combinations between PCQs' Aspects. I remind you that not a single type of Focus Dynamics of Form-Creators — whatever high amplificational Levels dimensions they structure — can interact directly with Pure Cosmic Qualities (or with their ethereal «projections» in Worlds' Form-systems — OO-UU-Entities), because PCQs themselves represent Information Principles, Which, due to inherent in them information Essence, are STANDARDLY INVARIABLE.

3.1138. Differentiation of amitsissimal (primogenitive + consummative) State of Information on twelve main types (PCQs) considered by us is conditional and absolutely subjective and has been used by us only in connection with strong limitations of our biological Perception systems. Their Form-Creators are devoid of the slightest opportunity to entirely perceive all universal properties and features of Information and have to manipulate with extremely low volumes of homogeneous signs peculiar to them, which are sub-... sub-Aspects, aggregating them successively into ethereal Configurations of the informational combinations more or less perceptible by us, which are sub-Aspects and Aspects of Pure Cosmic Qualities (or OO-UU-Entities).

3.1139. Possessing universal property of slloogrentness Aspects of any PCQ represent absolutely precise «copies» of Pure Qualities. Subjective «difference» between them appears at the moment of «unpacking» of the definitive Information via Mechanism of Focus Dynamics's exhibition: only that part of *infinitely diverse* Contents has been resonationally «crystallized out» in the «personality's» Self-Consciousness from the slloogrent ethereal Configuration involved to this continuous process, which corresponds to the more or less degree to something, which has been kleksed (synthesized) earlier and arranged by Form-Creators to the subterransive Experience of peculiar to them Conceptions about «themselves» and the surrounding existence.

3.1140. Thus, process of subjective differentiation of the holistic Information on the differing from each other (to Form- and bio-Creators of Perception system of this given «personality»!) heterogeneous signs or Aspects (particulas, parts) has been carried out constantly through Focus Dynamics. These Aspects could be used by all Self-Consciousnesses Forms on their own as «universal form-generating material» (SFUURMM-Forms, LLAASS-Forms, and so on) in all diversity of life creativity peculiar to them. All inter-skunkktional ethereal interconnections, which combine absolutely all PCQs' Aspects to the unified and holistic Information, also possess slloogrentness property and subjectively conditionally «divide» only under the impact of Focus Dynamics of Form-Creators .

3.1141. These interconnections in the Creativity Sphere of Focus Dynamics of our DDIIUYI-Entity combine with each other by the following Scheme. Specifically synthesized heterogeneous

signs of the 24 Combined Qualities, which have been formed in a definite way to the 12 Harmonious Pairs, actively interact with Aspects of Each of the 12 Pure Cosmic Qualities and simultaneously generate in this way in different exhibition conditions of SSUI-SS-SFAA-Creators of 36-dimensional megadiapason the infinite multitude of diverse Idiopathic Multimodi of PCQs, which represent ethereal combinations of YYYYUULLUYG-Forms and SSNUUYLL-Forms. If absolutely all ethereal Contents of these Multimodi is got together and then conditionally «divided» by some definite signs on twelve main types, then we obtain those combinations of the most covallert between each other interconnections, which we subjectively define as «Sectors» of Pure Cosmic Qualities.

3.1142. Being the center of ethereal interconnections of PCQs' Idiopathic Multimodi, these «Sectors» represent by themselves all informational basis (Experience) for further concatenational refocusing and inter-Qualitative perturbations of any 36-Qualitative Universal Entity to f-Configuration of the 48-Qualitative Universal Entity (while this basis has been used not only by DDIIUYI-type's Universes, but also by other type's Universes for multipolarizational refocusing to any possible to Each of them Existence types). In slloogrent Focus Dynamics of DDIIUYI-Entity these «Sectors» are absolutely never singled out objectively into some «grand» and «separate» (from Everything else) informational «constructions.» They just reflect with their ethereal Configurations those Main Cosmic Codes (that is, potential opportunities), which are necessary for UUYU-UU-YY-Creators of Inter-Universal Plasmic Forces Diapasons to implement their mutual realizational Creativity.

3.1143. Twelve «Sectors» are not the Highest Form of Existence to this given type's Universes, but rather the highest *to all* DDIIUYI-Entities (along with other different-type Universes of this development Level) degree or some conditional «limit» of the possible ampliaticness of those combinations of ethereal interconnections, which they generate via their Focus Dynamics. This «limit» continuously modifies (amplificates) as the Level of their subterransive development rises. If one draws parallel with human «personality,» then Every «Sector» could be subjectively compared by function with ethereal filling of our Levels of Supraconsciousness and collective Subconsciousness — against the Levels of «personal» Self-Consciousness.

3.1144. Twelve main types of possible simultaneous development of all diversity of DDIIUYI-Entities, focused by the Highest Cosmic Intelligence AYFAAR, have been organized exactly by this subjective way in slloogrent Focus Dynamics of Its SSUI-SS-SFAA-Creators: by focusing in the ethereal Contents of this or that among twelve «Sectors,» Form-Creators of different ipsius Interpretations of our 36-Qualitative Universal Entity consciously choose for themselves that part («spectrum») of SSUU-SS-VUU-Creativity Sphere, through which they can satisfy peculiar to Each of them essential Interest to the highest degree. Meaning, the Contents (typical ethereal interconnections between absolutely all YYYYUULLUYG-Forms and SSNUUYLL-Forms) of all twelve types of «Sectors» represent all informational basis, which provides realization of different-type CCIs and their Self-Consciousnesses Forms structuring any Universal Entity in the megadiapason up to $\pm 36^{\text{th}}$ dimension.

3.1145. How is it realized? For example, Every ipsius Interpretation as if «intuitively» generates necessary to Itself (meaning, the most interesting to It in this given f-Configuration) combinations of Pure Cosmic Qualities from the most covallert — with respect to the «current» Focus Dynamics of DDIIUYI-Entity — ethereal interconnections. It uses them for own refocusing convergence to

the more ampliative Levels of Its Own Self-Consciousness in order to «once» start to realize Itself as one on the possible Form-Types of 48-Qualitative Universal Entity. Although, one should not think of Each of the twelve «Sectors» in any way as some informational block, which has been somehow «separated» from the Contents of all other «Sectors»: the most genuine Conception for the abilities of your «current» Perception (though, subjective to the infinite degree!) will be about multi-disperse «dispersed state» of the typical interconnections of Each of the «Sectors» in the informational space of the common to them Contents.

3.1146. Imagine that the Contents of Each «Sector» consists of zillions of different-Qualitative informational interconnections, on each of which a number of the definite «Sector» has been fixed in some narrow-specific way: 1, 2, 3, ... 12. Do not forget that one and the same — though, kleksed by *different* (!) ways — inter-skunkktional interconnection can equally participate in the processes of generating specific YYYUULLUYG-Forms and SSNUUYLL-Forms, which are peculiar to different «Sectors.» Therefore, the main qualitative difference of one «Sector» from any other is the way of subterransive kleksing by Form-Creators of «unpacked» by them ethereal Information: some ways mostly duvuyllerrtly combine with others, producing specially aggregated conglomerates, which have many partial signs in peculiar only to them focal-ethereal interconnections.

3.1147. The main Mechanism of activation of any of these heterogeneous (different-Qualitative) interconnections is only Principle of their liyllusceeveness-geyliturgentness between each other, which holochronely realizes outside of inertial (consummative) properties of any Time Entity and hence does not obey to any subjective priority typical to the process of organizing Focus Dynamics of any Form-system. Once Focus Dynamics of Form-Creators of some of Universal Entities (and peculiar to this Entity birvulyarity type) in some of the twelve «Sectors» has favorable conditions for simultaneous exhibition in different PFDs, then It loses more and more these realizational preferences in specific manifestation conditions of other «Sectors» and duvuyllerrtly changes Its FD right to the radically «opposite» one and completely changes in this way the character of Its functionality. It could be subjectively perceived as «completely different» Universal Entity in other «Sectors.» The Principle of FD's Multipolarization of all Universal Entities has been organized in this way.

3.1148. Now imagine that all infinite multitude of these differently kleksed ethereal interconnections has been voluntarily kind of «dispersed» among each other in one informational space of the twelve «Sectors,» being simultaneously activated to different extent by Focus Dynamics of 36-Qualitative Universal Entities of all types at once. Such «dispersed state» does not exist in objective Reality — this comparison is offered only as help for your confined Imagination to produce Conceptions about considered by us ethereal Construction. Any of subjective processes typical to producing Focus Dynamics is provided by the Information Sll oogrentness Principle, Which mutually with Resonational Principle provides absolutely all types of simultaneous realizations of one and the same skunkktional interconnections through the infinite multitude of combinations.

3.1149. In order to refocus to f-Configuration of Some of ipsius Interpretations of 48-Qualitative Universal Entity of the definitive type Every 36-Qualitative Universal Entity has to subterransively focus by a svilgs-spherational sequence determined to It in appropriate interconnections of Each of «the Sectors» acquiring in this way (via specific combinations of generated by It YYYUULLUYG-

Forms and SSNUUYLL-Forms) peculiar only to It Experience, which simultaneously realizes in corresponding exuberational conditions of our Macrocosmos through many different-type 36-Qualitative Universes.

3.1150. Concatenationally cognizing this Existence Experience, Every Universal Entity comes (meaning, refocus in own Rotational Cycle) through many subjective stages of own amplificational development and joins more and more in this way to Focus Dynamics of I-IIYTY-I-AA-A-Creators of SUPRA-Universal exuberation Levels (these correcting functions have been carried out in Focus Dynamics of DDIIUYI-Entity by UUYU-UU-YY-Creators) and transmutes finally to the f-Configuration of 48-Qualitative Universal Entity of a definite type. Further, this endless Process continues with the same scheme, though not in the conditions of the 12 «Sectors,» but through 12 of their more ampliative Analogs — PCQs' «Interjects» (AYOLLDSS-KKA), Which serve as the general center of ethereal interconnections of PCQs' Immanent Supermaxims — combinations of SKKAY-AFFT-Forms (ampliative analogs of YYYUULLUYG-Forms and SSNUUYLL-Forms).

3.1151. Each of the 12 «Sectors» has been structured by ethereal «projections» of the 12 principal to It «Sub-Sectors» of PCQs (LLIING-LLI), which represent in Primary Illusion of Energy-Plasma of Inter-Universal PFDs all cumulative Experience. This Experience has been synthesized and concatenationally converged into the 36-dimensional Levels of ethereal interconnections of this «Sector» via Focus Dynamics of the corresponding types of SSLOO-SS-SNAA-Creators, Who produce — through all diversity of LLAASS-Forms — Secondary Illusion, which is organized into the twelve types of Cosmic Plan-Levels. If I continue further to draw parallels between Levels of subterraneous Creativity of Each of the ipsius Interpretations of DDIIUYI-Entity and «personal» Interpretations of any person, then it will be possible to compare subjectively interconnections of ethereal Information of this given Level (with respect to qualitiveness degree of the «Sectors») with those SFUURMM-Forms' combinations, with which Form-Creators of our «personal» *Self-Consciousness* structure Focus Dynamics of every «personality.»

3.1152. If «Sectors» are the ethereal basis of Focus Dynamics of Form-Creators, Who realize in the 12 Levels of Primary Energy-Plasma, then «Sub-Sectors» represent fundamental informational basis for creative realization of Form-Creators, Who operate with specific combinations of Harmonious Pairs of Combined Qualities in the 12 Levels of Secondary Energy-Plasma. In turn, Creative Activity of Info-Creators of every «Sub-Sector» via slloogrent Multipolarization of Focus Dynamics of Form-Creators of DDIIUYI-Entity has been provided with the presence of their deep interconnections with Aspects of many less complicated ethereal Constructions — «Flows» (SSMUU-SS-SSAA), Each of Which provides complex interactions between Aspects of 12 Pure Cosmic Qualities (via Creative Activity in Focus Dynamics of all multitude of different-protoformal SFUURMM-Forms).

3.1153. Each of these twelve Pairs simultaneously creates in every Cosmic Plan-Level specific combinations with Each of the rest eleven Pairs of Combined Qualities. On the one hand, It converges in this way (via Focus Dynamics of Form-Creators) codings, peculiar to this «Sub-Sector,» into corresponding to It «Sector» (Inter-Galactic e Complex-Plans), and on the other hand, It «projects» (transgresses) them through many «Flows,» which structure every «Sub-Sector,» into all infinite diversity of Form-structures of Plan-Overtones of Fields-Consciousnesses.

3.1154. In order to make your examining and analysis of the subsequent Information more easy, let's remember once more the structure of Inter-Galactic e Complex-Plans in that sequence of covallert ethereal-focal interconnections, which is the most characteristic to them (taking into account that Ethereal Complex-Plan is universal and total-penetrating to all of them). So, as you know already, all «projections» of Focus Dynamics of Form-Creators of Transforming Inter-Universal PFD qualitatively transform in Qualitational Direction of UPDR-Dynamics (this happens depliatively from the standpoint of amplificational development) and transgressively «reproject» to Focus Dynamics of Form-Creators of Transforming K-P. And then, FD of Focusing PFD — to FD of Focusing K-P; FD of Cosmic PFD — to FD of Cosmic K-P; FD of Atmic PFD — to FD of Harmonizing K-P; FD of Disintegrational PFD — to FD of Disintegrational K-P; FD of Buddhic PFD — to FD of Buddhic K-P. And then, absolutely all Form-structures of Stabilizational, Transmutational, Mental, Astral and Causal Inter-Galactic e Complex-Plans arise out of focal-ethereal «projections» of Buddhic K-P.

3.1155. We can state that Process of exhibition in UPDR-Dynamics of everything, which we subjectively assign to Secondary, Tertiary and Quaternary Energy-Plasma's Illusion, begins virtually from the multipolarizational differentiation of Inter-Galactic Buddhic Complex-Plan's «projections»: more and more depliative UPDR-«projections,» generated by Focus Dynamics of Form-Creators of the last five Complex-Plans (from Stabilizational to Causal), could be considered as Derivatives of the Cosmic Activity of Universal SSUI-SS-SFAA-Creators of Buddhic K-P (TTUUSSUY-SS-MM). If you could only imagine the ethereal interconnections' infinity, which structurally organize the exhibition Mechanism of all Form-structures of our Universal Entity in the way of some «discrete spheroidicity» (which is impossible even theoretically), then the highest Levels of this Universal Configuration would be comprised by Focus Dynamics of SSUI-SS-SFAA-Creators of Inter-Galactic Buddhic Complex-Plan. Its YYYUULLUYG-Forms, as they depliatively transform and qualitatively transgress, would produce focal Configurations of different-type Self-Consciousnesses Forms and CCIs in all «subjacent» Levels of this given Universal Creation.

3.1156. That is, all complex-humanational Process of multipolarizational «reprojecting» of diffuzgent Form-structures of Primary Energy-Plasma to all possible diversity of «projections» of Focus Dynamics of Form-Creators of Cosmic Plan-Levels of Its Secondary State (and then on — to Focus Dynamics of CCIs of Plan-Overtones of Fields-Consciousnesses, which reflect Its Tertiary State) has been provided by SSUI-SS-SFAA-Creators of Inter-Galactic Buddhic Complex-Plan. Exactly successive depliative-humanational transgression of their multipolarized Focus Dynamics is the main Reason of generating the whole multitude of Levels of exhibition of f-Configurations of Form-Creators of Stabilizational and Transmutational Complex-Plans. Focus Dynamics of Form-Creators of Stabilizational and Transmutational Plan-Levels, and also Stabilizational and Transmutational Plan-Overtones have been generated out of their Focus Dynamics. In turn, all possible — more and more depliative! — «projections» of Mental K-P, Mental P-U and Mental P-O, and also Astral K-P, Astral P-U and Astral P-O have been aroused out of Form-structures of this simultaneous Pair (which has been generated, let me remind you, by Focus Dynamics of Form-Creators of Buddhic K-P!). Egllero-liftively-amplificational Synthesis between these «projections» has become the Reason of generating Causal K-P, Causal P-U and Causal P-O (and concurrently of Physical Plan-Overton).

3.1157. Universal Mechanism of all these humanational transformations of f-Configurations of some UPDR-«projections» of Form-Creators (more ampliative) to other UPDR-«projections» (more

depliative) is implemented not only through ethereal structures of the infinite multitude of «Sub-Sectors,» «Flows,» but also through «Rays» (UU-ISSM-UU). For example, Form-Creators of Stabilizational and Transmutational Complex-Plans code with peculiar to them combinations of Aspects of twelve Pure Cosmic Qualities all Levels of exuberation of Primary Illusion of Universal Creation (from ± 36.0 to ± 24.0 dimension) through Form-structures of Each of the infinite multitude of «Sub-Sectors.» Functions of SSUI-SS-SFAA-Creators of Stabilizational and Transmutational Inter-Galactic Complex-Plans could be conditionally defined as mediatory between SSLOO-SS-SNAA-Creators of NAA-GLLI-UU-Sphere of Secondary Illusion and AYFAAR, which is the Highest Collegiate Intelligence of this given Universe.

3.1158. Exceedingly simplified, though still more clear to you Conception about all these interconnections could be obtained if you imagine microelectronics factory production with many different-functional assembly lines, located in the same place. There are already finished microchips («the filling parts» of devices) on one line; they could be compared with «Sub-sectors» infrastructures. There are «components,» which characterize «Flows» on the second line. There are PCQs' «Rays» on the third line. There are «cases for the future devices» on the other lines (Form-structures, space-time formations): of Stabilizational Complex-Plan — on the fourth line, of Transmutational — on the fifth line, of Buddhist Complex-Plan — on the sixth line. There are Form-structures of Buddhist Plan-Level close to them. Thus, every structure-case is on its own assembly line. Robots operate between them, which connect info-filling parts (microchips) and corresponding Form-structures (cases): «Sub-Sectors» is exuberated in Complex-Plans (Transmutational or Mental, Astral or Buddhist...), «Flows» is exuberated in Plan-Levels, and so on.

3.1159. All focal-ethereal interconnections of *Cosmic Causality* (Karma, Reason), peculiar to our Universal Entity, have been formed in all types of qualitative PFD-altitudness. The highest of these interconnections are generated due to *mutual* simultaneous Focus Dynamics of Form-Creators of the Highest Levels of Collective Cosmic Intelligences. These Form-Creators realize via KOORLLOYD-, UURRGORST- and AALLFALLST-Creativity Spheres of Inter-Galactic Mental K-P, and via EYYYUIYELENT-, AALLOOFTORT- and UUSOOFRENT-Creativity Spheres of Inter-Galactic Astral K-P.

3.1160. All kinds of «the closest» Cosmic Causal interconnections of this given DDIIUYI-Entity with other eleven Universal Entities have been generated and actively realized by Collective Creativity of exactly these SSUI-SS-SFAA-Creators. You can acquire Information about their properties while meditating on the following *Cosmic Codes-Definitions*: SSAASSYIIMS, SLLAAVSSAAMMS, SSORRILLIFULLS, SSRRIMSSLLAYSS, SSOOLGOOSSTM, SSPOORRKRRUULLSS, DIIMMFFALGG, DARREYYUUVVSS, DRRULFFUOLLFFT, DSIMMSTAALFMSS, DLIULLSSLL.

3.1161. One should note that the most active causal interconnections unites our Universal Entity (through all types of Primary Illusion's altitudness) with Such Universal Entities as DLIULLSSLL, SSRRIMSSLLAYSS, DIIMMFFALGG, and SSPOORRKRRUULLSS. At the same time Its Focus Dynamics resonates «karmically» with others mainly through Form-structures of Secondary and the Tertiary Illusion. You should understand profoundly that common «karmic» interconnections unite our Universal Entity on TUU-LLT-TUU- and SSAA-SS-MM-Levels not only with tens and even with

hundreds of thousands, but with zillions of other Entities of the same Self-Consciousness Level and realize through common to them *Causal* PFDs, Complex-Plans, Plan-Levels and Plan-Overtones.

3.1162. By the similar principle Form-Creators of Stabilizational and Transmutational Plan-Levels code with peculiar only to them PCQ combinations through Form-structures of Each of the infinite multitude of «Flows» all Levels of exuberation of Secondary Illusion of Universal Creation (from ± 24.0 to ± 12.0 dimension). And Form-Creators of Stabilizational and Transmutational Plan-Overtones code through Form-structures of Each of the infinite multitude of «Rays» with peculiar to them PCQ combinations all Levels of exuberation of the Tertiary Illusion of Universal Creation (from ± 12.0 to 0.0 dimension).

3.1163. The codings of Primary Images typical to the states of Form-structures of Secondary and Primary Illusions, which are necessary to all Form-Creators of the Tertiary Illusion, sivilgs-spherationally «project» to their Focus Dynamics via sllougrent properties of all totality of SFUURMM-Forms of different-Qualitative «Rays.» These codings represent as if unique «MASTER PLAN» or «FUNDAMENTAL CREATION PLAN,» which serves to Form-Creators of all Levels of exuberation of FD of our Universal Entity as the major guideline in their synthetic creativity.

3.1164. In other words, despite of powerful deformational changes arising from UPDR's holochronely-multipolarizational Transgression and qualitational Diversification from the highest consummative States to the most elementary ones (with subsequent absolute «merging» of all focal Configurations of Form-Creators with ethereal Configurations of Info-Creators, meaning, with conditional «return» of Focus Dynamics of SSS-Entity to primogenitive State), Information potential State always stays invariable, regardless of inertionness degree of Focus Dynamics of Form-Creators of Tertiary or Quaternary Energy-Plasma. Any notional distortions of focal-ethereal interconnections are inherent in not Information Itself, but only in Form-Creators of different Perception systems, Who subjectively interpret sllougrent Contents of UU-Forms accessible to their Focus Dynamics.

Chapter 4. Inter-Galactic e Complex-Plans. SSUU-SS-VUU-Creativity Spheres of AIY-YYA-Entity

3.1165. We have found out earlier that there cannot exist absolutely «mental» (thinking), or absolutely «vital» (astral, sensuous) types of Creative Activity neither in any Energy-Plasma's States, nor in Focus Dynamics of Form-Creators of CCIs and Self-Consciousnesses Forms. That's because both what we interpret subjectively as «thought» and what we mean by the term «feeling» represent completely inseparable components of the unified Cosmic Synthesis Process, the Major exuberation Mechanisms of Which have been laid in the synthetic Nature of our Macrocosmos.

3.1166. This Process in Focus Dynamics of all CCIs and Self-Consciousnesses Forms of our DDIIUYI-Entity is functionally provided by universality of focal-ethereal interconnections be-

tween Form-Creators of Form-structures of Inter-Galactic Transmutational Complex-Plan (UUU-GUUYFFAA-SS-MM) and Inter-Galactic Stabilizational Complex-Plan (PAIMM-LLIFF-SS-MM). The latter provides potential presence in any USCF exhiberation «point» of all major Codings peculiar to Focus Dynamics of HCI of Macrocosmos of exactly this given type. And the first one provides absolutely all opportunities, means, and Ways for all diversity of their subjective realizations.

3.1167. If you thoroughly and deeply analyze the following charts of generation of all multitude of qualitative Levels in Transmutational Complex-Plan, you will certainly notice that definite part of combinations of signs of Pure Cosmic Qualities and their Combined Pairs (expressed by way of separate letters), which structure Form-structures of Stabilizational Complex-Plan, «duplicate» themselves in a specific way in the vibrations («combinations of letters») of each of the Transmutational Complex-Plan Levels.

3.1168. While sort of «scanning» variants of all possible combinations of PCQs' Aspects (and Combined Pairs produced by them) from ethereal Configurations of Info-Creators of Collective Intelligences of Stabilizational Complex-Plan, Form-Creators of Transmutational Complex-Plan's CCI simultaneously transform and synthesize them to peculiar to their Creativity «appearance,» which we diversify to the level of possible to our comprehending Conceptions and very, very subjectively interpret as some separate states of our psychics — «thought» («projections» of SSLUIYYUYYY-SS-MM) and «feeling» («projections» of FLUYUYULLYYUYYY-SS-MM).

3.1169. In fact every constituent of our psychics never manifests in our Perception system discretely or sort of separately. Any Thought has been always structured with signs of vitality, and any Feeling cannot manifest in Focus Dynamics without presence of some kind of mental base. And nobody can say where exactly, in which of our psychic manifestations Thought finishes and Feeling starts, and vice versa. The same could be said about creative realizations of Focus Dynamics of Form-Creators of any other Proto-Forms: the «thinking — feeling» processes of these Form-Creators are strongly specifically influenced by the features of their subterransive Synthesis Scheme.

3.1170. For example, we just slightly can guess at the character of the most rough (meaning, the most expressed) psychic processes, which take place in the Perception systems of some mammals (whose Synthesis Schemes are most covarllert towards our own). Though, there is not very much we can imagine from psychic-mental realizations of vegetables, simple organisms, germs, not to mention «psychisms» analogs of fermions, atoms, of Planetary, Stellar, and Galactic Entities. But for all that all of them, like us, use one and the same information base, which structures equally common to all of us Energy-Plasma, but which is «unpacked» differently by the Perception system of every Self-Consciousness Form.

3.1171. I should mention that there is absolutely nothing in the Cosmic Creativity of Form-Creators of these Levels of CCIs' exhiberation, who are highest to this given Universal Entity that even remotely would resemble those creative processes, which we interpret as «psychic states,» as «thinking» and «feeling.» The properties of Mental and Astral Complex-Plans, of Plan-Levels and even highest levels of Plan-Overtones so unimaginably differ even from the highest — among possible to us — «psychic-mental» states and stereotype «thinking-emotional» sensations that there is no

sense in any kind of comparison between them — what these Form-Creators really experience has nothing to do with our primitive Conceptions about «Thoughts» and «Feelings.» We've defined Levels of SSLUIYYUYUYY-SS-MM (Complex-Plans) and ULLTUUR-SS-ST (Plan-Levels) as Mental, and FLUYUULLYYUYUYY-SS-MM (Complex-Plans) and STYUULLYYURSST-S-ST (Plan-Levels) as Astral only because there is nothing in our «current» Conceptions besides these infinitely far from the Truth notions, which could somehow reflect the Sense of the Energy-Plasma Properties in these Levels of subjective exuberation.

3.1172. there is the only circumstance, which conditionally combines these qualitative Energy-Plasma states. Dynamic energy-informational reflections of our Thoughts and Feelings represent basic constituents of subjective Karmo-Forms of your «personalistic» creativity in the same way as multipolarizational interactions between Form-Creators of YYUYUYY-SS-MM-structures and FLUYUULLYYUYUYY-SS-MM-structures of Complex-Plans, and also between Form-Creators of ULLTUUR-SS-ST-structures and STYUULLYYURSST-S-ST-structures of Plan-Levels produce and constantly generate in Energy-Plasma IYYEKHEFFEIYY-SS-MM-Flows (for Complex-Plans) and DDKHVAAKHTVULSF-S-ST-Flows (for Plan-Levels), which universal Properties — again, in accordance with our Conceptions! — could be very, very conditionally co-related with such notions as «karmic,» «causal,» «fateful.»

3.1173. The need to single out and emphasize this important circumstance has been dictated by the fact that we tend to «transfer» character of our personal psychisms to the creative skills of Self-Consciousnesses Forms of other CCIs types, whose Focus Dynamics and produced by them Perception systems have been exuberated in completely different conditions and qualitative Levels. This means also that they have been structured with energy-informational Flows, which absolutely differ from qualitiveness of our subjective mental-sensuous manifestations. It is time for all of us, finally, to stop self-deception and discontinue naively endue in own primitive Imagination all types of Planetary, Stellar, and other Forms of realization of Collective Cosmic Intelligences with the same imperfect, as you have, proprietary tendencies and «personalistic» psychisms, which undergo inconceivable to you ampliative transformations already in exuberation conditions of Self-Consciousnesses Forms of flaks and vuolds diapasons.

3.1174. So, we have found out that all focal-ethereal base of Inter-Galactic Buddhic Complex-Plan represents the main qualitatively-energy basis for producing by different Form-Creators absolutely all types of CCIs and Self-Consciousnesses Forms of Primary, Secondary, Tertiary, and Quaternary Illusion, Who have been simultaneously manifested in slloogrent Focus Dynamics of our DDIIUYUYYI-Entity. Transgressing on Transmutational and Stabilizational Complex-Plans, this basis creates all conditions for functioning of Information exuberation Mechanism in any «point» of Space-Time in this given megadiapason. Let's together have more precise look on this Process and try — by means of the profound Meditation on the following Codes, by means of comparison and logical analysis of the obtained by this way Information — to gain un understanding of how it has been realized.

Chapter 5. Cosmic Plan-Levels. NAA-GLLII-UU-Creativity Spheres of AIY-YYA-Entity

3.1175. NAA-GLLII-UU-Spheres reflect by themselves Levels of exuberation of Focus Dynamics of Galactic SSLOO-SS-SNAA-Creators, Who have formed Self-Consciousnesses Forms and CCI's of Secondary Illusion of our DDIUYYI-Entity, including also Collective Cosmic Creativity of AIY-YYA-Entity, Whose Focus Dynamics finishes process of our successive amplificational refocusing from lluuvvumic and googamaaaic birvularity types to ssmiysmaaaic and then — to aiyyaiaic ones. AIY-YYA-Entity is just one from zillions of diversities of realization Forms of CCI's of our Universe. It allows SSUI-SS-SFAA-Creators of AYFAAR HCI to actively structure and specifically organize all types of Worlds' Form-systems and subjective Realities *in peculiar to It exuberation megadiapason*.

3.1176. I will remind you once again that Secondary Illusion of NAA-GLLII-UU-Creativity Spheres of Form-Creators of our Universe is structured with the following Cosmic Plan-Levels: *Ethereal, Transforming, Focusing, Disbalancing, Harmonizing, Disintegrational, Buddhistic*. The last one, in turn, disintegrates all Its focal-ethereal interconnections to *Stabilizational* and *Transmutational* Plan-Levels, which internous («internal») diversification on common to them *Causal* Plan-Level is ensured through presence in them of Mechanism of the mutual exuberation of Form-structures of *Mental and Astral* Plan-Levels.

3.1177. All these Plan-Levels should in no way be accepted only in the priority mentioned here. None of them is more or less important, which would provide more «major» or more «minor» processes. This is like clockwork; the function of even the smallest screw is very important in its normal operation. None of the twelve Plan-Levels (or, indeed, of Complex-Plans and Plan-Overtones) just could not operate without the presence in Focus Dynamics of Its Form-Creators of the broad interconnections with any other of them. That's because in this case we talk not about isolated Levels, but about diversity of exactly focal-ethereal interconnections' types, which are common to the infinite multitude of Form-Creators .

3.1178. The first six Plan-Levels (including Buddhistic) supply Focus Dynamics of Galactic SSLOO-SS-SNAA-Creators with realization by themselves — mutually with SSUI-SS-SFAA-Creators of AYFAAR HCI — of the Highest Cosmic Activity in implementing of the United Plan of Creation of our Universe. These Plan-Levels — in Spheres of Secondary Energy-Plasma — interconnect Focus Dynamics of our DDIUYYI-Entity by identical Creativity Levels with Focus Dynamics of many other Universal Entities. These six Plan-Levels of exuberation are kind of not directly (meaning, creatively, actively) related with subterraneous Creativity of SSLOO-SS-SNAA-Creators. They just provide the Process of «projection» to all focal Configurations of Form-Creators of the most ampliative to this given megadiapason combinations of OO-UU-signs, which structure Idiopathic Ingredient (TLAASSMA-A).

3.1179. Focus Dynamics in realization of all Form-structures of own Secondary Illusion of our Universal Entity «starts» from the organizational Mechanism of Cosmic Buddhistic Plan-Level (IUUY-SS-ST), Which generates Secondary Informational Codes (UYU-YYUU-RRR-SSS) of Pure and Combined Qualities, Which serve as peculiar informational «bridge» between Focus Dynamics of Form-Creators of Inter-Galactic Buddhistic Complex-Plan (TTUUSUY-SS-MM) and Buddhistic

Plan-Overtone (GLOOGSMII-NAA). Cosmic Buddhic Plan-Level's Creative Principle schematically is the same as Inter-Galactic Buddhic Complex-Plan's one, though dynamics of transmutational and stabilizational Processes, which condition all Creative Nature of Focus Dynamics of Form-Creators of this Plan-Level, is much weaker. This is due to inhibitory influence of *Mechanism of inertionness* (DRUULGM-MMUU-U) on realization of all focal-ethereal interconnections. This Mechanism provides exuberation of all Form-structures of Secondary Energy-Plasma.

3.1180. Your traditional Conceptions about the fact that Inertia of Focus Dynamics is peculiar only to corporal (physical, material) states of Energy-Plasma and absent in Its more amplificational manifestations are fallacious and subjective, because Perception system of the now focused by us NUU-VVU-Form-Types in these given exuberation conditions is still extremely confined. At the same time there are many of such qualitative states in Secondary Energy-Plasma, which by degree of «density» of combined by them Qualities' Aspects are not less «inertial» (compared to the force interconnections in *Primary Energy-Plasma!*), then those ones, which we interpret as «inertia of the physical Matter.» After all, specific Spatial (KKVOO-ULTR) and Temporal (TRROO-RR-URRGG) Entities structure not only Stellar (SSOULL-FMI) and Universal (OO-UUILLI-I-UULL) Levels of exuberation of Focus Dynamics of Form-Creators, but also Focus Dynamics of Inter-Universal Cosmic Entities (NOO-GGM-LLN).

3.1181. This is why «unpacking» of LLAASS-Forms of Focus Dynamics of SSLOO-SS-SNAA-Creators via simultaneous implementation of all «stabilizational» and «transmutational» Processes in Buddhic Plan-Level is realized with some «lateness» in comparison with the moment of generating YYYUULLUYG-Forms in Buddhic Complex-Plan. The activity on compensation of this «*inertial Coefficient*» (OOO-TT-UU) is the responsibility of SSLOO-SS-SNAA-Creators, because even the slightest «delay» of informational impulse (primary codings) creates in their Focus Dynamics subterraneous effect of «*destructive distortiveness.*» This is informational deformation in the way of generating in it (in Focus Dynamics) Secondary SSLOOO-SSS-Flows («*Light fibers of Energy-Plasma*»), which leads to distortions in Perception of the Highest Information and in qualitative Reactions of SSLOO-SS-SNAA-Creators of Secondary Energy-Plasma on Creative Processes taking place in Primary Energy-Plasma.

3.1182. To minimize influence of this subjective effect on their Focus Dynamics, SSLOO-SS-SNAA-Creators expressly create in peculiar to them NAA-GLLII-UU-Creativity Sphere own «internal» extensive «net,» which is structured with the infinite multitude of interstitial (intermediate) LLA-IYYSS-UYUYU-SSS-Spheres with easily modelled by them universal UIYUVIIMM-regimes peculiar to Secondary Illusion. Focus Dynamics of each of such *intermediate-compensational Creativity Spheres* has been initiated by SSLOO-SS-SNAA-Creators of the two types — LLA-IYYSS-Creators and GLLAA-GLLII-Creators. The first ones mostly manipulate with focal Information constituent, and the second ones — with ethereal constituent. If we compare these SCCs with Conceptions you have, then the functions of the first type of SSLOO-SS-SNAA-Creators could be entirely conditionally compared with the functions of Form-Creators, and the functions of the second type with the functions of Info-Creators (though, this would be extremely inauthentic, because all of them are equally — but differently! — busy at implementing the Mechanism of exuberation of CCIs and Self-Consciousnesses Forms of Secondary Universal Illusion).

3.1183. The most important feature of every interstitial Creativity Sphere is that this Sphere certainly involves stabilizing-dynamic codings generated by SSUI-SS-SFAA-Creators of Primary Universal Illusion (OIYAOOMM). The availability of these YYYUULLUYG-Forms in the process of subjective «unpackings» by SSLOO-SS-SNAA-Creators of the primary informational SSLIY-SSS-Flows allows them to provide in their own Perception systems implementing of anticipatory adjustment of own Focus Dynamics allowing for definitive parameters of «inertial Coefficient» of this given interstitial Sphere. This Process is performed by means of special resonational comparison of qualitiveness of LLAASS-Forms initiated in own Focus Dynamics with already available (that is, accessible to subjective Perception) YYYUULLUYG-Forms.

3.1184. You can roughly consider this as if you would have been cooking some dish and observing at the same time as recognized master prepares it on your TV-screen. But the dish you'd have cooked, despite of your thorough recipe observance, will certainly have somewhat different taste from the reference sample. This difference is not «distortion,» or «deformation,» because all standards and composition have been strictly followed by you. This is more of some sublime subterraneous interpretation of one and the same Creation, which does not disturb the Essence initially belonging to It. Also this process could be compared with very good arrangement of some recognized musical composition, which in new ways unleashes its initial, deepest Meaning. All Form-structures of Secondary Universal Illusion differ from reference codings of Primary Universal Illusion, which have «generated» them, by the presence of these elusive niceties.

3.1185. Thus, we can say that presence of the infinite multitude of interstitial Creativity Spheres, which duvuyllerrtly replace each other through all vectors of multipolarizational Focus Dynamics of SSLOO-SS-SNAA-Creators, provides in the Mechanism of exuberation of all Form-structures of Secondary Universal Illusion the main informational-regenerative function on transcendent keeping and diffuzgently-simultaneous distribution (both transgressively and convergently!) of YYYUULLUYG-Forms of Primary Energy-Plasma in slloogrent Focus Dynamics of all possible CCIs and Self-Consciousnesses Forms, which structure different UIYUVIIMM-variants. LLA-IYYSS-Creators and UYUYSS-Creators of intermediate-compensational Creativity Spheres, which provide minimal degree of interpretation of codings generated by Universal SSUI-SS-SFAA-Creators, represent the greatest percentage of all different-type CCIs of Cosmic Stabilizational Plan-Level (OOSLLLOOLL-SS-ST). Its total Focus Dynamics is the main focal-ethereal base of virtually all Form-structures of Secondary Universal Illusion. Let me remind you its structure, which was offered earlier in the context of PFDs, and continue Its detailed examination.

Chapter 6. Plan-Overtones of Fields-Consciousnesses. The simplest focal-ethereal «projections» of EIYG-SS-MII- Creativity Sphere of AIY-YYA-Entity

3.1186. In turn, *every* Cosmic Plan-Level also subdivides «inside Itself» into Plan-Overtones of Fields-Consciousnesses (IIY-UUSSM): Ethereal, Transforming (from +36th — through 0.0 — to -36th dimension), Focusing (from +24th — through 0.0 — to -24th dimension), Disbalancing (from +22nd — through 0.0 — to -22nd dimension), Disintegrational (Buddhi-Cosmic) (from +20th — through 0.0 — to -20th dimension). The next, sixth — *Buddhic Plan-Overtone* (from +18th — through 0.0 — to -18th dimension) — manifests special properties and differentiates on two Plan-Overtones: Stabilizational and Transmutational, each of which transforms by way of interaction between them into sort of «independent» Mental, Astral, and Causal Plan-Overtones.

3.1187. Due to activity of Form-Creators of interstitial Creativity Spheres (LLA-IYYSS-UYUYU-SSS), SLAA-SS-MII-Creators of the Highest Levels of exuberance of Plan-Overtones of Fields-Consciousnesses, Who organize all types of subjective Realities of Tertiary Universal Illusion (AIYYALUUMM), have possibility to accept from SSLOO-SS-SNAA-Creators primary codings (in the way of LLAASS-Forms), which have been qualitatively virtually in no way distorted by them, and accumulate peculiar to them Information in focal Configurations of the highest structures of their Integral Cosmic Forms. These LLAASS-Forms are the main ethereal basis for producing SFUURMM-Forms.

3.1188. High degree of dissonation of focal-ethereal interconnections of the Tertiary Illusion and presence of much more quantity of factors of inertionness of Energy-Plasma (DRUULGM-MMUU-U) manipulated by SLAA-SS-MII-Creators do not contribute to production in this part of focal Configuration of DDIIUYU-Entity of equally effective compensational Creativity Spheres. And owing to this fact strong distortions and deformations of LLAASS-Forms' contents occur in Focus Dynamics of Form-Creators of all less amplifical Levels of exuberance of Plan-Overtones of Fields-Consciousnesses (EIYG-SS-MII — *Sphere of Cosmic Creativity of SLAA-SS-MII-Creators — from 0th to ±12th dimension*). This means concatenational transgression of their ethereal Configurations on all

multitude of different-protoformal CCIs. These distortions and deformations increase literally exponentially with Tertiary Energy-Plasma density rise. Considering this, you should understand that «Rays» are not analogs of all possible birvularity types of CCIs' FD, but they supply the Mechanism of exuberation of birvularity «carriers» — Focus Dynamics of Self-Consciousnesses Forms.

3.1189. Thus, the presence of many all possible DRUULGM-MMUU-U-Factory, which strongly weaken in Focus Dynamics of SLAA-SS-MII-Creators covallertness degree of created by them focal-ethereal interconnections, is the main Reason of the Process of deformation of the Contents of primary codings in Focus Dynamics of initiated by them Self-Consciousnesses Forms. This in turn leads to increasing in their subjective Perception systems of so called different-Qualitative dissonational distances, to «individual» isolating, and to strong intensification of impact of illusory Time factor on the state of «personal» Self-Consciousness. That's why utterly incomparable qualitative difference exists between Form-structures of Cosmic Plan-Levels of Secondary Universal Illusion and Form-structures of Plan-Overtones of Fields-Consciousnesses of the Tertiary Illusion.

3.1190. The less covallert between themselves interconnections (in accordance with Synthesis Scheme of this given Self-Consciousness Form) structure Focus Dynamics of «person,» the more it subjectively *self*-disintegrates from general Focus Dynamics of own CCI (because other protoformal interconnections activate), and the more exuberation Mechanism resonationally «attracts» such Focus Dynamics to the more inertial development scenarios with the strong influence on the Self-Consciousness state of illusory Time factor. Psycho-mental interconnections with homogeneous and particular «personal» Interpretations from parallel development scenarios weaken or get broken, which becomes the reason of radical isolation (selfishness) of «person» subjective Perception system; weak development of creative interconnections with SFUURMM-Forms of collective Subconsciousness becomes typical on the background of brightly and hardly expressed functional and realizational dependence from SFUURMM-Forms of protoformal-diffuzgent Self-Consciousnesses Forms etc.

3.1191. Development of inertial Process in regimes of exuberation of Focus Dynamics of Form-Creators, Who structure Self-Consciousnesses Forms of Form-Matter (TRUUFFORRG-VUU — from 4.0 to 0.0 dimension), acquires so strong dissonational (destructive, inhibitory) tendencies that SFUURMM-Forms, which have already undergone specific inertial deformation in the Levels of Plasma-Matter (TRUURRGURRDT-NUU — from 6.0 to 4.0 dimension), Form-Plasma (TRUURRGURRDT-NAAKHGRASST — from 9.0 to 6.0 dimension), and Plasma-Form (TRUURRGURRDT-SSMII-I — from 12.0 to 9.0 dimension), qualitatively change completely beyond recognition in conditions of the lower matter type.

3.1192. This occurs because of high degree of imperceptness of focal-ethereal interconnections, which generate Focus Dynamics of Form-Creators of these Levels: just very small part of Information, which structures SFUURMM-Forms of Plasma-Matter, Form-Plasma, and Plasma-Form, is able to adequately (meaning, in accordance with their Synthesis Scheme) reflect in Perception systems of different Self-Consciousnesses Forms. As a consequence, just extremely limited quantity of interconnected between each other Information particulas «projects» to «personal» Self-Consciousness in the process of «unpacking,» and utterly distorted by own content Conceptions are produced out of them.

3.1193. As for Mechanism to ensure compensating functions in conditions of Tertiary Universal Illusion by Form-Creators of Stabilizational Plan-Overtone, one can say that only Form-structures of Its highest Levels (from $\pm 14^{\text{th}}$ to $\pm 12^{\text{th}}$ dimension) modelled and activated by SSLOO-SS-SNAA-Creators of Secondary Energy-Plasma can execute own function. At the same time level-by-level creativity of SLAA-SS-MII-Creators (from $\pm 12^{\text{th}}$ to 0^{th} dimension) leads only to production in Space-Time of different-Qualitative and increasingly inertial spheroidal Form-structures (TTOUD-D-DUOTT-Factor), which fully compose by themselves all Levels of exuberation of Tertiary Energy-Plasma. The product of these Form-structures functioning is absolutely all contents (SFUURMM-Forms and UU-conglomerates) of the infinite multitude of different-protoformal Creativity Spheres, which structure OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes.

3.1194. The main feature of any Form-structure of TTOUD-D-DUOTT-Factor is that while perfectly reflecting focal-ethereal interconnections of the boundary zone of the more qualitative exuberation Level, each of them — due to insufficient covallertness (or high imperceptness) of generating it interconnections — does not have that necessary potential of decoherent Energy, which is able to provide launching of effective corrections' Mechanism in Focus Dynamics of SLAA-SS-MII-Creators and to amend corresponding corrections to distortions of manipulated by them SFUURMM-Forms regarding presence of OOO-TT-UU-Factor («*inertial Coefficient*») in their Focus Dynamics. Because of that the process of «linking» of Focus Dynamics of these Form-Creators to the «basic analogs» of those primary codings, which have been generated by SSLOO-SS-SNAA-Creators, becomes virtually impossible.

3.1195. Universal Sloogrentness Principle allows SSUI-SS-SFAA-Creators of Inter-Galactic Transforming *Complex-Plan* (LLOOUY-SS-MM), which primary (for DDIIUYI-Entity!) ethereal codings absolutely precisely duplicate in all types of Focus Dynamics of Secondary Energy-Plasma by means of interstitial Form-structures of Cosmic Transforming *Plan-Level* (SSMM-IIF-SS-ST), to continue implement their functions in specific conditions of exuberation of Focus Dynamics of CCIs and Self-Consciousnesses Forms of Tertiary Energy-Plasma via analogous Form-structures of Transforming *Plan-Overtone* (OUIYY-UISTI-UU).

3.1196. In the same way as it goes at Transforming Complex-Plan and Plan-Level, all functions of Form-systems of Transforming Plan-Overtone reduce to providing of EIYG-SS-MII-Creativity Spheres of SLAA-SS-MII-Creators with ethereal «projections» and to regulating Mechanism of resonational transformation — both at transgression and convergence — of these «projections» (SFUURMM-Forms) to focal Configurations and Focus Dynamics of all Self-Consciousnesses Forms for their realization in corresponding exuberation regimes.

3.1197. But the term «regulating» is used here conditionally (just in relation to your constrained Conceptions about ability of Self-regulation of completely all Form-structures of Macrocosmos), because the Process of simultaneously-holochrone transgression-convergence of any ethereal «projections» has been carried out without Whoever's interference only due to availability of Resonation Universal Principle. Focal Configurations of Form-Creators of any Levels of Macrocosmos dimension represent only reflectors and specific carriers (via Focus Dynamics) of integral-differential functions of this Principle. Since Focus Dynamics of Form-Creators of Transforming Plan-Overtone is

extended within the limits of megadiapason of exuberation from +36th — through 0.0 — to -36th dimension, one can say that their activity is not confined by the Levels of Tertiary and even Secondary Energy-Plasma, but includes also participation of definite Inter-Universal functions in realization.

3.1198. The only thing, which makes difference between Form-structures of Transforming Plan-Overtone from analogous ones, but more amplificational Form-structures of Plan-Level and Complex-Plan, is their Contents. They possess focal-ethereal combinations of completely all Forms of Energy-Information, which reflects by Itself all qualitative conversions, which are simultaneously implemented in all Levels of Tertiary Energy-Plasma. By analogy, this property schematically could be compared with DNA-molecule, each section of which contain in itself Information on these given biological species only in strictly specific diapason of matching qualities and always stays in its functionality absolutely united with the whole DNA structure.

3.1199. While recoding on their own the infinite number of variants of Life-Creativity in own Form-structures in corresponding to them diapason (from +12.0 — through 0.0 — to -12.0 dimension) of exuberation of Focus Dynamics of this Universal Entity, Form-Creators of different-type CCIs of Transforming Plan-Overtone instantly retranslate this Information not only into AYFAAR VCCI, but also into identical Form-structures of the infinite number of other (diffuzgently-covarlert with respect to DDIIUYYI Focus Dynamics) Universal Entities and obtain in the same way all Information about all variants of generated by them Experience in return from their corresponding Form-structures. This Information equally with concurrently acquired empiric Experience becomes inseparable qualitative part of intuitive (that is, sort of «subconscious,» imported from «outside») Experience of the Highest Collegiate Intelligence (AYFAAR) of this given Universal Entity and is instantly reproduced by SLAA-SS-MII-Creators in realizational structures of Tertiary Universal Illusion with «additions» and «corrections» from own Existence Experience.

3.1200. This Experience is «new» to this given Creation, and It, in turn, resonationally transforms, qualitatively restructures, fixes in Self-Consciousness of DDIIUYYI-Entity as Its own Experience and instantly retranslates into the Unified System of Inter-Universal focal-ethereal interconnections reflecting («re-projecting») backwards with many new primary codings, which represent by themselves «the response» of zillions of other Universal Entities on new qualitative AYFAAR's interpretations, and so on in all infinite Unboundedness of these given Creative Cosmic Processes. All Essence of Creative Processes, which are realized by Collective Cosmic Intelligence of SLAA-SS-MII-Creators of Transforming Plan-Overtone, consists exactly in functional providing (in own diapason of exuberation) of continuous dynamics of exchange with these highly complicated interconnections between our Universal Entity and other Universal Entities.

3.1201. Collective Intelligence of SLAA-SS-MII-Creators of Focusing Plan-Overtone meets completely different organizational creative challenges. Its cosmic functions could be conditionally compared with the functions of Focus of Close Attention of our NUU-VVU-Form-Types, which activates in Focus Dynamics of every «personal» Interpretation only those among all quantity of SFUURMM-Forms initiated multipolarizationally-simultaneously in informational Self-Consciousness space, which mostly resonate with this Interpretation's current essential Interest. By not taking subjective Time factor into account, the integral of simultaneous realization of completely all variants of Focus-

es of Close Attention (and their ampliative analogs) of every Stereo-Form will reflect resonationally in the higher dimension Levels as Focus Dynamics of much more amplificational Self-Consciousness Form, which has been eglleroliftively directed to even more qualitative and universal creative states.

3.1202. Form-structures of Transforming and Focusing PFDs of our Universal Entity (including Complex-Plans, Plan-Levels, and Plan-Overtones) — as opposed to Form-structures of Disbalancing and Disintegrational PFDs — play the main role in the Process of holochrone realization of *eglleroliftive* Impulse-Potential via all possible types of exhibition of Universal Plasmic-Differentiation Radiation (UPDR). They comprise the base of *amplificational* Mechanism of realization of mercavgnation consummative part.

3.1203. The main function of Form-Creators of all these Form-systems comes down to the issue of attempt to neglect colossal difference in regimes of exhibition of zillions of Self-Consciousnesses Forms in order to concentrate absolutely all Energy-Potential, which has been put in their focal Configurations, in a single holochrone IYY-YAA-YY-State (*reflects via multidimensional — from ± 36.0 to 0.0 dimension — «Point» of subjective Creative Activity in subterransive Space of Self-Consciousness of DDIIUYI-Entity*), which comprises absolutely all possible variants of focal-ethereal interactions and creative interconnections peculiar to AYFAAR VCCI.

3.1204. SLAA-SS-MII-Creators of Focusing Plan-Overton's CCI provide general dynamics of these focal conversions in regimes of peculiar to them dimension megadiapason bringing slloogrentness of Focus Dynamics to the State of Immanent GOOLGAMAA-A-Ingredient; SSLOO-SS-SNAA-Creators of Focusing Plan-Level's CCI accept this Experience as the base of own Creativity and bring it by means of peculiar to them eglleroliftive perturbations to the State of Transcendent SSMIYSMAA-A-Ingredient; after that SSUI-SS-SFAA-Creators of Focusing Complex-Plan provide it with the most amplificational State for AYFAAR's Focus Dynamics, which is peculiar to Idiopathic TLAASSMA-A-Ingredient.

3.1205. Focusing Plan-Level and Plan-Overtone Form-structures' features show the fact that megadiapason of their mutual exhibition (from $+24.0$ — through 0.0 — to -24.0 dimension) differs from manifestation regime of Focusing Complex-Plan's Form-structures (from $+36.0$ — through 0.0 — to -36.0 dimension). Though, this is not the case for Focus Dynamics of Form-Creators of the first two Form-structures, because definite difference also exists between their realizational abilities, which is about *qualitative* distinctions between their functions performed by SLAA-SS-MII-Creators of Focusing *Plan-Overton's* CCI, and functions of SSLOO-SS-SNAA-Creators of Focusing *Plan-Level's* CCI.

3.1206. This could be conditionally compared with operation of many people of different occupations in separate workshops of a plant: their functions are connected only to some specific workshops and technologies, therefore there is no sense for them to visit other workshops. Even though, again, all of them work at the same plant (meaning, within the limits from $+24.0$ — through 0.0 — to -24.0 dimension) and are occupied with the same output (multipolarizational integration of all less amplificational — for AYFAAR — variants of Focus Dynamics to the most ampliative for Its Synthesis Scheme Form-Type of the 36-dimensional DDIIUYI-Entity).

3.1207. Before acquiring ability to «re-project» own realizational Experience to VCCI of Universal Entities of other types and also to obtain in return from them new synthesized Energy-Information, this Experience should be modelled, structured and recoded by SSUI-SS-SFAA-Creators of DDIUYYI-Entity to corresponding high-amplificational State, which allows Perception systems of other 36-Qualitative Universal Entities to operate it on the Level of peculiar to them VCCIs. Exactly this part of the general Task has been performed by Form-Creators of all Focusing Form-structures, Who use for these goals accessible to them decoherent Energy-Potential of dissonational — post-mercavgnational, consummative — part of Information.

3.1208. All Focusing Form-structures represent Mechanism of «local» exiberation of the definite focal-ethereal interconnections of this Energy-Potential via all multitude of Focus Dynamics of different-Qualitative Self-Consciousnesses Forms. As a result, annihilation of Energy of depliative Focuses and its successive accumulation to the more and more ampliative Focuses occurs. The whole Focus Dynamics of not only AYFAAR, but also of all other VCCIs, Who simultaneously work together to form all types of Primary Illusions of 36-Qualitative Universes, has been based on the conditional «pinnacle» of this consummative Process of eglleroliftive perturbation of different-Qualitative Focuses within the limits of Forms of this megadiapason.

3.1209. In contrast to functions of Form-Creators of Form-structures of Transforming and Focusing PFDs, Form-structures of Disbalancing Plan-Level and Plan-Overtone play a major role in the Process of holochrone manifestation of *irrkoglictive* Impulse-Potential via all types of realization of Universal Plasmic-Differentiational Radiation. Along with Form-Creators of Disintegrational Form-systems of PFD, they comprise the base of *qualitational* Mechanism of realization of mercavgnation consummative part — transition of the most complicated combinations between dissonational (Energy) and resonational Information parts to the most simple ones, right up to generation of reconverstive Configurations of primogenitive State of Information.

3.1210. Let me remind that the Task of eglleroliftive Mechanism of consummatization of all focal-ethereal interconnections is reduction of peculiar to them dissonational states to the lowest degree of tensoriness and absolute harmonization. The result of this is also *transmittation*, which is transition of Information from amitsissimal State to primogenitive one. This Act of overall transmittation of focal-ethereal interconnections to reconverstive Configurations finishes holochronely both in the most amplificational and in the most Qualitational exiberation Levels.

3.1211. Since Focus Dynamics of Form-Creators of every realizational Form-system has stable eglleroliftive tendency to bringing itself to some more balanced state (definite balance of interconnections generating it), the main function of Form-Creators of Disbalancing Plan-Overtone's CCI is destabilization of these eglleroliftively-integrational processes in Focus Dynamics of all Worlds' Form-systems of Tertiary Energy-Plasma, and that virtually forces synthesizing Form-Creators of absolutely all Levels to balance on the brink of unstable equilibrium and Multipolarization among all possible Synthesis Directions (Creators of Disbalancing Plan-Level do almost the same). Owing to that necessary conditions have been created simultaneously in their Focus Dynamics for maximal different-Qualitative *miskeration*, which is svilgs-spherational «stirring» of the signs of some PCQs with the signs of other PCQs for the purpose of producing the most covarllert focal-ethereal combinations.

3.1212. This Process of energy-informational unbalancing of Focus Dynamics is needed to weaken stability of covallert focal-ethereal interconnections and to bring them up to the state of imperceptible ones, while providing Form-Creators of Disintegrational Form-systems in such a way with opportunities to implement by themselves peculiar to them functions on enforcement of signs of crudeness in already unbalanced Focus Dynamics.

3.1213. INGSSMII-NAA-Creators of Disintegrational Plan-Overtone of Tertiary Energy-Plasma irrationally correct all simultaneous Dynamics of transformational and transmutational Cosmic Processes on generating of the countless multitude of covallert and illusory focal-ethereal combinations between Aspects of all Pure Cosmic Qualities and prevent concatenational level-by-level convergence of Focus Dynamics of all synthesizing Form-Creators to the more developed Forms of Collective Cosmic Intelligences. Owing to this fact Qualitative Processes have been implemented in Energy-Plasma, which reflect mercantile functions of irrational Impulse-Potential.

3.1214. On close examination of Plasmic Forces Diapasons you could not ignore the fact that corresponding analog of *Harmonizing* Plan-Level is absent in Form-structures of Tertiary Universal Illusion, which Form-Creators in Secondary State of Energy-Plasma accomplish very important function of «Disproportional intra-qualitative Balancing» and «Harmonious Inter-qualitative Levelling.» This function allows all focal-ethereal combinations before «Unbalancing» Process to come to stable state of absolute Harmony and Equilibrium, through which heterogeneous equalization in Focus Dynamics of Form-Creators occurs on the level of total cosmic formations and civilizations (Planetary, Stellar, Galactic, and similar types of Collective Cosmic Intelligences).

3.1215. Similar — qualitatively balanced — states of Focus Dynamics of Collective Cosmic Intelligences are simply impossible in conditions of elevated tensority and high degree of inertness of focal-ethereal interconnections between Form-Creators of all possible Self-Consciousnesses Forms of Tertiary Energy-Plasma. Thus, any state, which might seem to subjective Observer as «True Cosmic Harmony» in these specific exhibition conditions, is no more than the Tertiary Illusion.

3.1216. This illusory state (AIYYALUUMM) includes in the sphere of own creative manifestation all vibrations of this given Energy-Plasma exhibition's megadiapason: Karmo-Types of Causal Plan-Overtone (KOARDDIIRFF-AASMII-I — from ± 12.0 to 0.0 dimension); all types of Form-Matter (TRUUFFORRG-VUU — from 4.0 to 0.0 dimension); all creativity types of Plasma-Matter (TRUURRGURRDT-NUU — from 6.0 to 4.0 dimension) and Form-Plasma (TRUURRGURRDT-NAAKHGRASST — from 9.0 to 6.0 dimension), and also all levels of Plasma-Form (TRUURRGURRDT-SMII-I — from 12.0 to 9.0 dimension), and actively uses for that Focus Dynamics of ASTEROIDS — DLLAABLLA-PLAVAFLAGMMA-A-Form-Creators (Tertiary level of ASTRAL-Plasma) and PLASMOIDS — ASSFOLLFORDTS-LMIILLGFLI-Form-Creators (Tertiary level of MENTAL-Plasma).

3.1217. The main functional Task of Form-structures of INGSSMII-NAA-Creators is providing in Focus Dynamics of synthesizing Form-Creators of some indifferent (that is, apathetic, unconcerned with respect to that eggerolitive Interest, which has been initiated by this Synthesis Scheme) creative state of all inter-qualitative interconnections, while sort of counterbalancing them with the infinite quantity of all possible alternative current combinations peculiar to other protoformal development

Directions. Typical result of their stable influence on Focus Dynamics is availability in it of the process of manifestation of multipolarizational birvulyart decondicification on this given Synthesis Scheme (people used to interpret this as so called «destruction of personal identity») with following refocusing to some Self-Consciousness Form, which realizes through another Synthesis Scheme.

3.1218. All just described properties of Form-structures of the Highest Plan-Overtones have only indirect — fundamentally-organizational — relation to those certain combinations of focal-ethereal interconnections, which, actually, produce with own multidimensional Focus Dynamics all different-Qualitative diversity of realizational Experience of Tertiary Universal Illusion. As in more amplificational States of Universal Creation (Primary and Secondary Illusions), all this definitive Experience has been provided by Form-Creators of Form-structures of Buddhist Plan-Overtone (GLOOGSMII-NAA), which fundamental arrangement schematically resembles already described above functional Form-structures of Buddhist Complex-Plan and Plan-Level.

3.1219. As in previous more amplificational Form-structures, Collective Cosmic Intelligence of GLOOGSMII-NAA-Creators multipolarizationally transgresses on two functionally complementing each other Creative Flows, which reflecting specifically in slloogrent Focus Dynamics through peculiar only to them function transform instantly in general exuberation Mechanism into sort of independent Stabilizational (SSOOSSOOLMA-NAA) and Transmutational (NISSLII-I) Plan-Overtones. Although, this illusory transformation is no more than *imaginary* (seeming) subjective Perception effect; in fact, both of them are the two *inseparative* (indissoluble) parts of subterransive Form-structure of Buddhist Plan-Overtone, from Focus Dynamics of Form-Creators of which Mental, Astral, and Causal types of the Tertiary Illusion have been developed (they have been also considered as «separate» Plan-Overtones' dynamics).

3.1220. All Information about Primary Images of this given Universal Creation (resembling design drawings used by construction workers) has been specifically recoded and adapted to the Perception systems of different Self-Consciousnesses Forms in Form-structures of Stabilizational Plan-Overtone. This Information transgresses and «reprojects» through many specializing only in this function structures in the way of «the Highest Harmony forming General Plan» into all exuberation regimes and dimension Levels peculiar to slloogrent Focus Dynamics of SLAA-SS-MII-Creators of Tertiary Energy-Plasma. One of such «working» transgression Mechanisms is the countless number of Immanent GOOLGAMAA-A-Ingredients, Which, as noted above, in all their totality represent *Secondary Forming Principle of Idiopathic* TLAASSMA-A-Ingredient of our Universal Entity (Its Primary Forming Principle represents Transcendent SSMIIYSMAA-A-Ingredient).

3.1221. Immanent GOOLGAMAA-A-Ingredients undertake own Universal form-generating and synthetic Activities exactly in this megadiapason of Cosmic Creativity (to 12.0 dimension). They represent in conditions of exuberation of Self-Consciousnesses Forms of Tertiary Universal Illusion the Highest Collective Intelligence of all Its Proto-Forms. They are the ones filling with peculiar to them Creative (ethereal) Contents, through twelve sub-Levels of Stabilizational Plan-Overtone, all different-Qualitative Worlds' Form-systems and «projecting» countless «assembly» of all possible Self-Consciousnesses Forms from the Highest — for the Tertiary Illusion! — Levels to the more dense exuberation regimes.

3.1222. Besides, one should note that the most amplificational Levels of Creative Activity of GOOLGAMAA-A-Ingredient, which realize via GLOOGOLM-GLLII-Creators of AANI-Iissiidi, do not structure Focus Dynamics of the Tertiary Illusion, but in Essence reflect qualitiveness of LLAASS-Forms of the lowest Levels of Secondary Illusion (from +14.0 — through 0.0 — to -14.0 dimension) including in this way to their ethereal Configurations *virtually unchanged* primary codings generated by FD of AYFAAR VCCI.

3.1223. Again, I draw your attention to the fact that at close examining of structure of exhiberation of the more qualitative Levels of Stabilizational Complex-Plan, Plan-Level, and Plan-Overton, you will notice that Form-structures of each of them concurrently penetrate by themselves the two Energy-Plasma's States at once (in intermediate, or finitimus diapasons) and represent sort of linking or transmission Mechanism between the highest amplificational codings of Primary Universal Illusion and their possible — the most qualitative — subjective Interpretations, which have been generated by SSMIIYSMAA-A-Ingredients and GOOLGAMAA-A-Ingredients and simultaneously realized through FD of Secondary and Tertiary Illusions' Form-Creators .

3.1224. In the same way SSNUUYLL-Forms of Inter-Universal Inter-Galactic Plasmic Forces Diapason transgress to Universal YYYUULLUYG-Forms of Inter-Galactic Stabilizational Complex-Plan not from ± 36.0 dimension, but from ± 38.0 — ± 37.0 dimension providing in such way Focus Dynamics of Form-Creators of Primary Universal Illusion with VERITABLE CODES generated by SUPRA-Universal I-IIITY-I-AA-A- and UUYU-UU-YY-Creators. In turn, through Form-structures of Stabilizational Complex-Plan, which are ethereal «projections» of YYYUULLUYG-Forms of Focus Dynamics of SSLOO-SS-SNAA-Creators of Stabilizational Plan-Level, the most ampliative exhiberation (starting from ± 26.0 — ± 25.0 dimension) of LLAASS-Forms of Secondary Illusion has been provided. They, as noted, transgress «projections» of peculiar to them primary codings through Focus Dynamics of SLAA-SS-MII-Creators of Stabilizational Plan-Overtone to the Tertiary Illusion's SFUURMM-Forms.

3.1225. GLOOGOLM-GLLII-Creators specifically recode and adapt all Information copied from LLAASS-Forms in the way of two ethereal Flows, one of which contains only «projections» of primary codings of this given Universal Creation. These Creators fill with these Flows' Contents all Form-structures of Stabilizational Plan-Overtone (these structures never change and serve to Form-Creators as sort of original Standards of Creation!). At the same time NISSLII-I-Creators of Transmutational Plan-Overtone — via Form-structures of Mental, Astral, and Causal Plan-Overtones — duplicate and svilgs-spherationally transgress all these «projections» of Secondary Illusion's «lower» Levels (from ± 14.0 — ± 13.0 dimension) to Focus Dynamics of the Tertiary Illusion's synthesizing Form-Creators .

3.1226. As we found out above, «the projections» of informational codings of the second «Flow» arrange to the complex Contents of sort of «independent» Transmutational Plan-Overtone becoming the main informational basis for the infinitely differentiated Focus Dynamics of Form-Creators of Tertiary Energy-Plasma. With regard to growing exponentially influence of Inertia Factor (DRUULGM-MMUU-U), progressive deformation and increasing qualitative distortion of duplicated from LLAASS-Forms Information via SFUURMM-Forms of Focus Dynamics of Collective Cosmic Intelligences of each from the more depliative sub-overtones occurs during Its perception and further reproduction. Exactly these subjective distortions, which have been practically realized via tensor

states of Focus Dynamics of synthesizing Form-Creators of Mental Plan-Overtone (ASSFOLLFORDTS-UOLDMII-I) and Astral Plan-Overtone (DLLAABLLA-SVUULLMII-I), become informational base and qualitative Contents of all types of subjective Realities of Tertiary Universal Illusion.

3.1227. Information in the way of all possible ethereal combinations of Pure Cosmic Qualities' Aspects is inevitable part of Focus Dynamics of the Tertiary Illusion's all Collective Cosmic Intelligences, their key characteristic including Its most dense levels — Form-Plasma and Form-Matter. With growing of imperceptness of focal-ethereal interconnections of Focus Dynamics of Form-Creators of different qualitative Levels the force value of OOO-TT-UU-Factor («*inertial Coefficient*») increases and «inhibitory» influence of inertionness (DRUULGM-MMUU-U) on Focus Dynamics of qualitative Self-Actualization of complex Contents of the two given «Flows» through Cosmic Intelligences' collective Creativity constantly develops acquiring more and more «dual» differences and turning in Form-Matter Levels into the state, which we not altogether correctly define as «unity and struggle of opposites.»

3.1228. Besides, the signs of the Unity of all Self-Consciousnesses Forms are preserved due to availability of Stabilizational Plan-Overtone's Form-structures, whereas all narrow-specific Experience of subterraneous refocusing of every Self-Consciousness Form has been provided by the presence and qualitative base of Transmutational Plan-Overtone's Form-structures, where MENTAL-Plasma's and ASTRAL-Plasma's properties are represented by the infinitely penetrating each other Flows of the *unified* Energy synthesized out of all focal-ethereal combinations peculiar to this given exhibition megadiapason.

3.1229. The highest qualitative synthetic «Flows» (AAA-FTOOF TOMM-SS-ST and AAA-FTAAFTAFF-SS-ST) in the most ampliative Levels of Transmutational Plan-Overtone's Form-structures, which keep protective (that is, true, non-distorted) meaning of primary codings of the general Creation Plan, equally differentiate on MENTAL-Plasma and ASTRAL-Plasma, which Form-structures belong to mental-*sffluruiss*t and astral-*ssmiisstsent* exhibition Levels of Secondary Illusion (from ± 14.0 to ± 12.0 dimension). Owing to the very small influence of the inertial Factor, focal Configurations of CCIs of these Levels still keep high degree of informational reliability. This transgression could be schematically shown in the following way (all subsequent mental-astral Levels of Tertiary Energy-Plasma are generated by the analogous principle):

VVOYOOYY-VVUU-SS-ST + AA-FTOO-SS-ST = 89–90th Mental and 89–90th Astral Sub-plans;

VVOYOOYY-VVUU-SS-ST + AAA-FTOMM-SS-ST = 91–92nd Mental and 91–92nd Astral Sub-plans;

LLAYAYY-LLAA-SS-ST + AA-FTAA-SS-ST = 93–94th Mental and 93–94th Astral Sub-plans;

LLAYAYY-LLAA-SS-ST + AAA-FTAFF-SS-ST = 95–96th Mental and 95–96th Astral Sub-plans... and so on, on the same principle.

3.1230. Though, with decreasing of ampliativeness of combinations synthesized within the limits from ± 12.0 to ± 9.0 dimension, this «inhibitory» influence leads to increase of tensoriness of fo-

cal-ethereal interconnections and in a distorting way reflects on Focus Dynamics of Form-Creators of all Self-Consciousnesses Forms and CCI's. Therefore, strong «disinformation» degree increasing occurs in Focus Dynamics of Form-structures of mental-astral Diapasons generated by means of transgression of Focus Dynamics of synthetic TTT-UULLKUURRU-SS-ST-, TTT-AALLKAARRA-SS-ST-, and TTT-IIRRGIIFFI-SS-ST-Levels of Transmutational Plan-Overton. This disinformation becomes inevitable part of subjective Realities of all types starting from mental vvuurlikht and Astral grool-lugorff Levels.
