ISSIIDIOLGY. Fundamentals.

**Volume four**

*Structure and Laws of implementation of Macrocosmos skrruullerrt  
system energy-informational dynamics*

**Volume four. Structure and Laws of implementation of Macrocosmos skrruullertr system energy-informational dynamics.**

In the «ISSIIDIOLGY Fundamentals» first three volumes, deep underlying Nature of Reasons and Mechanisms of the Creative Activity of everything is described. Everything is manifested in one way or another in multi-dimensional and different-qualitative Macrocosmos, including also qualitative Base for Focus Dynamics of the Universal Structures Form-Creators and exhibition Principles of Human and other Self-Consciousnesses Forms in Tertiary Illusion different-dimensional diapasons all variety. By continuing studying these questions in depth, «the Fundamentals» fourth volume describes the realization Nature of the Universe Cosmic Entity (DDIIUYYI) and Its Highest Collective Cosmic Mind (AYFAAR), and also the focus realization Mechanism of Its Self-Consciousness as the Prime Reason of manifestation of the Universe observed by us.

In the beginning of the volume, the author recalls generation principles and mechanisms of the human subjective Realities, explains interconnections between the Tertiary and the Secondary Illusions Form-Creators, while describing thoroughly Fields-Consciousnesses structure, defines birvulyarity and its Qualitativeness types conception. The main part of the volume is devoted to description of the Reasons and principles of the Universe Cosmic Entity Focus Dynamics, various energoinformational structures of Its Self-Consciousness, and also to disclosure of SFUURMM-Forms human-type realization process and Form-Creators Focus Dynamics amplificational aggradation process.

This volume concludes with summarizing, integration of everything described — with Information about Universal Cosmic Laws and Their Principles providing fundamental basis for generation of all Self-Consciousnesses Forms in Macrocosmos Tertiary, the Secondary, and the Primary Illusions.

# Table of Contents

**Issiidiology as a method of cognition, or percolation method for providing information.**

## **SECTION XIII. From Plan-Overtones of Fields-Consciousnesses to Form-Types of collective subjective Realities**

**Chapter 1.** The skrruullerrt system interstitial states between USIP-Initiation of Information and Its confectusness

**Chapter 2.** The different-Qualitative Process of amplificational Self-Cognition of all Collective Cosmic Intelligences and Their Self-Consciousnesses Forms

**Chapter 3.** Functional interconnections among various Cosmic Form-structures and Creators-PLASMOIDS

**Chapter 4.** Functional interconnections between Form-Creators of Self-Consciousnesses Forms of Plan-Overtones and Subplan-Overtones of Fields-Consciousnesses

**Chapter 5.** Physical Plan-Overtone of Fields-Consciousnesses (TRUURRGURRDT)

**Chapter 6.** Astral (DLLAABLLA-SVUULLMII-I) and Mental (ASSFOLLFOLDTS-UOLD-MII-I) Plan-Overtones of Fields-Consciousnesses

**Chapter 7.** Overtones of Fields-Consciousnesses (VAALL-VAA-KKAA)

**Chapter 8.** Subovertones of Fields-Consciousnesses and principles of subterransive formation of collective subjective Realities

**Chapter 9.** Duplex-Spheres as the fundamental informational base for generation of collective subjective Realities

**Chapter 10.** About simultaneous implementation of different-Qualitative development Directions in multipolarization of Focus Dynamics

## **SECTION XIV. The Universe is the result of focal realization of SFUURMM-Forms of Self-Consciousness of DDIIUYYI-Entity**

**Chapter 1.** Three main constituent parts of Energy-Plasma forming Focus Dynamics of Form-Creators

**Chapter 2.** Complex-structured Nature of multiple manifestation of human personality

**Chapter 3.** Photoreductive Ether role in providing unpacking abilities of Focus Dynamics of heterogeneous Form-Creators

**Chapter 4.** Unity of the Main Life Forces as the base for consummatizational processes in Macrocosmos

**Chapter 5.** Thoughts, Feelings, and Desires informational Nature and their slloogrent implementation through Ideas

**Chapter 6.** Formation principles of the causal base of Space-Time in the Tertiary Universal Illusion exhiberation conditions

**Chapter 7.** Eglleroliftive convergence mechanism of Focus Dynamics of Karmo-Forms

**Chapter 8.** Amitsirational reciprocity principle between Focus Dynamics of Form-Creators of various dimension Levels

## **SECTION XV. The nature of Universal Cosmic Entity**

**Chapter 1.** Basic understanding of diverse Interpretations of an infinite variety of different-Qualitative Universal Entities

**Chapter 2.** Twenty four conditional Branches of multipolarizational development of CCIs of Amplificational and Qualitational Vectors

**Chapter 3.** Internous interconnections of Idiopathic TLAASSMA-A-Ingredient of DDIIUYI-Entity with Its SSMIIYSMAA-A- and GOOLGAMAA-A-Ingredients

**Chapter 4.** The organization of Holochrone transmittation and modificational supplerization of Form-Creators Focus Dynamics of all Levels of Universal Illusion exhiberation

## **SECTION XVI. Universal Cosmic Laws and Their Principles (SLLOOGSS-LLOOGS and SLLOOYYS-SLLOO)**

**Chapter 1.** «Laws» and Principles multiform manifestation Transcendent Nature

**Chapter 2.** Some of the Cosmic «Laws» and Their Principles specification, Which provide universal organization of Focus Dynamics of Form-Creators in lluuvvumic birvulyarity type

## **Short dictionary of new iissiidiological terms**

## **Abbreviations and terminology adopted in IISSIIDIOLOGY**

## **Universal Cosmic Code in Russian (Cyrillic)**

## **Contacts**

# Lissiidiology as a method of cognition, or percolation method for providing information

Thank you for inquisitiveness and aspiration to all those seekers of Truth who having studied the given «Fundamentals» previous volumes and revealed the more deep and logical answers on own very difficult questions in them, nevertheless, find spiritual boldness inside themselves to immerse further into this uneasy intuitive Knowledge kneeling neither before author's exposition complexity and the new terminology abundance, nor before problems, constantly appearing during the learning process. Such problems usually deal with visualization an abstract insight of all those «extraglobal» and «extra-microscopic» things, which Lissiidiology author tries to convey to our Self-Consciousness. This volume could be considered a critical juncture in the exposition process of this Knowledge Fundamentals, because the basic part of cosmological description of specifics and Focus Dynamics features of different-Qualitative (heterogeneous) Form-Creators of various Levels of creative manifestation of Universes and Macrocosmoses Collective Cosmic Intelligences, Who represent functional properties and features of singlemoment-simultaneous Information Existence, will be devoted mostly to cosmological mysteries revelations of exactly our — human — Existence.

On pages of the previous volumes author has examined the Self-Consciousness structure as the dynamic result of creative realization of the united informational Entity slloogrent Essence. This result is expressed in the Perception systems of all possible Self-Consciousnesses Forms via multipolarizational manifestation processes of various Macrocosmoses Form-Creators Focus Dynamics initiated by mercavgnation Act, and via singlemoment-simultaneous creative states of informational fragments all multitude: primogenitive — consummative — confective ones. Also we have acquainted with Cosmic Qualities transcendent Nature, with Their Aspects all possible interactions diversity, with complex hierarchy inside Macrocosmos Form-systems — from personalistic Worlds to Conversums and Universums. Their descriptions naturally lead to information about Universal Rhythms of Macrocosmos Creative Activity, Universal Entities eglleoliftive trends and Universal Focus of Self-Consciousness Effect as the entirely new approach to consideration, in particular, of the Big Bang problem and all Universes variety generation.

A separate topic in the Fundamentals is consideration of near-lluuvvumic multipolarization of realizational Forms of multidimensional LLUU-VVU-Entity, role of diffuzgent Proto-Forms Form-Creators in lluvvumic Synthesis Scheme and NUU-VVU-Forms (meaning, ourselves) personalistic Worlds characteristics. All these detailed descriptions of Self-Consciousness slloogrent functionality in the lluvvumic development Direction, presented sort of «from outside» of our perception by means of Self-Consciousnesses Forms and Macrocosmos Form-systems, naturally finish with descriptions of Cosmic Human (AIY-YYA) Creative Activity Highest Levels and Its subterransive Interpretation of the Macrocosmos Structures by way of Diapasons of Plasmic Forces of the Universal DDIUYI-Entity.

Starting in the previous volume with the Primary, Secondary, and Tertiary Energy-Plasma ether-focal structure, these descriptions sort of «converge» in the current volume to aiyyaic birvulyarity type allowing the reader to immerse to investigation of different-level Form-Creators interconnections of the 36-dimensional

Universe, generation of diapasons and resopasons of lluuvvumic-aiyyyaic dimensions, Karmo-Forms dynamic formation — Thoughts, Feelings, Desires, finally, causal geometry of Plan-Overtones, Subplan-Overtones, Overtones, Subovertones and Duplex-Spheres, which in their entirety provide simultaneous functioning and reflection of narrow-specific features of the Tertiary Universal Illusion corresponding manifestation Levels in every Perception system.

In the following volumes of «the Iissidiology Fundamentals,» the author will address investigation of functioning features of «internal» interaction mechanisms of Self-Consciousness Form-Creators Focus Dynamics with skrruullerrt system focal Configurations, while explaining the Processes Essence implemented in the Macrocosmos Structures Focus Dynamics from the viewpoint of their subjective perception by Form-Creators first of «personal» Self-Consciousness Levels, and later of collective Subconsciousness, Supraconsciousness, and so on. Meanwhile, concluding the current volume, these aiyyyaic structures descriptions, which look illusory «from outside» to our «personal» perception, are presented by way of detailed characteristics of different-level General Informational Flows — amplificationally stimulating Ingredients (TLAASSMA-A, SSMIIYSMAA-A, GOOLGAMAA-A), and also Cosmic Laws and Their Principles determining all Focus Dynamics of AIY-YYA (Cosmic Human) Collective Cosmic Intelligences Creative Activity.

After studying this Fundamentals materials with such comprehensive information flow, the reader might think that, truly, many things are already over. However, during Iissidiology study, one should take into account very important factor: this Knowledge, according to the author, is extremely dynamic by own structure, and therefore, it continuously improves depending on development rate and universalization depth of own people's Collective Consciousness structure, which belongs to collective subjective Reality perceived by us. This occurs as a result of introduction and activation of complex-functional iissidiological Conceptions in their Focus Dynamics. Same as Life forces Self-Consciousness Configuration to change at every instant, any knowledge simply cannot maintain its previous positions even for a while, because it strongly changes Self-Consciousness structure of that person, who more and more deeply cognizes both themselves and the surrounding reality through this knowledge.

I think, one must admire reliability and practical functionality of the scientific cognition process: physics, chemistry, biology, and others, because these disciplines have been corroborated by the numerous experimental facts. Methodology of the majority of scientific disciplines has been nurtured over decades, and of the others — over centuries. But! Everything is moving on — scientific knowledge included. And motivation for reconsidering, recheck, and deeper examination of apparently the same, unchangeable in time, physical laws is the need for meeting the scales of Self-Consciousness perception temporal dynamics: changes do occur, albeit staying unnoticed by researchers for some time.

The essence is as follows. In the Iissidiology many explanations are devoted to the fact that the surrounding reality is successively reflected (sort of «formed»!) in the Perception system not by Someone positioned as if «outside» with respect to subjective researcher, but on specific qualitative basis of continuous refocusing process accomplished in Self-Consciousness Configuration of the researcher of this reality, in our case on the basis of qualitative changes during formation process of the total Focus Dynamics of the human Collective Consciousness of collective subjective Reality realized by us. Qualitative change of every person's Self-Consciousness Focus Dynamics, owing to activation in it of the more depliative or ampliative Conceptions, inevitably leads to corresponding perturbations in subjective Reality subterraneously perceived by this person, and also leads to deviations in the particular features and properties (physical laws), under which materiality type manipulated by it operates. Humankind creative activity in recent decades has been strongly activated due to integration into billions of people's Consciousnesses of many absolutely new

Conceptions about ourselves and about Life surrounding us, which seemed fiction and unattainable fantasy to people even fifty years ago. Any many conclusions, scientific explanations of various paradoxes and mysteries made earlier should not be explained today by those outdated opinions satisfactory to us earlier.

Iissiidiology is based on that principle that quality of namely Knowledge, world view, used by most of the people for explanation of these or those quantum effects observed, sort of successively «forms» (but actually predetermines out of simultaneous opportunities multitude) the surrounding world functioning laws, but not vice versa, as it was always acknowledged in the scientific community. Already this approach has many confirmations in scientific research. Experiments carried out considering the observer's Self-Consciousness Focus Dynamics influence on the result at the other physical parameters fixed. Undoubtedly, the increasing dynamics and quality elevation of informational Flows in the humankind's Collective Consciousness will predetermine very soon the discovery of that fact that all of us exist simultaneously in many parallel realities with more or less varying physical constants.

Iissiidiology is not just a live Knowledge keeping pace with the time, but more than that, it is the Knowledge, by means of which people will soon be able independently to predetermine and choose the actual passage of time for themselves refocusing consciously to those Realities types, which best suit their creative aspirations and interests! The Iissiidiology author states himself that it will not ever become the academic science in the today's common sense, that is, such knowledge, which is polished by means of empiric experience to perfection like some complex instrument of the world's cognition. No, iissiidiological Information is aimed to constant and radical change of the cognition instruments themselves, which are functional parts of different-qualitative and multi-dimensional structure of our slloogrent Self-Consciousness. Thus it's clear that Iissiidiology — as constantly perfecting system of universal convictions, hypotheses, techniques, and their attendant discoveries — will not ever finish own way in the form of outdated instrument of cognition.

In the meantime, we face the facts in the scientific experiments, which are contrary by their essence: our world's physical constants are reckoned to be stable and unchangeable, and the experimental results are not generally recognized to reproduced repeatedly by many other researchers. However, Iissiidiology states fundamentally new opinion on this issue: original Self-Consciousness Configuration of the same researcher structured with these or those Conceptions about possible versions of expected results and based on their sustainable stability (researcher's confidence) — that is what predetermines outcome of any experiment. Why then we observe this illusion of physical constants permanency?

For sure, there will be detailed and thorough explanation to this fact in the long run. Even so, it is already clear that the reasons of such illusory firmness of our world lie in still very high diffuzgentness level of different-protoformal Form-Creators — active participants of the general process of subjective «materialization» of the collective Reality perceived by us. These Form-Creators constitute qualitative basis of Self-Consciousnesses Forms Focus Dynamics including human ones, which work together in order to sort of «form» (to choose from many Potentially possible options in accordance with priorities and interests peculiar to them) all physical parameters of our current society existence. And the portion of creative activity of Form-Creators of lluuuvvumic development direction in this overall refocusing process is much more insignificant, than those highly powerful realizational efforts, which have been put in this process by non-human Self-Consciousnesses Forms representatives. And this is not only because human formation is one of the smallest one compared to the other participants of this process. This is also because our current Conceptions about ourselves (including high influence on Self-Consciousness of all possible religious faiths and beliefs) still remain quite imperfect and extremely limited.

If to analyze the course of scientific history, meaning, evolution of the world's scientific perception, the conclusion cannot be escaped that every scientific direction had originally appeared and then became firmly established as independent discipline not necessarily on the basis of many people's collective creative work, but due to illumination splashes, which appeared in Self-Consciousnesses of not many, but very bright and extraordinary thinking individuals. Later, collective creative work — after usual in such cases procedure of the long non-recognition or somebody's authoritative accusations in falseness — only deepened and broadened these individual achievements. Due to own sharp and inquisitive mind, exactly these self-reliant individuals had either discovered something unknown and unclear in this world earlier, or could look at already available facts from the point of view, which was completely unexpected to everybody else. Contrary to conventional wisdom, they was not afraid to make more precise and universal conclusions based on results of experiments.

Issiidiology provides much more complex and reliable explanation to the process of scientific cognition formation: such genius individuals having Self-Consciousness Configuration strongly stabilized in some development direction, which is mostly devoid of many diffuzgent different-prototypical fragments most of the people have, virtually introduce new Conceptions into the humankind collective subjective Reality thereby modifying its general Focus Dynamics up to the state more developed in the lluvvumic birvulyarity type.

The world with the fundamental constants individually peculiar only to it, in which we realize ourselves right now, has been, in essence, involved into our Focus Dynamics by indefatigable aspirations and stable deep Conceptions of exactly such individuals, who overcoming enormous opposition and attacks from orthodoxes from science, could convince all others in validity of own position on this issue. Of course, you may be outraged at such categoricity and say that, guided by my statements, one can think that there were zero-gravity on our planet before Newton's gravity law discovery. But I appeal here to the more delicate sense: before the Newton's famous work «Mathematical Principles of Natural Philosophy» edition in 1687, the gravity law was not defined unambiguously in the scientific community, and, correspondingly, the gravity force values significantly fluctuated depending on the environment.

Besides, modern scientists do not take into account subjectivism of the space-time factor at diverse Forms material manifestation in our world. There are many modern fundamental problems known to science (mass, gravitation, relict radiation, and others), over which researchers groups all over the world still struggle in vain. Issiidiology states that there is nothing lifeless in the multidimensionality of our existence, and any object manifested in our world in one way or another (a stone or an ocean, a flower or a bacterium) represents realization of some Self-Consciousnesses Forms jointly implementing creative interests peculiar to them through the given object. And only more or less differing regimes and features of the space-time perception for various objects (and subjects) become an insurmountable obstacle to many scientists on their way of the deep analysis of our world as some — alive! — collective Self-Consciousness Entity.

To understand the principles of some Form Creative Activity, we should realize Potential opportunities for perception regime shift in accordance with unique manifestation conditions of this Form. Only then we will be able at least somehow to understand and formulate the laws of its behavior, functioning, or, in general, realization of Creative Activity typical to it. To then, we observe and analyze objects of the surrounding world from the point of view of exceptionally own — human — subjective Reality, and through tremendous difficulties, extremely inertially, via many starts and stops, delusions, we make arguable and contradictory conclusions about existence laws of all other representatives of the outer world — animals and vegetables, microorganisms and minerals, elementary particles and cosmic objects.

For example, for a long time, research is being conducted on the deep space: black holes, quasars, neutron stars, and, of course, relict radiation, dark matter and energy. What are these phenomena, what are their functions, their activity results, and so on? Who can tell about this? These Self-Consciousnesses Forms have essentially different space-time parameters of own Creative Activity. Meaning, offering the analogy with the human behavior reactions and development degree diversity among all people, various cosmos areas can also manifest themselves very differently in radically differing functioning regimes. But we, with our current Collective Consciousness Configuration, which is extremely confined in the verily human development direction because of the powerful diffuzgent influence of the other Collective Consciousnesses, mess around with cosmic parameters obtained with the help of our telescopes, languish in narrow local quality pit, where all constants and physical parameters of our world look uniform and equal! The most sad is that we ignorantly and overconfidently project the perception of our local-diffuzgent subjective Reality peculiar only to us, people, not only on the other Self-Consciousnesses Forms (which are usually referred to as the lifeless nature), but even on all objects and phenomena of the Cosmos, which surrounds us.

Have you any idea, what is going to happen, when orthodoxes and conservatives from science will safely refocus to the Continuums peculiar to them, and many ingenious persons, which have emerged from the «indigo» generations, will start to consciously «create» and jointly confirm more universal, iissiidiological laws of the surrounding world functioning in our collective Reality? Iissiidiology as interdisciplinary research medium can consolidate all variety of isolated at the moment human psychology development directions and spheres of scientific knowledge on the base of multi-world and different-Qualitative interpretation of formation of Reality surrounding us, providing highly powerful evolutionary impetus both to the whole humankind and to every person individually. If iissiidiological Conceptions become norm of existence at least to 10% of the total world population, all of us in the nearest future will have to refocus collectively to the epoch of the creative-cooperative initiatives, discoveries, which will transform the world around us with an incredible intensity. This will be the epoch of formation and maturation of that human civilization, which will be able in own powerful intellectual-altruistic creative impulse to headily evolve far beyond the limits of our planet.

But let's review the iissiidiological approach in the knowledge transfer used in the Fundamentals. It's noticeable that while communicating with the readers, I have to face periodically the same questions and even complaints on the presentation manner of the iissiidiological information, with which I could not handle by myself for a long time. Certainly, unawareness of the method, with the help of which the author presents the Knowledge to all of us, often leads to internal conflicts, hampers further efforts, causes doubt and obstacles on the way of its deployment. For somebody, the information introduced in the Fundamentals may subjectively look like trivial drafts, where similar themes are scattered throughout different sections and even volumes alternating with data, which are formed as numerous tables, and with life stories, which look secondary, «diverted,» at first sight. Although, what surprises and strikes me, personally, all the time is not the presentation manner itself, but the way author contrives to logically tie all, what does not have in the present notions and conceptions neither names, nor definitions, nor explanations, nor even opportunity to be fixed in the Self-Consciousness somehow abstractly, into a consistent whole.

The readers, who open the first pages of the fourth volume, are already well acquainted with such «spontaneous-situational» descriptions during Iissiidiology information presentation. Though, a person with logical-rational mindset, let alone a researcher, is accustomed to a complex-hierarchical, thoroughly verified structure of a knowledge set forth. But this is just completely absent in Iissiidiology: it reminds a process of slaking thirst with the water from various springs — every sentence has something own, individual, and yet self-reliant by its Essence and depth. Of course, such individual will prefer to work with a completely ordered material, where terminology is introduced successively, and at least, contents is present in the form

of sections, subsections, chapters. Of course, they would like to see descriptions structured on principles of the scientific method: assumption statements, hypotheses formations, ideas and conceptions development on the basis of the laws defined, and eventually — empiric verification for confirmation.

But after deep and extensive learn of the iissiidiological materials, every reader, perforce, will have to think, «Which qualitative levels of own Self-Consciousness are mostly activated and developed due to such method of studying? How important and necessary are our — readers', scientific-pretentious — demands for ability to immerse into this Knowledge, and whether something much more serious and complex, than it first may seem, is hidden behind the Iissiidiology volumes texts, in the way they are presented right now?» Though, even at first «sight,» this unique Knowledge is perceived by the majority of the people as the one, which is absolutely beyond their comprehension and completely outside their intellectual Potential. Therefore, it's much easier for them to critique, ridicule, defame, and badmouth it in every way possible, than to demonstrate to someone own intellectual worthlessness or scientific inconsistency, inability to look at the common things somewhat differently, more deeply.

In «the Iissiidiology Fundamentals,» our Self-Consciousness diffuzgentness and its evolution possibility in many protoformal Directions is described. The path chosen by Iissiidiology is based on cultivation of the steady and powerful Potential in our Self-Consciousness, which is based on such signs as high feeling Intellect and high intellect Altruism. On the basis of exactly these signs complex-synthesized by the special scheme (ALL-Will-of-ALL-Intelligence and ALL-Love-ALL-Wisdom Pure Cosmic Qualities Aspects ampliative manifestations), the other, exceptionally human signs are activated in every person's Self-Consciousness structure — immunitant (unconditional) Responsibility and humanitarian (harmonious) Freedom. But which researcher's psycho-mental states are activated during orthodox scientific method application in the states of scrupulousness and meticulousness, persistence and ambition, and others? Is there some part of Altruism in such manifestations? I will not continue with the answer on this important question, and curious readers will have opportunity to get deep into consideration of our Self-Consciousness diffuzgent different-qualitativeness peculiarities on the pages of Iissiidiology volumes<sup>1</sup>.

All I can say is that the scientific cognition method, in the form, in which it is now, is out of date a long time ago and represents vecsative Qualities Aspects all possible realizations with respect to lluuvvumic method. This method forms creative activity rich palette in near-lluuvvumic, and more often in protoformal development Directions. What is the cognition method proposed by Iissiidiology, and how important and grounded could be complaints of the exacting reader as regards presentation of the material? Undoubtedly, even at first sight, it becomes clear to a thoughtful researcher that something much more substantial has been hidden in this method, than a «huge volume of inconsistently stated text with multiple repetitions.» I have safely passed through many issues already, when all my being raised against such way of presentation. And now I consider necessary to pay readers' attention to exactly this side of the iissiidiological cognition process.

Of course, as a research scientist, I had to change profoundly my usual conceptions about the Knowledge delivery method during in-depth work on Iissiidiology mastering. I had for a long time to calm own prepossession and unappealable demands to the author to structure, put in order, and bring into «digestible» form the text in the books. I've sometimes thought that the considerations, which the author presents as a completely new information again and again, from one section to another, persistently and methodically, with all commitment and unusual nature peculiar to him, are not more than demagogy, idle talk, and devious way to make it look like a global work.

1 In particular, see «the Introduction» to «the Iissiidiology Fundamentals» first volume about intuitive cognition method, and also the third volume, Section X, «Diffuzgentness Principle in formation of Focus Dynamics of Form-Creators of lluuvvumic Synthesis Scheme.

In this situation, as they say, «I have thrown the baby out with the bathwater,» because while concentrating on details and peculiarities of local descriptions, I've managed to overlook total volume of the contents, and more than that, those ideas and beginnings, which are able to progress to entire scientific disciplines in the Knowledge development perspective. Possibly, Iissidiology by itself will not ever become a particular science of some scientific discipline, but, undoubtedly, in my strong view, it will necessarily become intuitive-abstract platform for origination, formation, and becoming of the whole spectrum of completely new human methods and ways of conceiving the world, which will radically accelerate the humankind evolution.

Hence the specifics of materials exposition method, which have considerable divergence of the contents from any previously formed knowledge. You know very well already about iissidiological postulates: multi-world and different-qualitative multi-dimensional existence, Focus Dynamics and refocusing, Self-Consciousness Configurations and dissonational distances between them, which collapse as a result of the synthetic process with Form- and Info-Creators involved, and so on. But how is it possible to describe all this, if people have not at all acquired Conceptions about these notions?

In that regard, on the pages of the volumes the author first of all has methodically and persistently to form a stable basis for the reader from completely new intuitive SFUURMM-Forms differing from all preceding Experience — both practical and theoretical one. And the only way to do this is sort of again to introduce, in essence, the same terms, notions in somewhat varying descriptive surroundings, while investigating with their help both already examined and completely new phenomena and interconnections functioning mechanisms from different points of view.

Let's say, in many topics, Focus Dynamics implementation principles in various form-building processes are examined more or less thoroughly (each time from a new angle), for example: generation of the Macrocosmos given type out of Information Entity, and also many details and specifics of this process run — from informational fragments' skunkktional interaction to Macrocosmos Universal rhythms structuring, plus creative realization mechanisms of Self-Consciousness Form-Creators SFUURMM-Forms via Self-Consciousnesses Forms Form-Creators Focus Dynamics, and all spectrum of refocusing, which define momentary quality of our existence in the world subjectively realized by us.

All these (and many other) notions in their totality generate the united whole, that singularity which subterraneously manifests each time in Self-Consciousnesses Forms Focus Dynamics out of slloogrently structured Energy-Plasma. Yes, all explanations are finally aimed to describe a single multi-dimensional Macrocosmos «point,» in which all parallel and multi-dimensional Universes exist. How will the reader get all necessary conceptions stock for comfort and pleasant learning of this Knowledge? No, apparently, this will not ever happen! The new Conceptions forming this new Knowledge platform penetrate and hold on in our Self-Consciousnesses with great difficulty, and nobody knows, how many persistent attempts, time, and efforts the reader will require to master them. This fact repeatedly justifies the materials presentation specifics faced by the reader.

Iissidiology is the practical Knowledge actively and fruitfully using intuitively oriented cognition method, which requires thorough acquisition of practical skills and abilities. Our high ampliative feelings and thoughts being left to their course without any control rarely give positive, fruitful results in the scientific investigation process. Avoiding such things in respect of Iissidiology, it has been created simultaneously as the source of high intuitive authentic Knowledge, and as the practical training of the reader's sensuous-mental abilities. If it was only a descriptive reference guide with a lot of phenomena and mechanisms definitions, it would suffer the fate of dust collector on the tables of exceptionally devoted adepts.

That is why this Knowledge is presented by the author in the way of peculiar intellectual provocation exciting the readers aspired to intuitive knowledge heights with the opportunity to cognize and understand it despite of all its infinite complicity and speculative abstractness. And this titanic work on «not representable conceptions» formation is compensated by, first of all, opportunity not only to activate effectively own human qualities, but also to learn to rely more surely and consciously on own intuition. If to compare iissiidiological approach with academic approach to teaching and tuition, these books will represent simultaneously a textbook and a book of problems, and reports on Iissiidiology will be both lectures and practical trainings.

I stress once again: to successfully manage this Knowledge, many interconnected descriptive approaches to various notions, phenomena, and processes are required in order to activate intuitive perception Levels in Self-Consciousness. In the way this Knowledge is presented at the moment, it has the «subtle» structure of intuitive-sensuous description forming the system of characteristics of these or those Conceptions indirectly complementing each other. Their task is «to compel» the reader in any way to start concentrate on the process of deep comprehension of every sentence meaning in thorough detail (otherwise, they will not understand a thing), to force them to form in Self-Consciousness, individually own system of high-sensuous images, and in such way successively to create platform for integral perception of all life phenomena on the completely new multipolarizational different-qualitative many-world base.

In the presentation of materials, stages are formed of many separate details growth of every particular iissiidiological Conception among their entire set. These stages look intuitively like informational waves, which approach periodically as run-ups, one after another, generating complementary explanations of the same phenomena on the more and more deepening levels of intuitive Perception. Thus, by means of associative images examined multiple times and in detail in conjunction with many other Conceptions, «the spin up» of high feeling Self-Consciousness constituent gradually occurs. As a result, the reader's mental restructuration of outmoded clichés and stereotypes of the surrounding reality perception occurs under pressure of mutually exclusive judgements expressly jointed to united, outwardly inconsistently organized concept.

With this approach of presentation, in the first Iissiidiology volumes, the basis for the future method of «percolational<sup>2</sup> explanations» is laid. These are the Essence of any Knowledge in the more qualitative versions of our future. Necessity in such specific and unusual information presentation mechanism arises naturally — because of abstractness and nonlocality of any Conceptions, in particular, physical parameters, constants, and elementary particles (as the materiality basis of our substantial world).

In such method, any intelligible point of view, in principle, will be correct and at the same time will be misinterpreting the actual course of events, any statement will have the right to existence and at the same time will confuse, mislead to the wrong way of phenomena comprehension. The secret is that the purpose of percolational method is not explanation of deeply conceived postulates, discovered laws, and behavior mechanisms of physical (chemical, biological, psycho-mental) systems, but achievement in the researcher's Self-Consciousness of specific high altruistic intellectual states, due to which acquisitions they become capable of independent, individual generation and active deployment in own subjective Reality of own subjective postulates, laws, behavior mechanisms, and so on.

Any Knowledge, according to Iissiidiology, is self-conscious Entity along with Time and Space Entities. Thus, all physical parameters, systems behavior laws, and others are liable to changes due to transformation (Creative Activity) of not only Space-Time, but also Entities mentally structuring every its part, which present and support diverse Knowledge systems in various Worlds.

2 From lat. percōlāre — percolate, filter.

But so far, we, scientists, researchers of many different areas of life activity work with Knowledge as with some frozen, solid lump (in this connection, I recall high-rise buildings of book repositories in central libraries of various countries). Only a few lone researchers have enough courage, spirit, and persistence to try to disprove postulates and laws, thereby activating, reviving some Aspects of the Knowledge Entities in Self-Consciousness, which structure more developed versions of our civilization. Knowledge Aspects — like attractors — not only exist in complex attachment to Configurations of own carriers, but live their own, though completely unclear to us Life. But we make some conclusions on these Aspects «reactions» by their sort of «comatose state.»

To us, The Knowledge Aspects are the Entities «in coma.» To revive them, to awaken keen and sincere interest in researchers' Self-Consciousness, trust to the fact that scientific postulates and laws are not a certainty, which subdues our world, but exclusively proposition of the particular Entities in the slloogrent Self-Consciousness structures to the Form of joint Cooperation with subjective reality of the humankind's Collective Consciousness, with which we temporarily agree — this is the task of iissiidiological percolational explanations for the scientific method development in the near future.

With the current status of the science and that enormous strength of dogmatism, which has been so ingrained in the minds of many orthodox researchers, it is, of course, difficult to get through to their perception with the hope of adequate assessment of these ideas. It is difficult to find arguments, because the scientific method is still considered the only right: after all, spaceships take to the space, nuclear power plants produce energy, and even the long-predicted «God's particle» is already caught at the Large Hadron Collider. But one should not forget the truth ignored by everybody: we see what we want to see!

Yes, scientific method is based, in particular, on the results reproducibility, and, to recently, this criterion was dominating in validation of any newly appearing Knowledge. Though, the time will soon come, when results reproducibility at the basic physical parameters measurement will be violated, which will lead to the massive generation of completely new ideas and discoveries. One should not intensively dig out to the reasons of these violations: the Self-Consciousness Focus Dynamics itself is the first reason of the changes appearance in the experimental results. Psycho-mental activity of the researchers and other participants of the experiment (do not forget that any Form in our world has Self-Consciousness!) is predetermining for its results.

Many researchers, who are often not recognized by official science, already come to these conclusions by their own ways. It is worth remembering the author of «The wave genome theory» P. Garyaev, the Energy Catalyzer creator A. Rossi, and many others, who was not afraid of enriching their knowledge base beyond the limits of generally accepted scientific dogmas. Thereby, they have formed new, bold ideas in own subjective reality, which provide humankind amplifical evolution.

Iissiidiology as intuitive-abstract platform for the newest scientific ways of cognition of the surrounding world is a vital system, which brings together any person's creative endeavors in human community. It is intended not only for intuitive-sensuous «injection» of the newest ideas and developments, but also for the total integration of all cognition directions to the Humankind lluuuvvumic Future.

**I truly wish everyone creative successes in Iissiidiology study!**

## *From Plan-Overtones of Fields-Consciousnesses to Form-Types of collective subjective Realities*

### **Chapter 1. The skrruullerrt system interstitial states between USIP-Initiation of Information and Its confectusness**

4.0001. The principle of holochrone-simultaneous exhibition of all Self-Consciousnesses Forms and CCIs in all possible regimes of Space-Time is based on absolute interconnection among each of focal-ethereal combinations structuring them and infinite amount of the rest energy-informational constructions objectively originated at mercavgnation. By these interconnections, Form-Creators (F-Cs) and Info-Creators (I-Cs) from not only our, but all other humanational types of Macrocosmos construct jointly the general slloogrent focal Configuration of consummative (exhibited, postmercavgnational) Process which represents all the creative (refocusing) basis of simultaneous Existence of SSS-Entity's Self-Consciousness.

4.0002. In its turn, absolute holochrone implementation of that subjective Process (instantly in all types of Macrocosmos: humanational as well as propriusal) provides, among skunkktions of reconverstive Configurations of all SSS-fragments, implementation of the universal State of *transmittation* — transition from the interstitial-amitsissimal SSS-State (conditional subjective discreteness of focal-ethereal interconnections of the Macrocosmos considered by us in relation to all other types) to the primogenitive State (an objectively totally balanced State excluding participation of a conditional subjective Observer's Focus Dynamics). The primogenitive State allows Information (through the *modificationnal supplerization* Act) to gain an absolute — *confective* — State initiated by Creative Activity of the United Superuniversal Impulse-Potential (USIP).

4.0003. In the previous «Fundamentals» volumes, there was a detailed report on how a specific Informational State (Self-Consciousness of the SSS-Entity) was emerged from skunkktional interconnections among all SSS-fragments of Information — in accordance with the Principles of Resonationness, Sllougretness, Diffuzgentness, and others. It became a single universal basis for exhiberation of All That we subjectively determine as Energy-Plasma or «Everything Being.» Naturally, each of you would have a question after deep cognition of all read before, «How and what from was Information emerged?» To realize the answer, you need not only all your Imagination, but also all your Intuition. I hope, you have already managed to activate it sufficiently and to increase it owing to persistent cognition of highly complicated SFUURMM-Forms of the iissiidiological Knowledge.

4.0004. Well, let's examine this question sequentially, from the very «Beginning.» The source of holochrone activation of Information — in a form of reconverstive Configurations of all SSS-fragments — is the United Superuniversal Impulse Potential or shortly — USIP. As for Its Origination, I can say one thing: «It» represents the amount of absolutely all opportunities of potential creative manifestation for All That we consider as Information. «It» is sort of «internal,» internous Mechanism of Informational exhiberation in all possible conditions, through the infinite multitude of Informational peculiarities, properties, and attributes, which manifest differently throughout all the diversity of regimes spectrum originated by Information.

4.0005. In relation to every *informational* state, we can compare USIP conditionally with The invizusal Reason Which prompts any phenomenon to be performed in its characteristic order, any cosmic object (Planet, Star, Galaxy) to move with certain speed and on the course corresponding only to it. USIP is the «internal» Superuniversal Mechanism of Information, Its Root Cause, absolute Law of Its total holochrone manifestation and simultaneous reflection in Itself and through Itself. The USIP is the absolute Potential for any — objective and subjective — Creative Activity. In the State of holochrone-simultaneous exhiberation of Everything Being (all Macrocosmoses' types), this Activity is initiated as all the diversity of Universal Cosmic Laws and infinite multitude of Principles originated by Them in various conditions of exhiberation!

4.0006. Sorry for tautology: potentially, USIP is *as if* «structured» with an infinite amount of Its own different-Qualitative varieties which do not differ from each other (since they are sort of non-existent!) before the Act of Its own internous Initiation. There they do not stand out at the general «point» of Its singularity and represent, in their harmonious aggregate, some *immensus respectuality* — a State of potential unboundedness regardless of anything (since there is nothing at all outside the USIP activity — neither Information, nor Its manifestation Forms) with an opportunity of «observation» and «taking into consideration» (by the USIP Itself) of separate states of that absolute Infinity. The USIP-Initiation Act Itself is caused by the presence in It of a subterransive «Launch mechanism» which facilitates all Its potential creative diversity to self-transform holochronely to an infinite multitude of *differently functional* and very tightly connected Impulse-Potentials. From their common Creative Activity, there appears the entire depiction of some *required* (for the given Initiation!) *confectusness*, which is absolute Completeness, absolute Closure of All that is potentially peculiar to the USIP Itself.

4.0007. The USIP-Initiation Mechanism Itself is extremely complicated. The Reasons for Its origination are totally beyond our understanding. Conditionally and schematically, it can be compared maybe with the function which regulates the necessity of getting breath by lungs after exhale (medulla — breath center — special mass of neuron cells in pons Varoli in brainstem and in betweenbrain — spinal nerves — breathing muscles). That means, when the breath center is aroused (the part of inhale), neural impulses move to spinal cord, and then, along nerves, move to breathing muscles while causing their contraction. As the result, there is expanding of thorax — inhale phase. The interruption of impulses' transfer from the breath center (at inhibition of the inhale phase) to spinal cord (and then to breath muscles) is accompanied with these muscles relaxation: as a result, thorax relaxes allowing automatically the exhale phase. At the breath center there is alternative change of states of arousing and inhibition — rhythmic alternations of inhale and exhale phases.

4.0008. For deep comprehension of this process, we have to study very carefully the human organism, as well as many other its functions. In the case of USIP, I have no opportunity for Its exploration. Since It is connected neither with Space, nor with Time anyhow, so it is impossible to say whether It has a cyclic nature, or It is manifested «at once.» Its Main Purpose (to Itself) is to reflect maximally, within Itself, all the diversity of results of Its own properties and features which are manifested through *the Information emerged by It* (as a consuyetal Consequence of Its holochrone Creative Effort). They would demonstrate to It, significantly and clearly, absolutely all Its Creative Potential — the confectus («the most superior») Sense of USIP.

4.0009. The entire depiction of that confectusness, which has been «projected» on general creative opportunities of all the multitude of holochronely initiated Impulse-Potentials, is reflected through their «internal» Mechanisms as a specific *Confective State* — some holistic «Image,» Superuniversal «Idea» which main characteristic is the absolute extent of Creative Harmony among all Impulse-Potentials due to all diversity of States of Information *being emerged at the same time*. To implement that Harmony into absolutely sustainable (for the given USIP-Initiation!) Confective State, the special «environment» is required, by means of universal properties of which all the Impulse-Potentials could jointly perform a Creation peculiar to each of them.

4.0010. Information (SSS) serves as such «environment.» It is «generated» during every interaction of Impulse-Potentials among each other. Since an infinite multitude of holochrone *different-impulse* interactions has happened *simultaneously*; therefore, it turns out consuyetally that Information Itself has been structured with the same infinite multitude of reconverstive (inseparable and interrelated with each other) Configurations which we call SSS-fragments. Indeed, *every inter-impulse interaction emerged a separate Informational fragment*, what served as the main Reason for «initial» presence in It of such qualitative heterogeneity and internous variety.

4.0011. To emerge the «creative self-realization environment» peculiar to Them, each of the infinite multitude of Impulse-Potentials (IP) interact holochronely-multipolarizationally *with each* of the rest IPs thereby, in every particular case of such cooperation, creating some conditions (with totally *extraordinary* opportunities) of appearance of specific informational r-Configurations (reconverstive Configurations). For example, naturally initiated state of Creative Activity between the irrkoglective and eglleroliftive Impulse-Potentials supports origination, in the general USIP-

confectusness, of only that part of informational «environment» which «aftermath» (during the Process of universal consummatization of focal-ethereal interconnections) carries out peculiar only to it, creative capabilities and diffuzgent interactions with other covarllert IPs and which is qualitatively transformed to a specific informational combination that we determine subjectively as «our Macrocosmos's type.»

4.0012. This can be relatively compared with such phenomenon well-known to you as origination of some degree of «materiality» (lightning and thunder) when different charges carriers interact among each other. Besides, lightnings vary by thermal and baric, as well as other parameters unavailable for our measurement in every place of their visible appearance. About as much as at interacting of various IPs in the area of their Creative Activity, a specific realizational «environment» (some part of common Universal Information) was emerged *as if from nothing* (from «the difference» in properties and capabilities). All r-Configurations of that «environment» have their own characteristics.

4.0013. Those subterransive peculiarities (as of USIP Itself, as of Information emerged by all Its «parts») incline all SSS-fragments (structuring some particular «part» without reconciliation of each of them with any «place» in objective informational space), firstly, to interaction with each other (by the degree of similarity, likeness of r-Configurations), and then to corresponding reactions also with those Informational fragments which were originated by the multitude of other IP-combinations — as interconnections have been established more or less impersept (or cruvursorrt) to this interaction. Since Initiation of all variety of Impulse-Potentials was carried out holochronely, so, along with irrkoglective-eglleroliftive «discharge» (in our Macrocosmos's type), all remaining Impulse-Potentials got involved into natural interactions with each other. This way, they produced an infinite variety of other «parts» which structure jointly all the realizational «environment» (the holistic Information).

4.0014. Having implemented their natural primary interaction and having initiated Their own type of realizational Information, all Impulse-Potentials get engaged with each other into more global combinations immediately (by features of qualitative correspondence and functional likeness). In the USIP-environment, they perform new informational variations which are different from «the previous» ones and which facilitate to deeper development of their realizational capabilities. That fact is what explains the endless diversity of emerged SSS-fragments: inside the common realizational «environment,» all inter-impulse interactions initiated qualitative characteristics of reconverstive Configurations, more or less different from each other. Those r-Configurations became the basis for holochrone manifestation of unified properties of twelve fundamental types of Information which we have interpreted conditionally as the 12 Pure Cosmic Qualities.

4.0015. You must understand and imagine thoroughly that, in emergence of each of the 12 conditional types of the Pure Cosmic Qualities, there is active involvement of potential features not only of some certain Impulse-Potentials, but of absolutely all (!) Their varieties. To the certain degree, each of them has «projected,» to each reconverstive Configuration, some analog of an attribute peculiar namely to the given IP-variety. So, among actively interacting heterogeneous SSS-fragments, there is no quite obvious and significant difference, *as we are able to imagine*. Every heterogeneity of reconverstive Configurations is represented, before all, by those *potential* differences which have been created not by the SSS-fragments by themselves, but by all the infinite multitude of microstral

and inter-skunkktional interconnections structuring each of them. The slightest discrepancy in them causes a certain degree of «heterogeneity» of the given r-Configuration in relation to the remaining r-Configurations.

4.0016. Neither in the primogenitive, nor, moreover, in the confective State of Information, the existent qualitative heterogeneity inside all the diversity of SSS-fragments is able to be expressed in any way. It is impossible, firstly, due to absence of subjective Observer who could be able to identify it; secondly, because of presence, inside *every* inter-skunkktional interconnection, of a balanced state and harmony with all multitude of other SSS-attributes (even regardless of the presence, in the primogenitive State, of some impersept and cruvursorrt «local areas» which do not allow Information to liyllusceevate finally — to «merge» over absolutely all inter-skunkktional interconnections; that is the main Reason for emergence of mercavgnation Act).

4.0017. Qualitative «division» and subjective identifying (localization, parting) of anything specific (slightly more specific than the rest available to Perception exactly in the given exhiberation conditions) from subterransive peculiarities of each PCQ can be implemented just in the Perception system of a subjective Observer — at the exact moment of direct localization of his/her Focus Dynamics in some kinds of Self-Consciousnesses Forms, in some kinds of focal-ethereal combinations which were made with many heterogeneous SSS-fragments structuring various PCQs types. Such «division» is caused by lack of liyllusceeve interconnections in the FD of every Observer. Those interconnections are consuyetally formed in other exhiberation conditions and have been *already* gabitually peculiar to the confective SSS-State.

4.0018. Inside of the r-Configurations of each of the twelve conditional PCQs (by means of all variety of inter-skunkktional interconnections), depending on a type of their initiation during the mercavgnation Act and on their implementation in the Process of consummatization (by various IPs combinations), *analogous* properties are always potentially used which are peculiar for skunkktional interconnections of SSS-fragments of the *other* PCQs. This is about the same as the presence of many synonyms in our speech, which allow to express the same sense by means of various words. The basic role in implementation of these «replacing» functions in a skunkktional structure of each reconverstive Configuration is played by already known to you, system of *microstrs* which structure every skunkktion of every reconverstive Configuration. These are exactly they which, inside of every SSS-fragment, «switch on» (activate on the general background of creative realization, depending on the type of influence on microstrs by some Impulse-Potentials) only the inter-skunkktional interconnections mostly corresponding to exactly the given type of IP-influence.

4.0019. For us, it is very important to comprehend that, meanwhile, the remaining part of that intra-reconverstive activity can be manifested holochronely through all diversity of other types of IP-Initiations, meaning, participate in formation of other types of SSS-combinations, which functionally provide the Mechanisms of simultaneous exhiberation of absolutely all Macrocosmoses' types. Namely this peculiarity of r-Configurations of Information conditions the appearance of the Universal Principle of Sllougrentness inside each of Its focal-ethereal combinations. The Sense of the Principle consists in the following. Whatever Informational particle, which structures Self-Consciousness of SSS-Entity, is examined by us subjectively, we always, by means of regular qualitative deepening into

its peculiar interconnections (and concurrent extension of the spectrum of our observation), have a potential opportunity to come by our own FD to any *other* informational combinations characteristic for *other* focal Configurations (Self-Consciousnesses Forms) and *other* exiberation regimes.

4.0020. So, all multitude of internous USIP-varieties, having got involved into *simplectic* (natural, initial, conditioned on subterransive features of the sides) interactions with each other, initiate for holochrone manifestation (inside some *conditional* realizational USIP-environment) the entire diversified content of reconverstive Configurations of SSS-fragments (Information in Itself) which, by means of their own universal inter-skunkktional interconnections, produced (again, inside the same USIP-environment) absolutely balanced (among all the infinite diversity of Impulse-Potentials!) State. The latter is subjectively interpreted by us as «the primogenitive State of Information.» Because the interactions among Impulse-Potentials cannot be either considered or qualitatively evaluated by us anyhow, we relate our FD to obvious to us, results of those interactions — to informational combinations.

4.0021. Well, there we could finish consideration of the implementation process of the timeless «Act» of expansion of Informational USIP-Initiation. I could describe literally just in one paragraph the Act of «merging» of all reconverstive interconnections of the harmonized primogenitive State to the confective One (standard, absolute One for the given USIP-State). But then, we would not be able to consider the diversified structure of the originated Information because this would require any subjective Observer. Being performed in such logic-analytic process, he would inevitably have to associate himself to any certain part of that Information (meaning, to the part which structures our Macrocosmos's type). Inevitably, it comes to as if *subjective* «division» (but only within his Self-Consciousness!) of the whole depiction of primogenitive interconnections into two parts: one that involves him and another that serves as an object of his subterransive consideration.

4.0022. In the mercavgnation Moment, the necessity of appearance of some relative Observer in the primogenitive State became the main reason for origination of such subjective iissiidiological notion as the *amitsissimal* State of Information. This term means that an Act of some certain IP-mercavgnation (in our case, it is irrkoglective-eglleroliftive) *as if* «divides» (considering us as Observers!) the general primogenitive «depiction,» which contains mutually balancing connections inherent to *absolutely all types of Macrocosmoses*, into two holochrone, but *as if* different SSS-States: one has been already completely harmonized (from the standpoint of the State of USIP-environment) and another has been still on some stage of simultaneous Process of harmonization — a *consummative* State (from the standpoint of the Focus Dynamics of a subjective Observer who is able to examine the general Informational State exclusively by means of qualitative interstitial Form-structures of its surrounding reality).

4.0023. As soon as the consummative Process of self-development of Focus Dynamics of an Observer finishes (the State of consummatization — the highest degree of exiberation of Focus Dynamics of all Highest Collegial Cosmic Intelligences — is reached holochronely throughout all Macrocosmoses' types), all types of inter-skunkktional interconnections immediately «merge» by their own features into the whole universal ethereal Configuration (e-Configuration) what precludes any possibility of the presence of a conditional Observer (now, all USIP-environment is manifested

instead of Him). That means that his imaginary amitsissimal State of conditional «division» (to the primogenitive and consummative parts) also disappears from the general «depiction» of Information. After all the Impulse-Potentials are completely executed, the primogenitive State becomes confective naturally thereby completing the Act of the given USIP-Initiation. It does not make any sense to speak of any regularity or systematization of appearance of similar Acts because they are not related to any temporal characteristics.

**4.0024.** This is about the general depiction of noo-time «appearance» of that realizational «environment» of the United Superuniversal Impulse Potential which we subjectively determine as «Information.» The further «cycle» of any temporal perturbations of Its heterogeneous properties and features (by means of Self-Consciousness of the SSS-Entity, by means of Energy-Plasma, UPDR, USCF, Space and Time) has been described already in the previous volumes quite enough. Now, we are trying to puzzle out the Focus Dynamics qualitative transformations which are peculiar to the most primitive and simple stages of implementation of the current cycle in specific conditions of the lowest dimension diapasons of our Macrocosmos. For us as for subjective Observers who structure, with Focus Dynamics of our Self-Consciousnesses Forms, the current exuberation diapason, the first, most interesting thing is the question about the duration of our subterraneous existence. It goes back inevitably to opportunities for destroying, demolition, and resurrection of Forms used by each of us — it is the question about the degree of their survivability and conditional invulnerability.

**4.0025.** In this regard, based on the huge Experience which has been acquired in the profound Meditations for many years, I can approve with complete confidence that the Mechanism of Focus Dynamics exuberation to an f-Configuration of every Self-Consciousness Form (that Mechanism is reflected through the Universal Principles of Resonance, Slogrentness, Diffuzgentness, Multipolarization and the like) provides Its Form-Creators (actually — «you»!) with the cognition of absolute continuity of their («your») Existence as subjective Observers of the surrounding reality who consistently self-develop at subterraneous refocusing from one kind of Self-Consciousnesses Forms to the others. In the universal conditions of holochrone-simultaneous implementation of that amitsirational Process never-ending even for the shortest moment, there is literally not a single opportunity for objective manifestation, on every stage of your infinite Being, of those obsolete Conceptions which you interpret now extremely subjectively as «Death,» «absolute destruction,» «absolute demolition,» or «final disappearance» of any Self-Consciousness Form from the Form-structures of our surrounding reality — be it a boson, a fermion, a man, a Planet, a Star, or even a whole Galaxy.

**4.0026.** Any of similar Conceptions about someone's «Death» is far-fetched by you (as a result of observation and analysis of intermediate states, which are perceived by you as final termination of vital processes). In the FD of Collective Consciousness of «the modern» humankind, it reflects total lack of more credible evidences and knowledge about the energy-informational structure and Principles of Formation of all multitude of different-Qualitative Universes and Macrocosmos as a whole. The crucial role in the process of deep rooting of similar Conceptions of all people for many thousands years is played by heavy limitation of cognitive skills and distinctive abilities. That limitation is inherent in bio-Creators of the biological Perception systems of still very primitive (yet more protoformal than lluvvumic) mixtum analogs of NUU-VVU- Form-Types.

4.0027. Absolutely all different-Qualitative focal-ethereal combinations of all possible Fields-Consciousnesses (Form-Creators and Info-Creators) at every «point» of performance of their holochrone-simultaneous interactions (throughout the absolute infiniteness of exuberation of all Plasmic Forces Diapasons of Macrocosmos) are perfectly and harmoniously — *already* «initially» and «always objectively» — balanced with each other! Yet, everything, which might be interpreted as «Death,» «destruction,» or «disappearance» of anything (due to heavy limitation of their FDs) from the standpoint of Form-Creators of some of depliative Perception Levels, represents just an instant interstitial state of continuous qualitative transformation of Focus Dynamics. The latter is characteristic for many Processes balancing each other when some qualitative combination is transmuted by quite natural and regular means — as the result of a partially implemented Interest — from one intermediate state to some another qualitative state (again, not to a definitive state, but only to an interstitial state!).

4.0028. This allows the Focus Dynamics of Form-Creators of any Self-Consciousness Form to be actively tied permanently and continuously (meaning, to self-realize subterraneously as any Self-Consciousness Form) with a certain focal-ethereal localization (Focus of Close Attention) inside any of already existent particles of the slloogrent focal Configuration. This way, any Self-Consciousness Form — in its own *realizational* Essence, being reflected through its FD at every moment of its exuberation (subjective self-realization as «itself») — is *fundamentally indestructible*, meaning, *always multipolarizationally performed* throughout many groups of STCs by means of all infinite multitude of realizational opportunities which are chosen subjectively (resonationally) by its Form-Creators as consecutive satisfaction of its own creative Interests occurs.

4.0029. Having been reliably provided with continuous manifestation of the Principles of Resonationness, Slloogrentness, Diffuzgentness, and Multipolarization, the Focus Dynamics of Form-Creators of each Self-Consciousness Form always possesses the opportunity constantly and without any limits (simultaneously-multipolarizationally) to change some — already implemented — exuberation regimes for other realizational conditions which are not carried out subjectively yet by Form-Creators. In other words, at a regular «change» of a Form already used by the Focus Dynamics within the given rotational Shift (I remind that, in the Perception systems of mixtum Forms, there are 250–400 Shifts per *every second* depending on the qualitative state of FD), Form-Creators of every Self-Consciousness Form immediately obtain a wide range of opportunities for temporary «consolidation» (self-identification) inside a regular particle of own slloogrent f-Configuration in order to continue the earlier process of implementation of Their «current» Interest (in one of many already existent options).

4.0030. This way, the endless Process of regular amitsirations of Form-Creators from one kind of Self-Consciousnesses Forms to other Forms happens naturally in Space-Time. This is the Process of subterraneous *Formation*, peculiar to the Focus Dynamics of heterogeneous Form-Creators. Owing to all that, within our Perception systems, there is sequential reflection of all multitude of interconnections (characteristic for the Process) which structure in detail the Illusion of so-called «*subjective Existence*» of all Forms of Collective Cosmic Intelligences. In its turn, the presence of this permanent Process supports all the most complex exuberational functions which specifically refract through SFUURMM-Forms of our Focus Dynamics and our Perception systems peculiarities and which we interpret as Space-Time.

4.0031. In the Perception system of a subjective Observer (whose FD is performed in conditions of the Tertiary Illusion), a sense (experience) of some «duration» (but not holochronness) of every appearing in that Process, transitional, intermediate states represents a result of presence of definite parameters of dissonational distance among SFUURMM-Forms of Focus Dynamics of his «current» f-Configuration and his more ampliative f-Configuration. These parameters were originated at the mercavgnation «Moment» as a result of differentiating influence — on the Form-Creators of his Self-Consciousness — of a phenomenon of «inertial refraction» of Information perceived by Them about the surrounding reality which transforms many times and too quickly (for the bio-Creators of an Observer's brain) as the result of «unpacking» of slloogrent SFUURMM-Forms structuring continuous Series of subterransive rotational Shifts.

4.0032. Meanwhile, the more ampliative f-Configurations are simultaneously implemented through mixtum (or even dimidiomittense!) Self-Consciousnesses Forms from more qualitative development scenarios; obeying to specific inertial peculiarities of the given subjective Reality, SFUURMM-Forms Configurations of their Focus Dynamics are AS IF consistently fragmented («divided,» diversified) by Form-Creators of Perception systems of the depliative «personalized» Interpretations into the multitude of very similar particles (like during time-lapse movie playback) each of which is «multiplied» again into more particular (subjectively separate) SFUURMM-Forms. The more ampliative Essence of such particles becomes incomprehensible and inaccessible totally for an Observer on the given Perception level. It all occurs within narrow-specific Form-structures of the brain bio-Creators which perceive and decode these informational microprocesses.

4.0033. This process of quality loss during subterransive «unpackings» resembles somehow distorting manipulation of a holographic image: the more times we cut one and the same hologram, the less and less clean (at a smaller resolution) same images of it we can take. Likewise, the SFUURMM-Form of unconditional Love would transform into primitive sexual affection, for example, at its regular qualitative fragmentation («splitting» of all its amplificational content into simpler Conceptions by means of deprivation its ethereal Configuration of the most covarllert interconnections).

4.0034. If you could follow — «by frame» and multilaterally (on the atomic level), just as I do — the process of flame appearance from a match head heated by means of friction on a box surface, you would understand better, how one sort of existential Forms (for example, wood, potassium chlorate, and antimony sulphide), interacting with other Forms (particularly, with red phosphor and manganese oxide), provide the exhiberation process of totally different Forms of manifestation during the process of focal-ethereal interactions (here — during thermochemical reactions). Although, you might consider quite rightly that something (a match) disappears, and something another (light, warm) appears. Actually, the general slloogrent Focus Dynamics of each of processes, simultaneously carried out by Form-Creators of all Self-Consciousnesses Forms in the world around you, is «originally fixated» to the last detail at each of Levels of their creative interactions all over an infinite multitude of their all possible manifestation versions interpreting, complementing, and interchanging somehow each other in various conditions of exhiberation.

4.0035. In the above mentioned example, if we take the process of a match's conditions changing as a basis for consideration, we can see that all versions, where the match has burnt completely, are

balanced by the infinite multitude of simultaneous manifestation of qualitatively different versions in many other scenarios of our development. For example, there are versions where it was not necessary to burn the flame, and the match stayed solid; or where it was not possible to fire the match, or where it fired and extinguished in the same moment — and so forth all over the diversity of opportunities for completion of this case. The most significant conclusion from this consideration is the following: Whatever happens with the match in any of its «tragic» scenarios, there are ALWAYS lots of options existing concurrently where events turn in the way that the match remains whole and intact for much longer periods of its existence. Besides, its structuring Form-Creators of atomic and molecular Self-Consciousnesses Forms continue self-realization not to the match's direct function (as the fire source), but to some different — not thermochemical — focal-ethereal interconnections (for example, in order to create a little match house or to gain some other practical aims).

4.0036. After describing this example, question arises naturally that *each* of all number of Self-Consciousnesses Forms, who self-realize simultaneously by means of multipolarization of their common Focus Dynamics, possibly possesses some functional peculiarities (original realizational predestination). Likewise, there are species, which are born with initially programmed functions in their Self-Consciousness within the Collective Consciousness of ants from one anthill («soldiers,» «cleaners,» «providers,» «orderlies,» «builders,» and so on), so, among all multitude of Form-Types generated by the slloogrent FD of one Stereo-Form and transgressed simultaneously to diverse «points» in Space-Time (both historically and geographically), there are Form-Types which tend genetically to performance of *various* socially significant functions within Collective Consciousness of each collective subjective Reality (CSR). For example, some Form-Creators tend to leadership, others tend to methodology and promptness, third ones tend to philosophy and thinking, the fourth ones tend to initiative and activity, the fifth ones tend to sensual manifestations, and so forth. After some Interests are implemented in some functional Form-Types, there is consistent transformation of the FD into functionally different f-Configurations, depending on the tendencies structuring the process of subterransive amitsiration.

4.0037. Here a question might arise: Why the state of *visible* safety of any Form is more valuable and more prerogative than any of its following — invisible and not perceived by you anyhow — qualitative diversifications and ampliative perturbations? Does the state of integrity and safety of the match, considered by us, represent the true purpose of its structuring Form-Creators of atomic or fermion Self-Consciousnesses Forms which reflect mostly the realizational Essence of various CCIs' types? Indeed, the main sense of their Existence in the given match's Form lies namely in comprehensive realization of creative interactions with all amount of other Form-Creators Who are able to interact with each other at different levels through this Form.

4.0038. That is why a Form of any match (as well as of us and every object from our surrounding reality) subjectively never remains whole and intact for good. Owing to various objective circumstances and reasons, sometimes it performs its main functions and predestination, the amplificational Essence of which consists in full realization by means of the given f-Configuration of creative Potential «initially» put into it (not only as the fire source, but also for many other purposes). That diversification process is amplificationally inevitable and required since this realization itself represents, through all the multitude of different-Qualitative Self-Consciousnesses Forms, the necessary qualitative basis for organization even more ampliative focal-ethereal interconnections (which structure even more

qualitative Levels of their simultaneous exuberation) by Form-Creators of every Self-Consciousness Form.

4.0039. Exactly in this way, in the skrruullerrt system of Macrocosmos — by means of multipolarizational attributes of all types of slloogrent Focus Dynamics — there appears the persistent subjective rotation (replacement) of realizational functions of Form-Creators of all amount of depliative Self-Consciousnesses Forms (with less covarllert interconnections for the given Synthesis Scheme or birvulyarity type) into the whole multitude of f-Configurations of more ampliative Self-Consciousnesses Forms. This continuous-multipolarizational replacement of some Forms with the others — changing less qualitative for more qualitative — is the deepest Sense of the convergent Process of concatenational consummatization of focal-ethereal interconnections among different-level Form-Creators and bringing their qualitative parameters to the perfect ones (by means of eglleroliftive Amplification of the Form-Creators' FDs of all Macrocosmos's CCIs).

4.0040. Owing to those amplificational tendencies, which are peculiar to each of simultaneously formed types of Macrocosmos, definite super-improvements inside the primogenitive SSS-State occur holochronely: the Self-development in each of an infinite multitude of diverse Macrocosmoses comes to more harmonious redistribution of inter-skunkktional interconnections «inside» all the «capacity» of Information emerged at USIP-Initiation. That holochrone «Process» takes place «to» the primogenitive State absolutely meets those qualitative «super-parameters» and «super-criteria» which are reflected in its «Idea» (a completely ready «Project») represented as the confective USIP-State.

4.0041. As soon as interconnections among reconverstive Configurations are aligned with their potential confectiveness, the *modificationnal supplerization* or qualitative «merging» occurs of What «has been» before the USIP-Initiation (a relatively depliative SSS-State) with What «has been made» (a relatively ampliative SSS-State) as the result of the amitsissimal State. As a consequence of that improving supplerization, the primogenitive SSS-State is consuyetally transformed into the confective USIP-State. That means that Information Itself and everything connected with It disappear, completely self-annihilate being transformed into a specific Superuniversal Experience — actually, the United Superuniversal Impulse Potential remains along with the Self-initiation Mechanism inherent in It.

4.0042. The all-inclusive Process of svilgs-spherationally ordered consummatization of Focus Dynamics of all Self-Consciousnesses Forms is *holochronely-simultaneously* implemented immediately in all Form-systems which structure absolutely all Plasmic Forces Diapasons of Macrocosmos. It is one more reminder to you that all the infinite diversity of various Universes, along with Worlds created inside them and types of Collective Cosmic Intelligences, represent *the objectively holistic* Process, which is absolutely synchronous inside its supporting slloogrent Focus Dynamics and which is simultaneously implemented throughout all infinite realizational versions of different-Qualitative harmonious Synthesis. Likewise, each of active creative parts of that Synthesis is completely balanced — simultaneously and harmoniously — in all infiniteness of all possible realizational options of its own slloogrent focal-ethereal interconnections.

4.0043. Every sign of «division» of that all-embracing Unity into particular and «subterraneously separated» pieces can appear to more or less degree only in subjective Perception systems of each

of Self-Consciousnesses Forms whose focal Configurations represent an *extsederic* (temporary, unstable, under-synthesized) State of Energy-Plasma. Actually (without connection to your FD), there is no any *objective* difference between credibility of the Forms, phenomena, and events perceived by you, and undeniable reality of some Forms, which are concurrently living invisibly for us somewhere (in different exuberation conditions), notwithstanding bio-Creators of your Perception systems subjectively consider this as «disappearance» of something or someone in your surrounding s-Reality. Whether there are Stars or Galaxies, molecular organisms or fermions — every fact of seemed to you, certain «disappearance» of something in countless zillions of its peculiar qualitative versions, is *immediately* performed rotationally (as if «by frame») in zillions of opportunities of own simultaneous «appearance» in different qualitative Space-Time conditions structured with subjective Perception systems of other your «personalized» Interpretations.

**4.0044.** May you have not the false impression that a focal Configuration of some certain Self-Consciousness Form having exhausted options for its exuberation in one regime of Energy-Plasma (using the properties of the given Perception system) immediately «moves» *itself* across Space-Time in order to «appear» at its another «place.» Any real «movements» by different-Qualitative focal Configurations are not possible — absolutely all f-Configurations of Form-Creators structure and form the holistic skrruullerrt system of Macrocosmos. Having been formed as the result of the Act of SSS-mercavgnation (by the Principles of Resonationness, Slloogrentness, Diffuzgentness, and Multipolarization), the skrruullerrt system remains unchanged to the Act of complete SSS-consummatization of Focus Dynamics. In a conditional holochrone «space» between these Acts, f-Configurations of all Self-Consciousnesses Forms and CCIs (as well as all particles comprising them) are ALWAYS exuberated objectively *collaboratively*, IN PARALLEL to one another, regardless of the subterransive qualitative and space-time differences peculiar to each of them «separately.»

**4.0045.** You should not forget that each of perceived by you, phenomena, actions, reactions is subjectively — up to the very moment of your conscious examination of it — as if non-existent anywhere, but it is just present potentially in some conditional «singularity point» (which is reflected in our Self-Consciousness by means of Mechanisms of ODS, FLUU-LUU-complexes, and their analogs) as a *potential* opportunity for realizations through definite SFUURMM-Forms in some circumstances (within Focus Dynamics of Form-Creators). From this noo-time «point,» different-Qualitative «projections» of ethereal interconnections penetrate potentially all Rezomirals which all subterransive development scenarios are formed of. Depending on qualitative condition of a «part» of the slloogrent f-Configuration focused by you right now, Form-Creators of your NUU-VVU-Form resonationally «unpack» the temporal ethereal constituent (or variable component) of that «singularity point» and involve a strictly defined SFUURMM-Form from its endless content into their Focus of Close Attention; thus allowing the corresponding circumstances to appear within your subjective Perception system.

**4.0046.** Once again: to that fact (or between two instants of your exuberation), nothing is as if really existent *to you*. The Focus of your Self-Consciousness «abides» in an interstitial state of the zeroth ingredient and has a potential opportunity to realize «yourselves» in any situations. Not the surrounding reality forces you to experience its peculiar circumstances, but it is you, who initiate manifestation (from a conditional «singularity point») of clearly defined circumstances, situations, and external impacts by the qualitative state of your own Focus Dynamics within your subjective Reality consistently «unpacked» by you.

## **Chapter 2. The different-Qualitative Process of amplificational Self-Cognition of all Collective Cosmic Intelligences and Their Self-Consciousnesses Forms**

4.0047. «*Everything Being already Exists and All is for our Best development*» — there is the profound Truth in these words which allows a wise man to facilitate his Existence greatly. Absolutely everything, which was possible to form, to create, to construct of the qualitative difference between focus and ethereal compounds of Self-Consciousness of the SSS-Entity originated as a result of the mercavgnation Act, was executed at the Act of eglleroliftive consummatization of Energy-Plasma and have come, at the highest Levels of its own slloogrent exhiberation, to the state of perfectly harmonized (in a whole!) Macrocosmos.

4.0048. I am repeating: Absolutely All That had just a little opportunity to appear in some combinations of focal-ethereal interconnections (in a subjectively depliative form as well as in a subjectively ampliative form) takes place «initially» inside Self-Consciousness of the SSS-Entity as a component of the skrruullerrt system emerged by Its Focus Dynamics in Energy-Plasma. That is why the one thing that has an opportunity to change multipolarizationally its own ethereal-focal parameters, while becoming merged resonationally with each of the parts of the general slloogrentness of the skrruullerrt system, is the dynamics of changing different-Qualitative Focuses of Form-Creators simultaneously Self-realizing through the Perceptions systems of all possible Self-Consciousnesses Forms (the latter structure various exhiberation Levels of Form-structures of Plasmic Forces Diapasons).

4.0049. Self-Consciousness of the SSS-Entity might be depicted schematically-conditionally as an airport terminal including diverse functional areas — parts of the SSS-Entity's e-Configuration or the general slloogrentness parts which structure the skrruullerrt system: shops, departure lounges, check-in tables, service rooms, and so on. Including all own different functional areas, that terminal «has been already existing» regardless of when and which people decided to come there. Inside the terminal, all the areas are constant, and there are no changes in their functions; it is just about changing the amount of visitors of various categories who are present in all its rooms. That can be compared with changing Focus Dynamics of Form-Creators of all Self-Consciousnesses Forms who constantly vary their «placement» inside the informational space of Self-Consciousness of the SSS-Entity — inside «the terminal.» All those people relate themselves to diverse countries, nations, nationalities, collectives, families, and other social categories (similarly to Self-Consciousnesses Forms structuring various Levels of the PFD). However, everyone is present in the same terminal and uses each of its areas in a strict accordance with own Interest and subterransively appeared urgent needs.

4.0050. Simultaneous-spherical (multipolarizational) «movements» of Focuses from one kind of qualitative combinations of the holistic slloogrent focal Configuration to qualitative particles of its other Levels are svilgsonally initiated by eglleroliftive Impulse-Potential. These «movements» form the Mechanism of «local» exhiberation of all possible Self-Consciousnesses Forms and the illusory effect of *as if* «subterransive Existence» of each manifestation Form within their Perception systems. Additionally, inside the FD of such manifestation Form, they form the subjective Conceptions about the fact that it consistently «creates» or «transforms,» «destroys» or «demolishes» anything independently.

4.0051. Actually, nobody ever creates and destroys anything (because absolutely All does Exist already simultaneously!) — everyone just «moves» consistently, consciously or unconsciously, having creative activity on various levels, through Focus Dynamics of some group of Form-Creators of own «current» NUU-VVU-Form from those «parts» of its slloogrent f-Configuration (development scenarios) where an Interest initiated in the Perception system has less prosperous (favorable) opportunities for implementation, to the «parts» where the number of opportunities for such Synthesis increases more and more (although, it may decrease, but anyway, parameters of those opportunities change specifically).

4.0052. Here again we can use the analogy with the airport terminal: The aspiration for satisfying the essential Interest leads the amitsiration process (of subterransive refocusing) of FD of each «person» from some «parts» of the slloogrent f-Configuration (functional rooms) with corresponding development scenarios (rules of conduct provided for use of each of the rooms already available) to other «areas» and zones. After passengers checked-in (carried out their intention), they become not interested in the registration area with all its functional content (as well as Form-Creators lose their interest for a used scenario completely). They pass to departure lounge where they can satisfy their new urgent needs in rest, dining, shopping. However, presence at the departure lounge becomes not satisfactory for passengers over time (there is nothing to put their FCAs to); they start to wait for leaving the lounge and boarding on a plane («the area» giving more required opportunities for definite Form-Creators which want to reach, as soon as possible, the required «place» that will correspond to Their «current» Conceptions about «Themselves» better).

4.0053. On this «way,» as the given «current» Interest becomes satisfied more (for example, reaching any global Purpose), Focus Dynamics «expands» progressively due to many other, even not so strategic and extensive, but also more or less important Interests (and mainly, too urgent, literally pressing!) for you (or for other people, a whole community, animals, plants, Planet, and so on). For the sake of their urgent implementation, you are to «cut» always some part of that Creative Energy-Potential (VLOOOMOOT) which is present in your f-Configuration (NNAASSMM) in order for the most effective achievement of your Main Goal.

4.0054. It turns out that, instead of arrangement of subterransive process of your progressive amitsirations, actively and by the shortest vector, to the scenarios group, where some of your «personalized» Interpretations have already achieved the Goal, you continuously «dissolve» the powerful Potential of your FD on solving an infinite amount of all possible «current» and secondary tasks often having nothing in common with implementation of the Interest to which you consciously decided to devote some part of your Existence.

4.0055. This happens to you owing to a huge qualitative difference among Focus Dynamics of Form-Creators providing exuberation of your «current» mixtum NUU-VVU-Form-Types of «still not Humans» (who represent Interests of an infinite multitude of Proto-Forms, and who are not related directly to the lluuvvumic birvulyarity type) and Focus Dynamics of Form-Creators of more ampliative NUU-LL-VVU-Form-Types (Humans) whose Main Goal is the achievement of the «Creative Cosmic Potentiality» State inside their FDs. Obeying instinctively to a pressing need to implement SFUURMM-Forms, which are NOT peculiar to true human Interests and which are forcibly imposed

inside your Focus Dynamics by Form-Creators of all possible Proto-Forms, you sivilgs-spherationally refocus to less ampliative and even to the most depliative versions of multipolarization of your Focus Dynamics and master inertially the required empiric Experience (SFUURMM-Forms which are covallert with the human Synthesis Scheme). Once, this Experience will allow you to start to «merge» progressively the time loops formed by yourselves and to implement more intensive (by the shortest vectors) amitsirations to the Direction of the lluvvumic birvularity type.

4.0056. In the «current» development scenarios of the humankind's Collective Consciousness, the iissiidiological Knowledge is still the most powerful and credible source of generating such amplificational SFUURMM-Forms. This Knowledge cultivates consistently inside Self-Consciousness of a «person» a sustainable state of increased activity of the main signs of COSMIC HUMANNES: high-intellectual Altruism, high-sensual Intellect, immunitant Responsibility, and humanitarian Freedom. High activity of such Conceptions in people's FD is the basis for commencement and further development of subterransive process of the most effective amitsirations to the scenarios where people would have already synthesized SFUURMM-Forms from all depliative Levels of the two lowest IISSIIDI-Centers and reoriented the Sense of their Being from achievement of «personal» selfish aims to the full creative realization in Service to common Interests of all *progressive* humankind.

4.0057. The most effective mechanism of rapid extension of this large-scale development process of Collective Consciousness of people in the existing type of subjective Reality is the Idea of establishment and construction of hundreds of thousands of Cities of Knowledge of Light — Ayfaars — all over the planet. The best scientific, technical, economic, and social achievements of humankind will be implemented there as well as the highest Conceptions about the essence of *true Human* relationships.

4.0058. To the deepest regret, still not everything of what is emitted by Focus Dynamics of people psychically and implemented in surrounding reality by means of their deeds and choices can be estimated as samples of actual *human* relationships — both among themselves and among other members of the universal amplificational Process. Ayfaars, in turn, engage resonationally the most developed and conscious part of contemporary society into their peculiar creative sphere. In the most prosperative versions of the nearest Future, they provide, for other people, an excellent example, which can stimulate their Focus Dynamics effectively towards the most ampliative choices structured with high-sensual Intellect and high-intellectual Altruism.

4.0059. Thus, each Self-Consciousness Form simultaneously self-exhiberates along with surrounding Forms and thereby continuously executes the deep amplificational Process of subterransive Self-knowledge in Everything, synthesizes, and gains own intuitive-empiric Existence Experience while focusing permanently on something and instantly interpreting the «unpacked» part of Information in its own way. This allows to experience, concise, and feel the slloogrent Essence of this part thoroughly. If something of those experienced things does not satisfy its «current» Interests, it has always an opportunity to terminate its amitsirations in this Direction and to commence gaining different Experience by activating SFUURMM-Forms of some protoformal Directions inside its FD. That way, it rethinks that Experience literally anew, in a new manner, and restructures Conceptions, earlier synthesized inside its Self-Consciousness, for satisfying the «current» Interest.

4.0060. Each kind of such subterraneous creative work is tightly and inextricably linked with the universal cosmic Process of simultaneous collective Self-realization by Form-Creators through an infinite multitude of different-Qualitative Self-Consciousnesses Forms («personalized» Interpretations), which «disappear» nowhere and never from the skrruullerrt system, and who are incapable of realizing themselves really «dead» anywhere even for a moment. The same is related to an infinite diversity of other Forms of simultaneous manifestation of the most versatile attributes of Life: Everything that seems to you «dead» and «lifeless,» due to heavy limitations peculiar to your Perception system, is actually full of Life, energy-informational Richness, and Creative Interest.

4.0061. Neither you, nor anybody of people around you, as well as nor any of organisms perceived by you — *in their realizational Essence* — are those, who must «die,» «disappear,» or break their Existence some time! Any of your infinite «physical» Forms represents a universal means of persistent and endless exuberation for an infinite multitude of different-Qualitative SFUURMM-Forms, which resonate with some kind of Focus Dynamics, in the skrruullerrt system of Macrocosmos. Namely the lluuvvumic Form-Creators' Focus Dynamics which is structured through the deepest simultaneous interconnections with Focus Dynamics of many other «your» homologous and particular «personalized» Interpretations (from various development scenarios) — this Focus Dynamics is the incredible instrument that allows you to change some Forms for other Forms progressively and to experience virtually eternally all those subjective Realities which «expand» naturally around you in accordance with thinking activity and particular sensual creativity generated by you.

4.0062. All that Cosmic exuberation Mechanism at once reliably provides the process of absolute Self-cognition for all Form-Creators Which reflect, inside of the SSS-Entity Self-Consciousness's FD, Its realizational egleroliftive Impulse-Potential (an incentive to Self-development). All that looks bare, empty, and lifeless, on the level of nutations (fluctuations) of your surrounding reality, is actively manifested in many various creative opportunities on the other (not necessarily more ampliative!) Levels and in other conditions of general coexistence of different-Qualitative Self-Consciousnesses Forms. Such opportunities are not peculiar to narrow-specific exuberation conditions within the given subjective Reality. Observing cosmos through the most powerful telescopes, scientists can see just «lifeless shapes» of Planets covered with meteor potholes, while each of those «empty» Spaces are inhabited by all possible Life Forms, which are similar by something and different by other things to our earthly Forms, but which perform not less important and significant functions than the activity of our Collective Consciousness.

4.0063. Humankind is consumed with egocentric focus on itself as much as it is incapable to notice, to distinguish, and to give a significant meaning for intelligent, to more or less degree, Self-Consciousnesses Forms of other CCIs which are existing not only close to people, but also inside our own biological organisms. Most of scientists treat also the opportunities for existence of Forms of «extraterrestrial Intelligence» on the same primitive principle of their own superiority and exclusivity, notwithstanding high-intellectual and high-sensual Life is brimming everywhere right in front of them, and it does not bother even a bit about whether someone approves or ignores its existence.

4.0064. You cannot find it in the world around exceptionally because you do not wait for meeting it, where it is not likely for you just to be. In search of clear evidences of attributes of any Cosmic

Intelligence, you are always looking for something similar to people even a little or resembling principles of your own realization (thinking, feeling, preferences, and so on), while you are constantly ignoring all that is much more intelligent and perfect than you by the development level; though, still does not fit the common human stereotypes about intelligence.

4.0065. The ultimate example is the species of monocellular bacteria *Toxoplasma gondii*, which replicate and parasitize inside cats' intestine. In order to settle there, these bacteria infect mice in advance and deprive them of innate survival sense against the predators. Having no fear of cats, infected mice appear to be their easy prey, owing to what the bacteria infect cats successfully. Moreover, even after complete healing from *Toxoplasma gondii*, mice continue to fear not of cats. That means that Form-Creators of that monocellular Self-Consciousness Form are better than our medical scientists at knowing the peculiarities of central nervous system and immune system, as well as at noticing the details of brain centers functionality. Owing to directed multistage manipulations, that allows the bacteria to reconstruct *consciously* the behavior of multicellular mammals' organisms in accordance with the bacteria's needs. Even more surprising effect is taken by opportunistic, mutational, and manipulating abilities of viruses (for example, herpes, influenza, virus psittacosis, rabies, and others).

4.0066. Change the quality of your own Worldview, get rid of your extremely limited conceptions about «lifeless» and uniform Cosmos, bravely extend and give away the narrow limits of outdated stereotypes and dead religious dogmas which divide the World onto «dark» and «light,» «angels» and «demons,» «bad» and «good» — and then, Life of your surrounding World will turn to you by many of Its sides, invisible before, in order to extend strongly the cosmic horizons of your Creativity. They always wait for you there when you become *more ampliative*, where you have always «been» and you always «are,» and where *more developed and perfect* You will always «be» the rightful Creators of all Universal Realities. You need only to comprehend it all deeply in order to fill, with quite more extended lluvvumic Understanding, every instant of your Life, every your Thought, and every Feeling by means of habitual and natural putting the lissidiological Conceptions into each made decision.

### **Chapter 3. Functional interconnections among various Cosmic Form-structures and Creators-PLASMOIDS**

4.0067. By means of joint Focus Dynamics of the Form-Creators, all types of space-time Continuums structure Collective Consciousnesses (Spheres of the Form-Creators' subterransive Creativity) of the lowest Globes of Planetary Entities of our Star System. The Continuums are originated in particular exuberation regimes of Space-Time of each of Planets by rather specific means including: Self-Consciousnesses Forms peculiar exceptionally to the given Globe and their realizational psychisms (types of thinking, feeling, and responding); certain qualitative features; also, creative potential of absolutely all live creatures (including people) who are simultaneously manifested in the given conditions both in subjective versions of «the past» and in subjective versions of «the future.» Having been holochronely originated by direct focal-ethereal interconnections, which are distributed beyond

combinations of many STCs' groups, these realizational systems (space-time Continuums) acquire specific, peculiar only to them, cumulative and communicational properties on every phase of their *collaborative* development.

4.0068. Particularly, this explains, why some of the last generations have specific developed forms of thinking and feeling, or behavior principles, and also synthesized before (in some STCs' groups) fundamentals of definite Conceptions and worldviews, which are transferred (transmitted in the nutational regime) by the gene Form-Creators of DNA in a form of intuitive Experience to the next generations of different-protoformal representatives who jointly inhabit one Reality type (including habitation among people). That process, being subterraneous for Self-Consciousnesses Forms of each different-protoformal Synthesis Schemes, is provided by the eggeroliftive tendency and directed to continuous enhancing and concentration of more and more covallert interconnections within Focus Dynamics of Form-Creators. These interconnections are characteristic for every birvulyarity type what consuyetally leads to changing the FD functionality; therefore, to constant modernization and universalization of used by Them (by Form-Creators), Self-Consciousnesses Forms during the svilgs-spherationally performed amitsirational process.

4.0069. Each of Form-systems (as a part of the skrruullerrt system subjectively emphasized by an Observer) is structured by Focus Dynamics of the Form-Creators Which emerge highly coherent causal chains (cause-and-effect connections among Self-Consciousnesses Forms of functionally compatible types of Collective Consciousnesses) in Space-Time by their communicational (focal-ethereal) interconnections. Every Form-system differs from the others from the given exiberation Level not only by definite psychodynamic (mental-sensual, responding) features peculiar to the total mass of its structuring Self-Consciousnesses Forms, but also by subterraneous capabilities of functional Form-Creators (for example, we have bio-Creators of the brain and genome). The latter are manifested within the given Form-system (total amount of Self-Consciousnesses Forms) by means of improvement and universalization of its Perceptive centers that allows Them increasingly effectively to follow, to analyze, and to classify the slloogrently «unpacked» by Them, Information by the degree of its significance for Their own functions.

4.0070. That difference allows the general Focus Dynamics of Form-Creators from every Form-system to self-regulate in the realizational spectrum accessible just to its inhabitants. In the meantime, you should not forget that all the infinitely diverse, differently functional spectra of creative manifestation of heterogeneous Form-Creators, in accordance with the Principles of Diffuzgentness and holochrone Multipolarization of all focal-ethereal interconnections, are not strictly divided among Each Other in space-time regimes of Their simultaneous exiberation. Yet, these spectrums duvuylerrtly and consistently as if «*mutually reproject*» to each other by means of subterraneous opportunities and specific peculiarities of different-protoformal Perception systems of all the multitude of Self-Consciousnesses Forms who structure these Form-systems.

4.0071. We have never a chance to consider any located Form-system (as if strongly «locked» onto «itself» in some limited exiberation regime of Space-Time), because any signs of captivusality of a Form-system are absolutely subjective, and they depend not on its properties (which are *slloogrent-*

*diffuzgent*, generally!), but on subterransive peculiarities and capabilities of the Perception system of a Self-Consciousness Form through which the given part of the skrruullerrt system is observed.

4.0072. It should be noted that every visible object — as a set of locally expressed energy-informational parameters of Space-Time «curvature» — represents an interstitial result of focus efforts of many other Self-Consciousnesses Forms which simultaneously structure not only the given STC, but also other Time Flows. All these Self-Consciousnesses Forms — by means of corresponding motivated aspiration of their FDs and a definite part of decoherent Energy-Information generated by them — *inadvertently and unconsciously* take part in the exhibition Mechanism of any object (including «ourselves»), which we subjectively investigate in the current manifestation conditions using extremely limited capabilities of our Perceptions systems! Similarly, through the FD implementation process, each of us participates constantly and unconsciously in exhibition of many other NUU-VVU- Form-Types of own Stereo-Form.

4.0073. As much a Collective Consciousness of each cell (UORD-VUORD) in the human biological organism represents an anatomic unit of any organ or tissue, as a Collective Cosmic Intelligence of any Stellar Entity (TLOO-U-UU), in each Level of Its multidimensional simultaneous manifestation, is a very important structure unit of the slloogrent Form-system of the Universal DDIIUYYI-Entity. This is because, in each Sphere of Activity of Own Focus Dynamics, this CCI resonationally (by every diapason) arranges the DDIIUYYI-interconnections into Something Which we subjectively define for ourselves as «Cosmos» in aggregate of such global manifestations. Continuing this conditional comparison, we can match functions of our Solar system (both in the aspectable and in invizusal versions of its multidimensional exhibition) conditionally with functions of some «Cosmic Cell,» which structures the Space-Time of our Universe. Along with myriads of other Stellar Form-structures, these «Cells» organize the whole infinite multitude of various systems and «organs» of so-called «manifestation Bodies» (analogs of our «personalized» Interpretations) of the given Universal Creation.

4.0074. As the nucleus represents the main control center with genetic information of each cell of our organism (because the nucleus contains mainly chromosomes with hereditary characters coded into the DNA form), so The Collective Cosmic Intelligence of our Stellar Entity (AIIILLISS) can be interpreted as a specific «Nucleus» of our Solar system. In the meantime, CCIs of all Planetary Entities, included into Its Sphere of Creative Interest, represent different-Qualitative (and multi-level) compounds of the general Focus Dynamics of Form-Creators of the AIIILLISS CCI. To a certain degree, a slloogrent f-Configuration of Each Stellar Entity can be matched — also rather conditionally! — with a «hyperspace tunnel,» through the thin plasma structures of which the AYFAAR HCCI emits Its Own Energy-Information to all Form-structures of the Universal Creation.

4.0075. Each of Planetary Entities (SSV-UU-UU) observed by you in star sky of the material Universe, as well as each of the infinite multitude of Stellar Entities (TLOO-U-UU), functionally supplementing and creatively uniting them into specific focal-ethereal combinations (Star systems), are the result of multipolarizational transgression of Focus Dynamics of a Collective Cosmic Intelligence of some universal «Spiritual» Stellar Entity (OLSFF-AALVO) common for them. The slloogrent f-Configuration of OLSFF-AALVO structures the ASSVAAT HCI all over Its exhibition Levels in the Form-systems of the given Galactic Sector (LLIING-LLI).

4.0076. ASSVAAT represents one of the infinite amount of realizational aspects of The AYFAAR Highest Collegiate Cosmic Intelligence and executes simultaneously Its joint Focus Dynamics through f-Configuration of the OLSFF-AALVO-Entity. ASSVAAT functionally organizes Its Creative Work in all Levels of Energy-Plasma of the given Galactic Sector (from 0 to  $\pm 36$  dimension). Focus Dynamics of ASSVAAT is structured with the Form-Creators' FDs of Collective Cosmic Intelligences of zillions of Star Form-structures.

4.0077. In exuberation conditions of the Tertiary Universal Illusion, there is the infinite diversity of Form-Types and Proto-Forms of self-conscious manifestation of Creative Activity of Collective Cosmic Intelligences of all possible development Directions. This diversity is caused by the fact that, in the FD of Form-Creators of each of the Star systems, multiple Focus Dynamics are simultaneously engaged of Cosmic Communities (civilizations) of Form-Creators of countless Planetary systems diversified by their realizational functions. Each of the Communities faces — absolutely subterraneously and in its own manner (within the limits of multipolarization spectrum of its own FD) — amplificational Challenges of maximally deep and comprehensive Synthesis of different-Qualitative energy-informational Flows among each other, which are peculiar for focal Configurations of one or another Planetary Entity.

4.0078. To form, inside your Self-Consciousness, at least some subjective Conceptions about a great amount and diversity of such cosmic Communities of SLAA-SS-MII-Creators, below I present some Sound Cosmic Codes-Definitions (SCCs) of the SLAA-SS-MII-Creators Whose activity provides the organization of Focus Dynamics of Self-Consciousnesses Forms of all possible Proto-Forms within Globes of the AIILLIIS Stellar Entity. If meditating on the SCC interesting to you, you can get a great amount of additional Information about structure of interaction and specific activity of Form-Creators of each of these Collective Cosmic Intelligences.

4.0079. For those of you, who would like to get yourself closer to this Information, there is a short list of basic Directions of their Planetary Creativity at corresponding exuberation Levels of the Globes FDs of our AIILLIIS Stellar Entity. One should understand the term «Globes» as results of joint realizational activity of Form-Creators of protoformal Self-Consciousnesses Forms of many specific Collective Cosmic Intelligences simultaneously exuberated in some — *common for Them!* — realizational spectrum. Here, I mean not subjective groups of all possible Continuums («human,» «cats,» «ants,» Continuums, and so forth) separately considered by us and simultaneously structuring different dimension diapasons, but different-protoformal groups of Conversums functionally united in many dimension diapasons of general Focus Dynamics of Self-Consciousnesses Forms of different-birvulyart CCIs diffuzgently interrelated among each other.

4.0080. In other words, the Globes subjectively considered by us are not related to any definite dimension diapason. With their joint *different functionality*, they form a common Mechanism of sllougrent exuberation of absolutely all Self-Consciousnesses Forms simultaneously manifested in various conditions of the Tertiary Universal Illusion. In turn, the parameters of dimension diapasons (from 0 to  $\pm 12-14$  dimension) reflect, with their own types of focal-ethereal interconnections, specific Levels and regimes of possible (or impossible) exuberation of Focus Dynamics of some kinds of CCIs in the Form-structures of each Globe. Any of the twelve dimension diapasons, which

arranges Form-structures of the Tertiary Illusion of every Planetary or Stellar Entity, is formed not by any one of Its Globes, but by simultaneous creative realization of Form-Creators of all the Globes at once, which functionally take part in providing Focus Dynamics of Form-Creators of absolutely all Self-Consciousnesses Forms in any «part» of Its slloogrent f-Configuration.

**4.0081.** There is one very important thing, which you must not forget of: Every dimension diapason is provided by Focus Dynamics of Form-Creators of countless multitude of Proto-Forms which self-realize collaboratively with humans in the given regimes of exhibition. For example, simultaneously with all of us, the groups of human Continuums of the conditional 3–4-dimensional diapason are structured also with FDs of many other mixtum, dimidiomittense, and transparentive (including *simplisparentive* NUU-VVU-Form-Types) Proto-Forms, which are forming concurrently their own types of dimension in *functionally the same*, but *differently* synthesized (!) parts of Space-Time. On the position of their subjective VVU-Factor, the types of dimension considered by them (with our usual parameters of human FD) can be conditionally defined as 0–1-dimensional, 1–2-dimensional, 2–3-dimensional, 4–5-dimensional, 5–6-dimensional, 6–7-dimensional, and even 11–12-dimensional types... we can say the same concerning the formation process of the structure of focal-ethereal interconnections of each of dimension diapasons considered by us.

**4.0082.** All types of variously interrelated Focus Dynamics of Self-Consciousnesses Forms of different-protoformal CCI, simultaneously manifested through their own types of focal Configurations, do form together one of twelve conditional dimension diapasons of the so-called «Physical Globe» of exhibition in the Self-Consciousness Form-structure of our GREIYSLIIS Planetary Entity. Here the term «physical» is used not in the meaning of atomic-molecular or wave (nutational) type of exhibition, but as a multilevel analog for different-Qualitative manifestation of causal focal-ethereal interconnections, which are provided simultaneously with resonational combinations of corresponding Form-structures of ASTRAL-Plasma and MENTAL-Plasma. In other words, specific properties and peculiarities of the Physical Globe allow these interrelated combinations, like in some global Mirror, to be reflected in the Perception systems of Self-Consciousnesses Forms of diverse Levels and dimension diapasons by means of f-Configurations peculiar to them: protofses (0–1 dimension), loolgses (1–2 dimension), doollses (2–3 dimension), waves or irkkulls (3–4 dimension), flakses (4–5 dimension), vuoldses (5–6 dimension), and so on.

**4.0083.** It can be said that Focus Dynamics of any Physical Globes create the most «external» — RESONATIONALLY REFLECTING — «scheme» of the general exhibition Mechanism of all Self-Consciousnesses Forms at the Tertiary Illusion. Incomprehensibly for us, this «scheme» generalizes in itself increasingly deeper types of interconnections and directs their specific realizational capabilities to all infinite variety of different-protoformal Perception systems simultaneously manifested throughout the Levels of the given megadiapason (to  $\pm 12$ –14 dimension). As a matter of fact, Form-structures of that «scheme» are what we subjectively interpret both as «Perception systems,» and as «Self-Consciousnesses Forms.» That means that the «scheme» covers just all the exhibition versions of the Tertiary Illusion and allows all CCI to show their Creative Activity in all regimes of Space-Time at once. Space-Time itself (along with what we perceive as «different-Qualitative Levels») is manifested as such with all its properties (as if «individually» for each Perception system) as the result of presence of that «all-exhibiting scheme» in the FD of Energy-Plasma.

4.0084. Exactly that «scheme» forms «external manifestation bodies» of all Self-Consciousnesses Forms and structures them into all the infinite diversity of dimensional Levels. For example, within the given dimension diapason, our Perception systems function owing to the fact that HERE Form-structures of the Physical Planetary Globe provide correspondingly the focal-ethereal resonational «link-ups» not for all causal interconnections, but for those of definite kind. These Form-structures allow the interconnections to be included into various energy-informational combinations as bosons and fermions. Basically in the same way, other Form-structures of the Physical Planetary Globe provide manifestation for other causal interconnections as Perception systems of flaks Self-Consciousnesses Forms at flakglaass diapason and as Perception systems of vuolds Self-Consciousnesses Forms at vuoldsmmiis diapason, and so forth.

4.0085. As the Focus Dynamics of Collegial Cosmic Intelligence of the Physical Globe of our AIILLISS Stellar Entity represents an integral for absolutely all Focus Dynamics of Form-Creators of CCIs of Physical Globes of all Its Planetary Entities, so the conditional exhiberation diapason of the given Globe (in relation to conditional parameters of our dimension type!) expands greatly. This expansion is emerged due to peculiarities of FDs of the CCIs types which cannot self-realize at our Planet in the given regime for different reasons. In other words, Synthesis Schemes of different-protoformal Self-Consciousnesses Forms may differ so much both among each other, as well as concerning peculiarities of our two-invaderental Synthesis Scheme. Therefore, the dimension originated by their FDs can be subjectively perceived by us qualitatively as something on orders «higher» or «lower,» than the opportunities we have.

4.0086. As far as parameters of these manifestation conditions, subterransive for the Self-Consciousnesses Forms of each CCI, cannot be defined and estimated by us anyhow (because, for this purpose, we would have to «cut,» with our FD, in the FD of each Proto-Form considered by us), we have no alternative in consideration of any Planetary and Star Globes characteristics, but to apply for peculiarities of dimension's origination in all the multitude of different-Qualitative groups of human Continuums simultaneously performed in various Time Flows. Thus, we would have at least any — though rather conditional! — opportunity for subjective examination and comparison of any different-Qualitative exhiberation regimes of Collective Cosmic Intelligences.

4.0087. Collegial Cosmic Intelligences of any Planetary or Stellar Entity have seven *conditional* (meaning, always considered by us just subjectively, for the purpose of qualitative comparison and analysis of their own attributes and processes) Globes of simultaneous manifestation of Focus Dynamics of Their own groups and types of CCIs: Physical, Causal, Astral, Mental, Transmutational, and the most ampliative — Stabilizational and Buddhic Globes. Dimension diapasons are not mentioned only because the joint Focus Dynamics of Form-Creators of each Globe is performed simultaneously-resonationally at once throughout all structures of the Tertiary Universal Illusion. This way, level-by-level — in its own functioning regime — this FD provides operation of the general exhiberation Mechanism of Focus Dynamics of absolutely all Self-Consciousnesses Forms and CCIs structuring the Tertiary Illusion.

4.0088. For example, Form-structures of all Causal Globes provide availability of definite causal interconnections inside each of «reflecting» Form-structures of all Physical Globes:

Specific interconnections are in loolgsloor diapason (2–1-dimensional), specific interconnections are in irkkulligrenic one (4–3-dimensional), specific interconnections are in peeppttiynic one (10–9-dimensional), specific interconnections are in lyuullffiiyic one (12–11-dimensional). In exactly the same way — by means of universal properties of Form-structures of the Transmutational Globes — the Astral and Mental Globes provide, resonationally and level-by-level, functional Form-structures of every Causal Globe with vital and mental attributes, and Form-structures of the Stabilizational and Buddhic Globes provide — by means of the Ethereal Components — sustainability and stability of all focal-ethereal interconnections in the form of the general skrruullerrt system of Macrocosmos.

**4.0089.** It can be said that all these Globes differ from each other by peculiar to each of them, type of subterransive *functionality* implemented by their Form-structures at the process of the general manifestation of the slloogrent Focus Dynamics:

- the Physical Globe implements the level-by-level Synthesis of Creators-KARMOIDS (Who are Creators-FORMOIDS in the given dimension diapason) and «reflection» of Their own interconnections through the Perception systems and «local» properties of Space-Time;
- the Causal Globe implements resonational activation of Creators-ASTROIDS and Creators-PLASMOIDS in each type of focal-ethereal interconnections;
- the Astral and Mental Globes implement the presence, in the exhibition Mechanism, of all the diversity of corresponding attributes which are required for every FD manifestation;
- the Transmutational Globe implements provision of combining (transmutational) mechanisms for functioning of synthesizing Form-Creators (arrangement of the amitsirational Process);
- the Stabilizational Globe implements creation of opportunities for «local» stabilization of each Focus (the exhibition act in corresponding conditions of Space-Time);
- the Buddhic Globe implements the presence of sustainable universal interconnections with FDs of SSLOO-SS-SNAA- Creators of the Secondary Universal Illusion, involvement of uniting functions of Ethereal Component into this multipolarizational Process.

**4.0090.** Once again, I draw your attention to the fact that Focus Dynamics of CCIs of all seven Globes are performed *concurrently* and *coherently* in the realizational megadiapason common for them — from 0 to  $\pm 12-14$  dimension. Any signs of discovered by you, different-Qualitativeness and «separation» of these FDs (into Form-Matter, Plasma-Matter, Form-Plasma, and Plasma-Form) are the result of appearance of some degree of your own subjectivity. It appears inevitably each time while attempting to perform careful examination of some «parts» of this slloogrentness by means of appliance of the narrow prism of realizational capabilities of the Perception system of a subjective Observer — a Self-Consciousness Form available for our Focus Dynamics at the present moment of exhibition.

**4.0091.** Subterransive amitsiration of Form-Creators' FDs from Self-Consciousnesses Forms, generated by CCIs of some of the Globes of any Planetary (or even Star) Entity, to Self-Consciousnesses

Forms, originated by FDs of CCIs of the Globes of any of other Planetary Entities, depends not on the exuberance regime of this FD, but on an f-Configuration of the Form-Creators. By means of this f-Configuration, all parameters peculiar to one or another Synthesis Scheme of definite birvularity type are performed in detail. Sort of «the same» areas of Space-Time («points» of exuberance) penetrate simultaneously the Focus Dynamics of Form-Creators of all types of Energy-Plasma: Form-Matter, Plasma-Matter, Form-Plasma, and Plasma-Form.

4.0092. Within the boundaries of any Globe, it is possible to refocus from mixtum NUU-VVU-Form-Types to each of varieties of simplisparentive or dimidiomittense NUU-VVU-versions. The same can be said about amitsirations of superparentive and translucense, supraparentive and luminosal Form-Types. That is why svilgs-spherational change of the FD of one Globe for the FD of another Globe (within conditional «limits» of one and the same Planetary Entity, as well as of different ones) depends exceptionally on the fact how much the subterransive peculiarities of your own FD correspond to parameters of their qualitative features. That is determined by the birvularity type which structures the Form-Creators' FD of your Self-Consciousness Form. That means that if the given birvularity type is not peculiar to some Globe, you cannot appear *focally* in Its regime anyhow.

4.0093. However, inside own Focus Dynamics, it is possible to receive and to kleks correspondingly some information (sllougrent Conceptions) which structure FDs of inhabitants of other Globes. It is through application of practice of deeply altered states of Self-Consciousness (profound Meditation on Cosmic Codes). In such cases, through deep, purposeful immersion to corresponding Creative Spheres of an OLLAKT-DRUOTMM-system (or a FLUU-LUU-complex), you set successively and resonationally your FD at the Focus of Dual Reflection (or Universal Multipolarizational Impulse of FLUU-VVU-doubles) of those Form-Types which are exuberated in the conditions of STC of another Globe (thus, you are as if «identified» psycho-mentally with them). The result will depend totally on the presence of corresponding decoding capabilities and adapting skills inherent in the Form-Creators of the Perception system of your Self-Consciousness Form.

4.0094. There is a very important regularity: The more the activity of Form-Creators of Collective Subconsciousness and Supraconsciousness (e. g. ampliative Intuition) prevails in your Focus Dynamics and the less different-protoformal Form-Creators of collective unconsciousness influence on your FD, the more productively and effectively you will perform such «immersion» because VEC-«unpackings» will prevail over TEC-«unpackings.» In the meantime, your subterransive impressions and experiences will be probably the most unusual and unexpected. The main problem is impossibility to describe the received Information or just simply to express It in words. Besides, your profound examination of the Iissiidiology Knowledge will assist you while meditating. Iissiidiology will help you to select accurately and to explain many of your meditative experiences.

4.0095. I would like to emphasize that the term *mental Form-Creators* (or Creators-PLASMOIDS) means further the SLAA-SS-MII-Creators Which (together with astral F-C (Form-Creators) reflect attributes of *conditionally mental* constituent of Energy-Plasma (ALL-Will-of-ALL-Intelligence, ALL-Primordiality-ALL-Initiality, ALL-Mobility-ALL-Presence, ALL-Knowledge-ALL-Informedness, ALL-Aspiration PCQs, as well as ALL-Unity and ALL-Steadiness-ALL-Stability as diffuzgent-transitional

PCQs) at the processes of formation of the general synthetic Focus Dynamics of Self-Consciousnesses Forms. In accordance with that, *astral Form-Creators* (or Creators-ASTROIDS) are the carriers, inside Focus Dynamics, of attributes of *conditionally astral* constituent of Energy-Plasma (ALL-Love–ALL-Wisdom, ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Voidness–ALL-Fullness, ALL-Voidness–ALL-Vacuumness PCQs, also ALL-Unity and ALL-Steadiness–ALL-Stability as diffuzgent-transitional PCQs for both of astral and mental groups).

4.0096. This is exactly the fundamental difference between Creators-PLASMOIDS and Creators-ASTROIDS. The first Ones provide the presence of the whole set of Their peculiar mental attributes, structured by one or another Synthesis Scheme, during the general Process of Synthesis of karmonations (f-Configurations of Creators-KARMOIDS). Functions of the second Ones are aimed at provision of this universal Process with the set of vital attributes resonationally corresponding to the mental attributes activated at every «point» of Space-Time. As it was already noted, both categories of these synthesizing Form-Creators are active transmitters of internous characteristics of Aspects of some definite OO-UU-Entities (Pure Cosmic Qualities) in FD of the Worlds' Form-systems. Some of those Entities provide manifestation of unique properties of ASTRAL-Plasma in Energy-Plasma, and some provide not less unique properties of MENTAL-Plasma.

4.0097. Being inevitably submitted to the Principle of Resonationness, all Creators-ASTROIDS manifest inside the FD of each Self-Consciousness Form and aspire for confluence (resonational fusion) of their f-Configurations with f-Configurations of corresponding (by the degree of realizational intensity) Creators-PLASMOIDS; thus, trying to fill Their Essence with the lacking Information for deeper and more versatile realization. As a result of each act of such confluence, instead of ASTROIDS and PLASMOIDS, f-Configurations of Their corresponding Creators-KARMOIDS are generated in Space-Time; They reflect realizational features of the both varieties of creatively combining Form-Creators.

4.0098. It turns out that, in the Focus Dynamics of Self-Consciousnesses Forms transgressed by Planetary or Star Globes (CCIs), neither Creators-PLASMOIDS, nor Creators-ASTROIDS are ever manifested separately, but only jointly-resonationally, being instantly transmuted (in a way specific for Them in every particular case) to focal Configurations of Creators-KARMOIDS — synthetic Form-Creators of KARMO-Plasma. As a matter of fact, in humanational types of Macrocosmos, KARMO-Plasma represents all possible realizational (implemented with assistance of the whole set of Focus Dynamics) States of Energy-Plasma (meaning, an Illusion of various Levels of the PFDs). Creators-KARMOIDS, which provide structurization of the slloogrent Focus Dynamics within conditional diapasons of different-Qualitative exhiberation of the lowest and the middle Levels of Form-Matter (TRUUFFORRG-VUU — from 0.0 to  $\pm 4.0$  dimension), are named Creators-FORMOIDS.

4.0099. Here it should be noted that, in focal-ethereal combinations performed — *from the perspective of the features of the lluuvvumic birvulyarity type!* — «lower» than the third dimension (in our Conceptions), only the processes, subjectively perceived by us as intra-Qualitative Synthesis among Aspects of *one* PCQ, might prevail. Notwithstanding this fact, in some different birvulyarity types (owing to the presence of higher covarllertness than existing between Aspects of the ALL-Will-of-ALL-Intelligence and ALL-Love–ALL-Wisdom PCQs), the specific processes of origination of all

possible Self-Consciousnesses Forms are executed. These Self-Consciousnesses Forms are interpreted in s-Realities as «two-dimensional,» «one-dimensional,» and even «zero-dimensional» exuberation regimes of Form-Creators. In other words, the Focus Dynamics of Self-Consciousnesses Forms of birvulyart orientation, different from human, is also structured by Creators-FORMOIDS.

4.0100. Even though, for the bio-Creators of our Perception systems, f-Configurations of these Forms do not possess the sustainability degree, which is peculiar to human Focus Dynamics and which would allow us to consider them more thoroughly and deeply as objects of our surrounding reality, — all these Forms do structure Space-Time simultaneously with us and reflect their own types of subjective Realities within exuberation regimes of their Focus Dynamics. After all, beyond conditional boundaries of the 3–4-dimensional diapason subjectively perceived by you, the entire and all-embracing Life is performed not less intensively and multi-laterally than all the variety of Its Forms peculiar to the given exuberation regime.

4.0101. If we examine more deeply and compare interconnections of Form-structures of our Macrocosmos with Form-structures of Macrocosmos of other types (two-impulse as well as many-impulse types), we would see that the Mechanism of slloogrent exuberation of every Energy-Plasma «part» (reminding that Energy-Plasma «is transformed» inside their Self-Consciousness into subjective KARMO-Plasma after having been performed through all the diversity of Focus Dynamics of synthesizing Form-Creators) is provided with resonationally agreed interconnections among all Creators-KARMOIDS structuring various types of Macrocosmos. The exuberation regime of any Self-Consciousness Form is manifested on the basis of those unique opportunities which provide combinations of some kind of Impulse-Potentials inside its FD. That means that, although Creators-PLASMOIDS and Creators-ASTROIDS are different *fundamentally* in the structure of Their established connections in various Macrocosmoses' types, the Essence of the functions performed by Them always comes down to the one thing — transformation of Energy-Plasma (by means of all the diversity of Focus Dynamics) to the infinite multitude of Its subjective realizational varieties, which we compile in the one term — «KARMO-Plasma.»

4.0102. You already know that the general Process of our amitsirations is supported by holochrone transgression-convergence of the two Impulse-Potentials: irrkoglicitive and egleroliftive ones. In other Macrocosmos types, simultaneously with it, there is the universalization of inter-skunkktional interconnections by Their inherent combinations of Impulse-Potentials. In our type of Macrocosmos, exactly these two IPs emerged together, at definite «points» of Information, the mercavgnation Act of inactive inter-skunkktional interconnections among impersept and cruvursorrt attributes. At other «sections» of Information, their inherent Initiations originated paired or many-sided combinations of other Impulse-Potentials, which structure the United Superuniversal Impulse Potential (USIP). That is why, by our Focuses of Close Attention, we have the opportunity «to take,» from the slloogrent f-Configuration of KARMO-Plasma, exceptionally those of all the diversity of focal-ethereal combinations, which sufficiently match our properties initiated exactly by these two IPs.

4.0103. Exactly this, originally formed by us, our own subjective «depiction» of a surrounding reality, simultaneously exuberated all over Levels of Perception systems of the slloogrent Forms focused by Us (as USCFS), creates All That we determine very-very conditionally for ourselves as a

«Universe,» a «Macrocosmos» in every specific case of local reflection of Our Self-Consciousness in different regimes of Space-Time. All the rest from the infinite multitude of opportunities of KARMO-Plasma, which are simultaneously exhibited through fundamentally other, than Our, properties and features of Creators-PLASMOIDS and Creators-ASTROIDS, is as if non-existent to Us at all, in whatever of its countless Levels We would realize the focused Self-Consciousnesses Forms of «Our-Selves.»

**4.0104.** It can be said that the irrkoglective and eglleroliftive IPs are invaderental (dominant) Factors at all processes of subterransive forming our Focus Dynamics, while all the rest types of Creators-KARMOIDS, which are structured with other IP-combinations, serve for all Self-Consciousnesses Forms of our Macrocosmos still just as a vecsative «background» reflecting «future» creative opportunities, which they already possess potentially and which are peculiar to the Focus Dynamics of Form-Creators of the rest Macrocosmoses' types.

**4.0105.** The Principle of the infinite Multipolarization of slloogrent Focus Dynamics allows Us — as *the Single* Universal Self-Consciousness Focus — to perform the holochrone Process of simultaneous exhibition of all Its «parts» (Self-Consciousnesses Forms and CCIs) instantly at all Macrocosmoses' types (besides, not only humanational types, but propriusal types, too!). That means that the Experience of absolutely all creative manifestations, level-by-level (resopason-by-resopason) formed at each of the Macrocosmoses' types subterransively realized by us (as Self-Consciousnesses Forms), gets «firstly» synchronized and harmonized concatenationally, by the most covarlert combinations of heterogeneous attributes. «After that» the Experience becomes transformed (immediately through the Form-structures of all Macrocosmoses!) to even more harmonious versions of focal Configurations of the more amplificalational Levels. Owing to this Universal Mechanism of the SSS-Entity's realization, the Focus Dynamics of the Highest Collegial Collective Intelligences «come» (actualize) collaboratively-simultaneously to the Act of absolute consummatization (qualitative «merging») of Its SSS-Self-Consciousness in order for the next Conversion from the primogenitive State to the confective One.

**4.0106.** It also should be noted that Creators-KARMOIDS, jointly structured with FDs of Creators-ASTROIDS and FDs of Creators-PLASMOIDS, apart from Creators-FORMOIDS of the lowest Levels of Form-Matter (from 0.0 to  $\pm 4.0$  dimension), in characteristic conditions of *the highest* Levels of Form-Matter (Plasma-Matter — TRUURRGURRDT-NUU — from  $\pm 4.0$  to  $\pm 6.0$  dimension), are determined by me as Creators-LUCENSIDS for the convenience of *your* subjective distinguishing Their properties and functions from peculiarities of Form-Creators of other Levels. In the conditions of Form-Plasma (TRUURRGURRDT-NAAKHGRASST — from  $\pm 6.0$  to  $\pm 9.0$  dimension), KARMOIDS are determined as Creators-ALLGOROIDS; in terms of Plasma-Form (TRUURRGURRDT-SSMII-I — from  $\pm 9.0$  to  $\pm 12.0$  dimension) KARMOIDS are determined as Creators-LATENTOIDS. I also remind you that all three types of the listed Form-Creators (PLAZMOIDS, ASTROIDS, and KARMOIDS) are of the type of *synthesizing* Form-Creators by the nature of their performed functions.

**4.0107.** Their functional (but not qualitative!) differences, which allow us to subdivide Them into three given kinds, are subjective. Because they start to reveal (to us!) just at the process of changing our subjective point of view — as Observers — while considering Focus Dynamics of the

Self-Consciousnesses Forms made by those Creators in various qualitative States of Energy-Plasma. These States are reflected in our own Focus Dynamics (are estimated by us subjectively) either as a higher degree of mentality (rationality, intelligence), or as a higher degree of vitality (sensuality, emotionality) of psychic processes considered by us (or experienced by ourselves).

**4.0108.** Getting engaged with each other (during the process of consistent consummatization) into resonational interactions, Creators-ASTROIDS — *literally, at every «point» of Space-Time structured by Them* — involve, into their f-Configuration, *mental* attributes they are lacking of (in order for total liyllusceevization of their focal-ethereal interconnections), from FDs of Creators-PLASMOIDS. In turn, Creators-PLASMOIDS involve *vital* attributes they are lacking of (by the degree of covarllertness). As the result of such intercomplementing, each «point» of Space-Time (through FDs of various Proto-Forms) gets structured with a complete set of *its possible* heterogeneous attributes; thus, getting transformed, in its functional nature, to a focal Configuration of the so-called «zerth ingredient» (a «point» of possible for the given conditions, resonational transition of the FD from one dimension to another). This is true for every dimension diapason. The narrow specificity of the exhiberation moment of every Self-Consciousness Form at one or another «point» of Space-Time is totally stipulated by subterransive peculiarities of its inherent Focus Dynamics.

**4.0109.** It should be noted that exactly unique interconnections activated in the FD in a completely specified way — but not the parameters themselves of slloogrent NNAASSMM and VLOOOMOOT — provide the fact: In what development scenario each of «personalized» Interpretations will be able to realize «itself» in a regular moment of multipolarizational amitsirations. The point is that focal-ethereal parameters of duvuyllerrt «sections» of f-Configurations structuring diverse Self-Consciousnesses Forms can almost have no differences between each other by peculiarities of the fundamental Synthesis Scheme (for mixtum NUU-VVU-Form-Types of people the prerequisite is the invaderentness of attributes of the ALL-Will-of-ALL-Intelligence and ALL-Love-ALL-Wisdom PCQs). However, the subterransive «picture» of interconnections among attributes of vecsative PCQs can be significantly different in every particular case; thus, creating the conditions for origination of all the infinite multitude of different-Qualitative states inside Focus Dynamics and determining the entire multipolarizational spectrum of its simultaneous exhiberation.

**4.0110.** The presence (as if at «one and the same point» of Space-Time) of this universal property of existence of many versions of realizational states of the Focus Dynamics provides the process of moment-by-moment subjective formation of specific peculiarities of manifestation and subterransive self-awareness of this Focus Dynamics (as a «person») in various development scenarios. This formation is accomplished by bio-Creators of various «areas» of the Perception system (all possible brain parts, biological systems, and so on) of as if «one and the same person.» For Form-Creators, the NNAASSMM and VLOOOMOOT parameters determine quite ample opportunities for choosing, by Them, the more attractive (in the given focal-ethereal combination) Interests which are peculiar to the given Self-Consciousness Form at the given moment. In the meantime, subterransive features of the Focus Dynamics itself narrow down all these opportunities to any certain choice, as a result of which the next development scenario «appears» *as if* by itself in Space-Time. The details of this scenario are reflected in the FD of any certain «personalized» Interpretation.

4.0111. Actually, all Space-Time is holochronely structured with the infinite amount of different-Qualitativezeroingredients,whichduvuyllerrtlyconverttoeachotherthroughoutthemultipolarizationspectrum of slloogrent Focus Dynamics. The Focus Dynamics of various Creators-KARMOIDS serve as the means for their exhibition in the Perception systems of each of Self-Consciousnesses Forms. These details and specificities of origination of various Levels of manifestation of the abyssal Illusion of Macrocosmos are a very significant issue for your more profound comprehension of functionality principle of zero ingredients, as well as all countless variety of development scenarios, which are originated inside the f-Configuration of the skrruullerrt system from their universal properties.

4.0112. The main functional role in this general Process of multipolarizational subjective amitsirations of synthesizing Form-Creators belongs to a particular category of Creators-correctors of Self-Consciousness of the SSS-Entity; They Self-realize equally through the f-Configurations of absolutely all Form-Creators, as well as through the ethereal Configurations of Info-Creators, while almost totally defining and adjusting Their joint resonational activity. This superior category of all-controlling and all-leading Creators is classified by us as *Creators-confectons*. Though They do not participate *directly* in the synthetic or some another — propriusal — Process of convergent consummatization of the primogenitive SSS-State to the confective One, but these are They Who completely arrange, direct, and support its implementation.

4.0113. By the specificity of Their performed functions in our Macrocosmos type, we can distinguish two main groups of Creators-confectons:

1. Creators-*diyfragrrallsts*, which «project» («send»), to the focal Configurations of Form-Creators, absolutely all nuances related to implementation, by Them (inside each focal-ethereal interconnection!), of amplificational features of the eglleroliftive Impulse-Potential;
2. Creators-*lyuyussigms* — carriers of qualitational features of the irrkoglictive Impulse-Potential; They provide real opportunities for manifestation of Info-Creators in each Focus Dynamics of Form-Creators.

4.0114. The point is that the degree of resonational interaction (between Form-Creators and Info-Creators) in heterogeneous combinations of the attributes might be absolutely the same. In such cases, the role of Creators-confectons is in «distribution» of focal-ethereal interconnections, simultaneously originated — but equally resonational! — in any Synthesis Scheme, into different-protoformal diffuzgent Synthesis Schemes structuring different birvularity types. It affects synthesizing functions of Form-Creators, so it allows Them to implement simultaneously Their qualitative features manifested in equally resonational interconnections, in completely different Self-Consciousnesses Forms (and even in different Macrocosmoses' types!).

4.0115. It can be said that synthetic and other propriusal Form-Creators of all types are direct executors of the holochrone Consummatization Act (They are the given mercavgnation «Project» «contractors»). Creators-confectons are superior organizers of the Act («customers» of «the Project of Informational reconstruction») Who are empowered to perform this function by the presence of

the Act of the USIP-Initiation. I would like to emphasize that They can be classified both under Form-Creators, and Info-Creators because of Own functional specificity (Creators-confectons represent an already completely implemented state of absolute Consummatization in each FD). Any subjective division is just impossible for Them because They are holochronely involved in Configurations of both types.

4.0116. They can be classified under Form-Creators because, at the highest Levels of Consummatization, They are still the latent part of the sloopgrent Configuration of the most amplificational Form of Collegial Cosmic Intelligences (in our case — the HCCI of Macrocosmos). Also, They are classified under Info-Creators just because They represent absolutely all the informational basis for the confective State (new inter-skunkktional interconnections jointly transformed and holochronely universalized by all realizational versions of Impulse-Potentials).

4.0117. As noted before, in the Form-structures of Self-Consciousness of our Universal DDIIUYYI-Entity, Creators-confectons Self-realize through the whole set of Their inherent analogs: Creators-*iksons* (in conditions of the Quaternary Illusion), Creators-*svilgsons* (in conditions of the Tertiary Illusion: *ukstrs* — to 1.0 dimension, *takstrs* — to 2.0 dimension, *yyukstrs* — to 3.0 dimension, *hvasslons* — to 4.0 dimension, *rorants* — to 5.0 dimension, *vivyvs* — to 6.0 dimension, *vullsses* — to 7.0 dimension, *mmirsses* — to 8.0 dimension, *doylsses* — to 9.0 dimension, *kralms* — to 10.0 dimension, *vuulhms* — to 11.0 dimension, *fiyms* — to 12.0 dimension, *ivvsses* or actually *svilgsons* — to 13.0 dimension), Creators-*avvakklons* (in conditions of the Secondary Illusion), and Creators-*flaaggtuons* (in conditions of the Primary Illusion). They represent the basis for all exuberation Mechanism of each Self-Consciousness Form in specific conditions of each of the given Levels of the PFD.

4.0118. In ethereal component of all Focus Dynamics, Creators-confectons are represented as Creators-*oodm moons* (the Quaternary Illusion — OODMM-DDMOO-Creators), Creators-*ffmillims* (the Tertiary Illusion — SLUI-SLUU-Creators), Creators-*liiyllims* (the Secondary Illusion — GLLAA-GLLII-Creators), Creators-*uuyyuums* (the Primary Illusion — UUYG-UUYU-Creators). Owing to this, all the Info-Creators, anyhow simultaneously manifested in different-Qualitative Focus Dynamics of Form-Creators, acquired the ability to reflect potentially, in their inherent versions of Creative Activity, already not only primogenitive types of inter-skunkktional interconnections, but also completely universalized, confective ones).

4.0119. There is absolutely no sense to say functions of which of these Creators are «more significant» because Form-Creators (and Info-Creators used by Them) are assigned with consummatizational Responsibility for arrangement of all the diversity of heterogeneous objective focal-ethereal interconnections «inside» the entire skruullerrt system (all over the spectrum of synthetic consummatization), while the eglleroliftive-amplificational functions of subterransive manifestations of each of countless multipolarized versions of subjective *svilgs-spherational* Focus Dynamics of each Self-Consciousness Form are completely provided by Creators-confectons.

4.0120. Absolutely all the multitude of very diverse Self-Consciousnesses Forms *already* holochronely-simultaneously exists in Space-Time as all Form-structures of Our Universal DDIIUYYI-Entity. This profective fact is the «achievement» of exactly Creators-KARMOIDS because

They are exactly Those Who synthesized — covarllertly connected among each other — absolutely all causal (cause-and-effect) interconnections among Creators-ASTROIDS and Creators-PLASMOIDS (of course, it could not be executed without active participation of Info-Creators). But each conditional «moment» of implementation of this — simultaneously multipolarized in the multitude of its different-Qualitative realizational versions — synthetic (or any other) Process is completely provided by Creators-confectons.

4.0121. In their informational Nature, Creators-KARMOIDS — at each of Their inherent Levels of «local» exhiberation in Space-Time — represent the most complete (but just *in the given certain conditions!*) version of *collaborative* creation of Creators-ASTROIDS and Creators-PLASMOIDS through Whose FDs, at the given «point» of Energy-Plasma, the focal-ethereal interconnections among absolutely all heterogeneous Aspects of the twelve OO-UU-Entities, simultaneously manifested at the given «local point,» are really levelled (qualitatively balanced on different-birvulyart features).

4.0122. It can be said that Creators-KARMOIDS are the result of resonational combination of *emanations* (attributes of conditionally mental — in our subjective Conceptions! — PCQs) and *psychonations* (attributes of conditionally vital — in our subjective Conceptions! — PCQs), which were able to perform focal-ethereal combinations needed for Them (with assistance of FDs of Creators-ASTROIDS and Creators-PLASMOIDS) during the mercavgnation Act in each of specific exhiberation conditions of Worlds' Form-systems; and they could be realized as *karmonations* owing to Creators-KARMOIDS.

4.0123. As it happens that, to exclude the mess in your Perception systems at studying the features of inter-skunkktional interconnections implemented among attributes of various PCQs in the SSS-State and at analyzing the processes inherent in the Focus Dynamics of the Worlds' Form-systems, there is the necessity to name all *focal manifestations* of «EMANATIONS» in the Form-structures of Macrocosmos as qualitatively corresponding Creators-PLASMOIDS. In the same way, we will name focus carriers of all the attributes of «PSYCHONATIONS» as Creators-ASTROIDS, and aggregate attributes of «KARMONATIONS» — as Creators-KARMOIDS.

4.0124. Here is one more important thing. Such terms as «GLEIYYO-dimension» and «UDDVOO-dimension» are mentioned in the tables listed below. These iissiidiological notions represent all possible versions of *cruvursorrt* (fundamentally incompatible) states of general multipolarization of slloogrent Focus Dynamics of Form-Creators of different-Qualitative (almost conditionally dual by focal-ethereal parameters, compared by us) f-Configurations of different Self-Consciousnesses Forms, which are simultaneously manifested in different exhiberation conditions of Space-Time.

4.0125. As far as, in FD multipolarization (on the given Synthesis Scheme!), *as if within one and the same diapason*, the concurrent performance of any multipolarizational Forms of its realizational manifestation is possible (from the most depliative to the most ampliative ones in relation to the conditions of the given Synthesis Scheme), so the simultaneous process of exhiberation of these, dual in their Nature, varieties of Focus Dynamics of Self-Consciousnesses Forms of one Stereo-Form is provided by different functional Form-Creators. They create completely different (*dual*, qualitatively opposite in our subjective Consideration) types of Space-

Time, which strongly differ from each other by their subterraneous properties, peculiarities, and realizational capabilities.

4.0126. On the basis of subjective evaluation of those qualitative differences, which appear in these *dual* exhibition conditions (from the standpoint of our «current» type of Existence), I had seen fit to determine the natural conditions for development of human Self-Consciousnesses Forms, which actively perform *svilgs-spherational amitsirations* in the *lluuvvumic* or near-*lluuvvumic* *birvulyarity* types, as GLEIYO-dimension with the mark «+» (in other words, «the correct one» implemented strictly in accordance with our Synthesis Scheme). All versions of exhibition conditions of our NUU-VVU-Form-Types, which represent *cruvursorrt* states of the FD multipolarization boundary in relation *to the given* Synthesis Scheme (manifested on the verge of transition to the next — three-invaderental — Synthesis Scheme or to Schemes of other Proto-Forms), have been determined by me as UDDVOO-dimension conditionally marked with the mark «-.»

4.0127. However, actually, not everything is as simple, as it could seem to you from the first sight (they say, therefore, UDDVOO-dimension is structured either with human FLAKS-Forms, or with our defective Forms: morons and imbeciles). In our diapason, GLEIYO-dimension reflects the Directions of our development which are *covarlert* (compatible) by principles and qualitative state of their implementation with the main (for mixtum NUU-VVU-Form-Types) signs of the *lluuvvumic* development Direction (HIA, HSI, *immunitant Responsibility*, and *humanitarian Freedom*). This way, for the SFUURMM-Forms of near-*lluuvvumic* choices, it is peculiar to manifest the *ampliative* combinations of attributes of some of the two — invaderental for our Synthesis Scheme — PCQs: either ALL-Love–ALL-Wisdom, or ALL-Will-of-ALL-Intelligence. Another part of the Focus Dynamics might consist of equally *ampliative* SFUURMM-Forms which reflect attributes of some of the rest PCQs.

4.0128. For example, in addition to SFUURMM-Forms of high-sensual Intellect (performing attributes of the ALL-Will-of-ALL-Intelligence PCQ), vital (sensual) part of Focus Dynamics of a human person, who develops within a near-*lluuvvumic* Direction, can be expressed through high-nutational combinations, peculiar to attributes of the following PCQs: ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Voidness–ALL-Fullness, ALL-Voidness–ALL-Vacuumness (or ALL-Unity, also ALL-Steadiness–ALL-Stability as *diffuzgent-transitional* PCQs). In the same way, in addition to attributes of high-intellectual Altruism (performing attributes of the ALL-Love–ALL-Wisdom PCQ), SFUURMM-Forms of the Focus Dynamics of such person might be structured with high-nutational mental attributes of such PCQs as ALL-Primordiality–ALL-Initiality, ALL-Mobility–ALL-Presence, ALL-Knowledge–ALL-Informedness, ALL-Aspiration (or ALL-Unity, also ALL-Steadiness–ALL-Stability as *diffuzgent-transitional* PCQs).

4.0129. Various qualitative Levels of GLEIYO-dimension include also the NUU-VVU-Form-Types whose FDs are structured not only with *ampliative*, but also with *depliative* (towards our Synthesis Scheme) combinations of heterogeneous SFUURMM-Forms when high-sensual Intellect is replaced by cunning and deviousness of adapting mind and high-intellectual Altruism is replaced by completely invincible logics of cynical selfishness. Both of these conditional categories — *depliative* and *ampliative* ones — of people, so different by their development and Conceptions, get along with

each other sometimes in a mysterious way — **IN THE COMMON FOR THEM «HERE AND NOW!»** — in common groups of human Continuums. With own Focus Dynamics, these categories of the NUU-VVU-Form-Types simultaneously structure the same Form-structures which subjectively belong to GLEIIYO-dimension. *At the same moment*, all versions of their «personalized» Interpretations, who are making qualitatively different choices (even contrary by sense, «mirrored»), form, by their FDs, the Form-structures which we conditionally relate to UDDVOO-dimension.

4.0130. You should understand that both GLEIIYO- and UDDVOO-dimensions are absolutely subjective notions considered by us in relation to the Focus Dynamics of Form-Creators of not only lluuvvumic, but also any other birvulyarity types. The necessity for their introduction is caused by the presence of the Multipolarization Principle and our regularly appearing requirement to compare *qualitatively* — at consideration of each specific case of Focus Dynamics — its current version with a radically opposite decision made concurrently by another «personalized» Interpretation in completely other conditions of simultaneous manifestation of the given Stereo-Form.

4.0131. Actually, the very fact of the presence, in the f-Configuration of Form-Creators, of those specific exuberation regimes, which influence greatly on the qualitative state of the FD, is determined by us subjectively as UDDVOO-dimension. We always can consider its *absolutely conditional* parameters exceptionally in relation to something that is quite well-known for us and that can be adjusted by attributes and criteria accessible to us. However, in the gabitual Reality (in all the diversity of holochrone-simultaneous manifestation of absolutely all SCFs and CCIs of the skrruullerrt system), meaning, without taking into account the specificity of Focus Dynamics of some external Observer, such notions and criteria are simply NON-EXISTENT.

4.0132. The UDDVOO- and GLEIIYO-types of dimension are still the two (necessary for us for subjective qualitative comparison), radically different between each other by their Sense, versions of simultaneous manifestation of Form-Creators' Focus Dynamics of different-Qualitative «personalized» Interpretations of «one and the same person» in various development scenarios. It can be said that GLEIIYO-dimension is a part of our subterransive Focus Dynamics which we realize instant-by-instant as «our personal» existence. UDDVOO-dimension is a part of the general multipolarization of our Stereo-Form's FD which right now (at subjective «here and now») is placed not only beyond comprehension by bio-Creators of our «current» Perception system, but also beyond our «contemporary» capabilities of deep comprehension of those objective reasons, which motivate us on making this particular decision — almost in the same circumstances! It should be added also that, actually, any choice, made by us — the mixtum NUU-VVU-Form-Types — in the given GLEIIYO-dimension diapason, can be considered as *qualitatively opposite* (dual) towards the choices made by Form-Creators of our dimidiomittense and translucense NUU-VVU-Self-Consciousnesses Forms who perform their FDs already in completely different exuberation regimes as compared to our «here and now.»

4.0133. Every Focus Dynamics of Form-Creators possesses an opportunity for own material manifestation in each of the Worlds' Form-systems exceptionally at availability of conditions for resonational merge with its narrow-specific energy-informational structure. For example, the different-protoformal Self-Consciousnesses Forms' Focus Dynamics, which is structured by attributes

invaderentness of such OO-UU-Entities as ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence, has an opportunity to be manifested ambigularly in the Space-Time regimes where at least one of PCQs, represented by them, is dominant (the second one could be either dominant, or vecsative). Only in such cases, some degree of Resonationness appears among FDs of different-protoformal Self-Consciousnesses Forms, which structure the given Form-system of the Worlds (STCs, CSRs). That allows them to get into some energy-informational interconnections among each other.

4.0134. However, the fact that FDs of many Self-Consciousnesses Forms possess such conditions of resonational compatibility provides a *general* possibility for appearance of resonational interaction among Form-Creators of those Forms at the level of subjective Perception systems inherent in them. The possibility for active combining subterransive energy-informational parameters, which structure Perception systems of various Proto-Forms — this is the main criterion which is crucial at the formation process of various groups of STCs and CSRs. Within each of those groups, the Self-Consciousnesses Forms structuring them show *the definite degree* of resonating of their inherent Focus Dynamics. That allows them to form ambigularly strictly specific type of complex-organized (by heterogeneous features) dimension exactly at the given «area» in Space-Time (and nowhere else).

4.0135. Because of difference in degree of resonationness among characteristics of Perception systems of jointly interacting Self-Consciousnesses Forms in the given groups of STCs, the general for them all, definite exhibition diapason is originated where all of them are able to perceive each other subterransively. All types of energy-informational interactions, which are qualitatively inappropriate for acceptable parameters of the given dimension diapason (both in more depliative, and more ampliative manifestations), as if subjectively «fall out» of sphere of direct exercise of Focuses of Close Attention of Form-Creators of the given STCs' (and CSRs') groups. In the meantime, they (focal-ethereal interactions) are performed simultaneously through the Focus Dynamics of Form-Creators of other groups of STCs (and CSRs), which meet the necessary requirements by the degree of Resonationness among each other.

4.0136. The structure of every Form-system, including what we call «the World,» is too complex and multifaceted. If considering energy-informational construction of every World at the nutational (wave) level, we can say that each of its structuring waves consists of many, resonationally related to each other, different-Qualitative components. Their general manifestation parameters depend on the degree of their compatibility with activity of Aspects of namely those invaderental Pure Qualities which are peculiar to the synthetic process executed through Self-Consciousnesses Forms of the given Worlds' Form-system. For example, electromagnetic properties are peculiar to the waves, which structure mixtum analogs of all NUU-VVU-Form-Types. That means the predominance of Creative Activity of Aspects of such OO-UU as ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence inside their FDs and focal Configurations.

4.0137. Since our «current» Synthesis Scheme is based on invaderentness of exactly this OO-UU-pair, the Focus Dynamics of namely humans possess much more realizational opportunities (therefore, they show the highest degree of prosperativeness for self-development) in the given Worlds' Form-systems (as compared to all other Proto-Forms in whose Synthesis Schemes any of qualitative constituents — either ALL-Love–ALL-Wisdom or ALL-Will-of-ALL-Intelligence — is invaderental,

while another constituent is vecsative). That is why namely people (but not all the diversity of animals and plants) acquire zones of increasing activity of Focus Dynamics in such Worlds' Form-systems. Such zones become the main objects of creative manifestations and all possible qualitative transformations in accordance with inherent just to people, Conceptions about «themselves» and about specificity of their surrounding reality.

4.0138. At each of these «zones of creative application,» resonational groups of so-called «human» STCs are originated, from the general Focus Dynamics (NUU-VVU-Form-Types) of which original varieties and types of human subjective Realities (CSRs) are emerged. Somewhere creative Interests of people are implemented very slightly or in no way at all; therefore, groups of different-protoformal STCs and CSRs are formed there simultaneously in whose Synthesis Schemes either of two electromagnetic attributes is provided (through the features of subjective Perception systems) with the invaderental manifestation regime, and another one is provided with the vecsative (background) regime.

4.0139. The nutational diapason of specific manifestation of each Worlds' Form-system (through all the multitude of its Self-Consciousnesses Forms) is always originated by a definite set of different-Qualitative, but resonationally compatible with each other, Form-Creators' Focus Dynamics which are structured with invaderental (for the given Form-system!), as well as with vecsative OO-UU-attributes. Every electromagnetic wave represents a spheroidal different-Qualitative focal formation (a slloogrent Configuration) which shares individually its inherent Energy-Information all over qualitatively multidimensional infiniteness of the Universe by means of Form-Creators' Focus Dynamics of definite Self-Consciousnesses Forms which play the role of this wave's inertial carriers.

4.0140. Each wave is slloogrent in its informational Nature. Nevertheless, in each of the Worlds' Form-systems structured by the wave at every dimension level, it is able to appear only as a certain section of its inherent different-Qualitative spectrum. Only FDs of Form-Creators (bio-Creators) of Perception of the Self-Consciousnesses Forms, exhiberated at the given Form-system, could actively resonate to that section of wave. Namely this section, specifically reflected at the given «localization point» in Space-Time, represents the source of decoherent Energy-Information for FDs of Form-Creators and serves as the basis for origination of «here and now» of GLEIYO-type of dimension. In the meantime, the rest part of dissipative Energy-Information of the wave spectrum, which is unavailable for «unpacking» by Form-Creators exactly in the given conditions of their FDs' manifestation (in the Perception systems of Self-Consciousnesses Forms focused by those Form-Creators exactly «here and now»), represents the energy-informational basis for simultaneous origination of all the multitude of UDDVOO-types of dimension.

4.0141. In the text, the mark «±» is applied to dimension parameters when I describe all the multitude of multipolarized, in relation to each other, realizational versions simultaneously implemented by the slloogrent Focus Dynamics in various conditions of Space-Time. That means that the given consideration does not imply the presence of the point of view of a subjective Observer who is able to assess dualistically the general — universal — manifestation of the *objective* Reality. The considerations reflects the fundamental Principles of Energy-Plasma exhiberation when any opportunities for subjective separation of the slloogrent Whole (Macrocosmos) into consisting parts (including GLEIYO and UDDVOO) are just absent.

4.0142. That is why simultaneous exhibitions of different-Qualitative groups of STCs, structured with parameters of GLEIIYO-dimension, are always perceived by us subjectively as *catioleptic* ones («current» ones as for awareness of «present» us). Meanwhile, existing concurrently with them, groups of STCs, structured with qualitatively very different (right up to predominance of dual attributes in the FD) parameters of UDDVOO-dimension are perceived as *anioleptic* ones (potentially possible, unavailable in the given conditions of exhibition, but simultaneously implemented by some versions of our «personalized» Interpretations in other conditions). I remind you that the Form-Creators' Focus Dynamics of those impersept-cruvursorrt types of STCs and Self-Consciousnesses Forms correlate with each other as *adversoppositional* subjective states.

4.0143. Below, there are Plasmic Forces Diapasons peculiar to exhibition of diverse Form-Creators categories: PLAZMOIDS, ASTROIDS, KARMOIDS, and FORMOIDS.

## 12 civilizations of PLAZMOIDS — Form-Creators of MENTAL-Plasma in the FDs of Globes of the AIILLIISS Stellar Entity

### The lowest levels

(up to  $\pm 4.0$  dimension)

#### GLEIIYO-dimension:

AAOLL-MAA to +1.0 *dimension*;  
ASSFFAL-MAA to +2.0 *dimension*;  
SKVAASS-MAA to +3.0 *dimension*;  
RRUURSS-MAA to +4.0 *dimension*.

#### UDDVOO-dimension:

LALL-MAA-MMA to -1.0 *dimension*;  
FALL-LAA-MMA to -2.0 *dimension*;  
SAVV-VAA-MMA to -3.0 *dimension*;  
SARR-RAA-MMA to -4.0 *dimension*.

### The middle levels

(from  $\pm 4.0$  to  $\pm 8.0$  dimension)

#### GLEIIYO-dimension:

SPLUUM-MAA to +5.0 *dimension*;  
POOLG-MAA to +6.0 *dimension*;  
LOUNG-MAA to +7.0 *dimension*;  
DRAARRG-MAA to +8.0 *dimension*.

UDDVOO-dimension:

PSULL-MUU-MMA *to -5.0 dimension;*  
GLOPP-POO-MMA *to -6.0 dimension;*  
GLUNN-NUU-MMA *to -7.0 dimension;*  
GRARR-RAA-MMA *to -8.0 dimension.*

**The highest levels**

(from  $\pm 8.0$  to  $\pm 12.0$  dimension)

GLEIYO-dimension:

MMAARG-MAA *to +9.0 dimension;*  
KNUAKK-MAA *to +10.0 dimension;*  
ELGFFLUM-MAA *to +11.0 dimension;*  
EMFFLII-MAA *to +12.0 dimension.*

UDDVOO-dimension:

RAMM-MAA-MMA *to -9.0 dimension;*  
KANN-NAA-MMA *to -10.0 dimension;*  
FULL-LUU-MMA *to -11.0 dimension;*  
FILL-LII-MMA *to -12.0 dimension.*

12 civilizations of ASTROIDS — Form-Creators of ASTRAL-Plasma in the FDs of Globes of the  
AIILLIIS Stellar Entity

**The lowest levels**

(up to  $\pm 4.0$  dimension)

GLEIYO-dimension:

TVAARR-DRUU *to +1.0 dimension;*  
NAOLLM-DRUU *to +2.0 dimension;*  
OOSMM-DRUU *to +3.0 dimension;*  
SVIILL-GRUU *to +4.0 dimension.*

UDDVOO-dimension:

KHLAA-A-LDR *to -1.0 dimension;*  
LMOO-O-LDR *to -2.0 dimension;*  
SMOO-O-LDR *to -3.0 dimension;*  
LLII-I-LDR *to -4.0 dimension.*

## The middle levels

(from  $\pm 4.0$  to  $\pm 8.0$  dimension)

### GLEIIYO-dimension:

ULLU-GRUU *to +5.0 dimension;*  
PROUG-GRUU *to +6.0 dimension;*  
FROOMM-GRUU *to +7.0 dimension;*  
VRIIV-GRUU *to +8.0 dimension.*

### UDDVOO-dimension:

LLUU-LLU-GR *to -5.0 dimension;*  
GROO-RRO-GR *to -6.0 dimension;*  
MMOO-MMO-GR *to -7.0 dimension;*  
VVII-VVI-GR *to -8.0 dimension.*

## The highest levels

(from  $\pm 8.0$  to  $\pm 12.0$  dimension)

### GLEIIYO-dimension:

AARGS-SRUU *to +9.0 dimension;*  
LLOOFF-SRUU *to +10.0 dimension;*  
IIFFS-SRUU *to +11.0 dimension;*  
SSMAALL-SRUU *to +12.0 dimension.*

### UDDVOO-dimension:

GRAASS-AA-RS *to -9.0 dimension;*  
FLOOFF-OO-RS *to -10.0 dimension;*  
FRIIFF-II-RS *to -11.0 dimension;*  
MLAAMM-AA-RS *to -12.0 dimension.*

**KARMOIDS' Civilizations — Form-Creators of KARMO-Plasma in the FDs of Globes of the AILLIISS Stellar Entity**

## The lowest levels

(from 0.0 to  $\pm 4.0$  dimension)

### GLEIIYO-dimension:

AALL-GA-LLUF *to +1.0 dimension;*  
UINNG-GU-LLUF *to +2.0 dimension;*

OURFF-GO-LLUF *to +3.0 dimension;*  
AILG-GI-LLUF *to +4.0 dimension.*

UDDVOO-dimension:

LAOLL-GLA-UFF *to -1.0 dimension;*  
NIGLU-GLU-UFF *to -2.0 dimension;*  
FRUU-GLO-UFF *to -3.0 dimension;*  
GALA-GLI-UFF *to -4.0 dimension.*

**The middle levels**

(from  $\pm 4.0$  — through 0.0 — to  $\pm 8.0$  dimension)

GLEIIYO-dimension:

OF-ORR-TOY *to +5.0 dimension;*  
OLL-MI-TOY *to +6.0 dimension;*  
UBB-LLU-TOY *to +7.0 dimension;*  
SSMALL-MMA-TOY *to +8.0 dimension.*

UDDVOO-dimension:

ROFF-TOR-UYF *to -5.0 dimension;*  
KAFF-LAF-UYF *to -6.0 dimension;*  
BULL-TUL-UYF *to -7.0 dimension;*  
KIGG-LIR-UYF *to -8.0 dimension.*

**The highest levels**

(from  $\pm 8.0$  — through 0.0 — to  $\pm 12.0$  dimension)

GLEIIYO-dimension:

USS-LISS-FLUYF *to +9.0 dimension;*  
ADD-MADD-FLUYF *to +10.0 dimension;*  
OFF-ROSS-FLUYF *to +11.0 dimension;*  
IYY-KIRR-FLUYF *to +12.0 dimension.*

UDDVOO-dimension:

NA-ARR-FRUSS *to -9.0 dimension;*  
RO-IMM-FRUSS *to -10.0 dimension;*  
GE-ELL-FRUSS *to -11.0 dimension;*  
YYU-USS-FRUSS *to -12.0 dimension.*

## 12 civilizations of FORMOIDS — Form-Creators of Form-Matter in the FDs of Globes of the AIILLIISS Stellar Entity:

(from -6.0 — through 0.0 — to +6.0 dimension)

### The lowest levels of Form-Matter

(from 0.0 to  $\pm 2.0$  dimension)

#### GLEIIYO-dimension:

PFUURG-VU *to +0.5 dimension;*  
STOILG-VU *to +1.0 dimension;*  
FRAARG-VU *to +1.5 dimension;*  
LOOLG-VU *to +2.0 dimension.*

#### UDDVOO-dimension:

KRROUKK-SS *to -0.5 dimension;*  
NNUULL-SS *to -1.0 dimension;*  
STTSUUFF-SS *to -1.5 dimension;*  
SLOORR-SS *to -2.0 dimension.*

### The middle levels of Form-Matter

(from  $\pm 2.0$  — through 0.0 — to  $\pm 4.0$  dimension)

#### GLEIIYO-dimension:

VVUURRRU-VU *to +2.5 dimension;*  
DDOOLLV-VU *to +3.0 dimension;*  
KKRROOSS-VU *to +3.5 dimension;*  
PPTTAADD-VU *to +4.0 dimension.*

#### UDDVOO-dimension:

IRRNGG-SS *to -2.5 dimension;*  
TTROKR-SS *to -3.0 dimension;*  
SKLUMM-SS *to -3.5 dimension;*  
ARFLL-SS *to -4.0 dimension.*

### The highest levels of Form-Matter (Plasma-Matter)

(from  $\pm 4.0$  — through 0.0 — to  $\pm 6.0$  dimension)

#### GLEIIYO-dimension:

FLAKFFO-U-VVU *to +4.5 dimension;*  
FROORM-U-VVU *to +5.0 dimension;*  
SKRAAKKR-U-VVU *to +5.5 dimension;*  
VUOLDTM-U-VVU *to +6.0 dimension.*

UDDVOO-dimension:

GLLAA-A-SSM to -4.5 dimension;  
LKHRUU-U-SSM to -5.0 dimension;  
FLTOO-O-SSM to -5.5 dimension;  
SMMII-I-SSM to -6.0 dimension.

**Form-Creators of the intermediate levels of Form-Plasma (NAAKHGRASST) in the FDs of  
Globes of the AIILLIIS Stellar Entity:**

(from  $\pm 6.0$  to  $\pm 9.0$  dimension)

KKOOL-MO-LLTR (from  $\pm 6.0$  to  $\pm 6.5$  dimension):  
OLLMO-MO-MTR (from  $+6.5$  to  $0.0$  dimension);  
TROOT-MO-TTR (from  $-6.5$  to  $0.0$  dimension).

ORFROVORT (from  $\pm 6.5$  to  $\pm 7.0$  dimension):  
ORFOR-VO-FT (from  $+7.0$  to  $0.0$  dimension);  
FTRO-VO-FORT (from  $-7.0$  to  $0.0$  dimension).

TTUUM-KHU-MMST (from  $\pm 7.0$  to  $\pm 7.5$  dimension):  
UMTUSS-KHU-ST (from  $+7.5$  to  $0.0$  dimension);  
MUUTTKH-KHU-ST (from  $-7.5$  to  $0.0$  dimension).

PRUUISSTR (from  $\pm 7.5$  to  $\pm 8.0$  dimension):  
USSTU-LL-USTR (from  $+8.0$  to  $0.0$  dimension);  
PTIRRI-LL-ISTR (from  $-8.0$  to  $0.0$  dimension).

NNAAR-DU-RRGS (from  $\pm 8.0$  to  $\pm 8.5$  dimension):  
ARNARR-DU-GGS (from  $+8.5$  to  $0.0$  dimension);  
DRAAN-DA-RGS (from  $-8.5$  to  $0.0$  dimension).

IYMIYLLIRT (from  $\pm 8.5$  to  $\pm 9.0$  dimension):  
ILLRI-LL-MIRT (from  $+9.0$  to  $0.0$  dimension);  
LLIYLI-LL-IYT (from  $-9.0$  to  $0.0$  dimension).

## Functional characteristics of Form-Creators at the lowest Globes of some Planetary Entities (CCIs of Physical, Mental, and Astral Plan-Overtones)

4.0144. *Mental* Form-Creators of GREIYSLIIS («*Earth*») — ASSFFAL-MAA (organize Worlds of the lowest Levels of GRIISSTMM), POOLG-MAA (organize the middle Levels of GRIISSTMM), and KNUAKK-MAA (organize the highest realities of GRIISSTMM). *Astral* Form-Creators of GREIYSLIIS — NAOLLM-DRUU (organize Worlds of the lowest Levels of AAYLLILIESS), PROUG-GRUU (organize the middle Levels of AAYLLILIESS), and LLOOFF-SRUU (organize the highest realities of AAYLLILIESS). Cooperative Creative Activity of These SLAA-SS-MII-Creators stimulates the activity of the following Creators-Formoids of GLEIYO-realities of the Physical Globe of GREIYSLIIS — STOILG-VU (organize Worlds of the lowest Levels of VUOLDTM), KKRROOSS-VU (organize the middle Levels of VUOLDTM), VUOLDTM-U-VVU (organize the highest Worlds of VUOLDTM). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of all the depliative causal interconnections among Collective Cosmic Intelligences of GREIYSLIIS — UINNG-GU-LLUF (organize Worlds of the lowest synthetic levels of AMGLALAA), OLL-MI-TOY (organize the middle synthetic levels of AMGLALAA), and ADD-MADD-FLUYF (organize the highest synthetic realities of AMGLALAA).

4.0145. *Mental* Form-Creators of STRIYLLGSS («*Jupiter*») — RRUURSS-MAA (Worlds of the lowest levels), RRUURSS-MAA (the middle levels), EMFFLII-MAA (the highest realities). *Astral* Form-Creators of STRIYLLGSS — SVIILL-GRUU (Worlds of the lowest levels), VRIIV-GRUU (the middle levels), SSMAALL-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIYO-realities of the Physical Globe of STRIYLLGSS — LOOLG-VU (Worlds of the lowest dense-material levels), PPTTAADDD-VU (the middle dense-material levels), VUOLDTM-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of STRIYLLGSS — AILG-GI-LLUF (Worlds of the lowest synthetic levels), SSMALL-MMA-TOY (the middle synthetic levels), IYY-KIRR-FLUYF (the highest synthetic realities).

4.0146. *Mental* Form-Creators of PROVOUDDSS («*Uranus*») — ASSFFAL-MAA (Worlds of the lowest levels), POOLG-MAA (the middle mental levels), KNUAKK-MAA (the highest realities). *Astral* Form-Creators of PROVOUDDSS — NAOLLM-DRUU (Worlds of the lowest levels), PROUG-GRUU (the middle levels), LLOOFF-SRUU (the highest realities). The cooperative Creative Activity of These SLAA-SS-MII-Creators stimulates the activity of the following Creators-Formoids of GLEIYO-realities of the Physical Globe of PROVOUDDSS — STOILG-VU (Worlds of the lowest dense-material levels), DDOOLL-VU (the middle dense-material levels), FROORM-U-VVU (the highest dense-material realities). In their turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of PROVOUDDSS — UINNG-GU-LLUF (Worlds of the lowest synthetic levels), OLL-MI-TOY (the middle synthetic levels), ADD-MADD-FLUYF (the highest synthetic realities).

4.0147. *Mental* Form-Creators of VRAALSVISS («*Chiron*») — RRUURSS-MAA (Worlds of the lowest levels), LOUNG-MAA (the middle levels), ELGFFLUM-MAA (the highest realities). *Astral* Form-Creators of VRAALSVISS — SVIILL-GRUU (Worlds of the lowest levels), FROOMM-GRUU (the middle levels), IIFFS-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity

of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of VRAALSVISS — LOOLG-VU (Worlds of the lowest dense-material levels), KKRROOSSS-VU (the middle dense-material levels), SKRAAKKR-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of VRAALSVISS — AILG-GILLUF (Worlds of the lowest synthetic levels), UBB-LLU-TOY (the middle synthetic levels), IYY-KIRR-FLUYF (the highest synthetic realities).

**4.0148.** *Mental* Form-Creators of SLUUIISS («*Proserpina*») — SKVAASS-MAA (Worlds of the lowest levels), LOUNG-MAA (the middle levels), ELGFFLUM-MAA (the highest realities). *Astral* Form-Creators of SLUUIISS — OOSSMM-DRUU (Worlds of the lowest levels), FROOMM-GRUU (the middle levels), IIFFS-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of SLUUIISS — FRAARG-VU (Worlds of the lowest dense-material levels), KKRROOSSS-VU (the middle dense-material levels), SKRAAKKR-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of SLUUIISS — OURFF-GO-LLUF (Worlds of the lowest synthetic levels), UBB-LLU-TOY (the middle synthetic levels), IYY-KIRR-FLUYF (the highest synthetic realities).

**4.0149.** *Mental* Form-Creators of SLIIMPFLIISS («*Venus*») — ASSFFAL-MAA (organize Worlds of the lowest levels), POOLG-MAA (the middle levels) and KNUAKK-MAA (the highest realities). *Astral* Form-Creators of SLIIMPFLIISS — NAOLLM-DRUU (organize Worlds of the lowest levels), PROUG-GRUU (organize the middle levels) and LLOOFF-SRUU (organize the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of SLIIMPFLIISS — STOILG-VU (organize Worlds of the lowest levels of the Physical Plan), DDOOLL-VU (organize the middle levels of the Physical Plan), FROORM-U-VVU (organize the highest Worlds of the Physical Plan). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of SLIIMPFLIISS — UINNG-GU-LLUF (organize Worlds of the lowest synthetic levels), OLL-MI-TOY (the middle synthetic levels) and ADD-MADD-FLUYF (the highest synthetic realities).

**4.0150.** *Mental* Form-Creators of LKHVAAYFFSS («*Neptune*») — AOOLL-MAA (Worlds of the lowest levels), SPLUUM-MAA (the middle levels), MMAARG-MAA (the highest realities). *Astral* Form-Creators of LKHVAAYFFSS — TVAARR-DRUU (Worlds of the lowest levels), ULLU-GRUU (the middle levels), AARGS-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of LKHVAAYFFSS — PFUURG-VU (Worlds of the lowest dense-material levels), VVUURRRU-VU (the middle dense-material levels), FLAKFFO-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of LKHVAAYFFSS — AALL-GA-LLUF (Worlds of the lowest synthetic levels), OF-ORR-TOY (the middle synthetic levels), USS-LISS-FLUYF (the highest synthetic realities).

**4.0151.** *Mental* Form-Creators of KUULDVUDDSS («*Saturn*») — SKVAASS-MAA (Worlds of the lowest levels), LOUNG-MAA (the middle levels), ELGFFLUM-MAA (the highest realities). *Astral* Form-Creators of KUULDVUDDSS — OOSSMM-DRUU (Worlds of the lowest astral levels), FROOMM-GRUU

(the middle astral levels), IIFFS-SRUU (the highest astral realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of KUULDVUDDSS — FRAARG-VU (Worlds of the lowest dense-material levels), KKRROOSSS-VU (the middle dense-material levels), SKRAAKKR-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of KUULDVUDDSS — OURFF-GO-LLUF (Worlds of the lowest synthetic levels), UBB-LLU-TOY (the middle synthetic levels), OFF-ROSS-FLUYF (the highest synthetic realities).

4.0152. *Mental* Form-Creators of KROUVDSS («*Mars*») — AAOLL-MAA (Worlds of the lowest mental levels), SPLUUM-MAA (the middle mental levels), MMAARG-MAA (the highest mental realities). *Astral* Form-Creators of KROUVDSS — TVAARR-DRUU (Worlds of the lowest astral levels), ULLU-GRUU (the middle astral levels), AARGS-SRUU (the highest astral realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of KROUVDSS — PFUURG-VU (Worlds of the lowest dense-material levels), VVUURRRU-VU (the middle dense-material levels), FLAKFFO-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of KROUVDSS — AALL-GA-LLUF (Worlds of the lowest synthetic levels), OF-ORR-TOY (the middle synthetic levels), USS-LISS-FLUYF (the highest synthetic realities).

4.0153. *Mental* Form-Creators of GNUIYRRSS («*Pluto*») — AAOLL-MAA (Worlds of the lowest levels), SPLUUM-MAA (the middle levels), MMAARG-MAA (the highest realities). *Astral* Form-Creators of GNUIYRRSS — TVAARR-DRUU (Worlds of the lowest levels), ULLU-GRUU (the middle levels), AARGS-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of GNUIYRRSS — PFUURG-VU (Worlds of the lowest dense-material levels), VVUURRRU-VU (the middle dense-material levels), FLAKFFO-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of GNUIYRRSS — AALL-GA-LLUF (Worlds of the lowest synthetic levels), OF-ORR-TOY (the middle synthetic levels), USS-LISS-FLUYF (the highest synthetic realities).

4.0154. *Mental* Form-Creators of STRULLMSS («*Mercury*») — SKVAASS-MAA (Worlds of the lowest levels), LOUNG-MAA (the middle levels), ELGFFLUM-MAA (the highest realities). *Astral* Form-Creators of STRULLMSS — OOSMM-DRUU (Worlds of the lowest levels), FROOMM-GRUU (the middle levels), IIFFS-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIIYO-realities of the Physical Globe of STRULLMSS — FRAARG-VU (Worlds of the lowest dense-material levels), KKRROOSSS-VU (the middle dense-material levels), SKRAAKKR-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of STRULLMSS — OURFF-GO-LLUF (Worlds of the lowest synthetic levels), UBB-LLU-TOY (the middle synthetic levels), OFF-ROSS-FLUYF (the highest synthetic realities).

4.0155. *Mental* Form-Creators of DROURRKHLASS («*Kinyotta*») — RRUURSS-MAA (Worlds of the lowest levels), RRUURSS-MAA (the middle levels), EMFFLII-MAA (the highest realities). *Astral* Form-Creators of DROURRKHLASS — SVIILL-GRUU (Worlds of the lowest levels), VRIIV-GRUU

(the middle levels), SSMAALL-SRUU (the highest realities). Their cooperative Creative Activity stimulates the activity of the following Creators-Formoids of GLEIYO-realities of the Physical Globe of DROURRKHLASS — LOOLG-VU (Worlds of the lowest dense-material levels), PPTAADDD-VU (the middle dense-material levels), VUOLDTM-U-VVU (the highest dense-material realities). In turn, Their tripartite activity emerges and stimulates the Creative Activity of MAALLAA-Creators of DROURRKHLASS — AILG-GI-LLUF (Worlds of the lowest synthetic levels), SSMALL-MMA-TOY (the middle synthetic levels), IYY-KIRR-FLUYF (the highest synthetic realities).

## **Chapter 4. Functional interconnections between Form-Creators of Self-Consciousnesses Forms of Plan-Overtones and Subplan-Overtones of Fields-Consciousnesses**

4.0156. Focus Dynamics of Collective Cosmic Intelligences of each of Plan-Overtones of Fields-Consciousnesses of the PFD are structured in such slloogrent-duvuyllerrt way so they include the definite set of «projections» of focal-ethereal interconnections of corresponding to them, more amplificational, Diapasons, which structure Cosmic Plan-Levels. Owing to this type of focal Configurations structuring, Form-Creators of each Plan-Overtone of the Tertiary Illusion are provided with active and more objective creative interconnections with the Form-Creators of Collective Cosmic Intelligences of their inherent Secondary Illusion Diapason.

4.0157. For example, SLAA-SS-MII-Creators of the Mental Plan-Overtone are in the permanent creative connection with SSLOO-SS-SNAA-Creators of the Cosmic Mental Plan-Level (SFFLURUISST > VVUURLIKHT >> NRAALLGASST). SLAA-SS-MII-Creators of the Astral Plan-Overtone are provided energy-informationally by SSLOO-SS-SNAA-Creators of the Cosmic Astral Plan-Level (SSMIISSTSENT > GROOLLUGORFF >> FERBIYLLILLERT).

4.0158. CCIs of SLAA-SS-MII-Creators of the Physical Plan-Overtone and Causal Plan-Overtone also interact actively with the «projections» of SSLOO-SS-SNAA-Creators from Their more amplificational Plan-Levels. Through the Superior Form-making Principles of the Tertiary Energy-Plasma, those SSLOO-SS-SNAA-Creators send, to Their Focus Dynamics, the Energy-Information peculiar to the Form-structures of the Secondary Illusion: SFFLURUISST + SSMIISSTSENT > VVUURLIKHT + GROOLLUGORFF >> NRAALLGASST + FERBIYLLILLERT = TRUURRGURRDT-SSMII-I + OOSLLLOOLLS >> TRUURRGURRDT-NAAKHGRASST + AFKALDUUFR.

4.0159. Actually, SSLOO-SS-SNAA-Creators of «the lowest» Plan-Levels of the PFD are different from any types of SLAA-SS-MII-Creators of the Plan-Overtones only in functional capabilities of creative manifestation in the states peculiar to various degrees of inertionness of the Form-structures f-Configurations of the Tertiary Illusion. Differing with quite more complex and universal exhibition Mechanism for manifestation in more dense-plasmic regimes, SSLOO-SS-SNAA-Creators as if transgress (manifest) «from Themselves» the infinite multitude of creative «projections» of Their own Focuses, corresponding to Them in Essence, but much more depliative than They are

by qualitative state of Their inherent interconnections. It happens just in the way as we generate multipolarizationally the most depliative versions of our FDs along with their most ampliative versions. Thus, SLAA-SS-MII-Creators become «the creative tools» of SSLOO-SS-SNAA-Creators in all the Processes of Their Self-discovery in specific manifestation conditions of Form-systems of the Tertiary Illusion.

4.0160. Therefore, the most significant difference among s-Realities of «the lowest» Form-structures of the Plan-Levels (SS-UU-SSS-YUU-SS) and s-Realities of «the highest» Form-structures of Plan-Overtones (SS-FILL-SSS-MAALL-SS) consists in the Levels of qualitative state of the focal-ethereal interconnections which make them: Focal-ethereal interconnections of the Plan-Overtones are much less dynamical, different-type, different-Qualitative, and balanced among Each Other due to disbalancing and constantly increasing impact of the inertial distortion Coefficient of Energy-Information (OOO-TT-UU) on FD of each of the transgressed «projections» (along with their increasingly deep penetration to Form-structures of the Tertiary Illusion).

4.0161. In relation to this destructive impact of the DRUULGM-MMUU-U-Factor (Inertia), which decreases heavily the saturation of the SLAA-SS-MII-Creators' Focus Dynamics with covarllert interconnections, there is also a huge difference in construction principles of the SS-UU-SSS-YUU-SS-structures and the SS-FILL-SSS-MAALL-SS-structures: The interconnections of the first ones are distributed evenly and «globally» all over the Infiniteness of the Universal Creation (at their inherent PFDs). In the meantime, the realizational capabilities of the second ones are limited significantly owing to the inertial focal-ethereal «curvature» of all f-Configurations (as the result of heavy reduction of the impact of Form-Creators of the Stabilizational Plan-Level) and owing to origination of an infinite multitude of diverse combinations of different-Qualitative Fields-Consciousnesses which form (through FDs of different-protoformal CCIs) STC-complexes peculiar only to Them, at each «point» of Space-Time.

4.0162. All the countless different-Qualitative groups of space-time Continuums and Conversums, which structure SS-FILL-SSS-MAALL-SS-Realities of Plan-Overtones, are united *on the principle of the most resonation with each other* into the multitude of Subplan-Overtones of Fields-Consciousnesses (IYY-UUSSM). By their inherent features of *qualitative* compatibility and identity, IYY-UUSSM can be grouped *within each Plan-Overtone* into twelve conditional, the most «consonant» to features of each other, vibrational Levels (*dimension diapasons*) which represent *as if* some finitimus (buffer, boundary) «zone of qualitative division» between the «lowest» Form-structures of the Secondary Universal Illusion and the Tertiary Illusion Form-structures «originated» by multipolarizational FD of Its Form-Creators.

4.0163. Here the notions «buffer» and «boundary» mean not some certain «border» between different-Qualitative exhiberational capabilities of Focus Dynamics of SSLOO-SS-SNAA-Creators of the «lowest» Plan-Levels and SLAA-SS-MII-Creators of the Plan-Overtones, but the universal properties of realizational Mechanisms (objectively and holochronely initiated States of the slloogrent f-Configuration of the skrruullerrt system itself) which show the immutable Diffuzgentness Principle in every dimension diapason and allow Focus Dynamics of Form-Creators of diverse OO-UU-Entities to be performed in quite different ways in subjectively as if the «same» exhiberation conditions.

4.0164. That means that, at each «local point» of manifestation of some decoherent Energy-Information, there is always a potential opportunity for simultaneous exuberation (through the corresponding qualitative states of Focus Dynamics of various Form-Creators) of definite part of dissipative Energy-Information, which is structured with more ampliative, as well as more depliative subjective Conceptions. From this point of view, every dimension diapason can be determined as a finitimus one since each «point» of its exuberation is potentially structured with the countless variety of different-Qualitative FDs of Form-Creators representing, within that point, realizational Interests of various OO-UU-Entities.

4.0165. The Physical Plan-Overtone is structured with its inherent twelve fundamental Subplan-Overtones, which provide one kind of functions of the general exuberation Mechanism (simultaneous focusing by all Form-Creators in Their corresponding f-Configurations, activity of Perception systems of all Self-Consciousnesses Forms, and opportunity for interconnection of Their FDs with corresponding features of the Tertiary Illusion in order to creation certain Form-Types). The Causal Plan-Overtone is structured with its own 12 Subplan-Overtones, which provide other functions of the exuberation Mechanism (providing FD of each Perception system with Energy-Information strictly corresponding to its NNAASSMM and VLOOOMOOT). The Astral and Mental Plan-Overtones are structured with their specific Subplan-Overtones, whose Essence is providing functions of each of Causal Subplans. The Transmutational Plan-Overtone is structured with its own 12 Subplan-Overtones providing functions of 24 Subplans of the Astral and Mental Plan-Overtones.

4.0166. The same is for the Stabilizational and Buddhic Plan-Overtones. However, below them, such differentiation into Subplans (also into Overtones, Subovertones, and Form-Types of s-Realities), which is stipulated by the presence and peculiarities of Inertia in the Focus Dynamics of SLAA-SS-MII-Creators, is finished: In conditions of the Disintegrational (Buddhi-Cosmic), Disbalancing, Focusing, Transforming, and Ethereal Plan-Overtones, totally different Principles of Focus Dynamics arrangement are implemented.

4.0167. In other words, subterransive properties of each Subplan-Overtone, within the exuberation regime inherent to its Form-structures, are provided with the presence of definite opportunities for implementation of specific compatibility and reconcilability among Focus Dynamics of Form-Creators of different-protoformal CCIs. The latter do structure various birvulyarity types in Space-Time *jointly* (due to continuous exchange of heterogeneous SFUURMM-Forms and Experience among each other). Within some kind of exuberation regimes (groups of STCs and Conversums), this type of common and interdependent coexistence of different-protoformal Self-Consciousnesses Forms is called by us as «*subjective dimension diapasons.*» These are much more complex Form-structures, than you can expect on the position of those, still too limited and primitive SFUURMM-Forms, usual for Form-Creators of your Perception systems, about existence of the only «vertical» direction of the qualitative state concatenational increase/decrease process.

4.0168. In general Conceptions, *conditional* dimension diapasons of Space-Time reflect specifically, in the informational space of each Self-Consciousness Form, the slloogrent «spheroidal» dynamics of simultaneous-duvuyllerrt performance of peculiarities of the Universal Multipolarization Principle of Form-Creators' Focus Dynamics of all different-Qualitative OO-UU-Entities within the Macrocosmos's

skrruullerrt system. This means, each of conditionally imagined by you, dimension diapasons is holochronely structured with «vertical-horizontal» Vectors of variation of the covallertness degree inside focal-ethereal interconnections generated by all heterogeneous Form-Creators, as well as by a complete set of all intermediate Directions of qualitative state variation, which can be implemented anyhow within the given exhuberation regimes.

4.0169. Use of the word «conditional» for the term «dimension diapasons» is caused by the presence — in each process of subjective consideration of any object of the surrounding reality — of very specific features of the subterransive Focus Dynamics formation by Form-Creators of the Perception systems of various Proto-Forms, namely: an FD of each Self-Consciousness Form can be consecutively structured with originally kleksed SFUURMM-Forms which reflect features of the Synthesis Scheme carried out through the given FD. Being activated at «the point» of their space-time exhuberation, Form-Creators of the Perception systems of each Self-Consciousness Form get the opportunity to accomplish «unpacking» of focal-ethereal interconnections of Their surrounding slloogrent Energy-Information strictly specifically, from the subjective «perspective» inherent only in a definite Proto-Form. That perspective reflects only one narrow-specific Direction of creative implementation of the given heterogeneous interconnections from the countless multitude of options!

4.0170. Every subterransive «perspective» of the slloogrent Content of a dimension diapason can reflect originally the most covallert (in relation to f-Configuration of the given Proto-Form) part of considered interconnections. It «projects» on them the Conceptions (already synthesized Experience) which are peculiar to a certain Self-Consciousness Form playing the role of a subjective Observer. All the rest energy-informational interconnections (more impersept or cruvursorrt in relation to the given Synthesis Scheme), which do structure decoherently — potentially — the same «point» of space-time exhuberation (STCs' group), simply cannot be at least somehow decoded by Form-Creators of the given Perception system. In the better case, those interconnections might be interpreted by the Form-Creators to very great distortion of a more profound Sense (cause-and-effect interconnections) inherent to these slloogrent UU-Forms.

4.0171. Since each of the twelve conditional dimension diapasons of each Plan-Overtone is structured with Focus Dynamics (therefore, also with f-Configurations!) of Form-Creators of Self-Consciousnesses Forms who represent creative Interests of a countless number of diffuzgent among each other to various degree, different-protoformal CCIs at each slloogrent exhuberation «point,» so the universal principles of holochrone-simultaneous performance of the same kind of interconnections from each diapason are supported functionally with the same slloogrent Form-structures. Their Essence is incomprehensibly difficult for utterly limited capabilities of the Perception systems of your «current» NUU-VVU-Form-Types.

4.0172. Multipolarizationally organized «spheroidicity» of simultaneous performance, in Space-Time, of absolutely all different-protoformal properties, inherent to each dimension diapason, virtually erases all the conditional boundaries among each diapason. Likewise, air, saturated with dissolved water molecules, passes naturally to light fog, firstly; then, in slightly different terms of atmospheric pressure and temperature, air gradually condenses to heavy fog, which passes to precipitation as raining somewhere if prosperative terms for raining have appeared. At some places, the fog is denser,

more saturated with water steam than at other places. At some places, the fog is less dense or almost transparent; somewhere it starts raining even more and longer; somewhere else the rain is lighter and shorter or vice versa. All this diversity of different-Qualitative air states are successfully performed at the same space.

4.0173. The same is for each dimension diapason, at each of its inherent exuberation Levels. A dimension diapason does not represent evenly changing and similarly interrelated among each other, focal Configurations of all sorts of Proto-Forms. Being simultaneously initiated by highly versatile FDs of different-Protoformal Self-Consciousnesses Forms, it provides potentially each conditional «point» of its exuberation with totally exceptional properties, realizational peculiarities, and capabilities, which are perceived by one kind of Self-Consciousnesses Forms as depliative ones, while Form-Creators of other Synthesis Schemes consider them as ampliative ones.

4.0174. Here you can remember the differences peculiar to mixtum, dimidiomittense, translucense, and tightly related to them, transparentive Self-Consciousnesses Forms. Being manifested together with our mixtum NUU-VVU-Form-Types at one and the same exuberation «point» of Space-Time, all the multitude of transparentive f-Configurations of various protoformal development Directions (those which actively synthesize attributes of some of PCQs, more covallert than the PCQ ALL-Unity, with Aspects of our two-invaderental Synthesis Scheme), with all their capabilities and creative opportunities, may seem to you as Self-Consciousnesses Forms developed higher than people. It may look so only because, in the exuberation conditions of your «current» NUU-VVU-Form-Types, their less dense and, therefore, much more portable f-Configurations allow them (owing to the presence of the third Dominant) to show psychic powers (teleportation, telekinesis, clairvoyance) inherent only in dimidiomittense and translucense NUU-VVU-Form-Types.

4.0175. However, despite all these advantages seeming to you and attributes of far-fetched by you predominance and perfection, which are the consequence of already actively implemented by them, three-invaderental — *near-lluuvvumic!* — Synthesis Scheme (ALL-Will-of-ALL-Intelligence + ALL-Love-ALL-Wisdom + one of PCQs which is more covallert than ALL-Unity to Their combinations), their realizational capabilities in groups of human STCs do not possess the same high indicator of amplificational preferential treatment towards their development which is peculiar to your mixtum and dimidiomittense NUU-VVU-Form-Types. That is why dimidiomittense and translucense NUU-VVU-Form-Types appear so rarely in STCs of our types, and even then, as unstable Forms of ghosts and primitive initiators of «poltergeist» phenomena: so-called «boggarts» «hobgoblins,» «bogies,» «gnomes,» and others.

4.0176. We have figured out that each of 12 basic Subplan-Overtone of each Plan-Overtone is formed of an infinite amount of different types of dimensional interconnections. Being combined with each other by only their own (to varying degrees!) focal-ethereal attributes and SFUURMM-Forms, these interconnections originate, in Space-Time, the definite vibrational spectrum of coherent Creative Activity, or, in other words, a *diapason* of joint exuberation of SFUURMM-Forms of many Self-Consciousnesses Forms, slloogrently constructed with combinations of different-Protoformal interconnections. Within such diapason, these attributes can be simultaneously performed in a certain way through Form-Creators' FDs of various Proto-Forms. For example, the definite SFUURMM-

Forms (of fear, greed, envy, aggression, joy, love, compassion, mercy, mind, rationality, altruism, and so forth) can simultaneously and similarly (through replacement of attributes of invaderental PCQs with similar attributes of vecsative PCQs) be implemented in diverse circumstances in human STCs' groups through FDs of people as well as of Self-Consciousnesses Forms of many animals, plants, microorganisms, minerals, and even fermions.

4.0177. That is why dimension diapasons, which duvuyllerrtly structure 12 Subplan-Overtones, get unified with each other eglleroliftively and permanently through Focus Dynamics of different-protoformal Form-Creators, get more complex covarllertly by their own qualitative features, and provide (at each slloogrent exhiberation «point» of the Tertiary Universal Illusion considered by us) the presence of decoherent (potential) opportunities for focal interaction among Form-Creators of conditionally depliative analogs of Self-Consciousnesses Forms and Form-Creators of their conditionally ampliative analogs including the most qualitative ones throughout the given birvulyarity type. The expression «unification of dimension diapasons» means the establishment of more and more covarllert interconnections among of Form-Creators' Focus Dynamics of various Proto-Forms and generation of more universal, uniform SFUURMM-Forms corresponding to this multipolarizational process. More complex and more harmonized e-Configurations of these SFUURMM-Forms gather (include) more scattered Conceptions by various diffuzgent Proto-Forms.

4.0178. Exhiberational functions of all Subplans Form-structures stipulate the provision of this simultaneously interrelated Process. These Form-structures operate as specific «buffer» areas among, seemingly, totally incompatible by the qualitative state, subjective Focus Dynamics peculiar to SLAA-SS-MII- and SSLOO-SS-SNAA-Creators. Owing to these functions, LLAASS-Conceptions, peculiar to the FD of the Secondary Illusion, can (by means of universal properties of VEC — variable ethereal component) be «projected» and transgressed multipolarizationally (as qualitatively distorted SFUURMM-Conceptions adapted to peculiarities of Perception systems of Self-Consciousnesses Forms of one or another birvulyarity type) to the Form-Creators' FDs of the Tertiary Illusion.

4.0179. This also allows Self-Consciousnesses Forms, which belong to some groups of STCs and Conversums (originated by one type of Planetary Creators!) and which are similar by the degree of geyliturgentness of their f-Configurations and exhiberated at different-Qualitative focal-ethereal combinations of one type of Subplans, to amitsirate by their Focus Dynamics — regardless of noo-time (qualitatively different in Meaning) or linear (dissonational) «distances» among them — to other groups of STCs and Conversums. Thus, those Self-Consciousnesses Forms get merged creatively (through sklaargms and skloongms) with similar to them, f-Configurations of Self-Consciousnesses Forms, which do structure space-time systems of Form-Creators of other Planetary Entities.

4.0180. Within the limits of a slloogrent f-Configuration of any Planetary Entity, such involuntary or conscious relocations of Focus Dynamics (among Self-Consciousnesses Forms of one Proto-Form) are accomplished very often and everywhere. That is why there are actually no physical barriers for any space-time relocations of Focus Dynamics of Self-Consciousnesses Forms within the qualitatively homotypic Worlds' Form-systems and s-Realities, which structure similar to each other, Subplan-Overtones of Fields-Consciousnesses subjectively «linked» to diverse Planetary, Star, or even Galactic Entities.

4.0181. In each of such cases, the matter of implementation possibility of these *geyliturgent apertations* from some groups of STCs to the others is reduced only to parameters of an AARRG-Factor (*the Interspatial noo-time Index*). The value of these parameters determines qualitatively relative limits for joint exuberation of various Self-Consciousnesses Forms' Focus Dynamics within Form-structures of diverse Subplan-Overtones. By the way, exactly this principle of «frequency shift» of separate constituents of Space-Time launches «dislocation systems» of all aircrafts which teleport across various Planetary and Star Systems within one, as well as several Subplans of the Physical Plan-Overtone.

4.0182. Furthermore, in order to achieve necessary exuberation Levels and to improve the qualitative state of Focus Dynamics of invaderental Form-Creators of each Self-Consciousness Form, there is a countless amount of ways, which They perform for cooperative implementation of subterransive amitsirations. Those ways start from instant replacement («multirotation» in a certain resopason of FD) — in an f-Configuration — of a definite part of depliative for the current Synthesis Scheme, focal-ethereal interconnections, which are the reason of the higher activity (within general FD) of vecsative Form-Creators of any of protoformal development Directions (suppression of characteristics peculiar to the given Scheme); and those ways finish with radical restructuring the FD (its «instant» recovery in much more ampliative and prosperative — for the given Synthesis Scheme — exuberation regime owing to replacement for ampliative SFUURMM- Forms of the given birvulyarity type) by means of interconnections geyliturgent by the invaderental features. I call this amitsirational Act as *interattraclational level-by-level annifformation*.

4.0183. As the result of such «instant» qualitative restructuring of Focus Dynamics of the given Self-Consciousness Form, the whole series of subchakram amitsirations (as if mini-annifformations — *transcommunicational quantum dispersities*) happen inside of it (in a definite *duvuyllerrt* sequence depending on the qualitative state of its stimulating «current» Interest). The effect is absolute replacement of not only previous Conceptions and all the contents of the previous subjective Reality inside the subjective Perception system (contents and FDs of all its components are totally transformed), but STCs group is changed radically, too, where the «person» had perceived «him/herself» before this Act started. During that relative «instance,» while the interattraclational annifformation is being performed inside the FD, the «person» undergoes billions and trillions of *revitalization* Acts («postmortem» amitsirations) not realized by him/her. Those Acts are implemented by Form-Creators duvuyllerrtly-multipolarizationally in the scenarios of less ampliative subjective Realities and STCs' groups.

4.0184. The reason, so powerfully concentrating the eglleroliftive Impulse inside FD, lies much deeper, beyond perceived boundaries peculiar to the Perception system of a Self-Consciousness Form. For example, in FDs of humans, the initiation of such Act might be caused by strong qualitative transformations, which appear occasionally and typically inside the Focus Dynamics of a Planetary, a Star, or a definite Galactic Entities. By the way, there is an amplificational Process, interpreted by us as *inverse-ray amitsiration*, *quantum leap* (A-ALL-GRAALL GRA-A), or *transcommunicational quantum dispersity* (radical space-time amitsiration of Self-Consciousness, the result of which is a very sharp — in several minutes of hours, actually — amplificational transformation of a «person's» f-Configuration and FD). Within the given exuberation diapason, this Process reflects peculiarities of implementation of the interattraclational annifformation Act of the Form-Creators' Focus Dynamics

of the lluvvumic pair of Dominants from mixtum NUU-VVU-Form-Types to their dimidiomittense («bio-plasmic») analogs. The reason for that is targeted and coherent unbalancing qualitative dynamical states of Planetary realizational systems as well as the FD of our Stellar Entity (AIILLIIS).

## Chapter 5. Physical Plan-Overtone of Fields-Consciousnesses (TRUURRGURRDT)

4.0185. All Form-structures of the Physical Plan-Overtone are supported with Focus Dynamics of Form-Creators (Fields-Consciousnesses) structuring Physical Globes of absolutely all types of Collegial Cosmic Intelligences Which are interpreted — within the given narrow diapason of our joint exuberation — as Planetary and Stellar Entities. Actually, the f-Configurations of Physical Globes of all Those Entities, which are activated in terms of 3–4-dimensional diapason, do form particular types of Form-Matter of all the Galaxies, Supergalaxies, and Their clusters including the Universe of our type. This «all-manifesting» function of the Physical Plan-Overtone is performed on every Level of the Tertiary Energy-Plasma. As subjectively separated «particles» of the single Universal Focus of Self-Consciousness, We Exist on the Levels of FD of SLAA-SS-MII-Creators at zillions of Universes of different types simultaneously, at once and originate together, through Our continuous and infinite Cosmic Creativity, absolutely all the types of s- Realities of the Tertiary Universal Illusion including, certainly, all regimes of conscious self-manifestation of not only within the Physical Globes, but in countless exuberation Levels of all the rest Form-structures, too.

4.0186. According to Iissiidiology, the conception of «materiality» is not limited by properties and characteristics of the routine wave diapason. It extends naturally to the whole spectrum of the Form-Creators' Creative Activity of the Tertiary Illusion (from  $\pm 12.0$  to  $0.0$  dimension). By Their FDs, Those Form-Creators do structure duvuyllerrtly and interdependently not only all interconnections of Form-Matter (from  $\pm 4.0$  to  $0.0$  dimension) and its superior realizational Form — Plasma-Matter (from  $\pm 6.0$  to  $4.0$  dimension), but also Form-Plasma (from  $\pm 9.0$  to  $6.0$  dimension) and Plasma-Form (from  $\pm 12.0$  to  $9.0$  dimension). This is related to the fact that, depending on internous interconnections arrangement of subterransive FDs of heterogeneous Form-Creators, some types of «materiality,» which are the most compatible by some particular features, get transformed diffuzgently into other types thereof; thus, creating different exuberation regimes for Their corresponding Self-Consciousnesses Forms.

4.0187. Subjective division of general «materiality» of the Tertiary Illusion into above listed types was carried out purposefully in relation to peculiarities of the human FD already known to us. The division addresses specificity of only our SFUURMM-Forms kleksed by the VVU-Factor. Therefore, dimension diapasons characterizing any kind of states of slloogrent «materiality» do not reflect any focal-ethereal interconnections apart from those peculiar to the lluvvumic, lluvvumic-goolgamaaaic, and goolgamaaaic birvulyarity types. However, each of these conditional types, at every «place» of own «local» exuberation, is structured also with heterogeneous causal interconnections inherent to an infinite multitude of other birvulyarity types whose Self-Consciousnesses Forms just cannot be identified with anything by bio-Creators of our Perception systems. They are sort of non-existent to us.

4.0188. That is why a «material» Form-structure, for example, of an Energy-Plasma «sector,» which we consider as the Form-Matter on our own grounds, can be interpreted as what we call Plasma-Matter, Form-Plasma, or even Plasma-Form — on the position of subterraneous peculiarities of qualitiveness of some other Self-Consciousnesses Forms who exist simultaneously with us at their own types of *collective subjective Realities*. That means that the given Form-structure (in the STCs' groups formed by their own FDs!) would have not only dimension parameters totally different from ours, but also absolutely different properties as compared to ours.

4.0189. Characteristics of each, «locally» manifested through a subjective Perception system, «area» of the slloogrent f-Configuration of KARMO-Plasma are determined, firstly, by the specificity of inter-Qualitative interconnections prevailing in the Focus Dynamics of Form-Creators of those Self-Consciousnesses Forms who observe it («the area») subterraneously and analyze specifically. Features of the world around Observer depend namely on peculiarities and interpreting abilities of his/her subjective Perception system. What seems to us as light and air, is perceived by many other Proto-Forms subjectively as something massive and dense, and vice versa: The «materiality» degree, high for us (for example, density of minerals, composition of terrestrial magma, solar plasma, neutron stars, and so on), never impedes the movement freedom of some Self-Consciousnesses Forms.

4.0190. Our conditional separation of all the variety of OO-UU-Entities, in accordance with mental and vital attributes, does not mean that They have no other internous peculiarities and differences — there is a countless amount of them starting from all the boson-fermion interactions and finishing with means of arrangement of Form-structures at Realities beyond our limits! Each of objective (to us!) events or processes, which are normal for our reality and performed through various Self-Consciousnesses Forms as attributes of one or another «materiality» type, is structured with specific SFUURMM-Forms of creatures imperceptible to us sometimes. Through those events and processes, they perform only their own analogs of our «psychic» features and «mental» inclinations (for example, fluidity and volatility of liquids, density and friability of solid objects, osmosis and diffusion, sustainability of intra-atomic or molecular interconnections, thermal and baric systems, and so on). However, from all this infinite gamma of subterraneous «rational» properties and totally impenetrable vital features, it is very hard to us to select something not peculiar to our own thinking process and psychisms. On the basis of the thoughts and psychisms, Form-Creators of our Perception systems provide Themselves with all Information available to Them.

4.0191. It worth pointing you again that the ALL-Primordially-ALL-Initiality, ALL-Mobility-ALL-Presence, ALL-Knowledge-ALL-Informedness, and ALL-Aspiration PCQs are more covarllert towards invaderental (in our Synthesis Scheme) ALL-Will-of-ALL-Intelligence PCQ (reflecting all sorts of thought-rational tendencies as to our understanding!). Meanwhile, the ALL-Integrity, ALL-Essentiality-ALL-Permeability, ALL-Voidness-ALL-Fullness, and ALL-Voidness-ALL-Vacuumness PCQs might be identified in our Perception with particular analogs of the feeling-emotional tendencies which are activated in our FDs under the influence of another invaderental PCQ — ALL-Love-ALL-Wisdom. It is interesting that the attributes of ALL-Unity and ALL-Steadiness-ALL-Stability are able to perform both «mental» and «vital» realizational tendencies depending on specific conditions of Their exuberation regime.

4.0192. We can assume: The most common features of our subjective Conceptions of «ourselves» and of all people's creative abilities are our thinking and sensual inclinations and abilities for well-designed, rational manifestations or instinctive and emotional reactions. Although all of it is very conditional, but it turns out that we can assess both «ourselves» and the OO-UU-Entities most clearly only on the features of «mentality» and «astrality.» However, once again, in corresponding conditions of the «current» exuberation regime of our mixtum NUU-VVU-Form-Types, their specific analogs can be implemented *concurrently and jointly* also through many other processes and phenomena not related to «thinking» and «sensuality» in our view anyhow. Some of those phenomena we interpret subjectively as density, pressure, temperature, radiation, gravity, various chemical and intra-atomic properties, and so on.

4.0193. All the diversity of subjective Realities of the Physical Plan-Overtone is generated owing to the presence of active Synthesis and «materialization» (STUULL-GRAA-SS) Processes all over Energy-Plasma Levels. Therefore, it becomes clear why the degrees of ampliativeness (or depliativeness) of causal Creators-FORMOIDS hang on our activity (as the activity of Creators-PLASMOIDS and Creators-ASTROIDS) totally. Creators-FORMOIDS are manifested constantly through subterraneous FDs of our Self-Consciousnesses Forms as the definite objective circumstances, which we perceive as «our surrounding reality.» That means, everyone of us provides and arranges, models and implements independently and completely voluntarily all the psycho-mental content of their own subjective Reality constantly through consistent «materializing» there (by the quality and stability of own Thoughts and Feelings) the development scenarios, which truly reflect some opportunities for implementation of own creative Interests.

4.0194. These are You, as Creators-FORMOIDS, Who implement moment-by-moment quantum changes and qualitative advances in «the current» states of Your subterraneous Focuses of Close Attention, which multipolarizationally and simultaneously move from one f-Configuration to another of all those mental-astral NUU-VVU-Form-Types (Creators-ASTROIDS and Creators-PLASMOIDS) from Energy-Plasma Levels initiated by you Who excite there Their Own energy-informational dynamisms (Focus Dynamics). Thus, you provide credibly — in the given exuberation regimes — the functions of corresponding Mechanisms of focal-ethereal «crystallization» («materialization») not only of your own, but also of all the rest Self-Consciousnesses Forms whose f-Configurations create (in the given dimension diapason) all the diversity of different-Qualitative types of Physical subjective Realities where all possible NUU-VVU-Form-Types of the Human Collective Consciousness refocus simultaneously to.

4.0195. Each exuberation Act of TRUURRGURRDT-VUU (Form-Matter which structures s-Realities of exactly «human» STCs) is performed as the result of advanced and jointly coordinated (by means of the very Essence of the Interest peculiar to Them) concentration, at the lowest Form-structures of Space-Time, of different-Qualitative Form-Creators' Focuses of Close Attention which represent two *objectively inseparable* «components» of Energy-Plasma (IYISS-SSS) — ASTRAL-Plasma (PRAFAOGORRFFT) and MENTAL-Plasma (EMFFLIIMISTS). More ampliative versions of Form-Matter (TRUURRGURRDT-NUU) are formed also by means of activation of relevant characteristics of human VVU-Factor inside Self-Consciousnesses Forms. Those versions represent interstitial results of resonational manifestation of Creators-ASTROIDS (SSUKKULYARIT) and Creators-PLASMOIDS (STROOLLGORF) Who structure «the lowest» Levels of *Form-Plasma*

through Focus Dynamics of more qualitative creation by Collective Cosmic Intelligences of the Physical Plan-Overtone.

**4.0196.** It is about the astral-Mental Principle of emergence and subterransive exuberance of any of Self-Consciousnesses Forms which structure various types of Collective Cosmic Intelligences. The latter are interested in focusing at every realizational Level of the Physical Plan-Overtone. Based on this Principle, you should imagine clearly now that the properties and states of KARMO-Plasma, such as: «liquids,» «minerals,» «metals,» «gases,» «atomic valency,» «reaction of a chemical element,» «adsorption» and «absorption,» «polarity,» «attraction» and «repulsion,» including all the atomic-molecular fundament of chemistry, physics, genetics, and many others — represent interstitial states of active creativity of Form-Creators of ASTRAL- and MENTAL-Plasma (ASTROIDS and PLAZMOIDS) Who appear inside your Focus Dynamics particularly through diverse extents of level-by-level, resopason-by-resopason (as if «layered») concentration and «deposition» («materialization») peculiar to Their f-Configurations.

**4.0197.** To more or less degree, it all is initiated at a «point» of Space-Time focused by you (in the form of the world around you) only owing to advanced activity of some kind of SFUURMM-Forms in your FDs. Inside your Perception system, these SFUURMM-Forms connect, in an appropriate way, all your involved focal-ethereal interconnections to a holistic space-time «puzzle picture» (subjective «depiction» of your subterransive perceiving «yourselves» and the World around you). You should comprehend profoundly and realize the fact that the fundamental energy-informational component of an exuberance Mechanism, inside the Focus Dynamics of your Self-Consciousness Form, of some particular combinations of attributes inherent to one or another Reality is the qualitative state of Thoughts generated by you (the Creators-PLASMOIDS' activity) and Feelings experienced by you (the Creators-ASTROIDS' activity), Who merge together through your certain Conceptions and getting transmuted into a specific Illusion of your surrounding reality (Creators-FORMOIDS of KARMO-Plasma). Having realized it all, you would treat both the implementation process of your own thinking and the performance of your sensuality much more responsibly.

**4.0198.** As Creators-KARMOIDS of the lluvvumic development Direction Who structure simultaneously many different-Qualitative types of Form-structures of the Tertiary Illusion, You have the main Task of acquiring, to the tiniest detail, the thinking process through Focus Dynamics of all Proto-Forms, which are diffuzgent toward the given birvularity type, experiencing, in an appropriate way, particular psychic reactions during this process in order for learning how to apply actively this synthesized Experience to your continuous and multifaceted Creative Work to gain increasingly deep Comprehension and Acceptation of the amplificational Sense of your own Creation. This process is endless, since all that is conceived by you gets carried out immediately inside your FDs as relevant SFUURMM-Forms and gets reflected specifically inside your Perception systems as subterransive features of your s-Reality. While everything, which is formed constantly and sustainably by means of your thinking activity, commences to be implemented intensively through your experience and prompts you to resume again and again this continuous psycho-mental Process of creative Discovering Yourself through unstoppable even for a moment, series of your interstitial creations.

4.0199. I hope that, having understood this principle of «materializing» Form-systems, you would realize more deeply the Sense of the expression «intelligent atom,» which has true scientific background: Every Self-Consciousness Form, which is perceived by us as dense, liquid, or gaseous substance, represents the dynamical result of multilevel focal-ethereal interactions of Form-Creators of ASTRAL- and MENTAL-Plasma. F-Configurations of these Form-Creators are compressed by the Focus Dynamics of Creators-KARMOIDS to interstitial states of definite dimension indicators peculiar to the current exuberation regime. For example, inner properties of water undergo perturbation in definite conditions on the atomic-molecular level of interaction and acquire naturally the properties of steam or ice. Metals and non-metals are transformed also in definite terms to liquids and gases; after intermixing many liquids change sharply their structure and turn to gaseous state; other liquids mix never, on the contrary. Some metals form oxides together with liquids while the others do not. Some chemical elements of different substances react with each other and originate some other states, while the reaction is not carried out at interaction with other chemical matters, and so on.

4.0200. All these stable properties of diverse substances are exactly the interstitial results of resonational interaction of various — astral and mental — Form-Creators of Energy-Plasma. At the present exuberation regimes of focal-ethereal combinations of bosons and fermions (as atomic-molecular Self-Consciousnesses Forms — AIYKVOOF and SVOUFF-VV), these Form-Creators provide all required conditions for common manifestations of Proto-Forms of all the rest types of CCIs. Actually, the Universal Mechanism of narrow-specific manifestation of these properties in certain circumstances through gases, liquids, and dense matter (on the level of interaction among molecules, atoms, and their internal elementary particles) is in no way different from what we mean by a «psycho-mental characteristics of a person» which reflects all his/her tastes, inclinations, thoughts, feelings, level of emotionality and intellectuality, aspirations for something or someone, sympathy, antipathy, and so on.

4.0201. Of course, Form-Matter (from 0.0 to  $\pm 4.0$  dimension) and its «highest» manifestational type — Plasma-Matter (from 4.0 to  $\pm 6.0$  dimension) are not the only interstitial consequences, which can reflect correspondingly, inside the Focus Dynamics of Creators-KARMOIDS, all the specificity of creative level-by-level interaction (Synthesis) among the Form-Creators of ASTRAL-and MENTAL-Plasma. Form-Plasma (TRUURRGURRDT-NAAKHGRASST — from  $\pm 6.0$  to  $\pm 9.0$  dimension) provides its opportunities for Form-Creators, and Plasma-Form (TRUURRGURRDT-SSMII-I — from  $\pm 9.0$  to  $\pm 12.0$  dimension) provides just its own creative perspectives. Namely as the result of resopason-by-resopason different-Qualitative combination and resonational «reprojection» of the most covallert focal-ethereal interconnections among Them, there are zillions of new opportunities for Self-discovery, Self-development, and Self-realization within the given megadiapason of USCF manifestation all over the exuberation diapason of ASTROIDS and PLAZMOIDS in Creation of absolutely all types of Collective Cosmic Intelligences of the Tertiary Illusion.

## Chapter 6. Astral (DLAABLLA-SVUULLMII-I) and Mental (ASSFOLLFOLDTS-UOLD-MII-I) Plan-Overtones of Fields-Consciousnesses

4.0202. Perhaps, now it would be wise to remind you about the fact that, in any case of careful studying the Focus Dynamics and Form-structures of Form-Creators of Energy-Plasma, we deal not with internous manifestations of the Pure Cosmic Qualities themselves, but only with the *different degree of synthesizedness of their combinations* inside the slloogrent focal Configuration of Macrocosmos. You already know that the state of general consummatization (universalization of already existing interconnections) got carried out *holochronely* in the conditional «Instant» of the SSS-State mercavgnation along all Vectors of potentially possible inter-skunkktional interaction «inside» Information owing to irrkoglictive-eglleroliftive influence. As the consequence, parameters of focal-ethereal combinations, all possible for the given pair of Impulse-Potentials, appeared simultaneously. The slloogrent Creation, which we define as Macrocosmos, was emerged from those combinations.

4.0203. So, absolutely All that got a chance, at this conditional Moment of Eternity, for simultaneous manifestation through subterransive Perception systems of the infinite amount of different-Qualitative Self-Consciousnesses Forms, *is already* available. We and nobody else have neither to create nor to reconstruct anything: Every part of this multipolarizationally balanced variety of Forms and states is «involved» as if by itself (resonationally) into Focus Dynamics of Form-Creators of our Self-Consciousness Form strictly in accordance with the qualitative state of its focal Configuration (in accordance with conditions of the given birvularity type). The value (power, intensity) of this qualitiveness performance inside our own FDs depends totally on the level of amplificationness of Form-Creators of Perception system of our Self-Consciousness Form. This Form is used by us — as subjective Observers — temporarily to make our «current» research.

4.0204. Therefore, if this degree of under-synthesizedness is represented as prevailing activity of mental Creators-PLASMOIDS of various Levels of the Mental Plan-Overtone in focal-ethereal interconnections among Form-Creators of Focus Dynamics of our Perception system, we interpret subjectively the states studied by us and other facts of the surrounding reality as *more mental*. The same is about our subterransive consideration of some subjective astrality (vitality) initiated only by an increased activity of astral Creators-ASTROIDS inside our FD, but not by the qualitative state of the Form-system itself where we are realizing ourselves right now.

4.0205. Meaning, *conditional* differentiation of the Cosmic Plan-Levels into the Astral and Mental (as well as Physical, Causal, Transmutational, Stabilizational, and Buddhic) Plan-Overtones of Fields-Consciousnesses is not objective. It represents the most complicated Mechanism of *subjective reflection of the narrow-specific qualitiveness* of Focus Dynamics of Form-Creators of any of Self-Consciousnesses Forms (simultaneously structuring the general skrruullerrt system) in one or another slloogrentness section of the Macrocosmos's Form-systems. At every moment of such subterransive reflection of FD (through TEC- or VEC-«unpackings»), the condition of Energy-Plasma itself is *totally balanced by all possible Vectors* of focal-ethereal interactions performed «initially» holochronely at the given exiberation «point.»

4.0206. Every your Conception about as if present INstability of Energy-Plasma (vital or mental in relation to *your* surrounding reality) is initiated inside *your* Perception system due to the presence of many not synthesized interconnections among Form-Creators of your Self-Consciousness Form. We can say quite definitely that the unstable state by some obvious dual attributes (for example, intelligence — sensuality) is inherent only in each «local point» of Energy-Plasma exuberation (a Self-Consciousness Form) what initiates the Focus of Close Attention of its structuring Form-Creators for the next slloogrent act of the multipolarizational Shift at the given area of the skrruullerrt system in order to achieve higher balance. However, as soon as the balance has been reached on some attributes, the immediate dissonance appears on other attributes inside FD.

4.0207. In some of countless options of one such «shift» (all their multitude actually forms what we determine as «Focus Dynamics»), some mental tendencies prevail in «unpackings» of Form-Creators of some «personalized» Interpretations: prudence, reasonableness, meaningfulness, analyticity, logics (which can be initiated in FD by not only Aspects of the ALL-Will-of-ALL-Intelligence PCQ, but also by Aspects of some different PCQs: ALL-Primordiality–ALL-Initiality, ALL-Mobility–ALL-Presence, ALL-Knowledge–ALL-Informedness, ALL-Aspiration, and others). In some other versions of simultaneous «unpackings,» there is the predominance of such vital tendencies as sensuality, anxiety, temperament, emotionality, intuitiveness (which can be initiated in FD not only by Aspects of the ALL-Love–ALL-Wisdom PCQ, but also by Aspects of some other PCQs: ALL-Integrity, ALL-Essentiality–ALL-Permeability, ALL-Voidness–ALL-Fullness, ALL-Voidness–ALL-Vacuumness, and others).

4.0208. In assessing the level of mentality or vitality of processes and conditions of the world around considered by us, we have a possibility to characterize them one way or another only on the basis of SFUURMM-Forms inherent to FDs of our own NUU-VVU-Form-Types (the lluuuvvumic birvulyarity type with two-invaderental Synthesis Scheme: ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence). The same concerns all other Proto-Forms who assess the mentioned conditions by means of their own Conceptions about these processes. As these subjective criteria are made on the basis of Synthesis Schemes and attributes combinations completely different from ours, so the results of such assessments of the surrounding reality (by its characteristics of mentality and vitality) are absolutely different, right up to dual. This is why the words «Astral» and «Mental» in the names of Plan-Overtones are quoted by me — they reflect very narrow view peculiar *only to the human* type of thinking-feeling. In many cases, they might be completely different from the attitude of other Proto-Forms' representatives towards *the same* conditions.

4.0209. Thus, when you consider the notion «Plan Overtones of Fields-Consciousnesses» (Physical, Astral, Mental, Causal, Transmutational Ones, and so on), you have to take into account the fact that they represent the holistic and holochronely balanced condition of Energy-Plasma at Universal Form-structures, whereas they represent just the result of subjective implementation of exuberation Mechanism of your «current» Self-Consciousness Form *in your* subterransive Focus Dynamics. Form-Creators of the Form are capable of observing («unpacking») a very very narrow spectrum of Their possible simultaneous manifestations of Energy-Information through kleksing only UU-VVU-Forms. These manifestations are involved into the FD from the whole infinite multitude of already present focal-ethereal interconnections (UU-Forms).

4.0210. Absolutely all considered by us, properties of Form-systems, structuring the Plasmic Forces Diapasons, are objective in their Essence (as a component of the general skrruullerrt system). These properties can be perceived by us (as well as by Observers of any qualitative Levels of Macrocosmos) only purely subjectively because they can be reflected in our Focus Dynamics only by strictly definite part of slloogrent attributes peculiar to them. Inhabitants of each of those Form-systems self-realize consistently in them by means of particular SFUURMM-Forms of their Focus Dynamics, and they are able «to select» fragmentarily, from general focal-ethereal interconnections of those Form-systems, only those properties and peculiarities which can be manifested in their own Perception systems even a little.

4.0211. Thus, as if at «the same» (by their initial *objective* Essence) areas of the Tertiary State of Energy-Plasma, various internous states of the Tertiary Universal Illusion — *subjective* types of Realities and different-protoformal STCs' groups — are formed collaboratively by different-Qualitative Focus Dynamics of Its protoformal Form-Creators simultaneously manifested through the countless diversity of Self-Consciousnesses Forms in Space-Time. Some of subjective types of Realities are evaluated by us as «more mental,» the others — as «more vital.» Nevertheless, these evaluations might mean completely nothing for subjective Observers who discover the same areas of the Tertiary Illusion together and concurrently with us through Focus Dynamics of their own Proto-Forms. Therefore, treat the features of the Astral and Mental Plan-Overtones not as the unconditional objective Reality, but as still an only opportunity for you to start to consider specifically the surrounding multidimensional reality from the perspective of much more universal Conceptions than the ones you used before.

4.0212. To let you form at least some Conceptions about structuring features and organizational opportunities for development of Self-Consciousnesses Forms and Collective Cosmic Intelligences exhibited in specific conditions of the inter-Qualitative Synthesis of the Astral Plan-Overtone (DLAABLLA-SVUULLMII-I), you have to know the Information about functional principles of focal-ethereal interconnections at it. Those interconnections are simultaneously manifested by Form-Creators of all the Form-structures of our GREIYSLIISS Planetary Entity's *Astral Globe* (its Cosmic Code — AAYLLIIESS). By its FD, this Globe structures EOOLLKKKH — a Collegial Intelligence of the Astral Globe of our Stellar Entity.

4.0213. At the Form-structures of all GREIYSLIISS Globes, which specialize in the Processes of comprehensive and deep Synthesis of attributes of ASTRAL-Plasma with attributes of MENTAL-Plasma, the AAYLLIIESS Collegial Cosmic Intelligence unites, with own Focus Dynamics, the amplificational Interests of CCIs of an infinite multitude of Proto-Forms. AAYLLIIESS is implemented through the synthetic functions of Creators-ASTROIDS of the lowest (NAOLLM-DRUU), the middle (PROUG-GRUU), and the highest (LLOOFF-SRUU) exuberation levels. Total Focus Dynamics of Creators-ASTROIDS of the Humankind's Collective Cosmic Intelligence (LLUU-VVU-Form) is a very small fraction of this general slloogrent FD structured with joint performances of a countless amount of Proto-Forms.

4.0214. Our subjective separation of the particular attributes among Form-structures of the Astral and the Mental Globes is conditioned on high inertia of Focus Dynamics's implementation; it is

peculiar to Perception systems of our «current» mixtum NUU-VVU-Form-Types. We still have not any chance to realize holistically and comprehensively all the Process of origination of the single state of KARMO-Plasma by Focus Dynamics of all our «personalized» Interpretations. The latter are as if «scattered» subjectively throughout all the multitude of realizational scenarios, but, at the more ampliative Levels of our FD's exuberation, they represent, by their f-Configurations, the causal interconnections, which qualitatively balance (compensate) each other.

4.0215. Therefore, we are still able not holistically, but in a fragmented way, to focus only on those qualitative attributes, which are the most accessible for inertial process of VVU-decoding (TEC- and VEC-«unpackings») the general harmonious state of KARMO-Plasma by «current» bio-Creators of subterraneous Perception systems of our NUU-VVU-Form-Types. At their (as if «our») subjective assessment of various manifestations of our surrounding reality, we divide automatically functions of the holistic Mechanism of FD exuberation (on the attributes of VVU-*kleksing* peculiar to people) into two categories: «more sensuous — *astral* — Worlds» and «more rational — *mental* — Worlds.»

4.0216. As the realizational qualitative state of our Focus Dynamics increases, this extent of subjective «division» between our Perception systems and Perception systems of our other «personalized» Interpretations decreases continually; thus, allowing us to realize simultaneously more and more groups of scenarios and STCs, which they structure in parallel with us. As the result of such amplificational perturbations, attributes of mentality and astrality, which we recognize now easily, will be combined inside our Focus Dynamics naturally, and they will facilitate activation (inside our Focus Dynamics) of more ampliative Conceptions about psycho-mental peculiarities both «our own» and of the world around us. Then, the principles of general balance of KARMO-Plasma will be more comprehensible and accessible.

4.0217. It is very important to understand that the civilizations of Creators-ASTROIDS and Creators-PLASMOIDS are impossible to attribute to Collective Consciousnesses (civilizations) of some separate Proto-Forms' kinds, because their joint FD reflects multipolarizationally-simultaneously *immediately* through many Synthesis Schemes and birvularity types and always appears as Focus Dynamics of an infinite multitude of Self-Consciousnesses Forms structuring CCIs of some Proto-Forms. The *objective* distinction among many various SFUURMM-Forms, existing among Form-Creators FDs of all those Proto-Forms, determines all subjective differences, which are inherent in s-Realities, STCs, and CSRs subterraneously formed by them. For example, representatives of the civilization of *ioolddls* — *mafloks*, *knu-urgs*, *spyr-inkrs* — can simultaneously structure FDs of many Form-Types of animals and fish, as well as of humans. Owing to this, they take part concurrently in the general process of origination of many different-type CSRs and arrange there prosperative terms for extension of opportunities for collaborative creative co-existence for representatives from diverse Synthesis Schemes.

4.0218. In the AAYLLILIESS Collegial Cosmic Intelligence, Creators-ASTROIDS of our «current» SVUULL-VVU-Form-Types are represented by two synthetic civilizations — AIYFRS and SKUULLMS, which create the lowest types of astral Worlds at the most «exterior» Spheres of the given Astral Globe by means of Focus Dynamics of their own creativity. Those Worlds are inhabited by *mafloks*, *knu-urgs*, *maklaks*, *dlokgrs*, *skargovorts*, *mafits*, *klokkes*, and like that. SFUURMM-Forms, structuring their FDs,

are characterized by extremely low potential of different-Protoformal «thinking,» mental capabilities, the faint signs of which fade totally in redundant (again, different-Protoformal) emotionality. Just the roughest types of ASTRAL-Plasma are synthesized in their focal Configurations. Those types are of the high tensorness (because of heavy imperceptness of interconnections). That is why there is no chance for realizational potential of Creators-PLASMOIDS (which structure the general Focus Dynamics of the GREIYSLIIS (Earth) CCI together with Creators-ASTROIDS) to appear inside those astral civilizations' FDs.

4.0219. Here, «thinking» is quoted to attract your attention once more to the fact that both mental and vital SFUURMM-Forms of humans, which are invaderentially structured with OO-UU-attributes of the ALL-Will-of-ALL-Intelligence and ALL-Love–ALL-Wisdom PCQs, can differ in their Sense very much from Conceptions peculiar to other Proto-Forms. This is because the Protoformal Conceptions are formed in accordance with PCQs attributes inherent in other Synthesis Schemes. The reasons, which are laid down in peculiarities of subterraneous Synthesis Schemes of each Proto-Form, and which lead one or another Self-Consciousness Form to the process of reflection or expression of its emotions, can differ from each other very much and turn Form-Creators of diverse Proto-Forms to totally different subjective assessments of each existent situation with following stimulation of diverse psychic responds to it, accordingly.

4.0220. For example, the presence of conditionally mental Aspects of the ALL-Primordially–ALL-Initiality, or ALL-Mobility–ALL-Presence, or ALL-Knowledge–ALL-Informedness, or ALL-Aspiration OO-UU-Entities inside of a two-invaderential Synthesis Scheme instead of intellectual (for us!) OO-UU-attributes of the ALL-Will-of-ALL-Intelligence PCQ can influence radically on changing the qualitative state of the thinking process and means of consistent formation of all the multiplicity of logical lines, which define «current» choices of Form-Creators. Even if the second part of Synthesis Scheme of the Focus Dynamics is represented by the attributes of one and the same OO-UU-Entity (for example, ALL-Love–ALL-Wisdom) during this process, so the difference in subjective mental evaluation of one and the same situation by Form-Creators of diverse Proto-Forms, being present inside the «person's» FD, could be just enormous (right up to qualitatively opposite). The same could be said about the influence, on the effectiveness of Form-Creators' FDs, of conditionally vital heterogeneous attributes structuring ASTRAL-Plasma: Representatives of various Proto-Forms have psychic analogs of human emotionality and sensuality type (which is originated on the basis of the attributes of the ALL-Love–ALL-Wisdom PCQ), being combined into totally different SFUURMM-Forms. This has a substantial impact on ways of their implementation through subterraneous psychic reactions of people.

4.0221. By the way, the presence of all these specificities of origination of SFUURMM-Forms by Form-Creators, Which reflect attributes of various OO-UU-Entities, provides the process of manifestation of the Multipolarization Principle through Focus Dynamics of different-Qualitative «personalized» Interpretations of one Stereo-Form: To change one choice for another, it might be enough to break slightly the level of interconnections activity inside combinations of heterogeneous attributes, which structure Focus Dynamics of a «person.» At this process of simultaneous making different-Qualitative decisions, a great role is played not only by carriers of invaderential OO-UU-attributes, but also vecsative Form-Creators as catalyzing factors extending realizational opportunities for every Proto-Form.

4.0222. It is worthy to note that principles of origination of thinking and psychics (emotions, feelings) of representatives of the vast majority of contemporary humans are still very far from processes of the two-inverderental Synthesis Scheme of the lluvvumic birvulyarity type. Intensive activity of vecsative Form-Creators from all possible protoformal development Directions inside Focus Dynamics of humans does not allow to create and support their choices stably with real human SFUURMM-Forms structured with the attributes of HSI and HIA.

4.0223. That means that it is too early for us to speak of activity of such features, as immunitant Responsibility and humanitarian Freedom inside the FD of the modern humankind's Collective Consciousness. These features are binding for a highly developed civilization developing in the lluvvumic Direction. All that is the result of although unconscious (due to the fact that the iissiidiological Knowledge becomes available for the *given* humankind *for the first time*), but very significant and active replacement (inside Focus Dynamics of the humans) of intellectual OO-UU-attributes of the ALL-Will-of-ALL-Intelligence PCQ and sensuous OO-UU-attributes of the ALL-Love-ALL-Wisdom PCQ for much more depliative analogs of them (as for the given exhibition regime at the «human» STCs!) peculiar to other Proto-Forms.

4.0224. Owing exactly to this fact, such high lluvvumic Feelings and altruistic experience as unconditional Love and limitless Friendship, peculiar only to highly developed people, are displaced inside FDs of the vast majority of our society very easily and conveniently by primitive sexual affection and selfish emotional attachment; while unselfish intellectual activity, based on developed Intuition and deep Comprehension of cause-and-effect interconnections, which provide each our choice and objective events, are displaced by duplicitous cunning and craftiness, shameless chicanery and «casuistry,» long-winded mind games and demagogy, hypocritical intriguing and politicking, which reflect only selfish characteristics at the given exhibition regime. In various interpretations they are much usual for thinking processes of protoformal representatives who surround us.

4.0225. Concurrently with above mentioned inhabitants of the Astral Globe (AIYFRS and SKUULLMS), the general Focus Dynamics of our GREIYSLISS Planetary Entity is provided by Form-Creators of Cosmic Collective Intelligences of the most «exterior» Spheres of the Mental Globe (GRIISSTMM) — equally primitive lital (undeveloped) LUUD-VVU-Forms who also originated the two main synthetic civilizations (PAARRDS and TLOONFRS). At Form-structures of GRIISSTMM, some types of primitive and original collective subjective Realities were formed through the creative work of these civilizations' representatives. In the terms of those Realities numerous «nationalities» self-realize creatively (*glepmins, skargonts, vergons, priffers, glumids, shortsers, olds, klungrs, mahoits*, and many others). They are much less emotional and more restrained in their manifestations than AIYFRS and SKUULLMS, but they are more inclined to primitive analysis and elementary logics than the latter. All those «peoples» are also in deep ignorance and egocentrism, and they concentrate on the Synthesis of the roughest focal-ethereal interconnections of MENTAL-Plasma.

## Chapter 7. Overtones of Fields-Consciousnesses (VAALL-VAA-KKAA)

4.0226. Besides conditional division into 12 basic resonational varieties of Form-structures of the Subplan-Overtones, focal-ethereal Form-structures of each Plan-Overtone of Fields-Consciousnesses are duvuyllerrtly structured with 12 basic conditional types of *Overtones of Fields-Consciousnesses* (VAALL-VAA-KKAA) by features of increasing specificity of functions performed by Form-Creators (by Their simultaneous participation in some particular Synthesis Schemes). Each Overtone represents some specific — *as if* «independent» *in our* subjective Perception — resopason of creative state of FDs of all Collective Cosmic Intelligences which make, through own creative work, the space-time structures of each of the 12 Plan-Overtones. Actually, Overtones represent all countless variety of different-type and different-Qualitative dimensional resopasons of possible exhiberation of FDs and f-Configurations of all Self-Consciousnesses Forms at those particular (inertial) manifestational regimes which are inherent in the Tertiary Universal Illusion.

4.0227. Sll oogrent FD of each of the 12 basic conditional types of Overtones is created by Form-Creators of many different-protoformal birvulyarity types and development Directions. Meaning, *objectively*, Overtones are structured duvuyllerrtly and sll oogrently with many qualitatively corresponding focal-ethereal interconnections, but *subjectively*, in each specific case of their consideration, they reflect a specifically (inside the Perception systems of various Self-Consciousnesses Forms) subterransive features of Form-Creators' FDs primarily participating *in some particular* Synthesis Schemes and playing locally a role of some subjective Observers.

4.0228. For example, when we consider some properties and peculiarities of our surrounding reality, we «project» subterransively SFUURMM-Forms, peculiar to our — *human* — Focus Dynamics, to space-time structures of Overtone of a definite type. As the result, inside our Perception systems, we get the part of simultaneous qualitative state of this Overtone, which Form-Creators of our *two-invaderental* Synthesis Scheme are able to kleks (to quantize) and to «unpack» in an appropriate way. All the rest informational-qualitative filling of the given Overtone (as well as of the rest eleven Overtones) is unavailable for bio-Creators of the Perception systems of our mixtum NUU-VVU-Form-Types (however, at this moment, any part of the Overtone might be available for Form-Creators of some other Proto-Forms structuring the given dimension diapason along with humans).

4.0229. Representatives of each of other Proto-Forms, who structure together with us the same STCs' groups, «pull out» resonationally and «unpack» subterransively, from Form-structures of *the same* Overtone, that part of «their surrounding reality,» peculiar only to their SFUURMM-Forms, which reflect all the specificity of their own Synthesis Schemes inside their FDs. Owing to these universal properties of Overtones, tied very closely functionally with features of their Subplans, each «point» at Space-Time in inertial conditions of the Tertiary Illusion can provide simultaneous exhiberation of Focus Dynamics of a countless amount of Proto-Forms structuring various birvulyarity types.

4.0230. Overtones of Fields-Consciousnesses are special types of Form-structures, which differ in their functionality from described before, qualitative states of the Tertiary Illusion (Plan-Overtones and their Subplans). They differ not only in much higher inertia of «level-by-level» combination of

Light fibers of the Tertiary Energy-Plasma (GOLLT-SSS), but also in disproportionately less qualitative state of Energy-Information (SFUURMM-Forms) of Focus Dynamics of all Self-Consciousnesses Forms, which make endless diversity of realizational creation Spheres specific for each Overtone. Basically, Overtones represent original all-round «intersections» of focal-ethereal interconnections among f-Configurations of different-protoformal diffuzgent Self-Consciousnesses Forms. Those «intersections» are subjectively determined by us as «*dimension resopasons.*»

4.0231. Each diapason of creative manifestation of different-Qualitative Self-Consciousnesses Forms (Sub-Overtone) is structured with an infinite multitude of interconnected (by means of SFUURMM-Forms of joint Focus Dynamics) dimension resopasons (Overtones), which can reflect *some* of countless diversity of subterransive peculiarities inherent in Focus Dynamics of every Self-Consciousness Form at the given exuberation regime. The creative manifestation spectrum of each SFUURMM-Form is provided with specifics of many resopasons structured with different-protoformal interconnections. Exactly at these conditionally «local points» of their joint exuberation, the Mechanism of implementation of all Processes of inter-Qualitative Synthesis of all FDs is «laid» through resonational connection of Focus Dynamics of many interacting Proto-Forms.

4.0232. Fundamental «details» of each act of so-called «intra-Qualitative» or «inter-Qualitative» Synthesis among FDs of any Self-Consciousnesses Forms are carried out not at once all over the spectrum of their «current» energy-informational interaction (meaning, all over the diapason of their joint exuberation), but only among FDs of Form-Creators from narrow-specific «sections» of their f-Configurations, which could resonate to each other to the most extent by some distinct qualitative attributes (or their analogs) more or less inherent in SFUURMM-Forms structuring these Focus Dynamics. This is what we intend to mean «*resopason-by-resopason amitsirations*» which are peculiar not only to mixtum NUU-VVU-Form-Types, but also to Self-Consciousnesses Forms from any diapason. Every time, after interaction at a level of any resonational dimension diapason, inside Focus Dynamics of the Form-Creators of a Self-Consciousness Form, there are conditions for Them to implement a regular act of a Self-Consciousness's Creative Activity rotational Shift (a «quantum shift» at our diapason) to the next resonationally active (potentially matching by those or other features) resopason of interaction.

4.0233. Such change of order of different-Qualitative resopasonal activity of Focus Dynamics of Form-Creators of undeveloped Self-Consciousnesses Forms (for example, mixtum or dimidiomittense NUU-VVU-Form-Types) can be carried out not *duvuyllerrtly* (for example, the first interactions are among Form-Creators of the most depliative resopasons, then modicative resopasons, and after all ampliative resopasons for given f-Configurations), but in a narrow-concentrated, resonational way (as if «selectively,» particularly) depending on a specific vector direction of Synthesis processes inside one or another Self-Consciousness Form. Those Synthesis processes are performed initially at *Subovertones of Fields-Consciousnesses* (at many *sub-levels* of the intra-Qualitative Synthesis — *dimension sub-resopasons*), and only after that, they go on at Spheres of inter-Qualitative implementation at Form-structures with more informational volume — Overtones (dimension resopasons), Subplan-Overtones (dimension diapasons), and Plan-Overtones of Fields-Consciousnesses (PFD).

4.0234. This Mechanism of resopason-by-resopason interaction is the basis for emergence of particular *illusory* effect inside the Perception systems of diverse Self-Consciousnesses Forms. This effect appears inside FDs of subjective Observers after every revitalization act performed in their surrounding reality. «The Death» phenomenon of any biologic object (in the form perceived by each of you subjectively) is an interstitial result of implementation (by corresponding Form-Creators) of the inter-Qualitative Synthesis process of some — *the most covarllert for a given Focus Dynamics!* — focal-ethereal interconnections at some of finitimus resopasons of the common spectrum of «the current» exhiberation of the f-Configuration of a Self-Consciousness Form locally perceived by you (for example, of a human «person»).

4.0235. In the result of immediate resonational combination, inside FDs of the Form-Creators of a «person» (who as if «has died» before your eyes), of a countless number of different-protoformal interconnections, geyliturgent by some attributes, totally specific terms are immediately created at the same time, inside the informational space of his/her Self-Consciousness, in order for implementation of multipolarizational subchakram amitsiration of the Form-Creators of a given NUU-VVU-Form-Type in Directions of those qualitative Vectors of creative realization («sections» of the slloogrent f-Configuration) where a newly originated VLOOOMOOT has a potential opportunity to be implemented through an FD qualitatively appropriate to it.

4.0236. Narrow-specific peculiarities of the focal Configuration of the previous «person» (perceived by you as a «corpse») — after such resonational-selective «mixing» — make him/her unsuitable and incapable for implementation of the Creative Potential, which was emerged inside the Form-Creators' FDs of the lluuvvumic Synthesis Scheme (qualitative structuring a Configuration is performed by the DNA Form-Creators; meanwhile, the DNA structure might seem quite low-qualitative at the revitalization moment from the perspective of modern biologists and medical professionals). Therefore, the lluuvvumic Form-Creators have to change the «place» of their interstitial localization once again «having reprojected» Their updated FD (totally kleksed with SFUURMM-Forms more harmonious toward attributes' combinations of the whole spectrum of different-Qualitative Vectors of the given resopason!) to more appropriate «section» of the slloogrent f-Configuration. The new «section» already structures *another* STCs' group through simultaneous exhiberation of *another* «personalized» Interpretation.

4.0237. In all the diversity of possible FD multipolarization, at a moment of each revitalization act, it (FD) is manifested simultaneously through subterransive FDs of an infinite multitude of the Stereo-Form's different-Qualitative «personalized» Interpretations which structure duvuyllerrtly, by their Configurations, equally countless multitude of the next (as for the Perception system of the given «person») development scenarios. No any objective, even the least important «delay» happens at any inertial «stage» of this endless and continuous Process of eglleroliftive-amplificational development of Consciousness: Every «person» considered by you as «dead» realizes «him/herself» *alive* immediately (subjectively ALWAYS) in one of versions of his/her «personalized» Interpretations. That versions is the most covarllert in relation to the Qualitative interstitial state of his/her FD.

4.0238. Concerning the preserved focal-ethereal interconnections inherent in the previous (already «dead» for you) mixtum NUU-VVU-Self-Consciousness Form. After revitalization of the lluuvvumic

Form-Creators to another f-Configuration is performed, the interconnections keep being performed actively through FDs of bio-Creators of their corresponding Proto-Forms (right to their complete decomposition into their components — even more microscopic Self-Consciousnesses Forms) at the molecular-atomic and ionic levels of resonational interactions possible for these Form-Creators.

4.0239. Overtones of near-flaks (3.75–4.0 dimension) and flaks Levels are structured with disproportionately more covallert focal-ethereal combinations, than the interstitial mixtum NUU-VVU-Form-Types focused by you. Due to this fact, human STCs' groups, formed by the NUU-VVU-Form-Types, change their properties totally for more universal ones. This excludes completely an opportunity for performance of any archaic Conceptions about «Death» of somebody or, generally, about demolition of anything in the world around us — there are no such Conceptions inside Focus Dynamics of our «future» dimidiomittense NUULL-VVU-Forms (let alone translucense Ones!). Our lluvvumic «future» is based only on SFUURMM-Forms of Qualitative transformation and amplificational convergence of all Self-Consciousnesses Forms.

4.0240. Unlike bio-Creators of mixtum Self-Consciousnesses Forms, who witness as if «with their own eyes» (by generally accepted signs) every fact of «person's dying,» subjective Perception systems of dimidiomittense NUU-VVU-Form-Types are not able just to track and to fix inside their FDs the typical (for us!) illusion of somebody's «Death.» Although, neither amitsirational Process performed by Form-Creators, nor Their intra-Qualitative and inter-Qualitative Synthesis stop even for a moment. In other words, continuously, some «parts» of a slloogrent f-Configuration of the general Stereo-Form (which create «personalized» Interpretations) as if «fall out» of the FD of a dimidiomittense «person,» and his/her FCA gets re-accented to other — *always subjectively alive!* — «personalized» Interpretations.

4.0241. At the above mentioned exuberation Levels of these Self-Consciousnesses Forms (through high functional activity of ampliative SFUURMM-Forms of Form-Creators of frazulert photons inside Their Focus Dynamics including Focus Dynamics of Self-Consciousnesses Forms of Their surrounding reality), much more regularly functioning structure of focal-ethereal interconnections does not allow Form-Creators of fermions (supporting activity of different-protoformal combinations in the given FD) to focus steadily into f-Configurations of other human STCs' groups as usual for us, multimolecular gestalts after multipolarizational revitalization of the lluvvumic Form-Creators.

4.0242. This subjective effect (from the standpoint of a certain Observer) of an original *as if* «gap» in existing interconnections («as if» — because, at the same time, absolutely NOTHING changes in slloogrent condition of f-Configuration: Qualitative perturbation of the FD is the only thing that takes place!) happens due to powerful inertia (imperseptness) of Form-Creators' FDs of NUU-VVU-Form-Types' mixtum analogs. Much higher covallertness inherent in combinations of invaderental lluvvumic attributes, which are synthesized inside the Focus Dynamics of highly developed (dimidiomittense) human individuals, does not allow Form-Creators of their Perception systems to focus on this illusory effect.

4.0243. Actually, after every such act of «mass» revitalization of the lluvvumic Form-Creators to an f-Configuration of another «personalized» Interpretation, much more impersept types of

remaining interconnections among vecsative different-protoformal Form-Creators are weakened almost immediately, and they «crumble» (annihilate each other) and as if «return focally» to more dense-material, but more covarllert for their Synthesis Schemes, configurational combinations of transparentive and mixtum Self-Consciousnesses Forms. Inside FDs of translucense FLAKS-Forms, which are performed already in accordance with three-invaderental (therefore, more covarllert!) Synthesis Schemes, this process of radical replacement of one f-Configuration with another one (more synthesized in a specific resopason by some Qualitative attributes) is executed even more intensively and totally insensibly for an external Observer self-realizing at the given exhiberation regime. So, activity of any modern Conceptions about possibility of «death» of any Self-Consciousness Form is almost non-existent inside Their Focus Dynamics.

4.0244. It is worthy to note that, as compared to exhiberation regimes of Focus Dynamics peculiar to f-Configurations of Subplan-Overtones (dimension diapasons of STCs' and Conversums' groups), in conditions of focal-ethereal interconnections structuring Overtones (narrow-specific resonational dimension diapasons), the Form-Creators' FD of each Self-Consciousness Form is affected with tensoriness (by «inhibitory,» dissonant influence) to much more degree by their own (Overtones') high Coefficient of inertial deformation (Qualitative inflation of focal-ethereal interconnections). All this restricts and hinders strongly realizational opportunities of Form-Creators from these types of s-Realities, and this reduces significantly effectiveness of the processes of TEC- or VEC-«unpackings» of UU-Forms. In turn, this specific feature of Overtones' Form-structures impedes to a great extent the active implementation and manifestation of ampliative SFUURMM-Forms in these inertial conditions. After SSLOO-SS-SNAA-Creators adapt Their LLAASS-Forms, they are actively transgressed — already as ampliative SFUURMM-Forms — to Subplan-Overtones by Focus Dynamics of SLAA-SS-MII-Creators of the Highest Levels of Plan-Overtones.

4.0245. Having almost no chance freely and seamlessly to join Creative Activity of Form-Creators' SFUURMM-Forms from the more ampliative dimension diapasons (because, in order for that, in advance, Form-Creators of a Self-Consciousness Form have to synthesize and to balance sustainably Their FD all over different-protoformal interconnections of all multitude of resopasons of depliative Levels!), Form-Creators of Overtones form Their worldview and diverse versions of knowledge of «themselves» on the basis of those depliative Conceptions which inevitably appear during the process of Their tireless attempts to regulate qualitatively — resopason-by-resopason — tensor relationships among FDs of a countless amount of Self-Consciousnesses Forms representing different-protoformal CCIs' Interests at each dimension resopason.

4.0246. As those relationships reflect very often subjective-dual features inherent to specific ethereal combinations of attributes of various OO-UU-Entities, the most of SFUURMM-Forms, generated by Overtones Form-Creators' FDs, also have relative discreteness, duality, opposition to something different (Overtones of different dimension diapasons have them to varying degrees!). By the way, exactly this fact facilitates greatly creation of various opportunities for manifestation of such features inside FDs of Form-Creators of any Overtone which we determine as subterransiveness («subjective individualization of Conceptions»).

4.0247. For example, in the Overtones Form-Creators' FDs which arrange all s-Realities in multi-resopason KKAA-RFF-KKAA exuberation spectrum structured by our mixtum NUU-VVU-Form-Types, such individualization and narrow-oriented obsession with our Interests turns to origination of some characteristics in relationships among different-protoformal Self-Consciousnesses Forms. These characteristics are inflexibility, conservatism, criticism, rejection of alien SFUURMM-Forms, and so forth. For effective regulation of all multitude of heterogeneous Form-Creators' FDs performed in such tensor interconnections, They have to spend, in cooperative simultaneous coexistence of various Proto-Forms' representatives, truly zillions eons of Time which are «colored» with aggression, selfishness, misunderstanding, and disunity of creative Interests.

4.0248. Only after successful making strong and sustained efforts for persistent and conscious removal of conflict events and destructive psycho-mental states constantly appearing in definite resopasons spectrums, Overtones' Form-Creators get an opportunity for consistent qualitative universalization of Perception systems of Self-Consciousnesses Forms focused by Them, and for further amitsiration to Self-Consciousnesses Forms with more long-acting FDs of more ampliative (less inertial) diapasons of subterrassive exuberation.

4.0249. Within the limits of very limited opportunities of our «current» Perception systems, we have our own subjective view on consistent qualitative transgression (through the UPDR-Dynamics) of more ampliative SFUURMM-Forms of heterogeneous Form-Creators' Focus Dynamics from each Plan-Overtone of Fields-Consciousnesses to more specialized by realizational attributes (which means more depliative), states of Subplan-Overtones' Form-structures (diapasons of different-protoformal dimension) of Fields-Consciousnesses. These are «the same» Fields-Consciousnesses which, in their turn, self-diversify, inside the skrruullerrt system, to much less stable (by attributes of covarllertness and geyliturgentness) focal-ethereal interconnections peculiar to the countless amount of inertial «projections» of Overtones of «the same» Fields-Consciousnesses (meaning, dimension Levels or spectrums consisting of an infinite diversity of different-Qualitative resopasons).

4.0250. However, that is not the end of this all-embracing Process of depliative inertial deformation of SFUURMM-Forms of the Tertiary Universal Illusion informational Flow (subjective distortion of UU-Forms), but that is the «large extension» and «global detailing» thereof through the Form-Creators' FDs of *Subovertones* of Fields-Consciousnesses (FFULLU-U-DS), as far as that Process is being consistently transgressed by the UPDR duvuyllerrtly-sllloogrently through the Form-Creators' Focus Dynamics of functionally specialized Form-structures of the Tertiary Energy-Plasma (Plasma-Form, Form-Plasma, Plasma-Matter, and Form-Matter).

4.0251. At creative performances peculiar to Them, based on already heavily deformed (fundamentally wrong) Conceptions about «Themselves» and the Nature of Their surrounding reality, Form-Creators of Subovertones of Fields-Consciousnesses create, with Their FDs, a countless diversity of Their Own narrow-specific space-time Form-structures («personal» subjective Realities of a TAALD-ROUU-U-DS-type), whose qualitative features and subterrassive properties also differ from each other very much even within the limits of vibrations of a single *Level* (a certain conditional spectrum of qualitative compatibility which is duvuyllerrtly structured with focal-ethereal interconnections of several different-type resopasons).

4.0252. Form-structures of each Sub-overtone are originated by the much more fragmented (disunited, discrete in comparison with the Overtones' FDs) Form-Creators' Focus Dynamics of any of «locally» organized Rezomirals of manifestation. The realizational f-Configurations of the latter are perceived by us subjectively at our STCs' groups as one or another Form-kind of some of protoformal CCIs (for example, s-Realities which are subterraneously formed at dimension resopasons, focused by us, with particular SFUURMM-Forms of people or other humanoids, dogs, elephants, ants, dinosaurs, birds, pterodactyls, fish, clams, various mineral crystals, all possible kinds of plants, separate types of mushrooms, diverse strains of micro-organisms, or various fermions).

4.0253. Focal-ethereal interconnections, which produce Form-structures of all the infinite diversity of Subovertones (over each of the 12 Plan-Overtones of Fields-Consciousnesses!), are highly impercept (often cruvorsort!) to each other even within the limits of Form-Creators' FD of one Proto-Form, because those interconnections are structured with very unstable SFUURMM-Forms. The latter still represent heavily undersynthesized combinations of all multitude of heterogeneous attributes peculiar to the 12 OO-UU-Entities. Such level-by-level distortion of Subovertones Form-Creators FDs' SFUURMM-Forms, which underwent, already before that, a deformation with strong inertial restrictions inherent in Form-Creators' FDs of Overtones and Subplan-Overtones, leads to even greater disinformation increase in the creative work of inhabitants of numerous TAALD-ROUU-U-DS-realities.

4.0254. These SFUURMM-Forms, heavily distorted by lack (inside the Form-Creators' FDs) of relevant ampliative interconnections, «are projected» (along with extra distortion!) to an infinite diversity of space-time Form-structures — *Form-Types* of subjective Realities or spectrally expressed «Areas» (f-Configurations combinations constructed particularly by some attributes peculiar only to them) of Active Associative Perception of heterogeneous Form-Creators. Their extremely fragmented FDs are able to reflect very narrow realizational Interests of even more local and narrow-specialized (by Synthesis) Self-Consciousnesses Forms of different-protoformal CCIs. All different-Qualitative varieties (subterraneous *Form-Types*) of absolutely all DS-LLU-U-LLU-DS collective subjective Realities consist of exactly those Form-structures.

4.0255. I also would note, in addition to these slloogrent «Areas,» there are «Areas» of Passive Associative Perception, at narrow-specific Form-structures of which all the Form-Creators of various Proto-Forms as if «passively,» without Own realization of the manifestational Essence *concurrently* implemented through Their FDs, synthesize an Experience of all multitude of *analogous associations* which is simultaneously transmitted to the Focus Dynamics of Collegial Cosmic Intelligence of our Macrocosmos by the Focus Dynamics of zillions of Collegial Cosmic Intelligences of Macrocosmoses of other types.

## Chapter 8. Subovertones of Fields-Consciousnesses and principles of subterransive formation of collective subjective Realities

4.0256. So, we have figured out that a part of slloogrent Form-structures of the twelve primary Plasmic Forces Diapasons, which we interpret very subjectively and restrictively as the «Plan-Overtones of Fields-Consciousnesses,» represents — in all totality of Focus Dynamics of corresponding heterogeneous SLAA-SS-MII-Creators — a fundamental realizational Mechanism of subterransive-simultaneous exhibition of the Self-Consciousnesses Forms' Focus Dynamics of all different-protoformal CCIs. With their f-Configurations, the latter structure ambiguously all the different-type diversity of focal-ethereal interconnections of the conditional manifestation megadiapason of the Tertiary Universal Illusion (from 0 to  $\pm 12$  dimension).

4.0257. You have to understand that the Plan-Overtones themselves are the whole *energy-informational basis* owing to which availability the implementation of Form-Creators' Creative Activity is provided at the given exhibition regime of CCIs. That is why the Plan-Overtones' functions can be compared with functions of original analogs of Universums of the Universal Tertiary Illusion. By means of simultaneously implemented *transgressive-convergent* (multipolarizationally diversifying along both depliative and ampliative development Vectors) specificities of the Universal Plasmic-Differentiated Radiation of Energy-Plasma, in the given conditions, those Universums originated the slloogrent focal Configuration of the Whole objective Content which structures the ambiguous FD of all heterogeneous Form-Creators of the Tertiary Illusion.

4.0258. In specific conditions of resonational realization of focal-ethereal combinations peculiar to the given section of the Macrocosmos's general skrruullerrt system, during the transgressive-convergent Process, due to the presence of different indicators of qualitative difference (conditional dissonational distances) among covarllertly combinable attributes inside subjective Focus Dynamics of different-type Form-Creators, the definite, duvuyllerrtly-diffuzgently transforming to each other, Form-structures were originated naturally. They differ from each other with their inherent functionality (what we subjectively determine as CCIs' subterransive properties and peculiarities owing to which, at various «areas» of Space-Time, more or less prosperative conditions for implementation of any types of Creative Activity of heterogeneous Form-Creators are organized). These Levels of gathering Focus Dynamics to Form-structures (different-protoformal STCs' groups and Conversums), specialized by some attributes, are determined by us as «Subplan-Overtones of Fields-Consciousnesses.»

4.0259. I would like to remind you that groups of space-time Continuums are purely subjective notion artificially «tied» by us (for convenience of our logic suggestions and our ability to compare different-Qualitative FD states) to diverse interstitial phases of the general Process of performance of the vast set of narrow-specific SFUURMM-Forms peculiar to creativity of Self-Consciousnesses Forms of one of Proto-Forms. If we use the expression «human STCs,» we mean all the multitude of Form-structures which are arranged and which function in a certain order (and in specific conditions of Space-Time) owing to invaderental activity of some typical collective Conceptions of a big number of people (in other words, some part of Collective Consciousness of humankind identifying itself with a certain Time Flow) about «themselves» and features of their surrounding world.

4.0260. For example, when you drive on a highway through a wild forest not controlled by people *in any way*, the artificially made Form-structures of all the highway space reflect the specificity of exactly «human» STCs' groups (all possible elements and design of the highway, other cars, pedestrians, all the events that could happen along the road) with peculiar to people, Conceptions about possible types of useful creative realization (*in favor of people!*) of any of these Form-structures. Yet, if you get off the road and go far to the wild forest, you lose control over the situation immediately. The situation is made by an unknown environment, and the capability for ensured facilitation of your (*human*) existence disappears immediately from your FD because details of your Life now depend much more on the Interests and plans of Self-Consciousnesses Forms of those Proto-Forms which, to the most degree, control and push things at the given part of Space-Time.

4.0261. An STCs' group is called by names of Proto-Forms which organize consciously the process of combining the majority of interconnections within a given exuberation regime (for example, «lion,» «lynx,» «wolf,» «bear,» «shark,» «dolphin,» «eagle» STCs group, or — without clear signs of predominance of any Proto-Form's FD — «marsh,» «desert,» «sea,» «forest,» «mountain,» group, and so forth). Every STC can be considered subjectively (though, only to a definite degree because our Perception spectrum covers only visible and audible parts of different-Protoformal FDs, and a psycho-mental component is excluded) as an environment of dominating habitat of one of Proto-Forms which constantly transforms, controls, and performs its activity in accordance with the needs of its representatives, on its own, on the background of less effective FDs of representatives of many other Proto-Forms. We determine the name of the given STC by the name of that primary Proto-Form.

4.0262. The entire amount of Focus Dynamics, generated by Self-Consciousnesses Forms of Proto-Forms of different-type STCs' groups simultaneously manifested all over the multitude of Time Flows, makes specific subjective development Directions inside Form-structures of Subplan-Overtones. These Directions cover all diversity of only their own Creative Activity whose various versions might be implemented within the given exuberation diapason. Structured with the Form-Creators' FDs of a single Proto-Form in the innumerable different-Qualitative STCs' groups (moreover, these STCs' groups and a Proto-Form might not necessarily be of «the same name!»), these Directions are determined by us as Conversums. If space-time Continuums in each subterraneous dimension diapason reflect specifically absolutely all kinds of activity of different-Protoformal Self-Consciousnesses Forms structuring every diapason, so an FD of each Conversum reflects strictly definite part of the most covariant combinations of focal-ethereal interconnections of this diapason while these combinations are klesed within one Synthesis Scheme.

4.0263. For example, in parallel with the «human» Conversum, which unites *all* the Experience of subjective realizations of FDs of humankind's Collective Consciousnesses (PROOFF-RRU) all over the multitude of different-type STCs' groups *formed at a given dimension diapason* (of human as well as all other Proto-Forms), there is an infinite diversity of Conversums which sublimate specifically, inside their FDs, an Experience of simultaneous Existence of Self-Consciousnesses Forms of each of CCIs of animals (including birds, fish, insects), plants, microorganisms, and minerals in all STCs of the given diapason. As a matter of fact, all infinite diversity of those different-Protoformal Conversums' types represents the general objective — differently as if «prolonged» in Time — depiction of subjective simultaneous realization of Form-Creators of *equally* infinite variety of different-Protoformal

Collective Cosmic Intelligences in each dimension diapason. Those Form-Creators «project» Themselves duvuyllerrtly-diffuzgently to sll oogrent Focus Dynamics of Each Other with Their inherent SFUURMM-Forms, and They create more and more universal CCIs' Types in each successive diapason of eglleroliftive amitsirations in Their birvulyarity Directions.

4.0264. For example, in different-Qualitative conditions of simultaneous exhibition of Own sll oogrent Focus Dynamics within the limits of the Tertiary Illusion, LLUU-VVU-Form — as a whole and indivisible Type of Collective Intelligence of Cosmic Humankind — is manifested through Form-structures of absolutely all LLUU-VVU-Conversums which (from 2.5-dimensional to 9.0-dimensional diapasons) are structured with SFUURMM-Forms peculiar to all multitude of *mixtum* (2.5–3.5 dimension), *simplisparentive* (3.0–4.0 dimension), *dimidiomittense* (3.75–4.0 dimension), *superparentive* and *translucense* (4.0–5.0 dimension), *dimidioclarus* in the lluuuvvumic birvulyarity type (4.75–5.25 dimension), *supraparentive* and *luminosal* (5.0–6.0 dimension) analogs of NUU-VVU-Form-Types, as well as to much more universal analogs of LLUU-VVU-Form-Types. Through their amitsirations in the lluuuvvumic (and simultaneously in diffuzgent-lluuuvvumic) birvulyarity type, the latter provide functionality of Form-structures of LLUU-VVU-Conversums of orfrovoort (*ultraparentive* and *transliirst* Forms — 6.0–7.0 dimension), pruuisstren (*ekstraparentive* and *transtaarms* Forms — 7.0–8.0 dimension), and iymiyllirt (*divinparentive* and *transtlluuuvvst* Forms — 8.0–9.0 dimension) diapasons. Both the lluuuvvumic development Direction, and its Conversums type are changed for the lluuuvvumic-goolgamaaaic Direction.

4.0265. As we have cleared up, in the Mechanism of simultaneous qualitative localization of different-protoformal Focus Dynamics of Form-Creators of different birvulyarity types at various “areas” (focal-ethereal combinations) of sll oogrent f-Configuration of the skrruullerrt system, a very important role is played by Overtones of Fields-Consciousnesses whose characteristic energy-informational Form-structures (dimension resopasons) provide the resonational-reflecting correction and detailing the realizational diversity of more universal SFUURMM-Forms «inside» a conditional qualitational (transgressive) part of the general Focus Dynamics of all CCIs of Subplan-Overtones. Those SFUURMM-Forms, structuring more general Interests of diapasonic CCIs or so-called «global Ideas,» «Egregors,» «Archetypes,» are corrected and detailed to each «person's» subtterransive Self-Consciousness levels which are peculiar to his/her subjective Perception system. I would like to remind you that this discrete and summary (transgressive-convergent) function of dimension resopasons is performed specifically through Perception systems of different-Qualitative analogs of Form-Types of all CCIs simultaneously exhibited in each dimension diapason of the Tertiary Illusion.

4.0266. More pronounced (as compared with the Subplan-Overtones) discrete properties of f-Configurations of resopasonal Form-structures are stipulated by the significantly strengthened impact, on FDs of the Form-Creators structuring them, of effect of inertial refraction (deformation) of all diversity of heterogeneous ethereal «projections» being duvuyllerrtly transgressed across Macrocosmos owing to the presence of the UPDR-Dynamics. Just like an electromagnetic wave performs diffractive properties in specific conditions (for example, sunlight passes through many water drops-prisms and as if «gets split» into different-wave spectrum, and the sum of its manifestations is perceived by us as multicolor rainbow while each Proto-Form perceives it in its own way), more amplificational ethereal «projections» of LLAASS-Forms are included into less and less covarllert

combinations of the sllougrent f-Configuration of the skrruullerrt system and, owing to the lack (qualitational «falling out» from the FD) of Their inherent interconnections, undergo all possible informational (notional) changes inside diverse Perception systems. Finally, LLAASS-Forms «self-project» from diapasonal Form-structures to resopasonal Form-Creators' FDs as the increasingly depliative (more cruvursorrt) SFUURMM-Forms versions.

4.0267. In reverse order (at the concatenational process of eglleroliftive convergence of focal-ethereal interconnections through Form-Creators' FDs), all fragments of SFUURMM-Forms' broken «sections,» having inertially «fallen out» as the result of the UPDR-Transgression of LLAASS-Forms, are recovered consistently inside the FD to more sustainable covarllert combinations inherent in many *different-protoformal* dimension resopasons and which, consequently, involve amplificational Experience of Self-Consciousnesses Forms of all Proto-Forms. Thus, qualitatively improved meaning of subterransive Interests of Form-Creators is duvuyllerrtly «reprojected» to resopasons of more ampliative (specific for each birvulyarity type) Self-Consciousness Levels. That meaning not only facilitates replacements of f-Configurations during the process of eglleroliftive amitsirations, but also unifies fundamentally Perception systems of their focused Self-Consciousnesses Forms and improves their attitude to the world around.

4.0268. This way, heavily inertial (as compared to more universal features of Subplan-Overtones) properties and pronounced destroying features of Form-structures of Overtones of Fields-Consciousnesses are qualitatively transformed through Focus Dynamics of Form-Creators of different-protoformal Self-Consciousnesses Forms (and their subterransive s-Realities) and play the most important role at the formation and simultaneous exhiberation of all infinite diversity of *collective subjective Realities*, or shortly CSRs (that is, Realities created with SFUURMM-Forms peculiar to realizational creative work of Collective Consciousnesses of a definite CCIs' type).

4.0269. It is worthy to note, for the whole subjective multibillion years History of continuous multipolarizational implementation of the general Focus Dynamics of all diversity of different-Qualitative types of the humankind's Collective Consciousnesses, it (FD) is constantly represented in the terms of changing some CSRs for others. In some of its simultaneous versions, this global Process is more or less ampliatively pronounced (in relation to conditions of a given Synthesis Scheme), and in some other versions, It is clearly retardational, and, as the result, there is birvulyart decondicification of the majority of people and stable refraction of the PROOFF-RRU's Focus Dynamics towards protoformal STCs' groups.

4.0270. In some periods of subjective human History, such radical replacement of f-Configurations of some CSRs for the others required change of tens of generations. In the meantime, in some other (more «developed,» informationally enriched) periods, implementation of such qualitative perturbations of the PROOFF-RRU's Focus Dynamics covered a period much shorter in duration than one generation's life time. Today, in human community, the coexistence of just two generations (parents and their children) is enough in different «sections» of sllougrent focal Configuration where conscious exhiberation of their FDs is performed duvuyllerrtly-concatenationally. In the Paradigm of the human Collective Consciousness, such a great amount of different-Qualitative kleksings is accumulated which leads to radical changes of qualitative state of not only SFUURMM-Forms, but

also initiated by them, correlations of favor for invaderental attributes peculiar to the lluuvmic Synthesis Scheme.

4.0271. There is a continuous multipolarizational rotation of SFUURMM-Forms of Form-Creators' Focus Dynamics of all particular «parts» of the holistic LLUU-VVU-Form not only «inside» the lluuvmic birvularity type (meaning, all diversity of different-Qualitative Collective Consciousnesses of «humankind» of different types which structure different STCs' groups in various dimension diapasons). Such rotation is carried out simultaneously by means of changing some types of «human» CSRs for other types of «human» (*again*) CSRs. There is also permanent rotation of FDs among Form-Creators of CCIs of birvularity types diffuzgently compatible among each other. This fact allows SFUURMM-Forms of all possible «human» CSRs to adapt appropriately to various exhibition conditions which are caused by narrow-specific peculiarities of diverse Synthesis Schemes, and to be performed simultaneously and originally also through Focus Dynamics of Self-Consciousnesses Forms of many *not human* types of collective subjective Realities.

4.0272. All infinite multitude of such, *duvuyllerrt* by their characteristic type of rotationness, *different-protoformal* CSRs, whose Self-Consciousnesses Forms interact with each other to more or less degree by means of the informational content particularly characteristic to all of them (namely, various subterransive analogs of SFUURMM-Forms of fear and joy, love and hatred, kindness and evil, and so on), create some qualitative totality of focal-ethereal combinations of definite signs resonating to each other to varying degrees at Form-structures of each Subplan-Overtone partially considered by us. Properties and features of that *inter-overtone* Form-structure, where Form-Creators' FDs of the NUU-VVU-Form-Types are involved in some way, can be characterized by a single Sound Code — DS-LLU-U-LLU-DS.

4.0273. Along with CSRs of Collective Cosmic Intelligences of many Proto-Forms, which structure the f-Configuration of our Planetary Entity, subterransive interconnections of this Form-structure «include» naturally a certain part of slloogrent FD of Form-Creators of different-Qualitative «human» types of collective subjective Realities. All of these CSRs differ from each other by significant qualitative discrepancy in the most active «human» SFUURMM-Forms taking part in formation of each of those CSRs. This discrepancy is *duvuyllerrtly* changed (and accumulated consistently!) in each multipolarized Direction of simultaneous Focus Dynamics of Form-Creators of all the diversity of the NUU-VVU-Form-Types' analogs. Due to persistent accumulation of these specific qualitative changes in each of those Directions of joint different-*protoformal* creation, an infinite multitude of different-type «human» CSRs, *duvuyllerrtly* transiting into each other, is emerged simultaneously in Form-structures of each Overtone (in conditions of different Time Flows!).

4.0274. For example, a type of «human» collective subjective Reality currently realized by all of us (its SCC is DS-VVU-U-LLU-VVU-DS; it reflects interconnections among FDs of many Overtones of the conditional exhibition regime from 2.5 to 3.5 dimension at the Form-structure of the given civilization) is a result of the process of *duvuyllerrt-multipolarized transgression* and accumulation of qualitative changes inside Focus Dynamics of many of those our «personalized» Interpretations and particular NUU-VVU-Form-Types from the CSR which are qualitatively very close to us by basic SFUURMM-Forms. However, owing to the fact that conditional depliative-ampliative «parts» of

those SFUURMM-Forms are used very differently by our Interpretations for implementation of our subterransive Interests, there is a rather powerful Process, inside the slloogrent FD of all human CSRs, of qualitative diversification of the general Focus Dynamics into the following spectrum of CSRs: lluuvvumic, more lluuvvumic, near-lluuvvumic, more protoformal, and protoformal CSRs.

4.0275. To demonstrate you the Meaning of those consistent transformations in any way, I would use the Russian alphabet. Let us say, the vast «majority» of qualitative changes performed inside the FDs of Collective Consciousness of humans, who have been realizing «themselves» subterransively at the given type of human CSR (DS-VVU-U-LLU-VVU-DS) for a definite time period, falls on some signs combinations expressed as «LL.»

4.0276. So, from the first «side,» the process of *multipolarizational* changing qualitiveness on the given characteristic combination of the LL-signs can be shown as some *conditional* sequence if focusing on letters replacements: The letters, which are closer to the letter «L» (in alphabetic order), are combinations of quite high covarllertness (... YO, ZH, Z, I, Y, K ⇌ ...L... ⇌ M, N, O, P, R, S...), and those, which are farther from «L» (... A, B, V, G, D, E ⇌ ...L... ⇌ T, U, F, KH, TS, CH...), show the imperseptness increasing among signs — so, among types of collective subjective Realities which are emerged as logical outcomes of simultaneous perturbational processes performed inside of Form-Creators' FDs of different-Qualitative «personalized» Interpretations. For example:

DS-VVU-U-LMU-VVU-DS ⇌  
 DS-VVU-U-LNU-VVU-DS ⇌  
 DS-VVU-U-LOU-VVU-DS ⇌  
 DS-VVU-U-LPU-VVU-DS ⇌  
 DS-VVU-U-LRU-VVU-DS ⇌  
 DS-VVU-U-LSU-VVU-DS ⇌  
 DS-VVU-U-LTU-VVU-DS ⇌

DS-VVU-U-LUU-VVU-DS ⇌  
 DS-VVU-U-LFU-VVU-DS ⇌  
 DS-VVU-U-LKHU-VVU-DS ⇌  
 DS-VVU-U-LTSU-VVU-DS ⇌  
 DS-VVU-U-LCHU-VVU-DS ⇌  
 DS-VVU-U-LSHU-VVU-DS ⇌  
 DS-VVU-U-LSHCHU-VVU-DS-  
 Realities...

4.0277. From another side of our subjective perspective of the same FDs multipolarization which leads them to exhibition at the f-Configurations of «personalized» Interpretations structuring different CSRs types (from K to A and then from YA to Z), this sequence looks like that:

DS-VVU-U-LKU-VVU-DS ⇌  
 DS-VVU-U-LYU-VVU-DS ⇌

DS-VVU-U-LIU-VVU-DS ⇄  
DS-VVU-U-LZU-VVU-DS ⇄  
DS-VVU-U-LZHU-VVU-DS ⇄  
DS-VVU-U-LYOU-VVU-DS ⇄  
DS-VVU-U-LEU-VVU-DS ⇄  
DS-VVU-U-LDU-VVU-DS ⇄  
DS-VVU-U-LGU-VVU-DS ⇄

DS-VVU-U-LVU-VVU-DS ⇄  
DS-VVU-U-LBU-VVU-DS ⇄  
DS-VVU-U-LAU-VVU-DS ⇄  
DS-VVU-U-LYAU-VVU-DS ⇄  
DS-VVU-U-LYUU-VVU-DS ⇄  
DS-VVU-U-LEU-VVU-DS ⇄  
DS-VVU-U-LU-VVU-DS ⇄  
DS-VVU-U-LYU-VVU-DS ⇄  
DS-VVU-U-LBU-VVU-DS-  
Realities....

4.0278. The given scheme of different-Qualitative exhiberation of all multitude of versions of Form-Creators' Focus Dynamics of «human» CSRs through the countless f-Configurations of other «human» CSRs is originated though duvuyllerrtly-consistently from the position of our subjective Perceptions, BUT it is performed in simultaneous-multipolarizational regime. In the given scheme we have considered just a very very small part of possible ways of resonational replacement of one L-combination of signs inside the Form-Creators' FD by other signs (at each «point» of such radical multipolarization of subterransive Focus Dynamics of a great number of people, there is simultaneous emergence of potential conditions for manifestation of zillions of all possible varieties of collective subjective «human» Realities), what brings to specific changes in capabilities of Perception systems of diverse Self-Consciousnesses Forms structuring each CSR's type. *Every* such change in the FD might be provided with a great amount of different-Qualitative transformations implemented concurrently on other signs combinations.

4.0279. Depending on prevailing in this process of SFUURMM-Forms of any protoformal CCIs, the process of subterransive amitsirations is carried out (within the limits of f-Configurations of the given Synthesis Scheme) of people from different «parts» of Collective Consciousness of «humankind» towards the protoformal development Directions and Synthesis Schemes, which are more consistent with new changed signs combinations inside their Focus Dynamics. Such radical qualitative substitutions of SFUURMM-Forms, in their entirety, happen simultaneously (and inertially-continuously) inside multipolarizational FD of Form-Creators of various Self-Consciousnesses Forms *by each* of possible letter combinations, which create in aggregate of attributes combinations, shown by them, not only CSR of our «human» type, but also a multitude of CSRs of different-protoformal types, which are diffuzgent in relation to SFUURMM-Forms, forming our collective subjective Realities.

4.0280. For example, when the general FD of Form-Creators of the CSR of our «modern humankind» (DS-VVU-U-LLU-VVU-DS) is simultaneously initiated by all diversity of SFUURMM-Forms, peculiar to Collective Consciousnesses of various protoformal CCIs to varying degree, and is performed concurrently in different-Qualitative exuberation conditions of the given Subplan-Overtone, so, as the result, an infinite amount of new CSRs' types, somehow qualitatively very similar and somehow totally different from «the human» CSR, are emerged in analogous regimes of Space-Time:

...DS-VVU-U- <u>LLU</u> -VVU-DS... →	...DS- <u>NNU</u> -U- <u>NNU</u> - <u>NNU</u> -DS... →
... → ... → ... → ... →	...DS- <u>NNU</u> -U- <u>LLU</u> - <u>NNU</u> -DS... →

...DS-VVU-U- <u>KKU</u> -VVU-DS... →	...DS- <u>VVU</u> -U- <u>LLU</u> - <u>VVU</u> -DS... →
...DS-VVU-U- <u>KHKHU</u> -VVU-DS... →	...DS- <u>NNU</u> -U- <u>LLU</u> - <u>NNU</u> -DS... →
... → ... → ... → ... →	...DS- <u>VVU</u> -U- <u>VVU</u> - <u>VVU</u> -DS... →
	...DS- <u>NNU</u> -U- <u>VVU</u> - <u>NNU</u> -DS... → ...

and so forth — in all the endless multi-vector simultaneous-multipolarizational implementation of different-Qualitative synthetic Processes.

4.0281. As you can see, in FD, there are minor (for example, the V- or M-signs prevail instead of the L-combination) and very substantial (DS-VVU-U-LLU-VVU-DS-combination is changed for DS-NNU-U-PPU-NNU-DS- or DS-NNU-U-VVU-NNU-DS-combination) conversions in the diverse signs (SFUURMM-Forms) combinations qualitiveness which appears as the result of its multipolarization through all the multitude of different-Qualitative f-Configurations of mixtum NUU-VVU-Self-Consciousnesses Forms (exuberated in approximately equal dimension regimes). Owing to this, in specific regimes of joint realization of heterogeneous Form-Creators of one and the same dimension diapason, many objective reasons appear for origination of some conditions in diverse multipolarizational versions of a single Focus Dynamics. Those conditions are incompatible for cooperative exuberation of some Self-Consciousnesses Forms or CCIs.

4.0282. I would like to remind you once again that, in each of considered by us, subterransive amitsirational processes continuously performed inside the Perception system of every «person,» there is NOT a substitution of one CSR by another one, but there is a *definite degree* of change of qualitiveness of combinations of basic interconnections (the meaning content of the most

active SFUURMM-Forms structuring the Focus Dynamics of a «person»). Namely depth, power, and stability of these focal-ethereal conversions performed by a «person» at the everyday creative work, add, to his/her FD, properties and peculiarities which allow him/her *once* to start implementation of the amitsirational process in qualitatively new Living conditions. a «person» might be aware of this «instant» act (such an event which accumulates, in own f-Configuration, all summary Information manifested in many *duvuyllerrt* «shifts» of the FD) or not depending on how radically, powerfully, and intensively the processes of qualitative SFUURMM-Forms' conversion were implemented inside his/her Perception system.

4.0283. I would add, «exclusions» also might be present in this continuous Process of conscious replacement of some CSRs by the others (because any events, subjectively considered by you as «exclusions,» represent regular results of your active — though unconscious — implementation of specific cause-and-effect interconnections). This happens when the a «person's» FD falls under powerful and already unstoppable in any way, influence of specific focal-ethereal interconnections which structure f-Configurations of skloongms and sklaargms resonationally corresponding to all possible types of inter-spatial and transwarp tunnels.

4.0284. In such cases, a complete replacement of SFUURMM-Forms of the «current» CSR by SFUURMM-Forms of totally another CSR can happen «instantly» in the Perception system (then the «person» does not realize this anyhow); or, in cases of breaking concerted functioning among Form-Creators of the hippocampus, hypophysis, hypothalamus, and brain cortex caused often by hard emotional stress, radical replacement of the f-Configuration of one CSR by a more or less different CSR happens inside the «person's» FD while maintaining «current» SFUURMM-Forms, which structure both short-term and long-term memory (the individual ODS). Therefore, the fact of the CSR's replacement is realized by the «person» completely. Nevertheless, this fact has no impact in any way on keeping the changes and life events happened to him/her (this means a possibility of «reverse» refocusing, though a stress, identical by power, can influence the recovery process of the «person's» FD in the previous CSR).

4.0285. It may be argued that subjective replacement of Form-structures of one CSR by Form-structures of another CSR happens in the Perception system of a «person» after his/her subterraneous Focus Dynamics has achieved some (particular for every CSR) qualitative parameters (it is about achievement of boundaries of possible «force» interactions at a given «section» of the slloogrent focal Configuration). After that these qualitative differences in their structuring SFUURMM-Forms become quite obvious for this «person.» A conventional unit of measure of such «force potential» (DSUUDSMELL) is dlloods. In FDs of the Perception systems' Form-Creators, DSUUDSMELL makes prosperative conditions for Their implementation of Qualitative *shift* (radical eglleroliftive perturbation) among space-time structures of many collective subjective Realities. The «force potential» is valued from 147,559 to 361,224 dlloods for exhiberation conditions which correspond to our NUU-VVU-Form-Types' mixtum analogs at «dense-material» CSRs of the «human» type.

4.0286. To explain profoundly and consistently the informational Meaning hidden behind these numbers (gained through profound Meditation), is not possible for me *yet* because complete decoding of those parameters requires a detailed analysis of information from other Synthesis Schemes (what is impossible in principle right now). What is clear is that these values show some

conditional dimensional boundaries which allow Self-Consciousnesses Forms of any Proto-Forms to be interpreted specifically and be fixed by the brain's and DNA's Form-Creators on the «bioscreen» of our Perception systems.

4.0287. In other words, conscious functional activity of the Focus Dynamics of Form-Creators, Which structure Perception systems of our «current» mixtum Self-Consciousnesses Forms, is not possible beyond *qualitative* limits of the specified accessible spectrum of nutations: subjectively «lower» than 147,559 dlloods and «higher» than 361,224 dlloods. To perform such activity, They have to amitsirate to qualitatively more relevant parts of the slloogrent f-Configuration of the LLUU-VVU-Form. Other types of human CSRs are exhiberated within more depliative or more ampliative limits. Some CSRs types structured with mixtum NUU-VVU-Form-Types, as well as CSRs originated by Focus Dynamics of, for example, dimidiomittense or all possible varieties of simplisparentive analogs of NUU-VVU-Form-Types (with the three-invaderental Synthesis Schemes: ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence + a PCQ more covarllert than ALL-Unity) can be present among those other types of human CSRs.

4.0288. To bring a clarity to the terminology and certainty to your subjective Conceptions about *which things* structure *which things* (although SFUURMM-Forms about such «order» in simultaneously-multipolarizationally performed amitsirational process are typical only for F-Cs (Form-Creators) of our «current» Perception systems), we need to clarify that the Focus Dynamics of each Self-Consciousness Form of each *collective subjective Reality* is structured by a qualitatively corresponding set of SFUURMM-Forms which (to varying extent of Creative Activity manifestation) are peculiar to Form-structures of many different-Qualitative *groups of space-time Continuums*. That means that the spectrum of the CSR general Focus Dynamics manifestation is much «wider» and «larger» than an exhiberation spectrum of any STCs' group. In its turn, each STCs' group represents an integral of simultaneous implementation of narrow-specific SFUURMM-Forms of the countless multitude of different-Qualitative and different-type Focus Dynamics peculiar to an infinite diversity of subterransive subjective Realities of various Self-Consciousnesses Forms (individuals) which form collaboratively these STCs' groups by their life creativity.

4.0289. For example, general worldview of the human CSR currently realized by all of us is jointly formed by many subterransive Conceptions of this CSR's individuals. Every Conception contributes to the process of changing the whole FD of the given CSR. Over the Lifetime (any intermediate period of a personal rotational Cycle considered by other people as a time from «birth» to «Death»), every «person» amitsirates unconsciously in a certain order through many duvuyllerrt STCs' groups where his/her SFUURMM-Forms get gradually enriched with more covarllert interconnections and deeper Experience and provide, in a personal Perception system, a wide variety of opportunities for formation and manifestation of all the multitude of different-Qualitative subterransive subjective Realities in each of personal time periods realized by him/her. Those Realities change the «person's» FD continually under the influence of his/her internous (psychic) circumstances.

4.0290. Consequently, the FD of the current human CSR realized by us (just like for all others) is supported with SFUURMM-Forms of all multitude of our subterransive s-Realities, which are originated in advance by each of modern for us, people at Form-structures of Subovertones of the given Subplan-

Overtone of Fields-Consciousnesses. Moreover, you have to bear in mind, at multipolarization of Focus Dynamics of a Self-Consciousness Form, each moment-by-moment Synthesis «inside» a Stereo-Form is not performed immediately, but in different ways, at many Subovertones where the given FD has a chance to be reflected through at least some signs combinations inherent in it (through some part of Conceptions peculiar to people). In some — prosperative in relation to the given Synthesis Scheme — Subovertones' exuberation conditions, it will acquire more and more ampliative properties; in other (vitium) conditions, the qualitiveness of the given FD will decrease (against a background of ampliiveness growth of other Proto-Forms' FDs).

4.0291. There is also a *distortive (inertially distorted)* process of SFUURMM-Forms' grouping inside subterransive Focus Dynamics of Form-Creators of each «person's» Perception system owing to joint realizations of which an exuberation is provided, in Space-Time, of not only fragmented «personal» s-Realities, but also all STCs' groups and different-type CSRs. The implementation principles of this distortive process of SFUURMM-Forms' grouping were described quite thoroughly (as much as it was possible) in previous books of «Fundamentals.» In each particular case (TEC- or VEC-«unpackings» of the FD), the principles reflect the specificity of resonational interaction among focal Configurations of Form-Creators of definite Worlds' Form-systems and ethereal Configurations of Info-Creators of qualitatively corresponding OLLAKT- and DRUOTMM-systems (also FLUU-LUU-complexes) Whose functional Essence lies in informational providing literally each exuberation act of Focus Dynamics in conditions of the Tertiary Illusion.

4.0292. The general picture of what each of us perceives subjectively as «objects of the world around» emerges on the basis of covallert attraction and summary manifestation of all infinite multitude of such «acts» of simultaneous realization of Self-Consciousness's different-Qualitative focal effects inherent in all possible Form-Types (beginning from fermions, atoms, molecules to their constructions: microorganisms, humans, animals, plants, minerals, and so on). During the continuous process of subterransive «unpackings» peculiar to Own Focus Dynamics, Form-Creators of each Self-Consciousness Form kleks each «act» of Their manifestations exceptionally in Their Own way; thus, creating energy-informational background for appearance of creative work of Form-Creators of other, larger-scale Form-structures.

4.0293. For example, Form-Creators of fermion Self-Consciousnesses Forms form Their Own s-Realities with Their quantum features and narrow-specific capabilities from available only for them, informational sources (all possible analogs of FLUU-LUU-complexes). With their SFUURMM-Forms, fermions structure all types of *fermion* collective subjective Realities; thus, they provide the presence — exuberation regimes — of a necessary «material» basis for realization of F-Cs of atomic Self-Consciousnesses Forms' all diversity. In their turn, atoms self-realize through such constructive states as «gases,» «metals,» «nonmetals,» and they provide fundamental — atomic — basis for origination of diverse exuberation regimes of all diversity of F-Cs of Self-Consciousnesses Forms of molecular substances (simple and complex, organic and inorganic) and non-molecular compounds (diamond, graphite, sand, ionic substances, and others).

4.0294. On the basis of collaborative realizations of Form-Creators of all diversity of molecular as well as non-molecular compounds, all energy-informational prerequisites are emerged in Space-

Time (creative capabilities and peculiarities originated in NNAASSMM and having a particular VLOOOMOOT) which are required for organization and simultaneous appearance (at the same sllloogrent Form-structures, but through other, more inertial Perception systems!) of Form-Creators' FDs of much greater Self-Consciousnesses Forms beginning from DNA-structures of all creatures and microorganisms (both carbon-, silicon-based, and others) and finishing with all types of solid-state constructions (for example, crystal lattices of ionic substances, molecular and non-molecular substances with covalent or metallic bonds). By their FDs, the latter emerge absolutely all elements and features of any part of our surrounding reality (both observed and imperceptible to us).

4.0295. Each functional section or compound of the collective subjective Reality technically surrounding us (or CSR of any other type) represents a result of interstitial realization of the holistic and global (in the scale of the whole Cosmos) Process of the profound inter-Qualitative Synthesis (in parallel on many birvulyarity types!) which was modeled essentially and fundamentally and then carried out simultaneously by many different-type SLAA-SS-MII-Creators across all possible exhibition regimes of their Focus Dynamics. Such principle of *as if* level-by-level (though, it is *sllloogrent-«spheroidal»* in profectiveness) providing necessary conditions, by Form-Creators of some Self-Consciousnesses Forms, for subjective exhibition of Form-Creators' FDs of other (functionally «derivative» from Their transgression or convergence) Self-Consciousnesses Forms is peculiar not only to our type of «materiality,» but also for absolutely all Form-structures of Subovertones, Overtones, Subplan-Overtones, and Plan-Overtones of Fields-Consciousnesses.

4.0296. Without such Mechanism of mutual support, by Form-Creators, of narrow-specific conditions for implementation of Their joint creation, it would be impossible to generate the qualitatively multipolarized amplificational Flow of all diversity of those subjective interstitial results (all empirical Experience of simultaneous different-Qualitative realizations) owing to which the Form-Creators' Focus Dynamics of each of Collegial Cosmic Intelligences (from Universes to Macrocosmoses) receive, from Self-Consciousnesses Forms' FDs of a wide variety of exhibition conditions, all infinite spectrum of opportunities necessary for continuous-inertial inter-Qualitative improvement and creative universalization.

4.0297. Possibly, the main realizational-organizational role in performance of subjective process of resonational «detailing» and «localization» of Form-Creators' Focus Dynamics of all possible Self-Consciousnesses Forms at «as if the same sections» of sllloogrent f-Configuration of collective and subterransive subjective Realities (as well as the Macrocosmos's skrruullerrt system as a whole) belongs to that «part» of exhibition Mechanism whose functionality is provided through all diversity of *Duplex-Spheres* (LLU-U-U-DS).

## Chapter 9. Duplex-Spheres as the fundamental informational base for generation of collective subjective Realities

4.0298. In the previous volume, the complex-structured content of this notion — Duplex-Spheres — has been covered quite in detail; therefore, here we will only clarify and complement your Conceptions formed earlier about them with more deep understanding of the highly important role played by these ethereal structures in the implementation of the general exuberation process of any of collective subjective Realities. As noted before, Focus Dynamics of each type of CSR is *summarily* produced from the specific features (invaderental attributes combinations, subterransive kleks-Factor) of SFUURMM-Forms most active in it and typical for amitsirational processes *jointly* accomplished by Form-Creators of the countless number of Self-Consciousnesses Forms, which correspond to the given CSR type on own Synthesis Scheme.

4.0299. For example, different-Qualitative psycho-mental realizations of all people manifested in the same historical period form, by the joint creative work, a specific type of a human CSR which functioning is provided, in some way, also by Focus Dynamics of Form-Creators of all multitude of diffuzgent Proto-Forms structured by Their own SFUURMM-Forms. Through their realization, these FDs form — sort of «inside» of the human CSR considered by us — STCs sub-types peculiar to them and functionally complementing invaderental (for our Perception systems) human STC type.

4.0300. Although, you should understand that, in any exuberation diapason, diffuzgent STCs' groups of only those Form-Creators of Collective Cosmic Intelligences are invaderental for all Self-Consciousnesses Forms, which SFUURMM-Forms about «Themselves» and properties of the reality *surrounding Them* are the most universal, and therefore, which SFUURMM-Forms allow, in the Form-systems synthesized by them, simultaneously to realize the countless diversity of the rest Proto-Forms organized on the basis of functional features of Focus Dynamics of Form-Creators of invaderental STCs. Thus, all diversity of different-protoformal Self-Consciousnesses Forms, in the exuberation diapason accessible to our Perception, is based on the typical subjective Conceptions of doolls and flaks Form-Creators about opportunities of creative realizations peculiar to Them.

4.0301. On the basis of these SFUURMM-Forms, all countless multitude of quantum (wave) Self-Consciousnesses Forms (bosons) has been holochronely organized in the Space-Time regimes resonating with them. Focus Dynamics of these Forms specifically corrected by svilgsons of DLUGLLEMM- and SSMAYK-AYKK-Fields-Consciousnesses have organized (in accordance with their own Conceptions about «themselves») all variety of Self-Consciousnesses Forms of fermion Form-Creators (leptons, quarks, hadrons, nucleons) of the UPDUYKK-Field, which have formed in various Space-Time regimes, while synthesizing in the birvulyarity types peculiar to them, own groups of fermion space-time Conversums (for example, electron, muon, neutrino), «inside» of which Self-Consciousnesses Forms, invaderental in the specific exuberation conditions, have formed (on the basis of own subjective Conceptions about «themselves») diverse groups of space-time Continuums (for example, electron STCs, muon STCs, neutrino STCs, and so on).

4.0302. At the heterogeneous types of interactions between Form-Creators of various quark

families, the countless number of hadron — baryon (proton, neutron and other) and meson (boson) — STCs' groups has been formed from the quark STCs' groups, which specific realizational interactions have resonationally produced atomic the STCs' groups. It must be emphasized at once that SFUURMM-Forms used by Form-Creators of all-possible fermion and boson Self-Consciousnesses Forms for creative realizations peculiar to Them have, in the exuberation regimes considered by us (3–4-dimensional ones), the highest (in our understanding!) degree of covallertness on the separate signs combinations (geyliturgentness) based on the huge «volume» of simultaneously realizing doolls-flaks interconnections (therefore, in particular, inter-quark forces are so stable and do not decrease during forced linear distance growth between them).

**4.0303.** This also explains, by the way, the high space-time stability of both photon-lepton Self-Consciousnesses Forms and all variety of fermion STCs' groups generated by Focus Dynamics of the infinite multitude of different-type photons (or quarks, or leptons) primarily implementing SFUURMM-Forms peculiar to them on the background of information basis of the atomic STCs, which is very important, but less priority for formation of typical *photon* types of s-Realities and CSRs. And one should mention that the degree of diversity and heterogeneousness peculiar to CCIs of photon Self-Consciousnesses Forms zillions times greater than the same index for people, animals, vegetables, and minerals. Hence, countless number of human and other different-protoformal types of STCs and CSRs can structure only one type of photon CSR.

**4.0304.** The same features provide the greatest Energy-Potential, by which each of the photon-lepton interconnections is structured: to upset somehow geyliturgent focal-ethereal interconnections established between such Form-Creators in the exuberation regime common to Them, forced «intrusion» (at the microscopic period of time!), to the f-Configuration formed by Them, is required of unbelievably huge «number» (concentrated «volume») of destructive interconnections cruvursorrt with respect to the given Synthesis Scheme (for example, removal of electron from atom requires energy about 10eV; fission of atom nucleus requires several MeV; rejection of one quark from proton requires more than 1000MeV).

**4.0305.** The greater «number» (concentrated «volume») of focal-ethereal interconnections reflecting, in the same exuberation regimes, features of different-type birvulyarities is used to synthesize the state of covallertness (geyliturgentness) of Focus Dynamics of Form-Creators, the more stable (steady) and universal character is of Creative Activity of Self-Consciousnesses Forms, which interact through this Activity in the corresponding focal Configurations. Therefore, fotonno-fermionnye f-Configurations jointly synthesized by Form-Creators of DLUGLLEMM-, UPDUYKK-, and SSMAYK-AYKK-Fields from many birvulyarity types represent the most stable (fundamental) basis for accomplishing simultaneous exuberation (in the Space-Time regime considered by us) of Self-Consciousnesses Forms of all other different-protoformal STCs' groups (atomic, molecular), which FDs are structured by not so high covallert focal-ethereal interconnections (and by the less number of the signs uniting them).

**4.0306.** With the consecutive amitsiration of FD of Form-Creators from f-Configurations of atomic STCs' groups to f-Configurations of molecular STCs' groups (of the various complexity level) structured by them, the imperseptness state on many signs forming SFUURMM-Forms of resonationally

interacting Form-Creators constantly increases, which affects the opportunity decrease of the stable exuberation of Self-Consciousnesses Forms of one CCI type in the greater spectrum of STCs' groups formed by them. One should note that in the given Space-Time organization regime (3–4 dimension), the highest imperceptness is shown by SFUURMM-Forms (Conceptions about «own» properties and features of the surrounding World), with respect to each other, of different-type CCIs realizing via complex-constructed molecular interactions, which are based on the interconnections of atomic Form-Creators of Self-Consciousnesses Forms of carbon with F-Cs of the other atomic SCFs — such as water-carbon, protein-carbon ones (mixtum SCFs of the most microorganisms, animals, vegetables).

4.0307. Compared to them — *at the other parameters combinations of temperature and pressure, than those ones peculiar to the Earth, without taking into account the SCFs existence on the basis of the interconnections of so called «dark matter»* — the higher covallertness (hence, the higher stability) is shown by SFUURMM-Forms structuring FDs of so called «silicon» Self-Consciousnesses Forms (silicon-acid, silicon-biological, silicon-carbon, and other silicon-organic SCFs), and also sulphur-acid-inorganic and sulphur-acid-organic, nitrogen-phosphorous and nitrogen-boric, ammoniac-organic and ammoniac-inorganic ones. Though, SFUURMM-Forms of so called «hydrogen» Self-Consciousnesses Forms are the most steady ones, on the exuberation signs peculiar to them in the corresponding regimes of 3–4dimensional diapason. These Forms include fluorine-hydrogen, cyanic-hydrogen options, and others.

4.0308. Thus, all-possible kinds and types of the extra-steady realizational interactions between Form-Creators of hadron and lepton Self-Consciousnesses Forms represent the fundamental energy-informational basis for generation of not only their own subjective STCs' groups, but also all «materiality» surrounding us and formed by Focus Dynamics of Form-Creators of atomic and molecular Self-Consciousnesses Forms (that is, substances all diversity). All infinite multitude of «material» Self-Consciousnesses Forms, while subjectively interacting between each other on the basis of invaderental realization of carbon, silicon, hydrogen, and many other types of atomic-trend interactions, produce, by means of own Conceptions about «themselves» and «own» properties limited by their Perception systems subterransive opportunities, all infinite diversity of the subjective STCs' groups of different-protoformal CCIs (merged to Conversums) in the realization spectrum of hadron-lepton STCs' groups, from which all different-Qualitative STCs' groups of Planets, Stars, Galaxies, and Universes are formed.

4.0309. All this diversity of different-scale Self-Consciousnesses Forms exists due to the presence, in Form-systems, of an internous function informationally uniting all of them, which is provided by Duplex-Spheres. In conditions of simultaneous exuberation of the general FD of Form-Creators of the Tertiary Illusion, these noo-time ethereal structures reflect (by SFUURMM-Forms peculiar to them) all information Potential, which is used, by means of UPDR, holochronely to supply Ethereal Plan-Overtone (UUOLL-SLAIILLI-I). In the subjective Perception systems of each of Proto-Forms, the same particles of this Potential unpack and realize quite specifically. As the result, in the same Space-Time regimes, the countless number of different-Qualitative realizational options of SFUURMM-Forms with identical content, which have been grouped between each other (on the diffuzgent signs) to specific *noo-time* Continuums and Conversums structuring, by themselves, various types of OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes. While noo-time Continuums (and n-Conversums),

as you know already, represent ethereal basis for exhibition of all *space-time* Continuums (and Conversums) in Form-systems of the Worlds and CSRs.

4.0310. Any human persons, which simultaneously populate all the Earth in various Time Flows, constantly realize as those who live in conditions of own subjective Reality subterraneously formed by Form-Creators of their Perception system via peculiar only to them Conceptions about «themselves» and features of the surrounding reality specifically perceived by them (via personal assessment of all-possible opinions, interests, relations, events, facts, phenomena, processes, and the like). The sources of Creative Activation of each of these Conceptions in Focus Dynamics (of not only people, but also any other Self-Consciousness Form) are ethereal Configurations of Info-Creators (SLUI-SLUU) sllougrently structuring the infinite multitude of different-type OLLAKT-DRUOTMM-systems (ODSs) and FLUU-LUU-complexes (FLCs) by Focuses of Dual Reflection (FDR) and Universal Multipolarizational Impulses (UMPI) of own UU-copies (UU-VVU-copies for people), SFUURMM-Forms, and UU-/UU-VVU-conglomerates.

4.0311. Earlier we repeatedly referred to various properties of these information *subjective* constitutions «structuring,» with ethereal interconnections combinations peculiar to them, Focus Dynamics of Form-Creators of absolutely all Self-Consciousnesses Forms of the Tertiary Illusion (information «structuring» of FDs of the more ampliative exhibition Levels — from 13-dimensional to zillion-dimensional ones — is provided by more amplificational analogs of these constitutions). Probably, it is time now to meet more closely and in detail these information constitutions, since this is exactly availability of these ethereal Constructions, which provides functioning of any of Form-systems of the Tertiary Illusion.

4.0312. And ethereal content of ODS or FLC of any type is simultaneously and *differently* used in realizational creative work of Self-Consciousnesses Forms of the countless number of different-type CSRs. All SFUURMM-Forms and UU-VVU-conglomerates aggregated by them are conditionally (from the standpoint of exterior Observer) sort of «distributed» on the types of the information content peculiar to them (via particular FDs of all multitude of Form-Creators of Self-Consciousnesses Forms using them) in the infinite diversity of ethereal sllougrent Configurations of Duplex-Spheres — narrow-specific Creativity Ranges structuring Self-Consciousness information space, which are used by Form-Creators of various Self-Consciousnesses Forms for accomplishing own continuous creative realizations in all types of subterraneous subjective Realities, STC groups and collective subjective Realities.

4.0313. OLLAKT-DRUOTMM-systems represent very complicated information «structures» functionally providing any Focus Dynamics, regardless of the fact, who exhiberates this FD and in which of Time Flows this happens. Beyond activity of Focuses of Close Attention of Form-Creators (although, this is simply impossible in sllougrent State of Energy-Plasma), OD-systems — with all their information content — sort of do not exist at all. Their functioning Principle could be compared with «the gaming computer action» («the gameplay»), which all plot (with graphics, sound, own story and duration) *is always available* for any potential player (Self-Consciousness Form) by way of a digital file. But this plot cannot start without his/her particular desire for this realization (subterraneous Interest) — corresponding graphic interface, with the help of which the user interacts

with various programs and devices, and without computer or game box (the subjective Perception system) activating the algorithm (realization sequence) of all compilations (SFUURMM-Forms) in the given game.

4.0314. In other words, in the diapason up to 4.0 dimension, ODS is the universal (common for all Proto-Forms) information constituent of all Form-systems of the Worlds and STCs types. As soon as someone's FD is activated in some Space-Time «point» inter-skunkktional interconnections of SSS-fragments are resonationally initiated in Information primogenitive State at once, in parallel with it. These interconnections signs are strictly in accordance with subterransive parameters of this Focus Dynamics, and the particular sequence of qualitative kleksings (information modifications) produced by Form-Creators of FD is reflected in some way at «the bioscreen» of this Self-Consciousness Form.

4.0315. Since every STC group is structured by the infinite multitude of different-Qualitative STCs simultaneously generated by various Proto-Forms, some «holistic picture» (subjective Conception) partially common, on own plot, for many FDs and owned by some of the ODSs countless Creativity Ranges is formed, in every FD, from the most covallert combinations of information content of all these «points.» Thus, the specific «area» (picture) of OLLAKT-DRUOTMM-system is psychomentially generated («reproduced» via the Perception system) in Self-Consciousness information space of every person (or any other Proto-Form). Meaning, in the human Self-Consciousness, ODS functioning «mechanism» is implemented, in every particular case, via realization of many narrow-specific ethereal combinations (UU-VVU-copies, SFUURMM-Forms, UU-VVU-conglomerates) in Focus Dynamics of the countless number of persons.

4.0316. Any subjective Conception is not an exceptional «property» of some person, but it is structured by different-Qualitative particles of slloogrent Information, which is typical, to various degree, for many «personalized» Interpretations and Form-Types structuring, with own FDs, not only this STCs group, but also the other Time Flows concurrently with this personality. Only due to availability of all infinite diversity of these particles simultaneously interacting (via various FDs) between each other, such subjective phenomena as OLLAKT-system (electro-magnetic dispolarities) and DRUOTMM-system (gravity discretenesses) «exist» with all variety of their kinds and types. In the joint functioning principle peculiar to them, both of these «systems» have absolute inter-dependence and hence they form together information basis of exhiberation Mechanism of Self-Consciousnesses Forms of all Form-systems of the Worlds in conditional limits up to the 4-dimensional diapason of lluuuvvumic birvulyarity type (in different-birvulyart dimension types, their parameters are expressed with different figures — both with higher and lesser ones).

4.0317. Their functional role is shown not only in formation of the specific finitimus or «buffer» spheres of different-sense interaction between more or less compatible different-prototypical Conceptions and particles comprising them (with the aim of accomplishing overall inter-Qualitative miskeration in FDs of various Self-Consciousnesses Forms and Synthesis of the more covallert signs combinations), but also in creation of circumstances for formation, in FD of Form-Creators, of prosperative conditions of simultaneous manifestation of sort of «the same» Conceptions, which are though implemented differently in various exhiberation regimes (in various STCs, Synthesis Schemes, Time Flows, and so on).

4.0318. Besides, every ODS type serves as the specific «Reservoir» of already synthesized empiric Experience acquired by every representative of different-Protoformal Collective Consciousnesses (there are own ODSs for the people; own ODSs for various types of animals and vegetables). This Experience (as subterraneous subjective Conceptions of every Self-Consciousness Form about «itself» and the reality surrounding it) is constantly supplemented, broadened, and deepened via the specific part of photoreductive Ether — functional «internal mechanism of ethereal combinations retranslation» peculiar to every ODS. Being *svilgs-spherationally* converted in FDs of invaderental Form-Creators of the given Synthesis Scheme on all-possible different-Protoformal development Directions, this empiric Experience is «reprojected» from f-Configurations of depliative Self-Consciousnesses Forms to increasingly ampliative Forms, while permanently universalizing due to replenishment with more covallert combinations of vecsative signs. Along with modifying FD qualitative state, Creativity Range is being changed also, which is actively focused in the ODS by the given personality. And this, in turn, means that the person has started subterraneously to form a certain part of the reality surrounding him/her in a partially different way, with the help of qualitatively other subjective Conceptions realization via own FD.

4.0319. Due to availability, in Energy-Plasma, of all-possible «electro-magnetic dispolarities» (manifestation mechanism of OLLAKT-systems) and all multitude of finitimus Conceptions multipolarizationally generated by them, tensors produced both between representatives of one type of Collective Consciousness (for example, between different human persons) and between different Proto-Forms of one STCs group (for example, between people and animals, vegetables and minerals) are actively balanced and annihilated in Self-Consciousness information space (in Focus Dynamics of heterogeneous invaderental Form-Creators).

4.0320. The functioning Principle of each of Creativity Ranges organized in ODS by Focus Dynamics of representatives of animals, vegetables, and minerals CCIs various types represents the particular degree of synthesis state of the separate particles of Conceptions of some Synthesis Scheme with SFUURMM-Forms peculiar to the other combinations of Dominants. Bear in mind, even though the signs of some of interacting Dominants are common for both of the Schemes, they are structured between each other on the different principles and produce different SFUURMM-Forms! This feature crucially affects the properties and qualitative state of realizational directivity of not only Creativity Ranges, but also on specific features of the STCs, which are structured by the joint «projections» of these SFUURMM-Forms.

4.0321. For example, in some Creativity Range of the ODS *human* part produced by Focus Dynamics of Form-Creators of several two-invaderental Synthesis Schemes:

1. ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence — human one,
2. ALL-Love–ALL-Wisdom + ALL-Aspiration — protoformal one,
3. ALL-Love–ALL-Wisdom + ALL-Steadiness–ALL-Stability — protoformal one,
4. ALL-Love–ALL-Wisdom + ALL-Voidness–ALL-Vacuumness — protoformal one,
5. ALL-Love–ALL-Wisdom + ALL-Integrity — protoformal one,

the OO-UU-signs of ALL-Love–ALL-Wisdom Dominant are common for all SFUURMM-Forms produced in the given Creativity Range. Therefore, all options of *common* ethereal interconnections between Conceptions of these Proto-Forms will be built exactly on their basis (due to their covallertness). Their most covallert combinations will later actively «project» (via FDs of various people living in various STCs and CSRs) to the processes of subterransive amitsirations of various persons, while focusing them in Form-systems of the Worlds and development scenarios completely different from each other.

4.0322. In the general spectrum of simultaneous exhibition of Focus Dynamics of each of «personalized» Interpretations of Stereo-Form in various STCs, CSRs, and Time Flows, the Qualitative criterion for their multipolarizational distribution (the particular conditions of «personal localization» of every person in Space-Time) is subterransive parameters of dissonational distances produced in every Focus Dynamics due to the more or less covallertness of SFUURMM-Forms of activated particles of ALL-Love–ALL-Wisdom Dominant (in specific combinations of every protoformal Scheme) as regards the signs of lluuvvumic development Direction. Meaning, the greater number of signs combinations of HSI, HIA, IR, and HF is in your Conceptions about «yourselves» and the World surrounding you, the more prosperative Existence conditions of your awareness are. Accordingly, the more intensive manifestation of all-possible protoformal combinations activity is in your FD (especially, in the way of egocentrism, egoism, aggression, and other negative reactions), the more destructive (imperfective) and less favorable (for your intensive development) the reality surrounding you (STCs, CSRs) is.

4.0323. In the other Creativity Range of the ODS *human* part, the formation process of the *human* SFUURMM-Forms can be implemented according to their compatibility with the specific subjective Conceptions of various Proto-Forms, which have OO-UU-attributes of ALL-Will-of-ALL-Intelligence PCQ as the Dominant common to them. For example:

1. ALL-Will-of-ALL-Intelligence + ALL-Unity;
2. ALL-Will-of-ALL-Intelligence + ALL-Essentiality–ALL-Permeability;
3. ALL-Will-of-ALL-Intelligence + ALL-Primordiality–ALL-Initiality;
4. ALL-Will-of-ALL-Intelligence + ALL-Mobility–ALL-Presence;
5. ALL-Will-of-ALL-Intelligence + ALL-Knowledge–ALL-Informedness;
6. ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Fullness...

SFUURMM-Forms jointly synthesized by lluuvvumic and different-protoformal Form-Creators in the given *human* Creativity Range are also the main Causes of generation, via focal activity of Form-Creators of the *human Collective Consciousnesses various types*, of completely different (from the previous ones, on own realizational opportunities) options of human and half-human STCs and KRSs groups (the examples of the latter can be both all-possible primitive-communal formations and CSRs formed by FDs of NUU-VVU-Form-Types simplisparentive analogs).

4.0324. All this beyond time joint co-existence of SFUURMM-Forms of different-Protoformal Creativity Ranges is possible owing to availability, in Universal Plasmic-Differentiated Radiation (UPDR), of all-possible ethereal «gravity discretenesses» typical for the other ODS part — DRUOTMM-system. Exactly their influence makes possible «attraction» («gravitation») towards each other (on some joint signs) of the separate particles of different-Protoformal SFUURMM-Forms, and all their different-Qualitative multipolarization throughout various Creativity Ranges. Due to realization of all their information content in various Space-Time conditions, there are highly diverse (and even mutually exclusive) options of simultaneous exuberation (via FD) of sort of «the same» Conceptions about something in slloogrent f-Configuration of the skrruullerrt system (for example, «beautiful sky,» «dark night,» «pleasant day,» and the like), which are interpreted completely differently in various Creativity Ranges of ODS.

4.0325. Although, not only typical Conceptions of people and various Proto-Forms are «multipolarized» throughout various Creativity Ranges in ODS. The highly extensive differentiation and diversification of sort of «the same» Conceptions, from which various Creativity Ranges are formed, are typical also for «*intraspecific*» *Creative Activity of every type of* Collective Cosmic Intelligence including also lluuuvvumic one. But qualitative differences between them are not so obvious and striking compared to SFUURMM-Forms of different-Protoformal Creativity Ranges, because they are duvuylerrtly reflected in Focuses of Dual Reflection of Info-Creators of ODS via the infinite diversity of transitional (diffuzgent) Form-images kleksed predominantly on the UU-Factor peculiar to the given CCI.

4.0326. For example, Form-images of various Creativity Ranges of the Humankind Collective Intelligence (reflected in FDs of 2.5–4.0-dimensional diapason) differ from each other in prevailing, in their e-Configurations, of either *mental* (ALL-Will-of-ALL-Intelligence PCQ signs prevalence) or *vital* (ALL-Love–ALL-Wisdom PCQ signs prevalence) Conceptions mostly initiated by one of the two Dominants. In addition, of course, the huge factor for appearance of all-possible functional differences within human ODS Creativity Ranges is the index of their qualitative state, that is, «saturation,» «concentration» of the more covarllert interconnections kleksed on the VVU-Factor.

4.0327. The main role of ODS OLLAKT-constituent is levelling of different-Qualitative and differently polarized mental-sensuous realization of Form-Creators of Self-Consciousnesses Forms different types belonging to different CCIs (due to corresponding correction of electromagnetic constituents typical for their SFUURMM-Forms) with the aim of creating the infinite multitude of interstitial, intermediate options and Directions of the joint creative work possible for Them (intercommunication, mutual understanding, joint study, empathy, complicity, and so on). Correspondingly recoding heterogeneous Conceptions structuring different-Protoformal Creativity Ranges to Form-images accessible for the Perception systems of various Self-Consciousnesses Forms and adapting them to all-possible types of thinking and feeling, Ethereal Mechanism of OLLAKT-system organization provides all-possible conditions for levelling heterogeneous attributes of sort of «the same» SFUURMM-Forms between each other on their specific content, thereby allowing various Self-Consciousnesses Forms (and CCIs) structuring common STCs' groups to interact with each other associatively and creatively, if not logically (with the help of availability of the great number of finitimus Conceptions).

4.0328. The main role of ODS DRUOTMM-constituents is to provide Focus Dynamics of all Form-Creators of every Form-systems of the Worlds with general decoding principle (mechanism) of realization of heterogeneous SFUURMM-Forms, due to which representatives of completely different CSRs and STCs subjectively separated by Time Flows (centuries and millennia) have ability to understand each other. This resumptive principle plays the huge role during accomplishing FD conscious or spontaneous transformations (via sklaargms and skloongms) from some CSRs to the others, and also from f-Configurations of some Self-Consciousnesses Forms to f-Configurations of the other Self-Consciousnesses Forms. Within the dynamics of Focuses of Dual Reflection structuring ODSs, this mechanism allows Form-images formed in various Time Flows easily to interact with each other via the same Creativity Range, in which the Interests peculiar to them are shown.

4.0329. For example, due to availability of «electro-magnetic dipolarities» and «gravity discretenesses,» many subjective Form-images and the Conceptions related with them, which were generated by people of «antediluvian» civilizations, continue to realize not less actively also through FDs of representatives of both all subsequent humankinds and «the current» one. Besides, in every case of own simultaneous realization in people's FDs of various Time Flows, they do not lose own actuality, while acquiring new nuances, and remain fresh and accessible for new experience. The higher Levels of Self-Consciousness information space for SFUURMM-Form generation, the more universal its realizational opportunities are for various STCs' groups.

4.0330. One cannot unambiguously state, conditions of Focus Dynamics of which Time Flows influence more on structuration of each of the Conceptions («the future» ones influence on «the previous» ones, or vice versa), since this process is reciprocal. Any psycho-mental situation stimulates FD amitsiration to exhibition of its Self-Consciousness Form in exactly those objective circumstances («a section» of the skrruullerrt system), where the function put in it (the subjective Sense) has more prosperative chances of own realization. Thus, objective parameters of informational qualitative state of Self-Consciousness Form are always defined by the subjective function of its FD.

4.0331. Slloogrent FD of Form-Creators of each of Form-systems of the Worlds of this 3–4-dimensional diapason is structured with the set of subjective Conceptions peculiar only to it. With own e-Configurations, these Conceptions produce, in ODS, «own» versions of Creativity Ranges, which general content, due to many noo-time OLLAKT- and DRUOTMM-Factors structuring the FD, can freely (under the FD influence) interact and recombine between each other by means of not only various particles, but also entire SFUURMM-Forms: they can deform visually and psycho-mentally in ODS information «space,» flow together in any way, unfold to something different and fold to «nothing,» stretch and thicken endlessly. Examples of that can be all our dreams, fantasies, and ambitions, with which we easily manipulate not only in our own Self-Consciousness, but also in Self-Consciousness of the other people (for example, during hypnosis, telepathy, self-suggestion). Besides, in such psycho-mental processes, the Conceptions can be involved, which structure STCs' groups and Time Flows quite different on qualitative state.

4.0332. As distinct from OLLAKT-DRUOTMM-systems, FLUU-LUU-complexes (FLCs) represent functional ethereal structures to provide absolutely all required Information of subterraneous organization processes of Focus Dynamics of Form-Creators of *the more complicated and much more*

*universal* Self-Consciousnesses Forms of the Tertiary Illusion. The main feature of SLUI-SLUU-Creators of FLUU-LUU-complexes (compared to the realizational abilities of ODS Info-Creators) is that the countless number of their more qualitative and universal FLOMM-systems (noo-time Conversums) structured by *flayyds* (ampliative analogs of Form-systems of the Worlds) and subterransive *kleyye* (ampliative analogs of personalistic Worlds) allow to interact (via VEC-dynamics) with not only doolls and nutational (wave) Self-Consciousnesses Forms, but also with the other vibrational (flaks, vuolds, and so on) Self-Consciousnesses Forms of all-possible CCI diffuzgent types, which FDs structure collective Subconsciousness, Supraconsciousness, Superconsciousness, and so on.

4.0333. The most ampliative SFUURMM-Forms from among all diversity of ODS Creativity Ranges structuring the wave exhiberation diapason are «projected» (in the birvulyarity types peculiar to them) to much more complicated and universal e-Configurations of SFUURMM-Forms of FLUU-LUU-complexes, which flawless functionality is supplied with the countless number of such information structures, as, for example, twelve major luminosal attributes modules — *svoss-ssoo*, each of which represents typical features of one specific OO-UU-Entity. Such module is provided with the following functional structures:

- translucense ethereal modules (svilgs-spherates «inside itself» simultaneously on many all-possible Vectors of multipolarizational realization of one specific OO-UU) — *nnauss-gvuu*;
- asymmetric translucense ethereal modules (svilgs-spherates in every Direction of possible development of all OO-UU combinations) — *avv-luutt-ttaa*;
- luminosal ethereal conglomerates — *tte-fluu* (*tte-akke-flaa* — narrow-diapason ones, *tte-ommo-floo* — mid-diapason ones, *tte-fluu-flii* — broad-diapason ones, *tte-ll-kee* — infinitely convergent ones, *tte-ss-kee* — infinitely expansible ones, *tte-ff-ss* — multiply reflecting in every «point» of interaction ones);
- wide-spectral poliluminosal conglomerates (simultaneously svilgs-spherates on all Vectors of inter-Qualitative interactions) — *ii-ff*;
- monoluminosal conglomerates (similar to the previous ones by functions) — *fluu-ss*;
- narrow-spectral poliluminosal conglomerates (svilgs-spherates in one specific interaction Vector of one OO-UU) — *moon-mm*;
- monoluminosal conglomerates (similar to the previous ones by functions) — *fluu-gmm*;
- biconical different-luminosal conglomerates (svilgs-spherates on different qualitative Vectors) — *buutt-vv*;
- biconical luminosal conglomerates (svilgs-spherates in one Vector of one OO-UU) — *buumm-ll*;
- more simple multiconical poliluminosal formations («projected» to the one «point,» svilgs-spherates on different Vectors of one OO-UU) — *aall-vv*;
- more complicated multiconical poliluminosal formations — *tuull-dm*;
- luminosal Flows (on each of Vectors of every OO-UU) — *egssmi-lli*;

- multispheroidal interpenetrating luminosal Flows — *llaa-llaa*;
- continuously absorbing luminosal structures (on the functioning principle, they resemble black holes, they serve as multivector retransmitters of particles between duvuyllerrt Levels) — *kyu-u, kyyyu-yyu, kkhayy-kkho*;
- partially absorbing and partially irradiating multivector luminosal structures — *ddaaft-ttuu*;
- irradiating multivector luminosal structures (on the functioning principle, they resemble «quasars,» but each of them irradiates own attributes spectrum of one specific OO-UU):  
a) directed from low-vibrational to high-vibrational ones — *kyo-o*, b) directed from high-vibrational to low-vibrational ones — *yooyk-kkho*;
- homogeneous luminosal irradiations of one diapason — *mdda-mmaat*;
- different-Qualitative luminosal irradiations of many diapasons — *vaalk-ddaat*...

4.0334. I listed the tiniest part of «the simplest» ethereal structures, which provide functionality of lluuvvumic «sections» of FLUU-LUU-complexes of flaks and vuolds exhiberation diapasons of LLUU-VVU-Form-Types all diversity (translucense, and also luminosal ones). Everything else is beyond any description, because represents indivisible combination of the infinite ethereal interconnections simultaneously-resonationally penetrating FDs of Form-Creators of the Tertiary Illusion all diapasons right up to *lyuullffiiyic* diapason (11–12 dimension). FLC is the realization Mechanism of information basis of absolutely other functioning types of our «future» translucense, superparentive, and dimidioclarus (4.0–5.0 dimension), luminosal and supraparentive (5.0–6.0 dimension), transliirst and ultraparentive (6.0–7.0 dimension), transtaarms and ekstraparentive (7.0–8.0 dimension), transtlluuvst and divinparentive (8.0–9.0 dimension) Self-Consciousnesses Forms of lluuvvumic birvulyarity type.

4.0335. With concatenational perfection and universalization of our psycho-mental creative work in lluuvvumic development Direction, all information basis, which is specifically laid into e-Configurations of ODS UU-VVU-copies and SFUURMM-Forms and which serves now as the amplificational foundation for multipolarized realizations of FDs of Form-Creators of all our mixtum Self-Consciousnesses Forms, will start increasingly to include complex-compound attributes combinations of SFUURMM-Forms peculiar to e-Configurations of our FLUU-VVU-doubles structuring realizational flayyds of flaks FLUU-LUU-complexes.

4.0336. Creative Activity of all multitude of Focuses of Dual Reflection and UMPI of SLUI-SLUU-Creators of all infinite diversity of ODSs and FLCs, which SFUURMM-Forms simultaneously-resonationally realize via Focus Dynamics of Form-Creators of absolutely all Time Flows, constitute the main information basis of all noo-time Continuums and Conversums of the Tertiary Illusion. Every noo-time Continuum of ODS represents information basis for formation of the general FD of all those Self-Consciousnesses Forms of *one* CCI type (for example, only *people*), which are simultaneously exhiberated in all multitude of STCs' groups of *one* dimension diapason. This is very specific state of Information kleksed on one UU-Factor, which allows any Collective Cosmic Intelligence subjectively

(regardless of the Time Flow) to realize It-Self in all situations and circumstances structured by FD of any of Self-Consciousnesses Forms simultaneously generated by It into all STCs and CSRs groups.

4.0337. Focus Dynamics of Form-Creators of CCI of each of birvulyarity types are based on SFUURMM-Forms structuring n-Continuums peculiar only to this CCI. The n-Continuums allow all of its Self-Consciousnesses Forms to extend — *in the special (specifically modified) states of Focus Dynamics* — beyond the limits of subjective perception of Time and Space, and also beyond the Conceptions peculiar to them. This means that in contrast to STC, suppose, *human* ODS n-Continuum is structured by absolutely all SFUURMM-Forms, which have ever been kleksed on VVU-Factor in all development scenarios and STCs' groups (Time Flows) of the given dimension diapason. «Inside» of itself, it is differentiated on many n-Continuums groups representing the specific constructions of SFUURMM-Forms peculiar to every of the countless number of human and human-like civilizations (including also transparentive types). In extremely conditional comparison, there is the same difference between STC and NTC structures as between f-Configurations and e-Configurations, between FCA of Form-Creators of Self-Consciousnesses Forms and FDR of Info-Creators of SFUURMM-Forms.

4.0338. Each of *noo-time Conversums* informationally supplies Focus Dynamics of Form-Creators of some specific CCI type. Being integrated with the whole totality of the other n-Conversums, it participates in ethereal provision of Creative Activity of Proto-Forms all multitude structuring all energy-informational (space-time) Conversums of one conditional dimension diapason (all amount of energy-informational interconnections accomplished between all Self-Consciousnesses Forms of absolutely all STCs' groups). For example, all diversity of ODS Creativity Ranges and universal *human type* FLOMM-systems of FLUU-LUU-complexes structuring FD of Form-Creators of human Collective Consciousnesses in this dimension diapason is supplied with all-possible information combinations of *one* — *lluuvvumic* — *noo-time* Conversum. One n-Conversum is structured by sfuurmmformal combinations typical for the infinite multitude of n-Continuums.

4.0339. ODSs and FLCs being the main intercomplementing information components of each of s-Realities and STCs' groups are never manifested in their FDs separately, while qualitatively and informationally structuring the countless number of Duplex-Spheres with own Fields-Consciousnesses and being the specific «boundary zones,» which informationally join FD of Form-Creators of the countless number of different-Qualitative Form-systems of the Worlds between each other. By itself, beyond resonational linkage to Focus Dynamics of Form-Creators of any Form-systems of the Worlds corresponding to it, simply no one Duplex-Sphere can show the content peculiar to it in the exhibition conditions of the Tertiary Illusion, because Focuses of Form-Creators (FCA — Focus of Close Attention, FIMI — Focus Integral Motivational Impulse and their ampliative analogs) are the only carriers of the energy Potential required for realization of Info-Creators information Potential (FDR — Focus of Dual Reflection, UMPI — Universal Multipolarizational Impulse and other their more ampliative analogs). In turn, no one Self-Consciousness Form or Form-system of the Worlds can manifest in FD of the Perception systems peculiar to them without information management peculiar to Duplex-Spheres.

4.0340. In this regard, we are simply unable unambiguously to relate Duplex-Spheres only to ODs or FLCs, while forcedly «disidentifying» ethereal Configurations of their Info-Creators with

focal Configurations of Form-Creators of Subovertone, Overtone, Subplan-Overtone, and Plan-Overtone inseparably connected with them. The most perceptible (for us!) difference of their properties from the features of Form-systems of the Worlds is the presence for the last and the absence for the first of Time specific Factor. Being the basis for generation, in any FD, of subterraneous parameters of dissonant distances (the degree of tensoriness between simultaneously realized interconnections), it strongly influences on «demonstrational» properties of Space types produced by these distances: the geometric one (the dimension diapasons of Form-systems) and the informational one (the Levels of Self-Consciousness Creative Activity).

4.0341. What we find out now is that any Duplex-Sphere — in own subterraneous manifestation via the subjective Focus Dynamics of any Self-Consciousness Form — represents the particular spectrum of creative resonant interaction of the slloogrent filling of ethereal Configurations (Info-Creators) of the FD with the realizational abilities of f-Configurations (Form-Creators) qualitatively corresponding to them. The higher the VLOOMOOT and NNAASSMM parameters of the Self-Consciousness Form, which Focus Dynamics initiates and «projects» ethereal Content of one or another Duplex-Sphere to Macrocosmos, the more broad, deep, and versatile this spectrum is, and vice versa: the less developed subjective Perception system is able to narrow very strongly this spectrum of creative interaction and restricts its potential abilities by the high index of imperceptiveness and instability of focal-ethereal interconnections peculiar to this Perception system.

4.0342. How is this implemented in practice of our continuous life creative work? For example, in any times — both in unachievably far simultaneous options of «the past» and in all-possible perspectives of the infinite «future» — in this or that way, in these or those interpretations not only for people but also for each of the protoformal CCIs, there are own analogs of different-Qualitative surdousive Conceptions about «Good» and «Evil,» about things, which are «good» and which are «bad» for the given Self-Consciousness Form, which are desirable (pleasant, useful), and which are not (which are disturbing, depressing, or harmful for its development). To determine the level of good and usefulness of our actions or intensions, «the current» we use some subjective criteria, and «the past» we or «the future» we use the other criteria, while conceiving what is good or bad for us (or the others) differently, or in other way than now. The same is applicable to the narrow-specific Conceptions about the good and the benefit typical for any kind of animals, microorganisms, vegetables, minerals, and also for FD of any of Planets, Stars, Galaxies, Universes.

4.0343. All of you know: things perceived as «good» and «useful» by some Self-Consciousness Forms can have reciprocal, destructive implications for the other Forms. Eating honey we nullify the survival efforts of the huge amount of bees; consuming natural resources we deprive the other kinds of living creatures of habitation and condemn them to hunger; satisfying our nutritional needs we destroy hundreds of the other kinds of animals and vegetables, and so on. Absolutely all options of such multilateral relations between all-possible Self-Consciousness Forms are *potentially* recorded in the ethereal structures of the ODSs and FLCs countless diversity, and they are simultaneously reflected in all variety of subjective Realities via resonant properties of Focus Dynamics of Form-Creators.

4.0344. The whole set of such subjective *dual* signs (as all-possible fragmented information, local situational combinations, particular Form-images and realizational «pictures») is specifically

concentrated in Self-Consciousness information space of Every Universal Entity as slloogrent ethereal Constructions (psycho-mental vibrational codings), which *sort of* intercross, intercomplement, and interreplace each other in every focal-initiated, in them, «activation point,» while being subterraneously reflected in Focus Dynamics (depending of the structure of focal-ethereal interconnections combining them).

4.0345. Meaning, in the case considered by us, we will discover an inevitable regularity in any «point» of subjective assessment of these signs from the standpoint of «whether it is good or bad»: GOOD (with respect to something) ⇌ EVIL (with respect to something other). At any circumstances, there is the countless number of such subjective results among all-possible combinations of the signs subjectively divided by us: Love ⇌ Hate, Light ⇌ Dark, Warm ⇌ Cool, Happiness ⇌ Sorrow, Joy ⇌ Fear, Peace ⇌ Dynamics, Construction ⇌ Destruction, and so on.

4.0346. These are functional — with respect to FD — «zones» of active *multilateral* interaction between these complex-synthesized ethereal aggregations, where every subjective sign is simultaneously manifested also via many own sense oppositions, in any of «the points» of own focal initiation (subjective reflection in FD), — which are the specific ethereal state of slloogrent Information meant by the term «Duplex-Spheres.» In this notion, the word «sphere» does not have any relation to geometry of the space surrounding us, because the content (ethereal interconnections) of every Duplex-Sphere structures, by itself, Self-Consciousness information space. The specific «creativity sphere» is meant by this word, which is some narrow-specific information Potential allowing FD of Form-Creators of any Self-Consciousness Form to realize in some particular direction of the subjective creativity.

4.0347. And the word «Duplex» reflects our limited surdousive Conceptions about ambivalence, duality of any of interactions considered by us. It means not only opportunity of simultaneous — multilateral (multipolarizational) and multilevel (different-Qualitative) — transcommunication (multi-directed reception — translation) of Duplex-Sphere Content to the countless number of subterransive FDs using it (in response to every resonational «request»), but also ability of Info-Creators to free convergence (subjective interpretation) of impersept and cruvursorrt signs between each other equally reflecting different-Qualitative simultaneous states (dual Thoughts, ambivalent sufferings) in FD of Form-Creators.

4.0348. For example, a person can at the same time to feel physically cold of frost (to become frozen) and to feel «internal heat» of strong psychic suffering (they literally «break into a sweat over emotion»); hysterics can simultaneously express both joyful state (loud, irrepressible laughter) and strong psychic excitement (despair); feeling guilty for what they did can be accompanied by feeling deep moral satisfaction, and so on. Each of these dual states can be motivated by surdousive SFUURMM-Forms, which structure the same Duplex-Sphere, but reflect subjective combinations of *various* protoformal signs.

4.0349. In particular, according to human morality, it is bad to kill people, although slaughter of representatives of the different kind, in perception of animal and vegetable predators, is an insurance of their own self-survival or striving for strengthening in the norms and rules common to them;

therefore, they cannot find anything bad in such behavior (survival of some populations at the expense of occupation territories or nutritional resources belonging to another population). Hence, a person-killer who has synthesized own Conceptions about possibility of killing from different- protoformal signs structuring one Duplex-Sphere can simultaneously feel both satisfaction for what he/she did (depliative SFUURMM-Forms of predator Proto-Forms about necessity of a certain benefit, satisfaction of own need for violence, revenge, or commercialism) and deep remorse (ampliative SFUURMM-Forms of Form-Creators of collective Subconsciousness). A vivid example of such — controversial and ambivalent — psychic states is the image of Raskolnikov, the protagonist of the novel « Crime and Punishment» by F. M. Dostoyevsky.

4.0350. The Content of the same Duplex-Sphere can be equally, but completely differently (in accordance with the invaderental features of own Synthesis Scheme) used by both Form-Creators of vuolds, flaks, boson, fermion, atomic, and molecular Self-Consciousnesses Forms and Form-Creators of complex-synthesized mixtum Forms, which Focus Dynamics simultaneously reflect, in conditions of one — common to them — exhiberation diapason, realizational Interests and subterransive Conceptions of many different-type CCI's (microorganisms, animals, vegetables, minerals, all-possible cosmic objects, and also transparentive Forms).

4.0351. Figuratively (and highly conditionally!), the process of using the content of Duplex-Spheres in FD of any Proto-Form can be compared to soaping a body with foam consisting of the countless number of tiny soap bubbles, which «penetrate» each other at the borders of own surfaces. In this comparison, every bubble corresponds to the definite Information particle (SFUURMM-Form) structuring Sphere of realizational Creativity of one or another Duplex-Sphere. To soap yourself, you should scoop some quantity of the foam mass *possible for your hand* from the general foam *within your reach*.

4.0352. It's kind of how you also use, in your FD, different-Qualitative Conceptions all variety: those ones, which are the most clear to you and constitute the basis of your subterransive Experience (the ODS part already kleksed by you), «penetrate» your FD easier and faster than all others, while motivating your «current» choices, tastes, preferences, and Interests. And those SFUURMM-Forms, which require powerful physical or psycho-mental efforts from you, which realization is related with necessity of the particular changes from your side, are all the time «moved to the background» by you «for later,» and therefore they often disappear from your FD sphere without being realized. They are realized in the cases, when the Perception system of your Self-Consciousness Form begins to be more relevant to realizational Potential of such Conceptions.

4.0353. But you should have deep understanding that actually (in the *projective* Reality!) there are simply no any «Spheres» (as realizational «spaces» of ethereal «projections») beyond the initiation process of Focus Dynamics: all infinite multitude of such psycho-mental Constructions is «upakovano» — on the signs of the highest covarllertness between each other — into the one «sllloogrent point» of Self-Consciousness information space of every Form, while specifically-multipolarizationally «serving» all its creative needs and Interests in any exhiberation conditions. In the Conceptions existing now, the properties of *mathematical singularity* are the most appropriate, by definition, to the universal properties of this conditional «point» (the point where mathematical function goes

to infinity or has some other behavior irregularities). This speculative — *beyond space* — «point» transforms to some subjective definiteness (is «materialized» as a part of Space-Time) «every time,» when ethereal combinations of Info-Creators specifically structuring it receive, from Focus Dynamics resonationally corresponding to Them, an impulse of strictly defined energy Potential, without which any Information realization in the Form-system of the Worlds is just impossible.

4.0354. Let me remind you that even so simplified (very primitive) Conception about the Essence of «the successive materialization process» of any Information particle in Self-Consciousness of Form via Focus Dynamics is *false*, since there is simply no «every time» in the holochronness of simultaneous Existence of the infinite multitude of different-type Macrocosmos! Illusion of such «every time» availability is the very functioning basis of any of the systems of our subjective Perception, which distorsively, inertially forms all endless concatenational-consummative process of qualitative «replacement» of some FCAs by the others producing our subterransive Focus Dynamics. With every fact of such eglleroliftive «replacement» of some Interests by the others, we complement interconnections already generated by us with the new ethereal combinations, which stimulate the further dynamics of our «current» Interests modification, which means also modification of the existing Conceptions about «ourselves» and the surrounding reality.

4.0355. Therefore, we could imagine the only conditional «instant» of simultaneous-multipolarizational activation of information «point» to the whole infinite multitude of all-possible, in own qualitative state, realizational options as the general Picture of Macrocosmos «frozen» in own instant manifestation, through which ethereal interconnections multilevel structure We as Universal Focuses Self-Consciousness resonationally amitsirate in Space-Time all different-Qualitative slloogrentness, while subjectively «splintering» it to the infinite multitude of ethereal fragments combinations clear to us (in every particular case). You should understand that the specific interconnections of each of such ethereal structures informationally providing FD of Form-Creators in any of dimension diapasons are holochronely «projected» to slloogrentness of Focus Dynamics of The Highest Intelligences of Macrocosmos, but not only to the Form-structures of Universal Plasmic Forces Diapason.

4.0356. Since our Imagination is unable to form at least some Conception about the general Picture of Macrocosmos in the terms and images of the Infinity, we are simply forced to use the mental connection, peculiar to our way of thinking, to some «spheroidicity» (multipolarizationness) type of the interconnections formed in our Self-Consciousness, which we conditionally interpret as various Duplex-Spheres all multitude, with the content accessible to our Perception. It turns out that the potential content of Duplex-Spheres resonationally initiated by our Focus Dynamics is the basis of formation, in the information space of every person's Self-Consciousness, of all diversity of their subterransive different-Qualitative Conceptions about «themselves» and subjective estimation of the reality surrounding them from such dual standpoints as «good-bad,» «pleasant-unpleasant,» «interesting-uninteresting,» and so on.

4.0357. This process is accomplished in FD in the much more complicated way, than you might suppose, because initiating one or another SFUURMM-Form you unconsciously «project,» from *the beyond time* information space of own Self-Consciousness, resonationally corresponding Conceptions,

which are used — simultaneously with you! — by zillions of particular and homologic Interpretations of your Stereo-Form, which are exhibited in various Time Flows (eons of Time «in the past» and «in the future»). It depends on specific Conceptions of *which exactly* Self-Consciousnesses Forms resonate with FD of NUU-VVU-Form-Type now focused by you — exactly such subjective estimation and perception of «you yourself» and the circumstances that prevailed as a result of the continuous amitsiration of your FD, will be done.

4.0358. For example, imagine that, during estimation of some situation, initiation of your FD has been accomplished by Form-Creators of the particular Levels of your Self-Consciousness, Who are typical in varying degrees both for your current f-Configuration and for f-Configurations of many particular «personalized» Interpretations (Form-Types) of your Stereo-Form differently knowing «themselves» and realizing accordingly in various historical periods of the human civilization development («Middle ages,» times of «ancient Rome» and «ancient Egypt,» bronze and iron periods, palaeolith, mesolith, neolith, and also all options of the future).

4.0359. Your «personal reaction» on the prevailing circumstances will totally depend on how much the general f-Configuration of Form-Creators most activated in the situation now occurred to you corresponds to the parameters of the typical sections of f-Configurations of NUU-VVU-Form-Types, which are exhibited either in the primitive society, or in antiquity, or somewhere in one of «the future» epochs of your eternal Existence. You will act either as a Neanderthal man would respond, or as a civilized person. This is because «you personally,» and «all of them,» regardless of which historical periods you would structure by your FD, jointly use — although quite differently! — informational particles of the content of *the same* Duplex-Spheres in the realizations peculiar to all of you, which are functionally «tied» to some specific conditions of the human Existence in various STCs' groups only due to availability of resonational activity of FD of Form-Creators of «locally expressed» Self-Consciousnesses Forms.

4.0360. This is exactly high activity of Form-Creators of the same Levels of collective unconsciousness and personalized Self-Consciousness — the two lowest IISSIDI-Centers — in Focus Dynamics of all particular persons subterraneously realizing «themselves» in various chronological periods of History, which creates prosperative situational opportunities for implementation of *the same* Conceptions very primitive by own content (fear, hate, aggression, revenge, envy, jealousy, and the like) equally both in conditions of the primitive community and in various states of so called «civilized» human society. The fewer conditions for free self-expression of the carriers of these destructive Self-Consciousness Levels exist in person's FD (the higher Creative Activity of SFUURMM-Forms of IISSIDI-Centers second pair is), the fewer prerequisites appear in order for the Conceptions typical for «the dark» and ignorant periods of our History could actively manifest, in various ways, in life situations of a modern person.

4.0361. Consequently, slloogrent ethereal Construction of any of Duplex-Spheres is in no way connected not only with the specific Time parameters, but also with the local characteristics of Space (dimension diapasons, resopasons; dimension types). Any act of specification and localization of every SFUURMM-Form in any exhibition conditions (the Stone, Bronze, Iron Ages, or our time) are performed only via specific features of Focus Dynamics (the prevailing activity of

collective unconsciousness and personalized Self-Consciousness, or collective Subconsciousness and Supraconsciousness), which resonationally initiates, in its ethereal Configuration, abilities for exuberation of its Focus of Dual Reflection (or UMPI) in «the local» regime of Space-Time (meaning, in the f-Configuration of some particular Self-Consciousness Form).

4.0362. Slloogrentness of sfuurmmformal ethereal combinations of all inexhaustible diversity of Duplex-Spheres penetrates, by itself, not only Subovertones and Overtones, but also all Subplan-Overtones, and Plan-Overtones of Fields-Consciousnesses (SLAA-SS-MII- and Info-Creators), while duvuyllerrtly converting, in the more ampliative exuberation conditions of the Secondary Illusion, to much more universal LLAASS-Forms, which informationally supply simultaneous formation of subjective Realities of Collective Cosmic Intelligences of SSLOO-SS-SNAA-Creators. With increasing complication and miskeration (covarllertness growth) of ethereal combinations conditioning increase of the creative abilities of Form-Creators, svilgs-spherational merge of SFUURMM-Forms occurs — again, only via FD! — in the ethereal structures of the more ampliative dimension diapasons (FLCs). These SFUURMM-Forms earlier belonged to the Duplex-Spheres, which content, in the simplified exuberation conditions, was subjectively perceived by Form-Creators as Information scattered or dual by the sense.

4.0363. Though, regardless of this trend, a completely *false* conclusion should not appear in your Perception that *the quantity* of Duplex-Spheres should *reduce* with increasing of dimension diapasons parameters. There is no any «quantitative» *state* of SFUURMM-Forms (!), since realizational abilities of any of subjective Conceptions depend on not «the quantity» of Duplex-Spheres simultaneously initiated in your Perception, but on subterransive «projectional» abilities of Biopendulum» (ILLGRII-TO-O) of Self-Consciousness Form focused by you. This Biopendulum provides informational «capacity» of Form-Creators of Focus Dynamics: the more tensorness FD has (imperseptness among different-protoformal interconnections), the more opportunities for realization of duality, disunity, destructiveness signs are in its SFUURMM-Forms. The quality of slloogrent content of any Duplex-Sphere used in your «current» FD depends only on creative abilities of Form-Creators of your Perception system — meaning, depending on which Self-Consciousness Levels are used for implementation of the process of «local unpacking» of Information subjectively perceived by you (with preferred usage of TEC or VEC).

4.0364. Duplex-Spheres could be conditionally compared with eternal (beyond time and space) locuses (from lat. *locus* — «theme,» and in biology it is gene place in the chromosome structure) — universal *thematic* Sources of any subjective Conceptions simultaneously existing sort of «inside» of overall slloogrentness of Macrocosmos both in the most simplified and in the most complete — for any of Self-Consciousnesses Forms and CCIs types! — realizational options. For example, both Form-Creators of Collective Cosmic Intelligences of bosons, fermions and CCIs of any of Self-Consciousnesses Forms of animals, vegetables, minerals, Planets, Stars, and Galaxies equally receive (and specifically unpacks from the slloogrent patterns) Information required for subterransive Creative Work from their overall Content.

4.0365. All infinite diversity of Creativity Ranges has been created in the noo-time structures (NTCs, noo-time Conversums and Universums) of Macrocosmos skrruullerrt system on the basis

of realizational diffuzgent dynamics of Form-Creators of each of these kinds and types. A human person begins to uncover and increasingly deeply comprehend availability of these Spheres only with progressive miseration of the invaderental signs of lluuvmic birvulyarity type in his/her Focus Dynamics.

**4.0366.** Then, after synthesis by VVU-Factor and balancing of SFUURMM-Forms of many Proto-Forms between each other, a person is able already to extend considerably the spectrum of own FD subjective reflection in various (different-protoformal) OLLAKT-DRUOTMM-systems or FLUU-LUU-complexes, while obtaining ability not only *sort of* to «live» and narrow-specifically *sort of* «to experience» the creative states, which are typical to representatives of various (diffuzgent to our Synthesis Scheme) animals, vegetables, and minerals, but also to understand (individually!) the principles and the character of interconnections between different Planetary and Stellar Entities, between various Entities of atoms and fermions structuring them. This is availability and powerful acquisition of these cognitive abilities, which allows our mixtum NUU-VVU-Form-Types, in the most prosperative versions of our «future,» naturally qualitatively to develop, first to dimidiomittense Forms, and then to translucense Self-Consciousnesses Forms of flaks Worlds.

**4.0367.** With availability of the corresponding VLOOOMOOT parameters in f-Configuration of the Self-Consciousness Form focused by you, you can initially to concentrate own FCA (in the altered states of the profound Meditation) on the slloogrent Sense of SFUURMM-Forms combinations more simple and clear to us (for example, «white Light,» «Love,» «Joy») and, as the result, to reach sequentially the universal Content of much more amplificational Self-Consciousness Levels with own Focus Dynamics (FIMI), right up to the highly complicated ethereal Configurations of LLAASS-, YYYUULLUYG-, and SSNUUYLL-Forms. Exhiberation complexity and difficulty of these transcendent Conceptions Content, for Self-Consciousnesses Forms with the other VLOOOMOOT parameters, will depend, in the nutational conditions of the given CSR, only on ability of «the meditating personality» accordingly to adapt, express, and bring the Information intuitively perceived by him/her in the terms generally accepted and understandable for other people.

**4.0368.** The more Focus Dynamics of Self-Consciousness Form is diversified on many qualitatively disconnected and realizationally uncoordinated Conceptions, which abundance induces all-possible tensoriness states in it (FD) and rises its inertia, the higher the «quantity» of allegedly mutually exclusive concepts and qualitative signs is, which is the result of subterransive differentiation (in the Perception of Form-Creators of the given SF) of the united information structure of every Duplex-Sphere allowing Focus of Dual Reflection of Info-Creators «to project» to many, *sort of* heterogeneous in the Sense and Content, Spheres of their joint subjective Creativity with Form-Creators. The high degree of different-Qualitative diversification of the Conceptions implemented via FD is induced by extreme instability and high imperseptness focal-ethereal interconnections structuring f-Configurations of undeveloped Self-Consciousnesses Forms, which imperfect Perception systems do not allow their Form-Creators to discover peculiar to Them unity and entirely synthesized, unbreakable interconnections in the relations estimated by Them in a dual way.

**4.0369.** Having very limited (due to the strong instability of impersept interconnections) ability to concentrate, in the fragmented way, on the separate particles (perceptible signs, particular aspects)

of slloogrent SFUURMM-Form, Focus of Dual Reflection of Info-Creators resonationally «projects,» to Focus of Close Attention of Form-Creators, very small part of the information content of the general Conception about the potential realizational Essence of the Interest to something shown by Them. As the result of this, the forced «splitting» (fragmentation and sense diversification) of the general ethereal Configuration of the Interest (SFUURMM-Forms) realized by Them occurs in unharmoniously formed FD, which Form-Creators are unable, per one «quantum displacement,» correctly (meaning, taking into account VVU-Factor features) to decode and to unpack associatively (consciously process, comprehend, adopt) the more sufficient Information volumes. The splitting shows many Conceptions sort of discrete and particular by the sense, which could cause false impression about their incompleteness or even duality, incompatibility during their consideration by the personality.

4.0370. Thus, because of the insufficiently high development level (under-synthesis of interconnections or their protoformal state concerning the signs of favor to the given STC) restricting creative abilities of FD of Form-Creators, not only strong deformation of the general picture of the surrounding reality occurs in the subjective Perception system of undeveloped person (bio-Creators simply cannot decode and «unpack» the major part of the particles in time, and there are no conditions for the activity of Form-Creators of collective Subconsciousness), but also strong underestimation of potential opportunities for his/her creative realizations takes place.

4.0371. During strong concentration of bio-Creators of the Perception system on realization of particulars and on division of the person's integral Interest on many opportunities mutually exclusive to each other (meaning, the conceptions showing that one can act, think, feel *this or that way*), the general Sense of the life creative work performed by the person escapes from their FD, its genuine purposiveness, scale, and prospects are lost. And this means that the amitsirational process itself will be implemented, in FD of such person, via concatenational Synthesis of many yet missing (for the parameters of the given birvulyarity type) svilgs-spherational perturbations strongly distorting *human* Conceptions about the subjective Reality surrounding them (due to activation, in FD, of different-protoformal SFUURMM-Forms and increase of dissonational distances as regards lluuvvumic sings) and tendentially displacing their refocusing into deep «time loops.»

4.0372. So, CSR every type is formed as the result of simultaneous realizational efforts of Form-Creators of many Proto-Forms diffuzgent towards each other, which jointly, but differently interpret (kleks SFUURMM-Forms on own Synthesis Scheme) and use information content of slloogrent Duplex-Spheres for own creative work. «The material» basis for implementing the general Process of multipolarizational Form-making (in every exhiberation diapason) is constructed by subjective Conceptions (about «ourselves,» about creative work properties and features in the reality surrounding Them) of Form-Creators of the most universal Self-Consciousnesses Forms (in each of conditional spectra of focal-ethereal interactions).

4.0373. As noted before, the subterransive features of Form-Creators of Self-Consciousnesses Forms of all elementary particles, which are transgressed to the Focus Dynamics of these particles by photon Form-Creators (of not only quantum Levels, but also doolls and flaks ones), are totally conditioned by Their own Perception systems organization specifics yet beyond our comprehension

and based on the typical to Them subjective Conceptions about those realizational opportunities, which could appear between all of Them in the given exiberational regimes (a huge role in these relations coordination is played by svilgsions of DLUGLLEMM-, UPDUYKK-, and SSMAYK- AYKK-Fields-Consciousnesses).

4.0374. The result of joint realization of creative Interests all diversity (meaning, signs of liyllusceeveness, geyliturgentness, covarllertness, imperseptness, and cruvursorrtness typical to them) of Form-Creators of various fermions f-Configurations is the natural appearance (sort of «inside» of each of exiberation regimes) of all multitude of different-type Self-Consciousnesses Forms of atoms, which represent various realization versions of the same fermion interconnections, but only with partially modified interpretation of the same SFUURMM-Forms, because of arising of all-possible tensor limitations. These profective limitations in interactions between Form-Creators of fermions all variety are the consequence of the forced «scale growth» (aggregation, construction development) of fermion Self-Consciousnesses Forms in conditions of arising influence, on their FD, of inertial processes during organization, by themselves, of the more extended spectrum of all-possible interactions between each other.

4.0375. In turn, the inertial Coefficient of interaction inevitably increases during «atomization» of elementary particles because of the presence of the higher compatibility of some signs between FDs of Form-Creators of some fermions types, than compatibility towards FDs of the other types of fermions. Very conditionally, it could be compared with complication of relations in the human society along with formation of collectives with various population on some specific signs: «loners» (fermions) although more free in own realizations, but their sufferings and efforts usually lack things, which two, three, or more people (atom) could feel and realize. For these purposes, people are self-organized to various groups on the Interests joining them (companies, friends, families, creative and working teams, firms, consortiums, concerns, villages, cities, nations, countries, and the like), and fermions self-organize to atoms and molecules, from which the infinite multitude of molecular constructions is self-organized on the particular realizational Interests (birvulyarity types) of any complexity and scale (from microorganisms, animals, vegetables, crystals and minerals to Planetary and Stellar systems, Galaxies, Galaxies and Universes clusters).

4.0376. All infinite diversity of options of information influence of Focuses of Dual Reflection (or UMPI) of Info-Creators of various SFUURMM-Forms holochronely initiated in each of Duplex-Spheres by Focuses of Close Attention (or FIMI) of Form-Creators of all-possible Self-Consciousnesses Forms, is repeated absolutely — but only to various degrees of inertia and subjectivity reflecting narrow-specific features of individual Perception systems functioning! — through all infinite diversity of all development scenarios simultaneously structuring space-time part of the skrruullerrt system of the Tertiary Illusion.

4.0377. For example, Form-Creators of NUU-VVU-Form-Types, Who are able to use, for formation of own FD, only those fragmented particles of slloogrent ethereal Configuration of Duplex-Spheres, which structure lital SFUURMM-Forms of temporal ethereal constituent (to 4.0 dimension), initiate, to exiberation «around Themselves,» much more deformed (inertially distorted) part of the skrruullerrt system, than christal SFUURMM-Forms of variable ethereal component (from 4.0 to 6.0

dimension) used by Form-Creators for the same purposes. In turn, these Conceptions of Form-Creators of NUU-VVU-Form-Types also appear to be much more primitive and limited compared to those ethereal UUOLL-SLAIILLI-I-combinations, which structure Duplex-Spheres of lluuuvvumic STCs' groups in diapasons from 6.0 to 9.0 dimension. And, of course, even these ampliative Conceptions are much more simplified form of creative realizations compared to qualitative state of ethereal OULLGNOO-S-ST-Information, which Duplex-Spheres are the formation basis of FD of Form-Creators of 9–12-dimensional diapason of the Tertiary Illusion.

4.0378. You know already that the notion «dimension» considered by us is very conditional and subjective, because it allows to reflect specifically, in the Perception system of the Observer examining it (dimension), only those interconnections, which have managed already to kleks themselves between each other, in the specific way (in complete accordance with the Synthesis Scheme), via his/her Focus Dynamics. All the rest — infinite! — part of slloogrent Configuration of every exhiberation regime partially or in no way connected with the Conceptions already formed by the Observer him/herself either becomes unpacked in a very distorted («cut») way by Form-Creators of his/her Perception system (basically, he/she sees and feels only what he/she wants or expects), or in no way fixed by Them at all (due to complete absence of his/her own Conceptions about realizational basis of one or another phenomenon considered by him/her).

4.0379. Meaning, all ethereal combinations peculiar to any Duplex-Sphere potentially «project» from it to the subjective Perception systems of absolutely all Self-Consciousnesses Forms structuring every STCs group with own FD. But during formation of subterransive FDs, the tiniest part of these combinations is unpacked narrow-specifically, which is barely able to interconnect all multitude of selectively kleksed separate fragments of slloogrent ethereal Configuration to something more or less logically whole. Speaking only about this exhiberation regime (3–4 dimension), options more or less clear and accessible for our Perception of all-possible interconnections between people, people and animals, vegetables, minerals are «included» to the ODS and FLC Creativity Ranges, as well as SFUURMM-Forms completely illogical and therefore inconceivable for us and the development scenarios formed by them of photon-fermion, atomic-molecular Self-Consciousnesses Forms, and also of STCs' groups of Planets, Stars, and Galaxies structured by their joint Focus Dynamics.

4.0380. With increasing universalization and harmonization of Conceptions of your Focus Dynamics with SFUURMM-Forms of Focus Dynamics of all multitude of Proto-Forms surrounding you, the horizons of creative functioning of the human STCs' groups clear to you and less subjectively perceived by you will extend and deepen more, while sequentially including, to the Sphere of your subterransive Creativity, some part of either what is now perceived by you in extremely wrong and restricted (one-track) way as the evidence of depliative manifestations of some Self-Consciousnesses Forms and their low development level, or what cannot exist now only because of your absolute conviction in this. When you get rid of the extreme categoricity in judgements and too one-sided perception of the reality surrounding you only within the Conceptions *understood by you* (which is now the most powerful obstacle in your own development!), then the World will gradually appear before you in completely other, more diversified logical and holistic images, properties, and events, behind each of which you will be able to discern the information Essence peculiar to them, creative necessity, and realizational purposefulness.

## Chapter 10. About simultaneous implementation of different-Qualitative development Directions in multipolarization of Focus Dynamics

4.0381. Now, after deep examination of the role played by the highly complicated inertial Mechanisms during Information reliability degree variation subjectively perceived by Form-Creators of various types of the Tertiary Universal Illusion in amplificational Levels peculiar only to Them, you are able to understand and cognize much deeper the true Reason of appearing of the whole infinite variety of narrow-specific SFUURMM-Forms (false ones unreliable for Form-Creators of CSR other Levels and types), which They *are forced* to use for structuring own FDs in each of exuberation regimes of Self-Consciousnesses Forms focused by Them. As the SLAA-SS-MII-Creators of many different-type human CSRs (in subterransive Self-Cognition processes continuously and simultaneously accomplished by us), We are also always forced to use only unreliable, defective data (information), which have been specifically «refracted» already (as a ray pushed through the infinite multitude of versatile «prisms») in Form-structures (FDs, f-Configurations of Self-Consciousnesses Forms) of various Collective Cosmic Intelligences of Subplan-Overtones, Overtones, and Subovertones before having opportunity to be kleksed and originally reflected in our FD. Each of these CCIs has formatted own part of slloogrent ethereal Configuration of the SFUURMM-Form used by us with interconnections peculiar to Its birvulyarity type.

4.0382. If you ask me, «Is it good or bad thing?» I will ask you that this is amplificational thing. In fact, our infinite and amplificationally «programmed» misawareness, when it comes to the Nature of «ourselves» and the Reasons of generation of the reality surrounding us, is provoked by the very Sense of our infinite and simultaneous Co-Existence with all other Proto-Forms. As the result, all opportunities of the Diffuzgentness and Multipolarization Principles realization via Focus Dynamics of all our Self-Consciousnesses Forms are safely provided in all exuberation regimes of Form-Creators of the Tertiary Illusion.

4.0383. Now, when you are able to understand the Reason of appearance, in your Life or in any historical period, of some false Conceptions (compared to lluuvvumic ones) about anything (the most total ones among them are religious teachings and philosophical views, political, economic, and social concepts), you will value them from the standpoint of availability of lluuvvumicality typical signs in them (HSI, HIA, immunitant Responsibility, humanitarian Freedom), and you will make less mistakes hereafter, which means, you will less amitsirate, with own FD, to all-possible vitium circumstances (time loops). This will allow you to begin more consciously and objectively to examine some of the data, while distinguishing those interconnections in their ethereal Configurations, which are typical not for the lluuvvumic birvulyarity type, but for various protoformal realizations.

4.0384. Besides, availability of deeply diffuzgent and very broad interconnections between all Form-structures of the Tertiary Illusion conditions also the very Nature of continuous and qualitatively eternally modifying Process of Our self-conscious simultaneous Existence in all potentially possible exuberation regimes of our (human) Self-Consciousnesses Forms at once. The organization Universal Principle of this Nature excludes any opportunity for every person to live the only one Life — that one, which this person considers as «own» in every «current» instant.

4.0385. To provide ideal functioning of this highly complicated Mechanism of holochrone-simultaneous exuberation of Focus Dynamics of all heterogeneous Form-Creators, every sllougent f-Configuration type of any of CCI's should be duvuyllerrtly presented by different-Qualitative Perception systems of zillions of persons peculiar only to it in various Form-structures of Space-Time. These are concatenational fixation and svilgs-spherational change of Focus Dynamics *between the most covarllert* of these Perception systems in the unified Process of simultaneous realization of lluuvmic Form-Creators, which make the illusory effect subjectively defined by each of us as «my own life.»

4.0386. Even in the conditional exuberation «limits» in Form-structures of Physical Globe of this Planetary Entity, every person subterraneously-simultaneously experiences zillions of different-Qualitative Lives subjectively differently perceived by him/her, which represent LLUU-VVU-Form unified objective Existence in the general «picture» of diversely realized historical epochs and time periods.

4.0387. Depending on the qualitative parameters of the countless number of «the human» STCs' groups providing causal connections all diversity between Focus Dynamics of Form-Creators of all «our» «personalized» Interpretations (and particular NUU-VVU-Form-Types), each of these countless options of Our united and endless Life is able to initiate the greater or the lesser Self-Consciousness Creative Activity in the Perception systems of all-possible our persons. Also, it grants corresponding abilities for various qualitative realizations of Focus of Close Attention of Form-Creators of various NUU-VVU-Form-Types in every exuberation case in strict accordance with the subterransive NNAASSMM and VLOOOMOOT indices.

4.0388. In each of the manifestation levels of subterransive FCAs all multitude, availability of the common exuberation Mechanism for Fields-Consciousnesses of all Proto-Forms and the most detailed structure providing all types of interconnections between Them (ODSs and FLCs with NTCs generated in them — from one «side;» Duplex-Spheres, Subovertones, Overtones, Subplan-Overtones, Plan-Overtones — from the other «side») creates, for various Self-Consciousnesses Forms, corresponding to them conditions and perspectives of psychic (mental-vital) development in the birvularity types peculiar to their Focus Dynamics. The same Mechanism (FLCs and ODSs availability) allows every person, with the help of diverse brain (synapses, neurons clusters, thalamus, hippocampus, and others) and Self-Consciousness communication structures, «to slide» with own FCA through the hundreds of thousands of duvuyllerrt versions of «parallel» Lives (development scenarios), while resonationally activating themselves, with own Thoughts and Feelings, in exactly that option, which f-Configuration corresponds the most to the opportunities of the Interest realization peculiar to it at the given subjective moment.

4.0389. It is through availability of all infinite diversity of simultaneous development options of our Lives in Macrocosmos skrruullerrt system which allows each of us always to have the real opportunity *independently and sequentially* to organize (with the quality of own choices!) all specific circumstances of own «current» existence from the countless offers of «the surrounding reality,» while svilgs-spherationally refocusing to the scenarios groups (STCs), where the Interest realized or unrealized by us has been implemented in one or another way. To you deeply understand and

really comprehend the presence of these your creative abilities, and cognize the Principles and the Laws providing this subterransive amitsirational Process, your spontaneous and instinctive decisions will resonationally involve your FD (and therefore yourselves!) from some *vitium* («unfavorable,» harmful) versions of your simultaneous Existence to the other development scenarios more or less satisfying your Interests.

4.0390. The more Form-Creators of NUU-VVU-Form-Types sequentially formed by us are in the state of the deepest ignorance and misawareness concerning own realizational abilities, the longer and more spontaneous release «to chance» is applied for each your moment of Life. No one but you yourself are able to change at least one of «the current» circumstances of your Life, if there is *no* any Conception (about the very possibility of such way out) corresponding to these circumstances for such changes in your Focus Dynamics, which activity could be motivationally intensified (via *analogent* scenarios — very similar ones in some things, and dissimilar in the other things) and sequentially organized to situations and states corresponding to them. SFUURMM-Forms seeming to you inessential at the moments of happiness and elation, which concern hidden fears and unconscious doubts (generated by the activity of depliative F-Cs, Who do not have all basic knowledge of the situation), and equally also Thoughts, hardly incipient in complicated life circumstances, about hope and the slightest opportunity of the more favorable way out (generated by subconscious F-Cs realizing simultaneously in situationally the same, but less dramatic scenarios) are able resonationally to conglomerate and strengthen their influence on FD, while increasingly reorienting its amitsirational process to the circumstances corresponding to your expectations — even if *unconscious* ones!

4.0391. What exactly will prevail in your reactions and choices — fear and panic, or Experience and common sense — depends on the activation degree of your intuitiveness levels. If these are bio-Creators of gastroenteric «brain,» Who influence more on the FD state and Who are oriented towards only physiological (physical) safeness of your person, this will lead to one way out, which is far from being the most clear-sighted and favorable for your further development (as regards tensors elimination of the current situation). And if you, in own choices, are already able easily to activate Form-Creators of the intuitive Levels of collective Subconsciousness, Whose Perception spectrum of all-possible versions happening in the analogous circumstances of the parallel scenarios is much broader (informationally more saturated and motivated one with the more ampliative SFUURMM-Forms), the way out may appear to be completely unexpected and nice to you: possibly, the facts and interconnections unknown to you will uncover, due to which the tense situation, which seemed hopeless and insoluble, will annihilate «all by itself;» or negative reactions of the rest participants of the conflict will change radically in your favor; or some help will appear you did not hope for; and the like.

4.0392. Therefore, this always will be much more ampliative and perspective decision — to stay optimistic in any situation being able (or at least trying to), even in the most hopeless life circumstances, to find opportunities for deep confidence in the fact that these circumstances negatively perceived by you are the intermediate stage — but *svilgs*-spherationally conditioned one, meaning, procedurally required for harmonization of generated tensor interconnections! — of concatenational amitsiration of Form-Creators of your FD to the most prosperative scenarios of possible realizations of your «current» Aspirations. And this is compared to your even slightly negative perception or skeptical attitude towards any of problematic situations, which are periodically generated as the result of

realization of your depliative choices and which appear exactly in this — destructive — way in your «current» Existence for the following psycho-mental correction and harmonization of your FD.

**4.0393.** Not to get, in your reactions, down to the activity Levels of Form-Creators of unconscious part of your Self-Consciousness, Who use the most primitive SVUULL-VVU-conglomerates (particles of different-protoformal depliative Conceptions partially synthesized on the VVU-Factor) for own realizations, you should never forget, even in the most complicated life circumstances, about the fact that any realization options of your «current» Aspirations (both the most dramatic ones and the most favorable among possible ones) ALREADY really exist in «the adjacent,» parallel scenarios of your multidirectional simultaneous development, regardless of whether you realize this or not. Your abilities of the conscious realization via any of these options totally depend on the fact, how much qualitative state (covallertness degree) of interconnections structuring f-Configuration of «personalized» Interpretation now focused by you corresponds to the optimal criteria of refocusing on lluuvvumic Synthesis Scheme, which main signs (for mixtum stage of the overall amitsirations) are availability and activity level of typical SFUURMM-Forms of high-sensual Intellect and high-sensual Altruism in the person's FD.

**4.0394.** If the interconnections parameters, used by you in the circumstances built up, could be defined as mostly egoistic, impulsive, unconscious, tensor, aggressive ones (in other words, not corresponding to the human type of relations), this reflects about their imperseptness or even cruvorsorttness with respect to the main Direction of your development as the Human One. Consequently, before acquiring the opportunity to refocus to f-Configurations of the more prosperative scenarios, intensive processes should be accomplished in your FD on svilgs-spherational harmonization of different-protoformal SFUURMM-Forms fragments used by you with the parameters of two-invaderental lluuvvumic Synthesis Scheme. It should be noted that for sequential annihilation of different-Qualitative tensors, which have produced dissonational distances separating you in Time and Space with high-nutational parameters of the more favorable scenarios, your Form-Creators will be required to make quite a substantial investment of decoherent Energy structured with the stable lluuvvumic interconnections, which qualitative state is interpreted by us as Good Nature, Love, Generosity, mutual Understanding, Tolerance, Congruence, Responsibility, and the like.

**4.0395.** The more your choices will be oriented towards exactly such creative manifestations, but not towards egoism and non-positivism (both with respect to yourselves and the others, and also to understanding the Reasons of the situation happened), the faster subterransive amitsiration of your person will occur to the more harmonious circumstances, since the more ampliative interconnections having much greater Energy-Potential (due to increased covallertness) are able to activate, at «the unit of chronological time,» highly concentrated aggregates of intercomplementing Information (high-frequency SFUURMM-Forms) in FDs of Self-Consciousnesses Forms, and effectively to realize not via lingering svilgs-spherational processes of multistage duvuyllerrt Synthesis of deficient interconnections (over all multitude of different-Qualitative resonational dimension diapasons, in which conditions the most tensor states have been generated), but via «instant» (for our Perception systems) acts of purposeful subchakram amitsiration, or in other words — transcommunicational quantum dispersity.

4.0396. The main difficulty of the Focus Dynamics introduction process to the state of transcommunicational quantum dispersity (compared to the signs of lluvvumic development Direction!) is in necessity to learn, in any problematic situation (which usually has a very long formation term and manifests quite unexpectedly for you) to concentrate intensively all own psycho-mental efforts at a very short period of time on the deep comprehension and understanding that all your further choices can be formed only on the basis of intellectual-altruistic reactions and Conceptions, regardless of how strongly they can harm the egoistic Interests of the person focused by you (SFUURMM-Forms of immunitant Responsibility and humanitarian Freedom are formed and established in FD exactly in such conditions!).

4.0397. To surely provide conditions for manifestation of such intensive FD amitsirations in complicated life circumstances, you should program yourself, with the Motivations most convincing for you, only on high-qualitative reactions with respect to various propositions of the reality surrounding you. Such psycho-mental orientation — on a par with the Conceptions about your Main Dream and essential need — should become the fundamental support in stabilization of your internal state, which has determined qualitative «parameters» of all your creative activity and overshadowed all other conditions of your «current» Existence. In accordance with the Resonational Principle, the very fact of availability of this steady state in your FD will be the safe Mechanism of intensive amitsiration of your Focus of Close Attention to increasingly ampliative scenarios of your simultaneous different-Qualitative Existence, which capabilities correspond to the most complete realization of your lluvvumic Interests.

4.0398. On the same Principle, the accelerated transcommunicational quantum dispersities are multipolarizationally accomplished via FD of any person not only in the Direction of deepening to the lluvvumic birvulyarity type, but also in all multitude of different-protoformal development Directions, which are diffuzgent concerning the given Synthesis Scheme: instead of lluvvumic signs, the Conceptions peculiar to the most depliative (on each of the Directions) levels of Collective Intelligences of one or another Proto-Form are being put sequentially and motivationally, increasingly richer and profoundly to the basis of Focus Dynamics of Form-Creators of NUU-VVU-Self-Consciousnesses Forms.

4.0399. This process can be accomplished for the person completely insensibly, since gradual substitution of lluvvumic SFUURMM-Forms on the protoformal analogs more or less corresponding to them comes through multiple interstitial stages of inter-Qualitative Synthesis. As the result, not only life values criteria and existence priorities begin to change noticeably, but also psycho-mental characteristics of the person him/herself: his/her trends, tastes, habits, and so on, right up to explicit and striking appearance changes. In the next section, we will talk in detail about which physiological mutations are caused by this process.

# SECTION XIV

## *The Universe is the result of focal realization of SFUURMM-Forms of Self-Consciousness of DDIIUYYI-Entity*

### **Chapter 1. Three main constituent parts of Energy-Plasma forming Focus Dynamics of Form-Creators**

4.0400. There is the expression in philosophy and esotericism, «Universe is a thought.» From the Iissidiology viewpoint this expression is not quite accurate. In order to avoid possible mistakes in further discourse as well as to increase ampliativeness of your Conceptions about the Universe, we should redefine the Meaning of that popular expression. First, you should *not* understand here by the world Universe all the multi-level (multi-dimensional) structure of exhibition of slloogrent Form-Creators' Focus Dynamics of DDIIUYYI-Entity's Self-Consciousness, but only those from different-qualitative Levels of its holochrone-simultaneous Creative Activity that are initiated to manifestation through subjective Perception systems by Form-Creators' Focus Dynamics of our mixtum NUU-VVU-Form-Types. You already know: What we are capable to see or otherwise to perceive with the help of our sensory receptors and functional devices constructed on their basis represents only very fragmented, extremely inauthentic, and surficial information about our surrounding reality, extremely distorted by limited realizational possibilities of bio-Creators of our biological NUU-VVU-Forms' brain.

4.0401. Furthermore, using regular for you term «Thought,» you should deeply realize and imagine the whole constructive difficulty and endless abstractiveness of that notion, which slloogrent Nature and multiplex functions are quite simplistically associated, yet, only with biochemical reactions and electrical impulses, carried out between brain neurons. However, Thoughts of different Self-Consciousnesses Forms are constructed on very different energy-informational basis that lets them in some conditions to have high compatibility among each other, and in other conditions not to have practically any possibilities to interact with each other at least somehow.

4.0402. Difficulty of the detailed consideration of that notion escalates for in your subjective Perception all Conceptions about Thought come down to peculiarities of realization of all possible mental, cogitative processes, while habitually you identify the whole range of emotional aspects of your life creativity with Feelings and Desires. Such subjective division of integral mental process is determined by the specifics of organization and realization of typical for humans mental and emotional reactions. In so doing, the expression «Universe is a Thought» looks rather absurd for those who study Iissidiology, so they might have a question immediately, «Why is it only Thought that participates in the process of Universe formation? What part does Feeling play in such case?»

4.0403. Answer here is univalent: Neither Thought nor Feeling, as you can imagine them to yourself, are independent and autonomic instruments of our life creativity organization; they always functionally complete and creatively initiate each other, jointly manifesting themselves in any part of realizational process. They both are fundamental components of any SFUURMM-Form that is being synthesized in FD of every human (or any other Self-Consciousnesses Forms including doolls, flaks, and others) on the basis of invaderentness of attributes of two OO-UU-Entities: ALL-Love–ALL-Wisdom (feeling component of Energy-Plasma) and ALL-Will-of-ALL-Intelligence (mental component of Energy-Plasma). Let me point out in particular that in principles of other Synthesis Schemes realizations there might be other combinations, for example:

- ALL-Love–ALL-Wisdom + ALL-Primordiality–ALL-Initiality,
- ALL-Will-of-ALL-Intelligence + ALL-Integrity,
- ALL-Essentiality–ALL-Permeability + ALL-Mobility–ALL-Presence,
- ALL-Voidness–ALL-Fullness + ALL-Knowledge–ALL-Informedness,
- ALL-Voidness–ALL-Vacuumness + ALL-Aspiration,
- ALL-Unity + ALL-Steadiness–ALL-Stability.

4.0404. Moreover, in the moment of direct exhiberation of conditionally astropasmic attributes there always exists a possibility for the certain mental Aspects realization through them. And vice versa, through the specifics of conditionally mental attributes interactions — in the corresponding modes and FDs — there can appear potentially (slloogrently) peculiar to them conditionally astral Aspects of PCQs. Thus, in the Macrocosmos skrruullerrt system, subjectively for us, there is an uncountable multitude of a CCI's Form-systems, whose FD is totally based on «strictly astropasmic» or «strictly mentoplasmic» attributes. For example:

- ALL-Love–ALL-Wisdom + ALL-Integrity
- ALL-Essentiality–ALL-Permeability + -ALL-Voidness–ALL-Fullness
- ALL-Voidness–ALL-Vacuumness + ALL-Unity;

as well as

- ALL-Will-of-ALL-Intelligence + ALL-Primordially-ALL-Initiality,
- ALL-Mobility-ALL-Presence + ALL-Knowledge-ALL-Informedness,
- ALL-Aspiration + ALL-Steadiness-ALL-Stability.

4.0405. Therefore, we are able to judge about any mental and vital attributes revealed through any Proto-Forms' Focus Dynamics (actions, reactions, appearance) only from the viewpoint of our own, very subjective Conceptions about these processes, which are peculiar only to our *human* FD (and in fact, we can judge only about synthetic Process *alone!*). Through specific Focus Dynamics of other Self-Consciousnesses Forms' bio-Creators the processes of «thinking» and «feeling» can be realized in a completely different way, as a result of which each of them can be perceived by people as qualitative opposition to our Conceptions about mentality and vitality (for example, researchers can subjectively identify narrow-specific «feeling-emotional» reactions of minerals or plants with certain attributes of mentality, and vice versa). In the other way (in the presence of high cruvursorrtness of our and their Synthesis Scheme), in overall, people can perceive their realizational manifestations, completely incomprehensible to us, as an absence of any psycho-mental activity (in that case, people are inclined to treat such SFs as «inanimate objects,» which properties and characteristics bear no relationship with very subjective «human» characteristics of «living being» — of so-called «animated nature»).

4.0406. From the viewpoint of our «present» limited Conceptions, Feelings (including corresponding to them contextual reactions, emotions, and moods) represent all those irrational subjective sensations and emotions (in relation to some external and internal influences, factors, events, and phenomena), which compose an affective sphere of *human* life creativity and are realized with the participation of basic Perception centers (visual, hearing, tactual, odor, and taste sense, intuition). Alternatively stated, *sensibility* is a psychically expressed form of qualitative reflection in our surrounding reality of that empiric Experience which is already synthesized (according to peculiar only to people VVU-Factor) through subterransive peculiarities of human Perception systems with predominance in FD of ALL-Love-ALL-Wisdom PCQ's attributes over ALL-Will-of-ALL-Intelligence PCQ's attributes.

4.0407. One of the most characteristic peculiarities of any feeling is its *ambivalence*<sup>3</sup>. Affective ambivalence demonstrates inner conflict between the possibility of simultaneous realization through FD of the same «person» of several qualitatively incommensurable motives. That peculiarity lets extremely contradictory (dual) psychical states in an ungraspable way intermix and combine replacing each other in one and the same feeling (for example, so-called «feeling of love» as a sexual realization can be accompanied in turn by happiness, despair, jealousy proceeding to hatred, envy — all that is simultaneously manifested towards one and the same person). Z. Freud describes destruction and sexual instincts interactions in a following way, «Both of these instincts go separately seldom (probably, even never); they are fused into various changeable and disordered combinations, and therefore unrecognizable for our sight.» Classical example for that is Oedipus complex.

3 From Latin *ambo* – “both” and *valentia* – “force”; ambiguity of feelings, double character, inconstancy, through which psychic inclinations and attitudes towards the same object oppose to each other concurrently

4.0408. Our «current» definition of Thought is equally limited and deeply connected to our Synthesis Scheme. In our human understanding, Thought is the main characteristic of mental process, based, first of all, on logical-analytic properties of left hemisphere Form-Creators, which functions we typify in our Conceptions with subjective characteristics of mind, intellect, and in general cogitative process (PCQ ALL-Will-of-ALL-Intelligence). Thought is referred to everything that is organized in informational space of our Self-Consciousness with the help of all possible mental processes: different views and beliefs, notions and judgments, observations and presumptions, conclusions and intentions, reflections and hypotheses. Their subterraneous Meaning and content might be realized in our Imagination with the help of definite visual images (schemes, diagrams, tables, mathematical formulas, pictures, photos, and so on), sounds, word combination, written or outspoken subjective arguments, assumptions, theories, and teachings.

4.0409. All human Thoughts, realized on the basis of invaderentness of OO-UU-signs of ALL-Will-of-ALL-Intelligence as well as Feelings, initiated in FD by OO-UU-attributes of ALL-Love–ALL-Wisdom, possess volitional and intellectual ambivalence. For example, the volitional ambivalence means that a «person» might want different things equally (to sleep, to work, to walk, to eat, to obtain something, and so on) and at the same time not want that (the same thing). The intellectual one often lets a «person» express something in public or convince others in something that contradicts his/her own beliefs. Eugen Bleuler who introduced the notion of ambivalence in psychiatry implied by that a simultaneous originating and coexistence of thoughts and statement of opposite character.

4.0410. Any type of ambivalence appears in a «person's» FD due to simultaneous availability in his/her Self-Consciousness's informational space of multiple different-Qualitative «projections» from different spectrums of the general Focus multipolarization, representing essential realizational interests of multiple particular «personalized» Interpretations, exhibited not only in different «parts» of the given STCs' group but also in completely different exhiberational groups of CSRs. They create conditions for manifestation of all possible types of ambivalence, resonationally influencing by their subterraneous «regimes» the character and qualitative intensity of simultaneous manifestation of Focus Dynamics of each other.

4.0411. We divide our psychisms very subjectively into the process of «thinking» and «feeling» depending on the degree of interaction between each other of all possible attributes of the lluuvvumic invaderental pair (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) and also on the degree of compatibility of the formed on their basis karmonations with the attributes representing catalyzing background (10 remaining OO-UU-Entities) and providing necessary conditions for the realization of the general Synthesis process in Form-Creators' FDs of our NUU-VVU-Form-Types. Any of us, as well as all the rest Self-Consciousnesses Forms — from fermions to cosmic Entities, — always stay in that constant process, which is fundamental for all our different-Qualitative-multipolarizational amitsirations.

4.0412. If it seems to us that our brain is in the state of relative peace («not-thinking» and «not-feeling,» wu-wei, Samadhi, satori, and similar), it only indicates that you shifted your FD to the activity spectrum of that ODS's or FLC's part, which SFUURMM-Forms are either highly impersept or cruvursorrt in their qualitative state in relation to the qualitative state of SFUURMM-Forms active

in our «current» NUU-VVU-Form-Type's FD. On the other side, it indicates that your FD is quite balanced in those resopasons of its «current» exhiberation which are reflecting mostly — in the given conscious moment! — a definite Meaning of realized by us creative Interest. These non-typical (altered) states of Form-Creators' FDs of our personalized Self-Consciousness are characterized by the least (for the given f-Configuration) tensorness between SFUURMM-Forms of invaderental or some vecsative attributes, thereby, reflecting a definite balance state of lluuvvumic Form-Creators' FDs in relation to interconnections of some specific protoformal Direction.

4.0413. Usually, high level of your unawareness in the «current moment» (that is control absence, incomprehension of cause and reason of your actions) basically indicates that in the given moment your FD is being intensively structured by SFUURMM-Forms of some protoformal development Direction (though, there are «unpackings» variations of ampliative Collective Subconsciousness or Supraconsciousness SFUURMM-Forms, whose Meaning is not adjusted to the Experience of your «current» SF, but those are exceptional cases). In such moments your brain's bio-Creators, while continuing to perceive (through axo-dendritic system) various Information from the surrounding reality, turn out to be incapable to decode it and to kleks by the typical of people VVU-Factor (due to the absence in your personal subterransive ODS of SFUURMM-Forms of corresponding Experience), which is usually characterized by perfunctory and reflector psychical states, involuntariness in actions and choices, including various types of psychical automatism (ideational-associative, senestopathic, and motor-kinesthetic).

4.0414. When we speak about the specificity of subterransive process of consistent unpacking (decoding, analysis) and kleksing (adaptation, alteration) in our mixtum NUU-VVU-Form-Types' Focus Dynamics of various Information (SFUURMM-Forms) slloogrently structuring our surrounding reality, at that we particularly mean the activity of lluuvvumic birvulyarity type Form-Creators, which provide realizational functions of the most active (in the «current» moment) Levels of our personalized Self-Consciousness and Collective Subconsciousness (in very few cases — Supraconsciousness). At the core of their never-ceasing synthetic creativity, there is resonational selection from slloogrent Focus Dynamics and selective implementation in their amitsirational process of only those ethereal interconnection which one way or another contain the characteristic lluuvvumic criterion — subjective VVU-Factor.

4.0415. On the basis of similar activity, these Form-Creators structure their FDs with all possible *human* subjective Conceptions, which Meaning we have the possibility to perceive and to interpret more or less. Forms of their direct realization in the conditions of the given dimensional diapason serve invaderental (according to lluuvvumic criteria) genic DNA Form-Creators, which specifically (corresponding to LLUU-VVU-Scheme) direct and organize functions of important brain parts such as cerebral cortex, mesolobus, thalamus, hypothalamus, hypophysis, epiphyses, hippocampus, amygdala, and others. The basic realization form (way) of all the variety of human SFUURMM-Forms through human Perception system is the electric impulses that provide informative-transmission functions from brain neurons into cells' bioelectrical potential of all the tissues and organs. However, let me repeat that those nutations types slloogrently structured not only by VVU-attributes but also by other Factors typical of Form-Creators' FDs of all many Self-Consciousnesses Forms of other birvulyarity types simultaneously exhiberated in the given dimensional diapason.

4.0416. Following Diffuzgentness Principle, purposeful amplificational functionality of lluuvvumic Form-Creators' FDs is «materially» provided by the availability and narrow-specific activity of the countless multitude of different-birvulyart Synthesis Schemes bio-Creators, which alone with their creative realization actively form, execute, and support all the vital processes of our biological organism. «Unpackings» typical of their Focus Dynamics qualitatively very strongly differ by its informational content from lluuvvumic Form-Creators «unpackings» and compose the basis of that human Self-Consciousness part which we conditionally relate with the Levels of so-called Collective unconsciousness.

4.0417. Especially important role in the execution of that exhiberational function belongs to bio-Creators of so-called reticular formation of the brain stem (but you should not forget that in addition to them brain ascending activating system also includes Form-Creators of non-specific Thalamic nuclei, posterior hypothalamus, limbic structures). Formed by them biomaterial s-Reality represents a combination of Self-Consciousnesses Forms of certain cells, cell clusters, and neurofibers of the brain stem (oblongata, Pons Varoli, mesencephalon and intermediate brain), which are located throughout it and also in the central parts of the spinal cord. Neurons of reticular formation have highly branched dendrites and oblong axons. It generalizes and summarizes Information from the majority of afferent ways of pallium (collaterals of corticospinal tracts), from cerebellum, and other structures including collateral filaments, which pass along brain stem and sensor fibers (visual, acoustic, olfactic, tactile, and so on) and end with synapses on neural Form-Creators of reticular formations.

4.0418. Due to so complex organization, the general function of these Form-Creators consists in combining those heterogeneous influences, multipolarized into different-protoformal Directions, which are simultaneously transferred by bio-Creators of various brain structures, and also in the capability to influence on them — that is to fulfill integral functions in the activity of central nervous system's (CNS) Form-Creators, considerably determining the general qualitative Level of their activity and realizational directness of the general FD of the given «person.» Thus, bio-Creators of reticular formation continuously register information (SFUURMM-Forms), simultaneously translated through realizational FDs of bio-Creators of all sensory receptors, inner and other organs, subjectively evaluate them infiltrating by VVU-Factor, and transmit the information further into bio-Creators FD of limbic system and cerebral cortex.

4.0419. These are reticular formation's bio-Creators who constantly regulate the excitability degree and bio-Creators' Creative Activity realizational levels of various CNS divisions (including cerebral cortex), in so doing, acting a very important part not only in the process of every moment formation of psycho-mental characteristics of our personalized Self-Consciousness Form-Creators' FD (the Perception system state in general: thinking intensity, sensibility, sleep and wake timing, vegetative functions, somatic reflectory performance regulation — all possible target oriented movements, diffusive non-specific, descending and ascending influence on other brain structures, and so on) but also in the narrow-specific for every NUU-VVU-Form-Type mechanisms of bio-Creators' integral reactions formation of the biological organism. In their turn, these Form-Creators are a part of more global integral brain systems including hypothalamic-limbic and neocortical structures Form-Creators, which participate in the formation of reasonability and behavior character of each «person» and also in the formation of the specific protoformal focus of Self-Consciousness Form-Creators' FDs on the organism adaptation for the changing conditions of outside and inside environment.

4.0420. Reticular formation's bio-Creators functions are very closely connected with functional particularities of so-called brain *claustrum* — very thin and variable in its form and size «septa» or «claustra» formed by grey cells. That tiny «claustra» is located inside white matter under the cerebral cortex inner part. It has very wide interconnections with multiple brain structures. Claustrum bio-Creators provide functional interconnections between all CNS and autonomic nervous system divisions; thereby, we have the possibility to carry out various movements, behavior reflexes, body orientation responses, and many others. Our physical existence would be simply impossible without that.

4.0421. However, they are capable to ensure all that reliably only in the case of their *spatiumal* resonational interaction with ASTTMAY-RAA-A-Parvulas' Info-Creators — ODS and FLC specific ethereal constructions, which informational content (SFUURMM-Forms, UU-VVU-conglomerates) represent all the subterransive empiric Existence Experience of the given human «person» in his/her peculiar rotational Cycle. The latter is energy-informationally structured by the multitude of consistently chosen by him/her (in the moment of each revitalization act) development scenario. Various religious confessions and esoteric conceptions very primitively and restrictively interpret ASTTMAY-RAA-A-Parvula of every «person» as a «human soul.»

4.0422. Omitting multiple specific nuances, whereof you will learn in detail from the fifth volume of Iissiidiology Fundamentals, let me only mention that the natural result of ethereal interconnection between claustrum bio-Creators Focuses of Close Attention and Info-Creators' Focuses of Dual Reflection is some criterion of «personal» awareness of «own self» and his/her «actions.» Every Form possesses the abilities to realize its subterransive life creativity. Those abilities are provided by its Self-Consciousness functions, which are activated in the STCs conditions via coordinated activity of all bio-Creators of the brain and biological organism systems. If that spatiumal part is temporarily interrupted (or ceases entirely) by some reasons, a «person» instantly falls in the unconscious state (or «dies,» falls into coma, lethargic sleep, and so on).

4.0423. In parallel with bio-Creators of claustrums' Self-Consciousnesses Forms of either cerebral hemispheres, ASTTMAY-RAA-A-Parvula's Info-Creators spatiumally set (in the form of directed electrical impulse) energy-informational interconnection with Self-Consciousnesses Forms' bio-Creators both of reticular formation of pons cerebelli and brainstem. While the first «include» Self-Consciousness functions, the second receive from Parvula's Info-Creators certain sensor signals and fulfil the function of some kind of a filter transmitting further (into neuronal brain net) only that VVU-Information part which is new and unusual for the given «person.» Constant connection with hippocampus bio-Creators — specific «keepers» of short-term and long-term memory — helps them to orientate in continuous informational flows.

4.0424. Here I would like to warn you from a completely false Insight that activation or slowdown of *human Self-Consciousness*<sup>4</sup> functions fully depends only on the activity of bio-Creators of the two considered by us brain hemispheres. Of course, this is absolutely wrong! It would be just not possible to fulfil various creative functions, which we used to associate with such phenomena as Self-

4 You should take into account that there are neither cerebral cortex, nor claustrum, nor reticulum in the brain of multiple intellectually developed Proto-Forms.

Consciousness and Intelligence, without parallel brain (and organism in general) mechanisms for the performance of other multiple functions, for example: ability to remember events, people, objects (so-called «memory») and their reconstitution, logical comparing, analysis, ability to psychical reaction (emotionality, sensibility), and so on.

4.0425. Formation of Self-Consciousness phenomenon simultaneously engages multiple functional organism systems, structured by huge ensembles of all possible types of cells, part of which are combined in a particular way, synchronously interacting between each other, in order to fulfill a certain task, while other cells functionally participating in solving the same tasks take place in various brain structures. In so doing, only one cell sector of the given functional system in every brain hemisphere directly participates in problem-solving, while bio-Creators of the rest cellular Self-Consciousnesses Forms synchronically participate in other processes.

4.0426. Claustrum and reticulum bio-Creators, having centralized Energy-informational «entrances» from the most cerebral cortex zones, acquire a possibility to control and to coordinate functions and reactions of Self-Consciousnesses Forms' bio-Creators of multiple other functional system according to those realizational tasks and plans which they *purposely* «filter off» (strictly corresponding to energy-informational parameters of VLOOOMOOT-Configuration of the given «person!») out of ethereal content of ASTTMAY-RAA-A-Parvula. If some of the outside (in the environment) or inside (in the organism itself) influences do not accord in some way (for example, due to VLOOOMOOT inconsistencies) with SFUURMM-Forms accepted by them, they immediately interfere into functioning of necessary functional systems bio-Creators or just deprive them of possibility to interact in the given direction.

4.0427. It is important to note that one of the basic signs of functions violation of human claustrum and reticular formation bio-Creators is the «loss of consciousness» state. It happens after receiving head injuries, at cerebrovascular disease, tumors, and various infectious processes originating in the brainstem. Faint duration depends on the character and intensity of function violation of reticular activating system bio-Creators and can vary from several seconds to many months and even years. Disfunction in integrative reticular processes can also express itself in liveliness decrease, constant sleep drunkenness, restless night sleep, or frequent falling asleep assaults (paroxysmal hypersomnia). Besides, there can be observed an increased state of muscular tonus, various vegetative changes, emotional-psychical disorders, and other pathological attributes.

4.0428. Let me remind again: Claustrum and reticulum bio-Creators functions can be compared with the functions of a certain «*intra-birvulyart* filter,» which allows important for the organism sensor signals to activate in the necessary Direction the realizational activity of Form-Creators of cerebral cortex not distracting in so doing at the usual, repeated, or just eggeroliftively not formatted by them (i. e. — not-lluuvvumic) signals. These are they who provide — ambiguously with bio-Creators of other functional systems! — via peculiar only to them way (as if «adsorbing» from electrical impulses the SFUURMM-Forms part which is not structured by characteristic VVU-Factor) both the process of our exuberation in various conditions of surrounding reality and all the «material part» of amitsirational process of invaderental Form-Creators of mixtum NUU-VVU-Form-Types — functionality of somatic and autonomic parts of central neural system of every «person.»

4.0429. However, sometimes — by different reasons — *available* VVU-Information, generated into Perception system by means of electrical neural impulses and necessary for securing active psycho-mental process, is insufficient in quantity, while SFUURMM-Forms structured by other Factors are «unpacked» by bio-Creators in such volume which is sufficient for survival of the whole biological organism. This circumstance induces in the reactions of brain bio-Creators a certain degree of «passivity,» weak productivity of carried out by them functions of «current» *awareness*.

4.0430. It can evoke in a «person» states such as loss of consciousness, «consternation» or stupor (catatonic, depressive, reactive, and other), an apoplectic seizure (hemorrhagic stroke), collapse (acute vasodepression), coma (central nervous system affliction of various etiology with the loss of active Self-Consciousness functions), and so on. In addition, such functional low-productivity of various bio-Creators can appear, when a personalized Self-Consciousness's FD is «projected,» as a result of hypnogeny or some spiritual practice (for example, profound Meditation), into activity spectrum of highly ampliative (flaks, vuolds) SFUURMM-Forms of lluuvvumic birvulyarity type (collective Subconsciousness, Supraconsciousness) — brain bio-Creators of the given NUU-VVU-Form-Type turn out to be just functionally (biochemically) not ready to perform such «unpackings» and resonational kleksing. It can be compared with the state when you are attentively looking through a book in an unknown language vainly trying to grasp its content. However, in order to read at least a word, you should learn that language.

4.0431. In such exceptional cases, when decoding abilities of bio-Creators sharply decrease or are fully ignored by Form-Creators of the central neural system, it may *seem* to you that you think nothing and feel nothing (including physical pain). Herewith, your mental and physical reactions (in your personalistic Worlds and scenarios of people around you) are capable to decrease in fact to zero (for example, in coma, hemorrhagic stroke).

4.0432. However, of course, it is not so, because we are never out-of-process of thinking and feeling, which are the functional basis of our continuous synthetic amitsirations. Every Thought, appearing in FD, creates in Perception system of a «person» a specific (by association stimulated by its meaning) feeling, a certain subjective emotional state, which powerfully influences the character of the following choice. Corresponding part of ethereal ODS's content (or FLC's), resonationally initiated by Form-Creators' Focus Dynamics in «personal» Self-Consciousness, is «unpacked» in axo-dendritic system of neural bio-Creators in the form of a particular set of electrical signals and is transmitted to bio-Creators of particular emotional centers of limbic system (amygdala, hippocampus, hypothalamus, callosal gyrus) for analysis and decision-making.

4.0433. Hypothalamus Form-Creators continuously build very close focal-ethereal interconnections with bio-Creators of sensory system and constantly get from them multiple different signals both about environment condition and about internal processes inside the organism. According to their functional possibilities (which are conditioned by subterransive NNAASSMM and VLOOOMOOT peculiarities of the given Self-Consciousness Form), they kleks the received electrical impulses flow by the specific UU-Factor, typical of *their* Self-Consciousnesses Forms, analyze, compare its interconnections with the possibilities of the given Synthesis Scheme, and immediately transmit the results of their collective analysis into endocrine system command center — specific spectrum

of hypophysis Form-Creators' FDs, which enable necessary in every specific case bio-Creators of endocrine system for activation of specific hormones' Self-Consciousnesses Forms in the necessary organism processes and (corresponding to the available Experience) formation of specific SFUURMM-Forms of Motivations (behavior models, psychic reactions).

4.0434. Thus, ALL-Will-of-ALL-Intelligence OO-UU-attributes (invaderental for our Synthesis Scheme) are narrow-specifically «unpacked» and kleksed (interpreted) by neuron bio-Creators — being «projected» through the multitude of different functional limbic system bio-Creators' FDs; they are synthesized with the same invaderental ALL-Love–ALL-Wisdom OO-UU-attributes and are transformed into various psychic reactions (mental-feeling) demonstrated by us. These bio-Creators have very close interconnection with Form-Creators of reward center (nucleus accumbens, some hippocampus and hypothalamus structures, as well as frontal lobes of cerebral cortex). Exactly they motivate a «person» to perform the behavior model, which they are able to form (program) electrically and biochemically for it in every specific case, coming out of own realizational possibilities and already synthesized by them Conceptions about value and reasonability.

4.0435. As it was already observed, all the ethereal content, structuring informational space of all ODS and FLC-analogs diversity of the Tertiary Illusion, can be conditionally divided into three components: *emanations* (ethereal Information of mental character represented by mentoplasmic Info-Creators), *psychonations* (ethereal Information of vital character, represented by astropasmic Info-Creators), and *karmonations* (interstitial results of covallert interactions between emanations and psychonations through Focuses of Dual Reflection or Universal Multipolarizational Impulses). By their slloogrent ethereal Configurations these informational particles represent absolutely all the types of interconnections which can be executed only among heterogeneous attributes of all the twelve OO-UU-Entities through Form-Creators' Focus Dynamics of the given exhiberation megadiapason (to 12–14 dimension).

4.0436. Outside Focus Dynamics (which is simple impossible!) they do not to exist seemingly, because they all «stay» in their special spatiumal state of informationally indefinite point of singularity, holochronely initiated into all possible Space-Time conditions only through exhiberational functions of Form-Creators' Focus Dynamics. Resonationally initiated and simultaneously «projected» into Focus Dynamics of Form-Creators of 3–4-dimensional diapason, covallert combinations of ODSs' and FLCs' emanations and psychonations (in the form of karmonations of aggregated SFUURMM-Forms and UU-VVU-conglomerates) are transmuted at once (holochronely!) under the influence of Energy-Potential of Form-Creators' Focus Dynamics into corresponding to them (by resonance) parts of Creators-FORMOIDS' f-Configurations of the given skrruullerrt system. Once it happens (within the amitsiration process), SFUURMM-Forms or formed by them UU-VVU-conglomerates obtain electro-magnetic wave properties<sup>5</sup>, which provide Creators-FORMOIDS with simultaneous realization of all possible quantum interactions in various STCs' groups of the given dimensional diapason.

5 In physical science, such property is subjectively interpreted as absorption, diffusion, deflection, reflection, interference phenomenon, diffraction, polarization, and in Iissidiology – as “projection,” kleksing, Resonationness, slloogrentness, diffuzgentness, multipolarizationness.

4.0437. Thus, physical nature of *holistically* (that is *virtually indivisible*) carried out phenomenon is the same — wave, boson, but we subjectively perceive and interpret it separately in two ways as a «Thought» or as a «Feeling.» Therefore, if the carriers of mental-feeling attributes (SFUURMM-Forms) have a higher Potential of realizational Energy of resonationally corresponding to them Focus Dynamics, their exuberation process in the form of various elements (psychic and mental efforts, accomplished mechanical work, new Self-Consciousnesses Forms, objects, and so on), which simultaneously structure various types of subjective Realities, is carried out more easily and effectively.

4.0438. If we proceeded to consider thoroughly functional peculiarities and properties of various Form-structures of Fields Consciousnesses' Plan-Overtone, we should note one more time that focal simultaneous realization of multiple different CCIs in all possible exuberation conditions (dimensions) would be impossible. The reason would be the deepest multipolarizational Synthesis of heterogeneous Energy-Plasmic SFUURMM-Forms (which we subjectively divide according to our attributes combination into two categories — «Thoughts» and «Feelings»), which would not originate at every fact of focal interaction between Form- and Info-Creators — through cause-effect interconnections — extsederic IYISS-State of KARMO-Plasma (FLUUFFLUUYF Plasmic Forces Diapason). It reflects these cause-effect interconnections amidst absolutely all karmonations and is the Main Driving Motive in the endless convergent amitsiration of CCIs' Self-Consciousnesses Forms' Focus Dynamics of all exuberation Levels from consummative into primogenitive SSS-State.

4.0439. Organizational and functional Principles of Self-Consciousnesses Forms exuberation Mechanism in any Level of Physical Plan-Overtone (Plasma-Form — from 12.0 to 9.0 dimension, Form-Plasma — from 9.0 to 6.0 dimension, Plasma-Matter — from 6.0 to 4.0 dimension, Form-Matter — from 4.0 to 0.0 dimension) inevitably provoke holochrome formation in the given megadiapason of focal-ethereal interconnections, typical of the given Universal Cosmic KARMO-Form (*intra-universal Karma* — OOSLLLOOLLS). Specifically reflected in the slloogrentness of Focus Dynamics of all beings of less synthesized Levels, these interconnections are actively realized in practice of simultaneous Existence of endless multitude of different-Qualitative Self-Consciousnesses Forms and CCIs in the form of all the multitude of subterraneous types of causal relations:

- inter-galactic (*inter-galactic Karma* — VOOGLOYSRR),
- inter-stellar (*inter-stellar Karma* — TULSVARAFFS),
- inter-planetary (*inter-planetary Karma* — AFKALDUUFR),
- inter-protoformal (*intra-planetary Karma structured with the multitude of diffuzgent types of birvulyarity* — GROUFFGRALLF),
- intra-protoformal (intragroup and interspecies *Karma within various Synthesis Schemes of one birvulyarity type* — KHLUURLLARKH),
- inter-formtype (inter-personal Karma inside one human Stereo-Form — GDOUKKLOFT),
- intra-formtype (personal Karma between all possible Form-Creators of one *NUU-VVU-Form-Type* — IYFLUURSS).

4.0440. In order to shift subterraneous amission process from causal Entities of one type into their more universal types, for example, from IYFLUURSS into GDOUKKLOFT, it is necessary to be able to focus your Focus of Close Attention (or FIMI) in those «parts» of slloogrent Stereo-Form's f-Configuration, whose interconnections are the most harmonized and balanced with all the multitude of the rest NUU-VVU-Form-Types' f-Configurations, representing in the given exhibition regime all the multitude of different-protoformal development Directions. In other words, we should generate such degree of tolerance that will allow us to Understand (not to create tensors, to criticize, and to treat with justice) cause-effect motivational basis of psychical states, choices, and actions of absolutely all surrounding you people and also see (constructively and intuitively perceive) causal bases of all the observed circumstances, events, and phenomena.

4.0441. It can be achieved only if you rely on more universal amplificational Knowledge so that you can consequently synthesize all your «current» argllaamunic-inglimilissal tensors and purposefully reorientate subterraneous process of your own amission just into more and more ampliative NUU-VVU-Form-Types, which do structure via their FDs simultaneously the development scenarios the most favorable for people. Having learned to balance easily your relationships with any human, no matter how depliative their reactions and realizations would be, you can find rather confidently common ground with representatives of different Proto-Forms without entering with them even into short-term conflict relations.

4.0442. Let me assure you that in that question no one can figure out without the deepest Understanding of Iissidiology that explains the true Essence of multiple subjective interconnections and objective circumstances. Only with the help of this Knowledge you can annihilate radically and maximally effectively in your Self-Consciousness all the Levels of personal and inter-personal Karma in order to amission consciously and purposefully into even more amplificational exhibition modes.

4.0443. We should also notice that all different-protoformal Form-Creators' Focus Dynamics, simultaneously structuring realization-multipolarizational orientation of slloogrent IYFLUURSS-Entity's FD, are formed not only through creative abilities and needs of one «personalized» Interpretation, but through quite a huge group of different-Qualitative «persons» (Form-Types), exhibited in multiple parallel development scenarios, which form not only different STCs' groups but also different duvuyllerrt groups of human CSRs. Mixtum analogs of NUU-VVU-Forms have their «own» types of Focus Dynamics of wave causal IYFLUURSS-Entity, so do transparentive human (*simplisparentive*), and dimidiomittense Forms, which get diffuzgently transformex (transmuted) into FDs of all possible versions of flaks human KHLUURLLARKH-Entity (both of translucense, dimidioclarus, and *superparentive*), vuolds (of both luminosal and *superparentive*) Entity, and so on.

4.0444. Simultaneously with that global cosmic Process carried out among people in different exhibition modes, in Self-Consciousness structures (in their FDs) of certain groups of NUU-VVU-Form-Types (as opposed to the specific realizational tendencies of *different-protoformal* causal Entities), the Creativity is activated of human GDOUKKLOFT-Entities, which possess corresponding f-Configurations of specific inter-Qualitative combinations typical of exclusively representatives of lluuvvumic birvularity types. Let me remind that any Self-Consciousnesses Forms, representing

various types of causal relations and manifested in Space-Time via typical of them Focus Dynamics, are interpreted by us as subjective Entities (meaning, «which exist» and specifically perceive «themselves» on the basis of joint simultaneous creativity of multiple different-Protoformal Form-Creators).

4.0445. Duvuyllerrt groups of GDOUKKLOFT-Entities of all people (out of the multitude of Time Flows), joint via their motivated Creative Activity into more stable CCI's Focus Dynamics of multiple *humanoid KHLUURLLARKH*-Entities, compose, in their turn, all the variety of realizational Form-Types, through which activity all Collective Cosmic Intelligences creatively self-express composing GROUFFGRALLF-Entity (Planetary Karma between representatives of absolutely all birvularity types, simultaneously exhibited in different conditions of the given Planetary Entity's FD).

4.0446. As you can see, not a single CCI Existence Form — from the Universe to a Planet, a human, or a microorganism — is capable to manifest own Focus Dynamics (i. e. for self-conscious inertial Existence) without *profectively* peculiar only to its *causal informational constituent*, which is the main *cause-effect* basis not only for every «current» moment of its subterraneous exhibition, but also an Energy-informational basis for the manifestation and reflection through its FD of creative interconnections of absolutely all heterogeneous Self-Consciousnesses Forms, simultaneously realized in any functional Level of Macrocosmos's skrruullerrt system.

4.0447. Out of that you should draw a conclusion extremely important for all your Existence: Any of your creative interactions both with homologous or particular «parts of yourself» (i. e. with «personalized» Interpretations of your Stereo-Form) and with any Self-Consciousness Form of your surrounding reality, which you perceive as subjective or accidental, by the holochrone organization Principle of all Macrocosmos's focal-ethereal interconnections, has transcendental objective ground and represents in perceived by you «point» of Space-Time a natural consequence of concatenational-convergent realization of your subterraneous amitsiration. Qualitativeness of every moment choices within amitsiration absolutely excludes any other results.

4.0448. Any subjectively observed reaction of surrounding people, animals, plants, microorganisms, and even peculiarities of any natural phenomena (heat and frost, drought and flood, earthquake and fires, storms and hurricanes), as well as pleasant and unpleasant relations with somebody, favorable and dramatic events, good health and certain diseases, manifestation conditions in every scenario, and many-many others, are exclusively *objectively* rooted in the qualitative state (depliativeness or ampliativeness by lluvvumic criteria) of continuously on-going subjective amitsiration process, formed via every moment choices succession of your Self-Consciousness's Form-Creators. There is nobody's credit or fault that you have turned up in the given Space-Time «point» by the present moment except «personally yourself,» consistently and tendentially ignoring a countless multitude of other opportunities provided to you via multipolarizational Focus Dynamics properties.

4.0449. Therefore, there are no and cannot be any «injustice» in your Existence. Someone's praise or hatred, gratitude or envy, pleasant or ugly words, behavior or actions relative to you — these are just resonational reflections of those unstable and qualitatively unbalanced psychic processes which you generate (by yourself — in the form of characteristic SFUURMM-Forms of your subterraneous

reactions, judgments, opinions, preferences, Interests, and others) into your surrounding reality, constantly informationally quantizing and tendentiously correcting qualitative state of its every part via your conscious and, in particular, unconscious mental-feeling creativity (your own Conceptions about «yourself» and surrounding World).

4.0450. You may ask, «Why does precisely unconscious part of your Focus Dynamics play so important role in the transformation of the surrounding reality? After all, conscious state is formed via much more structured and therefore more stable (covallert) interconnections because of their realizational biased nature!» You should search the answer to that question in the specific peculiarities of different-protoformal interconnections, which do form currently perceived by us groups of «human» (yet in quotes!) STCs. More qualitative (ampliative) Focus Dynamics of all Self-Consciousnesses Forms, structuring every protoformal STCs' group, possesses higher abilities of these Form-structures' (STCs) causal interconnections to provide exactly those realizational opportunities which are initiated by the specific criteria of Form-Creators' FDs of the given birvularity type.

4.0451. It happens because any protoformal FD's ampliativeness is defined by highly covallert interconnections orderliness and increased Creative Activity of all the multitude of signs (SFUURMM-Forms) typical of the given birvularity type in the given exhibition conditions. For example, if overall FD of all human representatives *predominantly* reflects in space-time structures of collective subjective Reality around us those elementary attributes typical of the lluuuvvumic development type (high-sensual Intellect + high-intellectual Altruism = immunitant Responsibility + humanitarian Freedom), the realization of precisely Human Interests in human (without inverted commas) STCs' groups will demand much less physical efforts and time (due to the absence of ineffective multidirectional psychical effort in FD and the presence of high-realizational Energy-Potential in its f-Configuration).

4.0452. However, unfortunately, Focus Dynamics of presently initiated mixtum NUU-VVU-Form-Types of the vast majority of people still possess high-birvulyart entropy decoherence, what means impersept (destructive) different-protoformal state of unstable focal-ethereal interconnections. They are simultaneously realized in «personalized» Self-Consciousness through primitive SVUULL-VVU-conglomerates of Collective unconsciousness (i. e. through kleksed fragments of SFUURMM-Forms' «projections» generated in the same Space-Time «points» by multiple Proto-Forms' Focus Dynamics). On the current stage of your development, — from depliative «human» into ampliative Human State — different-protoformal SFUURMM-Forms of Collective unconsciousness, unconsciously initiated and fragmentally formed by you in your life creativity as selfish Interests and negative emotions, *are capable to resonate to much higher degree (and with much higher efficiency!) with the objects of surrounding reality than those LLUU-VVU-criteria (HIA and HSI) which only sometimes (and extremely unstable!) are able to evolve in your FD only in high-minded psycho-spiritual and psycho-intellectual states.*

4.0453. Amitsirational correction of your surrounding reality constantly and unconsciously occurs in full correspondence with these your, yet essential, but extremely imperfect subjective Conceptions about «yourself» and formed by you CSR («enweaved» out of «pieces» of multiple animal, plant, and mineral Proto-Forms' UU-conglomerates!). Since your selfish and aggressive SFUURMM-Forms enter

in powerful opposition with those favorable conditions which are simultaneously typical for FD of the lluuvvumic STCs' groups (and also partly with prioritized development conditions in groups of STCs of other birvulyarity types — of surrounding you animals, plants, and minerals), the circumstances of your «current» Existence period constantly form with very high tensorness. That destruction can be annihilated in the general amitsirational process only in one — the only possible for all people! — way: due to the constant and implacable increasing in human Collective Consciousness's FD of qualitative state and Creative Activity of SFUURMM-Forms peculiar to the lluuvvumic birvulyarity type. That Task of Planet scope is entrusted to Issiidiology.

## Chapter 2. Complex-structured Nature of multiple manifestation of human personality

4.0454. Realizational possibilities of amitsiration Process of any Self-Consciousness Form in its Space-Time modes, being creative (energy-informational) base for all Focus organization and simultaneous exiberation of slloogrent skrruullerrt Macrocosmos system, are based on deep interconnections representing narrowly specific analogs *somewhat* reflecting subjective meaning of our psychical experience (Thoughts, Feelings, Desires) and *somewhat* completely different from them. The presence of such endless variety of all possible realizational SFUURMM-Forms is determined by huge qualitative difference, which distinguishes one Self-Consciousnesses Forms' Perception systems from others. That qualitative difference in functional organization of Form-Creators' FDs implies even if specific FDs of some Self-Consciousnesses Forms provide other Self-Consciousnesses Forms with exiberation Mechanism.

4.0455. For example, the cause-effect Mechanism of Motivation (narrow-specific Thoughts, Feelings, and Desires analogs) formation, carried out in Self-Consciousnesses Forms' FDs of boson-fermion-atomic exiberation conditions, is absolutely inaccessible for our human perception and comprehension type. This is despite the fact that they do structure all the molecular constructions of biological organisms not only of all the multitude of different-protoformal mixtum Self-Consciousnesses Forms but also all the types of biological NUU-VVU-Form-Types, simultaneously focused by us in multiple Time Flows. We explain their excitation states (available for our observation and research) by some spin, mass, and parity characteristics, magnetic dipole properties, electric quadrupole moments, and many other reasons we invent for ourselves in order to explain conveniently and understandably (from our own logic viewpoint!) some facts of such interactions.

4.0456. However, in their basis there lay all the same, peculiar only to their Creativity Levels (boson-fermion!), different-Qualitative Models of certain «psycho-mental» reaction resemblance — typical *analog*s of «our» Thoughts, Feelings, and Desires, which are realized in completely different than «our» (microscopic) conditions of simultaneous exiberation. According to the analysis of realization duration in approximately the same exiberation conditions (for example, on the Earth) of rotational Cycles via various Self-Consciousnesses Forms<sup>6</sup>, we can draw conclusion that realizational creativity

<sup>6</sup> Electron lifetime is more than 1024 years, proton — 1033 years, uranium atom — 6.75 milliard years, radium atom — 2400 years, and periods of some  $\beta$ -radioactive nucleus half-decay may reach up to 1016 years!

of «our» Focus Dynamics types along with FDs of all the multitude of other complex-molecular constructions (microorganisms, minerals, plants, animals, and also Planets, Stars Galaxies, Universe) is not self-sufficient, substantive, and independent, but represents just a certain «part» of realizational spectrum of those synthetic processes which are typical of Self-Consciousnesses Forms of boson-fermion exuberation Levels. Their own different-Qualitative properties and peculiarities (remember Iissidiology axiom «There are no two fermions alike!»), in their turn, expand and deepen creative possibilities of Form-Creators of all the countless multitude of doolls-flaks Self-Consciousnesses Forms.

4.0457. It can be compared with us who having a Form unadapted to many existence conditions (heat, frost, rain, water, air, cosmic spaces) purposefully create for our own creative realizations not only special clothes and footwear, but also all possible devices (cars and planes, ships and submarines, cosmic rockets, and orbital stations) be means of which our cognitive abilities in various spheres of our Life considerably increase and extend. Approximately by the same reasons boson-fermion Self-Consciousnesses Forms' Form-Creators have «build» in various modes of their simultaneous exuberation a countless multitude of various Self-Consciousnesses Forms necessary for their diverse creative manifestation: atoms and molecules, viruses and bacteria, plants and animals, cosmic objects, and so on.

4.0458. Each of these Proto-Forms is «constructed» by *them* in such a way that all heterogeneous Form-Creators could provide *themselves* with absolute Self-cognition process (revelation in various exuberation modes of all the peculiarities and possibilities typical of their OO-UU-Entities) by means of its abilities and specific realization direction (bivulyarity types). Concatenationally-diffuzgently cognizing their properties through various aggregative (less covarllert than original) states and sublimating different-Qualitative Experience of the countless multitude of different-protoformal Self-Consciousnesses Forms; thereby, boson-fermion Form-Creators carry out their own Amplification into Focus Dynamics of more ampliative — flaks — Self-Consciousnesses Forms.

4.0459. In so doing, visually and subjectively perceived by us «immensity» of one way or another aggregated Self-Consciousnesses Forms are not involved in that Self-Cognition process of Form-Creators, since observed by us Forms relative «globality» attributes (perceived by us as high degree of «integrity») or their «microscopicity» (in our Conceptions — higher discretization degree) in peculiar to us exuberation conditions depends on completely different realizational factors (for example, on gravitational and diffuzgent, on the degree of inter-Qualitative and focal compatibility, on the interaction character with surrounding reality conditions including electromagnetism, temperature, pressure, z-ray, and gamma-radiation, and so on).

4.0460. It also means that Self-Consciousnesses Forms (Physical Globes) of Planetary and Stellar Entities are not more complex material structures than fermion and boson Self-Consciousnesses Forms, in which Focus Dynamics flaks component is more active than irkkulligrenic nutational one. There are just results of *joint* realization of Form-Creators of different Synthesis Schemes which are reflected in the given exuberation conditions particularly that way. In various conditions those results would be reflected differently through various bivulyarities types. Therefore, it would be quite inconsiderate to insist that a human amitsirates into the cells of its own organism, and the last

do into molecular combinations. Birvulyarity type as well as certain development conditions, created in STC, are very important in Form-Creators' amitsiration process for every Self-Consciousness Form.

4.0461. All of you know that in *our type of «materiality» molecules of any substance are structured by atoms, and atoms are structured by nucleons (protons and neutrons) and leptons (electrons, muons, and tau-leptons)*. Nucleons and leptons provide formation of all Self-Consciousnesses Forms (matter) on atom-molecular level. Exhiberation of nucleons' SFs, which do form atomic nuclei, is provided by baryon Form-Creators' Focus Dynamics. Form-Creators of meson and baryon SFs ampliatively amitsirate into hadrons SFs after obtaining enough Experience. Having simultaneously performed *absolute* realization as all possible nuclear Self-Consciousnesses Forms (providing functions of atomic SFs), Form-Creators of such nuclear (hadron) Self-Consciousnesses Forms, as proton (consists of two up-quark and one down-quark) and neutron (consists of two down-quark and one up-quark), ampliatively amitsirate into quark SFs.

4.0462. The same regards xi-baryon, which is structured by one up (or one down) and two heavier quarks. Quarks are capable not only to be transmuted into each other but also to be altered into leptons or to form quark-lepton Self-Consciousnesses Forms. Having synthesized in the given exhiberation modes all high-covallert interconnections, quarks amitsirate first into Form-Creators' FDs nutational type (ernilgmanent, permanent, and frazulert photon SCFs) and then into Form-Creators' FDs of even more ampliative for them resonational dimension diapasons (both flaks and doolls diapasons — according to *our Synthesis Scheme!*).

4.0463. You should not forget that «there are no two quarks alike,» and that Focus Dynamics of each of them possesses certain concatenation (tendentious orientation, realization sequence) realizing through peculiar to them birvulyarity types. Therefore, in duvuyllerrt-convergent concatenation of amitsirational process, Form-Creators' Focus Dynamics of one quark «families» amplificate into FDs of nutational — different-protoformal mixtum, bioplasmic, and also transparentive in our Synthesis Scheme (simplisparentive) — Self-Consciousnesses Forms (ulgmkrs, oyldgms, palvfkhts, snirdkhms, doykghmstrs, and others), while the representatives of other quark «families,» through *typical of them* birvulyarity types, get transmuted into FDs of flaks Self-Consciousnesses Forms (falkhats, malsons, klyarions, klastirons, bilurins, kruolons, and others).

4.0464. In other words, we can say that Form-Creators of certain quark «families» (according to peculiar to them resonational criteria) are likely to be performed *to a higher degree* within the given dimensional diapason through SFUURMM-Forms of «some» Duplex-Spheres (ODSs and FLCs), so do other quarks — through specific Creativity Ranges of «other» Duplex-Spheres. Some quark Form-Creators — due to their subterransive FDs organization easier sublimate Experience of Proto-Forms varieties covallert by birvulyarity type, which are simultaneously exhiberated in the given Space-Time mode. The others focus on the realization and Experience generalization of other Proto-Forms. Depending on qualitative state and type of SFUURMM-Forms synthesized by quarks, some quarks concatenationally transform their FDs into weak-nutational (long-waves, low-frequency) Form-systems, the others do into middle-nutational, and the third kind of quarks do into high-nutational (in relation to invaderentness of our Synthesis Scheme!) focal Configurations.

4.0465. Approximately, by the same reasons (i. e. due to qualitative compatibility degree) slloogrent ethereal content of Creativity Spheres of different-protoformal OLLAKT-DRUOTMM-systems also gets transformed completely differently into more universal SFUURMM-Forms of all possible FLUU-LUU-complexes, which at their sole discretion, subterraneously, are capable to be reflected in Form-Creators' FDs of *different* dimensional diapasons. For example, ODSs, kleksed by the same Proto-Forms' Focus Dynamics (*more impersept towards attributes of the given SFUURMM-Forms*), are structured by more or less primitive Form-images, because *only very limited* abilities of Form-Creators of the given Synthesis Scheme are capable to be specifically performed in Info-Creators Focuses of Dual Reflection of the given Creativity Spheres.

4.0466. That does not let them to «unpack» more ampliatively (i. e. less fragmentary) and in substantial increase the slloogrent Information about *all* properties and peculiarities of the given SFUURMM-Forms, — either they cannot perceive multiple attributes in any way, or their content is very strongly distorted in Self-Consciousnesses Forms' Perception systems. In simple words, in our human STCs' groups, SFUURMM-Forms of other Proto-Forms representatives are «unpacked» with a huge distortion, and our Conceptions for other Self-Consciousnesses Forms are also only partly understandable and available in their Meaning.

4.0467. All our subjective Conceptions about «intelligence» and «awareness» criteria of all Self-Consciousnesses Forms structuring our surrounding reality (in human STCs' groups!), are based only on the *degree and volume* of slloogrent Information about subterraneous peculiarities and properties of each of that Forms, which bio-Creators of our «current» mixtum NUU-VVU-Form-Types are capable to «unpack.» We form our «human» CSRs types on the basis of corresponding, extremely limited and deformed, Conceptions about Proto-Forms according to whether our Synthesis Scheme coincide with a certain considered by us Proto-Form. For example, external and psycho-mental peculiarities of all boson-fermion, atomic, and molecular Self-Consciousnesses Forms of all microorganisms, minerals, plants, and cosmic objects are absolutely different from how we see and imagine them, since we be guided while estimating them only by a small fraction of peculiar to them interconnections.

4.0468. Viruses and bacteria are the examples of Self-Consciousnesses Forms' high organization, which we traditionally consider too primitive and imperfect (consisting supposedly only from DNA and RNA), can compete seriously with our NUU-VVU-Form-Types in survivability; however, they possess much more complex and developed Perception systems than we used to consider. For example, viruses-bacteriophages, performing purposeful transplantation of their genes into other organisms, might *selectively* (i. e. *consciously!*) master and easily adjust for their realizational needs immune system analogs of their hosts — bacteria and some archaea (separate domain of one-celled anucleate entities). Moreover, every type of phage possessing genes responsible for bacteria immune system function prefers to «hunt» only for certain type of microorganisms, after the capture *purposefully* adapting all their life functions for their needs. After the capturing, virus-satellite actively reproduces inside the microorganism via multiple copies of own genome, what lets every newly formed phage affect a huge number of new bacteria and archaea.

4.0469. Many bacteria intentionally create their own — harmless for them — phages as a special «bacteriological weapon» for selective annihilation of other bacteria strains (types) in order to compete

with them and overtake nutrient solution resources. In this context, in development scope of every microflora part (starting from animal and plant organism, and finishing with space structure of minerals, planets, asteroids and even cosmic dust), we may observe between various microorganism real «bacterial wars» as well as many examples of compromise (mutually beneficial) co-operation and even mutual aid. That indicates that viruses possess not only their own complex genome, but also Self-Consciousness, which allows them to self-reproduce and amplify into even more complex Forms.

4.0470. Thus, evolution virus theory of DNA formation (including human) is quite popular among scientists, now. For example, Francis Collins (head of «Human Genome» project) writes, «First God created viruses; then, they «developed» in a human.» In addition, there is one more evolutionary theory no less popular among scientists — the theory of horizontal (lateral) gene transfer, which was suggested in the end of the XX century by academician S. V. Shestakov and developed by A. V. Markov. I am absolutely sure that it will take a little time to prove conscious interaction characteristic only on the level of microorganism existence but also among various fermions.

4.0471. Though, the indicator itself of functional multi-complexity, mutual subordination, «massiveness,» and quantitative «clutter» of Form-structures, which provide subterraneous FD manifestation of any Self-Consciousness Form and its CCI's Creative potential realization through it, does not show certainly the given Existence type high organization: Forms evolving process includes universalization of all multiple survival functions when the necessity in multiple extremely necessary systems and organs simply falls away, because the realization of qualitative different Interests demands absolutely different Mechanism of their exhibition. Therefore, fermion Self-Consciousnesses Forms turn out to be much closer to Form-Creators realizational Interests of all possible microorganism strains than to the Interests of our Form-Creators, which Focus Dynamics are multipolarizationally «spread» among countless subjective Interests. Due to Issiidiology Conceptions, high activity and deepness of their understanding, in not so far «future,» scientists will be able to study microorganisms' functions, their role and importance in the development and progress of the whole Life on the Earth (as well as on other Planets) much more profoundly and extensively than «now.»

4.0472. In this connection, let me adventure an assumption which may seem at first sight «absolutely absurd and crazy,» but quite logic in a deeper and impartial analysis of available for me Information: The empiric Experience that all other Self-Consciousnesses Forms of our surrounding reality and we (people) so actively master through continuous development of physical, psycho-mental, biochemical, and electrochemical interconnections, is already level-by-level synthesized and qualitatively «distributed» among Self-Consciousnesses Forms' Form-Creators of zillion various microorganism types, existing on each Planet and on all the rest Star systems.

4.0473. Availability of exactly that comprehensive Experience already synthesized by many specific Schemes (i. e. detailed programs of all possible Direction for various CCIs development, encoded in DNA and RNA of all the variety of microorganisms) lets them, as a *unique* «Life pollen,» in countless quantities travelling along the endless cosmic spaces, provide in narrow-specific conditions of every Planet, corresponding to established on it biological, temperature, radiation, and other exhibition modes, the process of consistent formation of all the multitude of more «massive» Self-Consciousnesses Forms than a Planet, which existence and realization Planets functionally provide.

4.0474. In more universal human STCs' groups, organized by Form-Creators' FDs of more universal (which means more covallert towards other Synthesis Schemes peculiarities!) NUU-VVU-Form-Types' Perception systems, all our currently surrounding Self-Consciousnesses Forms undergo (not without a radical change of our own Conceptions about them!) powerful ampliative perturbations. All these qualitative changes are meant to provide them even higher realizational possibilities which are manifested in their FDs as new essential Interests in the process of the given Synthesis Scheme development and in the amitsiration process into the next version of the given birvulyarity type.

4.0475. For example, when people switch to mental-associative Perception from predominant, speaking communication mode, the Meaning of everything happening around them, as well as the process of Self-cognition in general, may radically change, deepen, and develop. Not only animals and plants start «communicating» with people on other, more ampliative, Self-Consciousness Levels, but also their bodies — as well as ours! — considerably change, getting rid of the characteristic, presently habitual for us but already redundant attributes of primitive development<sup>7</sup>, and they appear to us in completely different — highly developed and intelligent — Self-Consciousnesses Forms.

4.0476. When we cognize and gasp boson-fermion Self-Consciousnesses Forms' Existence Nature to much greater extent, properties and peculiarities of our surrounding «materiality» will also considerably change along with that: Being less inertial, it will become more dynamic, which means more plastic, more flexible for our psycho-mental manipulations. In their turn, similar ampliative changes will become the reason of concatenational transformation of our own Perception system, which will make it possible for us to shift our subterransive amitsirations into more perfect — dimidiomittense — NUU-VVU-Form-Types. More effective and conscious cooperation with all the multitude of our surrounding Self-Consciousnesses Forms will make that amplificational Process much shorter than multimillion period of our focus in primitive mixtum NUU-VVU-analogs.

4.0477. Therefore, along with very primitive (high-impersept, low-covallert) SFUURMM-Forms of fragmented Self-Consciousness of our UU-VVU-copies about our surrounding reality, which form all our «current» collective subjective Realities' FDs, in OLLAKT-DRUOTMM-systems there already exist a countless multitude of ethereal Information about very developed different-protoformal Creativity Ranges, which Conceptions can be compared only with qualitative state of Universal Multipolarizational Impulses (UMPI) of our FLUU-VVU-doubles structuring much more amplificational human FLUU-LUU-complexes types.

4.0478. Moreover, we should mention that according to covallertness or geyliturgentness degree, invaderental attributes of some protoformal ODS-types harmoniously-diffuzgently get conversed into invaderental attributes of other protoformal ODS-types, qualitatively transforming sfuurmmformal content of structuring them Creativity Ranges. Everything we very primitively imagine about any our surrounding Proto-Form, in others, *non-human* and more corresponding to their criteria ODS-types (more compatible with their SFUURMM-Forms), is reflected completely differently — more deeper and qualitatively, — thereby providing Form-Creators which use that ethereal Information in their

<sup>7</sup> For example, animals have limbs, not adapted for accurate actions, rough external features, aggressiveness and awkwardness, “present” sizes, and also moving, nutrition, and communication ways, and further on — that is everything that provides them maximal survivability in our STCs.

realizational creativity with much more possibilities for less subjective formation of surrounding reality.

4.0479. Earlier, it has already been mentioned that those exhibition modes which focus parameters we subjectively interpret as «doolls Levels,» do not represent by themselves something more imperfect and disharmonious than what surrounds us. The whole problem is that we are able to estimate Self-Consciousnesses Forms' FDs' qualitative state indicators, which do structure these Form-systems, only in very subjective comparison of its qualitative parameters with the same parameters of our own FDs. However, unfortunately, we do not know the basic valuation criteria of Creative Activity in our FD even of elementary lluvvumic attributes (SFUURMM-Forms) such as HSI, HIA, immunitant Responsibility, humanitarian Freedom, not mentioning deeper, invaderental for our Synthesis Scheme Self-Consciousness states.

4.0480. Iissiidiology — as the fundamental Paradigm of humankind's Collective Consciousness — is in its «infancy,» yet; it has not even «born into this world,» yet; we are only about to start to comprehend and to assimilate intensively more and more universal and *gabitual*<sup>8</sup> qualitative Conceptions about «ourselves» and our surrounding reality in the nearest versions of human development scenarios of favorable «Future.»

4.0481. Our Conceptions about apparent to us incompleteness and depliativeness of doolls Self-Consciousnesses Forms are caused, first of all, by invaderental peculiarities of human STCs' groups, formed by SFUURMM-Forms, which with much or less degree of covarlertness between each other are kleksed by «human» type. Secondly, such strained and totally unfounded «arrogance» towards other Proto-Forms reflects specifics of our «current» Perception systems. Their bio-Creators have a real ability to perceive just very *selectively* and to interpret subjectively (to «unpack» with the help of biochemical processes) from all slloogrent Content, simultaneously structuring our surrounding Space-Time, exclusively those focal-ethereal combinations particles which more or less covarlertly agree with peculiarities of our own Synthesis Scheme and logically «fit in with» already synthesized by us Experience.

4.0482. The higher the imperseptness between our brain Form-Creators' FDs and FDs of other Self-Consciousnesses Forms' Form-Creators, the more narrow the differential characteristic spectrum is that we are able to perceive, meaning, to understand, to experience, to interpret more objectively in a way accessible to us. Moreover, we are not capable to perceive anyhow cruvursorrt (in relation to our invaderentness type) focal-ethereal combinations (doolls and flaks f-Configurations) — they cannot be «unpacked» or are very heavily deformed in their Essence — therefore, we suppose that they do not exist at all.

4.0483. However, many of those cruvursorrt combinations are not absolutely incompatible with our FD, since they are structured between each other by such interconnections which to varying degree might unstably resonate (in definite psychical states, circumstances) with our invaderentness type. Thanks to the presence in our Life of these short-term phenomena, diffuzgently initiated by our

8 Objectively deep, incognizable “inner” with transcendent-underlying causes

FDs in doolls-flaks exhuberation modes, and by fragmented particles of «projecting» (resonationally engaging) in FD of our CSR type, we form our extremely subjective Conceptions about qualitative state of these Existence Forms, completely unknown to us.

4.0484. However, in favorable for their development STCs' groups, which are formed by their own SFUURMM-Forms, low-nutational for us, different-protoformal interconnections strongly activate due to their interaction spectrum amplification and improvement of their Energy-Potential, while vibrations typical of human STCs more and more fade out, transiting into completely incomprehensible (powerfully deformed) or unavailable for their Perception systems category. In their own Perception systems Subjective Conceptions about us, as well as about all our creativity (as well as ours about them), are so strongly deformed, undergoing structural simplification and distortion of their meaning, so that they become completely incomprehensible and independent for the analogs of their logics. Therefore, formed by us human STCs, being partially manifested (notably, via their *most impersept* part!) — corresponding to Duvuyllerrtness and Diffuzgentness Principles — in their STCs' groups, are also perceived by them as extremely primitive, meaningless, and even absurd formations unworthy to their Conceptions about highly intelligent civilizations.

4.0485. It is very important for you to understand that subjective decrease of our Conceptions about qualitiveness of Form-Creators' FDs of doolls CSRs (in relation to our CSR!), conditioned first of all not only by their total depliativeness, but by imperfection of our own Perception systems, does not reflect at all the true picture of qualitative state of focal-ethereal structure of these exhuberation Levels of NOT-lluuvvumic Self-Consciousnesses Forms. We possess one-sided (our!) simplification and biased primitivization (in relation to our invaderentness type) of our — extremely fragmented! — Conceptions about them, because we are not just able to trace with our own eyes all their abilities, peculiarities, and their creativity Meaning. We tendentiously assign doolls Self-Consciousnesses Forms to beings less developed than us. Though, let me underline once again, their Form-Types, developing in their own STCs' groups (i. e. in favorable for their Synthesis Schemes Existence conditions) might be much more developed in their life creativity type, than we are in our human life.

4.0486. Biased Conceptions about seeming to us «primitiveness» of typical of them Existence ways appear in Self-Consciousness also because Form-Creators of human FD (who initiate FDR- or UMPI-dynamics of corresponding SFUURMM-Forms in ODSs and FLCs) are not able to «unpack» and to identify to *the full extent* (corresponding with human Conceptions) qualitative *long-wave* content of protoformal Creativity Ranges at profound Meditation on their Sound Cosmic Code, which forms in functional activity of bio-Creators of human brain certain informational «gaps» and meaning «differences» (consequences of the states of partial synthetic incompatibility of our and their Synthesis Schemes). This automatically replenish in human FD by the multitude of assumptions and meaning deformations.

4.0487. For example, it seems to us that the degree of inertia of Space-Time in their CSRs considerably exceeds what we observe in our surrounding reality; time, necessary for them to make a certain decision is perceived by us as incredibly prolong, too «drawling,» inertial. Probably, insects' and also other animals', plants' bio-Creators, in which organisms biochemical processes are carried out much more intensively than ours, perceive human reactions and behavior approximately

likewise subjectively — as slow-action and sluggish. In the same time, siliceous (resembling them by rotational Cycles duration) Self-Consciousnesses Forms perceive our actions (as well as life of surrounding them plants and animals) as incredibly rapid, practically indistinguishable for their Perception system! However, we consider these actions quite normal!

4.0488. Despite of such colossal differences in Focus Dynamics organization principles of all beings and such fundamental differences in their Perception system organization, all Self-Consciousnesses Forms use for their subterraneous realizations *one and the same* informational Source — ethereal content of Duplex-Sphere's sllougent Configuration, subjectively transformed by their Form-Creators into the endless diversity of all possible ODSs and FLCs Creativity Ranges.

4.0489. The Focus Dynamics realization of Form-Creators of different-Qualitative Self-Consciousnesses Forms in any of these info-structures is carried out through SFUURMM-Forms, only with the difference that in OLLAKT-DRUOTMM-systems Creativity Ranges reflecting Form-Creators FD in 3–4 dimensional diapason, SFUURMM-Forms resonationally gather by their subjective meaning into the countless multitude of UU-conglomerates (small meaning blocks of fragmented Self-Consciousnesses of UU-copies), which are quite easily «unpacked» by Form-Creators of different Self-Consciousnesses Forms, while SFUURMM-Forms in FLUU-LUU-complexes are structured by much more substantial and universal UU-modules, each of which resonationally made of multiple UU-conglomerates, to varying degree peculiar to Focus Dynamics of more or less covarllert Self-Consciousnesses Forms.

### **Chapter 3. Photoreductive Ether role in providing unpacking abilities of Focus Dynamics of heterogeneous Form-Creators**

4.0490. Photoreductive Ether is the main functional structure which facilitates generalization and combination in various Self-Consciousnesses Forms' Focus Dynamics of peculiar to them Conceptions (synthesized subjective Experience in the form of typical Form-images, Ideas, knowledge, confessions, directives, rules, tastes, views, habits, situational decisions, and so on) into more universal informational content of UU-conglomerates and UU-modules. It is difficult to say something certain about this multifunctional and at the same time very specific ethereal substance (which serves for UPDR *a unique* «Information transfer environment» and holochronely penetrates all Plasmic Forces Diapasons and structuring them Levels), because any specificity, continuously «unpacked» by Form-Creators through Focus Dynamics, is formed in a huge dependence on a Self-Consciousness Form's subterraneous characteristics and peculiar to it Perception systems.

4.0491. We cannot relate this ethereal substance either to ODS or FLC, because exactly due to its holochrone presence of all space-time structures in FD it became possible to merge duvuyllerrtly-diffuzgently absolutely all different-protoformal ODSs and FLCs to provide all different-type CCIs with unified for them informational basis. This «confluence» results in photoreductive Ether, which is structured by the countless multitude of all possible different-Qualitative Conceptions about any

subjective Focus Dynamics' states of all Self-Consciousnesses Forms simultaneously exhibited in any considered dimensional diapason.

4.0492. Neither Self-Consciousness Form would be able to be materialized in its way, if every Space-Time exhibition «point» was not sllougrently structured by photoreductive Ether's different-Protoformal content. For example, it «initially» includes absolutely all realizational Programs and behavior lines not only of people, animals, plants, and minerals but also of all Planets, Stars, Galaxies, and Universes... However, every Self-Consciousness Form can use a part of that endless content only to the extent to which subterraneous «unpacking» abilities of its own Perception system's Form-Creators, organizing all the creative specifics of its Focus Dynamics multipolarizational realization, allow it.

4.0493. Let me remind you that amitsirational process of every «person» simultaneously consolidates multiple diffuzgent Proto-Forms' Form-Creators, structuring our biological organism with all its systems, organs, cells, and also multiplex community of all possible microorganisms — viruses and bacteria. Through SFUURMM-Forms activity of their narrow-specific FDs they constantly correct creative possibilities of «host person,» on biochemical level manipulating his/her choices, tastes, predilections, habits, all his/her «current» needs, and psychical qualities. As it has already been mentioned, cellular DNA's Form-Creators just specifically *reflect* via their FDs' Energy-Potential the subterraneous peculiarities of the Synthesis Program (inheritable Information) which is included in Proto-Form's f-Configuration that genetic Program carrier — while the real carriers of all the Information necessary to Form-Creators for successful implementation of any amitsirational process are Info-Creators — universal Fields Consciousnesses of photoreductive Ether.

4.0494. All the multitude of gene Form-Creators functionally represent in cell DNA of our biological organism different-Qualitative realizational Interests of all the multitude of Proto-Forms, which are diffuzgent in relation to invaderental peculiarities of the given Synthesis Scheme. Depending on the activity degree of various Proto-Forms' representatives in a «person's» FD, out of sllougrent content of photoreductive Ether there is resonational extraction particularly of that ethereal Information (as UU-Forms of assembled Experience, inclinations, demands, reactions, and similar) which is typical of specific ODSs Creativity Ranges of a given protoformal type.

4.0495. Being «reprojected» via various systems and organs of our organism and undergoing in so doing a multiple heterogeneous kleksing, these Information constantly corrects by all possible different-Protoformal bio-Creators, «every» of which contributes to it (i. e. specifically re-structures) only the peculiarities typical exactly of «its» protoformal ODS. General adjustment (kleksing) is collectively carried out by nuclear Form-Creators of every cell through which the given impulse runs — via axo-dendritic interconnections. This way, SFUURMM-Forms kleksed by human psychical type are activated in a particular resonational part of photoreductive Ether's general sllougrentness («projected» into human CSRs of all Time Flows) out of multiple diverse fragments of different-Protoformal SFUURMM-Forms.

4.0496. Thus, it just seems to you that your Conceptions about «yourself» and surrounding you reality are «purely human.» No, for the most part they are combined (i. e. tendentially aggregated by

the lluuvvumic Form-Creators) out of the multitude of compatible particles («fragmented pieces») of different-protoformal Information, which «projects» into your FD that diffuzgent part of slloogrent Experience already sublimated and specifically synthesized by multiple beings, simultaneously existing in the «local» exhiberation resopason of the given SFUURMM-Form in multiple Time Flows. Your inability to use a part of the Experience already available for more developed people is the consequence of qualitative (resonational) discrepancy of this Experience's Configuration and Perception systems of focused by you NUU-VVU-Form-Types, which FDs are still totally based on selfish Conceptions and instinctive wishes, generated in the given human CSR by representatives of some Proto-Forms.

4.0497. Therefore, yet again, I have to repeat: The true criterion of Human Wisdom (not instinctive «animal-plant» survival) is obligatory presence in all Motivations, which you actively use for making «current» decisions, typical signs of lluuvvumic kleksing type (HIA, HSI, and accompanying them immunitant Responsibility, which initiates in a «person's» Self-Consciousness the specific-human state of humanitarian Freedom). Conceptions totally based on such ampliative ground, are most covarllertly structured in relation to invaderental features of other Synthesis Schemes and therefore do not enter antagonistic (tensor) relations with realizational Interests of other Proto-Forms. They possess the most miserly (for human STCs' groups) destructive Potential which lets a human carry out powerful FD's affectations particularly into lluuvvumic development Direction, not spending much time and efforts for carrying out multiple inertial loops and prolonged svilgs-spherational perturbations in the process of subterransive amitsiration.

4.0498. It happens because complex-structured psychical constructions of more ampliative human SFUURMM-Forms are eglleroliftively-convergently «projected» by their realizational interconnections not into those primitive-selfish Levels of our surrounding reality, where flora and fauna representatives are realize only through undeveloped states, in which we are capable to perceive them subjectively (in the form of aggressive animals and primitive plants), but into equally ampliative SFUURMM-Forms of corresponding exhiberation Levels of other CCI-types, where in favorable for their development existence conditions they are capable for the same intellectual-altruistic realizations as well as the best human part of the given CSR. Due to that universal peculiarity of ampliative SFUURMM-Forms, people, tendentiously using them in their life creativity, receive a real possibility to retrieve from slloogrent content of photoreductive Ether and harmoniously «include» in their FDs already assembled high-Qualitative Experience, which is synthesized by not less developed (than us) representatives of diffuzgent Proto-Forms (or even more developed ones by peculiar to them criteria!).

4.0499. Thus, the idea of creating compact gadgets, movement organization in limited space conditions (for example, crowd behavior in a panic; immediate passengers boarding without seating arrangement), technology of fast file uploading (for example, *Transmission Control Protocol* algorithm, preventing Internet «blocking»), an optimal route planning of goods delivery or cosmic routs (ant colony algorithm), engineering of midget Earth-satellite vehicle, and many-many others — all that is borrowed and reworked by scientists «in a human manner» via kleksing of the vast Experience which is already synthesized by «ant» CCI type.

4.0500. Multiple similar examples of borrowing priceless existence Experience are described in bionics-biomimetics, cybernetician, neurobionics, allowing use of properties of other Proto-Forms

in the practice of electronics, navigation, connection, marine affairs; urban planning of human reality, starting from ornithopter (flying vehicle with flapping wings) by Leonardo da Vinci; using burdock principle in making hook-and-pile fastener; creating suction cup (octopus properties prototype) and ending with the project of three hundred stored skyscraper-cypress in Shanghai. There are also examples of the practice of ampliative interaction of people with other protoformal CCIs, represented in our CSR by all kinds of creatures: microbes, worms, insects, birds, night bats, sea and river animals, and also all the multitude of wild and domestic animals.

4.0501. Some of you may have questions, «Are UPDR and photoreductive Ether analogous notions?» or «Are Photoreductive Ether and what we interpret as ODS and FLC one and the same?» As it has been mentioned earlier, Universal Plasmic-Differentiated Radiation is *holochronely* structured by the two, complementary and mutually sustaining each other, tendencies — irrkoglictive (informational-transgressive) and eglleroliftive (focal-convergent), which were formed and in their own way manifested via SSS-Entity's Self-Consciousness in the conditional Moment of Information mercavgnation. It means that Absolute Existence Experience of all Self-Consciousnesses Forms (i. e. absolutely all the sum of possible mutually balanced focal-ethereal interconnections), «instantaneously» formed as a result of eglleroliftive consummatization of slloogrent Focus Dynamics, is spread at once (holochronely-resonationally) among all focal Configurations. In fact that Absolute Existence Experience is the consequence of eglleroliftive (focal, amitsirational) simultaneous realization «part» of the general functional UPDR Mechanism (of course, through irrkoglictive tendencies!). In its Essence, it is what we subjectively define as photoreductive Ether.

4.0502. In other words, in accordance with Slloogrentness Principle, photoreductive Ether, being the functional UPDR part, in any from the countless «points» of its simultaneous-resonational manifestation *reflects* the Whole (UPDR). Yet, in what way: where, wherethrough, and how? The reflection is in *every «point»* of local Space-Time exhibition; through every Self-Consciousness Form's FD; in conformity to the Perception specifics of every Self-Consciousness Form! Imagine that you have artistic brush and paint, which separately cannot create a picture. Then, if a painter (Form-Creators of Self-Consciousness Form) dips a brush (FD) into a paint (ODS, FLC) and applies inspiration (SFUURMM-Form) to it, here at once appears a certain result of their interaction — a picture (a part of subjective Reality).

4.0503. UPDR represents an *objective* state of Focus Dynamics of HCCI's Macrocosmos, holochronely transformed into absolute Harmony state (liyllusceeveness) of all focal-ethereal interconnections of skrruullerrt system. As for photoreductive Ether, we can say that this is a *subjective* part of UPDR's slloogrent Content which is specifically — via various ways — is being multipolarizationally realized right now, for example, through your Focus Dynamics (in fact, as well as through all the rest SFs!).

4.0504. Everything that you *have not been able* to realize concatenationally and convergently, yet, — is still unused by you UPDR's Creative Potential, and everything what *was psychically realized by you* (in the process of continuous «unpackings») was «reprojected» into conditionally «human part» of the general photoreductive Ether's content, then narrow-specifically kleksed according to VVU-Factor, and at last began structuring your subterransive ODS (or FLC — depending on SFUURMM-Forms qualitiveness), which you can repeatedly address in any moment of your eternal Existence

as well as to your own Experience, complementing it with a new content. However, everything abovementioned should be perceived with very substantive amendments on the degree of your Perception system's Form-Creators subjectivity.

4.0505. Thus, any of your ampliative SFUURMM-Forms possesses the ability to «create» and «perform» subjectively something new and more perfect in the surrounding reality (instead of actively destroying all the best and amplificational for the given Synthesis Scheme), only because it is complex-structured according to invaderental and vecsative attributes and is never «projected» into your FD by Form-Creators only by one Proto-Form, but always represents somewhat average (i. e. reformatted via VVU-Factor) different-protoformal Experience of Creative Activity of Self-Consciousnesses Forms' Form-Creators of multiple CCI types, diffuzgent in the given *exhibition conditions* towards our, lluuvvumic, Synthesis Scheme. Through your FD in the surrounding reality there are realized endless Flows («projections») of different-protoformal Thought-Feelings and Thought-Images, which simultaneously and specifically organize psycho-mental and physical activity of focused by you NUU-VVU-Form-Type in that realizational aspect, which is the most important in the given conditions of your Existence for your «personal» — human — *ASTTMAY-RAA-A-Parvula*.

4.0506. Expression «in the given conditions» implies, at least, insomuch favorable (for every Proto-Form) existence modes which by their abilities (for *their* development!) can be considered analogs to 3–4 dimensional diapason structuring FD of our human STCs' groups. These invaderental exhibition modes of specific attributes of their own Synthesis Schemes might been perceived by us subjectively as 3–4 dimensional (i. e. usual, physical), but they have other Space-Time properties that are capable to provide realization of *particularly their* creative Interests.

4.0507. Your depliative SFUURMM-Forms (selfish, aggressive) possess in our STCs' groups so powerful destructive energy-potential, only because they are structured mostly by fragmented Conceptions of less developed representatives of multiple different-protoformal CCIs, which being in unfavorable — for their ampliative realizations — existence conditions (high dependency on the Interests and behavior of people) apply all their psychical efforts to arrange surrounding their World (STC) *at their own and sole discretion*, thereby depriving it of what has been already created by powerful efforts of hundreds of billions people (by several generations) to make *their* life easier and to create more favorable conditions for *their* development. Such antagonism is peculiar to all Self-Consciousnesses Forms' FD's for which human STCs' groups are not invaderental, but vecsative (i. e. for all Proto-Forms, non-covarllert and high-impersept toward our Synthesis Scheme).

4.0508. Therefore, when animal, plant, or mineral Self-Consciousnesses Forms' Form-Creators acquire a possibility to re-structure something in our CSR corresponding to their own Conceptions and Interests, at once there start to develop and to strengthen Form-Creators' FDs of those Proto-Forms which turn out to be most active and adapted in the given process in order to implement global changes in their surrounding reality. Such aggressive tendency, differently manifested in various human STCs' groups, is typical both for Self-Consciousnesses Forms of microscopic Levels (fungus, bacteria, unicellular algae, plankton, and so on) and for bigger and stronger Proto-Forms. Their activity results in human STCs in gradual overgrowing with forests, jungles, swamplands and impounded areas, desolating with prairies, desert, dunes, and so on, providing countless other non-

human Self-Consciousnesses Forms with more favorable conditions for existence, development, and reproduction. However, actual initiators of such development scenarios of humankind's Collective Consciousness (Humankind's Collective Consciousness, HCC) are most often Proto-Forms which properties we subjectively define as «radiation,» «pressure,» «temperature,» «gasses,» «water,» «ground,» and so on (i. e. «natural elements»).

4.0509. Structuring your FD with low-frequency SVUULL-VVU-conglomerates, resonationally «borrowed» from typical Conceptions of surrounding you vermin and other underdeveloped creatures (forced to survive in our STCs at any cost), you focus your activity in advance, though, often unconsciously, on the destruction of existing *human* interconnections (created accordingly to yet *unstable* ampliative VVU-criteria), thereby actively contributing to the amitsiration process of humankind's Collective Consciousness (HCC) into less favorable for human development existence conditions, but more favorable for other Proto-Forms representatives, which specific Interests you unconsciously reflect in your surrounding World via your depliative FD.

4.0510. Thus, the process of multipolarizational-simultaneous HCC amitsiration into more human STCs' and CSRs' groups fully depends on what percentage of the general number of people on Earth sufficiently stably generates and realizes in its life activity ampliative SFUURMM-Forms intensely structured by lluuuvvic signs, which are typical of the given NUU-VVU-Form-Types' exhiberation diapason. If that indicator of the general FD qualitative state composes 10–15%, that will indicate a pronounced tendency of intensive deepening of the HCC's FD into some protoformal groups of STC. In such cases, only active implementation of universal SFUURMM-Forms of high-ampliative Knowledge into the Paradigm of Collective Consciousness can help, which will let people discover and cognize deeper Meaning of their Human Existence. Such a fundamental Knowledge of our favorable «future» is Iissiidiology.

4.0511. Speaking about possibility of potential influence of every «person» on the general qualitative state of amitsirational HCC's tendency (or some of its part — a state, a creative collective, a family), it will be relevant to remind you about the principle of microphone organization, strengthening the sound of your voice: Invisible to you electric current, delivering to membranes its force (electromagnetic) impulses, only lets considerably strengthen the volume of your voice, thereby only increasing its capability to be perceived by other people, but in fact not making it loud. The more powerful the voice impulse affecting sense microphone membranes is, the more intensively the electric current force will reflect it through the dynamics in the space around.

4.0512. Influence degree of a «person» or a group of people on qualitiveness of structured by them HCC depends on the stability and activity in their Focus Dynamics of certain Conceptions, which Meaning finds active response in Self-Consciousness of other people. By analogy with microphone, in the given case, the strengthening mechanism in the process of outspread of some Ideas and Conceptions among people is Resonationness, Diffuzgentness, and Slloogrentness: The more attributes are used by a SFUURMM-Form to perform resonationally through Focus Dynamics of multiple other NUU-VVU-Form-Types, the more powerful and effective the SFUURMM-Form's influence is on qualitiveness of the given version of humankind's Collective Consciousness.

4.0513. That statement is equally fair both for ampliative interconnections among people (love, mercy, politeness, altruism, intellectuality, and suchlike) and for possibilities of depliative interaction (aggression, rudeness, egoism, rusticity, primitivism, and so on). In other words, deeds of a small group of people accompanied by powerful and stable psycho-mental realization (self-righteousness, determination to essential Interest realization), regardless of their moral and ethical motives, are able to inspire or to manipulate in the same way a huge mass of unacquainted with each other people.

4.0514. The same consistency can be observed while realizing psycho-mental creative processes: The more *lluuvvumic* ampliativeness you are able to put at organizing (modeling) SFUURMM-Forms of your thinking and feeling, the more universal (amplificational) Spheres of the general HCC's Creativity you can to amitsirate subterraneously into via your Self-Consciousness's FD, and consequently, the more high-qualitative human STCs' groups you are able to recognize yourself subjectively in. When you keep concentrating on some certain SFUURMM-Forms, they reproject your FD in a natural way for self-realization namely of the part of the given STCs' group which forming conditions *mostly correspond* to the content structuring them.

4.0515. If that content reflects mostly attributes of some protoformal development Direction, the diffuzgentness parameters of the given part of STCs' groups will be corresponding, i. e. less contributing to the human attributes realization. And vice versa, if you stably motivate your FD by ampliative human (intellectual-altruistic) SFUURMM-Forms, then, you subterraneous amitsiration will steady undergo into those STCs' groups which exuberation conditions will foremost contribute to prompt implementation in Life even of the most seemingly unrealizable and grand human plans. The more people who consciously focus on the desire of early achievement of a certain Idea or a goal will actively resonate with you in that psycho-mental Process, the more effective the «materialization» of the given goal and detailed arranging of the given Idea will be in surrounding you space-time conditions.

4.0516. Definitely, it bears repeating that the real reason of your multiple creative and life failures is not the absence of necessary financial and materiel resources for realization of the intended things (indeed, all the variety of *human* SFUURMM-Forms are always potentially ready to be initiated by you in your FD!), but not sufficient for its realization (i. e. annihilation of existing tensors, which form dissonational distance, objectively separating you from the moment of realization of your wish) Potential of the psycho-mental impulse that you should initially put into the materialization of a certain Idea. The higher the concentration and stabilization are of *lluuvvumic* attributes in SFUURMM-Forms generated by your FD into your surrounding reality, the more powerfully and effectively your subterraneous amitsirational process will go into the most favorable for people scenarios structuring particularly *lluuvvumic* development Direction.

4.0517. Behind all the dual different-protoformal manifestations, inevitably initiating in your FD various interconnection tensors, which are already synthesized in your Self-Consciousness, you should not forget and overlook the main Essence of your exuberation in the *lluuvvumic* birvulyarity type. Your exuberation Essence reveals as unshakable intuitive stimulus to spiritual mutual attraction amidst multiple complementary, different-Qualitative Self-Consciousnesses Forms, who consistently overcome existing between them qualitative differences and aspire by all means to return into

the State of Unity initially peculiar to them All. In that continuous svilgs-spherational process of annihilation of some interconnections for the purpose of harmonization of others, more universal and stable (peculiar to the lluuuvvumic birvulyarity type), there takes place a constant development and extension of human attributes through all the difficulties, ups, and downs of life creativity of NUU-VVU-Form-Types focused by you.

4.0518. Though, inertial tendencies of the surrounding World stimulating realization in your FD of antagonism and dissonation of SFUURMM-Forms considerably complicate and slows down the process of your spiritual Unity with Everything, but, at the same time, they originate more and more hardships on your Way. They bring you before intractable problems, thus providing necessary conditions for more and more harmonious interaction in the informational space of your Self-Consciousness of endless variety of heterogeneous Aspects, gradually, but consistently creating more reliably synthetic basis for increasing their covarllertness with each other and deeper realizing their own Unity. Without that constant balancing of various «inconsistencies,» the process of your steady amitsiration into more ampliative human STCs' groups will be simply impossible.

#### **Chapter 4. Unity of the Main Life Forces as the base for consummatizatiional processes in Macrocosmos**

4.0519. In the functioning basis of any Self-Consciousness Form exhibition Mechanism (as well as of the whole skrruullerrt system of Macrocosmos), there lies the Main Forces Unity Principle, active interaction between which is fundamental for the objective manifestation of What we subjectively interpret as «Life» and «Nature.» In the specific conditions of the given dimensional diapason, These Main Life Forces' Creative Activity is provided as a result of the presence in its Form-structures of quite limited set of certain heterogeneous Factors, which let subjectively bring the whole exhibition Mechanism to three-sided organization type of existing interconnections, i. e. to the *conditional Trinity*.

4.0520. For example, in Form-Creators' Focus Dynamics of mixtum NUU-VVU-Form-Types, This Principle is particularly realized in the «lowest» (depliative) Levels of slloogrent Focus Dynamics realization of Collegial Cosmic Intelligences LAANGKH-KRUUM, in which there are specifically reflected general creative Interests and peculiarities of OO-UU-Entities' Form-Creators invaderental in the given Synthesis Scheme: ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence. Joint active cooperation between them provides Synthesis of corresponding to the given birvulyarity type Creative Cosmic State «CC Potentiality.»

4.0521. In the general amplificational consummatization Process, Everything Being is simultaneously manifested (located) in a multilevel and multifunctional way: On the one hand, It actively reflects in various properties and Energy-Plasma peculiarities via certain specific ethereal particles — subjective Conceptions, formed from emanations and psychonations; and on the other hand — It reflects in SSS-Entity's Self-Consciousness via constant contemplation of interstitial results

of emerged transformational possibilities (karmonations) from a certain subterraneous dynamic Center (for example, Focus of Close Attention, FIMI, and other analogs). In the given case, the word «Trinity» is used instead of the word «Unity» only because the extremely limited abilities of our «current» Perception systems do not let us detect fully and at least somehow determine (subjectively imagine, compare) all the *endless* composition of These Forces, all possible ethereal and focal-ethereal combination between which do form absolutely all realizational options of slloogrent FD of Macrocosmos's HCCI.

4.0522. The point is, for example, that in flaks exhibition diapason it is possible to classify «emanations,» according to certain dissimilarities and specific properties of their ethereal «projection» interaction between each other, into several basic «classes»: GROYGLL, AYLLASST, OLLSGROLL, GOLGSDARR, MIILLI, MASDARSSK, UULVULL, EKHSLITT, GRIIMSSIIRS, STSIFILLI, IYGRIIMM, ISSOR, MMIARMM, ALSMAYSSMM, IYSTARASSMM, ILLIMIYYSS, SMIILL, OORUSSM, IYYUULLFFRI, and others. In so doing, by means of even deeper Meditation, each of these «classes» diversifies into a countless multitude of «types,» «kinds,» «colors,» and «gradations,» about which it is completely pointless to speak, yet. Qualitative differences between all them are more or less similar to our subjective definition of the differences in weather conditions: In spite of temperature, humidity, and pressure levels indications, in some psychical states we are inclined to perceive some weather conditions (for example, heat or frost, «mist» or «sun») positively and negatively in other psychical states.

4.0523. The same can be said about «psychonations» which qualitative variety of «projections» is over-extreme limit for your «current» Perception even in flaks diapason. For example, according to only one subjective Notion «Love» I was able to identify following different-Qualitative classes of «psychonations,» reflecting kleksing specifics according to the lluuuvumic birvulyarity type: DARDAPP, LAAGGS, DAYSSMMAYY, OORRAS, ILLBLL, ILLUFST, ILLVVUYL, IVUS, YYULLMULL, URMYYULLSK, UYLUFF, KSALTRAARR, OOLLS, KSARALL, BAYRLIYIM, RRIKKUNKH, LIILLD, IRILLMEFF, EYFFAST, USMIGISL, IRRMILLNISS, AKHALLDILTN, NUYULL, OSSNA, PILKKS, OOLKSINGP, IRAFLOOR, RISSALBBAS, AYDDAR, ASSALKKA, ALLKYYARS, and others.

4.0524. Interaction between separate «classes,» «types» and «kinds,» «colors» and «gradations» (these words are quoted because it is still not possible to determine borders between them) of «emanations» and «psychonations» is carried out very specifically in various Focus Dynamics conditions, typical of each Synthesis Scheme Form-Creators. Form-Creators of all the multitude of heterogeneous covarllert-diffuzgent Self-Consciousnesses Forms are able to combine subjectively various «emanations» and «psychonations» «classes» and «types» in their only way and also in a huge dependence on their local FD manifestation conditions. Therefore, in the given case, their comparison with our subjective attitude to weather seems to me quite relevant and evident.

4.0525. «Karmonations» (different-meaning psycho-mental complexes like SFUURMM-Forms and UU-conglomerates), initiated by Form-Creators' Focus Dynamics in all the multitude of different-Qualitative ODSs' and FLCs' Creativity Ranges (in the forms of FDR and UMPI), in their turn, multipolarizationally enter all possible — more or less covarllert and stable — sense bearing interconnections with other types of «psychonations» and «emanations,» forming in ODSs and

FLCs new causal combinations, more or less different from each other. A huge role in that timeless (holochrone) process is played by kleksing types (UU-Factors), each of which narrow-specifically reflects peculiarities of just one certain Synthesis Scheme. In «karmonations» structuring ODSs and FLCs, all these peculiarities are united (by the most covarllert attributes) into the one slloogrent ethereal Configuration, subjectively diversified (by Focus Dynamics of heterogeneous Form-Creators!) into the countless multitude of different by meaning Focuses of Dual Reflection and Universal Multipolarizational Impulses of Info-Creators (SLUI-SLUU).

4.0526. Thus, we can see that all informational Content in OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes is slloogrently structured by «karmonations'» ethereal Configurations (of SFUURMM-Forms and formed by them UU-conglomerates, FLUU-Doubles, FLUU-Modi, and suchlike). At the subjective consideration of these ethereal systems, it seems to us that besides «karmonations» in their informational space there also exist reconverstive Configurations of «vacant» «emanations» and «psychonations» which appear to «join» to other «mediate» «karmonations.» Yet, to any subjective Observer in the altered Self-Consciousness state (deep Meditation), it only seems to be so due to the constant change of own Interest, which resonates with one or another part of slloogrent ethereal Configuration (therefore, it makes an impression in the Perception system of something joining and something disappearing).

4.0527. Actually, absolutely all the endless variety of «karmonations» structuring every realizational mode — like in every skrruullerrt Macrocosmos's Form-system — has already holochronely happened and has simultaneously been realized through Focus Dynamics of all the multitude of Self-Consciousnesses Forms. Only Focus of Close Attention qualitiveness varies, which is structured by informational Focus of Dual Reflection Essence and is stimulated by peculiar to it realizational Interests. Therefore, Principles that reflect such «inner» Properties of the Information Itself as Duvuyllerrtness, Diffuzgentness, Resonationness, and Slloogrentness are performed in parallel both in the ethereal and focal Macrocosmos «parts.»

4.0528. Out of all that you should particularly clearly grasp the only thing that differentiates «karmonations'» ethereal Configurations (SLUI-SLUU SFUURMM-Forms) of *Info-Creators* from Creators-KARMOIDS' focal Configurations (Self-Consciousnesses Forms): Pending their reflection through Focus Dynamics, we can consider any «emanations» and «psychonations» combinations as ethereal «karmonations» (i.e. like Info-Creators); as soon as the moment of resonational «karmonation» projection into Form-Creators' FDs is carried out (meaning, quantum effect is realized), — we deal with Form-Creators, i. e. Creators-KARMOIDS.

4.0529. The matter is that Synthesis «Process» is not just Focus Dynamics composition of all the multitude of providing it Proto-Forms. *Objectively*, the Process of absolute Synthesis (consummatization) was carried out holochronely, but Form-Creators' different-Qualitative *subjective* self-perception (self-cognition) process in all the Self-Consciousnesses Forms multitude structuring slloogrent FD, happens *duvuyllerrtly-simultaneously*, through the consistent activation in informational Self-Consciousness space changing more impersept (tensor) FD's options into more and more covarllert (harmonized) ones. Therefore, you have to learn to distinguish focal Configuration of Macrocosmos's skrruullerrt system, which has been holochronely formed and immediately

consummatively annihilated in one single Moment of Eternity, from all Self-Consciousnesses Forms and CCI's sllougrent Form-Creatos's Focus Dynamics. Through the latter there specifically reflects the Essence of different-Qualitative creative Process realized in SSS-Entity's Self-Consciousness.

4.0530. Particularly subterransive properties and peculiarities of *different-Qualitativeness* of dissonational Focuses' sllougrent Configurations, which in the single mercavgnation-consummatization Act has formed the whole skrruullerrt system, serve the basis for the formation in Macrocosmos both of subjective (illusory) Space-Time effect and simultaneous different-level exhibition in it of the Process we determine as Focus Dynamics (change of less qualitative f-Configuration — as an object of its consideration by Focus of Close Attention — into more qualitative one). There is no and there cannot be any ongoing process in skrruullerrt system's sllougrent f-Configuration: Everything that should have been carried out in SSS-Entity's Self-Consciousness, has already been realized, and everything that could have been synthesized has already been synthesized and harmonized.

4.0531. Where Focus Dynamics (changes of some Focuses into the others) have been «originated» from? What is their Nature, and why do they have the property to turn up consistently in all Self-Consciousnesses Forms? The point is that any Focus Dynamics reveals as a consequence of different-Qualitative imbalance of decoherent Energy (objectively formed in every «local point» of Focus of Close Attention or Focus of Integral Motivational Impulse (FIMI) simultaneous manifestation) structuring any of them. In simple words, *during timeless Macrocosmos holochronness in general*, — everything, absolutely everything is eglleroliftively balanced and amplificationally harmonized according to the countless multitude of consummatizationally organized focal-ethereal interconnections!

4.0532. Nevertheless, due to the availability of certain decoherent Energy Potential in every of these interconnections, any subterransive Focus Dynamics Qualitative balance is out of question in any «local point» of its exhibition, since the main «product» (consequence) of any from «locally expressed» focal-ethereal interconnections is manifestation in Self-Consciousness of so-called *dissonational distance* effect, which focal-ethereal parameters subjectively seem to «separate» (for us or any other subjective Observer!) specifically considered by us qualitatively of some Energy-informational combination from the other more ampliative for it qualitatively (in simultaneously *already existing other* exhibition conditions).

4.0533. Particularly this qualitative difference between more depliative intermediate-Configuration option, which we have possibility to observe objectively in our subjective present, and its more ampliative option (which perception is still not available to us, but which has ALREADY objectively — *holochronely* — been formed in sllougrent Macrocosmos's skrruullerrttness in the Process of the general consummatization) is a fundamental basis for the manifestation in Self-Consciousness's informational space (of any Form exhibited in 3–4-dimensional diapason) of the quantum effect. It can be perceived by us only simultaneously — as a subjective-evident illusion of linear Space and chronological Time. Alongside our FD universalization (due to concatenational amitsiration into more ampliative NUU-VVU-Form-Types' f-Configurations), the intensity of the influence of that illusive effect into our Perception system will naturally decrease. That will let Us in the «future» refer more freely to the «current» Time specifics, understanding that their properties are only the *continuation* of analogous properties reflected through our own Focus Dynamics.

4.0534. In order to «shift» indeed from one subjective Space-Time «point» into its other subjective «point,» you should neither overcome huge distances nor wait many years — all similar manipulations between various types and kinds of decoherent Energy structuring various skrruullerrt system's Focuses may be carried out by Self-Consciousnesses Forms' Form-Creators practically *instantly* in the cases when in their FDs there appear all the necessary possibilities for the realization of the corresponding SFUURMM-Forms (much more universal and authentic than your «current» primitive Conceptions «about yourselves» and functional Principles of your surrounding World). For the present, such possibilities arise in your Life spontaneously, in case of separate brain bio-Creators' functions «accidental» modifications and due to strong stress situations.

4.0535. For example, in usual circumstances you are absolutely sure that you are not able to jump over a three-meter wall, but when in your Self-Consciousness there arise corresponding conditions for creative potential realization (SFUURMM-Forms) of some «saltigrade» Proto-Forms' Form-Creators (for example, during powerful stress, when you are chased by wild animals), you, without even realizing what you are doing, easily jump over even a four-meter wall! Or when you rush to save a little kid from under car wheels, you pass tens or hundreds meters in a second — you do not run very fast, but particularly instantly move in Space, not even thinking that you are just not capable to cover that distance for so short time! Also, when you reflexively and easily lift large-tonnage weight in order to set somebody free as soon as possible.

4.0536. The main obstacle on the way to such (but more *cognized*) abilities is your absolute confidence in people's incapability of similar realizations. Though, there are examples, when people had been taught special technics from their childhood and then quite easily created in their Self-Consciousnesses possibilities to carry out such realizations — for example, teleportation or something else potentially possible for them. Here are some examples of superpower demonstration, which have been brought into human FD from other Synthesis Schemes and most often manifested in the given human s-Reality through corresponding to them pathological conditions (autism, Williams syndrome, congenital blindness): expanded light perception (in infrared, ultra-violet, roentgen diapasons), substitutive (in case of blindness) echolocation, associative synaesthesia, people-calculators, super memory, cyberpathy, absolute pitch, supertaste...

4.0537. So, speaking about Main Life Forces *conditional* «Trinity» (as manifestation Forms of any Focus Dynamics), which presence and functionality provide simultaneous exuberation of Macrocosmos's Highest Collegial Cosmic Intelligences of the given type, you *should not* limitedly understand by that term only «emanations,» «psychonations,» and «karmonations» realizational Potential, holochronely carried out in timeless mercavgnation Act. Absolute Macrocosmos consummatization — as a Process of simultaneous manifestation of various Creative Information Activity — was just not possible without joint interaction between ethereal Info-Creators' Configurations («karmonations» — SFUURMM-, LLAASS-, YYYUULLUYG-, SSNUUYLL-Forms, and their other analogs) and Form-Creators' focal Configurations (Creators-KARMOIDS — Self-Consciousnesses Forms and Collective Cosmic Intelligences), initiated by eglleroliftive-irrkoglictive Impulse-Potential (indissoluble in Its functionality).

4.0538. It is very important to understand an endless subjectivity degree of *forcedly* applied by us «differentiation» of absolutely realized Information into Info-Creators and Form-Creators, since all the informational (ethereal-focal) Essence, structuring Everything Being, holochronely-simultaneously came to life between conditional mercavgnation «Moment» of Informational primogenitive State and the same conditional «Moment» of absolute consummatization (harmonization) of formed in so doing focal states of *the Same* (!!!) Information. Since both these «Moments» appeared in parallel, it is not possible in any way either to separate them from each other or study them discretely. However, we — for the convenience of performed by us psycho-mental manipulations and subjective review of observed by us intermediate results of that single Act — just *have to* diversify conditionally absolutely everything that falls into our logic and analysis sphere into a countless multitude of components, without which detailed study we are not able to comprehend the Essence of the Whole.

4.0539. There is no *fundamental* difference between the Main Life Forces Trinity realization through the Form-Creators' Focus Dynamics of Macrocosmos's HCCI (SS-AYIYLG-SS-SS-AYY-SSS) or through the focused by us, Form-Creators' FDs of NUU-VVU-Form-Types because everything in Macrocosmos is carried out not in centralized manner, but reciprocally: Presence and functionality of one oblige the presence and functionality of the other. This exhibition Mechanism realization implicates initiating Essence of Holochronness-Simultaneity, Sll oogrentness-Duvuyllerrtness, and Resonationness-Diffuzgentness Principles. Just like all the rest Self-Consciousnesses Forms and Collective Cosmic Intelligences, we sll oogrently-duvuyllerrtly structure HCCI, and HCCI resonationally-diffuzgently structures our FDs and focused by us Self-Consciousnesses Forms. SS-AYIYLG-SS-SS-AYY-SSS — by Its sll oogrent Essence — is Us (as USCFs) in *absolute* amplificational completeness (consummatization) State of Our Focus Dynamics.

4.0540. Like The Highest Cosmic Intelligence «creates» Itself through resonational-diffuzgent interaction between Creative Activity of Info-Creators' «karmonations» and multiple Creators-KARMOIDS' Focus Dynamics, in the same way we — via our Thoughts, Feelings, and Aspirations (via resonational combination of FDR with FCA and UMPI with FIMI) — constantly and eternally appear to «create» for «ourselves» (i. e. to choose from already created Forms) all possible our Self-Consciousness creative expression Forms, continuously and subterraneously-consciously reflecting via our primariusive «current» Interests and Conceptions particularly in those Conditions of *already finished* Macrocosmos, which synthetic peculiarities are able to reflect our subjective Perception systems' characteristics most of all.

4.0541. If it was not so, we would have absolutely no possibility to obtain that amplificational part of yet intuitive Information which provided the basis for Iissiidiology Paradigm powerful development in humankind's Collective Consciousness. Having evolved in multiple subjective development directions, that Information determined fundamental preconditions for the realization and cultivation of mass amitsirational, amplificational Process in billion people's Focus Dynamics. These preconditions facilitate people's subterraneous perception of «themselves» in more qualitative versions of holochronely, already synthesized by Us «Human Future.» The only thing that distinguishes and subjectively separates us from the Universe's (or Macrocosmos's) FD qualitiveness — is Interests qualitiveness<sup>9</sup> simultaneously realized by us and AYFAAR's Form-Creators (or SS-AYIYLG-SS-SS-

9 Infinite difference in the deep understanding and corresponding to it Perception of the true Essence of happening around us Processes, subjective fixation of diametrically different realizational Interests Levels, and suchlike.

AYY-SSS). The more each of us (people) will follow our — lluuvvumic — birvulyarity type, the more creative possibilities will be able to be realized through our Focus Dynamics.

4.0542. General functionality performance of every human FD amplification global Process is provided not by us (i. e. Creators-KARMOIDS), but by corresponding svilgson-eglleroliftive Principles, which are *already* included objectively («initially») both in our FDs and in consistently initiated by us f-Configurations. These Principles are revealed in the form of our continuous subjective Existence via *Creators-Pictusators' (lyyuyyussigms* from the Resoscontional Branch) and *Creators-Interpreters' (lyyuyyullons* from the Synthetic Branch) Creative Activity. These are Them, who informationally organize and focally initiate to realization all possible ethereal transformations in any multipolarized «point» of the general FD slloogrentness of Macrocosmos's HCCI through informational structures qualitatively-amplificationally peculiar to Them.

4.0543. Let me remind that the Primary Energy-Plasma is organized into the Primary Universal Illusion via joint resonational activity of uuyuums (UUYG-UUYU-Creators) and flaaggtuons, into the Secondary — via liyllims (GLLAA-GLLII-Creators) and avvakklons, the Tertiary — fmillims (SLUI-SLUU-Creators) and svilgsons, Quaternary — ullumkses and oodmmons (OODMM-DDMOO-Creators) combined with iksons. All These Creators, together with Their much more ampliative analogs of all amplificational Levels, organize holochrone SSLOOR-SSS-LLAASS-manifestation or Universal Plasmic-Differentiated Radiation (UPDR) — absolute functional «environment,» which presence provides absolutely all possibilities for the joint resonational Info- and Form-Creators manifestation all over the endless variety of space-time Macrocosmos modes.

## **Chapter 5. Thoughts, Feelings, and Desires informational Nature and their slloogrent implementation through Ideas**

4.0544. As it has been already mentioned, our eternal and endless inertial Existence informational Essence in Form-systems exhibition conditions and in the Tertiary Illusion Form-Creators (together with all the rest Self-Consciousnesses Forms) is provided by the manifestation possibilities in our Focus Dynamics' endless functionality of realizational Forms of the ethereal structure such as Uniform (for all Proto-Forms) Immanent GOOLGAMAA-A-Modus — RIISSTRRAALLMAA-A (IR-Ingredient) Whose Info-Creators provide Our GOOLGAMAA-A-Star Form's slloogrent manifestation (in the modes up to 14 dimension). In perceived by us 3–4 dimensional manifestation diapason, IR-Ingredient is represented via Info-Creators' Creative Activity of GAMALGORRAA-A-Modus's ethereal structures, which (Info-Creators) provide absolutely all Self-Consciousnesses Forms simultaneously exhibited in all the given diapason STCs with kleksed in a corresponding way ethereal Informational «projections.»

4.0545. In fact that is the SFUURMM-Forms' part of photoreductive Ether which is «projected» (transmitted, generated) into all Form-Creators' Focus Dynamics of the 3–4 dimensional diapason. However, in relation to *human* NUU-VVU-Form-Types, simultaneously manifested in *various*

Planetary and Stellar Entities conditions, «Informational Center's» (specific Noo-Sphere) functions are provided by SLUI-SLUU-Creators of Immanent PRAALLU-LAA-Source's ethereal structures (ODSs and FLCs), which are typically structured by SFUURMM-Forms (kleksed *only* by VVU-Factor) of uncountable multitude of *human* Stereo-Forms' interpretational FATTMA-NAA-A-Articles and subjectively personified ASTTMAY-RAA-A-Parvulas (those countless multipolarizational Experience Sources which are extremely subjectively and primitively interpreted by most people as «human souls» — theological-esoteric principle of «spiritual psycho-mentality» which presence provides self-conscious existence of every human in various exuberation modes).

4.0546. Sll oogrentness and Diffuzgentness Principles, put into realizational functionality basis of every from the countless ASTTMAY-RAA-A-Parvulas, which provide every conditional moment of our simultaneous exuberation (as people) with necessary ethereal Information, do not let us, even in theory, say that «every human has *his/her own* soul.» Thus, any choice done by us is a regular result of Experience simultaneous realization, generated by ASTTMAY-RAA-A-Parvulas of our human Stereo-Forms' countless «personalized» Interpretations. Meaning, every single moment decision taken by us represents a *certain* sum of *different-protoformal human* Experience, capable to be subjectively reflected in this or that way through presently focused by us NUU-VVU-Form-Types' FDs and their f-Configurations' qualitative parameters (NNAASSMM and VLOOOMOOT).

4.0547. It is necessary to highlight particularly that FATTMA-NAA-A-Articles, structured by different-Qualitative ASTTMAY-RAA-A-Parvulas' countless multitude, functionally represent (through Stereo-Form's sll oogrent f-Configuration) unified and subjectively inseparable Fields-Consciousnesses, which SLUI-SLUU-Creators, being functionally «attached» (through Form-Creators' FD of NUU-VVU-Form-Types) to the zillion Time Flows or rotational Cycles of our subjective Existence, «personally» do not identify with any of it. Diffuzgently-potentially, all their particular Simultaneity (timeless Integrity of subjective Conceptions about «themselves») is structured by covarllert ethereal particles' («parts») countless multitude not only of LLAISSMMA-A-, SSAALM-MAA-, and OOLLM-MAA-Signum's (animal, plant, and mineral Proto-Forms) Experience but also of ARFF-ORST-MAA- (fermions), FFAOLL-FS-MAA- (bosons), SSOLLAS-MAA- (doollses), and TASSILLU-URS-MAA-Signum's (flakses) Experience, i. e. absolutely of all the Experience simultaneously kleksed by VVU-Factor via all NUU-VVU-Form-Types in the conditions of two-, three-, and four-invaderental lluuuvvumic birvulyarity type Synthesis Schemes.

4.0548. Exactly therefore, every another human FD revitalization fact is subjectively reflected in its Perception system not as the «end of all the existence» and «departure into the unconscious non-existence,» but as the natural transitional moment between certain subjective «before» and «after» states, which jointly structure its eternal Existence. They (Info-Creators) are perfectly informed that another «after» have nothing in common functionally with already fulfilled (fully realized by them) «before» content, i. e. with the focal NUU-VVU-Configuration, further focusing in which is completely useless for the given human Focus Dynamics qualitative development process (due to fully exhausted VLOOOMOOT and NNAASSMM potential). So, any «deadly situation» is reflected in Self-Consciousness of subjectively «dying» human as a regular release from everything that obstructed the given human FD confluence with already existing — more ampliative — part of the given ASTTMAY-RAA-A-Parvula's (human «soul») *coherent* ethereal content.

4.0549. Usually, people perceive ASTTMAY-RAA-A-Parvulas (in tragic life situations and agonal — «near-death» — states) as fragmented Form-images of their subterransive OLLAKT-DRUOTMM-systems (from biochemical viewpoint — pseudo-sensory hallucination effects), which are activated in «person's» Self-Consciousness informational space due to brain hypoxia generally occurring at strong emotion or heart failure (pharyngeal and corneal reflexes loss at full brain ischemia). Hypoxia triggers functional paralysis of all cellular bio-Creators, suspension of electric activity, and synaptic transmission in nerve cells, which automatically reorient all realizational «person's» Self-Consciousness functionality from the fixation mode on Focus of Close Attention into identification mode with *the most corresponding to the given psychical state* Focus of Dual Reflection<sup>10</sup> of subterransive ODS.

4.0550. Alternatively, it can be all possible NUU-VVU-Form-Types' *transparentive* analogs, depliatively (i. e. only in the range of INGLIMILISSA- and ARGLLAAMUNI-Iissiidi SFUURMM-Forms) synthesized through the lluuvvumic pair's (ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence) covarllert combinations of low-frequency OO-UU-attributes with equally depliative OO-UU-attributes (for example, atributes of ALL-Steadiness-ALL-Stability, ALL-Voidness-ALL-Vacuumness, ALL-Integrity, ALL-Aspiration), which are more covarllert to our Synthesis Scheme than the PCQ's ALL-Unity ampliative attributes. Though, those plasmic analogs, which FDs reflect various protoformal development Directions within the lluuvvumic birvulyarity type, possess at the manifestation in our STCs' groups (due to their peculiar three-invaderentalness) the certain, more universal — in comparison with our mixtum NUU-VVU-Forms! — properties and peculiarities (extraordinary mobility, optical insensibility for our sight organs, increased penetration through material objects, and others), but, since they are synthesized from SFUURMM-Forms typical of two low IISSIDI-Centers' karmic Channels, their intelligence and intellectuality Level leaves much to be desired in most cases of their spontaneous realization among us.

4.0551. To conclude, a FD of each simultaneously focused by Us Self-Consciousnesses Forms represents the collective creativity of uncountable different-Qualitative Form-Creators, which subjectively define every specific version of their (i. e. subjectively «personally yours!») countless, constantly changing each other Existence conditions via qualitiveness of decisions collectively taken by them. That qualitiveness degree (which also means efficiency of possible «personal» realizations) depends to a huge degree on combining OO-UU-attributes covarllertness: The higher the objective compatibility of SFUURMM-Forms is that are being synthesized between each other with specific invaderentness of the given STCs' or CSRs' group, the more effective (easier, fast, more precisely) amitsirational tendencies typical of the given FD will be carried out.

4.0552. When qualitiveness of taken by you decisions constantly provokes functional conflicts among different-protoformal Form-Creators (including brain bio-Creators, DNA, and other biological organism systems), most actively interacting in FD, the amitsiration process, interchangeably carried out in any qualitative Levels, cannot keep up with the states necessary for SFUURMM-Forms exhibition, which correspond to each of these Levels, and therefore does not lead to anticipated by you results (due to the lack of realized by you decoherent Energy Potential, which is reflected in your surrounding reality according to such parameters as «time and implemented efforts intensity»).

10 More or less the same what happens during deep Meditation; particularly for this reason Meditation should be done in the most ampliative psycho-mental states.

4.0553. However, when all creative dynamics of your Thoughts, Feelings, and Actions become more harmonious with lluuuvvumic Synthesis Scheme formation Principles (HIA, HSI, immunitant Responsibility, humanitarian Freedom, and others) and all your «personal» Aspirations, realized with the sufficient for their exhiberation Energy-Potential, do not aggravate tensorsness state with the goals and tasks of the most Self-Consciousnesses Forms of surrounding you reality (i. e. represent high covarllertness among Form-Creators' FDs of different-protoformal Synthesis Schemes), the efficiency of your subterransive amitsiration into more ampliative human CSRs' conditions considerably increases.

4.0554. So, trying to weaken peculiar to many of you tendency to fixate your FDs on much more amplificational Macrocosmos's Levels like on something *outside* «you» (for example, on interpretations such as «God,» «Absolute,» and similar Conceptions about the highest realizational possibilities), I believe it is necessary to draw your attention once again to a very important peculiarity of your eternal Existence: The main factor, which functionally differs realizational possibility of FDs of our «current» Self-Consciousness NUU-VVU-Forms from practically limitless Creative Realization possibilities of Macrocosmos's HCCI, is not some «external» and «unattainable» to us State. It represent a deepest, internous Essence of «originally» peculiar to Us Nature, Which is never separated objectively either from «us» (presently focused by us Self-Consciousnesses Forms) or from our Focus Dynamics.

4.0555. The difference between realizational possibilities of «us present» and «Us absolutely developed» is only in the qualitiveness of Interests, consistently initiated in various Space-Time conditions. In our case, creative Interests show quite limited (via unsubstantiated taboos, false Conceptions, lack of knowledge, and understanding of more objective Causes of happening things) set of impersept-cruvursorrt signs combinations of one type birvularity, while through slloogrentness of FDs of Us — as SS-AYIYLG-SS-SS- AYY-SSS! — an endless multitude is simultaneously represented of all possible birvularity types, powerfully balanced between each other via geyliturgent or liyllusceeve focal-ethereal interconnections. So far that impersept-cruvursorrt tendency is present in our FDs, we cannot Self-identify with the Self-Consciousness of the Macrocosmos's HCCI.

4.0556. In other words, the Main Scriptwriter and Director of all the endless multitude of our surrounding Self-Consciousnesses Forms, which are simultaneously realized in the endless changing flow (process) of all possible life circumstances and situations, is not a certain, idealized and existing somewhere outwards «God-Absolute,» but there are We who transgressive-multipolarizationally converge via Our FDs (simultaneously Self-spread) into Everything Being as an endless multitude of different-Qualitative «parts of Ourselves» — duvuyllerrtly and creatively self-sufficient Elements of the United Collegial Cosmic Intelligences' slloogrent Focus Dynamics, duvuyllerrtly integrated with Each other into all the variety of Self-Consciousnesses Forms and CCIs by the principle of the most qualitative resonating. In any case of subjectively perceived by us situation happening seemingly «outside Us,» there is nothing We do not represent and nothing in which manifestation We do not objectively participate.

4.0557. As a matter of fact, We — by peculiar to all of Us realization Essence — are countless heterogeneous Interpretations of all OO-UU-Entities multipolarized in the general FD of the Macrocosmos's HCCI through narrow-specific peculiarities of various creative manifestations,

typically initiated in Our sllougrent focal Configuration in various exhibition conditions. In Our irresistible Aspiration to absolute consummatization in the highest Self-Consciousness Levels (restoring full Harmony with primogenitive SSS-State), We (as OO-UU-Entities' «projections») resonationally acquire inside Ourselves the eglleroliftive Potential that fully corresponds to our «current» Interests and realizational Conceptions and subjectively self-identify (i. e. perceive «ourselves» as Forms) either with TOO-UU-Entities' (CCIs) possibilities or with SVOO-UU-Entities' (Self-Consciousnesses Forms) possibilities providing thus absolute focal structuring of the whole Macrocosmos's skrruullerrt system.

4.0558. Obeying objective influence of Cosmic Laws and Their Principles, We (as Self-conscious Forms of joint realization of Energy (Form-Creators) and Information (Info-Creators) holochronely-simultaneously formed in skrruullerrt system an endless multitude of subjectively particular different-Qualitative Levels and sublevels of energy-informational Activity of SSS-Entity's Self-Consciousness — Plasmic Forces Diapasons, all the multitude of which sllougrent Focus Dynamics' peculiarities are reflected through exhibitional properties of various Form-structures of Space-Time.

4.0559. The realizational basis (informational filling) of any of Form-Creators' Focus Dynamics in these structures — *in our current exhibition mode* — is OODDMII-Entities' ethereal Configurations (SFUURMM-Forms of all the multitude of different-protoformal Ideas), which narrow-specifically diversify through subterransive Perception systems of each Proto-Form and get specified in their Form-Creators' FDs into all the endless multitude of IISSTLLII-Entities (*mentally* — equitably-rationally, logically-analytically — expressed SFUURMM-Forms) and AAYLLII-Entities (*psychically* — aesthetically, emotionally — colored SFUURMM-Forms). These Entities, creatively interacting with each other (through mutual for them FDs) via peculiar to them covarllertness attributes, do jointly structure surrounding them Space-Time via qualitatively corresponding to them SVUULLII-Entities («karmonational» conglomerates of all possible Desires, creative Interests, Consistent Intentions).

4.0560. All these Entities represent subjective Forms' creative manifestation of Info-Creators' «projections» (SFUURMM-Forms), while Creators-KARMOIDS' realizational, manifestation Forms (in 2–3–4 dimension conditions!) are «karmonational» SKUR-URR-RU-Entities (f-Configurations, emerged via energy of words or specifically interpreted sound combinations) and NUULL-GRAA-Entities (particular results of psychical — biochemical and electrochemical — bio-Creators' efforts), which conjointly stimulate to manifestation through physical actions and choices all the organizational Principles of some Self-Consciousnesses Forms exhibition. The latter do structure «materiality» of the given type. In fact, their joint resonational interaction resulted in simultaneous formation of subterransive and collective types of various Proto-Formal subjective Realities, typical of all the multitude of different-Qualitative Space-Time Modes.

4.0561. Here, we should particularly note also subterransive protoformal specific (realizational direction) of sense bearing Essence formation process in these Entities' various Configurations combinations. For example, being formed, according to diffuzgent Principle out of the multitude of ethereal Information different-protoformal particles somewhat compatible with each other, it would seem that «the same» (in somebody's subjective judgment) SVUULLII-Entities (fear, happiness, melancholy, joy, success, popularity, aggression, envy, jealousy, hatred, and suchlike), at

their simultaneous realization through various Proto-Forms' FDs (or various protoformal Directions of one Synthesis Scheme) may be motivated (i. e. modeled for exuberation) by completely different subjective reasons, reflected in FDs by completely different by Meaning IISSTLLII- and AAYLLII-Entities. The same can be said also about possible difference in meaning between, seemingly, «the same» (in external subjective perception) SKUR-URR-RU-Entities and NUULL-GRAA-Entities.

4.0562. For example, the same sound combination, expressed through various Proto-Forms Perception systems, may be completely diametrical to each other by the Meaning structuring them. Various Form-Creators can express various Aspirations and Interests through as if «the same» psychisms (hormonal reactions) in a «person's» Focus Dynamics. Meanwhile, very often such antagonistic realization types are simultaneously manifested in a «person's» Perception system in the forms of contradictory and mutually exclusive each other Thoughts, Feelings, and Desires, out of which he/she has to choose just one. That choice «Correctness» (universalism) degree depends on the presence or absence in subterransive ODS's part of the Experience already synthesized in a corresponding way: If it changes, the advantage in the given choice belongs to more ampliative part of psycho-mental activity; if not, the choice corresponds to lacking Experience.

4.0563. Form-Creators' Focus Dynamics of each subjective Reality (either subterransive or collective) are potentially (i. e. multipolarizationally) structured by countless multitude of similar energy-informational «copies» and «encodings,» simultaneously imprinted (dynamically fixed) in all its (CSR's) slloogrent «matrixes» of its qualitative Levels. Depending on the prevalence in our FDs either of invaderental (lluuvvumic) or of vecsative (different-protoformal) Form-Creators' tendencies, you are always resonationally inclined to «unpack» (in informational space of your temporal ethereal constituent or subterransive ODS) Configurations of particularly those SVUULLII-, IISSTLLII-, AAYLLII-, SKUR-URR-RU-, and NUULL-GRAA-Entities' varieties, which can most fully represent your «current» Interest, Aspirations, and essential needs in the given moment.

4.0564. *Seemingly* the same people in various states and circumstances may respond via absolutely different psychological reactions and physical actions — through completely different Thoughts, Feelings, Desires, words, and choices, not realizing why in some identical life situations they behaved particularly that way and exactly opposite way — in the others. To the contrary, *seemingly* the same (but in fact — different!) bio-Creators' hormonal activity, realized in various environmental conditions, can initiate in a «person's» Perception system absolutely different (and even qualitatively diametrically opposite) biochemical reactions and therefore psychological states. For example, response reactions for major release of adrenaline hormone in blood may be not only fear and worry (reaction for the danger) or aggression (survival SFUURMM-Forms stimulation), but also physical hyperactivity, endurance, high spirits, and powerful sexual libido.

4.0565. Specifics of each subterransive, creative «personal» realization fully depends on Qualitative character of different-protoformal Form-Creators, most actively organizing its Focus Dynamics in the given moment. In daily life, it is almost impossible for any of you to figure out particularly which Proto-Forms' SFUURMM-Forms do structure your Thoughts, Feelings, and Desires mostly, and also why in some particular states (for example, during sexual fulfilment, irritability, insecurity, envy, fear, and aggression) you are inclined to use various sound combinations, very similar to the animal

realization ways in similar states. Certain degree of so-called «behavior deviation» is indicative in this regard: obtrusive need in delivery of curses, swear words, rude statements, unconscious desire to give a physical pain to a partner. All these primitive attributes are a vivid example of high activity of various animal SFUURMM-Forms' fragmented particles in your FD. Surely, let's admit that during various intellectual-altruistic states nobody from you will want to swear aggressively, to cry out wild gutturals, to laugh loudly, or to hurt someone!

4.0566. We cannot state unequivocally that all these tendencies, actively stimulated and guided by your direct realizable desires, are the product only of your subterraneous creativity and not brought into your FD «from somewhere outside.» Moreover, typically, passionately, and thoughtlessly (unconsciously) wasting all your psychical Potential and physical efforts for quickest achieving of another goal, you even do not know, from which FDs of representatives of Collective Cosmic Intelligence your brain bio-Creators have borrowed given Thoughts, Feelings, Desires, and narrow-specific Conceptions. Because they, being actively generated by diffuzgent Proto-Forms Form-Creators somewhat covallert with our Synthesis Scheme by Resonationness Principle, are attracted into people's life creativity without any hindrance, «cut into» it, and thus may control your FD's subterraneous content for quite a prolonged period, determining most of your choices qualitiveness. You will consider naively that all the «current» changes in your Life happen only corresponding to your own wishes and Interests.

4.0567. Thus, there are true realities of our inertial Existence in mixtum NUU-VVU-Form-Types versions: actively and unconsciously engaging in our Focus Dynamics, different-protoformal SVUULLII-Entities SFUURMM-Forms and in our own way synthesizing peculiar to them Experience, we thus constantly improve in *human* type awareness, which lets us with time, forming on its bases our own — Human — ampliative Conceptions, increasingly, easier and more radically brush away (through scrupulous analyses of our choices possible consequence) those options of not positive and thoughtless decisions and those rash selfish desires attributes, which — in *our* deep conviction — do not agree with more ampliative Conceptions of lluuvvumic type birvularity.

4.0568. SVUULLII-Entities cannot be divided into «bad» and «good,» into «ours» and «not ours,» because any Wish, multipolarizationally manifested in your Self-Consciousness's FD, depending on your NUU-VVU-Form-Types' Focus of Creative Activity qualitiveness (NNAASSMM and VLOOOMOOT parameters), always has equal possibilities to be realized in surrounding you reality either with actively creative or with potential-destructive function. All the peculiarities and preferences, peculiar to SVUULLII-Entities, do not depend any way on Self-Consciousness Form which «unpacks» them (upon availability of corresponding options they are capable to be simultaneously realized through any Proto-Form) and totally obey Resonationness Principle. If some f-Configuration possesses creative Potential analogous to its content, it will be attracted to exactly this Form's FD.

4.0569. Continuously attracting in own Self-Consciousness's FD various — from all different-qualitative variety — SVUULLII-Entities, you, via your subjective attitude to them (your tastes, attitudes, sympathy, or antipathy), instantly kleks all their content («emanations» and «psychonations»), you «reject» something and correct something informationally corresponding to Conceptions that have already been synthesized by you. Thus, you unconsciously provide their shapeless ethereal

Configurations with specific, peculiar only to you, Form-images, which are immediately «reprojected» into «your» subterraneous ODS and become not only the part of your empiric Experience, but also not completely synthesized part of your own Creation (so called «Destiny», «Karma»), which you will have to experience in all possible circumstances many times, in order to finish synthesis of the given SVUULLII-Entity's sllougrent Configuration in its much deeper exuberation modes.

4.0570. Therefore, Oriental teachings say, «Karma is neither bad nor good,» because it represents your «debts» to your own Creation (What is «you» in its informational Essence!), which cannot be manifested in more perfect image to you are able to synthesize more ampliatively each of ever realized by you Desires in every peculiar to it multipolarized possibilities. It does not completely mean that once having shown a strong Interest to something and not realized it fully, you will have to return to that option again. All that is carried out in your parallel development scenarios, and the necessity of your additional «return» to such realization fully depends on qualitiveness of your «current» FD: The more ampliative it is, the less amount of more primitive «debts» you will have to return to your less qualitative versions of «you.»

4.0571. There is no difference for the Desire Entity between who is about to carry out some aggressive or invasive actions — a human, a microscopic virus absorbing cell content, or a small bacteria, which generates million bacteriophages (viruses) in order to expand its ecosystem through taking over someone else's territory. Also, it can be Stellar Entity spatially «absorbing» another Star Creativity Sphere or the whole Galaxy actively intruding someone else's cosmic premises... In other words, all possible analogs of the same Desires' SFUURMM-Forms are connected not exactly to a certain birvularity type, but may equally structure FD both of people and animals, plants and microorganisms, as well as all the variety of fermions and diverse cosmic objects.

4.0572. Either invasive and destructive, or, vice versa, creative and constructive realizational SVUULLII-Entities' Essence may simultaneously and differently express themselves through any Self-Consciousnesses Forms, in which f-Configurations there is at least the smallest part of qualitative similarity with the content typical of SVUULLII-Entity's ethereal Configuration. In every particular case, the question about a possibility for any given SVUULLII-Entity's active interaction with any given Self-Consciousness Form is solved depending on its creative potential availability: For the initiation of the identical desire in some virus or bacteria, it is enough to join efforts (by similar signs) only of several fragmented Self-Consciousness (in microorganism reproduction process the initiating desire power increases in proportion to the quantity of newly recreated species which continue the same tendency).

4.0573. Direct psycho-mental infecting an animal or a human with some desire requires already thousands and millions of such narrow-specific SFUURMM-Forms conglomerates, which in sllougrent Focus Dynamics of *every* CCI type are resonationally assembled (according to religious belief types, political, social and cultural interests, gastronomic and sexual tastes, scientific knowledge, and other creative directions) into global ethereal modules or so-called «Egregores.» Effective impact on Planetary and Stellar Entities' FDs, simultaneously structured by Focus Dynamics of countless multitude of different-protoformal CCIs, engages zillion of all possible global construction, in a corresponding way aggregated according to similar for Them (for a Planet or a Star) birvularity

types into very powerful arrays of heterogeneous and different-Qualitative ethereal Information.

4.0574. It should be mentioned that the fact of actual SVUULLII-Entities' existence is known in modern science already for quite a long time and conclusively proved by multiple experiences with the usage of the most sensible equipment. However, understanding the real Nature and functional value of these «non-material» (for our usual perception) entities remains totally under wraps for our scientists. Popularly known from old (various religions and esoteric teachings) «spirits» and «ghosts» — *low-qualitative* subtle-material beings, carriers of various psychisms and desires, — are represented in our exiberation diapason by a huge variety not only of simplisparentive Self-Consciousnesses Forms of near-lluuvvumic development Direction but also by all the multitude of «non-material» transparentive beings of different development levels which specifically and in a different ways initiate in the given Space-Time conditions various realizational Interests of different-protoformal CCI's.

4.0575. Very often, informational Essence, peculiar to the specific manifestation in your FD of any given SVUULLII-Entities' fragmented Self-Consciousnesses, can be identic for multiple Proto-Forms' representatives (for example, aggression, hatred, greed, jealousy, envy, and so on) and can orientate Form-Creators in quite narrow creative manifestation perspective between such subjective notions as «good» and «bad.» In so doing, peculiar to them ethereal Information, which is narrow-specifically kleksed corresponding to certain Focus Dynamics's UU-Factor, can be completely differently expressed in every case of interaction in sounds (words) and actions (reactions) of various beings, depending on the given Self-Consciousness Form's subterransive peculiarities and those specific abilities which are determined by particular conditions of their exiberation.

4.0576. Same regards OODDMII-Entities universally used by you in live creativity — active carriers of ethereal Essence of all possible different-protoformal Ideas, which you, as well as many other Proto-Forms representatives, do structure with your global and «current» (immediate, everyday) goals, plans, hopes, and wishes. These goals represent (in your FD) basic set of subjective Conceptions about the most desired and favorable («personally» for you!) relations, states, situations, circumstances, and other factors of your psycho-mental and physical interactions — both with «yourself» and with your surrounding World. All your notions reflect in the surrounding reality a regular change of countless subjective tendencies, determining qualitiveness and creative orientation of every moment of your Life. Continuous analysis of the Conceptions about things satisfying or disappointing you «personally» forms your FD's subterransive amitsirational process into those STCs and CSRs which Content subsequently becomes the subjective personification of your «personal future.»

4.0577. Any Goal is very changeable configurationally in its specification and logical construction, since it is structured by the multitude of very mobile (transitive, temporal) and not completely finished (intermediate) Desires, each of which gets realized in a FD through certain Words and Actions (behavior, choices). However, real Significance of any goal, as well as eglleroliftive impulse to its realization, is determined by a certain Idea, which reflects a certain part of the Experience, simultaneously synthesized (kleksed) both in your subterransive ODS and in human Collective Consciousness of the given CSR.

4.0578. In every dimensional diapason and in every Synthesis Scheme, the specifics of the amitsirational process of any given birvulyarity is most fully and accurately reflected particularly through the activity of certain OODDMII-Entities in FD. For example, the lluuuvvumic development type is defined by the universal Idea of intellectual-altruistic Serving to the whole humankind, which does not include indulgence to and activation of egoistic different-protoformal tendencies in human Collective Consciousness, but is focused on intensive cultivation of all the basic LLUU-VVU-signs, which are *intellectually*-actively performed through such *high-sensual intuitive* states, as Mercy and Compassion, Empathy and Understanding, Openness and Tolerance. Particularly the presence in a «person's» FD of the best conditions for the stable realization of all these states, manifested («projected,» generated) through global lluuuvvumic Idea by Form-Creators from the most ampliative human CSRs, provides the effectiveness of the given «personal» Self-Consciousness's subjective amitsiration into the most favorable for human development Existence modes.

4.0579. Gradually, deeper perceiving and stabilizing in your Self-Consciousness the general Meaning of some OODDMII-Entity's SFUURMM-Forms in relation to your «current» NUU-VVU-Form-Type's specific FD, you consistently balance emerging in so doing tensors via already available to you Conceptions and do form in Self-Consciousness svilgs-spherationally a certain subterransive Interpretation of the Idea (OODDMII-Entity). That Interpretation would consider among other things (yet incomprehensible and unavailable for your perception) the «personal» interest which is peculiar for your global life goals. Therefore, in order for your realizational decisions to be most effective, you should necessarily consider the fact that genuine Ideas (not one of the countless multitude of Ideas' options egoistically interpreted by someone) are «projected» into your FDs from collective Subconsciousness's most ampliative levels (or even by Supraconsciousness Form-Creators!), and, therefore, their ethereal Configurations are absolutely deprived of mercantile SFUURMM-Forms of the personalized Self-Consciousness.

4.0580. Focus Dynamics of the most ampliative NUU-VVU-Form-Types' analogs which has already formed the most qualitative versions of our joint «future» is fully deprived of those primitive-predatory and selfish Conceptions, which are so actively initiated in the «present» Perception systems of billion people by all possible SVUULLII-Entities (depliative SVUULL-VVU-conglomerates), reflecting limited Interests of all possible less developed flora and fauna CCIs' representatives. In «future» human CSRs all these Self-Consciousness Levels' Aspects will have already been synthesized quite deeply with multiple *covarllert* development Directions' attributes. Therefore, many Human ideas, intuitively «unpacked» from ampliative Levels of the collective Subconsciousness's informational space, possess highly creative universalism, which realization reflects equally in the surrounding reality amplificational Interests not only of people but also multiple different-protoformal CCIs.

4.0581. There is such Latin expression, «*Alta petunt*» («Aim high»), which can be interpreted as «High Idea inspires, sustains, gives power.» That expression has deep amplificational Meaning, because any ampliative Idea's ethereal Configuration is directly (resonationally) connected with that dissipative (potential for you «current»!) Energy, which had already been simultaneously focused (put) in it by millions and billions people from those STCs' and CSRs' groups where the given Idea is successfully realized or has already been realized throughout the multitude of its «intermediate» interpretations. Your «current» Focus Dynamics will be transformed into decoherent Energy of your decision through that part of dissipative Energy of your possible prosperative «future» with which

version your Conceptions will be able to resonate maximally and through which Essence you will actively start self-realizing. That will result in the successive «formation» («materialization») around you of more favorable objective circumstances corresponding to your expectations.

4.0582. The higher and more unconditional your confidence will be in the favorable result of Idea, fulfilled by you, and the less continuous periods of fear, despair, unbelief, and all possible doubts will be in the certain success of started by you work, the higher supply of narrow-specific decoherent Energy (meant only for this purpose!) you will possess, and therefore the more intensive and smoothly this process will be carried out (through your FD) in the surrounding reality's exhiberational specifics. In so doing, you should keep in mind that decoherent Energy can be expressed in your FD not only through the powerful initiation of your psychic and physical efforts but also through the realization of various financial-economic and social-politic state resources (money, material values, agriculturally used areas, social interest, favorable changes in legislation and suchlike), resonationally formed and «engaged» by the given Idea SFUURMM-Forms into the process of it realization («materialization»).

4.0583. In order to embrace fully and deeply (more comprehensively) ampliative Meaning of some OODDMII-Entity and to implement consistently structuring it SFUURMM-Forms into the particularities of surrounding you reality, from the very beginning, you should refuse the temptation to get your own selfish benefit with its help. The most important Thing here for you should be *an ability* to amitsirate via your Self-Consciousness into the most favorable for you development scenarios through the process of intellectual-altruistic realization of this Idea effectively. In those development scenarios, the given Idea had already been carried out in its most ampliative versions. The most important factor for the successful realization of any high-qualitative Idea is the obligatory implementation of the «personal» DISinterest principle by the prevailing majority of the participants in the given process.

4.0584. Because once there starts transgression of unified Idea's universal SFUURMM-Forms onto the countless multitude of own private mercantile Interests of its carriers, Its universal Essence immediately subterraneously diversifies onto all the multitude of different-protoformal SVUULLII-Entities, fragmentary perceiving themselves only in the artificial specifics of their typical subjective relations and selfish states, behind which the original Meaning of the given Idea either fully loses or very strongly deforms. This is how in various types of human CSRs, thousands of amplificational Human Ideas, which, having been implemented in other scenarios, were able to influence powerfully the acceleration process of the whole human civilization development, were reliably «buried» in order to please ignorance and greedy for fame ambitions of pathetic rulers, robed in absolute power, or «personal» interests of state officials endowed with huge powers and authority.

4.0585. Diversifying into certain creative directions (many subjective Interests, typical of every participants of highly Universal Idea), SFUURMM-Forms, structuring Its most ampliative motivational core, get immediately transgressed onto different Focus Dynamics Levels and, resonationally interacting and combining between each other according to their peculiar Meaning, self-organize into the countless multitude of rather less qualitative and more limited in their self-perception ego-interpretations of the given Idea — egregore Entities (egregores of all religions and beliefs, philosophy and natural science, interstate policy and social relations, separate sciences and theories, professions

and preoccupations, and so on). It is the realizational activity of all different-Qualitative egregores' diversity that represents in every CSR's sll oogrent FD multiple creative tendencies, which are peculiar to various CCI's types, jointly exhibited in every sublevel of the given dimensional diapason.

4.0586. In its turn, all the Creative Activity of any egregore is based on the realizational Potential of structuring its SVUULLII-Entities, capable of reflecting its Interests through Self-Consciousnesses Forms' FDs to varying degree. It generates in the given Space-Time the conditional, decoherent Energy of those Desires and Aspirations which correspond to the Essence forming them. Thus, an amplificational Idea, consistently and multipolarizationally «packed» into different development Directions, subjectively decomplements onto the countless multitude of its selfish conceptions, each of which has very little in common with Its original universal Meaning. Iissidiology Knowledge, totally based on intellectual-altruistic collective Subconsciousness's and Supraconsciousness's SFUURMM-Forms, is called to restore consistently through Perception systems of the most developed people of the planet that deep Essence and to develop It precipitately as a new — much more universal! — «future» humankind's Collective Consciousness Paradigm.

4.0587. The main indicator of your possessing a sacred «Master Key» degree, with which help you will open in your Self-Consciousness informational space multiple unperceivable «Gates,» effectively leading you out into more and more favorable versions of our mutual Human «Future,» is high-qualitative state and ability to use consistently the powerful intensity of these ampliative Knowledge's SFUURMM-Forms in our surrounding reality.

## **Chapter 6. Formation principles of the causal base of Space-Time in the Tertiary Universal Illusion exhibition conditions**

4.0588. We have found out that there is no point to speak about any «thoughts» and «feelings» — according to our understanding and Conceptions! — until we start to consider *combinations* of actual initiators of these qualitative states («emanations» and «psychonations») towards realizational subjectivism of some specific Focus Dynamics of Self-Consciousness Form's Form-Creators. There are no Macrocosmos's, no SFUURMM-Forms' (Thought-Forms, Feeling-Forms, and Desires) different-Qualitative analogs outside Focus Dynamics (with peculiar to it consummative-simultaneous holochronness) structuring FD but only Potential primogenitive Information State, tending to its connectiveness (i. e. to the absolute harmonized balance).

4.0589. At the consummatization Act implementation of diverse SSS-fragments, Ethereal component («projections») of already balanced Information part enters resonational interactions with its unbalanced (dissonational) part (Focuses), in the result of which any Self-Consciousness Form's Perception system narrow-specifically reflects (as Thoughts, Feelings, and Desires) subjective Conceptions about «itself» and its surrounding reality.

4.0590. Thus, all Thought-Forms, Feeling-Forms, and initiated by them Desires represent subterraneous SFUURMM-Forms' options (or their ampliative analogs). Dynamic sllougrent state of Form-Creators' Focus Dynamics (*with evident prevailing* in them of «emanations'» Creative Activity structuring MENTAL-Plasma) appear through the realization of Thought-Forms, while Feeling-Forms appear in Focus Dynamics on the condition of the presence in them of *evident primariusiveness* of feeling-emotional «psychonations'» specifics structuring astrophysical Universal Illusion part. Therefore, in simultaneous-inertial sllougrentness in Focus Dynamics, any Self-Consciousness Form's Form-Creators always deal only with «local» manifestation of subjective SFUURMM-Forms, no matter in which terms they are defined («karmonations,» Thought-Forms, Feeling-Forms, UU-VVU-Forms, Form-copies, UU-VVU- and FVU-conglomerates, FVU-modules and FLUU-VVU-doubles, and also many others from inexhaustible ethereal content of diverse ODSs and FLCs).

4.0591. Any SFUURMM-Form is synthesized from «emanations» and «psychonations» (in corresponding to it Space-Time conditions) only in the immediate — holochrone! — moment of its initiation in ODSs and FLCs and its manifestation through the specific Focus Dynamics, which represents Interests (Creative Potential, VLOOOMOOT) of some Form-Creators of a certain Qualitative Level of any given Self-Consciousness Form's informational space. However, it is only a potential project («projection») of possible realization of that sllougrent Essence, which the given SFUURMM-Form represents in the specific Space-Time «point»: In some conditions it was immediately «taken» back to ODS, having been manifested in FD weakly resonant with it, by more powerful and more achievable Interests; somewhere, for its realization there was not enough factors (patience, assiduity, compromise, technology, finance and so on); in some development scenarios' necessary factors were present to varying degree, what let it «materialize» in a more depliative or a more ampliative Form.

4.0592. Any SFUURMM-Form (as *potential Reason* of any realization) becomes a Karmo-Form (*realized Consequence*) only when specific focal Energy-Potential will be applied to its ethereal Configuration. It should be sufficient for «materialization» of its peculiar informational content in the form of some part of «surrounding reality» (CSR). Let me remind you one more time, there is no — exclusively understood by you — «materialization.» There is only concatenational-convergent amitsiration of human Focus Dynamics, which has initiated the given SFUURMM-Form, into those development scenarios where holochrone exuberance of its typical informational Essence becomes possible only due to the presence in the given FD of all creative indicators («materialization» energy-intensive factors) necessary *for the given option of its manifestation*.

4.0593. When a SFUURMM-Form's energy capacity is not high enough, the most depliative versions of its sllougrent content are manifested while, in the conditions of high energy capacity in the surrounding reality, its more perfect Forms are manifested out of all their multitude. Qualitative difference between these, simultaneously existing in various scenarios, manifestations might be as much different as it is between possibilities of performing mathematical operations with the help of wooden beads (stones on a wire) and a photon computer processor.

4.0594. Moreover, that process of every human Focus Dynamics' multipolarizational amitsiration into any possible for it development scenarios is always carried out absolutely subterraneously regardless of thoughts and behavior of people around in the given situation. Everything, ABSOLUTELY

EVERYTHING in your Life happens directly according to how much the Conceptions of each of you about «yourself» and about all possible perturbations qualitiveness, happening in your surrounding reality, are INDEPENDENT from the subjective Conceptions of other people, who have viewpoints opposite to yours on the given — the same! — situation.

4.0595. If you are able to keep quite stably and actively and to reveal in FD states of your confidence and assurance that everything around you (no matter how destructive forms it could manifest!) happens according to particularly your Interests («Yeah, achieving of that is required to change radically and qualitatively something in the surrounding reality!»). If it does not matter how other people see this stuff, everything will be carried out particularly in the Direction where the manifestation of *expected by you* results will be possible.

4.0596. All the rest, somewhat not satisfying you personally, perturbations in surrounding you subjective Reality represent natural consequences of your own depliative states: self-distrust, instability and lack of specificity of your own Conceptions (you do not know what you want), incomprehension of any amitsirational process execution Principles (i. e. shallow understanding or lack of Iissiidiology knowledge). Let me remind you that each of you exists only in *your own* — personalistic — World, which is structured by *your* subjective Conceptions about anything! Your subterransive Reality starts to gain *expected by you* features only as your (not someone else's!) Conceptions start to dominate over Conceptions of those who are possible to influence your own Focus Dynamics at least somehow (Mass Media, Internet, friends, relatives, acquaintances, and so on).

4.0597. Let's consider, for example, the book you are reading right now on paper or on a tablet PC. Before they got manifested for you in the mode typical for them, they *always* had been «existing» holochronely in human ODSS' and FLCs' particular Creativity Spheres as potential SFUURMM-Forms' projects of their own, many manifestation versions. As those versions, the books could simultaneously exuberate — at the presence of sufficient quantity of decoherent Energy — in multiple different-Qualitative scenarios of your development (STCs). That Energy can be expressed, in the conditions of Focus Dynamics' multipolarization of all possible your «personalized» Interpretations, in different ways: in the forms of clearly defined word combinations (the description of the Essence of an Idea) and consistently accompanying them psycho-mental, physical, financial, technological, and other material efforts.

4.0598. Before this, various but very unspecific Conceptions about that book and about the tablet PC had structured their authors' FDs in the form first of almost imperceptible and not quite understandable Thought-Forms (UULLU-U-Entities), which, strengthening and transforming through decoherent Energy of brain neural networks' electrical impulses. Then, they initiated for Creative Activity (through purposeful stimulation of hormonal bio-Creators of endocrine system including limbic brain) AAYLLII-Entities (Feeling-Forms), corresponding to them by the content. Entering more and more stable covarllert interconnections with each other, these SFUURMM-Forms were concretized into Form-images (UU-VVU-conglomerates) and concatenationally transformed (were established, «rooted») in the forms of their typical ethereal SVUULLII-Entities (i. e. subjective Desires structured by definite Thoughts and Feelings).

4.0599. In the process of even higher stabilization in them (through FDs of authors' various «versions») of slloogrent content mutual particles, similar Thoughts and Feelings, most corresponding to Form-Creators' essential Interests of the given FDs, were progressively structured in the forms of specific words and phrases (SKUR-URR-RU-Entities), which Energy, being realized through the activity of definite hormonal bio-Creators, encouraged the given «person's» NUULL-GRAA-Entity to results-oriented choices and actions.

4.0600. However, Words and Actions represent only *potential* possibilities (starting «material» basis) for the transformation of any SFUURMM-Form into Karmo-Form. As applied to mixtum NUU-VVU-Forms, they can be metaphorically called Karmo-Forms' potential «parents.» To make Words transformed into local physical Actions, and Actions into specific psycho-physical Consequences (actually Karmo-Form), their authors and direct realizers require applying constant amitsirational efforts, provided not only with psychical (electrochemical and biochemical) Energy of various bio-Creators but also with many other factors (biological, technical, economic, social, moral-ethic, and even political character).

4.0601. The most realizational (i.e. karmic) effect is reached when Words and Actions of some people (or other SFs), subjectively expressing SFUURMM-Forms' Essence of particular Idea (or some version for Its «personalistic» interpretations), provoke identical creative resonance (Interest) in other multiple people's (or SFs) FDs, thereby providing them (SFUURMM-Forms) with powerful energy resources for the «materialization» in the surrounding reality via own Form-Creators' Focus Dynamics.

4.0602. As you could notice, in all the endless variety of all possible development scenarios there simultaneously exist multiple both most depliative and most ampliative versions of Karmo-Form exhiberation (informational Essence) of seemingly «one and the same» (in the conditions of most qualitative FD Levels of the given Collective Cosmic Intelligence) amplificational Idea. However, in each case of «personal» analysis of these Karmo-Forms' qualitiveness, a particular nuance of subterransive Perception is certainly originated which is in the following: If we consider Karmo-Form's *slloogrent* f-Configuration from *more objective* (ampliative) viewpoint — i.e. without binding it to birvularity type and to the level of reflection of qualitiveness of their Essence through the particular Self-Consciousness Forms' FDs — they all are *already equally and qualitatively balanced* Karmo-Forms.

4.0603. While at more subjective analysis, any specifically considered by you Karmo-Form represents the integral of basic qualitative parameters of f-Configurations of all Karmo-Form's *more depliative* analogs, simultaneously exhiberated in various multipolarization spectrum (scenarios) of subjective Observer's FD of the given Karmo-Form (*seemingly* unbalanced version of subjective realization).

4.0604. At local overview, there is seemingly no other version of Karmo-Form at all (for the given Observer!): All depliative f-Configurations are slloogrently «packed» in a more ampliative one which can be directly perceived in the given mode, while its even more qualitative versions cannot be anyhow perceived. Therefore, from the subjective viewpoint we can talk only about one single

Karmo-Form item which is available to our Perception. All the rest versions — both more depliative and more ampliative than it — remain unavailable to us and unknown; therefore, they belong to the conditional category of subjectively (for us!) seemingly non-existing.

4.0605. Thus, any considered by us Self-Consciousness Form subjectively represents one single Karmo-Form, since its f-Configuration is already structured in different Levels by more or less synthesized energy-informational (causal, cause-effect) interconnections. Everything that will structure it afterwards (in its «future» Existence), has no relation to its subterransive Karma, yet, as it belongs to the other — «future» — Self-Consciousnesses Forms (Karmo-Forms).

4.0606. Out of any, subjectively compared by us, creative Karmo-Forms' states more *real* ones are always parameters of f-Configuration that has *already* been synthesized on more Qualitative energy-informational basis, which has multipolarizationally «absorbed» (concatenationally integrated) all the Existence Experience of the given Stereo-Form's less qualitative Self-Consciousnesses Forms. It turns out that in the subjectivism of slloogrent Existence of CCIs of all Macrocosmos Levels, the most objective thing is only *one* universal Karmo-Form, which is synthesized by Its HCCI's (SS-AYIYLG-SS-SS-AYY-SSS) Form-Creators' Focus Dynamics from all the multitude of focal-ethereal interconnections, structuring all the particular levels of skrruullerrt Form-system's slloogrent f-Configuration. All the rest Self-Consciousnesses Forms represent different-Qualitative exhibition types of Form-Creators' Focus Dynamics of Illusion, which possess different degree of informational objectivity.

4.0607. Considering *conditional* correlation of Karmo-Forms' qualitiveness, organized to manifestation with the help of our realizational opportunities, here we can definitely suggest that Karmo-Forms that are being synthesized by Form-Creators of collective unconsciousness (different-protoformal FDs) and «personalized» Self-Consciousness (FDs within lluuuvvumic SFUURMM-Forms) will always be less real (more depliative for the given Synthesis Scheme) than Karmo-Forms of collective Subconsciousness's Form-Creators (4–5 dimension), which f-Configurations, in their turn, are less ampliative than Karmo-Forms generated in the given birvularity type by Supraconsciousness Form-Creators' FD (5–8 dimension). Meanwhile, Supraconsciousness's Karmo-Forms — according to their energy-informational objectiveness — concede to Form-Creators' Karmo-Forms of such HCCI AYFAAR's Levels as Ultraconsciousness, Superconsciousness, Protoconscious, Hyperconscious, and Praconscious. In the same way, Karmo-Forms synthesized by HCCI AYFAAR (and Its 36-dimensional Analogs) are less real than HCCI AULMNIYSS's Karmo-Forms (IYYYYUULLSSMI-Entity, 36–48 dimension) or HCCI SYUILGSAIYY (AYYALLDMAAYTS-Entity, 48–60 dimension).

4.0608. All possible types of subjective Macrocosmos's Illusions, which represent by their Essence universal Consequences (slloogrent Karmo-Forms) of objective holochrone consummatization (through UPDR) of absolutely all Energy-Plasma's focal-ethereal interconnections, diffuzgently-multipolarizationally represent Universal slloogrent Focus Dynamics of different-Qualitative resonational interactions between Form-Creators and Info-Creators, intelligently organizing and comprehensively (different-birvulyartly) interpenetrating by Their joint Creativity absolutely all types of simultaneous exhibitions of the Highest Collegial Cosmic Intelligences of Universal Entities countless multitude, endless and unified in all Their slloogrent multi-dimension.

4.0609. Therefore, it is just impossible to determine objectively, where exactly, in which conditional Space-Time «point» some Karmo-Forms «end» (as a consequence of multiple Self-Consciousnesses Forms' FDs) and other Karmo-Forms' f-Configurations «begin.» All our similar divisions are only evident results of inertial functioning in the given exuberation conditions of our Perception systems, which are extremely limited in their realizational abilities by certain nutational (wave) diapason parameters.

4.0610. If we had an ability, without changing ourselves, to observe consciously the process of unlimited expansion and qualitative intensification of our Focus Dynamics manifestation spectrum in the surrounding reality, we would credibly make sure how concatenationally — through certain *duvuyllerrt-diffuzgent* interconnections — firstly, all f-Configurations of more developed people, visually perceived by us now, would solvate (resonationally «merge») concurrently into *slloogrent* f-Configuration of unified ampliative Karmo-Form. Then, it would involve less developed people with FDs too focused on different-*protoformal* Directions and then f-Configurations of animals, plants, minerals, archaeal organisms, all possible cosmic objects, atoms, fermions, and bosons...

4.0611. All these diverse Karmo-Forms, undergoing qualitative perturbation and gradually transforming — seemingly multipolarizationally «penetrating» via presently invisible for us *diffuzgent* interconnections, — into completely unusual for us f-Configurations combinations, would interfuse «right before our very eyes» into something whole and inseparable, more intelligent and perfect, more matching to the term «*flaks* analog of our quantum CSR.»

4.0612. If we were able to continue development of the conditional observation process for such qualitative-amplificational Karmo-Forms solvation in the modes of even more ampliative dimensional diapasons, we would be able to make sure «with our own eyes» that absolutely all the Tertiary Illusion's Self-Consciousnesses Forms represent diverse and different-type «details» of all possible kinds of unified functional Mechanism of That *slloogrent* f-Configuration *holochrone-simultaneous* exuberation. Each «detail» takes its own important part in the general Process of Its *inertial* (through different-Qualitative FD) functioning, without which all more harmonized between each other properties of the general Integrity would not be completely formed.

4.0613. Each of these Karmo-Forms exuberates in only its Space-Time conditions and in the strictly fixed mode of *duvuyllerrt-multipolarizational* concatenation, being realized through *svilgs-spherational* peculiarities of structuring its Form-Creators' Focus Dynamics; Form-Creators completely provide a Karmo-Form with Energy-Potential necessary for it «materialization» as the given STC's «point.»

4.0614. In order to understand «out of what it gets originated, and into what it turns,» let us thoroughly consider the Essence of inertial Formation Process (SFUURMM-Forms «materialization») of STCs and CSRs human types in nutational diapason of exuberation conditions, limiting our subjective Perception system with quantum interactions parameters. Being continuously performed in the process of *subterransive amitsirations* in some creativity and initiating (in ODSs and FLCs) «projections» of diverse SFUURMM-Forms, «we» (brain Form-Creators) actively manipulate this way all possible focal-ethereal interconnections, which have already «initially» (in the «moment» of

mercavgnation) been formed among all the different-Qualitative contents of all possible manifestation Rezomirals.

4.0615. Resonationally engaging in that process «projections» of any particular UU-VVU-conglomerates, «we» continuously «unpack» in our interstitial NUU-VVU-Configurations (through subterransive ODSs) new, more covarllert by some attributes interconnections and change with them already available, more impersept ones. Thus, we *appear to «complete» a regular (a little more ampliative than «precious»!) interstitial NUU-VVU-Form* for «our own» manifestation. Due to the similar qualitative transformations in Focus Dynamics, «we» constantly *appear to* carry out intra-Aspect, inter-Aspect, and inter-Qualitative Synthesis (profectively, we choose out of f-Configurations, *already formed* mercavgnationally in human spectrums of slloogrent Rezomiral, particularly those that mostly resonate with our «current» Interest) in the corresponding Levels of our slloogrent «personalized» Self-Consciousness.

4.0616. In the result of that Synthesis, new, more stable than «previous,» SFUURMM-Forms' options acquire a possibility for a subsequent realization in «our» Focus Dynamics in order to continue and to correct «our» subterransive amitsiration. It is necessary to note that such *duvuylerrt* process is carried out *multipolarizationally at once* through all diffuzgent development Directions, structuring human Collective Consciousness'ss *slloogrent* FD.

4.0617. Thus, Focus Dynamics subterransive quantization process reflects, in fact, concatenational-convergent kleksing (consistent amplificational universalization or ampliative change) of qualitiveness in focused by us NUU-VVU-Configurations of resonationally «unpacked» by Form-Creators Energy-Information (in the forms of continuously changing parameters of rotational quantum displacements), necessary to them for the performance of new — more complete and deep! — stages of lluvvumic Synthesis. As a result of unceasing (i.e. never interrupted!) realization of that inertial sequence, in various STCs' groups the process of multipolarizational amitsiration of ethereal «projections,» peculiar to Form-Creators' FDs of our «current» Self-Consciousness Form, gets an opportunity to simultaneous realization into new NUU-VVU-Configurations, structured by qualitatively different, more synthesized by various attributes, SFUURMM-Forms.

4.0618. Therefore, we can assert that in the result of unceasing inertial quantization process of any objects from the surrounding reality via qualitatively new SFUURMM-Forms, brain Form-Creators constantly provide themselves with new possibilities for an active inertial manifestation in their joint Focus Dynamics (meaning, also in Self-Consciousness's informational space of all «personalized» Interpretations) of new, to varying degree synthesized, qualitatively improved combinations of heterogeneous attributes.

4.0619. Due to the presence of that global Process, Form-Creators of absolutely all simultaneously focused by them (by Us!) Self-Consciousnesses Forms acquire a possibility to *eternally* and *unceasingly* carry out their main Task — simultaneous-multipolarizational (in all diffuzgent — for every Scheme — development Directions) inter-Qualitative Synthesis of all possible heterogeneous Aspects (and structuring them SSS-fragments) of Pure Cosmic Qualities, focally «projected» into every Form-system of the Worlds of Macrocosmos through ethereal Configurations (e-Configurations) of all

OO-UU-Entities. Due to presence of the multipolarization property in the whole variety of Self-Consciousnesses Forms' Focus Dynamics, all Space Form-systems are structured by infinite multitude of different-Qualitative Time Flows.

4.0620. In practice of our biological existence that property reflects in the following: As soon as you make a choice more corresponding to other Synthesis Scheme (not to nuuvvumic-mixtum type of lluuvvumic birvulyarity), the given qualitative inconsistency in your Focus Dynamics gets immediately fixated by Creators-confectons (svilgsons), which orient corresponding protoformal Form-Creators for the intensification of their peculiar Creative Activity and realization of the Interests not typical of People. Thus, with every depliative choice in our process of subterransive amitsirations, so-called «time loops» are formed and grow — the basis for our «current» way of Existence.

4.0621. Any type of our life creativity provides via its Focus Dynamics narrow-specific conditions for carrying out the process of simultaneous svilgs-spherational Synthesis (according to the given Scheme) of some certain slloogrent f-Configuration's particles (from the least to the most informationally capacious Aspects). In that process, ethereal «projections» of invaderental (for the given Levels of Form-Creators' FDs manifestation of lluuvvumic birvulyarity type) OO-UU-Entities (ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence) show the highest degree of their Creative Activity; their realization happens on the background of unceasing solvation between covarllert and geyliturgent attributes of other OO-UU-Entities, Which represent subterransive peculiarities of all the rest ten PCQs in the given exhiberation diapason.

4.0622. Since that *background* activity, eglleroliftively initiated by the objective disbalance both between invaderental and vecsative attributes, continuously changes in the process of amitsiration (qualitative change of Interests in FD), so, coming out results of specific primariusive-contegerent interactions serve an objective reason for the constant transformations into realizational tendencies of Focus Dynamics in relation to various SFUURMM-Forms, which are typical of one or another *different-protoformal* development Directions.

4.0623. Therefore, we can never definitely state, in which *precisely* development Direction the personal FD observed by us is carried out in any given moment of its life creativity: We always deal with a whole complex (UU-VVU-conglomerates) of more or less stable by the formed interconnections heterogeneous attributes, which due to particularly that Perception system state (Synthesis Scheme) were able to form with each other specific combinations (SFUURMM-Forms), capable to be realized in their own way specifically through the given FD.

4.0624. Similar qualitative changes are the most typical property of any Focus Dynamics. They affect absolutely all *active* person's Self-Consciousness's sublevels and Levels. Heterogeneous perturbations constantly change each other in FD in proportion to covarllertization (balancing, harmonization) of interconnections in some sublevels or Levels, which is inevitably followed by parallel imperseptization (incompatibility, increase in tensorsness towards the general FD's state) of already available interconnections in some other sublevels or Levels of the given person's Self-Consciousness.

4.0625. Therefore, every «unpacking» of another Energy-Information quantum, on the one hand, contributes to the SFUURMM-Forms stabilization of some creativity spectrums, and, on the other hand, initiates in their states extra conflict with some from already synthesized Conceptions, thus, creating an essential necessity in their correction corresponding to newly originated Interests (Desires), which, by the way, are not always more ampliative in relation to the given Synthesis Scheme.

4.0626. Similar «waviness» (periodicity, cyclicism) in the exertion of any given attributes is typical of any amitsirational process: Firstly, with increasing Interest «you» synthesize narrow-specific options of some different-Qualitative attributes combinations, peculiar to some particular protoformal Direction, and then, when «you» get quite realized in that creativity type, your Interest to it temporarily decreases (or completely disappears) in order to concede Form-Creators' Focus Dynamics to the process of «self»-cognition in all possible transformational twists and turns, initiated by SFUURMM-Forms of some other protoformal Directions. Usually, it leads to the change in activity of heterogeneous Form-Creators of different Self-Consciousness's sublevels (or Levels), since in order to adjust (to balance) in a FD the Synthesis results, carried out in some qualitative states (Levels), it is necessary — compulsorily! — to make certain qualitative transformations in other qualitative Levels.

4.0627. The general Meaning of such Iissiidiology term as «svilgs-spheration» of our Focus Dynamics is confined in the existence of the similar realization *necessity*: Having made particular decisions (choices) and carried them out in this or that way, anyone would just have to go afterwards through corresponding qualitative transformations in other Self-Consciousness Levels, so that from the subjective analysis of received in each case results (empirical Experience) to make corresponding conclusions for yourself (Choices), already more typical of the given Synthesis Scheme (i.e. to «sort out» from the received different-protoformal Experience only the part, which corresponds better particularly to Human SFUURMM-Forms in order to use it in own life creativity).

4.0628. Through such succession, svilgs-spherationally «going» through countless time loops of different-protoformal development Directions and little by little separating from the sphere of your Interest everything irrelevant, on the basis of synthesized «personally» by you Experience, you gradually learn to more delicate and better distinguish true Human realizations out of all possible NON-human things in order to orient own further amitsirations into particularly lluuvvumic birvulyarity Direction. That process continues endlessly — in every sublevel and by every attribute of all twelve OO-UU-Entities.

4.0629. Separate particles of different-protoformal combination more corresponding to lluuvvumic Synthesis Scheme requirements start to be consistently (attractorily, svilgs-spherationally) purposely «projected» (sort out) in your FD from the general content of different-protoformal SFUURMM-Forms, synthesized by «you» for some period. They become for you a specific «marker» of SFUURMM-Forms, which represent «personally» for you typical criteria of Human qualitiveness.

4.0630. These Conceptions, structured by HSI, HIA, IR, and HF (high-sensual Intellect, high-intellectual Altruism, immunitant Responsibility, and humanitarian Freedom), concatenationally concentrating in the most ampliative part of your subterransive ODS (which in the given exhibition diapason structures the «lowest» collective Subconsciousness) gain eventually more opportunities

for the manifestations in your FD, composing the basis of the specific Self-Consciousness state that we determine as a «sense of Conscience.» The more these ampliative human SFUURMM-Forms gain possibility for the realization through your FD (on the background of all possible versions of selfish Conceptions and choices), the more effective your subterransive amitsiration into more favorable Human STCs' groups is carried out, where high-qualitative OO-UU-attributes of the PCQ ALL-Unity are already actively and regularly engaged in people's life creativity together with high-sensual Intellect and high-intellectual Altruism.

4.0631. That amitsirational-amplificational process, subsequently and concatenationally transferring into three-invaderental lluvvumic Synthesis Scheme ([ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence = Creative Cosmic Potentiality FD State] + ALL-Unity), is carried out in much complicated way than it may seem to you in the beginning (i.e. *svilgs-spherationally*). It is determined by the fact that in less-developed and average-developed people's FDs, composing overwhelming quantitative majority in the «current» FDs' types of human CSRs, depliative tendencies of OO-UU-attributes of vecsative PCQs such as ALL-Steadiness–ALL-Stability, ALL-Voidness–ALL-Vacuumness, ALL-Integrity, and ALL-Aspiration (which belong together with lluvvumic Dominant pair to one compatibility group) enter into all possible interconnections with invaderental attributes much faster and easier, than with *already completed* ampliative SFUURMM-Forms, which are formed in *favorable for people STCs' groups* (with primariusive participation of high-qualitative OO-UU-attributes of PCQs ALL-Love–ALL-Wisdom, ALL-Will-of-ALL-Intelligence, and ALL-Unity).

4.0632. In order for lluvvumic Dominant pair to reach the same degree of creative covarllertness in interactions, which they already de facto (due to the specific peculiarities of their Aspects in the given Synthesis Scheme) have towards the attributes of above-mentioned OO-UU-Entities (even to depliative, but more covarllert OO-UU-Entities towards *each* of them!), mixtum NUU-VVU-Forms' Form-Creators *must* firstly synthesize in used by them SFUURMM-Forms sufficient «volume» (conditional «quantity») of these OO-UU-attributes, which form mutual SFUURMM-Forms with ALL-Unity's OO-UU-attributes much easier, than the lluvvumic pair does.

4.0633. And that happens in certain realizational spectrums of slloogrent-diffuzgent multipolarization of any human «person's» Focus Dynamics: Quite deeply and consistently delving with your FD into SFUURMM-Forms peculiar to some different-protoformal development Direction, a «person's» subterransive amitsiration undergoes so powerful qualitative perturbations (either by the attributes combinations of *one* Dominant or by their mutual combinations), so, once, on a certain *inter-Qualitative Synthesis* stage, he or she will consuyetally (naturally) refocus either into a mixtum Proto-Form, which represents some type of non-human CCI (at the fundamental change of one of invaderental Dominant interconnections into some other combination type), or into *simplicisparentive* (i.e. the most simple, most primitive way of covarllert qualitative perturbation, peculiar to lluvvumic Synthesis Scheme in 3–4-dimensional diapason conditions) three-invaderental analog of NUU-VVU-Form-Types, structuring near-lluvvumic birvulyarity types.

4.0634. In the first case, SFUURMM-Forms activity replacing happens according to some Dominant attributes (they are replaced into SFUURMM-Forms peculiar to some Proto-Form's FD), which results in a «person's» amitsiration into functionally inferior (non-functional) mixtum Form-Type of the

corresponding protoformal Synthesis Scheme. With further FD adjustment according to the specific realizational peculiarities typical of the unsubstituted and new Dominant (which has really replaced SFUURMM-Forms of one *lluuvvumic* Dominant), protoformal tendencies in Self-Consciousness of former human «person» are consistently stabilized (through a number of *revitalizational* — «post-mortem» — transformations in the given development Direction), and it acquires appearance and functionality type inherent of Self-Consciousnesses Forms of the given Synthesis Scheme.

4.0635. In the second case — after active attachment on the *primariusive basis* of some covallert OO-UU SFUURMM-Form (as the third Dominant) — a powerfully transmuted «person's» FD also starts to actively develop in any of *near-lluuvvumic* Synthesis Schemes such as, for example:

- ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Steadiness–ALL-Stability;
- ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Vacuumness;
- ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Integrity;
- ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Aspiration, and so on.

4.0636. It is necessary to note that in Form-Creators' Focus Dynamics multipolarization, *three-invaderental* (also four- and even five-invaderental!) combinations are based on every two-invaderental Scheme *immediately after the beginning of inter-Qualitative Synthesis process*, because in «karmonations» interconnections, primariusively formed by two OO-UU, almost at once there evolve specific conditions for active joining to them attributes of the most covallert OO-UU-Entities, which also start dominating over the rest vecsative attributes and make powerful influence on the subterransive «person's» Interests formation process and then on the results of his/her choices.

4.0637. Thus, with the beginning of inter-Qualitative Synthesis, seemingly «in the same points» of exhibition of multipolarized Focus Dynamics in Space-Time, *on the informational basis of every Synthesis Scheme, countless different-Qualitative birvulyarity types are created*. In its turn, each Scheme is structured by a huge variety of accompanying Self-Consciousnesses Forms, from which simultaneous creativity concatenationally (afterwards, in more ampliative human FD exhibition conditions) there get «crystallized» (due to unceasing replenishing and improving Experience of all simplisparentive Self-Consciousnesses Forms) more ampliative (*three-invaderental with ALL-Unity PCQ*) Focus Dynamics of the Main (for the given birvulyarity type — *lluuvvumic*) Direction of inter-Qualitative Synthesis. In parallel with that process, the most impersept combinations to the given Scheme make realizational ground for the formation (from its multiple different-protoformal Directions) of the countless multitude of other birvulyarity types (somewhat diffuzgent to the given Scheme).

4.0638. It should be noted that simplisparentive Self-Consciousnesses Forms of every three-invaderental Synthesis Scheme are originated, as a matter of fact, in *every* FD's resopason of two-invaderental Self-Consciousnesses Forms manifested in the conditions of the given diapason. Focus Dynamics of their multiple varieties represent very primitive or quite moderate, depliative types

of *nutational* realizations, jointly carried out by two low IISSIDI-Centers Levels' Form-Creators (ARGLLAAMUNI and INGLIMLISSA) with an active participation in them of the most covarllert (towards formed by them combinations) OO-UU-Entities' Form-Creators.

4.0639. That multipolarizational process involves all Form-Creators, starting from the lowest karmic Channels to the highest (for the given mega-diapason), when the *transparention* process (transformation of vecsative attributes into invaderental) of various OO-UU in lluvvumic Synthesis Scheme continues also after the beginning of an active transformation in human FD of PCQ's ALL-Unity OO-UU-combinations into the third Dominant. It means that, in the given birvulyarity type, 4-, 5-, 6-, 7-, and 8-dimensional types of LLUU-VVU transparentive Self-Consciousnesses Forms are svilgs-spherationally formed: *superparentive* — flaks (4–5 dimension); *supraparentive* — vuolds (5–6 dimension); *ultraparentive* — orfrov (6–7 dimension); *extraparentive* — pruuiss (7–8 dimension); *divinparentive* — iymiyll (8–9 dimension). Each of them represents the versions (much more *ampliative* than in the previous diapason) of lluvvumic SFUURMM-Forms multipolarizational transgression into various protoformal CCIs' Self-Consciousnesses Forms.

4.0640. Exactly that peculiarity — exhibition in *low-frequency nutational* Space-Time modes — differentiates all possible semi-human and human simplisparentive NUU-VVU-Form-Types from dimidiomittense and translucense human Self-Consciousnesses Forms, which Focus Dynamics concatenationally combining with more and more qualitative ALL-Unity PCQ OO-UU SFUURMM-Forms gets manifested either in high ampliative 3.75–4.0-dimension nutational Levels or in flaks exhibition modes.

4.0641. The above-mentioned process of the formation in 3–4-dimensional diapason of all the variety of two-invaderental, three-, four-, and even five-invaderental Self-Consciousnesses Forms (only of one lluvvumic birvulyarity type) is too multi-complex for today to be able to describe it at least somehow scrappy by means of familiar terms and understandable Conceptions. The process of concatenational «connection» of the third — the most compatible in low-frequencies Levels — Dominant (from ten vecsative OO-UU-Entities) to depliatively expressed ALL-Love–ALL-Wisdom PCQ's Aspects combinations (in the forms of powerfully destructive SFUURMM-Forms of aggression, bloodlines, animal sexuality, and other egocentrism manifestations) is typical not only of primitive and less developed people's FDs but also of *our* life creativity.

4.0642. As soon as Form-Creators of the most covarllert between each other (in the given exhibition conditions!) lluvvumic Dominant pair Levels, with peculiar to them attributes, start to initiate in ODS Creative Activity of the most compatible SFUURMM-Forms particles (of informational areas), at once, in the unstable interconnections of focal-ethereal combinations that are being synthesized by them, multiple, *various tendencies* are multipolarizationaly emerged for priority engagement into their conjoint FDs of narrow-specific Form-Creators' attributes of *one* of the rest ten vecsative OO-UU-Entities mostly claiming the role of the third Dominant in the process of the given «person's» FD exhibition.

4.0643. First of all, it happens on the level of episodic informational impregnations into the general (for two Dominants) realizational picture (in the form of subjective experiencing, interpretation

of something) of small accents of one of ten OO-UU-Entities (all possible options of Its Aspects), qualitatively *most compatible with the given f-Configuration*, which — on the subjective level! — harmoniously complete and deepen — with the specific nuances — a Conception, realized through a given «person's» FD.

4.0644. Seemingly concatenationally «expelling» (like *aliovalent*<sup>11</sup> states in chemical compounds) from FD the less stable (i.e. the most tensor for the given combination) interconnections (which at once join most compatible combinations) and changing them onto own attributes (first sub-Aspects, then Aspects), Form-Creators of the given — yet vecsative! — OO-UU-Entity get a possibility to influence Interest formation of a given «person» and his/her amitsirational process, due to which he/she — in some simultaneous version of multipolarizational amitsiration (at conditional — *for the given mode* — balance of interconnections in Focus Dynamics among all three OO-UUs' attributes) — changes a mixtum NUU-VVU-Form into a simplisparentive one — in accordance with the given *protoformal development Direction within the lluuuvvumic* birvulyarity type.

4.0645. Such qualitative birvulyart-amplificational perturbations are simultaneously carried out in various development scenarios immediately throughout all realizational spectrum of a «person's» FD multipolarization. Depending on the *Synthesis degree* of the two lluuuvvumic Dominants and *the intensity* of specific SFUURMM-Forms Creative Activity manifestation (realizational Interest *urgency*) in a «person's» FD, equally structured by the attributes of three OO-UU-Entities (on the *obligatory* background of less expressed activity of the rest vecsative interconnections), the given NUU-VVU-Forms of Self-Consciousness are capable to reflect *sometimes* narrow-specifically in subjective Perception systems of the rest — typical for the given CSR — people either in the forms of more or less *semi-ghostly* or *ghostly* (i.e. partially visible or somehow perceived by us in certain exhibition conditions, and also in specific psychical states) NUU-VVU-Forms or Form-images, or in the forms of all possible — extremely unstable in the given exhibition mode — NUU-VVU-Forms which we interpret as «dwarfs» or «elves,» «mermaids» and «female hobgoblins,» «devils» and «Boogie Men,» «succubi,» «incubi,» «poltergeist» types, and «spirits», including «guardian angels,» «bodiless spiritual mentors,» «Shambala teachers» and suchlike.

4.0646. In the surrounding reality there exist countless multitude Similar types of *finitimus* (i.e. *neighboring* with three-invaderental Synthesis Schemes of any Proto-Forms) NUU-VVU-Forms versions which have somewhat preserved some characteristics peculiar to people (for example, basic Form shape, psychological behavior type and reactions, part of human Conceptions, and suchlike) and have already somehow cultivated narrow-specific peculiarities of other Proto-Forms existence. In exhibition modes parallel with ours, via their Focus Dynamics, they have formed the same countless multitude of their own near-human STCs and CSRs types.

4.0647. Multiple civilizations have been formed on their realizational basis: humanlike (dwarfs, elves, mermaids, guardian-angels), human-animal (devils, boogie men, female hobgoblins, werewolves, poltergeist), human-plants (fungal) and even human-mineral (!). The invisible presence of their all

11 Valence number — ability of some chemical element atom to adjoin any given number of other chemical element atoms.

possible Self-Consciousnesses Forms we occasionally sense and feel when our subterransive FD starts to quite actively reflect peculiarities of Form-Creators' FDs of any those development Directions.

4.0648. Having caught yourself on such point (when some from the above-mentioned Self-Consciousnesses Forms start to more actively manifest themselves in your FD), you should seriously consider if you want to further deepen into provided for you realizational possibilities, or that life creativity direction is not of essential Interest for you. Remember that qualitative state of the following amitsiration process, performed by you, depends on your decision: It may take you either into lluuvvumic Direction or in a protoformal one.

4.0649. It is completely pointless to compare us with them or them between each other, because value criteria and realizational (social, scientific, geopolitical, ideological, and moral-ethic) basis in each civilization are formed and continue to be formed with the help of very different to each other Conceptions about «themselves,» surrounding reality as well as the Aims, to which each of such communities aspires (all the variety of these specific SFUURMM-Forms is most actively represented in the corresponding OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes Creativity Ranges). In their «inner» content (Self-Consciousnesses Forms' qualitiveness) each of these three-invaderental civilization is as «mixed» and diverse, as ours, «human» one is. Correspondingly, its slloogrent FD is also no less multipolarized by its peculiar different-protoformal development Directions.

4.0650. Some of them in the given exhiberation modes (2.5–3.5 dimension) could have reached more success than us (due to greater attributes covarllertness and universalization in formed by them SFUURMM-Forms). They are already located on the stage of more integral (fundamental) «transition» into high-ampliative states of the most compatible with them Proto-Forms, while Interests of some other civilizations (as well as «our current» one) cannot overcome depliative levels of selfish and destructive (aggressive) tendencies anyway, which affect very powerfully the decrease in their development pace.

4.0651. We should note that multipolarizational process of our Focus Dynamics' subterransive amitsirations into all many Self-Consciousnesses Forms of these humanlike civilizations are not one-sided, — many of their representatives, having synthesized certain empiric Experience with the predominance of lluuvvumic attributes in it and having reached in their life creativity necessary qualitative states (HIA+HSI+IR), also will refocus into dimidiomittense or even translucense versions of «our future» NUU-VVU-Form-Types, which form in human Collective Consciousness's slloogrent FD the protoformal development Directions most corresponding to them.

4.0652. Besides, subterransive amitsiration process of these civilization representatives in our CSR can be carried out also with the «decrease» of Synthesis Scheme invaderentness (from three-invaderental into two-invaderental), which does not indicate de-Synthesis process presence, but represents different versions of *eglleroliftive* svilgs-spherational perturbations in various development Directions, carried out in Form-Creators' FDs of all possible NUU-VVU-Form-Types types. It means that after corresponding svilgs-spherational transformations the process of changing three-invaderental Scheme for two-invaderental one (in the realizational conditions of the same birvulyarity type!) will represent *eglleroliftive-amplificational* tendency (transition from depliative state into ampliative).

4.0653. Huge variety of the observed by geneticists chromosome aberrations — mutations causing the change of karyotype<sup>12</sup> — represent natural consequences of all possible qualitative perturbations of Self-Consciousnesses Forms' FDs, which refocused from one Synthesis Scheme into others. For today, there have been detected more than five thousand hereditary diseases. The reason of 1000 diseases is the change of chromosome number and structure. Some of them are peculiar only to infants; some develop only in youth, and some are typical only of elderly people. About 30% of those genetic diseases take autosomal trisomy; more than 50% fall on gonosome pathology and about 15% compose structural adjustments (the most widespread ones are translocations and deletions). Many physiological and psychical consequences of the given pathologies appear in the result of multipolarizational amitsiration of different-protoformal Form-Creators into the conditions of human biological organisms.

4.0654. Chromosome diseases, composing only 1% in newborn illness frequency structure (though that number only indicates the imperfection of modern diagnoses methods), in 70% of the cases are the real causes of spontaneous abortions and in 90% cases — reasons of egg fertilization impossibility (infecundity). In modern medicine, three groups of chromosome pathologies are allocated: ploids disorders (repetition factor), change of the chromosomes general number and of their structure. As an example we can bring such gene-chromosome pathology as Huntington chorea (codon GAG multiplying in IT-15 gene of the 4th chromosome short arm), which develops among 35–50 aged people.

4.0655. Lejeune syndrome («cat's cry syndrome») characteristic feature is unusual baby cry resembling cat's meowing or yawl, which is correlated with larynx, vocal folds underdevelopment, or pathology. Besides, there are clear signs of mind and physical underdevelopment, microcephalism (abnormally small skull). The same concerns such newborn syndromes as, for example: Klippel-Feil syndrome (delay in brain and physical development, shortened neck, slow-moving head), Cornelia de Lange Syndrome (feeble-minding, microcephalism, symmetrical limb shortening, shortened neck), Rubinstein-Taybi syndrome (feeble-minding, broad thumbs and first toes, arrest of development, Antimongoloid eye fissure angle), and so on.

4.0656. At the same time the *dementia* phenomenon (usually chronicle or progressing syndromes with degradation of human cognitive functions: memory, thinking, comprehension, social behavior, ability to choice motivation speech, and ability to orient, to count, to cognize, or to intellectualize) determines the process of Focus Dynamics concatenational subterransive amitsiration from NUU-VVU-Form-Types into various other Proto-Forms. Therefore, it strikes generally elderly people. Nowadays, there are around 40 million people worldwide with *dementia*, and annually there happen more than 8 million new cases of this disease among adults and elderly people (according to WHO, by 2015 that quantity was likely to increase up to 115 million). Yet, Alzheimer disease, which is the most widespread cause of *dementia*, is typical of 60–70% of all the cases.

12 Various structural adjustments in the form of inversion (180 degrees rotation of chromosome segment), translocation (segments change between chromosomes), deletions (absence of some chromosome part), duplication (appearing of additional copies of chromosome parts), isochromosome (duplication of genetic material in the both arms), and other deformations both inside chromosomes and between them.

4.0657. Chromosome diseases take one of the leading places in the structure of inherent human pathology. They happen when some gene Form-Creators, dominant in genotype (or in phenotype) of the previous Proto-Form, at the exuberation in a new Self-Consciousness Form continue to demonstrate the same overwhelming activity in the human DNA till the moment of full adaptation with their new Perception system. These are all possible rudiments, atavisms, and also syndromes: Cri du chat, Angelman, bird-headed dwarfism, Williams, allotriophagia, Hypertrichosis, Alice in Wonderland syndrome, Möbius, Stendhal, Münchausen, Diogenes, Alien hand syndrome, pain insensitivity syndrome, Progeria, Fatal familial insomnia, exploding head syndrome, XYY syndrome, Alfi's, Orbelis, Prader-Willi, Roberts, Beckwith–Wiedemann, Down, Edwards, Patau, Klinefelter, Langer-Giedion, Turner, Wolf–Hirschhorn, Triple X syndrome, X- and Y-chromosome polysomes, and many others.

4.0658. As amitsiration process of a «person,» through whose FD certain syndromes are manifested, progressively deepens into more lluuvvumic SFUURMM-Forms combinations, typical symptoms of such interstitial states gradually weaken and then, starting from certain scenarios, completely disappear. However, you should not forget that this convergent process is accompanied by a huge number of subterransive revitalizations into the *lluuvvumic development* Direction. Therefore, on the subjective Perception levels, ampliative changes in physiological and psychical states of such «persons» are possible to observe only when the observer's FD structures the most ampliative development scenarios.

4.0659. In the lluuvvumic development Direction, the third Dominant's role is concatenationally «taken» by high-ampliative (for the given diapason) Aspects of the OO-UU-Entity «ALL-Unity.» Depliative attributes of that PCQ can be manifested in SFUURMM-Forms, structuring undeveloped «person's» FD, only in the form of very unstable (in FD) Aspects states. Due to its high imperseptness to all possible combinations, jointly formed by the PCQs' ALL-Will-of-ALL-Intelligence and ALL-Love–ALL-Wisdom OO-UU-Aspects, PCQ's ALL-Unity depliative Aspects are just not capable to form simplisparentive (the «lowest» three-invaderental) NUU-VVU-Form-Types versions: In created with their participation Form-Creators combinations of the lluuvvumic pair they are easily «expulsed» by the attributes of more covarllert to them PCQs (combinations), which do form simplisparentive NUU-VVU-analogs conjointly with invaderental Form-Creators of the lluuvvumic pair's attributes.

4.0660. Due to the absence of real possibilities for the stable joining of the PCQ ALL-Unity to the given pair's Aspects, three-invaderental inter-Qualitative Synthesis of lluuvvumic combinations cannot be carried out in the given (2.5–3.7 dimension) exuberation diapason. The involving process of more or less active PCQ's ALL-Unity OO-UU-Aspects — into human focal-ethereal interconnections — starts in FDs of NUU-VVU-Form-Types' dimidiomittense analogs. ALL-Unity's OO-UU-Aspects in human FDs' *ampliative interconnections, formed by the lluuvvumic Dominants pair*, start to svilgs-spherationally organize themselves into stable Aspects only from FD stabilization in qualitative conditions «higher» than 3.75 dimension, thus duvuylerrtly «excluding» less stable Aspects of more impersept PCQs from human SFUURMM-Forms (even in Form-Creators' FDs of some simplisparentive NUU-VVU-Form-Types).

4.0661. Thus, it turns out that pending any «person's» Focus Dynamics stabilization in the above-mentioned ampliative Levels (3.5–3.75–4.0 dimension), all the representatives of the humankind's Collective Consciousness are not capable (due to high imperceptness) to use PCQ's ALL-Unity Aspects in their life creativity. Everything we use to structure our subjective Conceptions about the given OO-UU-Entity's characteristic features (team spirit, unity, collectivism, solidarity, fellowship, communalism, friendship, brotherhood, synergism, communism, communitarianism, and suchlike) either represents either attributes of that PCQ's specific analogs (ALL-Integrity, ALL-Aspiration, ALL-Essentiality–ALL-Permeability, ALL-Voidness–ALL-Fullness) or reflects Its diffuzently fragmented in Essence sub-Aspects, which being separated from its general context (Aspect) gain in our interpretation very deformed meaning and sense. Often herd mentality, aggregating behavior, factionalism, gregariousness can be taken for that PCQ's attributes, while they have nothing in common with it and represent depliative derivatives of the interaction among other PCQs' sub-Aspects.

4.0662. In practice, the qualitative Essence of that PCQ's Aspects starts to concatenationally open and to concretize in human «person's» Self-Consciousness only after in its Focus Dynamics there was actively launched high-ampliative amitsirational process, conditioned by Synthesis of the Human States such as high-sensual Intellect and high-intellectual Altruism. In the given «personalized» Self-Consciousness, the general State of immunitant Responsibility and humanitarian Freedom lets it to subterraneously experience more genuine Sense of that OO-UU-Entity's (PCQ ALL-Unity) all possible Aspects, realized through its creativity. Though, it is absolutely not possible to subjectively feel them in their natural purity: Every time we deal only with different OO-UU-attributes' synthesized combinations, which were able, in the given specific exuberation conditions, to enter more or less stable interaction with the specific SFUURMM-Forms already kleksed by VVU-Factor and adopted in Meaning by conjoint FD of invaderental Form-Creators of the PCQs ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence.

4.0663. At inter-Qualitative Synthesis of the two lluvvumic Dominants, particularly, *catalytic* activity of the rest ten vecsative OO-UU-Entities' attributes, depending on the existing possibilities for Their Creative Activity manifestation in the formed combinations (covallertness degree with the given Pair, interaction intensity with its Aspects), determines subterraneous amitsirations Vector of every «personalized» Interpretation within any given protoformal development Direction. In every specific case, quantum displacements succession in FD is tendentially and qualitatively carried out particularly into that Direction which characteristic SFUURMM-Forms let «current» Interests of the given «person» be realized to the greatest possible extent.

4.0664. Unconscious — instinctive — change of Interests and «person's» life priorities in his/her Focus Dynamics increases (which means intensifies) realization possibilities of vecsative OO-UUs' attributes, the most compatible not with lluvvumic Conceptions, but with momentary depliative Interests. In the result of that, the dynamics of *intra-Aspect* interactions gradually falls «inside» Each of the two lluvvumic Dominants and in the end comes down in the given f-Configuration to its minimum. In other words, Their conjoint realizational chances do not increase and deepen, as it should have been at the Synthesis of higher «amount» (Information volume) of all possible Aspects of each invaderental OO-UU-Entity, but, conversely, decrease (due to the low intra-Aspect and inter-Aspect Synthesis), while amidst the most compatible vecsative attributes, much more powerful tendency is established for realization of their intra-Aspect and inter-Aspect synthetic perturbations.

4.0665. Particularly that objective circumstance is the real Cause of multipolarizational amitsirations of the vast majority of your «personalized» Interpretations into Focus Dynamics of various Proto-Forms (both mixtum and simplisparentive Ones). In that Process (in slloogrent FD conditions of the given human CSRs' group!) there is a following statistics: Only 3% of the general population number consistently refocus into lluuvvumic development Direction (i.e. in dimidiomittense NUU-VVU-Form-Types) in every group of human STCs, while 30% of people refocus into *near-lluuvvumic* Directions (where two our Dominants actively interact with vecsative OO-UUs' attributes the most compatible with *qualitative analogs* of ALL-Unity OO-UU), thus svilgs-spherationally providing (in NUU-VVU-Form-Types' *more ampliative* exhiberation Levels) more favorable conditions for origination of lluuvvumic SFUURMM-Forms of dimidiomittense Self-Consciousnesses Forms (i.e. 30% of the population svilgs-spherationally amitsirate into deep time loops with the sequential escaping from them).

4.0666. The rest 67% representatives of humankind's Collective Consciousness actively develop in different-protoformal Directions, which are more or less impersept to Form-Creators' FDs of the lluuvvumic Synthesis Scheme. Most of these «non-humans» are «persons» whose FDs are obsessed with some «lop-sided» (very limited by only one OO-UU character features) Conceptions. The latter are powerfully formed by *vecsative* for human Scheme different-protoformal OO-UU-attributes combinations — either mental (ALL-Will-of-ALL-Intelligence analogs) or emotional (ALL-Love-ALL-Wisdom analogs). These *protoformal by their Essence* SFUURMM-Forms display in such people's FDs evident tendencies to the powerful suppression or substitution of either lluuvvumic Dominants' Creative Activity. The typical representatives of that part of human CSRs are either clever but completely «insensitive» humans totally obsessed with logic and pedantism, or sensitive and emotional but completely headless and hardly educable people.

4.0667. This category involves a high percentage of rationales (for which the word «practicability» contains all their existence meaning) and emotionalists (tempestuously and thoughtlessly reacting at the slightest pretext), hard-hearted and not capable to compromises aggressors and dictators, usurpers and violators, self-affected egocentrics, and also masked and desperate misanthropes. Due to their qualitative incompatibility with lluuvvumic Self-Consciousness Forms, about half of them are carriers of some gene mutations (various syndromes); about 10% of them represent consequences of subterransive amitsirations transitional states from various diffuzgent Proto-Forms into humans, and 8% of them are NUU-VVU-Form-Types refocusing to Proto-Forms (non-humans).

4.0668. Besides, approximately 70% of spontaneous abortions and 7% of all dead births are subjects of various chromosome anomalies; these are Self-Consciousnesses Forms, which Form-Creators turned out to be not ready to function in the conditions of specific human Self-Consciousnesses Forms' Perception system (due to the lack of skills, necessary Information, Experience) and therefore were not able to thoroughly build a fully functional human organism. Notably, in the cases of multifetation, such dynamics, depliative for two-invaderental lluuvvumic Synthesis Scheme, can be indicated quite often (especially at artificial fertilization) only in one fetus. In addition, there are also the cases of so-called *chimerism* (gonosome mutation), when two Self-Consciousnesses Forms simultaneously exhiberate through visually one Self-Consciousness Form (with two different karyotypes).

4.0669. It is also necessary to note that out of 730 babies in the world one is born with Down syndrome, which genetic reason is prevailing in parents' FDs (what is more important, in grandmother's maternal genotype: The later the child's mother was conceived, the higher the possibility of the given syndrome developing in the child is) of specific protoformal peculiarities, which have already succeeded in their genome to form areas stably deformed by the given protoformal attributes. Actively influencing on their realization inclinations, these DNA-peculiarities at the gametal cells formation (ovigerms and spermatozoids) provoke chromosome disjunction. In the result, in 90% cases from a mother and in 10% from a father, the baby receives the third 21st chromosome (or its fragments) instead of ordinary two chromosomes. Moreover, the older the mother is when she gives birth, the higher the possibility of such unfavorable outcome is, since these protoformal tendencies only strengthen with age.

4.0670. This is quite interesting that this proportion (one of 730 babies), which is equal in different countries, climate zones, social class, does not anyhow depend on the parents' material way of life, their health, vicious habits, nutrition, education, skin color, or nationality. Parents may have a normal chromosome set. In Russia, for example, about 2500–3000 of such children are annually born, in England, 1000–1500 children are born, and in the USA, there are 5500 cases per year. Up to 4/5 of all the children with Down syndrome are born by mothers aged over 35 — they have posteriors with that syndrome 40 times more often than mothers in their twenties. In 30% of the cases, the reason of miscarriages is the presence of Down syndrome in embryos.

4.0671. There are many genetic diseases most peculiar to the certain ethnic groups or nationalities. However, it is necessary to understand that specific gene peculiarities turn each of you only to the disposition to a certain disease, while the determinant role in that amitsirational process is played by the qualitative stability of your definite choices (and also of your parents — till the moment of your fetation), to the most degree structured either by lluvvumic (intellectual-altruistic) or clearly expressed protoformal Conceptions (such as greediness, vindictiveness, irascibility, rancor, envy, cruelty, cynicism, cynicism, artifice, arrogance, aggression, and others), historically peculiar to the ethnic group or nationality to which you belong. Usually, similar depliative qualities are actively encouraged inside a group or ancestry and interpreted as must-have features for every member. That is absolutely wrong.

4.0672. Consistently and thoroughly relieving your FD from similar SFUURMM-Forms (for example, by means of deep study of Iissiidiology Knowledge and Ayfaarian life style), thus you will begin to provide for yourself not only more favorable development conditions but also stronger health. In the opposite case, driven by all possible depliative tendencies, typical of representatives of your gentility, you have a very high chance to fall into a risk group. For example, 25% of Jewish people are carriers of certain genetic mutations. Wilson's disease is spread among Ashkenazi Jewry thirty times more than in average on the planet; there is also the highest rate of Tay-Sachs disease (juvenile amaurotic idiocy), Riley-Day syndrome, Cohen syndrome, Canavan disease (one of 40 Ashkenazi Jewry).

4.0673. So-called «Finnish» inherited pathologies strike one of five Finns; oligophrenia most often develops among northern nations such as Selkup, Khanty, Nenets, Komi; phenyl ketonuria

(hyperhidrosis with specific mousey odor, explicit reduction of case brain, convulsive disorder, idiopathic aggression) most often develops among Scots, Irish, Belarusians, and the Tartars (1 of 5–6 thousand people). These diseases and syndromes represent regular results of amitsirational-adaptation processes typical of gene Form-Creators' Focus Dynamics, which simultaneously take part in various Synthesis Schemes and are compelled to adjust to exuberant subterranean conditions of every form focused by their Self-Consciousnesses Forms.

4.0674. All those characteristic symptoms are diagnosed now by medical scientists who study causes of these pathologies<sup>13</sup> development as well as almost all so-called non-chromosomal, non-gene (i.e. somatic and psychosomatic) pathologies, which in fact have pathogenic (causal) basis in the form of epigenetic activation of different genome structures and further biochemical response with the «disease» development. Those symptoms are only a miserly part of the *evident* (for us!) consequences of these hardest and multiform adaptational activity of gene Form-Creators, inevitably forced in every specific case to specifically manifest gained Experience in various exuberant conditions of their slooprent FDs (invaderental and effective in their «own» birvulyarity type), which is not always functional for the realization of synthesized by them Experience in the existence conditions typical of other Synthesis Schemes.

4.0675. The presence in humankind's Collective Consciousness of such — completely non-functional or low-functional — mixtum NUU-VVU-Form-Types, possessing all possible gene deviations from the norm<sup>14</sup> or chromosome deformations, is an *obligatory* condition of Diffuzgentness and Multipolarization Principles of slooprent Focus Dynamics of our (as well as any other) Collective Cosmic Intelligence, as it serves a specific and necessary informational basis for diversification, modernization, and continuous universalization (intragroup development) of Self-Consciousnesses Forms, simultaneously generated by that CCI in multifarious exuberant conditions.

4.0676. Although, these «failures» done by Form-Creators are not mistakes, since genetically changed mixtum NUU-VVU-Forms, structuring all Time Flows, represent options of operative creative mediation between *invaderental* Form-Creators of human Self-Consciousnesses Forms and *invaderental* Form-Creators of all the rest — diffuzgent with ours — different-protoformal Synthesis Schemes. In other words, all the empiric Experience, typical of the representatives of different-protoformal Synthesis Schemes, is actively imported and intuitively spread (due to the real possibility for VVU-kleksing realization) through Focus Dynamics of these inadequate in their functionality mixtum NUU-VVU-Form-Types analogs, which are physically unfit and underproductive from the viewpoint of their creative participation in Self-Consciousnesses Forms' general FD of our CCI. The Experience is spread into our CCI's photoreductive Ether from Focus Dynamics diffuzgent to human Self-Consciousnesses Forms.

13 These are pathologies such as transcription factors violation, ctosome presence, or trisomy, vegetative and central nervous systems disintegration, metabolic imbalance in them, degenerative changes in hypophysis, hypothalamus, epiphyses, hippocampus, or in amygdala, metabolic imbalance in blood plasma lipids, reticuloendothelium phospholipid sphingomyelin accumulation in cells, decrease of the number of thin myelin and nonmyelinated fiber, and other similar dysfunctions.

14 Here a question arises inevitably about which human Form can be accepted as a norm or etalon. The answer is that there cannot be such a norm!

4.0677. Due to diverse Experience, which they simultaneously bring into the general Paradigms of all possible kinds of humankind's Collective Consciousnesses in all times and development periods, enriching people's photoreductive Ether with multiple uncharacteristic to us emotions and reactions, the process of development and modernization of different-Qualitative mixtum NUU-VVU-Self-Consciousnesses Forms is carried out much more deeply and multi-laterally (meaning, more effectively), than if there was no such process. Every more ampliative NUU-VVU-Form-Type appears to be the most Qualitative (intermediate-resulting) «sample» from the numerous group of less qualitative NUU-VVU-Forms, since its f-Configuration is structured by their Experience, synthesized in human Focus Dynamics of various protoformal development Directions.

4.0678. It also covers narrow-specific Experience of people with genotype deformations (protoformal modifications), including Down's syndrome sufferers, morons, oligophrenics, imbeciles, and other carriers of non-lluuvvumic attributes. Their inside states, offbeat (in human perception) reactions, and psychical emotions, no matter how inhuman and incomprehensible they may seem, will not fade into «oblivion,» but will be resonationally «projected» through their Perception systems into Form-images and SFUURMM-Forms of *human* ODS's part, being reproduced one way or another (both positively and negatively) in Focus Dynamics of many people. Due to the Experience, which has been synthesized in Self-Consciousness of such ill (inadequate) people, many narrow-specific psychical emotions, typical of various animals, become more or less available to our comprehension, compassion, and understanding. As a result, people around them become kinder, more merciful, altruistic, intuitive, meaning, more ampliative, than they used to be.

4.0679. Their countless and ceaseless revitalizations simplecsically become the source of gaining intuitive Experience by Form-Creators of each of the following, more ampliative out of focused by them NUU-VVU-Configurations, which creates favorable conditions and possibilities for stabilization of Form-Creators' FDs of their Self-Consciousness and deep concentration in lluuvvumic development Direction. In our subjective Perception it looks like either a sick «person's» recovery or cancellation of his/her earlier diagnosis (during prenatal screening, PGD — preimplantation genetic diagnosis) of chromosome fetus abnormality and then giving birth to a more or less normal (or completely normal) child. We are just not able to detect and to analyze through which pathological, exhiberational NUU-VVU-Forms the observed by us newborn Form-Creators had to go through before he/she was able to stabilize its FCA in f-Configuration of the given — normally perceived by people! — NUU-VVU-Self-Consciousness Form.

4.0680. Thus, Form-Creators' Focuses of Close Attention of less qualitative f-Configurations (being simultaneously and multipolarizationally realized at once in all possible for people diffuzgent development Directions and resonationally synthesized in the definite lluuvvumic-protoformal Experience) get duvuyllerrtly and svilgs-spherationally «reprojected» from less favorable exhiberational conditions into more and more ampliative «parts» of more developed NUULL-VVU-Form-Types' f-Configurations. Thus, for Form-Creators, more and more favorable (towards less qualitative manifestations) possibilities are created for activation of their FDs in deeper synthesized Self-Consciousnesses Forms of the given birvulyarity type. Meanwhile, the more synthesized (by lluuvvumic attributes) f-Configuration of focused NUU-VVU-Form is, the more its Form-Creators are capable to reflect universal SFUURMM-Forms, typical of CCI of particularly *human* type.

## Chapter 7. Eglleroliftive convergence mechanism of Focus Dynamics of Karmo-Forms

4.0681. How and according to what Principles does the so-called «penetration» (in more ampliative Focus Dynamics SFUURMM-Forms) of characteristic vecsative OO-UU-attributes happen, which in the moment of subterransive TEC-«unpacking» are differentiated level-by-level into slloogrent NUU-VVU-Configuration's different-Qualitative «parts?» For the deep understanding of these Process let me start considering its Essence with the most «elementary» (by the degree of eglleroliftive consummatization) exhiberation Forms, which do structure Form-Creators' FDs of the 0–1-dimensional diapason of the Tertiary Universal Illusion. Let me remind you that the given Self-Consciousnesses Forms exhiberation Levels are not less synthesized versions of creative Energy-Plasma manifestation, — in Macrocosmos's Form-structures, there are also Self-Consciousnesses Forms of the Quaternary Illusion (and presumably also of 5-, 6-..., -n types of Illusion!), which Focus Dynamics' exhiberation Mechanism is completely unavailable yet either for our Perception system or for our current discreet-logic analyzing abilities.

4.0682. Unavailability for our understanding of the formation and functionality principles of these — too «elementary» — Energy-Plasma Levels is related also to the following: Considered by us dimensional diapasons are *exactly these* — 0–1, 1–2, 2–3, 3–4, 4–5-dimensional and likewise — only from the viewpoint of our «current» consideration method on manifestation peculiarities of any given Space and Time properties. That method of subjective differentiation in the surrounding reality of various Self-Consciousnesses Forms (from fermions to cosmic objects) and analysis of manifested by them peculiarities is conditioned by the presence in our FDs of particularly those tensorsness types, which, as a matter of fact, determine specific realizational borders (creative possibilities) of our subterransive Perception systems. In other words, reconverstive e-Configurations also get somehow combined in the «moment» of their exhiberation, «lower» conditional 0–1-dimensional diapason borders, through the FDs of qualitatively corresponding to them — *hyper-elementary* — Self-Consciousnesses Forms, but it is so far not possible to understand that most complex synthetic process (even at the «profound» Meditation).

4.0683. After discussing that important Information, let us begin considering the formation and functioning in Macrocosmos's Form-structures of the Tertiary Illusion Levels that are more or less available to our Perception systems via different-Qualitative thinking and feeling types. Here, let me point out again that the given description of any given Self-Consciousness Form's slloogrent f-Configuration resonational structuring by all possible multiple focal-etheral interconnections should be considered by us only through formation peculiarities typical purely of *human* manifestation Rezomiral. Supposedly, a subjective Observer, who would represent one of countless other different- protoformal Rezomirals, would understand and comment all the presented below synthetic Forming process picture absolutely differently, than a human would do.

4.0684. So, in the conditions of 0–1-dimensional diapason, exhiberation process of Form-Creators' Focus Dynamics, which represent realizational Interests of various OO-UU-Entities in Macrocosmos's Form-structures, is carried out on the conditionally *minimal* level of attributes combinations. What kind of uttermost manifestation level is that? It is the least available to our Perception level of focal-

ethereal interaction between Form- and Info-Creators. E-Configuration of every «emanation» and «psychonation» is still structured by the most misery (for the Tertiary Illusion conditions!) Information volume, which qualitative basis is represented by inter-skunkktional interconnections, typical of *one certain* Pure Cosmic Quality.

4.0685. It has been mentioned earlier that each of the twelve OO-UU-Entities, this way or another manifesting Its Creative Activity in slloogrent Macrocosmos's FD (through Focus Dynamics of initiated by It Form-Creators — i.e. «dissonant» part of Its reconverstive Configurations), represents a conditional «multidisperse» set of particular — fundamental, typical only of It — attributes, among which inter-skunkktional interconnections there gabitually appears to be «ingrained» some part of finitimus SSS-fragments (diffuzgent-intermediate, transitive, boundary with other PCQs).

4.0686. That circumstance is related not only to the inner inhomogeneity of the Information Itself but also to the functions of at least three manifestation Principles, regulating all the relations inside *ethereal part* of Its consummative State: Diffuzgentness, Duvuyllerrtness, and Slloogrentness. I consider it's necessary to reiterate also that we can subjectively discuss whatever only within considered by us *ethereal* («informational-projectional») properties of Universal Plasmic-Differentiated Radiation (UPDR), conditioned by the presence in the Information Itself (under mercavgnational Initiation influence) of amitsissimal SSS-State (holochrone-primogenitive-consummative).

4.0687. In ethereal structure of Every from the twelve OO-UU-Entities, e-Configurations are constantly and inevitably present both of «emanations» (conditionally «mental» part of Energy-Plasma) and «psychonations» (conditionally «emotional» part), covarllert interactions between which are the main Reason of the origination in OLLAKT-DRUOTMM-systems and FLUU-LUU-complexes of all the multitude of their tendentious combinations — «karmonations» (UU-copies, SFUURMM-Forms, UU-conglomerates and suchlike). In their turn, the presence in Macrocosmos's ethereal structures (ODSs, FLCs, and others) of all possible different-protoformal versions of these «karmonations» provides absolutely all realizational demands of Form-Creators in every dimensional diapason.

4.0688. In 0–1-dimensional diapason's exhiberation conditions opportunities for subjective realizations of Form-Creators are minimized, since e-Configurations of all manifested here «karmonations» represent unstable «tetrahedral» states, structured by the most covarllert «emanations» and «psychonations» of *one* OO-UU-Entity. This extreme instability (which fits best of all the definition «attractory chaos») is connected with that in ODS common with them there simultaneously and holochronely appears to «exist» (in *timeless* mode) countless number of other «tetrahedral» Configurations, formed by the specific attributes typical of other OO-UU-Entities. Some of those different kinds of attributes are more covarllert to e-Configurations of some other OO-UU, while the others are less covarllert...

4.0689. Therefore, under the resonational (i.e. initiating only strictly specific combinations) influence of different-Qualitative Focus Dynamics of Macrocosmos's Form-Creators, some of those multiple e-Configurations are dissonationally «excluded» out of the most corresponding to them (FDs) «tetrahedral» structures in order to immediately, under the influence of qualitatively different

FD, be substituted into others, more stable and more covarllert to already formed combination than previous ones... This keeps going on eternally all over the illusive dynamics of the subjective Existence.

4.0690. Let me note right away that «tetrahedral» ethereal structures are fundamental for absolutely all energy-informational interactions not only in the given dimensional diapason's conditions but also in all Macrocosmos Form-structures. Whatever complicated Scheme of Inter-Qualitative Synthesis (up to the zillionth-dimensional diapasons) would be carried out, it would be impossible without active participation of «tetrahedral» e-Configurations, which svilgs-spherationally substitute (by themselves) more impersept areas of focal-ethereal interconnection into more covarllert ones (meaning, more ampliative for the given Synthesis Scheme), providing their exhiberation with growing stability.

4.0691. What happens in the mechanism of Formational process within the conditions of 0–1 dimensional diapason? All the endless variety of every OO-UU-Entity's Aspects, obeying irrkoglective-eglleroliftive Initiation (mercavgnation), «start» (profectively — *continue* while completing the construction of the Quaternary Illusion combinations) to informationally «concentrate» in relation to each other according to the most covarllert attributes between them, forming thus (in ODS) their only (extremely unstable and changeable by the composition!) ethereal combinations — elementary «karmonations» of the Tertiary Illusion.

4.0692. In other words, extremely nondescript and fragmented sub-Aspects of every OO-UU-Entity start to svilgs-spherationally group, aggregating in ODS more certain combinations, each of which reflects miserly part (nuance) of realizational Essence of one from the countless Aspects typical of one OO-UU. In our understanding that can be very simply depicted in the form of variety of all the *subcolors* aggregation, for example, *gradations* of blue, on the one hand, and all the multiple *gradations* of indigo *tones*, on the other hand, which get simultaneously (but by means of their own combinations of these attributes!) synthesized into all the multitude of «blue» and «indigo» *subcolors*, structuring absolutely different areas of the general (for our Perception systems' Form-Creators) spectrum of blue color manifestation (which combinations are not present in these diapason, yet).

4.0693. If we conditionally divide every OO-UU-Entity's Aspect (i.e. attribute) into sub-Aspects (sub-attributes), so, this minimal degree of «karmonations'» synthesizedness is called intra-*sub*-Aspect level of intra-Qualitative Synthesis, simultaneously realized in ethereal structures (ODS) of *every* from the twelve OO-UU-Entities. Subjectively and conditionally, you can figuratively imagine these hyper-elementary (arch-discrete) e-Configurations' ethereal «Form» as absolutely unstable and intensively svilgs-spherating («vector-wise diffused» into multiple possible Directions of simultaneous interactions, i.e. absolutely unspecific) «tetrahedral» interconnections between «emanations» and «psychonations,» which power organization scheme in one «karmonation» is carried out by six ethereal «edges,» potentially typical of every sub-Aspect of the given OO-UU and also multipolarized by their peculiar to interaction vectors according to multiple Directions. From a subjective viewpoint, every «tetrahedron» reflects an *integral* of all possible vectors of holochrone performance of intra-Qualitative Synthesis process; these vectors are typical of the specific Information combination in all its «edges» and «faces,» oriented in different duvuyllerrt Directions of their peculiar realization.

4.0694. However, you should understand that none «tetrahedral» ethereal Information Form exists as such a practical scheme like familiar to you *geometrical* figures with «edges» and «faces.» Under the influence of different-Qualitative FDs' of all Macrocosmos's Form-Creators, each of them is being in the process of unceasing multipolarizational-synthetic transformations typical only of its OO-UU-Entity. That conditional description of holochrone formation of any hyper-elementary «karmonation» type can be compared with an equally abstract description of an elementary particle's dynamics in a «separate» atom. Therefore, we should refer to a subjective description as to an elementary scheme, a working drawing that have little in common with a real object.

4.0695. The given schematic figure represents only a shortest conditional «moment» (resembling a freeze frame) that is used in this context only in order for you to be able to visually imagine «what and how interacts with what» and what can come off in the result. Let me remind you that we determine the process of simultaneous conjoint realization by any Self-Consciousness Form's Info-Creators and Form-Creators of all Their potentially qualitative possibilities as a *svilgs-spheration*.

4.0696. A *svilgs-spheration* does not mean rotation, as there is physically just nothing to rotate and to fluctuate. That is a «usual,» let us say, «operating» ethereal state, gabitually peculiar to any Information particle holochrone-simultaneous realization through UPDR, when «one and the same» «tetrahedron» is narrow-specifically engaged in Form-Creators' Focus Dynamics of zillions of Self-Consciousnesses Forms, structuring Macrocosmos's zillions of dimensions. The given Principle of simultaneous-multipolarizational interaction is universal and common for intra-Qualitative and inter-Qualitative interactions, concatenationally carried out in any exhiberation conditions of absolutely all focus e-Configurations.

4.0697. Thus, we have agreed that hyper-elementary ethereal Information particles, which do structure not only all the Tertiary Illusion's Self-Consciousnesses Forms but also any other combinations forming *duvuyllerrt-slloogrent* conglomerate of Macrocosmos's *skrruullerrt* system, can be schematically imagined in the form of the endless multitude of some ethereal «tetrahedrons,» which always qualitatively change, entering new relations with combinations formed by them. Their ethereal part (conditional «edges» and «faces») provides functionality of specific realization «mechanism» both of intra-Qualitative and inter-Qualitative Synthesis processes, with which help «vertices» of every «tetrahedron» extremely unstable and altering (at every rotational Shift in FD) its e-Configuration, appear to combine with each other according to their inherent *sense-bearing* attribute.

4.0698. Every «vertex» represents a decoherent Energy Potential *yet* undetermined constructively (seemingly «the point of functional application» of Focuses, i.e. — of *Form-Creators*), necessary for that Sense realization, which is constructed into a particular interaction Form only under the influence of locally manifested Focus Dynamics (rotational Shifts successions). In other words, all narrow-specific ethereal interconnections, providing every «vertex's» manifestation, are a *slloogrent* «part» of some potential Creative Activity of Info-Creators, which is subterraneously modeled and made up by Form-Creators' FDs of every Self-Consciousness Form into any whatsoever complex Conceptions. In the Tertiary Illusion's exhiberation conditions of Form-Creators' Focus Dynamics, we determine those ethereal constructions as SFUURMM-Forms, in the Secondary — as LLAASS-

Forms, in the Primary — as YYYUULLUYG-Forms, and so on. All these informational formations are svilgs-spherationally arranged by Form-Creators of every exhibition Level out of the countless multitude of ethereal «tetrahedrons,» somewhat covarllert to each other.

4.0699. The more ethereal interconnections between «emanations» and «psychonations» of every from the six «edges» are covarllertly balanced between each other according to the given OO-UU-attribute (i.e. the less there has been formed tensor fluctuations between them), the deeper and more comprehensive the inertial process is of intra-sub-Aspect Synthesis inside such «karmonation.» Hence, ethereal content of every conditional «edge» of that e-Configuration gets firm even more stably in informational space between four equilateral triangles, forming something schematically resembling for a subjective Observer the geometrical figure of a regular and iso-sided «tetrahedron.»

4.0700. For example, «*psychonational*» («*feeling*») *tendencies* domination over «*emanational*» («*mental*») in some «*tetrahedral*» interconnections brings to concatenational creation of a Feeling-Form's e-Configuration (in ODS). Alongside, in «*karmonational*» combination there appears a particular «inner» tension (tensoriness), in the result of which more impersept interconnections are consuyetally annihilated (i.e. appear to «be pushed out,» being involved into the combinations more covarllert with them), changing for the connections more corresponding to the given narrow-specific combination.

4.0701. Let us say, thinking of something we at once start feeling essence of our thoughts, and vice versa, when we feel something, in parallel, we try to figure out the cause of our feelings. Intra-sub-Aspect Synthesis process deepening consists in concentration increasing of many covarllert to each other sub-Aspects in every «*karmonation's*» e-Configurations, generated by the given OO-UU-Entity. Thus, with every fact of increasing manifestation dimension, the universality and stability of «inner» «*karmonations'*» states (realized by them Meaning, informational Essence) increase, since combinations become more compatible with each other. Let me remind that all these intra-Qualitative transformations are initiated «inside» any «*tetrahedron*» by realizational efforts of different-Qualitative Form-Creators' FDs, simultaneously exhibited in any PFDs Levels and realized in different spectrums of the given OO-UU-Entity's Creative Activity, forming from *identical* attributes of Its Aspects completely different — even dual! — subjective Conceptions.

4.0702. Let me draw your attention that I took the words «*mental*» and «*emotional*» in quotation marks, because there is no question about the processes of Form-Creators' thinking and feeling — in our understanding of them — in the considered by us exhibition diapason, because informational Essence of any intra-sub-Aspect synthesized combination is capable to reflect too little volume from the Information which is necessary for the manifestation (in FD) of some Feeling-Form and Thought-Form. Each «*tetrahedron*» can be conditionally compared with a pixel (matrix element, forming digital image on the screen), which contains only a misery volume (fragment) of general Information. In order for us to form some — even though the most impermanent! — feeling or thought (for example, «The weather is fine!») we should use ethereal content of a huge «*number*» of «*tetrahedral*» «*karmonations,*» concatenationally synthesizing (harmoniously balancing by all multipolarizational vectors) resonationally corresponding to our «*current*» Interest sub-Aspects (attributes conglomerates) of *every* OO-UU, which is relevant to the Meaning of our feeling or a thought, and then — synthesizing Aspects of that OO-UU into a specific transitive Conception.

4.0703. Thus, every «tetrahedral» «karmonation» is formed by Info-Creators' joint Creative Activity of all possible «emanations» and «psychonations» analogs that do structure the given OO-UU-Entity's e-Configuration and regulate different-Qualitative interconnections among force intensification vectors (initiated by FD), providing own informational Essence formation in the specific subterransive space between all the «tetrahedron's» «edges.» Attributes type — mental or emotional — prevailing in the given «karmonation's» e-Configuration («concentrated» between its «faces») determines «tetrahedron's» Creative Activity Direction in the moment of its resonational initiation in Form-Creators' FDs.

4.0704. Individual interactions both of «emanations» and «psychonations» have their own force characteristics, which specific manifestation lets us subjectively divide our multiple different type realizations into «to a greater extent *thought*» and «to a greater extent *feeling*». However, we just cannot clearly determine the bordering line between mentality and feelings, because their realizational Essence is in every «karmonation» in «subterransive space» among all those characteristics.

4.0705. We have found out that all multiple, diverse e-Configurations of Aspects of the Tertiary Illusion, synthesized within every OO-UU-Entity's Creative Activity, are simultaneously expressed not only in 0–1 dimensional Form-Creators' FDs but also in all the rest exuberation diapasons through narrow-specific «emanations» and «psychonations» combinations, which properties are subterransive for every OO-UU-Entity. Interacting between each other by the most covallert for them attributes, «emanations» and «psychonations» aggregate into combinations typical only of one specific OO-UU-Entity, while the most impersept interconnections between them create the basis for the formation in the general spectrum of Its Creative Activity of interstitial (transitional, intermediate) «tetrahedral» «karmonations,» which in higher exuberation diapasons (starting from 3–4 dimensional ones) let Every OO-UU's Info-Creators to actively realize Themselves in not only intra-Qualitative but also in inter-Qualitative Synthesis processes.

4.0706. In considered by us realizational diapason, «karmonations» represent multiple, *to the minimal degree* synthesized «inner» states among all *Aspects of one OO-UU-Entity*. Thus, in all their assembly, these intra-sub-Aspect extsederic states create necessary informational basis for carrying out, by Form-Creators, further synthetic Process stage — intra-Aspect (among all possible sub-Aspects synthesized to more or less stable states), upon completing which they (Form-Creators) obtain access to inter-Aspect Synthesis realization conditions inside *each* of the twelve OO-UUs, which in their Focus Dynamics multipolarization duvuyllerrtly and simultaneously transfers (through various Self-Consciousnesses Forms specifics) into possibilities for the realization of initial and further stages of inter-Qualitative Synthesis between two or more PCQs' attributes combinations.

4.0707. In fact, everything in Macrocosmos is carried out not so schematically and primitively, as it may seem to you so far. Synthetic Process amidst all the twelve OO-UU-Entities cannot be completed until all the attributes of these twelve OO-UU-Entities absolute consummatization State (after which subjective amitsissimal — consummative-primogenitive — SSS-State becomes absolutely objective, i.e. — primogenitive-confective). It becomes too hard to explain the Essence of simultaneous formation Process of Everything Being holochronely out of Everything That Is, because realizational creativity of presently considered by us hyper-elementary states of Info-Creators' e-Configurations

is not limited only by the given (0–1 dimensional) exhibition diapason. That creativity along with deeper synthesized combinations serve as necessary informational basis for fulfillment of any version and stage of sllougrent synthetic Process, no matter in which conditional Space-Time dimension we would subjectively consider it.

4.0708. No matter how complex and universal the zillion-dimensional manifestation Levels e-Configurations are, the process of their formation in Form-Creators' Focus Dynamics always and everywhere remains unchanged. Necessary «volume» (additional Meaning) of the most covarllert Information duvuyllerrtly conjoins most stabilized ethereal combinations interconnections (already available Experience), in the result of which some part of the most impersept interconnections is simplecsically «reprojected» into more corresponding to them e-Configuration, while the given e-Configuration enriches itself with a new, a bit more universal Meaning. That «volume» (subjective Conception about someone or something) appears every time to «assemble afresh» (something new adds to a part of already available Experience) by Form-Creators of any exhibition Level from the countless multitude of hyper-elementary particles, which mostly fit to every specific subjective realization case through some Self-Consciousnesses Forms' FDs.

4.0709. Within considered by us dimensional diapason that multipolarized process can be schematically represented in the following way: «Emanations» of each of the six «edges,» which ethereal (for example, U-U-) Configurations are not balanced by covarllertly corresponding to them (for example, L-L-) «psychonations'» Configurations, at once simplecsically find for themselves («involve in,» resonate with other Form-Creators' FDs) in the given skrruullerrt system's sllougrent «part» more convenient «tetrahedral» structures (for example, M-M-), in which general ethereal Configuration «emanational-psychonational» interconnections of an «edge» maximally correspond to their fragmented Meaning.

4.0710. As soon as that more covarllert (in multipolarization FD) affiliation (*to the given birvulyarity type!*) and more impersept abruption (*to the given birvulyarity type!*) are carried out in considered by us ethereal combination, qualitiveness of interaction «inside» newly formed — in fact, new — «emanational» and «psychonational» content immediately increases (*ampliatizes in the given Synthesis Direction!*), being transformed into somewhat different — general for them! — «*bi-tetrahedral*» (i.e. seemingly formed out of two compatible «tetrahedrons») ethereal Configuration of somewhat more qualitative «karmonation,» which represents not interconnections among sub-Aspects, but creative tendencies of one Aspect of some OO-UU-Entity. Thus, from the consequences of more harmonized «inter-tetrahedral» interactions carried out in 0–1 dimensional diapason conditions, causal reasons are consuyetally manifested of informational structurization (simultaneously in every multipolarizational Synthesis Direction) of more ampliative — *1–2 dimensional* — Form-Creators FDs' exhibition diapasons.

4.0711. Joining each other via different-Qualitative «faces,» they do form via such ethereal «bi-tetrahedrons» (reflecting only a narrow-specific fragment of some realizational tendency) a countless multitude of all possible fragmented informational combinations peculiar to all Self-Consciousnesses Forms' Form-Creators, which Focus Dynamics are capable to varying degree to interact in 1–2 dimensional manifestation's diapason conditions. In the objective Reality mode, there

is no and there can be no evident boarder between subjectively expressed in our Perception systems 0–1-dimensional and 1–2-dimensional diapasons, because the above-described process of svilgs-spherational convergence of «tetrahedral» interconnections into «bi-tetrahedral» e-Configurations (i.e. from the extremely unstable into a bit more stable ones) is accomplished not evidently and in «locally expressed» way, but diffuzgently and duvuyllerrtly, being simultaneously manifested in focal-ethereal interconnections of every from different-protoformal birvulyarity types (Rezomirals) only via those combinations (narrow-specific Conceptions' fragments) which are peculiar only to Self-Consciousnesses Forms' Focus Dynamics structuring interconnections sublevels «inside» the given manifestation Rezomiral.

4.0712. It means that on subjective positions of different-protoformal Observers of «one and the same» reality around them, in some cases its content can be synthesized by a countless multitude of «tetrahedral» combinations (intra-sub-Aspect), in other cases — «bi-tetrahedral» (inter-sub-Aspect), and in some — with the help of inter-Aspect types of ethereal interconnections typical of invaderental (towards the rest) realization of one of the twelve OO-UU-Entities. All possible options of subjective interactions of informational combinations create in every Level of their simultaneous exhibition (through corresponding to them Form-Creators' FDs) those conditional «borders» which we determine as «manifestation sublevels» typical of Form-systems of the Worlds. However, you should remember that there are no «sublevels» either in ODSs or in FLCs due to the slloogrentness property of any Information particle, which lets countless various meaning combinations differently reflect in seemingly «one and the same» ethereal manifestation.

4.0713. When we speak about specific Levels and sublevels of our Self-Consciousness's informational space, we mean *qualitativeness degree* (in relation to the given birvulyarity type parameters) of the Meaning realized by us in the given moment, which is «projected» into our Focus Dynamics from ODSs or FLCs and reflected in its «current» f-Configuration by its Conceptions. That Meaning is capable to initiate in the surrounding reality any given focal-ethereal interconnections sublevels (out of *already available* in the given exhibition Level of our NUU-VVU-Form-Type).

4.0714. Let me remind you that our FD's direct amitsiration Level in Space-Time does not have to correspond to our NUU-VVU-Form's exhibition diapason: Structuring via our mixtum f-Configuration the 3–4 dimensional diapason, we — *by our psycho-mental activity qualitativeness!* — continuously change moments of our Focus's of Close Attention various states reflections in Self-Consciousness, concentrating more either on depliative for our birvulyarity type (loolgs-doolls) or on ampliative (flaks-vuolds) sublevels of surrounding us s-Reality manifestation.

4.0715. Each of conditional sublevels' interconnections possesses *invaderentness* of some peculiar attributes combinations, which are typical of some particular OO-UU-Entity's realizational tendencies (from the 0th to the 3rd dimension) or of specific Synthesis Scheme (from the 3rd dimension to infinity). Differences in invaderentness in these combinations do form and develop further all our subjective Conceptions about the endless diversity of dimension types, simultaneously structuring Space-Time by means of all the multitude of all Self-Consciousnesses Forms' different-Qualitative Focus Dynamics. Therefore, every Self-Consciousness Form is capable to consider its surrounding reality only on the position of subterransive Conceptions of its FD, which represent certain birvulyarity type specificity.

4.0716. Structurally (energy-informationally), each of these sublevels and Levels has very close interconnection with certain Form-Creators' Focus Dynamics of any definite Proto-Form and is reflected in its Self-Consciousnesses Forms' Perception systems only via its typical space-time properties and characteristics. Once we change Self-Consciousness Form for the other (with different Synthesis Scheme), absolutely all the subjective «picture» of the surrounding reality totally changes at once in the given exhibition «point» corresponding to the realizational possibilities and peculiarities of Synthesis typical of the new Proto-Form. Here, the basic criteria of these changes will be not such as up and down, farness or closeness, but much more universal manifestation parameters, which are determined in every FD as slloogrentness, diffuzgentness, resonationness, and multipolarizationness.

4.0717. Thus, subjectively seemingly «one and the same Space-Time point» is always informationally and specifically structured by the countless multitude of simultaneously existing manifestation sublevels of diverse Focus Dynamics. Schematically, you can imagine subterransive parameters of any dimension in the form of a big dandelion seed head: Being on one of its long seeds (symbolizing different Synthesis Schemes), you can estimate all your surroundings only from the given viewpoint. In order to change dimension, an Observer should take other subjective position, becoming the part of another seed, — «change» own Synthesis Scheme.

4.0718. Coming back to the ethereal combinations formation and functionality mechanism in the conditions of Form-Creators' FDs of 1–2 dimensional diapason, we should note that in every sublevel, in narrow-specific conditions, the most covarllert e-Configurations of one and the same OO-UU consuyetally and concatenationally aggregate into duvuyllerrt-diffuzgent informational ethereal conglomerates (resonational zones or Self-Consciousness Levels) structured by different-type (*within the given PCQ!*) «bi-tetrahedrons.» Each «karmonation» represents a result of the most covarllert (for the given manifestation conditions!) informational interaction among all the rest sub-Aspects' «karmonations» structuring *one and the same Aspect of the same* (mutual for them) OO-UU-Entity.

4.0719. When these «bi-tetrahedral» «karmonations'» conglomerates, representing attributes' combinations of sub-Aspects of one Aspect, initiated by the particular Form-Creators of the given OO-UU-Entity, enter covarllert interactions with sub-Aspects' conglomerates of each of the other Aspect (also simultaneously generated by the same OO-UU), in the result of such combinations out of several, to varying degree informationally deformed, «bi-tetrahedrons» (due to the presence of certain imperseptness between them) there originates a new type of unstable «karmonational» e-Configurations — «pyramidal,» formed by means of covarllert solvation of the «edges» of four one-Qualitative «tetrahedrons» with the identical properties of various sub-Aspects of one Aspect of one OO-UU.

4.0720. «Karmonations» of that type are manifested in Form-systems of Worlds as conditional «pyramid-shaped» conglomerates (with square in the basis), which multipolarizationally svilgs-spherate in all possible (for the given OO-UU) intra-Qualitative interactions vectors, forming — «inside» every OO-UU-Entity's duvuyllerrt Aspects group — specific intra-Aspect and inter-Aspect one-Qualitative Synthesis Directions. Despite, all these «pyramidal» «karmonations» seem to be «geometrically» similar in shape, properties, peculiarities, and realizational possibilities of every

sloogrent Synthesis Direction, jointly formed by them in the general dynamic of 1–2-dimensional Self-Consciousness's sublevels of each Proto-Form, differ from each other very much. This highly influences subterransive parameters of various Self-Consciousnesses Forms' Focus Dynamics exhiberations and qualitative differences in their f-Configurations.

4.0721. All these informational conglomerates, representing in Form-Creators' Focus Dynamics of the given diapason all the variety of intra-Aspect states of each of the twelve OO-UU-Entities, are organized into the countless creative Directions of all possible unstable combinations of «tetrahedral» interactions, simultaneously reflected in various Form-systems of Worlds through different manifestation Rezomirals. Every Aspect of every of twelve OO-UU-Entities (*in each sublevel* of its) manifestation is structured by the multiple fundamental realizational sub-Aspects; therefore, pending completeness of the full period of intra-Aspect Synthesis in Form-Creators' FDs of Self-Consciousnesses Forms created by them, these unstable «bi-tetrahedrons» cannot form stable interconnections with each other.

4.0722. Therefore, many of those combinations are perceived by us (through specific brain bio-Creators) only as transitive, evasive, and completely undetermined, unspecific in their Essence, fragmented thoughts and feelings. Actually, our bio-Creators, synthesized on inter-Qualitative Perception level, are not just able to adequately «unpack» and to process that narrow-specific Information, which is peculiar to each of these «bi-tetrahedrons.» Interconnections between such narrow-specific «bi-tetrahedral» conglomerates are still so unstable in the general multipolarization of our Focus Dynamics that they can be perceived by us only on the unconscious Perception level as a certain, appearing for a moment and immediately disappearing feeling, evasive emotion, or some «mental noise,» which content just cannot be comprehended by us, because our FD lack multiple necessary interconnections to carry out that process.

4.0723. At the same time for corresponding SFUURMM-Forms initiation in many other Proto-Self-Consciousnesses Forms, there turn out to be quite enough of these fragmented activations, in order to form in their FDs quite particular psycho-mental reactions, since dimensional sublevels, structuring their subterransive subjective Realities (and determining their Perception systems peculiarities at the exhiberation in human STCs), are capable to resonate on their Self-Consciousnesses Forms' SFUURMM-Forms much stronger than on our human Conception. Thus, the Synthesis process have tendency to duvuyllerrt-multipolarizational interaction of e-Configurations from less qualitative (for the given Synthesis Scheme) dimensional sublevels with e-Configurations from more qualitative sublevels.

4.0724. The most unstable «karmonations» ethereal Configurations of 0–1-dimensional and 1–2-dimensional diapason, in various Form-Creators' Focus Dynamics, multipolarizationally go through appropriate kleksing, which again lets them resonationally — qualitatively in a new way! — «rearrange» themselves in relation to each other, being consuyetally engaged into e-Configurations of a bit more ampliative (towards every birvulyarity type) «bi-tetrahedrons,» structured with interconnections more corresponding to the given birvulyarity.

4.0725. So, in every rotational Shift of any Focus Dynamics multipolarizationally and concatenationally (simultaneously by all possible Synthesis Directions!) there appear to be «formed» (i.e. initiated in ODS and «unpacked» in STCs by FDs of Form-Creators) newer, more complex-combined to each other types of «karmonations,» out of which we choose only the most corresponding ones to «current» Interests, creating from all their diversity the Conceptions, feelings, and thoughts most satisfying *particularly us*. Every rotational Shift (quantum displacement) brings to new «karmonations» types origination and their conglomeration (different-Qualitative kleksation) in subterrassive ODSs of focused by us NUU-VVU-Configurations.

4.0726. That general diffuzgent-multipolarizational process is carried out in our FD endlessly, regardless into which Self-Consciousnesses Forms we refocus after another revitalization in order to svilgs-spherationally synthesize the subjective Experience necessary for providing further ampliatiization of our FD and Self-Consciousness development. Therefore, we can say that every of slloogrently focused by us Worlds is always structured by new, qualitatively modified by us «karmonations» and SFUURMM-Forms originated from them. There just cannot be anything «old» or «previous» in any moment of our subjective Existence.

4.0727. Also, you should not forget about Information Slloogrentness Principle. It states that no one used by you SFUURMM-Form can be discretely manifested in Form-Creators' Focus Dynamics in the given Synthesis Scheme seemingly «by itself» and separately form multipolarizational content of multiple other SFUURMM-Forms, which do simultaneously structure qualitatively different FDs. Through amitsiration process, we always deal only with *slloogrentness* of general Information, out of which we — consciously and unconsciously — resonationally engage in our own FDs only those data and Experience which more or less correspond to our subterrassive realizational Interests.

4.0728. Taking into account the factor of the presence in ODS or FLC of the general for all people photoreductive Ether Content (empiric-intuitive Experience of simultaneous Existence of humankind's Collective Consciousness in diverse exhiberation conditions), any «exceptionality» of subjective Conceptions is out of the question. We all use the same — *human* — *slloogrent SFUURMM-Forms*, which e-Configurations' qualitiveness is represented in ODS in extremely wide diapason of their possible realizations through human Focus Dynamics. Only subterrassive peculiarities of focused NUU-VVU-Form-Types' Perceptions systems, providing their slloogrent Content realization, are different for every human. For example, sometimes, rainy and cloudy weather (or sunny and warm) is perceived by someone with happiness and enthusiasm and with irritation and antipathy by someone else; in other circumstances, all the same is experienced by the same people on the contrary.

4.0729. When ethereal «pyramidal» «karmonations» of 1–2-dimensional diapason, partly synthesized in every Aspect of each OO-UU-Entity, — as Form-Creators' FDs ampliatiization grows (what launches «corners» of each «karmonation») — begin to pairwise join with «corners» of *their square basis* (because the most covarllert and the stablest for the given combination interconnections are rooted particularly in them) into all the multitude of octahedral «karmonations,» forming thus unstably synthesized particular Aspects of every OO-UU, starting from conditional «moment» when imaginary subjective Observer gets a possibility to begin distinguishing properties and peculiarities of Form-Creators' FDs of 2–3 dimensional exhiberation diapason.

4.0730. It differs from the previous one by much more stability, since four base «corners» of every «pyramid,» combined with each other according to their analogous attributes, in «octahedron» (8 triangular «faces,» 12 «edges,» 6 «corners») possess already double decoherent Energy resource, considerable enhancing and amplifying possibilities of subjective realizations of each from these «karmonations» through Form-Creators' FDs. We designate that stage of extsederic (intermediate) Energy-Plasma State as inter-Aspect Synthesis, carried out within the attributes of one OO-UU-Entity.

4.0731. It will be easier for you to understand the organizational principle of that process if instead of each «corner» of two interacting «pyramids'» square basis you imagine magnets which, obeying the similarities attraction Principle<sup>15</sup>, tightly join each other, considerably universalizing and strengthening their functionality. The most impercept attributes in relation to the given combination, concentrated in the «corners» of every from the joined «pyramidal» «karmonations,» form in the new e-Configuration the most active «tensoriness moment» (yet unrealized informational potential) and therefore represent in synthesized «octahedron» particularly the *destabilizing* factor that at the interaction with Form-Creators' Focus Dynamics evokes in Self-Consciousness structure corresponding realizational effect interpreted by us as «essential Interest.»

4.0732. Let me remind you that every ethereal «karmonation's» «corner» of any complexity represents a conditional «point» for functional application of Form-Creators' Focus Dynamics and fulfils the function of the specific «projections initiation mechanism,» which presence allows Form-Creators to manipulate with necessary for them Informational e-Configurations in their realizational directions. Since the central part of newly formed «octahedron» is the most balanced in force, the function of guiding realizational vector for the following Creative Activity stage between various «octahedral» «karmonations» is consuetally imposed on attributes combinations that do structure yet realizationally «restless» (temporally disengaged, functionally undetermined) «corners» of every «octahedron.» Resonationally interacting with them, Form-Creators initiate (as «projections») not only «corner» interconnections but also the whole qualitative Essence of the given «karmonation,» which is inherent in its «inner informational space,» constantly filling this way its synthetic Experience and carrying out their amitsirations.

4.0733. It is necessary to note that each of these two «corners'» attributes can be somewhat impercept to each other, up to their full polarity. Therefore, the process of «conclusive» intra-Qualitative Synthesis among attributes of all the multitude of Every OO-UU-Entity's Aspects is very unique and specific. Due to the presence in every Aspect's e-Configuration of endlessly multiple «tetrahedral» «inclusions» of attributes diffuzgent to it, in the process of the most covallert (for the given exhibition conditions!) synthetic interconnection establishment, multiple ethereal combinations are originated in parallel that, according to their properties can be referred to interstitial (intermediate) ones between the basic Aspects, typical only of one OO-UU, and Aspects, *to some degree* typical of eleven other OO-UU-Entities. Between them specific informational relations are also originated partially falling outside subterransive properties peculiar to every OO-UU-Entity.

15 Absolute Compatibility Law of all multiple different-Qualitative Focuses in slloogrent Creative Dynamics of Macrocosmos's Form-Creators (LLIILL-GGLLAA).

4.0734. In the process of multipolarizational intra-Qualitative Synthesis, *svilgs-spherationally* interacting between each other within own OO-UU, «octahedral» «karmonations» of one OO-UU's Aspects get concatenationally combined into all possible ethereal models and constructions with interstitial Aspects «generated» by them, thus, creating the most necessary conditions for intra-Qualitative Synthesis concluding transition stage into its following stage — inter-Qualitative. These synthetic perturbations (from the most impersept into more covarllert combinations) take place until out of basic and vecsative combinations the most stable (in the given exhiberation modes!) informational combinations are synthesized which let some OO-UU's Aspects to enter actively multipolarizational interrelations with other OO-UU's Aspects, creating on their basis more universal and stable «octahedral» «karmonations.»

4.0735. This is an infinite variety of all possible «projections» of such e-Configurations which structures all resopasons of 3–4-dimensional Form-Creators' exhiberation diapason. The basis of such ethereal combinations is composed of «inter-edges» interconnections, formed by the multiple heterogeneous «octahedrons,» narrow-specifically constructed into «hexahedrons» («cubic» types of informational interconnections). Depending on the obvious prevailing in each of these Aspects constructions of any given OO-UU-Entities, Synthesis Schemes are emerged of various birvulyarity types with functionally corresponding to them, Self-Consciousnesses Forms in all the manifestation Rezomirals diversity

4.0736. For example, if in interconnections of ethereal Configuration there is the most clearly expressed Aspects' invaderentness of OO-UU-Entities such as ALL-Will-of-ALL-Intelligence and ALL-Love–ALL-Wisdom, it is possible to state quite definitely that informational Essence of such «hexahedral» «karmonations» are actively used in realizations of Form-Creators' FDs of the lluuvvumic CCIs' mixtum Self-Consciousnesses Forms. If together with them in «intra-edges» interconnections used in the NUU-VVU-Forms' FD, invaderental activity of Aspects of another OO-UU (besides ALL-Unity PCQ) is clearly manifested, this indicates that in the realization of the given «karmonations» there participate Form-Creators from already next (more complicated and universal comparing to «hexahedral») Energy-Plasma Levels — «icosahedral» ones, which are formed by Focus Dynamics of *superparentive different-protoformal* versions of 4–5 dimensional NUU-VVU-Self-Consciousnesses Forms.

4.0737. Concurrently, to varying degree invaderental activity of OO-UU-Aspects of the ALL-Unity PCQ indicates that, in the given exhiberation «point,» the Form-Creators' Focus Dynamics are manifested either of dimidiomittense (at less activity) or translucense (at higher activity) analogs of *human* versions of NUU-VVU-Form-Types. In other words, «hexahedral» type of «karmonational» e-Configurations (from the positions of their consideration through *human* FD, since from the positions of other Synthesis Schemes that process gains completely other manifestation parameters!) take place only at *two-invaderental* interaction between covarllert Aspects of any *two* OO-UU-Entities.

4.0738. Such cases involve only cubic manifestation type (physical, peculiar to the given materiality type), which we (i.e. people) determine in our specific reference system as 3–4-dimensional Self-Consciousnesses Forms' exhiberation diapason of humankind's Collective Consciousness. When in interactions of «hexahedral» «karmonations,» representing two OO-UUs' attributes, there appears

an increased invaderental activity of the third OO-UU's Aspects, «octahedral» interconnections in «hexahedral» e-Configurations start to informationally deform and to «shift» into the third Dominant direction, being concatenationally transformed into any given «icosahedral» options — extsederic between «hexahedral» and «dodecahedral» (for *human* FD's parameters — 4–5 dimensional exhiberitation diapason) types of «karmonational» e-Configurations.

4.0739. Here I should remind you that all these «karmonations» have such definitions («tetrahedral,» «pyramidal,» «octahedral,» «hexahedral,» «icosahedral,» «dodecahedral») not because these ethereal combinations have such Configurations (without interconnection with FD they can not have any own «form» at all, because they are not manifested!), but because when Form-Creators use them, the «materiality» of organized by them surrounding reality acquires tendencies which mostly *resemble* to a subjective 3–4-dimensional diapason Observer's specific features partially peculiar to the abovementioned geometrical figures. It does not mean that the smallest details of the World around us (on Planck scales) derive from certain arch-microscopic «cubes,» like «pixels» of digital images. However, various «karmonational» combinations provide our focused manifestations with properties very similar to the peculiarities of all possible geometrical figures with cubic attributes.

4.0740. These transformations, carried out «inside» «karmonations» under the influence of Form-Creators' different-Qualitative Focus Dynamics, are very diverse and complex, which in many cases do not let us compare them with any known figure. There are uncountable options of similar interconnections, which we are just not capable either to comprehend or to reflect in our FDs! However, for example, on a simplified diagram that process can be shown approximately in the following option of possible change of some geometrical Configurations into the others (see Pic.1).

4.0741. Besides, let me note that profectively there are no subjective «divisions» between «tetrahedral» and «dodecahedral» manifestation Levels of all these interconnections! They «show up» just at subjective analysis of every transformation result from the positions of estimating *relative qualitiveness* of manifesting consequences.

*Pic.1 Diffuzgent transformation example of «karmonational» figures of the lluuvvumic birvulyarity in the Tertiary Energy-Plasma low diapasons from zero-dimension «tetrahedrons» to three-dimension «hexahedrons» and the next extsederic Forms of higher resopasons.*

4.0742. It is very important to understand that on any intermediate stage of this holochrone-simultaneous process together with organization of more universal invaderental interconnections, there is always the background realization of Creative Activity among less organized e-Configurations (starting from «tetrahedral» and higher). Rather, due to the constant presence in Form-Creators' FDs of particularly these — more elementary — components, the following formation process of more complex psycho-mental constructions (SFUURMM-Forms) becomes possible. It structures every type of s-Realities and every more ampliative dimensional diapason. Due to that, every «octahedron» concatenationally diversifies (sm. Pic. 1) into «trigontrioctahedron,» «tetragontrioctahedron,» «pentagontrioctahedron,» «geksaoctahedron,» and, finally, into completely new (according to newly synthesized attributes) «hexahedron.»

4.0743. For origination of more stable «karmonations,» it is necessary to engage as many as possible heterogeneous but *covarllert* to each other (stably fixed between each other), informational interconnections of multiple emanations and psychonations, participating in that process. «Stable» here means a certain stability, reliability, thoroughness, i.e. more universality degree of already synthesized with each other energy-informational interconnection jointly organized by various «karmonations» types.

4.0744. Forexample, «tetrahedral» «karmonations» after integrating (through «trigontritetrahedral,» «tetragontritetrahedral,» and «pentagontritetrahedral» states) into six «pyramidal» («hexatetrahedral») constructions, cannot immediately form «hexahedral» «karmonation» type, due to the absence in their combinations of sufficient quantity of *heterogeneous* interactions informationally adjusted by Meaning. Therefore, six extremely unstable «hexatetrahedral» «karmonations» preliminarily join with each other by their bases into more stable Configurations of three «octahedrons,» which then (through intermediate states of «trigontrioctahedrons,» «tetragontrioctahedrons,» «pentagontrioctahedrons,» and «hexaoctahedrons») gain possibility to unite into more stable «cubic» «karmonations.»

4.0745. Since quantity of «hexahedrons» very close by informational Essence — during FD amplificatio — constantly multiplies (due to inner transformation of every «hexahedron»), which

causes consuetal increase in realizational possibilities of every created («released») SFUURMM-Form used by Form-Creators' Focus Dynamics of «hexahedral» s-Realities types. General energy-informational Potential of these SFUURMM-Forms (comparing to the previous) inevitably increases, which entails interconnections of «hexahedral» structures to gather in every «following» exhibition mode into new and more energy-intensive Synthesis Directions in order to carry out their own realizations.

4.0746. Thus, «hexahedrons» — *in 3–4 dimensional diapason conditions* — due to integration into their e-Configurations of more covallert «tetrahedrons,» concatenationally converse into intermediate «tetrahexahedrons,» then — into «rombododecahedrons,» «icosahedrons» (30 «edges,» 20 «faces,» 12 «corners,» structured by 20 «tetrahedrons»), truncated «icosahedrons» (90 «edges,» 32 «faces»), «pentagondodecahedrons,» or actually «dodecahedrons» (30 «edges,» 12 pentangular «faces,» 20 «corners,» structured by five intersecting «hexahedrons,» which represent open geometrical system of five orthogonalities or symmetrical intersecting of five three-dimensional spaces) and «didodecahedrons» (seemingly duplicated «dodecahedrons» with four-corner «faces,» 24-hedrons). The given «karmonations» are not associated with definite dimension Levels due to the presence in their f-Configurations of heterogeneousness's subterransive attributes.

4.0747. Let me note that depending on birvulyarity type, combinations are structured into star-shaped «icosahedrons» (there are about sixty of them) and easily transformed into «dodecahedrons,» and vice versa, «dodecahedrons» are transformed into «icosahedrons.» The same happens at the following informational changes (Focus Dynamics kleksing) with «didodecahedrons» and with more universal e-Configurations structuring the Tertiary Illusion's Form-systems: Depending on the qualitiveness of accomplished transformations, they inter-transform themselves, forming in every diapason a countless multitude of *different-birvulyart* dimensional types.

4.0748. That transformational (synthetic) process is determined by the permanent presence of resonational Aspects' activity not only of invaderental Dominants (however, many of them are present in e-Configuration!) but also eglleroliftive tendency of *corresponding* Aspects of all the rest *vecsative* OO-UUs (which combinations are capable — at least partially! — to informationally *complement* the general Essence, formed by invaderental interconnections) to primariusive change of existing interconnections into their own. There such simultaneous inserts (and also substitutions) are carried out subterransively *according to every Dominant*, in parallel — in proportion to concatenational accumulation of *general for them* covallert interconnections — being synthesized into SFUURMM-Forms which informational Essence is somewhat typical of both Dominants.

4.0749. Such «substitutive» tendencies are carried out comprehensively and deeply on the part of all PCQs' Aspects in relation *to every Aspect of every OO-UU-Entity*, which acts as Dominant in any given e-Configurations! That ensures execution of Multipolarization Principle among all Focus Dynamics, which SFUURMM-Forms are structured by *diffuzgent* attributes. Due to these peculiarities, OO-UU-Entities are capable to organize (*seemingly* «in one and the same points» of Space-Time) a countless amount of realizational possibilities for Form-Creators of various Synthesis Schemes of every birvulyarity type (for example, mixtum, simplisparentive and dimidiomittense Forms-Creators — 3–4 dimension; superparentive and translucense — 4–5 dimension; supraparentive and luminosal

— 5–6 dimension; ultraparentive and transliirst — 6–7 dimension; ekstraparentive and transtraarms — 7–8 dimension; divinparentive and transtlluuvvst — 8–9 dimension, and so on), which creates the whole different-Qualitative basis for *multiverse* formation.

4.0750. «Emanations» and «psychonations» of all «tetrahedral» «edges» (as well as of «karmonations» — formed by them in *all* exhuberation Levels) possess specific state of constant intra-Qualitative instability, which is the main Reason of heterogeneous eglleroliftive Form-Creators' Focus Dynamics realization in Energy-Plasma, expressed in their tend to harmonization and balancing of own «karmonational» (focal-ethereal) interconnections. Whatever countless PFDs' Levels Focus Dynamics occurs on, in its peculiar «karmonations» (SFUURMM-, LLAASS-, YYYUULLUYG-, SSNUUYLL-Forms, and so on), there are always both more covarllert (to the given Synthesis Scheme) and more impersept interconnections, which cause Form-Creators' amitsirations into more and more perfect (for the given birvularity type) f-Configurations.

4.0751. Continuous focusing on new complex-configurational combinations is necessarily accompanied by corresponding for their Synthesis Schemes new Information kleksing, which every time creates conditions for the formation to varying degree tensor states between already synthesized and new combinations. Particularly that subterransive circumstance determines vector (directness) of consequent realizational interactions of Form-Creators' Focus Dynamics.

4.0752. Such FD provides less possibilities for the manifestation of all possible depliative tensors if e-Configurations used by Form-Creators were formed by higher diversity of *covarllertly* synthesized heterogeneous interconnections. Since the main Reason of any tensoriness is the absence in the subjective Conception of interconnections insufficiently balanced by the characteristic attributes of some OO-UU-Entity: The given FD vector is realized in the Direction of less synthesized attributes (in order to *svilgs-spherationally* form the Experience missed for deeper understanding of the given situation).

4.0753. Therefore, Self-Consciousnesses Forms' Focus Dynamics, structured by more ampliative exhuberation Levels' SFUURMM-Forms (i.e. more *diversely* synthesized by covarllert to the given Scheme attributes), are less disposed to all possible duality, contrast, antagonism, denial of possibilities and similar attributes of the presence in used SFUURMM-Forms of informationally undermanned (covarllertly uncompensated between heterogeneous attributes) combinations. With every following, more ampliative exhuberation Level, in every Self-Consciousness Form's FD there appear additional opportunities for active inclusion in it of new — *partially compensating* some interconnections activated in it — «karmonational» combinations, which are typical of FDs of other Proto-Forms' Self-Consciousnesses.

4.0754. The main task of the Tertiary Illusion's Creators-*svilgs*: *svilgs-spherationally* orienting and organizing amitsiration process of every Self-Consciousness Form's (of the given Synthesis Scheme) Form-Creators into those development Directions where insufficient for them combinations of some OO-UU-attributes already structure other Form-Creators' Focus Dynamics. They enrich subterransive Experience of the given Self-Consciousness Form by those covarllert interconnections which are extremely necessary for decreasing (in Conceptionz used by them in life creativity) high tensoriness towards some realizations.

4.0755. Such svilgs-spherational inter-Qualitative perturbations in different protoformal Directions are carried out by Form-Creators of our NUU-VVU-Form-Types constantly, with different intensity and duration of subjective «deepening» in every creativity type, thereby allowing each of us to constantly self-improve, to multipolarizationally deepen, and to enrich own subterraneous, already synthesized Experience before, developing and restructuring it with more and more universal SFUURMM-Forms.

## **Chapter 8. Amitsirational reciprocity principle between Focus Dynamics of Form-Creators of various dimension Levels**

4.0756. In all that general amitsirational process, simultaneously carried out by all synthetic Form-Creators, very important role is played by Creators-svilgsons' *catalyzing* function, which lets subterraneously organize all possible «inner» informational transformations of SFUURMM-Forms of every Self-Consciousness Form's Focus Dynamics strictly corresponding to the objective requirements demanded by its Synthesis Scheme. The thing is that at covallert adjustment of conditional «corners» of heterogeneous «karmonations» (starting from «hexahedral»), each of these «corners» (by its informational Meaning) can reflect not only typical of the given Self-Consciousness Form the two (for 3–4 dimensional Levels) Dominants' combinations of invaderental attributes but also more or less unstable (in relation to them) vecsative attributes' combinations representing in the given «karmonation» peculiarities of some other from the rest ten OO-UU-Entities.

4.0757. Those supportive or secondary attributes are interpreted by us as «*catalysts.*» *The main* synthetic process (General development Direction for the representatives of the given Synthesis Scheme) just cannot be carried out without their presence in the given Self-Consciousnesses Forms' SFUURMM-Forms. Attributes-catalysts' presence in e-Configuration can be compared with GPS-navigator functional, organizational principle, which with the help of particular informational support (Global Positioning System) not only identifies current location of the given device on the Earth but also being based on certain attributes (according to the difference between the moment of signal detection by the device and the moment of its synchronous transmission from a satellite) gives a general notion of how far the given object is from its goal, and how correctly (efficiently) it moves towards it.

4.0758. The object in the given case is a considered by us Self-Consciousness's NUU-VVU-Form-Type («person»); the goal is more ampliative Focus Dynamics for the lluuuvvumic Synthesis Scheme (f-Configuration on more Qualitative Level), while the specific positioning system is the Information about available differences between invaderental attributes combination activity in «personal» FD (high-intellectual Altruism (HIA), high-sensual Intellect, immunitant Responsibility, humanitarian Freedom, and like that) and structuring them vecsative interconnections activity of different constructive complexity. This implies a conclusion: The higher primariusive activity of synthesized combinations — ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence — in the direction of their concatenational solvation with PCQ's ALL-Unity OO-UU-attributes (as opposed to all the rest OO-

UUs!) in «personal» life creativity, the more effective the process of its subterransive amitsiration is into more ampliative CSR of the lluuvvumic development Direction.

4.0759. Catalyst role can be played by the most diverse sub-Aspects combinations with Aspects of any OO-UU-Entity's vecsative Synthesis Scheme to the given Self-Consciousness Form. Notably, seemingly «one and the same» vecsative attributes' content, differently combining in f-Configurations of various Form-Creators' FDs, is able to very strongly influence subterransively formed SFUURMM-Forms' realizational Meaning as well as qualitiveness of following choices succession. Everything depends on where — on which specific Qualitative manifestation sublevel — the connection of these catalyzing attributes is set to the combination jointly synthesized by invaderental pair.

4.0760. The less Qualitative sublevel of SFUURMM-Form's manifestation leads to higher deformation of already peculiar to it Meaning (due to little «quantity» of stable — covarllert — interconnections) at every new attribute integration into its e-Configuration. And vice versa, the more qualitative focus interaction (higher FD's exhiberation Level) is, the less other Information particles are capable to influence already synthesized general Meaning (diffuzgentness increases, which opens much higher possibilities for compromises and interpretation of used SFUURMM-Form). In more ampliative exhiberation Levels of Form-Creators of the given Synthesis Scheme there happens consuyetal sublimation of empiric Experience of countless multitude not only of mixtum but also diffuzgent simplisparentive Self-Consciousnesses Forms of lower sublevels. That replenishes *more developed* (according to lluuvvumic attributes), human subterransive Experience.

4.0761. Thus, Form-Creators' FDs exhiberation process of 3–4 dimensional Space-Time diapason «geometry,» which are more difficult and energy-informationally intensive by Their f-Configurations, are eglleroliftively provided by diverse Form-Creators' FDs of multiple 2–3 dimensional diapason Levels. Besides, all possibilities of flaks Form-Creators' FDs are energy-informationally provided by synthetic processes «deepness» carried out by Form-Creators of «previous» 3–4 dimensional diapason ... And so on — while increasingly carrying out eglleroliftive concatenational confluence of already formed «previously,» covarllert combinations into Form-Creators' FDs of every more ampliative resopason. In parallel, possibilities for that convergent process realization by Form-Creators of the «personalized» Self-Consciousness's depliative («located below») Levels are provided due to the presence in their Focus Dynamics, albeit insignificant, but nevertheless eglleroliftively conditioned *activity* of more ampliative SFUURMM-Forms' «projections,» which have been already generated by Form-Creators of «located above» Levels of the «personalized» Self-Consciousness (the lowest collective Subconsciousness). Thus, the principle of *amitsirational reciprocity* (functional interdependence, creative interconditionality) of slloogrent Focus Dynamics' different-Qualitative parts among Form-Creators of various exhiberation Levels is carried out.

4.0762. As you remember, the main role in the process of implementation (through Form-Creators' FDs) of intra-Aspect and inter-Aspect combinations («inside» one OO-UU-Entity) belongs to «tetrahedral» «karmonations.» Although, informational interactions format between them in the inter-Qualitative Synthesis conditions (starting from 3–4 dimensional diapason and «higher») changed (in fact, particular «tetrahedrons» do not already exist there), but their role still stays significant in the mechanism of the formation in FD of more and more universal SFUURMM-Forms

(meaning, types of s-Realities as well!). Even though Form-Creators' FDs of our Perception system are realized basically via «hexahedral» and «icosahedral» «karmonational» combinations (though, «octahedral» SFUURMM-Forms are still typical of less developed «personalities»), mechanisms of intra-Aspect and inter-Aspect («inside» one OO-UU) Synthesis, as before, are extremely important in inter-Qualitative processes of any difficulty level.

4.0763. Why? As in Form-systems of Worlds, there cannot be liyllusceve (i.e. heterogeneous but absolutely identical in qualitiveness and manifestation Meaning) combinations, up to the highest consummatization State (after which there goes transformation of all FDs of the Macrocosmos's HCCI into primogenitive SSS-State) — such f-Configurations are annihilated in one Space-Time «point» and exiberate in the other «point» — already in the unbalanced state). Instead, there are more or less covallert by their subterransive Meaning, combinations (for example: «green tree» and «pine-tree»; «sky» and «space»; «solidity» and «rock»; «fluffy» and «pleasant,» and so on), in which there have already been put multiple «hexahedral» «karmonations» stable by its meaning content.

4.0764. In order to form specific SFUURMM-Forms out of them, it is necessary to remove something out of every combination and to adjoin something else. For example, not all green trees are pine-trees and not every pine is green. Without taking into account many other meanings of these two words and putting in them a definite Sense, we construct our own «hexahedral» Conception «green pine-tree» out of them. It is easily formed in our Imagination in the specific Form-image, which is already a part of our surrounding reality.

4.0765. In the same way, Meanings of either «hexahedral» SFUURMM-Form — «sky» or «space» — have separately multiple diverse interpretations and associations. In order to form out of them new «hexahedral» SFUURMM-Form, we «throw off» all impersept (incompatible) meanings and unite (synthesize, quantize in own Perception system) only their covallert areas Meanings. In the result, we get new specifics — «sky space.» More or less the same principle takes part in the formation of all the surrounding reality of human STCs and CSRs.

4.0766. Thus, covallert parts of our used SFUURMM-Forms represent already quite stable by their e-Configurations «hexahedral» «karmonations,» while their impersept by Meaning (in every specific case!) areas can be conditionally depicted in the forms of «free radicals,» which appear to «spread» (in our FD!) out, beyond our «current» Conceptions about the considered object (however, simultaneously, each of them is spatiumally included via its «projection» in multiple other people's FDs, who have made different Conceptions out of the same «karmonations»). Each of these «free radicals» represents a certain, «currently» *not necessary for us*, informational «surplus,» which is perceived according to our Conceptions as a certain meaning «shaginess» that should be deleted from the general context or «polished,» i.e. adjusted with our Conception.

4.0767. In every individual case of manifestation of a «person's» subterransive Focus Dynamics these are, in fact, heterogeneous «tetrahedral» «karmonations,» which in covallert «hexahedral» constructions are represented by impersept interconnections. In some versions of «karmonational» combinations they can be structured in the form of less stable than «hexahedrons» «pyramids» with less covallert for the given e-Configuration interconnection type, which also very easily differentiate

by Focus Dynamics into «tetrahedrons» (i.e. all the irrelevant, not corresponding to its subjective Meaning is «deleted» from the Conceptions).

4.0768. Every Proto-Form's invaderental Form-Creators when performing their synthetic functions through qualitatively peculiar to them Focus Dynamics (for the formation of Their own «hexahedral» types of s-Realities) use «tetrahedrons,» «pyramids,» and «octahedrons» (fragmented Conceptions) kleksed just «personally» by them, for example, by means of resonational choosing out of subterransive ODS's part only slloogrent particles (components) of human photoreductive Ether. «Personally kleksed particles» — are Information particles which «personalized» Self-Consciousness's Form-Creators were able to synthesize (manipulating them through bio-Creators' Perception system) into ODSs and FLCs definite subjective Conceptions and corresponding to them Existence Experience. In Focus Dynamics, they represent «projections» of all cause-effect (karmic, causal) energy-informational interconnections, which really determine qualitiveness of their «current» choices in relation to the objective conditions (requirements) of the given Synthesis Scheme.

4.0769. Let me remind you that the process is carried out (through FD) in Self-Consciousness's informational space of every «person» due to the presence in his/her Perception system of *peculiar only to it* VVU-Factor's Configuration, which allows to refer to any «inside» and «outside» aspects only from the viewpoint limited not only by Synthesis Scheme but also by subterransive VLOOMOOT and NNAASSMM parameters. In other words, everything that was not experienced and felt deeply (subterransively not fixed in certain ODS's and FLC's parts through hormonal bio-Creators' FDs in the process of continuously carried out by them TEC and VEC-«unpackings») directly by a «person» (concerns the most part of Information coming from outside) is not perceived as completely synthesized Experience, because these informational flows represent only potential possibilities for the initiation in every «person's» FD of any given resonational reactions (Interests), corresponding to which qualitiveness the process of its subterransive development can be carried out (the formation of own Existence Experience within the general multipolarization of its FD and identification in Self-Consciousness's informational space with certain f-Configuration of current «personalized» Interpretation).

4.0770. Most of s-Realities of 3–4 dimensional exhuberation diapason, where Form-Creators' FDs of human STCs and CSRs are represented, are structured mainly by «hexahedral» karmonations, which «inside and outside edges» (composed out of stable «octahedrons» and unstable «free radicals») represent force vectors of possible realization of *different-protoformal* interconnections, kleksed by the typical criteria of human VVU-Factor. However, all that does not mean that our STCs are absolutely «homogeneous» «hexahedral» Form-systems, in which bases there lies only our human type of surrounding reality quantization.

4.0771. Do not also forget that fundamentally in general simultaneous exhuberation Mechanism of Form-Creators' Focus Dynamics of all Form-structures of Macrocosmos's skrruullerrt system, there are Universal Principles of Slloogrentness, Resonationness, Multipolarization, and Diffuzgentness of all f-Configurations, in correspondence to Which every Self-Consciousness Form creates «around itself» (by means of own FD) the Space-Time birvulyarity type which to varying degree corresponds to subterransive peculiarities of its Perception system.

4.0772. A human STC is very diverse by its focal-ethereal structure, because near us (people) there is simultaneous life creativity of zillion of different-protoformal Self-Consciousnesses Forms (starting from various fermion, animal, plant, mineral FDs and finishing with all possible cosmic objects' FDs). Strictly corresponding to their Synthesis Schemes, each of them forms its surrounding reality via both «hexahedral» and «pyramidal,» and «octahedral.» The same is about «icosahedral» and «dodecahedral» «karmonations.» Exactly therefore both Space around us and Time represent extremely inhomogeneous by their sllougent f-Configuration construction interlacing via diverse realizational properties and functional peculiarities.

4.0773. «Hexahedral» interconnections type are stably manifested in *human* STCs and CSRs only in the exhibition «points» which are potentially and stably formed with the help of already highly synthesized *human* Conceptions: A more ampliative «person's» FD in life creativity leads to more stable and reliable result. Less developed «persons'» creativity is highly exposed to various — more destructive and intensive — different-protoformal influences from the outside, which makes their creativity results very unstable and unreliable. Meaning, the human activity attributes (all the more — ampliative lluuuvvumic) will be in these exhibition «points» of our STCs extremely weak and short.

4.0774. Thus, in human STCs, a countless multitude of places is originated with completely different space-time structural realization typical of those Self-Consciousnesses Forms who «put» in its organization a greater Potential of their Focus Dynamics. These can be «products» of psycho-mental activity not only of mixtum (animal, plant, mineral) but also various simplisparentive Proto-Forms in relation to our Synthesis Scheme.

4.0775. Space-Time multifunctional structure of surrounding Cosmos is represented by even greater variety of properties and peculiarities. We can observe that structure just only passively (and only partly!) practically having no influence on the focal-ethereal interactions content, which in various areas of cosmic space was formed due to the continuous realizational efforts of different CCIs' Form-Creators. Therefore, it is pointless to talk about creation of a certain «Unified theory of everything» (unifying FDs on micro- and macro-levels), because in fact we are capable to perceive, to distinguish, and to analyze — moreover very specifically! — only those parts of our surrounding Continuum, with which structuring type our Perception system's Form-Creators can at least somehow resonate.

4.0776. Consequently, all the content of our «reality» around us can be logically and adequately «composed» only from available «hexahedral» VVU-attributes, which most actively structure our own Focus Dynamics. Their stable absence may seem to us as «nothing» in the given Space-Time «point,» while the given area of skrruullerrt system is literary «swarmed» with all possible different-protoformal interconnections, which Essence our Form-Creators (for example, of reticular formation) are just not capable to adopt (or very slightly capable to capture its resonational meaning reflection) to the peculiarities of our Perception systems.

4.0777. In other words, there are still just no active SFUURMM-Forms corresponding to the given narrow-specific realizational manifestations in the «current» Configuration of used by us empiric

Experience. On a massive scale they inevitably start to manifest themselves in dimidiomittense FDs (more ampliative NUU-VVU-Form-Types), because in the basis of «personalized» Self-Consciousness there starts to «project» existence Experience of many types of less qualitative but more diverse according to VVU-Factor simplisparentive Self-Consciousnesses Forms.

4.0778. Proceeding from the above-mentioned we can conclude that the whole assembly of «hexahedral» «karmonations» (and structured by them UU-conglomerates of all possible subjective Conceptions), forming surrounding us reality, represent a slloogrent e-Configuration functionally diverse and different-Qualitative by composition, formed by the countless multitude to varying degree covarllert between each other, different-protoformal interconnections on the level of «tetrahedrons,» out of which, through individual peculiarities of various Proto-Forms' Focus Dynamics, in each STC type, specific kinds of «pyramidal» and «octahedral» SFUURMM-Forms subterraneously peculiar to certain Synthesis Schemes (or to their «inner» Development directions) are composed. Particularly that factor determines our perceptivity of some specific STCs areas and our full irresponsiveness towards other areas, in which f-Configurations the VVU-Factor's presence is either very unstable or just absent.

4.0779. Information, synthesized by us as our human SFUURMM-Forms but — to varying degree and in different qualitative interpretation — also peculiar to other multiple Proto-Forms' Focus Dynamics, is fundamental for specific «human» relations: our worldviews, moral and ethic bases, tastes, views, and so on. It all specifically «projects» empirical Existence Experience of these Proto-Forms into the Meaning of composed by us laws, in particularly typical of our religious confessions community, scientific conceptions, philosophy, politics, economy, society, as well as any of our behavior reactions, emotions, feelings, and way of thinking.

4.0780. Thus, it comes out that our FD type cannot be called purely «human,» since seemingly «one and the same» synthesizing Form-Creators, actively realizing Themselves in our lluuvvumic invaderental pair, are not less invaderental simultaneously in other — different-protoformal! — Synthesis Schemes, which differ from ours by somewhat different Dominants combinations. So, it is totally impossible to clearly determine those qualitative Focus Dynamics borders of any «person,» where exactly (and when particularly) Creative Activity of invaderental Form-Creators of one Proto-Form finishes and realization of «the same» invaderental Form-Creators simultaneously participating in different Synthesis Scheme begins.

4.0781. However, without the presence of so high diffuzgentness of «karmonational» interconnections in Form-Creators' Focus Dynamics of different Schemes and inter-Qualitative Synthesis Directions, that Process, which starts in our STCs' types on the level of active «octahedral» interactions and gets realized fully though all «hexahedral» Self-Consciousnesses Forms, would be simple unrealizable. The carriers of all multiple different-protoformal properties and attributes are «octahedrons,» which structure «hexahedral» part of the skrruullerrt system with diverse Meanings. Out of these properties (by means of selective VVU-kleksing) Form-Creators of either Dominant of lluuvvumic pair resonationally attract in every «person's» Self-Consciousness's informational space just those particles of UU-conglomerates' slloogrent e-Configurations which they are able to naturally manipulate via peculiar to people Perception systems (in other Proto-Forms' Perception systems

«one and the same» particles are combined with «the same» Form-Creators into completely different by Meaning Conceptions, thus, simultaneously forming qualitatively other types of s-Realities).

4.0782. «Hexahedrality» principle regulating interactions among different OO-UU-Entities' Form-Creators in the given dimensional diapason is reflected basically on the possibilities of their Focus Dynamics' exuberation Mechanism in certain Space-Time modes, while the whole psycho-mental basis (reactions, relations type) is inherent in the «inner» («interedges») interconnections of every «octahedral» «karmonation.»

4.0783. During the process of svilgs-spherational manipulations of these «karmonations'» content and their multiple inter-Qualitative perturbations, we produce all our Thoughts and Feelings, emotions and experiences, which are far from permanently consistent and definite, since they are composed by us randomly out of the countless multitude of multifarious «octahedrons» (both of invaderental and vecsative attributes) simply «on the fly» corresponding to continuously changing Potential of our «current» priorities and views. For example, now, our essential Interests can correspond to attributes of one kind of OO-UU-Entities (of Proto-Forms invaderental according to their attributes), and sometime later — of the others, the third ones...

4.0784. Prevailing of «octahedrons» in our «hexahedral» Focus Dynamics with peculiar to our Scheme invaderental (lluuvvumic) attributes activity (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Unity) facilitates concatenational formation and concentration in our Self-Consciousness's informational space of more ampliative, human Conceptions (up to «icosahedral» and also «dodecahedral» «karmonations»), while active and tendentious engagement in FD of «octahedral» combinations with predominantly vecsative (for us) covarllert interconnections enables formation of depliative SFUURMM-Forms (up to extremely fragmented, limited, and highly destructive in their Meaning Conceptions of Form-Creators of the first pair of IISSIIDI-Centers' lower Levels). Those SFUURMM-Forms svilgs-spherationally turn our subterransive amitsiration process to various protoformal development Directions or even to Synthesis Schemes.

4.0785. In the given case, qualitativeness reduction, among many other reasons (inconsistency with current invaderentness Scheme principles, insufficient volume of covarllert interconnections, and so on), happens also due to imperseptness increase inside «octahedral» interconnections at the interactions with Focus Dynamics of particularly *human* «personality.» That encourages invaderental Form-Creators (in order to form some, even extremely weak and unstable, Conception about anything) to differentiate (to dissolve) «octahedral» «karmonations» into highly unstable «pyramidal» combinations so that to «take out» of them at least some part of apprehensible Meaning.

4.0786. In such cases, of course, in «person's» FD there just cannot appear anything rational, reasonable, and constructive: All UU-conglomerates «unpacked» in such states are perceived only as segmented fragments, pieces of different Thoughts and emotions. It is possible to conditionally imagine such «karmonation» in the form of some Information particle with multiple «exerted» (due to their imperseptness to each other) «free radicals,» after which dissolution (along more covarllert interconnections in other FDs) there is nothing left.

4.0787. As has been already mentioned, at the achieving of a certain interstitial state between two synthesized Dominants, in Focus Dynamics formed by their Form-Creators, there start to originate conditions for more active engagement in their join Synthesis process of certain «octahedral» «karmonations» of some of the ten OO-UU-Entities vecsative in the given Synthesis Scheme. If we speak about mixtum NUU-VVU-Form-Types' FDs, favorable realization conditions are formed, first, for OO-UU-attributes such as ALL-Voidness–ALL-Vacuumness (priority to the Dominant ALL-Love–ALL-Wisdom; we get: ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Vacuumness) and ALL-Aspiration (priority to the Dominant ALL-Will-of-ALL-Intelligence; we get: ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Aspiration).

4.0788. As a result in Form-Creators' FDs of the lluuuvvumic Dominants pair's multipolarization there happen simultaneous amitsirations into different types of *the most primitive* — out of all possible or the given Scheme — versions of simplisparentive (three-invaderental) NUU-VVU-Self-Consciousnesses Forms. It is very difficult to describe the further process of increasing priority for some OO-UU-attributes, as it is multipolarizationally and subterraneously carried out in every out of three Dominants, simultaneously organizing different by qualitiveness (according to the lluuuvvumic attributes!) types of *four-invaderental simplisparentive* NUU-VVU-Form-Types.

4.0789. Let me remind you that all that happens in parallel with existence in the given dimensional diapason of Form-Creators' Focus Dynamics of *two-invaderental* mixtum NUU-VVU-Self-Consciousnesses Forms, only very small part of which maintain in their amitsirations a stable tendency of qualitative perturbations into dimidiomittense NUU-VVU-Forms of the lluuuvvumic birvulyarity type (through the consequent concentration in the interconnections of formed by them «hexahedral» «karmonations» of the attributes more compatible with the OO-UU ALL-Unity). The others of these NUU-VVU-Form-Types of the given diapason represent all possible and different-Qualitative in their development interstitial states of people (and their mixtum analogs), who svilgs-spherationally focus in different-protoformal multipolarizational amitsirations Directions typical of the given two-invaderental Synthesis Scheme Form-Creators.

4.0790. With the increase of covarllertness amidst attributes of the most compatible to each other OO-UU-Entities, there also grow realizational opportunities for their joint interaction through «edges» of «hexahedral» and «octahedral» «karmonations,» which do structure Form-Creators' FDs of various Self-Consciousnesses Forms. Such extension of informational volume leads to the powerful inter-Qualitative perturbations «inside» every «hexahedron» (between «edges» of six pyramids and «free radicals»). That prompts an essential need in the amplification («extension») of realizational properties of activated by them informational space.

4.0791. Due to these tendencies, combinations that possess higher covarllertness get consuyetally transformed with each other into «tetrahexahedrons,» «rombododecahedrons,» and also different types of star «icosahedrons,» «dodecahedrons,» and «didodecahedrons.» Do not pay attention to the listing succession of these polygons' names in the text, as that sequence is multipolarized into multiple Synthetic Focus Dynamics sub-schemes, and therefore it is not possible to find a certain priority succession in that slloogrent-diffuzgent process. They all are very easily transformed into each other at corresponding qualitative changes «inside» any of the «edges» structuring them,

forming thus in every exhibition diapason the whole multitude of different-birvulyart dimension types.

4.0792. It turns out that «octahedral-hexahedral» e-Configurations of «karmonations» of each OO-UU-Entity, simultaneously synthesized in different-protoformal Directions of the given birvulyarity type (and therefore dimension!), resonationally immerse into general focal Process of inter-Qualitative Synthesis of the two lluvvumic Dominants' Form-Creators, forming thereat multiple all possible resonational f-Configurations, which are svilgs-spherationally conversed into «icosahedral-dodecahedral» human and humanlike s-Realities types. Such inter-Qualitative perturbations happen «inside» Form-Creators' f-Configurations of the both lluvvumic Dominants along with the deepening and stabilizing more covallert interconnections between them, which informational Essence starts to consuyetally engage the PCQ's ALL-Unity OO-UU-attributes.

4.0793. That Process becomes the main Cause more ampliative transformation of functional properties not only of NUU-VVU-Form-Types' Perception systems (from mixtum into dimidiomittense) but also of dimension type of surrounding them Space-Time conditions (from «hexahedral» into «icosahedral» and «dodecahedral»). However, let me repeat: it is typical only for the most favorable (lluvvumic) development Direction of the given Synthesis Scheme' Form-Creators (ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence + ALL-Unity). In all miscellaneous Directions, in Form-Creators' Focus Dynamics of mixtum NUU-VVU-Form-Types there happen svilgs-spherational inter-Qualitative perturbations into all possible simplisparentive (icosahedral-dodecahedral) analogs of NUU-VVU-Self-Consciousnesses Forms (and dimensions corresponding to realizational possibilities of Form-Creators of their Focus Dynamics).

4.0794. It is necessary to note that intra-Qualitative Synthesis process of any OO-UU-Entity does not finish in «hexahedral» exhibition diapason of Form-Creators' FDs, — it is not right. In these conditions (due to engaging in it of the most covallert attributes of other OO-UUs), it acquires just additional realizational possibilities. In reality, both intra-Aspect and inter-Aspect levels of any intra-Qualitative Synthesis take place in Form-Creators' FDs up to the most amplificational states of the general consummatization (annihilation of slloogrent Focus Dynamics of Macrocosmos's HCCI). At the formation of every new synthetic combination, there are always emerged both its most covallert part (functionally stabilized) and certain impersept Potential of somewhat unstable (towards the formed UU-VVU-conglomerate), so-called «free radicals,» which eglleroliftively tend to stabilize themselves in FD through the most compatible with them informational combinations (subjective Conceptions).

4.0795. Permanent deepening of Synthesis processes and universalization of energy-informational interconnections in Form-Creators' FDs are carried out due to disengagement from the most impersept and cruvursorrt attributes in relation to it, instead of which already synthesized SFUURMM-Forms' e-Configurations concatenationally attract «tetrahedral» or «pyramidal» attributes combinations of some vecsative OO-UUs. In other «karmonational» combinations, those vecsative OO-UUs remain in unstable states of «free radicals.» The higher qualitative diversity (for the given e-Configuration) of every new inclusion is, the more the given SFUURMM-Form's realizational spectrum enlarges and deepens, and therefore both Focus Dynamics and the given Self-Consciousness Form's f-Configuration become more universal.

4.0796. Thereupon, I should remind you that any Self-Consciousness Form's qualitative transformations, which are objectively manifested in the surrounding reality through gaining and demonstration of new properties and abilities, directly depend on its functionality alteration. The latter is determined by informational support's qualitiveness of Focus Dynamics, generated through the given Form. It means that realizational functions to which you direct your Focus Dynamics (i.e. stable Interests that structure your FD) define development Direction of NUU-VVU-Forms (more and more corresponding to that Interests) of your subterraneous amitsiration. *Remember that psycho-mental and physical/physiological properties of any Self-Consciousness Form are always determined by the function which is put in its f-Configuration through its Focus Dynamics' informational content.*

4.0797. So, we have found out that in every from the following dimensional, resopasons structuring more ampliative Focus Dynamics' exuberation diapason, any Synthesis Scheme's Form-Creators interact not with the whole (stabilized by definite attributes) UU-conglomerates of already synthesized «karmonations» («hexahedral,» «icosahedral,» «dodecahedral,» and so on), but only with «free radicals» structuring them (because the possibility for resonationness with less Information volumes is always higher), which they resonationally engage in already synthesized by them SFUURMM-Forms' e-Configurations, concatenationally accumulating in own FD favorable conditions for more active creative interaction with some OO-UU-Entities' Form-Creators. The more universal FD is, the more effective (faster, easier) the process of inter-Qualitative Synthesis is. That lets new SFUURMM-Forms to be more fully reflected in the given Self-Consciousness Form's FD.

4.0798. We never use or reiterate someone else's — ready-made — Conceptions, but consistently «disassembling» them into integral particles («tetrahedral-pyramidal» «karmonations»), first, we select from gained by us (through Perception system) informational material only what at least partially resonates on our own Conceptions, then, mix, and exclude all the «unnecessary,» uninteresting, or incomprehensible stuff to us, which contradicts or does not coincide with our viewpoint. From the rest particles, we — gradually and consistently, with deeper understanding and acceptance of newly created Meaning — seemingly restructure «ours» with «someone else's» and form our own Conceptions anew (first into «octahedral,» then, into «hexahedral» «karmonations»). To the same extent, that creative process can be depicted on the example of bio-Creators' activity engaged in food digestion: First, food dissolves into basic amino acids and only then, already on their basis, everything new is built, which is necessary for our biological organism existence and development.

4.0799. These — already *our* — SFUURMM-Forms can more or less resemble someone else's (initial for us) Conceptions, but they will or can never be precisely its exclusive e-Configuration, as it already belongs to someone else's Focus Dynamics (in opposite case, there happens Form-Creators' f-Configuration annihilation of interacting Self-Consciousnesses Forms' certain FD areas by the given specific attributes set — confluence of the two identical FDs into the one). Therefore, they say, «Many men, many minds.» For example, no one reader of Iissidiology is capable to exactly reproduce any of my Thoughts, no matter how clearly I try to describe them — you will always bring in something your own, somewhat peculiar both to my Conceptions and the Experience already synthesized «personally» by you.

**4.0800.** Such process of subterraneous differentiation of general Meaning of the perceived Information into multiple discrete particles (fragmented Self-Consciousness) is typical of different-Qualitative Form-Creators' FDs of *every* Dominant, which «karmonational» combinations get incessantly synthesized and improved on any dimensional sublevel. In other words, in the process of TEC- or VEC-«unpacking,» Form-Creators of *each* (for example, of the two) Dominant *separately* engage in e-Configuration of the general for them Conception about something only those particles that in subterraneous ODS of the given «person» have been already stabilized to a certain degree (have been transmuted in particular Experience).

**4.0801.** Thereafter, in FD there takes place a preliminary «sketchy» (at the level of «yes,» «no,» «maybe») coordination among separate — newly formed — «octahedral» «karmonations,» which structures a general SFUURMM-Form. Then, extra Information is excluded consistently (as unconvincing, uninteresting, or unacceptable) followed by formation of heterogeneous «octahedral» «karmonations» into one «hexahedral» SFUURMM-Form. At interaction of Form-Creators' FDs of *different* Proto-Forms that process gets considerably more complex, due to the existing differences in bio-Creators functionality peculiar to each of their subjective Perception system.

**4.0802.** For example, interacting with birds, ants, or other creatures, we are able to consciously separate from the whole composition of their typical Conceptions (reactions, feelings, motivations, intentions) only those Information Particles in which combinations realizational tendencies of the two OO-UU-Entities such as ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence (one of them should be invaderental and the other — vecsative) are clearly present (and even better if prevail). Only then, out of the limited composition of these segmental particles we will be able to form in our Imagination (on bioscreen) at least some tenuous analog of generated by them Thought or emotion. The more of such attributes we are able to «unpack» in our FDs, the deeper mutual understanding can develop between them and us (since their Self-Consciousnesses Forms' Form-Creators also obey that principle).

**4.0803.** In the process of very long-term interaction of people with animals in Form-Creators Focus Dynamics of our and their Self-Consciousnesses Forms, there were formed multiple more or less common for us and them diffuzgent Conceptions, which provide in many cases not only partial mutual understanding but also deeper attachments, addictions, and dependency between us and them often resembling a close friendship. Different nations conduct similar «close» relationships with various types of animals; however, they develop most easily between people and dogs, cats, horses, deer, elephants, parrots, dolphins, and also other animals, which Synthesis Schemes by some attributes are more compatible and diffuzgent to each other than between people and representatives of the rest Schemes.

**4.0804.** In every case, the results will be completely different, depending on particularly which Form-Creators of Perception (Self-Consciousness) Levels of every side will actively realize themselves in the process of such two-sides interactions. The closest relationships grow when in human and animal FDs there already actively participate Form-Creators of the 10th ARGLLAAMUNI and INGLIMILISSA karmic Channel (bayks, sfillks, krokks, iffillins, isskullins, inngullins) as well as Form-Creators of the 1st, 2nd, 3rd ORLAAKTOR and AIGLLILLIAA karmic Channels (enniristses,

ourffgollufts, uuffluusts, greysts, allgss, llavollovaloffts). Their interactions exclude almost no any possible egocentric and destructive tendencies while there are powerful rational-creative and also altruistic dynamics.

4.0805. Here, we should keep in mind that we perceive surrounding us World strictly corresponding to the properties and peculiarities of our human birvulyarity type, while representatives of every animal kind observe events happening around them and to them only in respect of specific peculiarities of their own dimension types. Those types simultaneously structure *the same* diapason (but different resopasons!) of our and their Self-Consciousnesses Forms' joint exhibition. All the specific informational differences in Focus Dynamics get originated and realized due to a huge difference in the structure and functionality of our and their Perception systems: We make our «hexahedral» human Conceptions via VVU-Factor, and they do so via other UU-Factors peculiar to every kind.

4.0806. It turns out that in spite of the presence of a huge number of mutual attributes available in the SFUURMM-Forms jointly manipulated by us, the «technology» of the assembling (Synthesis) of «hexahedral» «karmonations» in every separate case can differ a lot from other Proto-Forms' exhibition Mechanism. Even within one Synthesis Scheme's properties, there is countless multitude of subterraneous peculiarities conditioned by bigger or smaller Form-Creators' FDs «deepening» into some specific development Direction's narrow-specific combinations, which by its realizational peculiarities can be either more covallert or impersept in relation to the Synthesis's peculiarities in each of other Directions. This way is where we should search the main Reason of incomprehension or apparent incompatibility (tensoriness) between representatives of different nations, nationalities, ethnic groups, creative collectives, and even members of one family, jointly structuring with their SFUURMM-Forms one whole slloogrent FD of the humankind's Collective Consciousness of every CSR.

4.0807. Multifarious types of «karmonations» can be made of particles of various karmic IISSIDI-Centers' Channels:

- the first type — of 1, 2, 3, 4th DUU-LLIs of ARGLLAAMUNI and INGLIMILISSA (in the forms of depliative thought-feeling Conceptions or simplisparentive Self-Consciousnesses Forms);
- the second type — of 3, 4, 5, 6th DUU-LLIs;
- the third type — of 5, 6, 7, 8th DUU-LLIs;
- the fourth type — of 7, 8, 9, 10th DUU-LLIs;
- the fifth type — of 9, 10, 11, 12th DUU-LLIs;
- the sixth type — of 8, 9th, and 10th DUU-LLIs of the first pair of Centers and 1, 2, 3rd DUU-LLIs of the second pair of Centers (ORLAAKTOR and AIGLLILLIAA);
- the seventh type — of 9, 10th, and 11th DUU-LLIs of the first pair of Centers and 3, 4, 5, 6th DUU-LLIs of the second pair of Centers;

- the eighth type — of 10, 11th, and 12th DUU-LLIs of the first pair of Centers and 5, 6, 7, 8th DUU-LLIs of the second pair;
- the ninth type — of 7, 8, 9, 10th DUU-LLIs of the second pair;
- the tenth type — of 9, 10, 11th and 12-th DUU-LLIs of the second pair of IISSIDI-Centers, and like that.

All types of these «hexahedral» «karmonations,» seemingly «the same» by the structure, but *very different-Qualitative by the inner Meaning*, compose the main informational basis for simultaneous realization of absolutely all options of FD of the humankind's Collective Consciousness within the given exuberation diapason.

**4.0808.** As you can see, there is quite a huge diversity of possible versions of «edges'» informational structure of «tetrahedrons,» «pyramids,» and «octahedrons,» which emerge through Form-Creators' heterogeneous Focus Dynamics all the types of subjective Realities, STCs, and CSRs (meaning, different-birvulyart dimension types!). Consuetally, that brings a strong dissonance in the mutual understanding process not only between people and animals but also between different people, different animals.

**4.0809.** Therefore, as surrounding us Worlds are structured by different types of «hexahedral» «karmonations,» people and animals have still very few resources for establishing between each other of full mutual understanding: For different Synthesis Schemes' representatives there are their own realizational functions typical only of them (oriented on such notions as «moral» and «ethics»), which in a particular way influence the execution of similar functions by other creatures. Hence, viewpoints on the same events differ from each other to a certain degree among all Self-Consciousnesses Forms, up to diametrically opposite.

**4.0810.** Moreover, the higher ampliaticness of a «person's» FD is, the more tolerant, universal, i.e. less subjective his/her conclusions and decisions are on many questions, because, in used by him/her «hexahedral» «karmonations,» there are already enough (for deeper Understanding and analysis of existing cause-effect interconnections) synthesized not only invaderental attributes but also multiple vecsative OO-UU attributes, increasing covarllertness between heterogeneous SFUURMM-Forms. For example, if we analyze one and the same situation from a viewpoint of some ARGLLAAMUNI- and INGLIMILISSA-Iissiidi Levels' Form-Creators, we will not avoid the presence of egoistic tendencies (starting from the most destructive to backing) in our FD.

**4.0811.** However, at the presence in Form-Creators' FDs of at least the lowest AIGLLILLIAA- and ORLAAKTOR-Iissiidi Levels' «hexahedral» combinations, all the picture of a «person's» subjective worldview is transformed into more positive, activating rationality and altruism tendencies in his/her FD. In other words, we can conclude that the ability to «derive» from every different-birvulyart SFUURMM-Form understandable and analyzable Meaning increases in proportion to SFUURMM-Forms ampliaticness growth in FD.

4.0812. Due to so complex («tetrahedral-», «pyramidal-», «octahedral-» «hexahedral-», «icosahedral-», «dodecahedral-» multiple) structure of skrruullerrt system's focal-ethereal interconnections organization in general exhibition diapason of Form-Creators' FDs of multiple Proto-Forms' Self-Consciousnesses, we can perceive something in a completely exceptional, subterraneous way, thus, bringing via our life creativity invaluable contribution to the mutual empiric Experience bank not only of our own CCI but also of CCIs of multiple other birvularity types, which Self-Consciousnesses Forms develop near us and concurrently.

4.0813. Intuitive understanding of universal and unconditional Unity with people and the surrounding World (animal, plant, and mineral) is based on multiple SFUURMM-Forms, which are jointly, though in a different way, synthesized by us and them out of the same Informational particles. In the general slloogrent FD of countless CCIs that process produces an endless variety of different-Qualitative opportunities for combination and intercrossing of completely differently motivated — ours and theirs — Interests, through which diffuzgent dynamics of diverse Perception systems is realized.

4.0814. Thus, Form-Creators' Focus Dynamics of even the most primitive f-Configurations of the «lowest» exhibition resopasons, structured by the countless (in their organizational structure) hyper-elementary «tetrahedral-pyramidal» ethereal combinations, are not less valuable and necessary for slloogrent Energy-Plasma's dynamic functionality than the Creativity of Form-Creators of the most amplifical Form-structures of Macrocosmos. In reality, such subdivision into the «lowest» and the «highest» is absolutely conditional and farfetched by us (though extremely necessary for the implementation in our Self-Consciousness of subjective analysis and comparison process).

4.0815. Such necessary division into «simple» and «complex» items represents regular consequences and inevitable costs of Perception system's narrow-specific limited functionality of our «current» mixtum NUU-VVU-Form-Types' analogs, which bio-Creators are capable to allocate from the surrounding reality's FD only some, peculiar to them, fragments of separate informational combinations' types. With the help of available at their disposal possibilities (availability of active neural interconnections, hormonal perturbations, functionality of various brain centers, organs, and systems, and so on), bio-Creators combine out of them their own, still quite very fragmented and very subjective, Conceptions. The latter, being manifested in our subterraneous s-Realities, do not correspond absolutely with what is in much more complex way in parallel exhibited in birvularity types which conditions correspond to more ampliative options of considered by us Proto-Forms' Focus Dynamics.

4.0816. All «free radicals» we use to supplement more synthesized components of our SFUURMM-Forms and UU-VVU-conglomerates are simultaneously «projected» into an endless multitude of more covallert and multicomplex e-Configurations, which other Self-Consciousnesses Forms' Form-Creators use to structure and to organize other — both nonhuman and human — types of their surrounding reality (STC and CSR). Everything we find ugly and imperfect «here», in other, more favorable (not for us, but for them), exhibition conditions is resonationally structured by rather numerous more covallert focal-ethereal interconnections and gains more completed and harmonious appearance with peculiar to it awareness and «logic» and «feeling» degree.

# SECTION XV

## *The nature of Universal Cosmic Entity*

### **Chapter 1. Basic understanding of diverse Interpretations of an infinite variety of different-Qualitative Universal Entities**

4.0817. In various interpretations we have already discussed the question about the Nature of our Universal Entity, but as the notion of Universal Entity itself is highly subjective and undetermined, I suppose that subject should be examined once again. We are accustomed to that the Universe stands for all the existing material world, including metagalaxy studied with the help of astronomic tools. We are accustomed to consider all these countless, visually perceived by us, myriads of stars and galactic clusters to be «our Universe,» and exactly there we spend the shortest Existence moment which we determine «our Life.»

4.0818. Probably, many of you have already understood that similar Conception is an absolute mistake, Illusion, conditioned, first of all, on the functionality specific of our typical mixtum Perception systems. In reality, it will be extremely primitive and naïve to think so, because such Conceptions are initially formed under the influence of extreme limitedness of our «present» realizational possibilities, our ignorance in deep Understanding of the surrounding reality's Nature, including absolute misunderstanding of what is happening both around and «inside» us.

4.0819. If we relate Universal Entity Creativity to those extremely limited possibilities which we presently possess, we, undoubtedly, will not be able to move ahead with our «poor» Conceptions. Then, there arises the question, «Why is our Universe more perfect than we? Is it so only because Its Self-Consciousness Form is more global and massive than our Forms?» Of course it is extremely silly and illogically to think so and to imagine surrounding us World in such a way! Therefore, let us try to study this very important for our further development question more thoroughly, with the

help of more objective and constructive Knowledge about Universe, received by me in alternate Self-Consciousness states (profound Meditations on the Essence of the considered here subject).

4.0820. First of all, it is necessary to remind that we cannot talk about any Universal Entity «version» as about Something existing absolutely Self-sufficiently and «singularly» in a certain space-time Continuum, because any of Its countless exuberation Forms stays in super-dynamic, different-Qualitative, unceasing, *simultaneous* rotationness, diffuzgentness, slloogrentness, multipolarizationness, and duvuyllerrtness states.

4.0821. Any result (Effect) of Universal Entity's FD always represents a certain interstitial attribute of multiple other Universal Entities simultaneous realization, Which Conceptions about «Themselves» and «surrounding reality» more or less differ from what is peculiar to the given Universal Entity's FD. Therefore, the Causes of that Effect are not in Itself, but in the objective environment with which It has to subjectively interact. For us in the given case, it is simply impossible to figure out what is «the product of Its own Creativity,» and what is initiated by essential Interests of many other Universal Entities.

4.0822. First, we cannot even absolutely conjecturally presuppose where FDs of Form-Creators of our Universe «end» and where zillion other, duvuyllerrt-diffuzgent in relation to It, Universal Entities' Interests «start» to be realized. Second, we can form any our subjective Conception only with the help of informational combinations peculiar to our Focus Dynamics «current» exuberation diapason. All the rest, simultaneously Existing «around us» in other dimensional parameters, as if do not exist at all for our subjective Perception's Form-Creators.

4.0823. Therefore, every certain moment we are able to perceive only that part of our Universal Entity which resonationally corresponds to FD qualitiveness of Form-Creators of our own interstitial Self-Consciousness Form: If Focus Dynamics of our «person» is manifested from 2.5 to 3.5 dimensional diapasons, that will be one part of Universal f-Configuration; if «personal» realization is carried out within 2.75 to 3.75 dimensions, it will be another part of One and the Same Universal Entity; if FD corresponds to 3.0–4.0 dimensional diapason's conditions, it will reflect only the properties peculiar to the given part of Universal Entity f-Configuration.

4.0824. So, where is the «border» of our Universal Entity? The answer is simple — it cannot exist in principle! The same way, there is no definite difference amidst *duvuyllerrt* «personalized» Interpretations of our Stereo-Form out of all their endless multitude. We can regard any of them only from the subjective definition position of our own Focus Dynamics' qualitative properties and realizational abilities. «Now,» when we are capable to consider the Universe in terms of the presence of 3–4-dimensional Space-Time parameters in our FD, all Its «current» properties seem to us incomprehensible and endless. However, should we start considering «the same» parts of surrounding reality from the viewpoint of *our* dimidiomittense or translucense NUU-VVU-Forms' Form-Creators, all their «current» incomprehensibility and endlessness come down to very limited exuberation spectrum, beyond which for our «future» Perception system there open up much more grandiose and deep properties of *the same* Universal Entity.

4.0825. In the same time, subjective «borders» of incomprehensibility and endlessness of the s-Reality surrounding our more universal Self-Consciousnesses Forms also restore instantly. In order to «approach» and to analyze them more thoroughly, we will have to refocus into LLUU-VVU more ampliative f-Configurations, which do simultaneously structure a more qualitative part of the Universe. This goes eternally and endlessly across the whole variety of our rotational Cycles! While increasing qualitiveness of our FD, we get transformed into more prosperative (favorable for the harmonization of our Self-Consciousness) conditions of our eternal Existence, becoming indeed again a part of the consecutive f-Configuration of our Universe.

4.0826. Here, you should not forget that all those Qualities, which varying activity and options are considered by us now from the viewpoint of attributes of the lluuvvumic birvularity type (for example, HSI, HIA, immunitant Responsibility, and many others), are peculiar also to CCI's representatives of all the rest birvularity types (simultaneously inhabiting different Planetary, Star, and Galactic systems). Their Self-Consciousnesses Forms are always jointly exhibited in parallel with us in one and the same Universal Entity's f-Configuration. All the sum of their and our Conceptions about «ourselves» and the reality around *all of us and them* is reflected in Space-Time through the *subjective* Existence Form that we call the Universe or «life environment.»

4.0827. In order to at least somehow concretize the given Conception up to *logically* perceivable by us present states and forms, I had to *artificially* (deliberately) classify different-Qualitative States of the Uniform Universal Entity, which are structured by the endless multitude of different-birvulyart dimension types, into some *conditional* types of Universes: 3-dimensional, 6-dimensional, 9-dimensional, 12-dimensional, 24-dimensional, 36-dimensional, 48-dimensional, 60-dimensional, and other Universes. Due to that now we can be quite specific in something, correlate one thing with another, analyze, and manipulate these subjective Conceptions every possible way.

4.0828. My subterraneous meditative skills are also limited, and my Focus Dynamics of Self-Consciousness's Form-Creators starts to strongly informationally deform already from 36–38 dimensional simultaneous exhibition diapasons; therefore, I had to limit the «highest» energy-informational parameters of Form-Creators' FDs of the AYFAAR Highest Collegial Cosmic Intelligence in the slloogrent f-Configuration of *our* (by ayyyyaic birvularity type) Universal DDIUYI-Entity particularly with these conditional borders (from 0 to 36th dimensions). Though, let me repeat: Objective infinity, including the Macrocosmos Itself, cannot have any limits, because some of Their types are consuetally and multipolarizationally conversed into other Macrocosmos types, more ampliative by some attributes combinations!

4.0829. The same happened with the diversification of the Universe's slloogrent f-Configuration into all the multitude of simultaneously and conjointly structuring It Universal Form-Types (SSYY-ILFFST, PPAAL-TT-UUYF, LEMMS-GARLLD, RULLS-A-NNILV, and many others). Focal-ethereal resonational interconnections, existing between Each of These Form-Types' FDs (both with the most covallert or duvuyllertr versions and with all versions at once), also do form at the skrruullertr system (on every FD's exhibition Level!) certain interstitial inter-Universal options of subjective CCI-interactions. According to our «current» Conceptions, those interstitial options can be referred quite possibly to as «separate» Universal types (however, it is not possible to «trace» Their «inner»

organization). Together with them I just had to artfivitely bring again (through Plasmic Forces' Diapasons description) all the endless variety of properties and peculiarities of every from those interstitial, limited by dimensional diapasons, DDIIUYI-versions only to that — extremely primitive — list of attributes' combinations, which is typical of Form-Creators' Perception systems of the given exhiberation diapason of the CCI of the lluuvvumic birvulyarity type.

4.0830. Why? I have already answered that question: Since all the rest types and kinds of Our possible Existences *still* remain — in strongly inertial conditions of «present» STCs and CSRs — far beyond the limits of real possibilities of our «personal» self-realization. As our progress and improvement in lluuvvumic Direction goes more actively, our cognitive potential and abilities will be constantly expanding, which means that Iissiidiology Knowledge itself, represented yet in a very primitive form, will be constantly being universalized and manifested in «future» human civilizations' Collective Consciousnesses just through much more perfect Conceptions.

4.0831. So, the main thing that you should clearly come to understand is that everything framed by us into certain terms and notions represents only one of the countless subjective interpretations of structuring it Meaning and therefore is absolutely conditional, i.e. does not corresponds to other exhiberation conditions. *The slloogrent* Content, «locally» represented in every «point» of Macrocosmos's skrruullerrt system through some Self-Consciousness Form's Perception system, as well as *slloogrent* function, subterraneously carried out by means of each of these Forms, cannot start or finish anywhere. Hence, no one Self-Consciousness Form (of CCIs — of Universes — of Macrocosmos) have either beginning or ending (as well as simultaneously and holochronely carried out through them *qualitational-amplificational* Process). Conditionally limiting the sphere of theoretical consideration of presently peculiar to us Interests by PFDs' Levels (by means of the Tertiary, the Secondary, and the Primary Illusions), let us not forget about that important moment of our general and internal Existence in order not to make silly and sad mistakes in our reflections and conclusions.

4.0832. You already know that 12 types of OO-UU-Entities, representing in FDs of Macrocosmos's Form-Creators countless and diverse «*projections*» of 12 *Pure Cosmic Qualities* (LIYY-FFMI-LLI) and formed by Them *Combined Pure Qualities* (EI-YY-UI-YY; Aspects and their all possible combinations: UU-, SFUURMM-, LLAASS-, YYYUULLUYG-, and SSNUUYLL-Forms), permeate and get qualitatively transformed by their Creative interconnections (from 0 to  $\pm 36$  dimension) 12 Interuniversal Plasmic Forces Diapasons (TUU-LLT-TUU), 12 Intergalactic Complex-Plans (SSAA-SS-MM), 12 Cosmic Plan-Levels (SSOULG-SS-ST), and 12 Plan-Overtones of Fields-Consciousnesses (IYY-UUSSM), through Which Collegial and Collective Cosmic Intelligences, the whole Process of eglleroliftive consummatization of Information (Self-development and Self-cognition of absolutely all Form-Creators of the entire Macrocosmos) is being carried out simultaneously and slloogrently.

4.0833. A natural result of that Process can be parallel origination in the given Macrocosmos's area of such universal informational Effects and States, which we subjectively determine as Temporal Cosmic Entities (OO-UUILLI-I-UULL — *functionally provide all Form-Creators' FDs exhiberation*) and Spatial Cosmic Entities (KKVOO-ULTR; *functionally provide all Form-Creators' f-Configurations exhiberation*). They are realized jointly and simultaneously through eglleroliftive tendencies of the

Amplificational Flow's multipolarizational SSNOO-SS-FFL-Vectors and the Qualitational Flow's multipolarizational AEYY-SSMAA-EYSS-Vectors. That whole holochrone-simultaneous Process of gabitual amitsiration of slloogrent Focus Dynamics of all Plasmic Forces Diapasons' Form-Creators is functionally provided by the presence in Macrocosmos's ethereal structures (UPDR) of *Primogenitive Transcendent Component* (PTC) or YYU-II-USSLI-II.

4.0834. What is the PTC? It is a part of the informational primogenitive Information State, which in mercavgnation «moment» actively resonated only on inter-Qualitative «reconstruction» of *certain* inter-skunkktional interconnections among all the endless variety of reconverstive Configurations generated by subterransive peculiarities of this very IPs' combination (eglleroliftive and irrkoglictive Impulse-Potentials). Thus, it got conversed into fundamental *ethereal basis* of Self-Consciousness's informational space of particularly That SSS-Entity Which Focus Dynamics, having dissonationally «disengaged» (from the primogenitive State), provided the whole Process of Form-Creators' FDs holochrone-simultaneous exhiberation of *our* particular Macrocosmos type.

4.0835. This way, during mercavgnation Act there appeared numerous, all possible reactions of subterransive Information on various creative USIP-Initiations' combinations activity. In the result, «inside» the *uniform* primogenitive SSS-State, there were originated multiple realization opportunities for caring out more or less active interactions between already harmonized and «newly formed» (dissonational) «parts» of holochrone mercavgnation Act. Out of the fact of availability of those diverse opportunities, there simultaneously were formed infinite different-Qualitative development Directions, which having jointly performed, provided the most effective transition version from the primogenitive State (somewhat harmonized by inter-skunkktional interconnections) into the *absolutely universal, ideal in terms of manifestations of all USIP-peculiarities*, confective State.

4.0836. Yet, before it became possible, «inside» all the Information there had been formed the seemingly «double» (profectively — *multipolarizational*) amitsissimal State (primogenitive + consummative States), which origination had served the main (but not the single!) Reason for the emergence (ethereal restructure) «inside» Information of absolutely all types of different-Qualitative Macrocosmos's duvuyllerrt groups. Its subterransive Primogenitive Transcendent Component contains Ethereal basis for appearance of our Macrocosmos's type, Which individually distinguishes It from all the rest interstitial Macrocosmos's kinds (every Macrocosmos has its own subterransive PTC).

4.0837. Thus, specifically manifesting Itself after IP-Initiation, a PTC appears to be the single *informational* Source in every «part» of slloogrent FD of Macrocosmos's HCCI for the origination in Universal Plasmic-Differentiated Radiation of all the multiple narrow-specific Focus Dynamics. In other words, a PTC represents the converging «Point» that *strategically* unifies all the subjective «parts» of Focus Dynamics of our Macrocosmos's HCCI with Its universal «future» confective State.

4.0838. In each of more subterransive manifestation options, a PTC as if potentially reflects in FDs of every Self-Consciousness Form's Form-Creators all the infinity of those realizational states through which it would be able to realize Itself subterransively in the same «moment» if it had fixated on qualitatively other choice. Influence of Creators-confectons, which are latently «present»

in every focal-ethereal interconnection, initiates in every Self-Consciousness Form's FD that intuitive choice, which in the given conditions (NNAASSMM and VLOOOMOOT) provides the most favorable development Direction. Thus, in the skrruullerrt system, out of similar by the specific preferential treatment attributes of heterogeneous Form-Creators' Focus Dynamics there are consuetally combined, all possible — more and more complex-covallert — birvulyarities' types.

4.0839. PTC appears to be the «Universal Conscience» State, potential amplificationness, constantly manifested «inside» every UPDR's «part» and *irresistibly encouraging* (very often also *forcing*) any Self-Consciousness Form to search more and more ampliative options of their decisions, even against its multiple depliative Interests. Being all-encompassing and all-absorbing, That ethereal «Substance» *spatiumally* appears to «spiritualize» and to penetrate via peculiar to It Particles (for, example, via all the multiple Idiopathic, Transcendent, and Immanent *Universal* Ingredients) absolutely all the Levels of simultaneous UPDR's manifestation, which interconnections form all manifestation Rezomirals, and through them — the whole slloogrent Form-Creators' Focus Dynamics of Macrocosmos's Highest Collegial Cosmic Intelligence.

4.0840. As has been mentioned repeatedly, the whole realizational basis for Focus Dynamics of Macrocosmos's HCCI is composed by Collective Cosmic Intelligences of 12 OO-UU-Entities' Form-Creators, being holochronely and simultaneously realized both in amplificational-eglleroliftive and in qualitational-irrkoglictive Qualitative Vectors of the general Energy-Plasma exhiberation. Either of these mutually complementing each other Vectors (Amplificational and Qualitational) is «internally» structured by *twelve* basic Branches (Directions) of more specific Form-Creators' Focus Dynamics organization of different OO-UUs. All these Branches have been already specified in the second volume of «Iissiidiology Fundamentals.» Therefore, there is not point to repeat it here. The only thing that represents deep Interest for us is the SYNTHETIC (Amplificational) and the RESOSCONTIONAL (Qualitational) Branches, which typical properties and peculiarities of focal-ethereal interconnections provided the principal Qualitative basis for all the processes of our Macrocosmos type formation — *synthetic* type (after the name of the SYNTHETIC Amplificational Branch's Form-Creators).

4.0841. If we compare Principle of interaction of these Branches with Each other to already familiar to you inter-Qualitative Synthesis Schemes, it can be conditionally correlated in the Imagination with the formation Mechanism of more active interaction among invaderental PCQs' Form-Creators organized on the background of less active (in the given Scheme!) vecsative (seemingly «compulsory,» «forced») interconnections among invaderental PCQs' Form-Creators, which FDs represent all the rest OO-UUs. However, similar comparison helps you to imagine better only conditional Scheme of interconnections formation between different Branches, while the Principle Itself remains completely different, as all the 12 Amplificational Vector's Branches are represented in the general exhiberation Mechanism by Form-Creators (dissonational part of the consummative Information State) and 12 Qualitational Vector's Branches — by Info-Creators (resonational particles of the *same* Informational primogenitive State).

4.0842. In our synthetic Macrocosmos type, Form-Creators and Info-Creators of absolutely all 24 Branches of the both development Vectors are presented. Nevertheless, the determining role in interconnections formation Process, peculiar to slloogrent f-Configuration of *exactly our*

Macrocosmos type, belongs to SYNTHETIC Branch's Form-Creators and RESOSCANTIONAL Branch's Info-Creators. All possible *joint* interconnections of that invaderental Pair with each of the rest Branches compose that «inner» diversity of heterogeneous Forms and initiating them Principles, which do structure Its whole skrruullerrt system.

4.0843. Moreover, the interaction of the given Pair with some Branches is carried out more (or less) harmoniously and effectively than with the others. That creates different opportunities for the formation «inside» sllougrentness of the skrruullerrt system (in *every* Level of its holochrone exhibition) of infinite diverse particles and their, energy-informationally more concentrated gestalts, every of which represents an interstitial version towards properties and peculiarities of the countless multitude of other — both synthetic and propriusal — Macrocosmos types.

4.0844. The presence of those multiple intermediate (differently synthesized or formed according to other — *non-synthetic* — Principles) particles and gestalts, which appear to «wedge» on different Levels in general functionality of the «spheroidal» skrruullerrt system, does not let us to determine more or less clearly in every exhibition «point» at least some conditional «borders» between realizational Forms, which «belong» to f-Configuration of our Macrocosmos type, and those which structure sllougrentness of other Macrocosmos types.

4.0845. Previously, I have already explained that «spheroidal integrity» attribute of each Macrocosmos type is determined not by its «particular place» within the endless spectrum of Space-Time, *general for all types*, but by active focal-ethereal interconnections between different-Qualitative Form-Creators' specifics, which form in sllougrentness of Space-Time the combined (i.e. stable) — for the given Macrocosmos — Forms of cause-effect interactions. Any «outward penetration» (of other Macrocosmos «parts») exhibits much less stability in the skrruullerrt system: Each of them either is first activated by effects and phenomena uncharacteristic for the given type or suddenly fades out being instantly activated on the «border» with Macrocosmos of another type.

4.0846. These interstitial «multidirectional traversal points» of compatible characteristics of both Vectors by some Branches are present in every Space-Time resopason. Connecting between each other by energy-informational parameters into a certain spectrum, they model in the general Macrocosmos's f-Configurations certain, narrow-specific by their Form, additional «components,» functionally representing so-called «*deformed splits*» — *souplents*, which differ from already known sklaargms and skloongms of our Macrocosmos by their ability to connect narrow-specifically interstitial «areas» of Its skrruullerrt system with the same interstitial «areas» of f-Configurations of some other Macrocosmos types. Unfortunately, it is not possible to find out anything more about that phenomena.

## Chapter 2. Twenty four conditional Branches of multipolarizational development of CCI's of Amplificational and Qualitational Vectors

4.0847. For deeper understanding of the following chapters, it is necessary to remember some very important things. Earlier (in the second volume of «Issiidiology Fundamentals»), we have already tried to figure out quite thoroughly *What* Branches of every Vector (Amplificational and Qualitational) represent *exactly*, and in what way each of Them basically differs from the Rest Branches of its Vector. Now, it is very important to understand why and for what in SSS-Entity's Self-Consciousness, simultaneously reflected through slloogrent Focus Dynamics of any Macrocosmos's Form-Types (both synthetic and propriusal), all Those conditional Vectors and Branches were formed. What are Their Meaning and Their functions?

4.0848. Answers to all these questions are very ambiguous and actually not available for our Perception, as we have a possibility to perceive subjectively, to estimate qualitatively, and also to analyze subterraneously at least some attributes of qualitateness and functionality of any energy-informational combinations and Form-structures only from the positions of narrow-specific peculiarities of SFUURMM-Forms typical of our own Synthesis Scheme. Though, these questions are quite complex; nevertheless, it is necessary to at least try to answer them. We cannot do it without studying the deepest characteristics of amitsissimal — i.e. «double,» functionally undetermined — Information State, which, in its turn, is holochronely realized through its two Components — primogenitive and consummative States.

4.0849. In the Moment of USIP-Initiation (Creative Activity of United Superuniversal Impulse Potential) there were formed an infinite number of subterraneous Impulse-Potentials, Which functionality can be brought to two interdependent positions (tendencies):

1. to the reflection in general FD of the Unified SSS-Entity's Universal Self-Consciousness of all the variety of *Its already balanced part* (primogenitive State of Info-Creators of all the emerged Macrocosmoses);
2. to the reflection of the whole multiplicity of attributes of Its another — *dissonational part* in relation to the balanced one (i.e. of the consummative State of Form-Creators of all formed thereat Macrocosmos). Concurrently with the balanced part, the dissonational part was originated «inside» of the Unified SSS-Entity due to the holochrone mercavgnation Act, having turned into realizational Effects that we very limitedly interpret as dissipative and decoherent «Energy,», subjective Space, Time, Macrocosmos, and suchlike.

4.0850. All the multitude of these IPs' various functions, simultaneously transgressed from USIP, can be conditionally considered to be functions of all possible different-Qualitative Analogs of the irrkoglictive and eglteroliftive Impulse-Potentials, which joint realization is the main Reason for organization of all focal-ethereal interconnections in our Macrocosmos type. It means that all the functional irrkoglictive Impulse-Potential's Analogs are realized in relation to Each Other holochronely and simultaneously. They reflect in Every type of the formed through Them Macrocosmos the *liyllusceve* part of the Unified SSS-Entity's Universal Self-Consciousness (Qualitational Vector),

inter-skunkktional interconnections of which have already been so harmonized that they are not exposed to any Qualitative perturbations.

4.0851. At the same «time» all eglleroliftive IP functional Analogs form and provide (through different types of formed by them Macrocosmos) the general reorganization and absolute harmonization Process of those inter-skunkktional reconverstive interconnections which presence (after mercavgnation Act) does not let primogenitive Information State to consuyetally transform into confective USIP-State. Thereat the Information in principle annihilates, turning into a certain *non*-informational inner communicative Experience, which forms the Main USIP Property. All reorganizing functions of that dissonational part, holochronely-simultaneously realizing through all Macrocosmos types Form-Creators FD, are determined by us as Amplificational development Vector, which is entirely structured not by reconverstive Configurations, but by all the multitude of their dissonational projections ethereal Configurations (i. e. that part of all inter-skunkktional interconnections which at least in the smallest degree does not correspond to the absolute confectization conditions).

4.0852. To help you subjectively imagine that, we can compare it with your actions in Photoshop, which is meant for digital photo processing. First, you make several duplicates of the original, and then you already do not deal with the original itself in any way — you only use it as a basis in all possible ways reconstructing each of the copies corresponding to your ideas, preferences and intentions. Here the «original» represents what already exists, and it — a person, nature, storyline — cannot be changed, even if you do not like something. At the same time any of its liberally reworked copies in every case will represent your subterransive vision of what already really exists by itself (not depending on your subjective relation to it), i. e. all the multitude of your all possible different-Qualitative Interpretations (which in the given case represent a «part» of the balanced primogenitive State).

4.0853. Earlier has been already noted that «compositions» of the most compatible between each other Impulse-Potentials might be both one-component (their realization principle is not clear), two-component (like in the case of our Macrocosmos type — irrkoglective and eglleroliftive), and many-component (up to countless multipolarizationally interacting IP). Herefrom — all the endless variety of Form-Creators and Info-Creators, formed and specifically interacting between each other in every possible specific mercavgnational Initiation sub-version of slloogrent Information some conditional «area» (which leads to certain Macrocosmos type exhiberation). Functionally They all (F-C and I-C) qualitatively differ from Each Other, forming 24 basic Branches («types,» «kinds,» «ways») of Its distortive (in different degree «deformed,» «refracted,» i. e. inharmonious in its Essence) manifestation «inside» both Information realization Vectors. Some of These Branches assign, to F-C and I-C, amplificational tendencies of Creative Activity, some — qualitational, and some are pluralistic (depending on exhiberation conditions, one tendencies manifest after others).

4.0854. The term «Macrocosmos,» in its Essence, means I-Cs' and F-Cs' joint coexistence Form. As it has been already explained, there is an endless multitude of such distortive Forms consuyetally initiated for primogenitive State transformation into confective One, «inside» the Information Itself. Therefore, there is also an endless multitude of the most diverse simultaneous creative interactions

versions between F-Cs and I-Cs, between F-Cs and F-Cs, between I-Cs and I-Cs. In that imaginary list of all possible Macrocosmos types, all synthetic types would occupy the most modest place. Maximum possible descriptions of some of These Branches characteristics have been already given in the second volume of «Issiidiology Fundamentals,» so we will not comment further that, but will move on to review such basic Universal Illusion Components as the TLAASSMA-A-, SSMIIYSMAA-A- and GOOLGAMAA-A-Ingredients.

### **Chapter 3. Internous interconnections of Idiopathic TLAASSMA-A-Ingredient of DDIIUYI-Entity with Its SSMIIYSMAA-A- and GOOLGAMAA-A-Ingredients**

4.0855. Let me remind you that so called Ingredients represent in all Form-Creators Focus Dynamics not just their «current» realizational Essence, exposed to any local-spontaneous qualitative fluctuations, but that *strategical-amplificational* functional Meaning, in order to fulfill which in every Form-system of the Worlds there has been multipolarizationally exhibited all the multitude of different-Qualitative Forms, reflecting all possible SSS-Entity Self-Consciousness creative states. Every Ingredient is a specific «Keeper» and active «Carrier» in all possible Space-Time conditions of *ethereal* Information *definite* combinations, which in our type Macrocosmos FD manifest a certain *obligatory* eglleroliftive stage necessary for the most effective qualitative perturbation of primogenitive Information State into confective (through absolute Consummatization). In other words, we can say that all Ingredients represent the single (like a clock) «working» Mechanism of multipolarizational realization of Primogenitive Transcendent Component (PTC) in different-Qualitative Space-Time conditions.

4.0856. PTC in every Macrocosmos type reflects all those «inner» modifications which should be carried out in Information in order for It — through amitsissimal State — to transform from primogenitive State into absolutely universal — confective USIP-State. In every Form-Creators exhibition Levels there can manifest only one type of PTC-Ingredients. In the conditions from 36–38-dimensional to 26–24-dimensional Levels of the Primary Illusion, structuring DDIIUYI-Entity Self-Consciousness, guiding *amplificational* (consummatizational) role for all Form-Creators Focus Dynamics is played by the *Uniform* for all different type CCI and structuring Them Self-Consciousnesses Forms *Idiopathic TLAASSMA-A-Ingredient* (abbreviated — IT-Ingredient).

4.0857. It determines in the given megadiapason of Plasmic Forces conditions absolutely the whole Process of eglleroliftive qualitative reorganization and realizational activity of AYFAAR HCCI Form-Creators multipolarizational FD. As there is nothing to compare Its functions with, we — extremely conditionally! — determine it for ourselves as «Universal Spirit,» that is Something Higher, Which provides eglleroliftive amplification and stimulation of absolutely all possible AYFAAR HCCI FD realizations in the peculiar only to It multipolarization of all possible development Directions.

4.0858. However since the less ampliative DDIIUYI-Entity IT-Ingredient Creative Activity is not limited by the mentioned exhibition megadiapason (from 38th to 24th dimension), in *more*

*dissonational* conditions of Its multipolarizational manifestation (from 26–24 to 14–12 dimension) It consistently transgress all possible combinations of peculiar to It ethereal Configurations (of YYYUULLUYG- and SSNUUYLL-Forms) into more adopted for that mode LLAASS-Forms, structuring countless multitude of *Transcendent Ingredients* — SSMIIYSMAA-A (abbreviated — TC-Ingredients).

4.0859. Each of Them provides functionality of the Secondary Universal Illusion different-birvulyart Form-Creators Focus Dynamics. Now let us remember also the information from the third volume of «Issiidiology Fundamentals» saying that every the Secondary Illusion SSMIIYSMAA-A-Ingredient, in its turn, transgress the universal meaning of peculiar to it ethereal interconnections into SFUURMM-Forms of the Tertiary Universal Illusion infinite *Immanent GOOLGAMAA-A-Ingredients* (abbreviated — IG-Ingredients).

4.0860. So, the whole slloogrentness of AYFAAR HCCI Focus Dynamics is informationally provided by the presence in it of all possible «projections» versions of the general Primogenitive Transcendent Component — IT-Ingredient, qualitatively differentiated and diversified in various Space-Time exiberation conditions into the endless multitude of its more depliative Analogs — TS-Ingredients (SSMIIYSMAA-A) and IG-Ingredients (GOOLGAMAA-A). In its turn, every IG-Ingredient — by the degree of FD simplification — is structured by the endless multitude of *Modi* (for example, LIIRTUULLAA-A — 2–3-dimension, GAMALGORRAA-A — 3–4-dimension, SSIYULLSMAA-A — 4–5-dimension), *Signums* (for example, in 3–4 dimension — Stars, Planets, animals, plants, minerals, fermions, bosons), *Sources* (for example, Human and humanoids CCI), *Articles* (for example, all «personalized» Interpretations of one Stereo-Form) and *Parvulas* (personified existential Principles).

4.0861. All that endless variety of different-Qualitative informational aggregations, being svilgs-spherationally interconnected through different Interaction levels between Form-Creators and Info-Creators, together represents a single conglomerate of ethereal PTC Information, holochronely realized in Universal DDIIUYYI-Entity f-Configuration through AYFAAR HCCI slloogrent Focus Dynamics. Here we should emphasize that TLAASSMAA-A Content harmoniously and creatively structures and unifies CCI Focus Dynamics of all the endless multitude of Universal DDIIUYYI-Entities subterrassive Interpretations, jointly exiberated in the given dimension super diapason (from 0 to 36th).

4.0862. In order to deeply comprehend TLAASSMAA-A-Ingredient functional organizing meaning in all AYFAAR HCCI multiplex Self-Cognition Processes, you should understand that all energy-informational interconnections between all OO-UU-Entities Form-Creators (in the form of Focus Dynamics between the consequences of Their creative interactions between Each other — TOO-UU- and SVOO-UU-Entities) is carried out in the available for It (for AYFAAR) Energy-Plasma Levels due to the presence in Space-Time of Integral «Body» universal structure, jointly formed by Interuniversal Info- and Form-Creators (uuyuum and flaaggtuons) in the form of slloogrent f-Configuration, unifying all focal-ethereal interconnections which are simultaneously realized between all subterrassive DDIIUYYI-Interpretations.

4.0863. Specific «auxiliary mechanisms» in IT-Ingredient organization of that Process serve «Higher» (for the given creativity Levels!) OO-UU-Aspects (FFLOURRRGG), the Primary Matrixes of

all OO-UU-Entities (SSU-UU-SSUUY-SSS) and the countless multitude of subterransive Etalon OO-UU-Manifestations (STOOVV-UU-TTUU), which are formed in Form-Creators Focus Dynamics in the result of the most complex Transmutational transformations and creative interpenetration between Higher OO-UU-Aspects Content. Moreover these inter-Qualitative interconnections in parallel are carried out between Form-Creators of every OO-UU-Entity and Form-Creators of all the rest OO-UU.

4.0864. FFLOURRGG fulfil a function of certain Universal Meaning Examples (something like informational fairways, strategic indicators), and Form-Creators Focus Dynamics of all the given superdiapason Levels should always potentially orient in their multipolarizational Creativity on their e-Configurations in order to be able to «merge» in the particular «Moment» into one via all the informational Essence of peculiar to them FD. Every FFLOURRGG represents functional qualitative state «eternal and unalterable» Etalon of the given 36-dimensional (i. e. 36-Qualitative — 24 CCQ + 12 PCQ) Universal Entity, without which presence Its Form-Creators transformation into 48-dimensional f-Configuration in HCCI AYFAAR Focus Dynamics would be simply impossible. the Primary Matrixes and subterransive Etalon OO-UU-Manifestations are typical only of the Highest «Sector part» of TLAASSMA-A Universal structure, representing such amplificational Information ampliative set which by the Content could be conditionally determined as «Higher Meaning of AYFAAR HCCI Existence.»

4.0865. Higher «organizational» TLAASSMA-A Principles (LLOYYGLLI-I, structured by FFLOURRGG, SSU-UU-SSUUY-SSS and STOOVV-UU-TTUU), which realize through the Primary Energy-Plasma karmonations, represent that ethereal bases, which is necessary for the formation of absolutely all the Primary-Ideas of Uniform Universal objective Reality Form-systems of the Worlds, narrow specifically exhiberated in the given part of Macrocosmos skrruullerrt system. Holochronely «including» both irrkoglictive and eglleroliftive IP, they determine all qualitative parameters of Higher Creative Potential, characterizing the Content of *each* of Universal SSFU-UNGSS-shifts, simultaneously carried out in AYFAAR HCCI general Focus Dynamics, and also serve a specific «Purity Etalon» («Ideal Standard of primogenitive State ethereal interconnections») for Form-Creators of each of the twelve OO-UU-Entities, manifested in the given superdiapason.

4.0866. I do not know how to explain to you that in more comprehensible and understandable way. We can say so: LLOYYGLLI-I determine all the multipolarizational Meaning of every rotationally ye Displacement of AYFAAR HCCI Focus Dynamics. In other words, everything that causally does not interact with Its slloogrent f-Configuration and, in fact, is not included in Its functions, is not able to informationally (at least somehow) reflect through LLOYYGLLI-I, meaning also through Its FD. If we consider LLOYYGLLI-I functional role within exhiberation conditions of all the multitude of the Tertiary Illusion 3–4-dimensional diapason Focus Dynamics, we can say that Their creative correlation activity degree in TLAASSMA-A functional structures strictly corresponds to the intensity of Synthesis Processes, simultaneously carried in all the multitude of Galactic and Intergalactic (Universal) Cosmic Entities Focus Dynamics, Which structure DDIIUYI-Configuration. They represent That Experience qualitative quintessence of our Universal Entity multiple subterransive Interpretations The Highest Intelligences, without Which the development of Its Self-Consciousness Higher Form-Creators — NAA-GLLI-UU (*the Secondary Illusion Galactic Creators*) and SSUI-SS-SFAA (*the Primary Illusion Universal Creators*) would be impossible.

4.0867. Do not be misled by the circumstance that in extremely simplified and schematic «Universe's Classification Structure» (Sectors, Sub-Sectors, Flows, Rays and Channels) TLAASSMA-A-Ingredients functions do not play the central role, since They informationally provide only the creative realization of Channels Form-structures (SSVA-SS-UU) — the main Sources of multipolarizational Transmutation of the Tertiary Universal Illusion SFUURMM-Forms and the Secondary Universal Illusion LLAASS-Forms. The truth is that absolutely all Channels, as well as Rays (UU-ISSM-UU), Flows (SSMUU-SS-SSAA) and Sub-Sectors (LLIING-LLI) are only «applied,» creative manifestation sphere of the whole hyperdynamic organization of those multilevel functional systems which Existence is provided by countless number of TLAASSMA-A versions. Everything is arranged in a way that Each SSIIYSMAA-A and GOOLGAMAA-A, structuring IT-Ingredient of Every Highest Collegial Intelligences, carry out only «the roughest» part of Its realizational Creativity, while due to TLAASSMA-A functioning, Its Highest Focus Creative Attention is totally concentrated in Universal Creation Processes, simultaneously organized in Every from the twelve Sectors (NNIILG-NNI).

4.0868. TLAASSMA-A universal structure brings to the level of the basic informational Source for AYFAAR Focus Dynamics, Which adaptive (by every exuberation Level) accumulates the whole AYFAAR HCCI Eterne Experience and Knowledge about «Itself» and formed by It subjective Reality. Realization of that Experience and Knowledge became possible due to Prime-Plasma universal properties, which actively express in AYFAAR Focus Dynamics through IT-Ingredient (FFLOURRGG) Higher Aspects, which enclose «in Itself» (through Their SSIIYSMAA-A and GOOLGAMAA-A specific properties) all the ethereal part of the Secondary and the Tertiary Illusion Form-Creators synthesizing forming Processes.

4.0869. It would be a huge mistake to suppose that IT-Ingredient is typical only of AYFAAR Form-Creators Focus Dynamics and not of — in a different degree depliative towards it — Form-Creators Focus Dynamics of all the rest DDIIUYI-Entity slloogrent f-Configuration Levels. It is not so at all! In all different-Qualitative exuberation Levels of Universal Creation HCCI, all TLAASSMA-A Life- and Forming Principles are of equal worth, they only manifest differently, without any «logic» fixation to any given PFD Levels and without consideration of their priority in the realization of the general FD (i. e. not only Galactic and Star CCI, but also Planetary and intra-Planetary CCI and Self-Consciousnesses Forms are *equally* important for subjective AYFAAR HCCI Self-perception and Existence). Its amplificational-egllero-liftive role and general synthesizing function for self-originate Creativity of absolutely all Energy-Plasma Levels Form-Creators always remains main and all-determinative, irrespective through Form-Creators FD of which Collective Cosmic Intelligence it is carried out.

4.0870. At all universal significance of AYFAAR HCCI Form-Creators, only Idiopathic TLAASSMA-A-Ingredient, informationally connecting FD of each of Them with Primogenitive Transcendent Component, determines Main strategic Goals and functional Tasks of Their joint Creative Self-realization on the Way of multipolarizational Cosmic Self-Cognition through holochrone-simultaneous realization in the countless multitude of different-Qualitative Universal Creations — all possible DDIIUYI-Entity subterransive Interpretations.

4.0871. In order to achieve the most effectiveness of creatively diverse Form-Creators realization (through all Universal Interpretations f-Configurations), TLAASSMA-A «generates» from Itself a countless multitude of own heterogeneous Duplicates (SSUUYSSMAA-A), representing «ideal weapon» in the Primary Energy-Plasma conditions of FFLOURRGG unalterable ethereal parameters («Higher» OO-UU-Aspects), out of which every TLAASSMA-A is formed. Each of these Duplicates meaning filling is used by seemingly «one and the same» AYFAAR HCCI Form-Creators exclusively in Their own way, according to these «specific» Interests, which were subterraneously formed in each «point» of Their joint exuberation, creating in outside observer Perception system the effect of consistent formation of Space-Time and definite type of subjective Illusion.

4.0872. The presence of all the multiple diverse modifications (simultaneous kleksing), which affect in FD each of these Duplicates, inevitably forms an impression that all Universal subterraneous Interpretations are provided by multiple most diverse TLAASSMA-A. In fact, They all are the result of holochrone qualitative transformation of all SSUUYSSMAA-A of *one* IT-Ingredient.

4.0873. As a matter of fact, these countless Duplicates «projections» are What serves an informational bases for the formation in the whole Universal Plasmic-Differentiated Radiation Self-spread Dynamics of all the infinite SSMIYSSMAA-A variety — of all possible versions of TLAASSMA-A functions holochrone realization, qualitatively altered by Form-Creators in every particular case of Their creative realization (simultaneously in all exuberation Levels). Schematically you can imagine every SSUUYSSMAA-A-Duplicate in the form of a mirror, into which you peer very attentively, in order to check your appearance or change it corresponding to some, constructed according to your «ideal» — in your Notions — image.

4.0874. You can manipulate that mirror in any way at own discretion: put on a table, carry in a pocket or a bag, hang on a wall, it would not in any way influence the qualitative state of what it reflects. All the Duplicates are specific ethereal «projections» of the uniform TLAASSMA-A «mirror,» according to which «reflection» AYFAAR HCCI «modifies» all depliative deformations, and consistently chooses out of all the multitude better and better «image,» thus realizing (gaining, enforcing) Its Notion about the most Qualitative version of «Itself.»

4.0875. To help you at least schematically understand the endless «self-doubling» Principle of all variety of attributes ethereal combinations «inside» Idiopathic TLAASSMA-A-Ingredient (through all the multitude of TS- and IG-Ingredients), imagine an opposite process: ice remelting when exposed to high temperature, first, into water, which differs from ice only by higher molecular motion speed (which determines its specific properties), and then — into steam, which molecules, remaining in their Essence molecules of the same block of ice, have gained higher speed as well as own, different from ice and water, properties. Now imagine that in our example AYFAAR HCCI Focus Dynamics informational Content (YYYUULLUYG-Forms), reflecting through the Primary Universal Illusion, conditionally corresponds to the state of «*steam.*» In that case, LLAASS-Forms, structuring the Secondary Illusion FD, can be compared with «water,» and the Tertiary Illusion SFUURMM-Forms with «ice»...

4.0876. However, like your face structure differs from light wave refraction structure on the substance separation border (i. e. your face geometry on the plane), same way every SSUUYSSMAA-A differs between each other, as well as «reflected» by it FFLOURRG: Each of «Higher» TLAASSMA-A OO-UU-Aspects is absolutely deprived of any «organizational structure»<sup>16</sup>, while each of Its SSUUYSSMAA-A-Duplicates is very closely connected with subterransive ethereal parameters of formed by it SSMIYSMAA-A-Ingredient (meaning, also space-time Form-structures), thus actively involving in the extremely complex system of Intergalactic focal-ethereal interconnections between Them. It is also necessary to note that in the Tertiary Illusion exuberation conditions, SSUUYSSMAA-A-Duplicates of Every SSMIYSMAA-A level-by-level transgress into all the endless multitude of Immanent GOOLGAMAA-A-Ingredients VVUU-SS-UU-UFF-Doubles.

4.0877. Thus it turns out that all the creative interconnections, structuring sllougrent Process, of inter-Qualitative Synthesis in any different-Qualitative Levels of AYFAAR HCCI Focus Dynamics, are amplificationally corrected and qualitational regulated — through SSMIYSMAA-A-Ingredients *Info-Creators* — not directly by «Higher» TLAASSMA-A OO-UU-Aspects, but by Their infinite ethereal «projections» — SSUUYSSMAA-A, which, as a result of all possible realizational manipulation from the side of Form-Creators FD, qualitatively highly differ from each other. In fact, they serve for AYFAAR a specific «Tool» for comparative identification of eglleroliftive Experience, simultaneously synthesized in all different-birvulyart CCI, relative to that absolute State which should eventually consummatize in the given «part» of Macrocosmos sllougrentness.

4.0878. Accumulation of such Experience in the conditions of the Secondary Universal Illusion is provided by SSMIYSMAA-A SSMIYSS-GLLII Info-Creators (Galactic Proto-Analogs; in AIY-YYA-Entity FD They are manifested as GLLAA-GLLII-Creators), and its processing and universalization is carried out in the result of synthetic SSLOO-SS-SNAA-Form-Creators Creative Activity. However, thereat not a single from originating between them focal-ethereal interconnections would be able to realize without an active participation in it of universal ethereal «projections» of TLAASSMA-A-Ingredient, which provides AYFAAR Highest Collegial Cosmic Intelligences SSUI-SS-SFAA-Creators Focus Dynamics interconnection with primogenitive SSS-State.

4.0879. The same regards functions of Every SSMIYSMAA-A-Ingredient: there is no «executive centralization» in the realization of peculiar to Them informational functions only in the certain conditional «borders» of Plasmic Forces Diapason, since primogenitive SSS-State ethereal «projections» are harmoniously «spread» in all the Levels of Macrocosmos Form-Creators FD. Any given TLAASSMA-A and SSMIYSMAA-A informational properties manifestation possibility in any Form Self-Consciousness space fully depends on the realizational peculiarities of its Perception system, i. e. from the activity in it of certain special «mechanisms,» which let these properties this way or another manifest in the given Form Self-Consciousness Form-Creators FD. It turns out that Info-Creators of not only the most ampliative (for the Tertiary Illusion) SFUURMM-Forms, but also LLAASS-, and even YYYUULLUYG-Forms *potentially always* structure our FD, however brain bio-Creators just are not capable to adopt their Meaning to the Meaning of subjective Notions already synthesized in our «current» Self-Consciousness Form subterransive ODS part.

16 In our subjective understanding of it as a certain composition, interaction, hierarchy, interconnections assignment — all that in every case is provided only on the level of subterransive Form-Creators FD

4.0880. Therefore, it seems to us that neither TLAASSMA-A nor SSMIIYSMAA-A cannot have any functional relation (due to functions qualitative inconsistency) towards the Tertiary Illusion SLUI-SLUU-Creators collective Creativity. The role of specific universal «adapters,» who let «directly» and consciously interact with IT- and TC-Ingredients ethereal Content, is played in FD by narrow specific interstitial (between the Tertiary and the Secondary Illusion types conditions) OOL-GLOO-structures (so called Being). If «personality» is developed enough by the peculiar to it birvulyarity type criteria, coordinated Creative Activity of Info-Creators structuring these Ingredients and OOL-GLOO Form-Creators lets corresponding ampliative Notions to subterraneously «be unpacked» in Self-Consciousness informational space filling it with adopted in a corresponding way Meaning.

4.0881. Due to SSMIIYSMAA-A- and GOOLGAMAA-A-Ingredients ethereal interconnections presence, continuously spread in all Universal Entity the structures, Each Universal HCCI TLAASSMA-A, whether that is AYFAAR or other types of The Highest Collegial Cosmic Intelligences (for example, DOYLLIFFS, KLARRSSFFURS, SFOLLAAGSS, RLUYFUUVVS, BANGLAAYMMS, FTAYTRUUMMS, AYFVUULLMMS, LIIGIYS-SS, GIYGIMELL, AMMILLIS, NNUURTGLAAYMM and others), has completely limitless possibilities of holochrone-simultaneous creative Self-Cognition through specific peculiarities and realizational needs of zillion Planetary, Star and other Galactic Form-systems Self-Consciousnesses Forms. According to subterraneously peculiar to them *birvulyart* predispositions to covallert heterogeneous interaction between each other (through Form-Creators FD!), Info-Creators, who provide all SSMIIYSMAA-A-Ingredients inter-skunkktional interconnections «inside» AYFAAR 36-Qualitative HCCI TLAASSMA-A, are «creatively joined» into a certain, mutual for Them, ethereal aggregation — SSTUU-KST-MA-A, Which can be conditionally called «Concentration» of all Its subjective Experience (i. e. of all Its Notions about «Itself» and surrounding It Reality).

4.0882. It should be noted that every type of 36-Qualitative Universal HCCI has Its own SSTUU-KST-MA-A-Analog, for Creative Activity of each of which in the corresponding to it qualitative Energy-Plasma Levels there exist the most prosperative realizational conditions, formed by the multiple most compatible (inter-complementary and synergetic with each other) birvulyarity types. «Merging» with each other according to specific *different-birvulyart* attributes (i. e. combining via some particles of peculiar to them universal Meaning), multiple similar ethereal aggregations form TLAASSMA-A-Analog (LOYSSAALGO-O), functioning in Self-Consciousness structure of even more ampliative (than AYFAAR) AULMNIYSS HCCI, organizing with Its FD all Form-structured of 48-Qualitative Universal Entity (IIYYUULLSSMI).

4.0883. Speaking of ethereal interconnections, which provide Form-Creators FD, engaged only in synthetic processes of aiyyaiaic birvulyarity type, we can conditionally distinguish several specific peculiarities, typical only of 36-Qualitative AIY-YA-TOO-UU-Entity Self-Consciousness (certain super developed Cosmic Human Analog). SSTUU-KST-MA-A of That Entity is formed by the unified Experience synthesized by three basic birvulyarity types: lluuvvumic, goolgamaaaic and ssmiysmaaaic. That Collective Experience, structured «inside» by CCI subterraneous Experience of the countless multitude of qualitatively compatible with each other diffuzgent-interstitial birvulyarity types, is determined as MMAAA-A.

4.0884. Purely schematically into universal Construction of that Experience there «projected» interconnections from four SSIIYSMAA-A types ethereal Configurations (in the form of two, liylluscevely combined with each other, «pairs»). In the general AYFAAR HCCI SSTUU-KST-MAA-Structure They form *seemingly* «independent informational AIY-YYA-cell» — SMAA-AA-SMAA, which interconnections in AYFAAR FD specifically reflect absolutely all AIY-YYA-Entity empiric Experience. Such ethereal SMAA-AA-SMAA-Constructions function in DDIUYI-Self-Consciousness only «pairwise,» forming geyliturgent SS-MMA-AA-Mechanisms of slloogrent Focus Dynamics: Information of each SMAA-AA-SMAA is able to reflect in AYFAAR HCCI Focus Dynamics only via preliminary formation in it of own Information Duplicate, perceived by HCCI Form-Creators from the certain «perspective» (i. e. from the position of certain integral Experience, representing also other Cosmic Entities Form-Creators Creativity, simultaneously structuring all DDIUYI-Interpretations).

4.0885. Info-Creators of every subterransive SS-MMA-AA-cell (i. e. two combined pairs of SMAA-AA-SMAA-Constructions) resonationally respond (relative to multiple birvulyarity types) only to the Secondary Universal Illusion Higher Levels Form-Creators FD. For example, relative to AIY-YYA-Entity Creativity, The Reason for Their intensive response to Its Experience is the presence of initial (i. e. *foundational*) invaderentness in ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence OO-UU-Aspects synthesized ethereal interconnections. Relative to other Cosmic TOO-UU-Entities Form-Creators FD into consideration there are taken other invaderental combinations.

4.0886. Thus AIY-YYA-Entity SMAA-AA-SMAA always «resides» in DDIUYI-Self-Consciousness informational space, and its Duplicate (SSUUYSSMAA-A — ethereal «projection») is «projected» in FD, which Content «every time» (at each rotational Shift) differentiates by Meaning, depending on qualitative Activity of realized Notions and the purpose of AYFAAR HCCI «current» Focus Dynamics. Something (some particular part of AIY-YYA-Experience) can be fully used, something is considered in the «current» Choice general Paradigm only partially, and something is left without attention, because it does not agree in some attributes with the Experience simultaneously «projected» into the given Focus Dynamics by other Cosmic Entities structuring the same exhiberation Level.

4.0887. Due to TLAASSMAA-A Universal Mechanism of «All the Experience concentration» (SSTUU-KST-MAA-A), Each of the countless SSIIYSMAA-A-Ingredients is informationally located only in its some particular part (remaining thereat spatiumally interconnected with all the rest parts). Therefore, manifesting in FD, It svilgs-spherationally orients every Self-Consciousness Form and CCI Form-Creators Creativity on the maximal possible for them (*in the given exhiberation conditions!*) Synthesis in its FD of Aspects of only some specific from the 12 OO-UU-Entities (in their inseparable configurational interconnection with each of 24 Combined Qualities!). In that connection «inside» one and the same OO-UU-combinations there form a countless multitude of ethereal interconnections different-birvulyart types.

4.0888. In the conditional range of svilgs-spherational convergent amitsiration of our Self-Consciousnesses Forms Form-Creators, lluvvumic birvulyarity type, concatenationally assimilating in its Synthesis Schemes multiple other attributes combinations versions, peculiar to Each of invaderental Dominants (ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence) in other different-protoformal Schemes, thus consuyetally initiates «inside» itself quite definite eglleroliftive

tendencies for FD svilgs-spherational transformation first into more amplificational goolgamaaaic birvulyarity type, then into ssmiysmaaaic and so on — into more developed Universal aiyyyaic type (by its ethereal Essence — *tlaaassmaaic*). Thus happens simultaneous accumulation and consistent qualitative universalization (development) of particular multipolarizational Existence Experience of multiple SVOO-UU- and TOO-UU-Entities by some primariusive (for Their FD!) attributes, starting from «human» CSR and seemingly «finishing» with all possible AIY-YYA-type Universal s-Realities.

**4.0889.** In order to «become one» with some from all the multiple Channels (SSVA-SS-UU), Each TLAASSMA-A TS-Ingredient finds for itself (among all the multiple other SSMIYSMAA-A) the same, absolutely identical by Meaning, «pair,» having even more strengthened — via covarllert interconnections — already synthesized Aspects of some Quality, so that to gain possibility for their joint Initiation in more developed Self-Consciousnesses Forms (through even deeper Synthesis versions of the same OO-UU-attributes). Although in each of the 12 Channels, Aspects of only one OO-UU-Entity are invaderental, in background regime the presence of other PCQ «projections» remain certain. In the opposite case heterogeneous Synthesis in every Channel just would not be able to be carried out in its all completeness and multi variance.

**4.0890.** Let me emphasize that similar «pairwise» combinations of TS-Ingredient geyliturgent types between Each Other have been carried out in AYFAAR HCCI Focus Dynamics holochronely and multipolarizationaly via all 12 Channels, svilgs-spherationaly synthesizing in Itself (in every diapason) all Aspects of the corresponding OO-UU-Entity till those qualitative States which are typical of maximal parameters of all Channels informational Content in the given FD exhiberation megadiapason. Is there invaderental Synthesis of certain OO-UU-Entities attributes carried out in AYFAAR HCCI FD? Some gabitual Processes, which can be interpreted as a certain degree of invaderentness, are «experienced» in FD, but they are so complicated and specific that it is not possible to note their particularities. It, rather, resembles «protuberance» of certain separate Aspects *types* of every OO-UU-Entity, which has gained in the given exhiberation conditions possibility to most actively interact between each other.

**4.0891.** «The same» is amplificationaly-egllero-liftively carried out «further,» in the given direction of functionality improvement, in all Form-systems Form-Creators FD on their qualitative interactions Level, first between Rays (UU-ISSM-UU), then between Flows (SSMUU-SS-SSAA), Sub-Sectors (LLIING-LLI), and, at last, Sectors (NNIILG-NNI). All qualitative changes of SSMIYSMAA-A-Ingredients in AYFAAR HCCI Focus Dynamics general slloogrentness «finish» (actually they exist as long as Macrocosmos HCCI FD Exists!) only after Their ethereal Configurations come to absolute correspondence with Information typical of FFLOURRGG Info-Creators (TLAASSMA-A «Higher» OO-UU-Aspects), which represent highest synthesis degree in every Aspect from Each OO-UU-Entity in FD exhiberation conditions in the given megadiapason (till 36th dimension). Put simply, there happen qualitative «confluence» of all Duplicates e-Constructions (of TS- and IG-Ingredients) into TLAASSMA-A e-Configuration, whereafter there happen AYFAAR Form-Creators FD amitsiration into Form-Creators FD of Some of Its countless, more ampliative, 48-Qualitative Universal Entity Analogy (for example, into AULMNIYSS HCCI LOYSSAALGO-O).

4.0892. The whole 36–38-dimensional energy-informational Structure of the given Macrocosmos «part,» Self-developed and Self-created through AYFAAR HCCI all Form-Creators FD via TLAASSMA-A-Ingredient and Its basic Components (TS- and IG-Ingredients), holochronely-simultaneously Self-spreads into all possible creative Directions of various Interests endless realization, which are peculiar to all the given Universal DDIIUYI-Entity multiple subterraneous Interpretations, which thereat qualitatively transform straightway in all exuberation Levels. Here I would like to warn you from making up completely false Notions that more amplificational FD Levels of *US as Form-Creators* (the Secondary and the Primary Universal Illusion Form-structures) «are located» somewhere «outside,» in a certain «outside globality» comparing with presently focused by us physical CSR and STC. It would be right to perceive these Levels as the deepest energy-informational structures of *one and the same* (!) Form-Creators, which sllougrent Focus Dynamics concatenationally-convergently amitsirates «inside» with the Tertiary Illusion f-Configuration, into even more gabitual Essence of Macrocosmos.

4.0893. If we estimate that Process from the subjective position of *Us as Info-Creators* providing sllougrent Form-Creators FD of Interuniversal Levels, it would seem to «us,» that obeying qualitatinal-irrkoglyctive tendencies, endless in their multidimensional the Primary Universal Illusion Form-structures (*Sectors, Sub-Sectors and Flows*; from  $\pm 38.0-36.0$  to  $\pm 26.0-24.0$  dimension), in the specific mode of its simultaneous reflection (subjective Existence) in the Secondary Illusion more depliative (from Form-Creators viewpoint) conditions (from  $\pm 26.0-24.0$  to  $\pm 14.0-12.0$  dimension), svilgs-spherationally transgressed into more and more fragmented focal-ethereal components of Rays and Channels, thus reaching the tensor interconnections condensation degree peculiar to the Tertiary Illusion Form-Creators FD (from  $\pm 14.0-12.0$  do 0.0). Somewhere behind conditional «borders» of Quaternary Illusion Form-Creators subjective FD, Info-Creators ethereal Configurations gain the highest degree of their «qualitative identity,» transforming into reconverstive Configurations of primogenitive SSS-State fragments.

4.0894. From Interuniversal *Form-Creators* subjective «viewpoint» that holochrone-simultaneous «Process» looks completely different: under the influence of amplification-eglleroliftive tendencies and undergoing unceasing concatenational-convergent qualitative transformations, focal-ethereal interconnections of the Tertiary Illusion Form-Creators FD (from 0.0 to  $\pm 12.0-14.0$  dimension) multipolarizationally assimilate via peculiar to them Experience, first, into Channels, then into Rays of the Secondary Illusion (from  $\pm 12.0-14.0$  to  $\pm 24.0-26.0$  dimension), svilgs-spherationally ampliatizing (increasing covarllertness) thereat to f-Configurations exuberation Levels, first, of all Flows, then, of all Sub-Sectors and Sectors of the Primary Illusion (from  $\pm 24.0-26.0$  to  $\pm 36.0-38.0$ ). Infinitely continuing that eglleroliftive Process in Time and Space, they (F-C) on the most amplificational stage of their amitsirations come to the highest consummatization degree and, having harmonized absolutely all their interconnections, in the same way as Info-Creators, qualitatively will transform their focus (i. e. dissonational) Configurations into reconverstive Configurations of primogenitive SSS-State fragments.

4.0895. If we look at that qualitatinal-amplificational holochrone mercavgnation Act from *our individual* viewpoint, it may subjectively seem to us that Info-Creators and Form-Creators have absolutely opposite tendencies relative qualitative state estimation criteria of consistently carried out by them (in ethereal and focal Configurations) transformations and their joint creativity final

Goals connected with that «Process.» However, in reality SYNTHETIC Branch Form-Creators and RESOSCONTIONAL Branch Info-Creators have the same Goal — to form more and more universal (from our viewpoint!) versions of primogenitive SSS-State «to» a possibility comes for holochrone realization of *modificationnal supplerization* — Information primogenitive State transformation into absolutely harmonized (but already *non*-informational) confective USIP-State.

4.0896. In that overall «Process» under irrkoglective Impulse-Potential influence, Macrocosmos Info-Creators provide realization of all possible qualitational tendencies, which lead to the maximal «simplification» of interconnections between Information particles, transforming them (through multipolarizational transgression and e-Configurations diversification) into SSS-fragments reconverstive Configurations, structuring *always peculiar to them* primogenitive State of absolute Consummation. Holochronely-simultaneously with that Macrocosmos Form-Creators, which represent mercavgnational-dissonational part of *the same Information*, being initiated by eglleroliftive Impulse-Potential, in the final stage of absolute consummatization reach the same Goal and SSS-State (r-Configurations) through their Focus Dynamics svilgs-spherational convergence and harmonious confluence with SSS-Entity Self-Consciousness. In the both cases — in the final phase of transmittation — there takes place full annihilation of Info- and Form-Creators all functions (their transformation into Information primogenitive State).

4.0897. However, with all that — simultaneous-endless — «inner» Self-Differentiation and Self-Integration, each Creator of both interacting Branches (SYNTHETIC and RESOSCONTIONAL) always stays a potential carrier of Highest Cosmic Codes typical of the given type Macrocosmos. We can say that there is neither «higher,» nor «lower» Macrocosmos Form-Creators (or even — Info-Creators), there is only more depliative and more ampliative subjective Perception systems of Self-Consciousnesses Forms, which focal-ethereal organization level let different Creators to subjectively identify «themselves» with properties and peculiarities of either more complex and covarllert «areas» of slloogrent f-Configuration, or with Configurations of more primitive and tensor (unbalanced) «areas» of *the same* Macrocosmos slloogrentness.

4.0898. In all Levels of the AYFAAR HCCI Form-Creators FD's realization, that Mechanism is provided by TLAASSMA-A-Ingredient ethereal Constructions, «projecting» from primogenitive State the whole identificational set of the given Universe's informational Codes, and in the exhiberation Levels of our Macrocosmos Highest Collegial Cosmic Intelligences (SS-AYIYLG-SS-SS-AYY-SSS) — by the presence in Its Focus Dynamics of mutual Idiopathic SS-TOO-IIYS-SSS-Ingredient ethereal structures. Thus, *any* simultaneously exhiberated Macrocosmos Form, not depending on how subjectively we consider it, estimate and correlate with something, is potentially capable to reflect *through some part* of its slloogrent f-Configuration absolutely all Its (our Macrocosmos Highest Collegial Cosmic Intelligences) «initial» attributes (heterogeneous «codes»). However, it is entirely different matter how well the Observer Perception system, who studies that Self-Consciousness Form, is provided with possibilities and real abilities for corresponding identification.

4.0899. In other words, if in its subterransive Experience content there are quite active Notions only about some particular exhiberation Level, the observed Self-Consciousness Form will be identified exactly from that Level interconnection peculiarities position (similar functional «reduction»

happens relative to absolutely all surrounding us Self-Consciousnesses Forms — from fermions and microorganisms to Galaxies and Universes). All the rest of its potential properties and attributes will stay beyond «unpacking»-identificational possibilities of the Observer's Focus Dynamics. In order to radically expand them, you should try to deepen into the functional structure of your own Self-Consciousness in a corresponding way, which will let you start considering the same Form from much more universal positions. Such absorption of «mine» has made that ultramundane Information that you read and imagine in a particular way available for you in your subjective «present.»

**4.0900.** Thus we can quite definitely state that informationally any Self-Consciousness Form and CCI Focus Dynamics always stays «at the interface» of mutual resonational interaction between UPDR Info-Creators and three basic Creativity Spheres — SSUU-SS-VUU (Universal SSUI-SS-SFAA-Creators realization Sphere — 36.0–24.0 dimension), NAA-GLLII-UU (SSLOO-SS-SNAA-Creators Sphere — 24.0–12.0 dimension) and EIYG-SS-MII (SLAA-SS-MII-Creators — 12.0–0.0 dimension). They all (their countless derivatives) compose single AYFAAR HCCI Creative Activity Sphere — EY-FFMI EY-LLII, while Intergalactic Ethereal Complex-Plan (IIYY-YY-SS-MM) ethereal structures of Universal Plasmic-Differentiated Radiation (Interuniversal Ethereal Diapason — FLAAGG-TUU — is the bases for the realization of SUPRA-Universal UUYU-UU-YY-Creators of DDIIUYI-birvulyarities types) serves its «manifestation environment.»

**4.0901.** In its turn, TS-Ingredients LLAASS-Forms active manifestation Mechanism (NAA-GLLII-UU-Sphere) is Cosmic Ethereal Plan-Level (OULLGNOO-SS-ST), while IG-Ingredients SFUURMM-Forms reflect trough Ethereal Plan-Overtone Form-structures (UUOLL-SLAIIII-I). As for the realization of SFUURMM-Forms directly through our NUU-VVU-Form-Types Focus Dynamics, that creative Process is carried out due to TEC- and VEC-«unpackings» presence in our Perception systems. Let me remind you that the first are carried out via astrophysical temporal ethereal constituent (SVUULLMII-SVUU-VVU) and TEC mentoplasmic «part» (LUUDMII-SVUU-VVU), and the second — via the functions of planetary exhiberal bodies and extselsive (balanced) LLUU-VVU-Form (AASMII-SLII-SUU).

**4.0902.** Any part of focal-ethereal combinations structuring EY-FFMI EY-LLII (of course, in the conditional «borders» of aiyyaic birvulyarity type), can be available for any of you at the activation in your Self-Consciousness of those subjective Notions which correspond to these Creativity Spheres codes. Here I would like to draw your attention once again that one of the main tasks of studied by you lissidiology is to radically increase and universalize functionality of your Focus Dynamics, actively having restructured and consistently reformatted it with those Notions, which are typical not only of higher EIYG-SS-MII-Levels of GOOLGAMAA-A-Ingredient exhibition, but also for NAA-GLLII-UU and SSUU-SS-VUU-Spheres. Without lissidiology SFUURMM-Forms, you just will not be able to annihilate in your Self-Consciousness all your «present» multiple tensor-impersept Notions formed on the bases of more deformed and limited Information Sources.

**4.0903.** Thus, any type of countless Transcendent SSMIIYSMAA-A-Ingredients represents in the general UPDR-Realization spectrum one of qualitative informational peculiarities typical of TLAASSMA-A-Ingredient Creativity Sphere (if we talk only about AYFAAR HCCI Form-Creators FD peculiarities!). That lets zillion all possible types of synthesizing Form-Creators simultaneously

and subterraneously exuberate through zillion Self-Consciousnesses Forms and CCI in skrruullerrt system various modes, generating — in different Levels of formed thereat Plasmic Forces Diapason — countless different-Qualitative focal-ethereal combinations of slloogrent Information, which is peculiar to the given TLAASSMA-A.

4.0904. As already noted not all the zillion of these TS-Ingredients are active carriers of TLAASSMA-A Higher Experience, which structures the Primary Universal State of Energy-Plasma. That function is typical only of special TS-Ingredients category — so called «Main» SSMIIYSSMAA-A or *twelve* basic SSUUYSSMAA-A-Ingredients, because *only Their* e-Configurations are structured by Etalon (directly for AYFAAR HCCI Form-Creators FD!) Interuniversal SSNUUYLL- and Universal YYYUULLUYG-Forms «projections.» Svilgs-spherically duplicating peculiar to Them Information through Complex-Plans and Plan-Levels Stabilizational Flows, SSUUYSSMAA-A-Ingredients transgress It in the form of infinite subterraneous «Pure Codes» into absolutely all Levels of uniform AYFAAR HCCI Creative Activity EY-FFMI EY-LLII-Sphere manifestation, where these Codes, aggregating into all possible combinations, form already familiar to us Transcendent SSMIIYSSMAA-A-Ingredients.

4.0905. Thereat Each of the twelve SSUUYSSMAA-A-Ingredients is an active «generator» («executer,» «organizer») of attributes invaderentness Principle of only one OO-UU-Entity, in the highest degree expressing peculiar exactly to It Creative Activity in all Its countless «projections» of the Secondary Illusion. Therefore in AYFAAR HCCI FD conditionally can be distinguished twelve «primary» operative inter-Qualitative transformations subterraneous Mechanisms of all the multiple OO-UU-attributes into the specific LLAASS-Forms.

4.0906. Thus, we have *twelve conditional types of SSUUYSSMAA-A-Ingredients*, which provide primariusiveness in specific OO-UU-Entity attributes combinations:

CSAALLSSMAA-A — ALL-Love–ALL-Wisdom,  
SLLUUFFSSMAA-A — ALL-Will-of-ALL-Intelligence,  
SSTOOGGSSMAA-A — ALL-Integrity,  
SSIIYYKHKHSSMAA-A — ALL-Voidness–ALL-Fullness,  
SSPUUYDDSSMAA-A — ALL-Primordiality–ALL-Initiality,  
SSOOYSSMAA-A — ALL-Mobility–ALL-Presence,  
SSFUYYYUSSMAA-A — ALL-Voidness–ALL-Vacuumness,  
SSIIYSSMAA-A — ALL-Unity,  
SSKRAASSMAA-A — ALL-Knowledge–ALL-Informedness,  
SSVUUYSSMAA-A — ALL-Aspiration,  
SSEYYSSMAA-A — ALL-Steadiness–ALL-Stability,  
SSYYUUYSSMAA-A — ALL-Essentiality–ALL-Permeability.

4.0907. Specifical-universal functions of particularly These 12 different-type SSUUYSSMAA-A («Main SSMIIYSSMAA-A») provide TLAASSMA-A simultaneous transgression and FFLOURRGG (Its «Higher» OO-UU-Aspects) diversification from the Primary Illusion Levels into the Secondary Illusion exuberation conditions. All the rest countless TS-Ingredients represent in PFD the whole combination of Rays ethereal interconnections of twelve Pure Cosmic Qualities, Which «projections» in a definite

way are extrapolated into multiple Channels. In fact, particularly, Each SSMIIYSMAA-A informational Content, in highly complex and variable ways combining with Each of the rest TLAASSMA-A TS-Ingredients, is the bases and an integral part for the formation in all exuberation Levels of AYFAAR Form-Creators FD of the countless specific Form-systems of the Worlds, STC, CSR (and all their amplificational Analogs in the Tertiary, the Secondary and the Primary Universal Illusions).

**4.0908.** All subterransive TLAASSMA-A-Ingredient Content is simultaneously-potentially represented by narrow-specific «areas» of own sllougrent e-Configuration in Form-Creators Focus Dynamics of any PFD Level, in the same way all SSMIIYSMAA-A-Ingredient Content informationally provides realization through absolutely all Self-Consciousnesses Forms of multiple GOOLGAMAA-A-Ingredients different-protoformal functions. Informational properties and peculiarities multipolarizational transgression Principle of Every SSMIIYSMAA-A exactly repeats TLAASSMA-A Duplicates formation Principles. The difference in the process of multistage indepth Synthesis between *two or more* OO-UU-Entities Aspects in the Tertiary and the Secondary Illusion conditions is determined by much more complicated way of interconnections consummatization and covarllertization in Harmonious Pairs of Combined Cosmic Qualities in the Secondary Illusion.

**4.0909.** Every TS-Ingredient transgress countless variety of GOOLGAMAA-A-Ingredients «duplex-pairs» into the general sllougrentness of the Tertiary Illusion Form-Creators Focus Dynamics. These «duplex-pairs» are «twofold» according to certain, actively complementing each other, resonational attributes. In our dimension diapason that IG-Ingredients synchronous exuberation principle can be *conditionally* compared with manifestation Mechanism in the surrounding Cosmos of multiple «twin»-Planets, «twin»-Stars, «twin»-Galaxies and even «twin»-Universes, closely interconnected between each other not in space (they can be separated by million light-years), but qualitatively, according to the creativity they perform. For example, in different Planetary Form-Creators Focus Dynamics these «duplex-pairs» are formed into Planetary Creative Triads (KVOO-LK-TAMAA-A), which represent specific invaderental combination of several Aspects of one OO-UU-Entity, which «are projected» into PFD Form-structures through one TS-Ingredient e-Configuration.

**4.0910.** Each SSMIIYSMAA-A-Ingredient functions relative to the functions of any from Its IG-Ingredients can be conditionally compared with the relations between programmer and its personal computer, which he uses to achieve own goals: computer represents available possibilities for his creative realizations and does not influence neither his specific activity (created programs) nor the activity of his individual creative realization wheresoever (beside the functions of the given computer processor). In other words Every SSMIIYSMAA-A — through own Creative Triads formation — «projects» a particular part of all the subterransive peculiarities and possibilities It possesses into Every transgressed by It IG-Ingredient e-Configuration.

**4.0911.** Actively interacting and creatively complementing each other, an endless IG-Triads amount functionally provides in every exuberation Level the realization of one (from the countless multitude!) Task assigned to the given TS-Ingredient (as, for example, all our Solar system Planetary Entities are creatively consolidated in the given dimension diapason in order to conjointly complete a certain cosmic Task). However, it does not entirely mean that in the given Cosmic Creativity type there are functionally manifested only one SSMIIYSMAA-A-Ingredient properties! No, usually, in

any cosmic Mission realization, a huge number of TS-Ingredient «projections» is simultaneously engaged which presence provides *prosperative* possibility for the realization of every SSIIYSMAA-A *primariusive* attributes.

4.0912. Speaking about TLAASSMA-A informational interconnections with all Its SSIIYSMAA-A (and through Them — with all the multiple GOOLGAMAA-A), which conjointly provide AYFAAR HCCI Form-Creators Focus Dynamics, they in a certain degree resemble «spheroidal» multidivisional «World Wide Web» or Internet, where all the separate sites information (SSIIYSMAA-A analog) comes under the jurisdiction of one provider (TLAASSMA-A analog), which has direct access through corresponding codes to the whole system Main Computer informational base.

4.0913. Therefore, all multiple different qualitative Self-Consciousnesses Forms CCI states, forming Universal Illusion f-Configuration, represent a certain interstitial result of inexhaustible informational TLAASSMA-A-Ingredient Content creative exuberation via all transgressed by It SSIIYSMAA-A- and GOOLGAMAA-A-Ingredients into Form-Creators Focus Dynamics slloogrentness. In that case, can we state that TLAASSMA-A is, in its Essence, AYFAAR The Highest Collegial Cosmic Intelligence?

4.0914. No, we cannot. First of all, because Idiopathic TLAASSMA-A-Ingredient is primogenitive SSS-State part, potentially structuring Universal Plasmic-Differentiated Radiation via countless variety of ethereal «projections.» AYFAAR HCCI is consummative (dissonational) Process focal part directed into eglleroliftive restoration of the disrupted informational balance. In other words, it is a general Energy-Potential part which has been initiated (consuyetally «accentuated») «inside» Information via mercavgnation Act. It characterizes only this recovery (consummative) Process definite interstitial state in a randomly chosen by us conditional «point» of its amplificational development (objective realization).

4.0915. The transition of primogenitive SSS-State part into TLAASSMA-A Ingredient ethereal Configuration is initiated by AYFAAR HCCI Form-Creators Focus Dynamics, — as soon as it «ceases» (while achieving consummatization State), the whole IT-Ingredient Content again «returns» into primogenitive State. Speaking more specifically, IG-Ingredient Content ampliatively transforms into its more amplificational Analog — LOYSSAALGO-O (IL-Ingredient), which «projections» structure 48-Qualitative Universal IYYYYUULLSSMI-Entity AULMNIIYSS HCCI FD. As for AYFAAR HCCI, It is always qualitatively defined by only one dynamic (though slloogrent in it Essence), definitiated by certain attributes, Information State. AYFAAR conditionally can be compared with person, who is capable to actively demonstrate only definite skills, peculiarities and tendencies in typical of its exuberation conditions. As soon as the experience structuring Its Self-Consciousness considerably changes, integrates into a new Content, instead of the previous person in front of «Us» there appear already somewhat different, new personality. HCCI, manifested in 48-dimensional gigadiapason conditions — in Its amplificational Essence — is already not DDIIUYI-Entity AYFAAR HCCI, but 48-Kachestvennya IYYYYUULLSSMI-Entity AULMNIIYSS HCCI.

4.0916. AYFAAR FD exuberation all depliative Levels Form-Creators Focus Dynamics (i. e. all the infinite realizational GOOLGAMAA-A Forms, initiated in all the Tertiary Illusion types), depending on their synthesis state by every birvulyarity type, are capable only in a very small degree (due to the

presence of inertial Factor) reflect certain from amplificational combinations attributes «areas» which are typical of TLAASSMA-A e-Configuration, transgressing «outside» Itsself infinite own realizational SFUURMM-Forms, through which there realize all Self-Consciousnesses Forms (Proto-Forms) of the Tertiary Illusion CCI. Due to the presence of all these — in a different degree deformed in their informational Essence — Self-Consciousnesses Forms, generated by GOOLGAMAA-A-Ingredients, in AYFAAR HCCI FD there forms zillion different-type and different-Qualitative Form-systems of the Worlds, STC and CSR, which joint FDs form all the variety of Tertiary Levels of AYFAAR Unified Creation.

4.0917. So, for example, the whole informational Essence of each of us (intuitive-empiric Experience, subterransive habits, skills, abilities, character and so on) got possibility to exuberation particularly in these Space-Time conditions only due to the presence in the surrounding us UPDR state (i. e. in the Primary Temporal Axis of Self-Consciousness — RRGLUU-VVU) of GOOLGAMAA-A-Ingredients countless informational structures «level-by-level projections,» which in any given way realizing through informational space of collective unconsciousness and personalized Self-Consciousness (and also — *simultaneously* — of Subconsciousness, Supraconsciousness, Ultraconsciousness, Superconsciousness and Protoconscious), form all the informational bases for the formation of infinite Duplex-Spheres, Subovertones, Overtones, Subplan-Overtones, and Plan-Overtones of the Tertiary Universal Illusion.

4.0918. Figuratively speaking, the whole Form-Creators Focus Dynamics of your combined Self-Consciousness (SSVAAOLTT) you can conditionally imagine in the form of duvuyllerrt-continuous and diffuzgent-slloogrent (simultaneously multipolarizational by all resopasons of the Tertiary Illusion) energy-informational formation structured by the countless most diverse by qualitative state and subterransive Creative Activity «local informational exuberation points» (SSLAALLOLTT), which form and realize in Space-Time via the general Content of all the limitless variance of *Focuses of Close Attention* (as well as via Integral Motivational Impulse Focuses of also all amplificational LLUU-VVU-Analogy), simultaneously generated in PFD Form-systems by infinite realizational Self-Consciousnesses Forms of the given GOOLGAMAA-A-Ingredient.

4.0919. Due to the presence of Multipolarization each of these Self-Consciousnesses Forms Focus Dynamics (including different types of LLUU-VVU-Forms analogs generated by CCI) is capable to creatively initiate by the peculiar to it rotational displacements only strictly determined Qualitative diapason («area») of simultaneous realization of slloogrent *combined Consciousness* — either collective unconsciousness, or personalized Self-Consciousness, or collective Subconsciousness, or Supraconsciousness, or Ultraconsciousness or Superconsciousness or Protoconscious — thereby letting each of these — *multipolarizationally interconnected between each other through different scenarios* — Self-Consciousnesses Forms subterransively perceive «own self» in each of such rotational displacements only in that realizational Quality which is peculiar to the given «informational exuberation local point.»

4.0920. In every conditional moment decoherent Energy of *each* Self-Consciousness Form Form-Creators FP, structuring different development scenarios, resopason by resopason realizes only in the strictly determined qualitative Development. When one Self-Consciousness Form is simultaneously

aggregated by the countless multitude of other — different-Qualitative and different-Protoformal — Self-Consciousnesses Forms (for example, our mixtum NUU-VVU-Form-Types), in every Existence moment, resulting vector of person Focus Dynamics reflects only the Direction typical of the highest focal activity of all Self-Consciousnesses Forms Form-Creators structuring the given Form (from fermion to the cells, organs and systems). In other multipolarization conditions (other exuberation resonances) FCA of every Self-Consciousness Form simultaneously realizes into qualitatively other resulting Vectors.

4.0921. Thus no matter into what from the countless SSLAALLOLTT, simultaneously-multipolarizationally manifested in all the variety of development scenarios, you move your Focus of Close Attention, you always will be subterraneously perceive focused by You (as USCF!) Self-Consciousness Form as «yourself» and no one else (i. e. any from focused by You Proto-Forms will be consuetally perceived by you as «own» «exclusively yours»). And though qualitative difference between particular manifestations of Your sllougrent Focus Dynamics simultaneously generated «inside» one Stereo-Form in the most different development scenarios can be rather high, that circumstance will not affect the state of your self-perception, because the main role in that subjective process is played by SFUURMM-Forms which informationally provide «your» FCA exuberation: as you virtually «imagine» yourself, that Self-Consciousness Form you self-identify with.

4.0922. Every type of informational creative combination of IG-Ingredients Self-organizes and Self-realizes with the help of constantly generated by Them into Space-Time (through Form-Creators Focus Dynamics) Info-Creators e-Configurations «projections» (SLUI-SLUU), which provide with *corresponding versions of universal Meaning* realizational creativity of countless Self-Consciousnesses Forms (Proto-Forms) Form-Creators of different-Qualitative and different-type Collective Cosmic Intelligences, simultaneously structuring multiple Planetary and Stellar Entities Globes in different Galactic systems of not only our 3-Qualitative GDOUKKLOFT-Universe (UPDUYKK-type of Fields Consciousnesses, lluuuvvumic SSMAYK-AYKK-type), but also their ampliative Analogs in 6-Qualitative Universal KHLUURLLARKH-Entity Form-Creators FD (FRAMMAUSS-type of Fields Consciousnesses, lluuuvvumic RANDAALL-TAYR-type), 9-Qualitative Universal AFKALDUUFR-Entity (IRTTAMLANG-type of Fields-Consciousnesses) and 12-Qualitative Universal OOSLLOOLLS-Entity (YYUSSGMILSS-YYUSS-type of Fields Consciousnesses).

4.0923. Focal Configuration of every Proto-Form, functionally provided by Info-Creators of one GOOLGAMAA-A-Ingredient, represents special synthetic KARMO-Plasma exuberation type (MENTAL-Plaza + ASTRAL-Plasma), in a specific way coded by Info-Creators and modeled by SLAA-SS-MII-Creators for the possibility of own meaning «reflection» (functional execution of the corresponding task) only through Focus Dynamics of strictly definite «area» of the Tertiary Illusion sllougrent properties. Narrow specific format of each of these specific conditions of IG-Ingredient general universal Essence subterraneous exuberation in the Space-Time «local points» (i. e. via only its fractional part) is the main Reason of so limited perception of every Self-Consciousness Form of not only highly narrowed and deformed picture of surrounding reality, but also of its endlessly primitive (simplified) Notions about «itself.»

4.0924. Interconnections universal and all penetrating ethereal structure, peculiar to each of countless GOOLGAMAA-A-Ingredients variety, lets all the generated by Them SLUI-SLUU-Creators simultaneously manifest peculiar to them Creative Activity, for example, not only in such Planetary Entities Form-Creators subterransive Creativity Spheres as GREIYSLIISS, SLIIMPFLIISS, STRIYLLGSS, KUULDVUDDSS, KROUVDSS and others, structuring RAAGUULM Form-systems, but also within multiple other different-Qualitative Star and Galactic Entities CCI, functionally providing joint realization of informational bases through Form-Creators Focus Dynamics of Each of Them as well as Them all together.

4.0925. We can say that, for the simultaneous realization of Every IG-Ingredient informational Essence, there is absolutely no limits for focus expansion because, as soon as their e-Configurations qualitative state starts to exceed the Tertiary Illusion Form-Creators' Focus Dynamics, SFUURMM-Forms of IG-Ingredients' SLUI-SLUU-Creators at once consuetally integrate into LLAASS-Forms of SSMIYSMAA-A-Ingredients' GLLAA-GLLII-Creators, and from them — at further amplificational transformation — into YYYUULLUYG-Forms and SSNUUYLL-Forms of TLAASSMA-A-Ingredient's UUYG-UUYU-Creators, and so on.

4.0926. It means that Info-Creators, unlike Form-Creators, never associate «themselves» with informationally provided by them Self-Consciousnesses Forms f-Configurations qualitative state levels, because not being dependent neither from Time properties nor from Space possibilities, they specifically perceive «themselves» seemingly present «everywhere and forthwith,» not depending on more or less limited possibilities of various subjective Perception systems Form-Creators. For them it is «common» and natural to cognize peculiar to them functionality in SLUIY-SS-LAA-Creators Focus Dynamics (Quaternary Illusion below 0.0 dimension) as well as in SLAA-SS-MII- (the Tertiary Illusion) or SSLOO-SS-SNAA-Creators (the Secondary Illusion), or SSUI-SS-SFAA-Creators FD (the Primary Illusion), UUYU-UU-YY- (Interuniversal Illusion; 36–38 dimension) or I-IITY-I-AA-A-Creators (SUPRA-Universal Illusion; 48–50 dimension).

4.0927. Information (in SSS-Entity amitsissimal State) does not have any real possibility to objectively estimate Itself from any subjective position — that is the prerogative of SSS-Entity Self-Consciousness Form-Creators initiated to the Process of consummative Amplification with the help of eggeroliftive Impulse-Potential. After mercavgnation Act Information does not cognize itself «irrkoglectively unbalanced,» because It — up to holochrone transformation into confective State — stays in primogenitive State. Only Form-Creators recognize and perceive in their own way mercavgnational dissonation attributes (relative to primogenitivity), while representing in Information a natural consequence of amplificational consummatization postmercavgnational Process Initiation.

4.0928. In any exhiberation Level any informational Particle cannot be «better» or «worse,» «depliative» or «ampliative» relative to any other Particle — it is always and everywhere remains as it is (in primogenitive State). The effect of subjective «division,» «deformation» and qualitative differentiation (simplification, Meaning minimization) of any Particle is caused only by impelled limitedness of different Self-Consciousnesses Forms Form-Creators realizational possibilities, which are just not capable to adequately decode the whole slloogrent Meaning of the given Particle in the peculiar to them exhiberation conditions. Let me remind you that amplificational possibility of any

Perception system (higher ability to adequately «unpack» larger information volumes per one unit time) is inversely proportional to the tensorness value of focal-ethereal interconnections, which form Form-Creators Focus Dynamics functionally organizing the given Perception system functioning.

4.0929. The main function of Every GOOLGAMAA-A-Ingredient eventually comes down to the creation «inside» of consummative Process of all the necessary conditions for overall manifestation (exhibition) of AYFAAR HCCI Form-Creators Focus Dynamics in all types of the Tertiary Illusion s-Realities (which is created by the same Form-Creators «projections»), in order to maximally infiltrate the given skrruullerrt system part with those amplificational Principles and karmic interconnections Channels which presence fully provides Form-Creators Focus Dynamics eglleroliftive transformation via changing SLUI-SLUU-Creators SFUURMM-Forms into GLLAA-GLLII-Creators LLAASS-Forms, and SLAA-SS-MII-Creators Focus Dynamics content — into SSLOO-SS-SNAA-Creators FD content.

4.0930. Exactly therefore Every GOOLGAMAA-A-Ingredient is structured by own countless ethereal structures, such as, for example, IG-Modi: LIIRTUULLAA-A (2–3 dimension), GAMALGORRAA-A (3–4 dimension), SSIYULLSMAA-A (4–5 dimension), or IG-*Signums*. In particular, only in GAMALGORRAA-A-Modus ethereal Configuration there are formed special Signums, which task includes informational support in the given exhibition diapason of all Stellar Entities Form-Creators Focus Dynamics (STSILLU-OFF-MAA-Signum), Planetary Entities (TAYSS-DDORS-MAA-Signum), animal CCI and Self-Consciousnesses Forms (LLAISSMMAA-A-Signum), plants (SSAALM-MAA-Signum), minerals (OOLLM-MAA-Signum), fermions (ARFF-ORST-MAA-Signum), bosons (FFAOLL-FS-MAA-Signum), doollses (SSOLLAS-MAA-Signum), flakses (TASSILLU-URS-MAA-Signum), and also countless unknown to us types of Proto-Forms Form-Creators Focus Dynamics.

4.0931. All the variety of any given ethereal structures is the main informational bases for the formation in various Space-Time conditions (though *they themselves* provide subterransive exhibition of these given conditions in every slloogrent «point» of the Tertiary Illusion Form-Creators FD!) of all Planetary Globes with structuring Them, via own Focus Dynamics, different-type Collective Cosmic Intelligences and different-protoformal Self-Consciousnesses Forms. Ethereal Content of Every IG-Ingredient can simultaneously structure all types of multiple Planetary and Stellar Entities Globes s-Realities, — but only within qualitative parameters of interconnections between attributes typical of SLAA-SS-MII-Creators FD. Thereat dimension diapasons subjective parameters «quantitatively» can rather substantially differ from each other (in other words that type of interconnections, which is perceived by us as 3–4-dimensional human STC diapason, in other birvulyarity types Proto-Forms Perception systems can be specifically reflected — relative to the fixated by *us* peculiarities and properties — as 1–2-dimensional, 2–3 dimensional, 4–5-dimensional and so on).

4.0932. Thus, SLUI-SLUU-Creators of Every GOOLGAMAA-A-Ingredient simultaneously realize not only via all LLUU-VVU Form-Creators Self-Consciousness structures, but also via multiple other different-birvulyart CCI. For example, in the given dimension diapason there in parallel exist *in their own STC and CSR-types* not only highly similar with people in appearance *greystses, allgsses, triffittses, ngunms, bollfs, stablozantses, lovirgiydtzes, pridmls, pridds, dzeydzttzes, iolddls, krringrs* and *kriigmms*, but also completely different from you *gloffrs, klazovits, iykhrrs*, cone-shaped *robburotts; psiungrii, gluandrii, aystinglii* and *aygvii*; synthetic cosmic civilizations of *krokstrs, unkgrrs* and *mokkrouts* from

SMMUUFFTL Stellar Entity realities; *akrgrofots* and GLOOFFORRGGM and TVUUTSTM civilizations from KRRIIMSSMLISS Stellar Entity; *sliipses, toorlingtontses, aiamms* and *ooinglii* from SLIIMPFLIISS Planetary Entity (Venus); *gvidellindtses, terriantses, gloogolms, ssilmii, dillii* and *stsiilvii*; *spliingllii, groonngls, iyygvii, iinstieylls, inngtses, oolldrvs, oooygtses, skarrlds, angsses* and *orrs (stellkkses and rolls)* from UIUYUU-UU-YYUU Realities (Pleiades) and many others.

4.0933. These long list can be continued, but it is given not in order for you to remember it, but for you to have more or less complete notion how variable and different in use in every specific exhibition condition are IG-Ingredient functions, which let Form-Creators of different OO-UU-Entities get priceless Experience of Cosmic Existence in the Tertiary Illusion most variable Form-systems conditions. And it is completely useless for us to try to understand those countless complex interlacements of ethereal interconnections, through which IG-Ingredients of one or multiple SSMIYSMAA-A-Ingredients interact between each other. Due to that Collective Cosmic Intelligences representatives of any from cosmic civilization can potentially manifest its specific creativity (in the peculiar to them exhibition Level) through any Proto-Form FD, generated by different GOOLGAMAA-A-Ingredients, of both «ours» (human) and multiple other STC and CSR types.

4.0934. Fully providing every conditional «moment» of simultaneous exhibition of absolutely all Self-Consciousnesses Forms and CCI Form-Creators slloogrent Focus Dynamics, initiated by irrkoglictive-eglleroliftive Impulse-Potentials, TLAASSMA-A-, SSMIYSMAA-A- and GOOLGAMAA-A-Ingredients have organized into uniform Universal Plasmic-Differentiated Radiation, having become, in their Essence, the main Mechanism of Cosmic SBOALLGSS-Entities universal creative realization (strange attractors), performing in absolutely all Macrocosmos Form-Creators FD the role of the basic Conductors of above stated IP subterraneous properties. These are Those Universal Cosmic Laws and Their Principles, Which presence provides holochrone-simultaneous execution of the universal Existence Process, i. e. diversified Information state svilgs-spherational consummatization as Everything Being.

## **Chapter 4. The organization of Holochrone transmittation and modificational suplerization of Form-Creators Focus Dynamics of all Levels of Universal Illusion exhibition**

4.0935. In order for you not to make completely wrong (illusory) impression that skrruullerrt system, Plasmic Forces Diapasons and such Form-structures of Universal Entity as Sectors (NNIILG-NNI), Sub-Sectors (LLIING-LLI), Flows (SSMUU-SS-SSAA), Rays (UU-ISSM-UU) and Channels (SSVA-SS-UU), are independent (autonomous) focal-ethereal formations, which exist seemingly «by themselves,» lets try to consider their functional peculiarities and interconnections between each other more detailed and fully. Otherwise, all your subterraneous Notions about slloogrent-diffuzgent Form-structure as of the both countless multitude of heterogeneous Universes and Macrocosmos in general, synthesized by you hereafter will turn out to be too subjective and unreliable in order for you to be able to confidently rely on them in logical-analytic considerations.

4.0936. So, the whole *Macrocosmos skrruullerrt system* was formed «inside» primogenitive Information State as the natural reaction of Its SSS-fragments diffuzgent part, initiated by mercavgnation Act, for the powerful eglleroliftive influence of corresponding Impulse-Potential, in the result of which amplificational perturbation of all *before-mercavgnational inter-skunkktional* interactions were able to manifest (in the Information Itself!) as heterogeneous Dynamics between Focuses tensor states (unrealized realizational Energy concentration conditional «points») of the newly formed (after mercavgnation) dissonational Activity. All that became the main Reason of the transformation of primogenitive (harmonious-balanced) State of all «inner» Information Essence into amitsissimal (qualitatively disbalanced) and origination on its bases of such energy-informational formation (rather, intrainformational effect), as *CCC-Entity's Universal Self-Consciousness*.

4.0937. Energy-informational bases for Its functioning serve so called *Rezomirals is manifested* — countless multitude of postmercavgnational resonational interconnections, «instantaneously» having formed between particles of stably balanced (liyillusceve) Information part and those from Its particles, in which — for the formation of new liyillusceve interconnections — there have to be initiated eglleroliftive dissonational Activity. That is this amplificational Essence of Information holochrone-simultaneous consummatization general Process — of Its deepest and overall development.

4.0938. Therefore, CCC-Entity Universal Self-Consciousness realizational functions are provided, from one side, with the presence in it of absolutely all «projections» (subjective analogs) of Information primogenitive particles, stably manifesting resonational Activity between each other, and also, from the other side, the countless dissonational Activity Focuses presence (decoherent-dissipative Energy), which compose the bases for consummative Process of the total transmittation — qualitative transformation of primogenitive (conditionally — «more depliative») Information State into a potentially possible for It, confective (conditionally more ampliative) State. As soon as in all Macrocosmos types there fulfill consummatization Act — at once informational interconnection will mutually annihilate (liyillusceevate) giving «place» to confective (conditionally — certain *above-informational*, most perfect) USIP-State.

4.0939. What we subjectively determine as CCC-Entity Focus Dynamics, represents absolutely all possible versions of *holochrone state* of focal-ethereal interconnections of all manifestation Rezomirals, simultaneously initiated by Form- and Info-Creators of all the endless multitude of different-type and different-level Collective Cosmic Intelligences (generated by Them Self-Consciousnesses Forms). That holochrone state forcedly peculiar to Information, Its holochrone state — in the form of Energy-Plasma absolutely organized in its transformational dynamics — is in its objective Essence, *skrruullerrt system*, which multipolarizationally-duvuyllerrtly forms and diffuzgently unites focal-ethereal Configurations of all types of simultaneously exhiberated Form-structures of all Macrocosmos.

4.0940. Plasmic Forces Diapasons (PFD) — Universal as well as Microcosmical — also represent natural Consequence of simultaneous resonational interaction between Form-Creators and Info-Creators, carried out under absolute control of UI-Creators — Universal Creators-Interpreters (*lyyyuyullons* — UI-Creators in our Macrocosmos type, *flaaggtuons* — the Primary Energy-Plasma UI-Creators, *avvakklons* — the Secondary Energy-Plasma, *svilgsons* — the Tertiary E-P and *iksons*

— Quaternary Energy-Plasma). It is Them Who provide the formation of all multiple birvulyarities types. PFD is the *subjective* reflection of Macrocosmos general skrruullerrt system slloogrent part holochrone state, demonstrated in SSS-Entity Self-Consciousness through Notions peculiar to Form-Creators of the definite birvulyarity type. In other words, at the consideration of the given «part» of skrruullerrt system interconnections from the positions of other birvulyarity types CCI Form-Creators, sense bearing «picture» of subjectively seemingly «one and the same» PFD always will be different.

4.0941. Universal «Sectors» and organizing them Form-structures represent main realizational Mechanisms of focal-ethereal interconnections simultaneous exhibition typical of all multiple Self-Consciousnesses Forms Form-Creators Focus Dynamics structuring all birvulyarity types, subterraneously peculiar to Every Universal Entity. That is a combination of all different-birvulyart interactions between different-protoformal Form-Creators which Notions simultaneously organize into Every Universal Entity multipolarizational Focus Dynamics (through all Their multiple subterraneous Interpretations). All «Sectors» and their other Form-structures appear to be «scribed» into multi-dimensional energy-informational constructions of every Plasmic Forces Diapason, performing in each of the subjective «moments» of their exhibition (in any birvulyarity type Perception system) the main functional role.

4.0942. Let me repeat one more time: the principle bases for the subjective differentiation of Universal DDIUYI-Entity slloogrent focal Configuration and Its HCCI AYFAAR Focus Dynamics multipolarizational Transgression into all possible heterogeneous Form-structures (Sectors, Sub-Sectors, Flows, Rays, Channels) for us serve NOT the attributes of linear «grandness» and «immensity,» «global volume» and space-time «length» of these, holochronely-simultaneously exhibited in different Space-Time conditions, diffuzgent interconnections (as we are capable to traditionally perceive, imagine and understand any Self-Consciousness Form), but *the degree* (amplification level in more universal birvulyart attributes) and *the deepness* (comprehensiveness, all-representativeness of formed interconnections) of *already carried out Synthesis* between Aspects of organizing them OO-UU-Entities (characteristic dimension, covallertness, inertia indicators), which determine objective possibilities of any Macrocosmos space-time Form-structures creative functionality and its Self-Consciousness development level (importance of exhibition Mechanism in Energy-Plasma).

4.0943. Therefore we should not link such notions as Planetary, Starry, Galactic and Universal used by us in the given context (not only relative to Sectors, Subsectors and so on, but also to all other dimension diapasons Form-structures) to the parameters of the observed by us Planets, Stars and Galaxies, but interpret them as different degrees of *significance* (amplificational *ranging* in own birvulyarity type) of properties and possibilities of considered by us SVOO-UU- and TOO-UU-Entities in the simultaneous realization of the general consummative Process of concatenational-convergent Energy-Plasma exhibition through FD of Form-Creators of our Universal Entity. That is a forced measure because we, in our Imagination, yet were not able to form other subjective Notions about amplificational importance of any given modificational supplerization Act Components in the surrounding us multi-dimensional Cosmos.

4.0944. So, as it has been repeatedly mentioned, the whole variety of that Energy-Plasma «part» heterogeneous Levels, types and kinds which have formed 36-dimensional AYFAAR HCCI Integral «Body» structure (Universal DDIUYI-Entity), can be conditionally differentiated into twelve different-Qualitative Universal Form-structures types (Sectors) which functional slloogrentness, in its turn, is provided by the twelve *conditional* Intergalactic (i. e. less universal in the rating peculiar to our birvularity type!) different-type space-time dimensions of DDIUYI-Entity f-Configuration, which provide eglleroliftive creative realization of AYFAAR HCCI all Form-Creators slloogrent FD, starting from EIYG-SS-MII-Spheres Levels (up to  $\pm 12-14$ -dimensions) and NAA-GLLII-UU-Spheres (up to  $\pm 24-26$  dimensions) and finishing with SSUU-SS-VUU-Sphere Levels (up to  $\pm 36-38$  dimension).

4.0945. Between the type of qualificationness (objective qualitative state, birvularity) and Form-structures functional peculiarities of *each* of the 12 conditional Sectors there are multiple substantial differences, which subjectively manifest through structuring them Form-Creators Focus Dynamics in the used by Them ways of Their subterransive properties and peculiarities realization. These ways, which Essence comes down to all the variety of Cosmic Laws and Principles, differ Energy-Plasma «parts» and «areas» formed by Them (by Form-Creators of each Sector) from the variety of the Primary Universal Illusion (OIYAOOMM) Forms peculiar to Form-Creators subterransive Creativity of each of the rest 11 Universal Sectors. Therefore each of them forms in Space-Time seemingly «its own» «spheroidal group» of different type birvularities (for example, one of such «groups» — of one of the 12 Sectors — subjectively «engages» our AIY-YYA-Entity Form-Creators FD).

4.0946. Functional bases of any from these NNILG-NNI-structures is provided by the presence in its f-Configuration of twelve own (basic) types of realizational focal-ethereal Formations (Sub-Sectors) and multiple necessary, svilgs-spherotionally complementing them (i. e. belonging to other Sectors), interconnection groups, which in a different degree are diffuzgent and covallert relative to Form-Creators FD of the given Sector. But if sector Form-Creators general Focus Dynamics has formed all multiple different-birvulyart realizational SSUU-SS-VUU-Spheres of the Primary Universal Illusion, sub-sector Form-Creators FD provides in general exhiberation of different-birvulyart functions and peculiarities of the Secondary Universal Illusion (UIYUVIIMM) NAA-GLLII-UU-Spheres.

4.0947. Thereat all Sub-Sectors Form-structures serve a specific «buffer zone» between Form-Creators FD of the both of these Illusion types because they are specifically organized in that megadiapason of spheroidal-slloogrent f-Configuration of Universal DDIUYI-Entity, which we associate with Energy-Plasma properties (parameters) in the range between  $\pm 28$ th and  $\pm 18$ th dimensions (i. e. there partially present combinations attributes typical of both the Primary and the Secondary Illusion). In fact, due to the presence of duvuyllerrt-diffuzgent properties of Sub-Sectors Form-structures, SSUU-SS-VUU-Spheres SSUI-SS-SFAA-Creators carry out multipolarizational transgression of peculiar to Them the Primary Codes (SSNUUYLL- and YYYUULLUYG-Forms) into NAA-GLLII-UU-Spheres SSLOO-SS-SNAA-Creators Focus Dynamics (where these codes qualitatively transgress into LLAASS-Forms).

4.0948. Thus all the informational bases of Sub-Sectors Form-structures is *conjointly-slloogrently* formed by both the Primary Illusion YYYUULLUYG-Forms depliative versions, and the most ampliative the Secondary Illusion LLAASS-Forms versions which are peculiar only to the most

developed (in their own birvularity types!) Intergalactic and Galactic TOO-UU-Entities the Highest Collegial Cosmic Intelligences Form-Creators FD. However, at the consideration of the given obstacle from the position of SSLOO-SS-SNAA-Creators Focus Dynamics eglleroliftive consummatization and concatenational amitsiration into more ampliative SSUI-SS-SFAA-Creators Focus Dynamics states, the informational component of all DDIIUYI-Entity heterogeneous Sub-Sectors should be studied from the other side — as the main Ethereal bases for inter-Qualitative Synthesis in Its slloogrent f-Configuration of all the multiple Universal Sectors Form-structures.

4.0949. That bases in its turn, is provided (synthesized) by different-birvulyart integral Experience, svilgs-spherationally realized and multipolarizationally formed (in the peculiar to them exhiberational Levels) by all possible heterogeneous Form-Creators Focus Dynamics of so called Flows, Rays and Channels. Moreover objective accumulation and ampliative extrapolation of these generalized Experience into the uniform — more universal in its slloogrent Focus Dynamics — amplificational Form-structure is carried out by the principle of unceasing different-Qualitative-resonational integration of already synthesized *combinations* of geyliturgent attributes, simultaneously engaged in Transmutational processes of countless different-birvulyart Synthesis Schemes.

4.0950. Covarlertly combining between each other, Form-Creators FD of separate birvularity types structuring Channels, Rays and Flows, are consuyetally constructed into more and more developed realizational aggregations, concatenationally transforming into multiple Universal Sub-Sectors and then into even more universal formations — Sectors. It comes out that realizational possibilities of Form-structures Form-Creators of each of the 12 conditional Sub-Sectors of *one and the same Sector* differ between each other much stronger than it is peculiar to the creative realizations of any from the 12 conditional Sectors Form-Creators FD, because while eglleroliftive svilgs-spherations, exhiberational properties and possibilities of *different-birvulyart* Form-Creators, convergently joining, continuously expand and universalize (due to the increase in covarlertness of used by them focal-ethereal interconnections).

4.0951. Flows SSLOO-SS-SNAA-Creators Focus Dynamics penetrate via typical of them Creativity (LLAASS-Forms) average states of PFD Cosmic Plan-Levels exhiberational Form-structures states in the diapason from  $\pm 20.0$  do  $\pm 16.0$  dimension. These FDs are formed by Galactic Collegial Cosmic Intelligences of narrow specific Cosmic Creativity Directions joined between Each other in each of the multiple Flows into all the variety of birvularity types, each of them — which is very important! — is formed on the bases of the deepest Synthesis of *one* of the twelve heterogeneous OO-UU-Entities. In other words, in spite of the multiple Synthesis Schemes potentially represented in it (in birvularity type), the general formation sign of Form-Creators Focus Dynamics for every Flow serves the most covarlertness degree presence in attributes combinations (Aspects) of One of OO-UU-Entity (synthesized on the background of vecsative Creative Activity of different conglomerations of the rest OO-UU).

4.0952. In its turn, each of multiple Flows Form-structures is structured by Rays SSLOO-SS-SNAA-Creators Focus Dynamics, which penetrate the Secondary Universal Illusion and form lower exhiberational megadiapason of PFD Cosmic Plan-Levels — from  $\pm 16.0$  to  $\pm 12.0$  dimension. In the conditions of universal properties and functional possibilities of these Form-structures, on one side,

simultaneous eglleroliftive (*amplificational*) activity is carried out in svilgs-spherational convergence of all possible countless heterogeneous combinations of Each of the 12 OO-UU-Entities Aspects (actively interacting between each other via most corresponding to them birvulyarities types) into even more universal combinations, and on the other — *qualitational* — side, here happens multipolarizational transgression and diversification of the same Aspects into all possible Synthesis Schemes and different-type birvulyarities Form-Creators FD.

4.0953. SSLOO-SS-SNAA-Creators of multiple Rays are the most active implementers and Mediators in the functional providing of the most complex Process of synthetic interconnections simultaneous transformation of the Secondary Universal Illusion (PFD Cosmic Plan-Levels FD) depliative buffer states and the Tertiary Illusion CCI SLAA-SS-MII-Creators (PFD Fields-Consciousnesses Plan-Overtones) most ampliative states. From one side, They generate and translate LLAASS-Forms codes, adopted in Meaning to all SLAA-SS-MII-Creators Focus Dynamics SFUURMM-Forms, which are simultaneously engaged in the formation of all possible Synthesis Schemes (from 2-invaderental to 12-invaderental). From the other side, They eglleroliftively initiate Them for the realization and translation (through more ampliative Self-Consciousnesses Forms FD) of more covarllert part of synthesized by them Experience, out of which every OO-UU-Entity SSLOO-SS-SNAA-Creators selectively integrate (retrieve) the most valuable for Them part (most covarllert relative to Them attributes combinations).

4.0954. All functional transmutional activity of SLAA-SS-MII-Creators is carried out in Channels countless Form-structures, which unify absolutely all different-Qualitative and different-type Fields Consciousnesses Focus Dynamics structuring PFD Plan-Overtones. In other words, through specific exhiberational Mechanisms of our Planetary IISSIIDI-Centers karmic Channels, in the most diverse conditions of Space-Time Existence, there simultaneously realize all synthesizing possibilities of heterogeneous Form-Creators, thanks to which, in our Perception systems, all the endless versions are subjectively formed of creative realization of the surrounding us reality — the depliative part of Focus Dynamics of the Tertiary Illusion Self-Consciousnesses Forms.

# SECTION XVI

## *Universal Cosmic Laws and Their Principles (SLLOOGSS-LLOOGS and SLLOOYYS-SLLOO)*

### **Chapter 1. «Laws» and Principles multiform manifestation Transcendent Nature**

4.0955. As we have already established, any types of abyssal-diffuzgent Focus Dynamics of CCIs or Self-Consciousnesses Forms with own f-Configurations structuring each of Macrocosmos with typical to them, subterransive features and functions are interstitial versions of holochrone Process of the infinitely multiple formamentation of the vital creativity of United Superuniversal Impulse Potential (USIP) in realizational Creative Work Directions peculiar to It. The fundamental base of This — multipolarized throughout all infinite variety of different-type Macrocosmoses — Self-Cognition Act is confective State of immensusal respectuality peculiar to It (to USIP Creative Work). This State is some immutat «reference point,» which allows propozitum Observer, Who has ability to compare «What Exists» with «What Happened» with minimal allowable degree of subjectivism, to take decision in accordance with realizational Interests peculiar to It.

4.0956. Figuratively, confective State could be immutatly compared with the holochrone USIP-Realization General Plan reflecting What is going to be, eventually, to every last detail. Meaning, USIP-Realization, through confective State like through own simplectic «starting point,» defines and outlines absolutely all potential abilities required for guaranteed receiving of «the desired» effect. The main realizational «instruments» (Mechanisms) in «the Process» of this General Plan holochrone implementation is Impulse-Potentials all infinite variety, Each of Which you can immutatly imagine in the way of the separate fragment of potentially already completed «puzzle,» which structure precisely reflects *What exactly* should be achieved during USIP-Initiation. Such fragment Content is presented in confective State by complex-structured components peculiar only to It, which allow creation of very deep diffuzgent interpenetrations (combinations) into realizational Contents of many other Impulse-Potentials.

4.0957. By the word «Content» I mean here not some abstract informational state (because the Essence of the Information Itself does not exist «yet,» before USIP-Initiation), but a definite Potential of creative abilities, which are not conditioned with any subjective Conceptions (because there are no any Conceptions at this Stage — they appear only at the Moment of amitsissimal SSS-State manifestation). Structured with such universal way, confective USIP-State holochronely realizes via subterransive transcendent features of different-type abyssal Impulse-Potentials all variety, which have entered multilateral interactions among each other in accordance with the General Plan produced out of USIP-Interest, and consuyetally (that is, naturally, automatically) initiates to primogenitive State, Which we subjectively interpret as «SSS-State» or «Information.»

4.0958. Each Particle of this State, going through (under the influence of Impulse-Potentials corresponding to its Content) own mercavgnation type (IP-Initiation), holochronely realizes «internal» consummatization peculiar only to it (sort of informational audit of What «Exists» with What «Should Be» in accordance with the General Plan). In this way, holochrone-simultaneous exhiberation occurs of the countless variety of Macrocosmos types diffuzgently transforming into each other, Each of Which is based on the realizational «Laws» typical only to a certain Macrocosmos type and conditioned by specific combination of Impulse-Potentials, Which initiated this type.

4.0959. Since our Macrocosmos type is mercavgnationally initiated by the content of the two Impulse-Potentials — irrkoglictive and eglleroliftive ones — the Cosmic «Laws» providing holochrone-simultaneous Process of Its multilevel Form-making reflect also only those specific properties and features, which are typical to these two IPs. I put the word «Law» in parentheses only because we are still incapable of either embracing, or really assessing, or psycho-mentally cognizing — within our extremely confined subjective Conceptions about «ourselves» and the reality surrounding us — those functions and realizational Mechanisms completely inconceivable for us, which They provide during the Process of the inter-skunkktional interconnections overall consummatization via our Macrocosmos type specific features.

4.0960. More than that, These «Laws» represent all functional regularities of concatenational convergence of slloogrent Focus Dynamics of not only The Highest Collegial Intelligences of our Macrocosmos, but also all other — diffuzgent-abyssal with respect to It — Macrocosmos types. And in each of the Levels of own «local» exhiberation, each of These «Laws» (depending on subterransive features of each of irrkoglictive-eglleroliftive interactions) is able to manifest very specifically via Focus Dynamics of various Form-Creators of Proto-Forms and reflect rather typically realizational Interests and Creative Potential (sort of immutat «duplicate» of the confective General Plan) of Each of Self-conscious Cosmic Entities of different-type Macrocosmos in diverse exhiberation conditions.

4.0961. Meaning, They Themselves are also Self-conscious Cosmic SLLOOGSS-LLOOGS-Entities, Which, in attractor way (in a way completely mysterious to us but with absolute ordering between decoherent and dissipative Energy parts), in each of the particular conditions of focal-ethereal interactions, embody in MAIIYG-SSS-MAA-Dynamics (Self-conscious Cosmic Co-Existence of absolutely all Form-Creators and Info-Creators) exactly that Content, which is «initially» (mercavgnationally) put («programmed») by the Very USIP-Essence into Their abyssal Configurations.

4.0962. As already mentioned, in conditions of holochrone exuberation of Focus Dynamics of all Form-Creators of the Tertiary Illusion, activity of some of the Cosmic «Laws» (in this or that way activated in exactly this Form-making Process implementation) universally expresses via SBOALLGSS-Entities realizational Creative Work. One of the innumerable kinds of Their amplificational manifestations is defined by our scientists as «strange attractors.» SBOALLGSS-Entities are special realizational part of svilgs-spherational Mechanism of multipolarizational exuberation of Focus Dynamics of absolutely all Collective Cosmic Intelligences of the Tertiary Illusion, which provides so called orientation («cause-and-effect,» «organizational-establishing,» «abyssal-regulatory») functions in amitsirational process going on with all synthesizing Form-Creators. The performance of these functions in conditions of the Tertiary Illusion is feasible only at availability in FD of these Form-Creators of ambigulyar (joint) resonational activity of Creators-confectons (eglleroliftive Impulse-Potential carriers in all Macrocosmos Levels: svilgs to 12.0 dimension, avvaklons 24.0 dimension, flaaggtuons to 36.0 dimension) and lyyuyyussigms (irrkoglictive Impulse-Potential carriers). Without them, any Focus Dynamics cannot take place in principle.

4.0963. It is very typical to any amitsirational process that there is absolutely no *prohibitive* principle in these realizational functions, which we have understood and adopted so well. We realize it most often, usually by the most primitive scheme: you can do this, and you cannot do that; this can happen, and that will not ever take place. The thing is that in slloogrent FD of Macrocosmos HCCI, Form-Creators can simultaneously realize absolutely everything (to the point of multipolarizational amitsiration to the other Macrocosmos types).

4.0964. Though, for the realization of every particular Interest, there are special Mechanisms of subterransive exuberation (subjective Perception systems), which structure Self-Consciousnesses Forms and CCIs functionally devoted to this, via which Focus Dynamics — to varying degrees, in one way or another — exactly those creative properties and features realize, which provide the process of full annihilation and perturbation (qualitative transformation) of some SFUURMM-Forms («current» essential Interest) to the more ampliative versions.

4.0965. The task of SBOALLGSS-Entities is diverse functions of simultaneous orientation of Focus Dynamics of any Form-Creators exactly in those amitsirations Directions peculiar to them, where informational Essence (interstitial Interest) synthesized by them has all opportunities for realization in various ways. It is They Who personify what we mean by the notion of «regularity» (though, owing to a lack of knowledge or the wrong idea of Cosmic «Laws,» we often receive something quite different from what we «regularly expected»).

4.0966. At the heart of SBOALLGSS-functions all universality in conditions of the Tertiary Illusion is activity of Creators-svilgs (Who are amplificational «projections» of Creators-confectons «locally» manifested via FD of synthesizing Form-Creators), Who define birvulyart type and qualitative directivity of each of simultaneously accomplished rotational displacements of Focus Dynamics of Form-Creators. This is how Universal property of holochrone Multipolarization of any qualitative amitsirations of Form-Creators is accomplished at once in f-Configuration of countless number of Self-Consciousnesses Forms.

4.0967. SBOALLGSS-Entities functions are just put into realizational basis of this Information internous property. These functions are directed on svilgs-spherational organization of Focus Dynamics of Form-Creators of any Self-Consciousnesses Forms towards exactly those Space-Time «areas,» where internous Interest peculiar to them has a chance to realize in one way or another. First, all those opportunities are activated successively (if they are available at all), which are typical to the given Synthesis Scheme (meaning, multipolarizational orientation of the amitsiration process in the more appropriate protoformal development Directions among accessible ones). If, upon this point, *depliative* (as regards the current Synthesis Scheme) Interest of this Self-Consciousness Form to such realization type is not reduced, but increased even further, SBOALLGSS-Entities turn (depending on the steady Desire intensity) Focus Dynamics of Form-Creators to f-Configurations of Self-Consciousnesses Forms of those protoformal Synthesis Schemes, where this Interest (becoming natural and even ampliative one to the new Scheme) can be fully realized and annihilated (now, not by the previous Scheme signs, but by specific combinations of the last Scheme).

4.0968. In parallel, in Focus Dynamics of Self-Consciousnesses Forms of the previous Synthesis Scheme, amitsirations are organized to *the more ampliative* f-Configurations having already sufficient «volume» of the corresponding Experience, which allows Form-Creators to promote the given Interest also in this Scheme. Though, this Desire is specifically realized and annihilated in completely different psycho-mental conditions and profective circumstances from thereof during simultaneous exhiberation in Self-Consciousnesses Forms of any among other protoformal Schemes. From the outside, any of subterransive parts of multipolarizational spectrum of this multidirectional amitsirational process very often might be perceived as the string of totally incomprehensible and unpredictable (for Form-Creators of Self-Consciousness Form itself, person), illogical and chaotic choices.

4.0969. However it is necessary to understand here that for the very purpose of acquiring opportunity of finishing Synthesis of the powerful essential Interest, person's multipolarizational FD definite part mostly concentrated on its implementation simultaneously amitsirates to Self-Consciousnesses Forms of the other Synthesis Schemes in order to receive the Experience necessary to it (concurrently via FD of the other — *more depliative* — «*personalized*» *Interpretations!*). Besides, this person's more ampliative versions continue to amitsirate in the human Scheme retaining the initial essential Interest in the background of own FD.

4.0970. When necessary stage of finishing Synthesis and successive involvement to the human SFUURMM-Forms of the lacking covarllert attributes complete, Focus Dynamics of those Form-Creators of lluvvumic para, Who are simultaneously amitsirated in protoformal Self-Consciousnesses Forms, transform again (together with the necessary Experience) to f-Configurations of the more ampliative «*personalized*» *Interpretations*. This is the subjective abruptation process — resonational merging of time loops as the result of qualitative liyllusceevation of Focus Dynamics of Form-Creators of some Self-Consciousnesses Forms with FD of the other Self-Consciousnesses Forms by some subterransive signs identical to them.

4.0971. Despite of the fact that SBOALLGSS-Entities cause (in our subjective Conceptions!) a certain element of the obvious randomness and total unpredictability to the processes, states, and phenomena

(FDs of various CCIs) observed by us, nevertheless these Their organizational-guiding influences always carry strictly defined programs of concatenational-convergent amplificational development of FD of Form-Creators (in various Synthesis Schemes and birvularity types at once). With the countless examples of development and advancement of many types of Form-systems of the Worlds and Self-Consciousnesses Forms of different-type Collective Cosmic Intelligences structuring our human STCs and CSRs, one can get quite deep and versatile Conceptions about SBOALLGSS-Entities functional activity, Which svilgs-spherationally convert the amitsiration process of FD of their Form-Creators from more depliative states to increasingly ordered ones. Though we can perceive them as senseless and chaotic.

4.0972. Universal Cosmic «Laws» all variety, caused by the countless versions of creative interactions both between irrkoglictive and eglleroliftive Impulse-Potentials and between Each of Them and the remainder of USIP, fully and simultaneously manifests only in abyssality of the general FD of Macrocosmos HCCI. But in specific manifestation conditions of Focus Dynamics of Form-Creators of this or that «part» of skrruullerrt system, some of «the Laws» are functionally reflected, or some of Their Principles are specifically implemented.

4.0973. For that reason, it is actually impossible to simply enumerate all Their multitude for us — we can investigate only what is reflected at least somehow in the properties and features of primariusively human-like STCs and CSRs groups. The list is given below of only those «Laws,» Which influence considerably (but often unconsciously to us) on formation of Focus Dynamics of Form-Creators of our Perception systems in these exhiberation conditions of our «current» mixtum NUU-VVU-Form-Types.

### **Some particular «Laws» of our Macrocosmos**

AAKK-BRRAA («The Law of equal opportunities for creative self-determination of Form-Creators of all Self-Consciousnesses Forms»)

YYYU-LLU-AYY («The Law of Destruction and Destabilization of informational parameters of Focus Dynamics in general Creative Activity of SSS-Entity Self-Consciousness»)

LAAGGSS-SSNAAL («The Law of absolute Purposefulness of Self-Consciousnesses Forms and CCIs coexistence»)

LLAASS-LLUUSS («The Law of absolute Unity in simultaneous exhiberation of Self-Consciousnesses Forms and CCIs all diversity»)

LLIILL-GLLAA («The Law of absolute Compatibility of different-Qualitative Focuses all variety in slloogrent Creative Dynamics of Macrocosmos Form-Creators»)

LLIIFFT-GGLLOOSST («The Law of ALL-Qualitative manifestation in Focus Dynamics of any among Self-Consciousnesses Forms and CCIs »)

RUYYYUUR-TUUSST («The Law of egleroliftive amplificational Coordination of Focus Dynamics of all Self-Consciousnesses Forms»)

SLOO-GGOLL («The Law of Harmonization and Stabilization of different-Qualitative interactions of Everything in the Whole»)

SSALLASST-UUSST («The Law of profective Birvulyarity — absolute Generality and Integrity of simultaneous exhibition of different-type CCIs and Their Self-Consciousnesses Forms all diversity»)

SSUUYU-NUULLSS («The Law of Holochronness of egleroliftive Coexistence of all Self-Consciousnesses Forms and CCIs types»)

TUURR-MOORR («The Law of absolute equilibration in the Whole of subjective reactions of Form-Creators of Everything»)

UUSS-IISS («The Law of ambigulyar amplificational compensation of Motivations»)

FFLAAYY-TTAARR («The Law of information-energy equilibrium general state retention»)

FFLUUFF-LLIIRR («The Law of absolute stabilization of slloogrent focal Configuration all parts in all variety of skrruullerrt system different-Qualitative Levels»)

4.0974. From each of these Cosmic «Laws» Essence subjective interpretation, one can make the first basic conclusions about some typical features of our (jointly with the other Proto-Forms) Coexistence in these exhibition conditions, namely,

- a) in every moment, each of you qualitatively represents — in Space-Time any «point» — «what they are» only due to the presence and simultaneous activity of those other versions of «you» in slloogrent FD, by whom you subjectively do not realize yourselves at this time and in these particular conditions (the same refers to all other types of such «dual interconnections» as «good» and «evil,» «the highest» and «the lowest,» «the righteous» and «the sinful,» «the true things» and «the false things,» and so on);
- b) any of your «current» realizational intentions simultaneously-multipolarizationally initiates qualitatively other versions of this kind of creative work (right up to the dual ones) in all other «points» of your Stereo-Form's FD, and vice versa: any of your «current» intentions is always just a regular consequence of simultaneous realization of many qualitatively other decisions accomplished by your «personalized» Interpretations in other exhibition conditions (you are able to express yourselves in this or that way only due to simultaneous availability in Stereo-Form's FD of concerted Creative Work of many other Forms of your slloogrent Coexistence, while subterraneously choosing only that among all parallel options, which most of all corresponds to your essential Interest);
- c) all focus interactions with any of your «personalized» Interpretations are accomplished by Form-Creators of your Focus Dynamics notwithstanding the duvuyllerrtness degree with

their respect to f-Configuration of your «current» Self-Consciousness Form, but taking into account only Resonationness degree of the particular Sense of those SFUURMM-Forms, which simultaneously and ambiguously structure Focus Dynamics of both your and the other «personalized» Interpretations; besides, this interaction occurs not by the Resonationness degree between the whole f-Configurations, but in rather localized way, selectively among their separate parts, meaning, among covarllert and geyliturgent SFUURMM-Forms; each of Form-Types of Stereo-Form performs strictly defined function in this UNIFIED organism. The qualitative state of this function depends on the Creative Potential (VLOOOMOOT) peculiar to it, which defines all opportunities for the Self-Consciousness broadening, and also on the Focus of Creative Activity (DYYUUTT-YYYU) stabilization in the given exuberation Level.

4.0975. So, we have found out that absolutely all steadily repeating interconnections between phenomena, processes, and bodies states, which we interpret as «the laws of nature,» and also psychic processes general and specific regularities, which allow to creatively organize the psychic development of intelligent beings, are the consequence of the Creative Activity of the infinite number of versatile Cosmic «Laws» and Their complex-functional Principles simultaneously realizing and directing all realizational Actions of Form-Creators in Plasmic Forces Diapasons all multidimensional not only at the Universe's FD level, but also on the level of the whole Macrocosmos. Some creative realizations of These Cosmic Entities are able to interact more or less with Focus Dynamics of Form-Creators of our NUU-VVU-Form-Types, and some absolutely do not correlate with our SFUURMM-Forms because of the total cruvorsortness of the interconnections activated at that.

4.0976. There are those among realizational Directions of These Cosmic Entities, which functionally provide holochronness of manifestation in the mercavgnation Act of the Processes both on the general eglleroliftive consummatization of all focal-ethereal interconnections (concatenational convergence) and on their irrkoglective singulation (qualitative «splitting,» «detailing,» transgression). Besides, They actively complement each other in any part of the interactions peculiar to Them. For example, ambigulyar primariusive activity of Form-Creators of RESOSCONTIONAL Qualitational Branch (interconnections decondicification, differentiation) and of Form-Creators of SYNTHETIC Amplificational Branch (eglleroliftive convergence, interconnections Synthesis) provides exuberation of slloogrent Focus Dynamics of our Macrocosmos type HCCI (SS-AYIYLG-SS-SS-AYY-SSS) and f-Configurations of YYUYYSLUYY-ALLAYYSS-Entity organized by it. In the other Macrocosmos types this function is provided by other means. Besides, Creators of Amplificational and Qualitational Vectors should not necessarily be involved in the process of its realization — some Macrocosmos types can be formed on the basis of specific internousness of Branches of one of the latter Vectors.

4.0977. Such fundamental property as *Sllloogrentness* is typical to the Universal Cosmic «Laws» and Their Principles creative manifestations transfinite diversity. It is expressed as multivaluedness and multifunctionality of any act of Creative Activity simultaneously accomplished in Energy-Plasma by Creators of all Branches of both Qualitative Vectors. I've decided not to classify this property either under «the Laws,» or under Their Principles, because it is peculiar to Information Itself, hence, to any versions of Its exuberation both in the way of Universal Plasmic-Differentiated Radiation and in the way of any of Macrocosmos Form-structures forming ambiguously all Its Plasmic Forces Diapason. Without this property, any «Law» just could not holochronely-simultaneously realize at once in many different-type Macrocosmos and different-protoformal birvulyarities structuring Them.

4.0978. Any time, having extremely limited opportunity to consider subjectively just some tiniest part of the overall (and joint!) Creative Activity of Form-Creators and Info-Creators, pinpointing from it only those constructive interconnections, which are accessible to our Perception systems by own parameters, we never know and feel, behind particularly considered by us objects or phenomena, all infinite unboundedness of those potential properties and functions, which are supplied by the rest of participants (completely unperceivable to us) of this Creative Activity, who simultaneously with us experience «themselves» in slightly different (or absolutely different!) exiberation conditions.

4.0979. Slloogrentness (abyssality) is not only the universal property of any of Information Particles (in the Information amitsissimal State), but also the indispensable condition of simultaneous exiberation of Form-Creators FD all diversity and formed by them f-Configurations of all Forms of Collective Cosmic Intelligences (in the Macrocosmos types peculiar to Them) in the infinite — both irrkoglective-qualitational and eglleroliftive-amplificational — diversification of the notional Essence structuring Them. Focus Dynamics of each of informational Form-systems (let it be person, Proto-Form, s-Realities, STCs, Conversums, Universums, and so on) is profectively directed both to the maximal implementation of energy-informational Potential peculiar to it in every «local point» of its subterransive exiberation (NNAASSMM and VLOOOMOOT) and to the multipolarizational spreading of Information structuring it to all other Macrocosmos Form-structures (both depliative and ampliative ones as regards the given Synthesis Scheme).

4.0980. For example, literally every SFUURMM-Form of Info-Creators of OLLAKT-DRUOTMM-systems any sub-levels structuring FDs of Form-Creators of the 2–4-dimensional diapason, due to the property of slloogrentness, is *potentially* introduced by all summary properties of own e-Configurations in the more qualitative UU-Conglomerates of FLUU-LUU-complexes, Which form FD of Form-Creators of 4–12-dimensional megadiapason. And vice versa, ampliative ethereal or even focal-ethereal interconnections «projections» are always *potentially* introduced in any of more depliative combinations.

4.0981. For effective detection of this potential presence of Focus Dynamics of some Information types in the other Information types, only sufficient activity is required in the Perception system of the particular universal exiberation Mechanisms. All this is the consequence of the Information slloogrentness property duvuyllerrt implementation in FDs of Form-Creators of any Level: the higher qualitative state (NNAASSMM and VLOOOMOOT) of Focus Dynamics of some Self-Consciousnesses Forms is produced due to eglleroliftive selective sublimation by Form-Creators of covarllert Experience of the more depliative (to this Synthesis Scheme) Forms. Though, exiberation of every depliative FD (and f-Configuration) becomes possible due to informational adsorption of those interconnections out of protoformal Directions of Synthesis, which are not peculiar to the more qualitative Levels of the birvulyarity given type.

4.0982. The Slloogrentness property availability for any Information combinations (let it be Focus Dynamics, focal or ethereal Configuration) allows any subjective Observer — at sufficient activity of the corresponding Self-Consciousness Mechanisms — to detect and successively trace, by focal-ethereal interconnections perceived by Them, many other realizational versions of profective Reasons and their Consequences defined by «the Laws,» which reflect in this or that particular way

in Configuration of any examined combinations via qualitatively completely different informational «projections» simultaneously structuring the other exhibition Levels of Self-Consciousnesses Forms.

4.0983. Along with the *Sllougrentness* property of Information, all multitude of Its other universal properties also inevitably reflects, and we can really trace just some of them, for example, such as *Multipolarization, Diffuzgentness, Duvuyllerrtness, and Holochronness*. I repeat, these Universal properties represent neither separate Cosmic «Laws,» nor Their Principles, but reflect just some of the general features of interaction between SSS-fragments of Information Itself, due to presence of which all infinite diversity of internous inter-skunkktional interconnections peculiar to It in amitsissimal (primogenitive + consummative) State is provided.

4.0984. Let me remind you, the skunkktions (and microstrs structuring them) represent the general Mechanism of informational interaction between Information particles. Due to their availability, each of reconverstive Configurations of SSS-fragments has an opportunity to interact holochronely with all other particles. You can imagine their most rough and relative Form-image in the way of the countless number of informational «clouds» wide-distributed to all internous Infinity of particular interconnections *between absolutely all* skunkktions. In turn, each of these «clouds» is structured with the same countless variety of own «clouds» — microstrs, which provide qualitative stability of «internal» state of every r-Configuration (PCQ attribute). Thus, *every* skunkktion is functionally connected by own «informational field» *with any one of the other* Information skunkktions.

4.0985. One should not forget about the fact that the State «initially» peculiar to Information is the primogenitive State, which, due to own internous features, is immediately exposed from USIP side to the mercavgnation Act with holochronely generation (inside of It!) of united Qualitational-Amplificational Process ending with the confective State. As a result of manifestation in Information of heterogeneous Focuses (and Form-Creators FD) transfinite multitude, the same infinite multitude of original ethereal «projections» (Info-Creators) has been generated from skunkktions of every reconverstive Configuration. Each of these «projections,» by their Essence, represent possible version of its liyllusceve interaction with some other skunkktion.

4.0986. It turns out that, speaking about Information, we should mean *three* different-Qualitative, holochronely manifested, ambigulyar States by this Notion: primogenitive, consummative, and confective Ones. Each of Them is provided with the other two. It is impossible to consider subjectively any skunkktion (as well as different-Qualitative — allomoglof and ellitimoglofic — states of microstrs peculiar to it!) in isolation from this general State, which, in fact, is Information Itself. A deep Conception of all this united, holochrone-simultaneous «structure» (Information) is crucial for your more profective Understanding of «the Laws» by Which Macrocosmos Exists.

4.0987. All «Laws» and Principles initiated subterraneously in Energy-Plasma during many creative interactions between various Impulse-Potentials, in every particular case of Energy-Plasma holochrone-simultaneous exhibition, exclusively in their own way reflect all these SSS-properties in Focus Dynamics of Form-Creators and in subjective Perception systems of various Self-Consciousnesses Forms and CCIs. The «Laws» and Principles «specialize» mostly on some of

these SSS-properties, but keep necessary functional interconnections also with the other properties signs. That is, all «Laws» are properties of all possible combinations and manifestations of «internal» features of Information Itself sort of differently interpreted by us and logically adapted to our Perception systems patterns, through which all infinite variety of Forms of exuberation of different-type Macrocosmos is functionally combined.

4.0988. General Focus Dynamics of Form-Creators of each of these Macrocosmos is realized by sort of own personal «Laws,» Which somehow complement and develop realizational features of the corresponding «Laws» peculiar to the other Macrocosmos (meaning, the other interactions between Impulse-Potentials typical to Them). In some manifestations, sort of «the same» «Laws» and Principles organizing different types of Macrocosmos can coincide more or less by own realizational functions, and in the other manifestation they can differ dramatically, because availability of the huge qualitative difference in Form-structures (Self-Consciousnesses Forms) forming these or those Macrocosmos types strongly influences on these discrepancies.

4.0989. As regards your inevitably appearing impressions of the fact that some of «the Laws» and Principles functionally *sort of* duplicate Each Other, this is just a consequence of extremely confined abilities of Form-Creators of your subjective Perception systems, which are still just unable to grasp, analyze, and cognize all depth of the Sense reflected by Them, and also to trace consciously all available features and differences in Their functionality. In own simultaneous manifestation in various exuberation conditions, Each «Law» profectively, by own functional Essence, is absolutely subterransive and *does not duplicate*, but to the extent necessary supplements («tints» some abilities, stimulates or hampers FD effect in the definite manifestation Vector) universal realizational functions of Each of the remaining «Laws.»

4.0990. Also, one should not forget that absolutely all Focuses (Form-Creators) «projections» and eglleroliftive Dynamics consuyetally generated by Them (or rather, «between Them»), which created the phenomenon of subjective Existence of Macrocosmos Form-Creators, are just some part (subjectively unbalanced, temporarily dissonational exactly in these exuberation conditions) of Information Itself specifically reflecting the potential Essence of qualitative transformations consummatively already accomplished «inside» of It (during mercavgnation Act). Examined by us Universal «Laws» based on available above mentioned Information properties, reflect only those particular features via the Dynamics of our Macrocosmos Focuses, which have been consuyetally produced sort of «inside» of Information Itself during direct covarllert interaction of irrkoglictive and eglleroliftive Impulse-Potentials.

4.0991. In different IP-combinations, realizational Essence and «the Laws» functions also dramatically change, although the fundamental base of Their manifestation in Macrocosmos any type, which rests on the above mentioned internous properties of Information Itself, does not modify in any way. These Information properties include Slloogrentness, Multipolarization, Diffuzgentness, Duvuyllerrtness, and Holochronness. It should be added also that *functional inter-complementarity* manifested along with the uniqueness peculiar to every «Law» — that is the most typical feature of Their manifestation in any of conditions of consummative interaction.

4.0992. Strong inertial realization Mechanism of Focus Dynamics of our subjective Perception systems hardly limited by abilities and narrow-specific properties of bio-Creators of our biological organism allows us qualitatively to differ, record, and consciously trace just the most rough types of energy-informational (force) interactions (electromagnetism, gravity, radiation, intranuclear processes, and others), which represent just the most «external» Sphere of universal Creative Work of These Cosmic Entities realized via FD of all multitude of Form-Creators of the given exhibition diapason.

4.0993. In each of these Levels of own synthetic manifestation, Form-Creators simultaneously realizing via various Synthesis Schemes, Development directions, and birvulyarity types, quite subjectively interpret and subterraneously organize the general abyssal manifestation dynamics of both Each of the Cosmic «Laws» and the whole spectrum of the Principles generating Them. This is related to the fact that in own realizational Creative Work, Form-Creators of each of Self-Consciousnesses Forms and CCIs are able to interact the most actively only with those among countless informational OO-UU-attributes (sub-Aspects, Aspects), which being consistent to the most degree with synthetic structure of Their own Configurations can adequately reflect via the content of Their own FDs.

4.0994. Virtually, all Cosmic «Laws» and Their Principles profectively reflect by Themselves absolutely all slloogrentness of Focus Dynamics of Form-Creators of Macrocosmos all types, which is simultaneously manifested via the whole of skrruullerrt system and subjectively realized in every conditional exhibition «point» of Energy-Plasma consummative State generated by Form-Creators. In own gabitual manifestation, perhaps, exactly the «Laws» and Principles represent that absolute Truth, which under any circumstances does not change own functionality programmed in a complex way with respect to Focus Dynamics of Form-Creators of every Self-Consciousness Form. But «the Laws» Themselves (due to availability of the dramatic qualitative discrepancies in the Perception systems) are interpreted rather differently and specifically by Self-Consciousnesses Forms of not only every Proto-Form, but of every manifestation Level of Plasmic Forces Diapasons.

4.0995. Taking into account narrow-specificity of FD of Form-Creators of Self-Consciousnesses Forms produced by various Synthesis Schemes and in various birvulyarity types, one should note that, in conditions of STCs and collective subjective Realities' (CSRs) different-type groups, Forms of manifestation of subterraneous Creative Work of Each of abyssal Cosmic «Laws» and Their Principles have own, pronounced specifics typical only to the given particular conditions of the PFD total exhibition. This properties subterraneousness of Their «local» manifestation depends in large part on the individual features of Focus Dynamics of Form-Creators of those Form-systems of the Worlds, which form own STCs and CSRs group in exactly this particular way (and FD abilities, in turn, are provided by qualitative features of the Perception systems of those Self-Consciousnesses Forms, which construct the given STCs or CSRs group!).

4.0996. For example, mixtum NUU-VVU-Form-Types creating *human* s-Realities with own Focus Dynamics on the basis of two-invaderental lluuuvvumic Synthesis Scheme (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) perceive and interpret diverse manifestation versions of the Cosmic «Laws» Creative Work completely different from mixtum Self-Consciousnesses Forms with the other two-invaderental Synthesis Scheme (suppose, ALL-Integrity + ALL-Aspiration), which form their own

CSRs in birvulyarity type peculiar to them. It should also be noted that there is no comparable (due to amplificational discrepancies) difference in the Perception systems functioning qualitative state and in «the Laws» Creative Activity interpretations abilities among Self-Consciousnesses Forms formed on the basis of different development Branches<sup>17</sup>.

**4.0997.** Thus, slloogrentness of holochrone functioning of all «Laws» and Their Principles simultaneously manifests in FD of Form-Creators of some type of Macrocosmos (and furthermore, in many types!) in extremely diversified way. In the structure of focal-ethereal interconnections of skrruullerrt system, it reflects heterogeneous features of all possible synthetic processes accomplished with the participation of not only Form-Creators of SYNTHETIC development Branch, but also Creators of propriusal (non-synthetic) processes various types typical to the other Branches of different Vectors (both Amplificational and Qualitational ones). Therefore, among Cosmic «Laws» all abyssal variety, we still can logically recognize and examine only Those Ones among all infinite number of Their simultaneous versions, Which maximally provide implementation of Focus Dynamics of Form-Creators of synthetic form-making Processes accomplished with the active participation of the Perception systems of our mixtum NUU-VVU-Form-Types.

**4.0998.** However you should not forget about the fact that profectively, every Creative Activity «point» of Space-Time of both the Tertiary Illusion and other Its varieties — regardless of our subjective Perception of the properties and features of the surrounding us reality — is potentially (abyssally) structured with Focus Dynamics of Creators of Self-Consciousnesses Forms subterraneously representing all totality of the remaining Forms of Existence in this diapason dimensions, which are typical to all 24 Branches of Development (of both Amplificational and Qualitational Vectors). Although influence of their FD on our choices qualitative state remains very low (background), nevertheless, in the event of even very weak resonational activity between separate particles of their and your UU-conglomerates structuring SFUURMM-Forms of your FD, it may have rather strong motivational impact with time on birvulyart Vectorness of your subterransive multipolarizational amitsirations.

**4.0999.** Exactly in this way, via potential space-time availability of Creative Activity of representatives of the other development Branches (more or less differing from our FD), diverse manifestation versions of the Cosmic «Laws» are partially implemented and even stabilized in subjective Realities formed by us acquiring shapes of rare, totally unclear to us and unexplained (noumenal) phenomena, paradoxes, «things — in — themselves,» and others in our Perception systems. This is due to internous Nature of holochrone Act of forced consummatization of Information primogenitive State in Macrocosmos all types at once via infinite number of all possible Cosmic «Laws,» which have formed (via Diffuzgentness, Duvuyllerrtness, Slloogrentness, and Multipolarization SSS-properties) skrruullerrt system *common to all these different-type Macrocosmos.*

**4.1000.** It is not «the Laws,» which are functionally «attached» to our Perception systems and to our Existence type, but we, depending on our subterransive abilities and opportunities, subjectively interpret these or those steady (regular) manifestations and gabitual reactions of the surrounding us

<sup>17</sup> For example, in different conditions of SYNTHETIC and ACCUMULATIVE Amplificational Branches or in different conditions of RESOSCONTIONAL and PRIMENTIVE Qualitational Branches.

reality as some activity of «the Laws,» while pointing out and analyzing only those Their countless signs in own Self-Consciousness, which are more or less accessible to Form-Creators of our own Perception systems (or to measurement instruments constructed and functionally programmed on the basis of *the same our* subjective Conceptions about properties and features of the surrounding us World assumed *by us*). Though, profectively, there are no any Cosmic «Laws» peculiar exclusively to some particular Macrocosmos type, because Impulse-Potentials initiating Them, while holochronely interacting with Each Other in the general Process of consummatization and following transmittation, diffuzgently-multipolarizationally produce complex-functional FDs of much more universal INTER-Microcosmical Universal Entities structured globally by all multitude of the Cosmic «Laws» of all possible Macrocosmos types.

**4.1001.** Therefore, you should understand without delay that the versions of «Universal Laws» considered by us in this Section, which organize and determine all spectrum of simultaneous exhibition of SUPRA-Universal Form-Creators FDs, are not independent and self-sufficient SLOGSS-LLOGS-Entities with respect to the Creative Potential of Focus Dynamics of even more developed Cosmic Entities (YYYU-II-YYYU), but just a part of Their functional abyssality accessible to this or that degree to unpackings of Form-Creators of our Perception systems. One can say that in conditions of Form-systems of manifestation of Focus Dynamics of our «current» depliative NUU-VVU-Form-Types, these «Laws» represent «projections» of some of transgressive diversifications and regular prolongation of simultaneous realization of the Universal Principles all multitude in FD of Form-Creators of our Universe.

**4.1002.** That is why we will mainly concentrate just on what is the most clear to you, the most available and logically explicable «right now.» We will not stop at characteristics of Those «Laws,» which specific Creativity penetrating all qualitative Levels of Plasmic Forces Diapason still in no way can reflect through FD of Form-Creators of your Self-Consciousness and perceptibly influence on the dynamics of the life creative work peculiar to you. As mentioned before, These — more ampliative — properties of «the Laws» regulate Cosmic Creativity of Cosmic Entities, Which are more self-conscious than we are, and Which organize force interconnections of Channels, Rays, Flows, Sub-Sectors, and Sectors of Universal DDIUYI- Entity Self-Consciousness.

**4.1003.** It is clear that in the structures of Self-Consciousness of Universal Entity, all Creative Dynamics of Cosmic «Laws» is perceived absolutely differently, than in any among multi-dimensional Levels of Your Self-Perception in the capacity of SLAA-SS-MII- and SLOO-SS-SNAA-Creators. Hence, any Information about Them does not make any sense to you now. More than that, it is practically impossible to differentiate to any significant extent not only Spheres of creative interaction of various «Laws,» but even «zones of qualitative reflection» of Their separate Principles. Each of the Principles, in peculiar only to It functional manifestation Sphere of own «Law,» provides with own Creative Work only some part of conditions required for steady execution of the other Principles all multitude in each of Form-systems. These Principles, in turn, also create the definite energy-informational basis for the given «Law» specific functions implementation.

**4.1004.** Therefore, you should not be surprised that many details examined further will have some signs of similarity or likeness despite of the fact they are applied to different Macrocosmos functions

and have completely different energy-informational basis in own habitual creative manifestation. You will be able to realize and differentiate more or less clearly all these nuances only after the Conceptions structuring now your FD are able to persistently transmute into Self-Consciousness SFUURMM-Forms of much more ampliative among your «future» NUU-VVU-Form-Types.

**4.1005.** And one final remark, which is very important for your correct interpretation and understanding of any «Law» and Principle. To explain this specifically is very difficult, and yet, you should try to get to the real Root and fully understand (to intuit) the Sense of what is all about. By an expression «I am» (conditional notion) often used further I mean that a potential (for VLOOMOOT of the given NNAASSMM) *ampliative* state of the Form-Creators' Focus Dynamics of the Self-Consciousness Form currently focused by you, which is able to manifest creatively in this or that way, method, action in the particular exuberation conditions of the given Form-system of the Worlds. The point is that qualitative reflection of the reality that surrounds you (different versions of «material» — for you! — the Universe) has no way of manifesting in your Focus Dynamics (and the Perception system), to you realize «yourselves» particularly through some subjective Conceptions already peculiar to you potentially (in all spectrum of holochrone multipolarization of your FD).

**4.1006.** As soon as «the act» of the specific self-definition (subjective statement, you say, «now «I am» like this, and no other Interests are more preferable to me, than this type of realization...») occurs in your Perception system (due to subterraneous TEC-unpackings), then dissipative part of the Universe earlier unavailable to your observation transforms to decoherent part of personalistic World «surrounding» you (s-Reality subterraneously interpreted by you). And you (as Self-Consciousness Form) acquire in this way real space-time parameters and «locally» expressed qualitative features of one of the countless versions of simultaneous exuberation of Universal Focus of Self-Consciousness (NUU-VVU-version of USCF).

**4.1007.** «You» (as such) and even the Universe Itself sort of do not exist at all in any Space-Time «local point» to the very «final» moment of your qualitative self-definition («I am» exactly «this,» but not «that»): all qualitative Essence, amplificational Sense, and realizational significance of the Existence «instant» accomplished by you initiates subterraneously in your subjective Perception system in every shortest specifically subsequent act of your regular awareness of «yourselves in some quality» («Who am I at this moment?»), in some particular creative «status» and «realizational hypostasis.»

**4.1008.** Only on the basis of the choice made by you at every moment, you become subjectively self-conscious «structural unit» (qualitative constituent, Self-Consciousness Form) of some of conditional (dissipative, not revealed for you now) «parts» of slloogrent f-Configuration of the Universe. It can be said that the new version of the Universe subterraneously surrounding you is always sort of «newly produced» (in FD of your Self-Consciousness) at every specific instant (quantum effect) of your regular qualitative self-definition in «the current» choice.

**4.1009.** By its Essence, the given «locally» exuberated NUU-VVU-Form-Type (f-Configuration of Self-Consciousness Form) *de facto* represents — in s-Reality, which is being svilgs-spherationally «created» by you — definite realizational requirements of That part of your «I am» abyssal constituent,

Which you subjectively determine as Universal Entity. Hence, instead of the «I am» expression, one can further use the notion of «Self-Consciousness Form» as USCF constituent part presented narrow-specifically by way of exuberation «local point» in the given Space-Time conditions of some particular among countless number of simultaneous Interests of Universal Entity.

4.1010. In other words, by the term «I am» I mean ampliative set of Conceptions of collective Subconsciousness of a person (typically conscious of themselves), which most accurately define this person subjective Perception of «themselves» and the deepest Essence of their own «entitative *be-ing*» functionally confined and qualitatively reduced in FD by the high tensorness of the more depliative SFUURMM-Forms of collective unconsciousness and personalized Self-Consciousness. Why exactly the ampliative (for birvularity given type ) part of FD is presented via the «I am» state? Because person depliative Conceptions about «themselves» do not allow them (through very confined functions of Form-Creators of their Self-Consciousness Form) to reflect deeply on the Essence of own Existence and to go beyond the limits of rough-material (egoistic) necessities of the mixtum Form visually perceived by them.

4.1011. Focus Dynamics of Form-Creators of every Self-Consciousness Form is based on subterransive, peculiar only to it, subjective Conceptions and notions about own «*be-ing*,» which is, in principle, the determining moment in choosing creative realization ways and qualitative levels by every personality: if SFUURMM-Forms providing individual's self-perception qualitative state do not allow them to go beyond the limits of their biological existence, only depliative SVUULL-VVU-conglomerates of the lowest Form-Matter Levels will be able to initiate all their creative work; but if FD of Form-Creators of their Self-Consciousness allow them to determine own «*be-ing*» from the standpoint of the more universal Conceptions, their creative work will be able to focus in the more qualitative Levels of Universal PFDs.

## **Chapter 2. Some of the Cosmic «Laws» and Their Principles specification, Which provide universal organization of Focus Dynamics of Form-Creators in lluuvvumic birvularity type**

4.1012. The following SLLOOGSS-LLOOGS- and SLLOOYYS-SLLOO-Entities could be attributed to the extremely limited, by realizational opportunities of our own Perception systems, «functional group» of Cosmic «Laws» and some of Their Principles, Which provide the Mechanism of simultaneous exuberation of Focus Dynamics of Form-Creators in all Form-systems of the given Level structuring lluuvvumic birvularity type. The realizational Essence of These Entities functionally very closely supplements and deepens Each of Them.

«The Law of absolute Unity in simultaneous exuberation of Self-Consciousnesses Forms and CCIs all diversity»

**LLAASS-LLUUS**

**«The Law» realizational Essence**

4.1013. Since functionally all systems of subjective Perception of NUU-VVU-Form-Types focused by us are provided with different-Qualitative Focus Dynamics of Form-Creators of the countless number of diffuzgent to each other different-protoformal Self-Consciousnesses Forms structuring various CCIs types (beginning with chromosomes and DNAs, body and brain cells organelles SCFs and finishing with SCFs of each of systems and organs), we perceive «ourselves» and the reality surrounding us discretely from each other classifying this subjective disunity and separateness by many subterraneous signs logically determined by us.

4.1014. Without such space-time differentiation, numerous bio-Creators of our organism just could not be able to manage with that infinite and diverse, by its own slloogrent Essence, Information *Flow*, which they continuously «unpack» not only to supply their own functions, but also to produce general Focus Dynamics of mixtum NUU-VVU-Form-Type.

4.1015. Focal Configuration (NNAASSMM) of every Self-Consciousness Form is intended for active manipulation with just strictly defined part of the general Potential of dissipative Energy realizing in Focus Dynamics of Form-Creators of this Form via the particular qualitative parameters of decoherent Energy, which is necessary for creative manifestation (VLOOMOOT) peculiar to Them. The parameters of Focus Dynamics of Form-Creators of all different-protoformal Self-Consciousnesses Forms structuring general SF specifically manifest in Space-Time via strictly corresponding to them bio-chemical, mechanical (physical), and psycho-mental parameters of creative realizations.

4.1016. In Perception systems of Self-Consciousnesses Forms all multitude, each of these qualitative parameters of skrruullerrtness produce (*in every* FD multipolarization spectrum!) own subterraneous «picture» of subjective dissonational distance with respect to qualitative parameters of Form-Creators of all *other* CCIs, what, in fact, provides implementation of subjective process of the overall differentiation of slloogrent f-Configuration on the infinite variety of Self-Consciousnesses Forms, which have been differently exuberated and differently *Spatially* correlated to each other. Their Form-Creators (by common «projections» of Impulse Rings functioning of own SCFs) jointly generate subjective Illusion in our Perception systems (from general informational Flow) of that differentiated Macrocosmos state, which we interpret as «ourselves» and «the reality surrounding us.»

4.1017. The more ampliative FD of Form-Creators gets, the less the Illusion of disunity and discreteness of the given Self-Consciousness Form shows with all other Self-Consciousnesses

Forms in its Perception system, since dissonational distances between all these Focuses, due to the higher covarllertization of focal-ethereal interconnections, are annihilated and «reduced,» which allows Form-Creators, during Their realizational «unpackings,» to activate the greater Potential of decoherent Energy. With FD ampliativeness rising (meaning, with birvulyart entropy decreasing), SFUURMM-Forms become more deep and universal, which structure Focus Dynamics of Form-Creators of different-protoformal SCFs, what raises their cognition level of own ambigulyar Unity and profective integrity.

**4.1018.** Interconnections structuring Focus Dynamics of all infinite multitude of Form-Creators of the more depliative exhiberation Levels are the qualitative basis (constituent part) of Focus Dynamics of Form-Creators of each of the more ampliative Levels right up to absolutely harmonized Creativity Ranges of Macrocosmos HCCI. For example, FDs of Form-Creators of all CCIs of Subovertones of Fields-Consciousnesses structure FDs of all CCIs of Overtones of Fields-Consciousnesses, Which, in turn, structure FD of all CCIs of Plan-Overtones of Fields-Consciousnesses, and Those Ones — FDs of all CCIs of Cosmic Plan-Levels, Which are the constituent part of FDs of all CCIs of Intergalactic Complex-Plans, and so on.

**4.1019.** Subreptive (illusory) effect of multiplicity of All Self-Consciousnesses Forms appears in our (and other) Perception systems due to simultaneous multipolarization property manifestation of any Focus Dynamics by heterogeneous Vectors of its svilgs-spherational (eglleroliftive) informational conversions (amitsirations) really available for the given Space-Time abyssal «point.» The fact is that any person is just unable to trace FD multipolarization through all diversity of «personalized» Interpretations simultaneously manifested in the multitude of different-Qualitative development scenarios, whereas, due to person's FD multipolarization by Vectors of svilgs-spherational amitsirations, «the surrounding reality» Illusion appearance effect is created in his/her Perception system.

**4.1020.** The more depliative FD is, the more «quantity» (informational «volume») of impersept to each other (tensor) ethereal interconnections structure SFUURMM-Forms resonating on it, and therefore the more «number» of heterogeneous f-Configurations is needed to balance qualitative differences between all of them via simultaneous exhiberation in the given conditional Space-Time «point» of Self-Consciousnesses Forms duvuyllerrtly differing from each other (meaning, *the less qualitative Form-systems of the Worlds are structured with FD of the greater number of different-Qualitative CCIs and Their Self-Consciousnesses Forms*).

**4.1021.** As the result of such FD holochrone multipolarization, focal construction of this conditional «point» subjectively considered by us is consuyetally structured by as very similar (homologic), as strongly differing (particular) versions of this slloogrent f-Configuration, which, in the general spheroidal spectrum of different-Qualitative Vectors (simultaneous realization of Focus Dynamics of the given Self-Consciousness Form), convert into various diffuzgent Synthesis Schemes and transform in this way into FD of Form-Creators of different birvulyarity types. Thus, SFUURMM-Forms of some Focus Dynamics initiate countless number of different-protoformal Self-Consciousnesses Forms to exhiberation in «various» conditions of subjectively the same Space-Time «point» (due to Information Multipolarization property).

4.1022. In consequence of simultaneous realization of all their Focus Dynamics, this conditional «point» of the general multi-dimensional exuberation transfigures to the infinite multitude of different-Qualitative parameters of dissonational distances of the single-Scheme and different-Scheme birvulyarity types, which psycho-mentally form corresponding Space versions between f-Configurations of Self-Consciousnesses Forms particular to varying degrees. And specific features of functioning of Form-Creators of every Perception system produce subterraneous effect of Time in FD of every of these particular Self-Consciousnesses Forms.

4.1023. Thus, abyssal «construction» of this conditional «point» of immensus respectuality, while being under the Creative Activity «pressure» of equally slloogrent Focus Dynamics and being reflected through diverse Perception systems generated from particular f-Configurations, subjectively (only for the Observer!) and sort of spheroidally «stretches» (is multipolarizationally «unpacked» by more depliative FDs) by the way of many diffuzgent Space types narrow-specifically structured with corresponding diffuzgent Time versions and simultaneously diversifies by the way of the infinite multitude of different-Qualitative and heterogeneous Form-structures of Space-Time Continuums (subjectively sort of «divided» between each other in consequence of differences in both Space and Time subterraneous parameters).

4.1024. When the infinite multitude of Focus Dynamics realizes, which have been initiated in the whole variety of Rezomirals of manifestation, all infinite variety of different-protoformal STCs and CSRs groups are produced from the simultaneous act of focal «stretching» (subjective «unpackings» in every FD) of similar exuberation «points.» These groups are ambiguously formed by Focus Dynamics of different-birvulyart Self-Consciousnesses Forms and structured with the same their f-Configurations. Collectively exuberating, they create all conditions for generation of the subreptive psycho-mental effect in Self-Consciousness bioscreens of various Perception systems, which is subjectively interpreted by their Form-Creators as «the surrounding reality.»

4.1025. Since all dissonational distances between these exuberation «points» can qualitatively infinitely differ from each other with their realizational parameters — along with abilities of each of their subjective Perception systems (from geyliturgentness and covallertness to absolute cruvursorrtness) — it turns out that all infinite diffuzgent variety of decipiense *subjective «points»* of different-Qualitative exuberation of FD of Form-Creators (subjective interpretation versions of Space-Time universal properties) is «born» (under the influence of UPDR Act) basically from a single gabitual «point» of immensus respectuality (FD singular activity) due to holochrone mercavgnational initiation of slloogrent Focus Dynamics in SSS-Entity Self-Consciousness. These *subjective «points»* at once consuyetally convert (in FD of the most amplificational Observer) to united and integral skrruullerrt system of Macrocosmos.

4.1026. We have the real opportunity to observe and analyze only This Act eglleroliftive directivity (reflecting in Perception systems of our Self-Consciousnesses Forms through inertial Process of concatenational-convergent consummatization). Its intention would be implementation of the amplificational Mechanism of humanational «assemblage» of all infinite multitude of different-Qualitative interconnections more depliative versions in Focus Dynamics of each of NUU-VVU-Form-Types, in order to svilgs-spherationally combine them to SFUURMM-Forms increasingly

more covallert among each other (more universal by ethereal construction) and to realize them via qualitatively corresponding f-Configurations.

4.1027. Practically, this Process in Self-Consciousness of each of us begins from humanation of content of Focus Dynamics of NUU-VVU-Self-Consciousnesses Forms closest to us by qualitative state (first of all — homogeneous Stereo-Types of our «personalized» Interpretations) — people most plain and pleasant to us. Concurrently, as the more covallert interconnections being established, clear and close to us Conceptions of people from the other races and peoples and also FD of various Proto-Forms: animals, vegetables, minerals, and natural phenomena — increasingly join in this synthetic process.

4.1028. The aim of this amplificational Process is successive and increasingly resonational overlapping (in subterransive Focus Dynamics of every Self-Consciousness Form) of qualitatively multipolarized (by different «areas» of the general spectrum of spheroidal-simultaneous exhiberion of slloogrent Focus Dynamics) homogeneous and particular (including different-protoformal!) focal-ethereal interconnections to the more universal (for this birvularity type) f-Configuration of Self-Consciousness Form, which will allow its Form-Creators to reach the state of confluence (due to the conscious amitsiration) in each of their manifestation resopasons. This allows to realize high-ampliative psycho-mental «merge» in FD of Form-Creators of every Self-Consciousness Form with all remaining realizational manifestations of Focus Dynamics of various Proto-Forms structuring ambigularly the given exhiberion resopason. It should be noted that every people's act of such subterransive confluence initiates the revitalization process in person's Self-Consciousness — unconscious amitsiration to the more ampliative NUU-VVU-Self-Consciousness Form.

4.1029. As this subjective Process gets deeper, the most diffuzgent Self-Consciousnesses Forms of various birvularity types annihilating svilgs-spherationally the most impersept among interconnections peculiar to them come to the more and more high qualitative conformity with each other and produce common to them conglomerates of transitional (buffer) subterransive Conceptions in Creativity Ranges of own Collective Cosmic Intelligences. This leads to successive «merge» (resonational consolidation) of Focus Dynamics of Form-Creators of many birvularity varieties and to formation (on the basis of their joint psycho-mental creative work) of Self-Consciousnesses Forms of increasingly universal and complex-synthesized birvularity types in the more ampliative exhiberion Levels.

4.1030. For example, FD of NUU-VVU-Form-Types mixtum analogs activating simultaneously and revitalizing (during tensor interconnections realization) in many different-protoformal development Directions constitute the qualitative synthetic basis not only for lluvvumic birvularity type, but also for subterransive formation (by the other Synthesis Schemes) of FD of Form-Creators of the other birvularity types. Entering the more and more covallert interconnections with them, FDs of mixtum analogs amitsirate to diverse, by protoformal directivity, simplisparentive (and other transparentive), and also dimidiomittense and translucense NUU-VVU-Form-Types analogs. In this way, «The Law of profective Unity of the whole multiplicity of Self-Consciousnesses Forms and CCIs» is implemented in the practice of our Existence in these Space-Time conditions.

# The Principles

(adapted to specific features of NUU-VVU-Form-Types Self-Consciousness organizing this type of human STCs and CSRs)

## A) The PLOULL-FOLLG Principle

### «I-am is subjective creative reflection of Everything in the Whole»

4.1031. This Principle provides Form-Creators of all Self-Consciousnesses Forms and CCIs types with virtually limitless abilities for subjective creative Self-Reflection (Self-Interpretation, qualitative sense «reprojection») in any part of sllougent Focus Dynamics of Macrocosmos HCCI via any among simplectic interactions between each other simultaneously evinced by Them in any of subjective Levels of its consummative exuberation. Availability of the function of «the essential Interest decoherent reprojection» on the part of Form-Creators creates — in subterransive Perception systems of Self-Consciousnesses Forms focused by Them — subreptive effect of subjective localization (limited «presence») in some definite part inside of abyssal Creation, where their creative Interest is realized in this or that way.

4.1032. Fallacy of interpretation and understanding of this Principle lies in the statement, which suggests that Form-Creators (Universal Focuses Self-Consciousness — the only active carriers of Macrocosmos HCCI consummative Interests) of the Highest Levels of the Universe or Macrocosmos Self-Consciousness can adequately manifest via narrow-specific f-Configuration of literally *any* Self-Consciousness Form structuring a particular s-Reality type. The point is that USCF creative abilities totally conditioned by VLOOOMOOT subterransive parameters are, in every specific case, extremely sensitive to amplificationness of f-Configuration «locally» focused by Them, which provides all realizational Potential of formed with its help subjective Perception system of the given Self-Consciousness Form.

4.1033. Let me remind you that every Self-Consciousness Form or CCI, in Space-Time conditions peculiar to Them, represent the particular set of USCF-«projections» (heterogeneous Form-Creators of all possible birvulyarity types) functionally adapted to the given conditions of subjective realization of some of the countless aspects of a single creative Interest. A clear example here is all variety of such USCF-Interests simultaneous realization via Focus Dynamics of all multitude of different-protoformal Self-Consciousnesses Forms, which we primitively interpret as «Sympathy» (from rough sexual to the most ampliative, friendly, and spiritual relations; from religion to politics), «Antipathy» (from defensive initiative to powerful psycho-mental pressure, destruction, violence, aggression; from family quarrels to global wars), and so on.

4.1034. The more Focus Dynamics of Self-Consciousness Form is structured with imperceptible interconnections, the less it is stable (more labile) in own qualitative exuberation, and the more limited abilities provide its Perception system for *adequate* realization of some Interests of the USCF-

«projections» from the more amplificational Levels (via Conceptions about «Themselves» peculiar to *Them* and reality formed by *Them*). Therefore, anyone is gravely mistaken, who thinks that Some speculative «God» and «Creator of Everything» (as Macrocosmos HCCI depliative analog) is able to *amplissimno* show Itself literally through *any* Proto-Form: any among Self-Consciousnesses Forms surrounding us (as well as our own Form) represents, to each of us, just a potential opportunity for making subjective choice between more depliative and more ampliative realization types of the «current» Interests peculiar to us.

4.1035. Besides that, this Principle in manifestations peculiar to it interacts actively with this «Law's» another Principle — MMAAG-SS-MMAAA («I-am is subjective creative reflection of the Sll oogrentness property as simultaneous potential Presence of Everything in the Whole»). For example, since the childbirth, many potential options of qualitative continuation of subjective Existence are opened in front of Form-Creators of this child's spheroidally multipolarized Focus Dynamics at every instance in a wide variety of skrruullerrt system «sections» with opportunities of the most diverse choices and scenarios of further development, where Life of this child is simultaneously realized in the most diverse — *already existing!* — Directions and birvularity types.

## B) The TOURRG-TTOORT Principle

### **«I-am is subjective reflection of the infinite multitude of profective «projections» of Everything in the Whole»**

4.1036. This Principle determines very narrow limits of realizational abilities of every Self-Consciousness Form, which strongly depend on Scheme of inter-Qualitative Synthesis implemented by this Form and on its CCI birvularity. The reason for this is that literally every f-Configuration, at the moment of own exiberation in the corresponding Space-Time conditions, represent subterransive realization Form of just only one among countless variety of USCF-«projections» initiated in the given abyssal «point» by unique opportunity of the general USCF-Dynamics of Macrocosmos HCCI to effectively implement some part of gabitual Interests peculiar to It (to USCF).

4.1037. For example, among mixtum NUU-VVU-Form-Types of lluuuvvumic birvularity, realization of various aspects of such gabitual Interest as «Sympathy» occurs totally differently than it's achieved by the representatives of the other different-protoformal two-invaderental Synthesis Schemes. That profective circumstance alone (a definite set of interconnections of many USCF-«projections») imposes particular restrictions on the Conceptions of most people (including not only material, but also moral and ethical aspects of realizations) in their making choices of possible (exactly for people!) forms, ways, and methods of realizing the given Interest.

4.1038. In each individual's choices context, realizational opportunities spectrum narrows even more: depending on the person's development general level, on his/her FD particular protoformal directivity, on perception depth of his/her circumstances collateral to the given Interest implementation, and so on, every «personalized» Interpretation uses just those SFUURMM-Forms

kleksed on the VVU-Factor, which resonate with his/her «current» Interests to the most degree. Consequently, what reflects very specifically in every subjective choice is just a relatively small part of the countless number of «projections» of some gabitual Interest, which are simultaneously developed in the given exhibition Level via FDs of Form-Creators of Proto-Forms all variety (in many STCs' groups forming all infinity of options of the joint subjective-chronological Existence of all Self-Consciousnesses Forms).

4.1039. Therefore, Form-Creators of every Self-Consciousness Form not equally can identically realize and reflect (in FD peculiar to Them, via own specific synthetic creative work) qualitative interconnections structuring the same energy-informational Levels of Their simultaneous appearance, but only those ones, which They can at least somehow subterraneously interpret on the basis of the Experience *already* synthesized by Them (in the given FD).

4.1040. The functioning of this Principle also could be speculatively demonstrated on the example of multistage and multilevel Reflection, in all versions of Universal Plasmic Forces Diapasons, of all multitude of the Aspects of the primary codings of Idiopathic TLAASSMA-A-Ingredient (the Primary Illusion) via reflection Mechanism, in FDs of all Self-Consciousnesses Forms, of Aspects of Transcendent SSMIYSMAA-A-Ingredients (the Secondary Illusion) peculiar to TLAASSMA-A. SSMIYSMAA-A-Ingredients, in turn, specifically reflect in the individual Aspects of 12 Pure Qualities of Each of own Immanent GOOLGAMAA-A-Ingredients (the Tertiary Illusion). If we combine all this with the Principle of resonational exhibition of multipolarized Focus Dynamics of Form-Creators of all possible Self-Consciousnesses Forms, we will obtain a vivid demonstration of abyssal-spheroidal manifestation of this Principle realization Mechanism in the countless Form-systems of all different-Qualitative Worlds simultaneously structuring f-Configuration of our Universal DDIIUYI-Entity.

4.1041. If to follow this direction of focal-ethereal interconnection multipolarizational transgression, we will be able to claim that every organ, cell, molecule, atom, as well as every elementary particle generating every person's biological organism with ambigulyar Focus Dynamics of own Self-Consciousnesses Forms, also represent, in the diffuzgent totality peculiar to them, in our CSR conditions, *reflection* of those specific properties of many Proto-Forms of GOOLGAMAA-A-Ingredient, which are subterraneously exhibited («materialized») by Form-Creators of our Self-Consciousness (in accordance with demands of two-invaderental lluuvvumic Synthesis Scheme) by the way of equally specific properties and features of our mixtum NUU-VVU-Form-Types. That is, in own totality, our body is reflection of the countless number of absolutely different Forms of Life (which is clearly demonstrated by our DNA texture), as well as some our functional part is present in the other Forms of Life.

4.1042. Another example is subjective reflection of Focus Dynamics of many various Proto-Forms in our CSR, which specific exhibition type we interpret as «rain.» Every Self-Consciousness Form (various people, animals, insects, vegetables, minerals, and so on) subjectively experiencing influence of this phenomenon will «unpack» Information about it in own Perception system in a completely different way. SFUURMM-Forms about rain (specific Conceptions and attitude to its physical properties) «projecting» to Self-Consciousness during «unpacking» will reflect unique Perception subjectivity of Form-Creators of one Self-Consciousness Form or another.

4.1043. Although, none of these Forms using only own FD «perspective» is able to completely «unpack» this phenomenon all manifold Essence expressing via its highly complex multi-dimensional constructiveness and functionality. That is because the weather event perceived in our exuberation conditions as rain has completely different structure and realization form in the more high-dimensional manifestation Levels reflecting via absolutely other SFUURMM-Forms in the more ampliative Perception systems.

### C) The LLUYYYU-UYLL Principle

**«I-am is subjective creative reflection of gabitual State of Unity of Everything in the Whole»**

4.1044. This Principle provides unconditional Integrity and infinite Unity in the Mechanism of simultaneous exuberation of absolutely all Self-Consciousnesses Forms and Collective Cosmic Intelligences in all different-Qualitative-abyssal Form-structure of Macrocosmos. It would not be possible for any Scheme of inter-Qualitative Synthesis to be implemented and to become profective constituent part of skrruullerrt system without simultaneous participation of the attributes of all twelve OO-UU-Entities in Focus Dynamics peculiar to it. The attributes most covarllert between each other organize increasingly active and stable (invaderental) interconnections types only due to availability of the permanent catalyzing influence on them of all other attributes initiating some kinds of multipolarizational trends in FD. Exactly this circumstance explains and provides svilgs-spheration Principle of amitsirational process of any Focus Dynamics.

4.1045. Our Perception systems extreme inadequacy is conditioned by high tensoriness of cause-effect interconnections used by us in FD, which leads to the powerful depliative deformation in our Self-Consciousness of the «current» Conceptions about «ourselves» and the reality surrounding us. Among NUU-VVU-Configurations subterraneously focused by us, there are countless number of all possible impersept and cruvursorrt differences (destruction, tensoriness signs), which annihilate only due to achievement of Resonationness state in each of qualitative resopasons of the general exuberation of our f-Configurations in the Space-Time given conditions.

4.1046. For that profective reason, the process of our amitsirations has been yet accomplished in mixtum (biological) NUU-VVU-Form-Types, but not in their more ampliative analogs, where influence of tensor interconnections among Form-Creators of ARGLLAAMUNI- and INGLIMILISSA-Centers has been either minimized (dimidiomittense SCFs), or absent at all (translucense SCFs). It should be noted in this respect that all possible simplisparentive (depliative three-invaderental) NUU-VVU-Form-Types versions cannot be defined as more ampliative manifestations, since they, despite of the third Dominant activation, represent (from the standpoint of demands of the basic Scheme of three-invaderentness of lluuvvumic birvulyarity type) diverse deep protoformal development Directions with availability of active tensor interconnections in FD between Form-Creators of the two IISSIIDI-Centers mentioned (meaning, the two lluuvvumic Dominants «hook» much easier not ALL-Unity, but some of the PCQs *more covarllert* to them).

4.1047. Due to the Reasons mentioned, we still have biological bodies, which limited properties do not allow us to realize own potential structural and functional Unity not only on the level of purely physical self-perception, but also psycho-mentally. That is why many persons, who excessively self-identify with own physiological bodies, could accept the Essence of this Principle as odd and absurd. Having ability to distinguish only those Forms in the world surrounding them, which are freely accessible (discernable and comprehensible) to their limited Perception systems, they will categorically deny opportunity of Existence in parallel with them (in the other Space-Time conditions) of the infinite multitude of realizational Self-Consciousnesses Forms of qualitatively completely different Collective Cosmic Intelligences, with which they (yet unconsciously) already have much more deep and close interconnections, than they can imagine and suppose.

4.1048. Svilgs-spherically harmonizing and annihilating tensoriness of narrow-specific SFUURMM-Forms of own FD with narrow-specific SFUURMM-Forms of Focus Dynamics of representatives of the World surrounding you, you will acquire more and more abilities for conscious confluence (not only psycho-mental, but also configurational one) with the other Self-Consciousnesses Forms. This multipolarizational process, regardless of the degree of your self-consciousness in it, is being implemented constantly, through all diffuzgent development Directions at once, while preparing you to specific creative work in the other (non-human) Synthesis Schemes. Thorough acquirement of iissiidiological Knowledge will allow you to escape the role of passive unconscious performer of different-protoformal trends (SFUURMM-Forms) instinctively accumulating in your Self-Consciousness, and to become active and conscious participant of the given amplificational Process constantly correcting it in accordance with own personal Conceptions and strictly orienting it within the boundaries of realizational necessities of lluuuvvumic birvulyarity type.

#### **D) The SSLAAF-SSLAAYY Principle**

**«I-am is subjective creative reflection of the property of the infinite multiplicity of Everything in the Whole»**

4.1049. In the whole multidimensionality and multi-diversity (heterogeneousness) of simultaneous exhiberation of absolutely all Creativity Ranges (by the way of slloogrent f-Configuration of Macrocosmos HCCI), this Principle provides all dynamics of the force interconnections — at subterransive development of every USCF-«projection» in different-Qualitative conditions of the Self-Consciousnesses Forms and CCIs infinite Existence — of the whole countless number of Form-systems of the Worlds and collective subjective Realities (CSRs) in STCs structured by them.

4.1050. Such variety — in fact, profectively limited by nothing except FD qualitative state — of all possible realizational Self-Consciousnesses Forms duvuyllerrtly-multipolarizationaly converting into each other allows all infinite multitude of heterogeneous Collective Cosmic Intelligences providing general (gabitual) Unity of the Macrocosmos all Creation to reflect absolutely fully those profective states of Harmony, Perfection, and Order in FD of each of Form-structures (via holochrone dynamics of each of synthetic Processes), which are potentially characteristic both to this Macrocosmos f-Configuration as a whole and to f-Configurations of each of Self-Consciousnesses Forms structuring It.

4.1051. Focus Dynamics of Form-Creators of any Self-Consciousness Form reflects, in the given Synthesis Scheme, just implementation specificity of totally typical Processes of amplificational Self-Cognition and eggeroliftive Self-Development simultaneously reflecting in FD via joint creative co-work of Form-Creators of various birvularity types. Along with this, due to Multipolarization and Slloogrentness properties availability, no any realizational advantage is provided for any among CCIs of a certain type over all multitude of the other Types «within» The Cosmic Unity. That is because the basis of all creative interactions between FDs of Form-Creators of different-type CCIs is not the trends to rivalry, survivability, and aggressive domination, but creative Cooperation and Mutual Assistance, what allows Focus Dynamics of representatives of different-protoformal birvularity types to svilgs-spherationally organize by the signs diffuzgent for them into more and more harmonious and universal focal-ethereal formations (complex-arranged birvularity types).

4.1052. The SSLAAF-SSLAAYY Principle is partial appearance (via any of Focus Dynamics) of the Information Slloogrentness general Property — universal ability of any Self-Consciousness Form to potentially *always* preserve, restore, and specifically reflect all those energy-informational interconnections in Focus Dynamics peculiar to it, which are typical to the more ampliative Levels of its simultaneous manifestation. In this context, one can say that Self-Consciousness of any person is not some integral and indivisible construction, but it is specifically structured with the Experience of the countless number of the other segregated Self-Consciousnesses Forms (both of the same type and different-birvulyart ones). This is profectively expressed in simultaneous availability of the infinite variety of potentially active creative levels in it (Self-Consciousness), each of which is realized via peculiar only to them NNAASSMM — subterransive section of the general slloogrent f-Configuration (Form-Type, person).

4.1053. Besides that, this Principle also reflects (via Self-Consciousness FD) the Information Multipolarization Property, due to which every instance of our definite subjective (personalized) self-consciousness is conditioned by the primary activity of just some specific — particular — part of the general Information qualitatively sort of «sprayed» among f-Configurations of the countless number of different-Qualitative Stereo-Types. For this reason, any of us do not and cannot have only one (absolutely integrated) physical Form of subjective realization: we are simultaneously exhiberated in diverse Space-Time conditions just through some «local» section of the general spectrum of slloogrent FD, which parameters completely depend on realization intensity and directivity of interstitial Interest peculiar to us.

### E) The YYGOOLL-YYOO Principle

**«I-am is subjective creative reflection of the property of potential profective Harmony of Everything in the Whole»**

4.1054. This Principle reflects absolute consummatizational Compatibility and gabitual harmonious Unity of Self-Consciousnesses Forms whole infinite variety, via which Focus Dynamics amplificational Essence of all possible Creativity Ranges (realizational Interests) of Macrocosmos HCCI is shown. Beyond traditional tensorsness of peculiar to us subjective Conceptions about

«ourselves» and about *proper* character of relations formation in the World surrounding us (of course, with clear predominance of our own life Interests over demands and priorities of both other people and other living creatures), absolutely all energy-informational interconnections between all Self-Consciousnesses Forms, regardless of how qualitatively we perceive them, are *gabitually* harmonized and balanced among each other in many possible to them Levels of simultaneous exuberation.

4.1055. The Conceptions about seeming to us «violations» of this Principle in conditions of the reality surrounding us are generated due to the strong limitation of our Perception systems (inability to discern and profectively comprehend the deeper levels of interactions observed and analyzed by us) and also due to the steady overload («dirtiness») of FD generated by us with all possible egocentric trends (arrogance, vainglory, offences, spite, aggression), which bring out our own psychic states constantly and for long beyond the limits of internal balance and equilibrium with continuously changing circumstances.

4.1056. The fact is that everything, which is inconsistent in this or that way, to this or that degree with specific activity of our personal Conceptions about Macrocosmos absolute Harmony, represents *indispensable* constituent part of the Universal Mechanism of svilgs-spherational generation of those focal-ethereal interconnections, without which general abyssal Experience of different-birvulyart Coexistence of absolutely all Self-Consciousnesses Forms and CCIs (in their harmonious interconnected Integrity) would be impracticable.

4.1057. For example, when a talented painter creates own unquestionable masterpiece, his/her canvas gets covered with the overall picture of colors and tints harmoniously combined between each other far not at once. First, it gets «daubed» with many separate (at times, very crude) brush strokes unrelated by sense and supposedly falling on the canvas «anywhere.» But, step by step, obeying the general definitive idea kept in the master's Self-Consciousness, unharmonious picture of separate strokes starts to acquire some particular sense and internal conditionality. In this way, continuously and overlapping each other many times, many, as we thought, completely unharmonious (individually) strokes have been gradually formed to Harmony and Perfectness of a masterpiece.

4.1058. Thus, when we do not have all required information about any of phenomena, events, relations, and reactions observed by us, when we tend to put our own subjective understanding on them, gabitual availability of the force balance and qualitative equilibrium already established between these sections of an f-Configuration (in the other conditions) discontinues to be perceived by us in favor of narrowness, bias, and one-sidedness of judgements. We are yet just unable to see and qualitatively perceive all — already consummationally achieved! — fullness and depth of the general harmonious Macrocosmos picture without realizing that something we consider «wrong» and «destructive» has been profectively already balanced in its Integrity by something harmoniously completing it or even contrary to its context. Because the true Harmony can be perceived only in absolute totality of all subjective polarities (incompatibilities, cruvursorrtnesses) and complementarities (compatibilities, covarllertnesses) constituting It.

## F) The MMAAG-SS-MMAAA Principle

**«I-am is subjective creative reflection of the Information Sll oogrentness property as simultaneous potential Presence of Everything in the Whole»**

4.1059. This Principle speaks of availability of the Universal Mechanism in Focus Dynamics of Macrocosmos HCCI for providing ability of holochrone-simultaneous *ubiquity* of manifestation of Focus Dynamics all infinite variety of Form-Creators of any of CCIs and Self-Consciousnesses Forms generated by Them. In Macrocosmos, this ability is reflected by the way of profectively already formed f-Configuration of skrruullerrt system structured with infinite multitude of different-Qualitative «projections» (focal-ethereal interconnections) between Form-Creators and Info-Creators of absolutely all Creation multi-dimensional Levels.

4.1060. For Form-Creators of every Self-Consciousness Form, the MMAAG-SS-MMAAA Principle determines opportunity of simultaneous potential appearance (conscious Presence) in any of Macrocosmos Spheres and Levels with the aim of performing subtterransive Self-Cognition and amplificational development. Let me remind you that Form-Creators are precisely Focuses (realizational concentration point of the certain attributes combinations) of dissonational Activity initiated «inside» of Information as a result of mercavgnation Act. Universal Focuses Self-Consciousness (USCFs) themselves do not displaces anywhere, but, being qualitatively converted, due to eglleroliftive Impulse-Potential «internal» influence on them, they provide subreptive amplificational effect in SSS-Entity Self-Consciousness. We interpret this effect as Focus Dynamics — qualitative difference appearance between the two states of Focuses of Close Attention, Focuses Integral Motivational Impulse, and so on.

4.1061. On their own, Focuses, as such, are not Form-Creators yet, but represent just potential realizational opportunities of Rezomirals of manifestation. But once we start to examine subjectively Focuses through Focus Dynamics performed by them (by us!), Illusion effect appears at once of accomplishing Form-making process; and we begin to perceive the state between different-Qualitative parameters of Focuses as «relations between Form-Creators.»

4.1062. Skrruullerrt system could be conditionally imagined as «solid spheroidal» Focus generated in Information by the countless number of postmercavgnational (consummative) states of dissonational Activity of newly generated inter-skunkktional interconnections, which, before mercavgnation Act, could not interact because of the pronounced imperseptness or cruvursorrtness towards one another. Irrkoglictive IP has «shown» them potential interactions diverse options, and eglleroliftive IP has provided these interactions with real opportunities. The latter «locally» influencing on the newly generated interconnections between skunkktions of SSS-fragments has defined subtterransive character of each of intrafocal interactions formed by them (has sort of shown individual features «inside» of each of the participants — SSS-fragments — of initiated dissonational Activity), what has become the major Reason of gabitual different-Qualitativeness of the general Focus sll oogrent structure.

4.1063. So you can see for yourself that it is unreal to «isolate» or «eliminate» even one section from this structure: the whole focal-ethereal Macrocosmos Model would «disintegrate,» «fall to pieces.» Any Self-Consciousness type (abyssal «I-am» version) can function only *inside* of this structure, while temporarily identifying itself alternately with typical attributes of one among all infinite multitude of its conditional «parts,» and with subterransive attributes of the second, third, fourth part, and so on (what mostly resonates with its essential Interest in these exuberation conditions). This process of permanent — different-Qualitative and multipolarizational! — Self-Consciousness refocusing (amitsiration) to some realizational opportunities (USCF-«projections»), by Essence, is what we mean by the term «Focus Dynamics.» As soon as it (FD) has been USIP-initiated «inside» of Information, the Mechanism itself of holochrone-simultaneous realization is «shown» in every conditional «point» of its Creative Activity — Macrocosmos Form-Creators.

4.1064. From the profective point of view, within conditional limits of exuberation of FD of Entity of Macrocosmos of our type, we can talk about the One Single Universal Form-Creator — Macrocosmos HCCI as the Primary Source of all USCF-«projections.» In fairness, it should be noted that the given type of Form-Creator represents just only one among the infinite number of varieties of no less important Universal Form-Creators, Who provide organization and functioning of all energy-informational interconnections in all diversity of all possible versions of Macrocosmos other types. Though, it would be quite a mistake to speak about availability of One Single Focus for this Form-Creator, since also in this case, subterransive Process of Its Self-Cognition can be simultaneously carried out just only via multipolarization of transfinite multitude of different-Qualitative Focuses reflecting all options diversity of the essential Interests peculiar to It.

4.1065. Due to Universal Plasmic-Differentiated Radiation (UPDR) availability conditioned in SSS-State by USIP-Initiation Act (mercavgnation), FD of HCCIs of each of these Macrocosmos versions irrkoglectively (simultaneously-multipolarizationally) transgresses and eglleroliftively (svilgs-spherationally) converges (via universal properties of the general Focus of skrruullerrt system) into the multitude of heterogeneous options of purposeful Focus Activity (motivationally conditioned by all possible Interests), each of which is subterransively (sort of independently, on its own) creatively «localized» in various Space-Time conditions. HCCI provides Itself with opportunity of simultaneous subjective *Presence* in each of exuberation conditions of own FD via all these «points» of subjectively «localized» Interests. Owing to this, in amitsissimal State of SSS-Entity Self-Consciousness, abyssal f-Configuration of one if Its personal subjective Creations (Macrocosmos of the given humanational type) is holochronely manifested and subterransively realized along with the others.

4.1066. But limiting oneself just to slloogrentness of AYFAAR HCCI Focus Dynamics slloogrentness, one can say that universality of this Principle realization via DDIIUYYI-Entity f-Configuration is manifested in it (FD) through resonational activity of ethereal Content of all subjective variety of Forms of Idiopathic TLAASSMA-A-Ingredient creative Self-Cognition. This activity is carried out via infinite diversity of all Its Transcendent SSMIIYSMAA-A-Ingredients and Immanent GOOLGAMAA-A-Ingredients, Which provide Universal Mechanism of ambigulyar resonational exuberation in the given conditions of PFDs of all different-protoformal Form-Types, and also Info-Creators. Therefore, this Principle provides realization of the Slloogrentness and Multipolarization properties in some particular Processes of creative organization of all constituent Elements of SSS-Entity Focus Dynamics in various space-time Form-structures (Continuums, Conversums, Universums, and so on).

4.1067. Taking the example of texture and features of genotypes formation of our mixtum Self-Consciousnesses Forms, this Principle is reflected through availability of the large number of gene Form-Creators in every person's DNA, Who are peculiar to Forms of many different CCIs (not only animal and vegetable, but also mineral CCIs). That is, in our own biology, all possible options of multipolarizational development have been «initially» provided in one or another among many protoformal-diffuzgent (as regards this Synthesis Scheme) creativity Directions. Availability of such — common to different Proto-Forms — energy-informational basis structuring our human genome and functionally combining Focus Dynamics of many different-type CCIs discovers prodigious opportunities of simultaneous manifestation and subjective self-consciousness in front of Form-Creators of every Self-Consciousness Form in a wide variety of development scenarios.

4.1068. As a consequence, most of «our» reactions and choices are very often conditioned by not our own preferences and desires, but represent Creative Activity reflection of both «personalized» Interpretations from parallel groups of development scenarios of our Stereo-Form and some other Self-Consciousnesses Forms close to us and resonating with NNAASSMM focused by us. That is because both our and their Focus Dynamics can be simultaneously «operated» by virtually the same gene Form-Creators accomplishing Their realization in the nutational level common to Them. This is facilitated by the fact that our brain and biological organism as a whole are also structured and functionally supplied with activity of bio-Creators of many different-protoformal Synthesis Schemes, Who rather actively (and accordingly) respond to reactions of peculiar to Them Self-Consciousnesses Forms (surrounding «us» both in this and in parallel scenarios).

4.1069. In DNAs of all NUU-VVU-Form-Types of lluuvvumic Synthesis Scheme, Focus Dynamics of invaderental Form-Creators of OO-UU-Entities two types (ALL-Will-of-ALL-Intelligence and ALL-Love-ALL-Wisdom) are supplied due to availability in them of the strictly defined svilgs-spherational correction (Creators-svilgsons). This specifies development of USCF-«projections» certain part exactly in NUU-VVU-Configurations, but not in some others. Though, simultaneously with activity in human DNA, gene Form-Creators of the same OO-UU-Entities appear via DNA of the other Proto-Forms — but in some other invaderental combinations!

4.1070. Consequently, resonationally reacting on hormonal activity of Perception systems of animals and vegetables surrounding us (and also of FDs of Form-Creators of thick mineral formations starting from various ores deposits: iron, copper, zinc, manganese, mercury, lead, boric, uranium ores, and others — and ending with the Planets and Stars closest to us), bio-Creators of our Perception systems correct to some extent «current» states of our own biological organisms: release of hormones and ferments, work of cells and organs, and also work of nervous, limbic, vascular, and other systems. Therefore, it is very difficult to determine, which exactly factors influence most actively on qualitative state of FDs of Form-Creators of our Self-Consciousness Form in every moment of time establishing in this way (for example, by means of mineral composition) functional features of our biological organism operation and motivating (by means of activity of IISSIIDI-Centers certain Levels) our psycho-mental reactions (choices).

## G) The TLLAA-FF-TTAA Principle

### «I-am is subjective creative reflection of the profective Similarity in manifestation of Everything in the Whole»

4.1071. This Principle deepens and strengthens realizational abilities provided for Form-Creators of all Self-Consciousnesses Forms by the previous Principle — MMAAG-SS-MMAAA («I-am is subjective creative reflection of the Information Sllloogrentness property as simultaneous potential Presence of Everything in the Whole»). Because of it, all Form-Creators (as USCF-«projections» abyssal Focus Dynamics of Macrocosmos HCCI) are supplied with the property of simultaneous accomplishing of multipolarizational transgression (diversifying) of own FDs to any PFDs Levels subterraneously identifying Themselves in every particular case with qualitative parameters of those focal-ethereal interconnections, which structure any of these Levels. At that, «initial» — amplificationally peculiar to them — codings specifically reflecting the Essence of the Creation general Plan («Design») continue potentially to be present in every «area» of focused (and formed) by Form-Creators, different-dimensional exhuberation «point» of skrruullerrt system (f-Configuration).

4.1072. But esoteric expression «as above so below» should not be interpreted literally, which would totally pervert it by the trend peculiar to us to create hierarchy for any different-Qualitative manifestations perceived by us. After all, none of our subjective Conceptions about any «belows» and «aboves» (both qualitative and Spatial ones) can be applied to the infinite «spheroidicity» of simultaneously shown focal Configuration multipolarizationally structured with ambigulyar Focus Dynamics of the infinite variety of heterogeneous Form-Creators.

4.1073. We can talk about fundamental and potential Similarity of absolutely all different-Qualitative Self-Consciousnesses Forms, in this case, only in gabitual Sense, reflecting consummative basis of Everything United for all Forms, Which produces the given Macrocosmos. The main amplificational condition of this basis holochrone formation is availability of active interactions between irrkoglective and eglleroliftive Impulse-Potentials. Initiating every focal-ethereal interconnection (and with it, Space-Time subterransive parameters) both these IPs — absolutely equally! — structure by Themselves every «area» of skrruullerrt system f-Configuration produced as a result of this, thereby providing this area with (or rather, retaining «inside» of Information consummative part) Sllloogrentness universal property.

4.1074. That is because any conditional «part» of each of Impulse-Potentials Activity is neither specific, nor individualized. This is just the Creative Potential, which provides any shown — somehow, in one form or another — Information particle with all its amplificational Sense. One cannot say that some conditional «part» (if it can be shown independently at all!) of some of these two Impulses is more important and significant than any other of Its conditional «parts.» Hence, we denote it as «Impulse» — the fact of some holochrone USIP-interaction creating the profective Essence of a phenomenon, which we subjectively interpret as «Information.»

4.1075. There is no «qualitative» difference «inside» of the Essence of the Impulse-Potential Itself: any «point» of Its manifestation represents absolutely all Plan of *the proper* (in absolute accordance with confective USIP-State) Information consummative conversion from amitsissimal State to primogenitive One, and to confective One at once. Any subjective «difference» in qualitative parameters of various Self-Consciousnesses Forms manifestation is stipulated by not the fact that «more» or «less» portion of IP is «put» into this f-Configuration (Impulse-Potential is *equally* typical to any focal-ethereal combination), but by specific properties and subterransive features of the Perception systems peculiar to every Self-Consciousness Form (meaning, by realizational abilities of Form-Creators USCF-«projections»).

4.1076. The same could be said about Information heterogeneity Property, if to consider it from the standpoint of the extremely conditional character of Its holochrone «Existence» in *gabitually united* manifestation regime of amitsissimal (primogenitive + consummative) and confective States. As the result of mercavgnation, every skunkktion of every reconverstive Configuration (SSS-fragment) enters the liyllusceeve state with respect to every skunkktion of all other heterogeneous SSS-fragments of primogenitive State, which finally (holochronely!) leads to generation of *one single* — super-Universal! — «SSS-fragment» of confective State. Its skunkktions already have properties of absolutely all heterogeneous r-Configurations concatenationally merged between each other throughout all variety of the attributes peculiar to them.

4.1077. Then, Information Itself (in Its gabitual kind) holochronely converts to some united, generalized across all heterogeneous attributes, subjective Experience, which at once transforms to USIP — United Superuniversal Impulse Potential. But we can perceive some narrow-specific spectra of Information general heterogeneity only because FDs of Form-Creators of our Self-Consciousnesses Forms always structure just some interstitial part (interval, period) between relatively «initial» (primogenitive) and relatively «final» (confective) phases of this united holochrone USIP-State. During our FD eglleroliftive amplification, Form-Creators of our Perception systems acquire increasing abilities for harmonious joining (in the more universal Conceptions) of all possible heterogeneous attributes, which structure various PCQs of Information primogenitive State.

4.1078. Notwithstanding these properties and abilities, absolutely everything unable to be at least somehow interpreted by Form-Creators of the Perception system of the given Self-Consciousness Form already Exists in Space-Time potentially surrounding Them in all infinite multi-complexity of all possible focal-ethereal combinations. Thus, implementing peculiar to it realizational Essence in own «area» of Macrocosmos, every Self-Consciousness Form, in skrruullerrt system «point» subterransively initiated by it, particularly reflects not some particle of the general Creation Plan, but absolutely all Its amplificational Essence. Though, restricted abilities of own Perception system do not allow it to deeply understand and cognize this Essence. In the realizational Levels of Form-structures of our Universal PFDs, the main function of this Essence exhibition Mechanism in FDs of heterogeneous Form-Creators is carried out by profective codings of GOOLGAMAA-A-, SSMIIYSMAA-A-, and TLAASSMAA-A-Ingredients.

4.1079. It should be noted that this «Law,» like all the others, has still plenty of other Principles functionally organizing other types of protoformal STCs and CSRs, where absolutely different

Conceptions, than we have, of Collective Cosmic Intelligences about «Themselves» and the reality surrounding Them (animals, microorganisms, vegetables, minerals, and also non-carbon and mixed Self-Consciousness realization types including specific Forms of all variety of objects and «phenomena» of planetary, stellar, and other cosmic nature) dominate. Each of these Principles cannot be adapted, at least to some degree, to the logics type, which is peculiar to our «current» NUU-VVU-Form-Types. Hence, no sense to mention them.

### **Some particular examples of consequences reflection of functional influence of this «Law» on the qualitative conditions of our Existence**

4.1080. Everything is habitually united in own multilevel interdependency, functional complementarity, and creative interconnection of simultaneous-sillogent realization of Form-Creators of SSS-Entity Self-Consciousness. The simpler Self-Consciousnesses Forms of every manifestation Level concatenationally transform to the more and more complex Forms, which Form-Creators diffuzgently form birvulyart focus aggregations of all possible Collective Consciousnesses and different-type Collective Cosmic Intelligences, and Those, in turn, extrapolate own Focus Dynamics to Collegial Cosmic Intelligences of various exuberation Levels... Seeming «separateness» of all these Forms between each other is absolutely illusory and stipulated by imperfectness of USCF-«projections» themselves providing their subjective Perception systems.

4.1081. For the same reason, high discreteness (isolation, particularity) experienced by us during making direct contacts with Self-Consciousnesses Forms of the reality surrounding us is conditioned by availability, for bio-Creators of subjective Perception systems of our «current» NUU-VVU-Form-Types, of the factor of sweeping restriction of own realizational abilities on resonational «unpacking» of the Content of our Self-Consciousness informational space. This is correspondingly (inertially) reflected not only on the efficiency of Focus Dynamics organized by them, but also on our physical and psycho-mental functioning in general.

4.1082. These restrictions are connected with very low energy intensity of carbon biological Self-Consciousnesses Forms focused by us now, which do not allow bio-Creators to implement a high potential of decoherent Energy-Information at once (electric potentials difference on both sides of the cell membrane is just 70–80mV). Therefore, analysis and decoding of every «area» of the general heterogeneous electric Information flow requires some time, which produces observed by medics effect of «impulsivity», discreteness, «pixelization» of electric signals recorded in the brain neurons (for example, impulses average frequency in our brain axons is slightly more than 1000Hz, whereas the base frequency diapason of electromagnetic impulses of the brain neurons lies within the limits of just only up to 40Hz).

4.1083. Thus, some of the less resonational elements of focal-ethereal interconnections having both lower and higher (but in any case — dramatically varying) qualitative parameters, though are partially reflected on the Bioscreen of our impulse ring, but forcedly omitted and psycho-mentally not recorded by bio-Creators, sort of «passing» without a trace for us, «beyond» our personalized Self-Consciousness (though, at the level of collective unconsciousness and collective Subconsciousness, absolutely all material dynamics unconsciously accomplished with us and around us is «scanned»

most granularly and can be reproduced at any time in such alternative psycho-mental states, as, for example, retro-hypnosis, «clinical death,» profound Meditation).

4.1084. Before complete «unpacking» and immediate «packing up» all VVU-Information (SFUURMM-Forms) by corresponding neuronal chains, which comes to them via Focus of Close Attention from lluuuvvumic Creators-regulators and Creators-Interpreters of nuclear DNAs of every cell, bio-Creators of the brain diverse parts [18, footnote], owing to limited available realizational abilities, are satisfied with just Its separate particles fixing with own FCAs on decoration of only those SFUURMM-Forms, which They are able to identify at least somehow with the Experience already synthesized by Them at the moment and structuring an ODS part *kleksed by Them* (the further discretization of continuous Information occurs integrally, VVU-specifically by analogous algorithm in our Self-Consciousness).

4.1085. Qualitative difference (kleks) between the old and the new Conceptions is recorded by hippocampus bio-Creators by the way of short-term memory particles. This memory will be further (during sleep) subjected to additional analysis and treatment, and after that it will take shape of long-term memory particles and join already kleksed part of SFUURMM-Forms of subterransive ODS («personal» Experience).

4.1086. It appears that on every second, in our Perception system, bio-Creators «hastily» form only general schematic picture, just a «sketch» of interconnections focused by us, whereas detailed «drawing,» with all cause-effect interactions between Form-Creators of diverse RezoMirals of manifestation, potentially and indirectly participating in each of these «unpackings,» remains beyond the reach of our FCA. They sort of «put» («project» by sense) some of Conceptions earlier synthesized by Them on this «sketch.» In fact, this, cumulatively, constitutes all informational basis of our usual relations with the reality surrounding us.

4.1087. It is extreme imperfection of Perception systems peculiar to our «current» NUU-VVU-Form-Types mixtum analogs, which does not allow us, in own FD, to feel deeply and experience effectively all infinite variety of those invisible psycho-mental interconnections, which literally unite, by many joint attributes combinations, Focus Dynamics of our Form-Creators with f-Configurations of absolutely all surrounding us Self-Consciousnesses Forms of different-protoformal CCI types starting from fermions, atoms, molecules, cells, and microorganisms and ending with all possible cosmic Entities.

4.1088. Owing to availability — in multipolarization of Focus Dynamics of Form-Creators of all Self-Consciousnesses Forms — of the specific «mechanism» of subjective qualitative rotation (concatenational convergent displacements) in some particular birvulyarity development Direction (as a result, so called subterransive rotational Cycles or conditional periods of every person's subjective Existence are formed in Self-Consciousness), the «personal» Focus Dynamics has opportunity to be fixed in increasingly perfect Form-Types Self-Consciousness (for example, dimidiomittense, translucense ones), which subjective Perception systems offer much more opportunities to Form-Creators for more deep and stable (that is, less discrete) fixation in all possible energy-informational interconnections. These interconnections harmoniously unite them with all other f-Configurations

of the surrounding World and allow to appear more universal Conceptions in their FDs about their all-embracing functional Unity in the whole profective Creation.

**4.1089.** After all, SSS-Entity subjectively realizes «Itself» just through all infinite variety of Creative Activity of Form-Creators of all different-Qualitative Self-Consciousnesses Forms simultaneously exhiberated in all Space-Time regimes at once. Owing to that, inseparable Unity and deep potential interconnection is provided between Focus Dynamics of each of Self-Consciousnesses Forms and own Self-Consciousness of SSS-Entity. For example, all comprehensive Information about each of us, as integral Macrocosmos particles, has been already «initially» coded (via diverse ethereal Ingredients) in the special ethereal structures constructing resonationally f-Configurations of all Form-Types of our LLUU-VVU-Forms (ethereal variable component and ethereal temporal constituent), which are also just only a miniscule part of AYFAAR HCCI Conceptions.

**4.1090.** As regards Self-Consciousnesses Forms of Planetary and Stellar Entities, we, as well as all reality surrounding us, represent certain sets of different-functional «microcosmoses.» In turn, in any among nutational Worlds, all our NUU-VVU-Form-Types are «macrocosmoses» to the other, qualitatively very different from us, «microcosmoses,» which Form-Creators, absolutely differently than us, subjectively self-realize in conditions of human STCs and actively form own collective subjective Realities types (the simplest microorganisms, viruses, bacteria, cells, and also molecules producing them) in the constructions created by us.

**4.1091.** This is due to availability of such comprehensive interconnectionship in Macrocosmos between all Self-Consciousnesses Forms that all multilevel Form-structure of Worlds interpenetrating each other (and inter-creating each other) functions excellently and well-coordinated: «the simpler» realizational Self-Consciousnesses Forms of CCIs acquire ability for exhiberation due to multipolarizational transgression of Form-Creators of CCIs of the more ampliative Forms (meaning, all «macrocosmoses» are simultaneously «microcosmoses» with respect to even more global «macrocosmoses»).

*«The Law of projective Birvulyarity — absolute Generality and Integrity of simultaneous exhibition of different-type CCI and Their Self-Consciousnesses Forms all diversity»*

**SSALLASST-UUSST**

**«The Law» realizational Essence**

4.1092. Information Sloogrentness Property is projectively reflected in Focus Dynamics of Macrocosmos HCCI as overall interdependence and interpenetration of Everything in the Whole holochronely expressed via already absolutely completed equilibrium of all birvulyarity different-type manifestations. All infinite multitude of different-Qualitative differences between Self-Consciousnesses Forms is projectively caused not by their subjective disunity, but by those among eglleroliftive functional features subterraneously peculiar to them, due to presence of which most effective solution of creative Tasks and consummative implementation of the most amplificational Goals common to all Macrocosmos Form-Creators are achieved.

4.1093. To have a better understanding of this issue, you should form more precise Conceptions about what the term «birvulyarity» stands for. As you know, achievement of Focus Dynamics most efficiency between heterogeneous Form-Creators depends completely on covarllertness (and Resonationness) of focal-ethereal interconnections creatively initiated by Them. Interconnections most covarllert between each other by many subjective attributes enter the more steady interactions much easier, than impersept ones and form in this way particular synthetic energy-informational combinations of Form- Creators FDs in various Space-Time conditions.

4.1094. These combinations interacting between each other on the basis of more or less degree of Resonationness in them conglomerate informationally and aggregate focally into specific Creativity Ranges (functional «spheroidal zones» or «spectra» of subjective rezomiral activity of Focus Dynamics exhibited by definite attributes). Each of Creativity Ranges, via the most active for them Qualitative type of Focus Dynamics, generates the infinite number of SFUURMM-Forms of the particular Synthesis Direction to «the surrounding reality» created by their specific interconnections. These SFUURMM-Forms are formed (kleksed, «unpacked») within the limits of specific manifestation diapason of the most Creative Activity of interconnections peculiar to them (they sublimate into subterraneous UU-Factor; for example, this would be the VVU-Factor for people).

4.1095. In this way, in different-Qualitative Space-Time Form-structures, all infinite variety of all possible birvulyarity types is generated, each of which represents a certain multidirected, multipolarized by qualitative interaction, intensity, inter-penetrability of focal-ethereal interconnections most covarllert between each other (by some particular attributes). On the basis of subjective Conceptions, which are typical to varying degrees for Form-Creators participating in every birvulyarity type generation, countless STCs' groups (specific Form-structures of the surrounding

reality) and collective subjective Realities diverse types (CSRs of Collective Consciousnesses) have been holochronely formed in the corresponding Space-Time exuberation regimes. These STCs and CSRs are prerogatively structured with Focus Dynamics of precisely those Self-Consciousnesses Forms, which are functionally supplied with creative features and realizational abilities of these Form-Creators.

4.1096. Since intensity of their interaction between each other, by each of the specific attributes, dramatically differs in some — subterraneous to each birvularity type — qualitative limits, interconnections spheroidal structure, «inside» of all multitude of Creativity Ranges common to each birvularity type, very visually reflects by itself Information Diffuzgentness Universal Property, due to which Creativity Ranges with decreased abilities for realization of some birvularity attributes — duvuyllerrtly and spheroidally — qualitatively transform to Creativity Ranges of the other birvularity types.

4.1097. At that, countless number of *common* interconnections between Creativity Ranges of the most covallert (by the particular set of already realized — in these «local» conditions! — attributes) to each other birvularity types consuetally abruptates («merges») by some of the Creative Activity Directions jointly peculiar to them (in all multipolarization of exuberation spectrum peculiar to them) generating more and more universal (complex-designed) birvularity types, where formerly (in the more vitium appearance conditions) impersept interconnections concatenationally transform to the more covallert and even liyllusceve ones (in certain resopasons).

4.1098. For example, two-invaderental nuuvvumic-mixtum (2.5–3.75 dimension) *variety* of lluuvvumic birvularity *type*, after enriching itself with all complex of covallert-liyllusceve interconnections with three-invaderental simplisparentive NUU-VVU-Form-Types (nuuvvumic-simplisparentive variety) — *in the particular spectrum* of own simultaneous-multipolarizational interaction with the other birvularity types — qualitatively transforms (subject to its retaining of invaderentness of OO-UU-attributes of ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence PCQs) first to nuuvvumic-dimidiomittense variety (3.75–4.0 dimension), and then — at the active interaction with four-invaderental *superparentive* NUU-VVU-Form-Types — to nuuvvumic-translucense (4.0–4.75 dimension) and nuuvvumic-dimidioclarus (4.75–5.25 dimension) varieties of lluuvvumic type birvularity. Active selective cooperation of these Form-Creators with Conceptions of five-invaderental *supraparentive* NUU-VVU-Form-Types directs Their Focus Dynamics to nuuvvumic-luminosal variety of lluuvvumic type birvularity (5.0–6.0 dimension).

4.1099. Further, by analogous scheme of multipolarizational implementation of different-birvularity covallert interconnections between heterogeneous Form-Creators, even more universal *varieties* of lluuvvumic type birvularity are formed *in the particular exuberation spectrum* of their Creative Activity: 6.0–7.0-dimensional lluuvvumic-transliirstal one (five-invaderental transliirstal LLUU-VVU-Form-Types synthesizes with six-invaderental ultraparentive LLUU-VVU-Form-Types), 7,0–8,0-dimensional lluuvvumic-transtaaarmsal one (six-invaderental transtaarmsal LLUU-VVU synthesizes with seven-invaderental extraparentive LLUU-VVU), and 8,0–9,0-dimensional lluuvvumic-transtlluuvvstall one (seven-invaderental transtlluuvvstall LLUU-VVU synthesizes with eight-invaderental divinparentive LLUU-VVU).

4.1100. Though, at this stage, the subjective diversifying, perfection, and universalization process of this (as well as all multitude of the others, in parallel with this one!) birvularity type does not end at all, but eglleroliftively «projects» to the abyssal Creativity Range even more general to all Proto-Forms, on which base lluuvvumic-goolgamaaaic and goolgamaaaic types are formed (and furthermore, all varieties multitude of ssmiysmaaaic — 12.0–24.0 dimension — and aiyyaic — 24.0–36.0 dimension — birvularity types, and so on). Meaning, Birvularity Property appearing subjectively (via FD) in all processes of Macrocosmos any type Form-making represents the fundamental part (Consequence) of such universal SSS-Properties as Sll oogrentness, Diffuzgentness, Duvuyllerrtness, and Multipolarization. Owing to Them, absolutely all different-Qualitative Self-Consciousnesses Forms and Collective Cosmic Intelligences acquire ability energy-informationally to interpenetrate and interconnect all possible Energy-Plasma States with own f-Configurations and Focus Dynamics.

4.1101. It should be noted that every functional feature of any Self-Consciousness Form *transgressively-irrkoglictively* «projects» to its Focus Dynamics by Form-Creators of the more ampliative exhuberation Levels, Whose Creative Work, in turn, is stimulated by «projections» of Form-Creators of even more amplificational Levels, and so on, in all profective abyssality of the integral overall Cosmic Existence. Thus, the main Essence of the whole Creation Plan (in the particular conditions of this Macrocosmos) duvuyllerrtly-successsively «projects» (by means of UPDR) from the most amplificational (qualitatively the highest) «part» of the total spectrum of sll oogrent Focus Dynamics of Macrocosmos HCCI to FDs of Form-Creators of the simplest Self-Consciousnesses Forms (even «simpler» Forms could be only reconverstive Configurations of primogenitive SSS-State).

4.1102. As soon as This Essence has been specifically fixed in FDs of Form-Creators of the most elementary Self-Consciousnesses Forms, qualitative conversion corresponding to It (to the Essence, the Plan) in ethereal «projections» of all, newly initiated (impersept and cruvursorrt) inter-skunkktional interconnections has been holochronely accomplished at once (with the help of *UPDR eglleroliftive* UPDR part), and the Highest Form of Creative Activity of SSS-Entity Self-Consciousness expressed via FD of Macrocosmos given type HCCI has been formed by the way of concatenational (svilgs-spherical) convergence.

## The adapted Principles

### A) The KKVVOO-OTM Principle

**«I — am is subjective creative reflection of the Duvuyllerrtness Property of manifestation of Everything in the Whole, which defines qualitative succession of FD exhuberation in the Process of holochrone-simultaneous realization of USCF-«projections» via all Self-Consciousnesses Forms»**

4.1103. At the core of absolutely all focal-ethereal interactions are specifically (mercavgnationally) qualitatively *corrected* (in accordance with confective Creation Plan) inter-skunkktional

interconnections between reconverutive Configurations of SSS-fragments all multitude. The Essence of their generation reflects complete liyllusceeveness (the highest degree of heterogeneous compatibility; tranquility, harmony) of any conditional «area» of Information primogenitive State with respect to any of the remaining «areas.» Primogenitive State Itself is not directly related either with Energy, or with Space, or with Time — all of this is parameters characteristics of consummative (qualitatively subject to corrections) SSS-State initiated by mercavgnation Act.

4.1104. Beyond Focus Dynamics, primogenitive State is not manifested in any way, since it is just extremely relative «point of absolute concentration» of potential «informational singularity,» which represents all realizational Potential for manifesting any Creative Activity initiated in SSS-Entity Self-Consciousness. By the Essence, this State sort of absent at all for a subjective Observer of any Creation Level, since it is able to manifest one way or another (be activated) only at the moment of the direct fixation on some of its «areas» of the Energy Potential of Focus Dynamics of Form-Creators (*subjectively uncompensated* part of dissonational Activity in inter-skunkktional interconnections, which has been generated at SSS-mercavgnation).

4.1105. Any conditional «point» of possible manifestation of inter-skunkktional interconnections of primogenitive State is characterized by a particular multipolarizational sequence at implementing all heterogeneous interactions between reconverutive Configurations of different-Qualitative SSS-fragments. This sequence presumes the most degree of their sense compatibility by informational attributes (liyllusceeveness or geyliturgentness) peculiar to them. «The point of informational singularity» itself represents the absolute result of holochrone realization of all inter-skunkktional interconnections at once annihilated successively by liyllusceeve attributes.

4.1106. During process organization of multipolarizational amitsiration of Focus Dynamics, this primogenitive State Property (Duvuyllerrtness) is projected also on concatenational-convergent abilities of simultaneous accomplishing (by any Self-Consciousness Form), in Space-Time, of rotational Cycles peculiar to this Form: inter-Qualitative liyllusceevation (annihilation and abruptation of identical, by the Sense, «areas» of slloogrent f-Configuration) of any focal-ethereal interconnections can occur only in a strictly defined sequence. This is specifically (via UU-Factor) reflected in svilgs-spherational features of subterransive amitsirations typical for Form-Creators of every Synthesis Scheme.

4.1107. The more ampliative (meaning, more amplificational exactly for this Synthesis Scheme) Focus Dynamics of Form-Creators is, the more it is able to accumulate («concentrate») in itself, during every focal displacement, many depliative focal-ethereal interconnections, while duvuyllerrtly synthesizing their multipolarized sequences to the more covarllert combinations and enabling, in this way, Self-Consciousness Form-Creators to focus in the more particular «areas» of abyssal f-Configuration of skrruullerrt system. May I remind you, in different FD multipolarization spectra, heterogeneous Form-Creators also simultaneously «unpack» countless number of all possible interconnections in one kleks, which reflect qualitative trends of *the other* Synthesis Schemes even more; all these FD options will be more depliative for the given birvulyarity type.

4.1108. The more depliative (primitive, elementary for the given Synthesis Scheme) FD of Form-Creators is, the less «volume» of focal-ethereal interconnections duvuyllerrt-multipolarized by different-protoformal development Directions is possible to be «unpacked» by it during every focal displacement, which means that the less «number» of covarllert heterogeneous interconnections is possible to be synthesized by it in one rotational Shift. As the result, for own amitsirations process implementation, Form-Creators are forced to subdue and annihilate much more all possible dissonational distances (various tensor parameters forming Space) and to spend much greater number of primitive motivational efforts (Time subjective parameters), than it's possible with the more ampliative Focus Dynamics.

4.1109. So, every Self-Consciousness Form (subjective «I-am»), in peculiar to it «point» of Space-Time subterrassive exuberation, profectively reflects (by own FD and f-Configuration) the result of duvuyllerrt (qualitatively successive) conversions accomplished by Form-Creators of the given Synthesis Scheme during persistent amitsirations from the more tensor and dissonational (impersept) focal-ethereal interconnections to the more resonational (covarllert, geyliturgent) ones. Whatever subjectively fast and strong qualitative changes might follow this process, availability of the KKVVOO-OTM-Principle always scrupulously provides accomplishment in it of svilgs-spherational sequence (duvuyllerrtness) of any synthetic conversions of Focus Dynamics, through which the given amitsiration from some Self-Consciousnesses Forms to the others is organized.

4.1110. From one side, this Principle allows all Collective Cosmic Intelligences functionally to provide simultaneous Process of own deep and comprehensive Self-Cognition via absolutely all different-Qualitative Levels of the Existence peculiar to Them, while spatiumally realizing at once in all variety of Self-Consciousnesses Forms of literally each of CSRs jointly structuring the given birvulyarity type. From the other side, for each of realizational Self-Consciousnesses Forms (in every conditional «instance» of its subjective Creative Activity!), this Principle defines just very narrow energy-informational spectrum (dimensional diapason) of its real abilities for active creative manifestation and subjective (conscious) reflection of its FD in Space-Time «local» conditions (strictly in accordance with its VLOOOMOOT and NNAASSMM subterrassive parameters).

4.1111. This Principle amplificationally regulates those conditional boundaries of implementing different-Qualitative synthetic processes by Form-Creators of every Self-Consciousness Form, which dramatically depend on intensity and manifestation Level, in the structure of its Focus Dynamics, of realizational Creative Activity of specific SFUURMM-Forms subjectively reflecting subterrassive features of profective interconnections between Aspects of some of OO-UU-Entities. Owing to this, it becomes just impossible to realize Focus of Close Attention via focal Configuration of the same Self-Consciousness Form endlessly or however long — for permanent continuation of own subjective rotational Cycle (the Self-Consciousness effect, which we mean by «Existence Illusion»), the particular Form-Creators groups interconnected by the common Synthesis Scheme should choose more and more f-Configurations, which specific combinations could maximally provide Them with realization opportunities of the typical to Them set of well-defined essential Interests.

4.1112. The eglleroliftive (consummatizational) Essence of any among subjective stages of this multipolarizational Process is that any amitsiration should necessarily be accomplished in every FD

just along with increasing covarllertness between some focal-ethereal interconnections simultaneously organized by Form-Creators in all different-protoformal-diffuzgent development Directions at once . From the standpoint of amplificational Conceptions of Form-Creators of some definite Synthesis Scheme (for example, lluvvumic birvulyarity type nuuvvumic-mixtum variety), this Principle provides process of Their subjective amitsiration to increasingly ampliative Levels (They do not comprehend availability of all multitude of the remaining Directions of own development) allowing Them, before Their «reprojection» to the more universal sections of slloogrent f-Configuration, first fully svilgs-spherationally to synthesize all required OO-UU-Aspects of the more inertial — different- protoformal — Levels of possible exhiberation.

4.1113. By so doing, duvuyllertrt deactivation and successive disengagement occurs in FD of Form-Creators of particular Self-Consciousnesses Forms with those «current» Interests, which are initiated by SFUURMM-Forms of the other (for the given Synthesis Scheme) birvulyarity types. As a result, in Focus Dynamics, only focal-ethereal interconnections of some kind are selectively stabilized (covarllertize) and the real opportunity of self-identification with FDs of Form-Creators of the more ampliative (for the given birvulyart variety!) Self-Consciousnesses Forms appears. In other words, to persistently realize confluence with the more ampliative part of Creative Cosmic Potential (VLOOOMOOT) during amitsiration, Form-Creators of any realizational Form should very scrupulously and successively synthesize many impersept interconnections of the less qualitative exhiberation Levels extrapolating the result achieved by Them to Self-Consciousness of the particular Forms, which will provide Them with new realizational abilities.

## **B) The SSMMOO-OSM Principle**

**«I-am is subjective creative reflection, in Self-Consciousness, of ampliative Cyclicity of Everything in the Whole»**

4.1114. At the outset, it is important to stress that this Principle reflects *not* profective State of the Macrocosmos skrruullerrt system itself (because focal-ethereal interconnections peculiar to it do not repeat anywhere!), but only that part of our subjective attitude to the surrounding reality, which is initiated in Focus Dynamics via specific mental properties and psychic features typical to Form-Creators of our (that is, human) Perception systems. In FDs of our Self-Consciousnesses Forms, subterransive organization mechanism of discrete (detached from everything, what goes beyond our observation abilities) analytic process and building, on this subjective basis, of sort of «reliable» and «logically relevant» chains of cause-effect interconnections between factors analyzed by us compels us to treat various phenomena and events of our Life as certain «objective» trends *cyclically repeating in our rotational Cycle*.

4.1115. Nothing resembling our restricted Conceptions about cyclicity (as a certain periodicity of developments and phenomena, their recurrence in chronological time) exists in United Cosmic Existence of Everything in the Whole! Because our feeling (subterransive experience) of time, which reflects signs of periodicity of one kind or another, represents just only Self-Consciousness subjective

effect motivated by the particular *qualitative state of* Form-Creators of our Focus Dynamics at every instance of our Existence.

4.1116. Our Perception system is able to classify certain events just by the very limited number of the signs intercomplementary to each other in particular things. For example, from the point of view of simultaneous-multipolarizational Existence of all infinite diversity of Form-Creators of all Self-Consciousnesses Forms and CCIs structuring, with own FDs, the countless number of different-level Universes, the sequence of day and night, revolving seasons, sunny and cloudy weather, rotation of the Planets around the Stars, and Stars, in turn, within the Galaxies, do not have any relation to the cyclicity, which we «project» on the dynamics of these phenomena classified by us in accordance with our own observation abilities. Though, since you become able to examine the same facts from the more amplificational point of view (from the more ampliative level of FD exuberation), a huge amount of new signs and cause-effect chains sort of «non-existing» earlier (for the former Observer!) will be put on the previous interconnections, what will change completely your previous subjective Conceptions about presumable for you «cyclicity» of the phenomena analyzed.

4.1117. In particular, you should take at least so familiar to you circadian rhythms using an example of the periodically changing sleep and wake states: when you are asleep, some of many of your «personalized» Interpretations (your other NUU-VVU-Form-Types), in development scenarios peculiar to them, are in the wakeful state and continue to realize actively in some development Directions. The degree of their Creative Activity in no way depends on whether or not you comprehend this. The same is with all your biased Conceptions about «constructiveness» and «destructiveness» of some of the creative processes continuously accomplished both «inside» of yourselves and in the reality surrounding you — this is nothing more than subterraneity reflection of synthetic processes realized via FD of Form-Creators of NUU-VVU-Form-Types focused by you, which Perception systems are profectively restricted by own Self-Consciousness structures specificity (the activity of various IISSIIDI-Centers, NNAASSMM character, VLOOMOOT abilities, and many other factors). Let's say, what you now regard as «destruction» or «chaos» is reflected by the more ampliative realization Forms in some other exuberation conditions, and vice versa.

4.1118. Besides, despite of seeming to us cyclicity of such natural phenomena as day and nightfall (though, this happens differently in different Planet locations), any of these periods is structured with completely different events, actions of various Self-Consciousnesses Forms and their psychic realizations (subjective experience). Every season is also not like any of own previous states. With every new Planet turn around own Star, the countless number of certain changes occurs, which will not ever be repeated and recovered. At the same time, the Star following own regular trajectory inside the Galaxy, on a scale of Self-Consciousnesses Forms and Self-Perception criteria peculiar to It, will not ever «experience» former Itself...

4.1119. Cosmic Cyclicity implies not repetition of something in Time and Space (parameters of both Time and Space are different for any event), but necessity of qualitative repetition (periodicity) of Focus Dynamics manifestation of heterogeneous Form-Creators (as USCF-«projections») in simultaneous Process of amplificational amitsiration in different-Qualitatively structured «areas» of slllogrent f-Configuration.

4.1120. *From the standpoint of our inertial Conceptions*, Form-Creators of every birvularity type, in order to permanently have success in implementation of the Synthesis Scheme (ampliatization) peculiar to Them, should «select,» in the particular way, from all trends simultaneously-multipolarizationally realized by Them and *covarllertly sublimate* only those of impersept combinations of focal-ethereal interconnections synthesized by Them, which are kleksed by the same UU-Factor.

4.1121. To accomplish this Process, They — in the particular svilgs-spherational succession in every manifestation resopason of own Creative Activity! — resonationally «confront» and «analyze» all possible different-protoformal combinations comparing them with those ones peculiar to the next (ampliative, relatively yet sort of not synthesized by Them) Level of Their «future» exhiberation and finally sublimating only the most covarllert among them in the FD. During such Qualitative «selection,» many already quite stabilized combinations iteratively «project» by Form-Creators to many other — also quite stable, but different-protoformal! — f-Configurations (meaning, to what is subjectively interpreted by us as «the surrounding reality»).

4.1122. For example, every stable lluuvvumic Conception, before becoming a part of the more ampliative manifestation Level in FDs of LLUU-VVU-Form Form-Creators, in the notional respect, should be preliminarily qualitatively balanced (in own realization resopason!) with corresponding to it SFUURMM-Forms of Form-Creators of the great number of diffuzgent-protoformal (as regards lluuvvumic birvularity type) development Directions. From the outside, this looks like a person occasionally getting into circumstances very similar by the Sense should learn to take the most ampliative decisions each time finding effective (for this manifestation resopason) Motivations, which will promote formation of relations steady harmonization with various Proto-Forms representatives (including all possible people's types).

4.1123. Although, subjectively and associatively, this process can be accepted by us as «cyclic» one (meaning, repetitive at something — for us!), but in any way, profectively it develops by own Cosmic «Laws» and Principles, which have nothing in common with our own Conceptions about it. By each of the attributes accessible to our Perception and structuring this process in the given resopason of the observation fulfilled by us, we are able «to hook,» by own Self-Consciousness, just a slightest fraction of covarllert causal interconnections associatively or logically «binding» («sticking») them to something we already know. In fact, gabitual Reasons for what is happening with us, «inside» of us, and «around» us always remain a «sealed book» producing many controversial conjectures in our Self-Consciousness, on which basis various protoformal Directions of our development are accomplished via FD of f-Configurations focused by us.

4.1124. Hence, this Principle allows Form-Creators of every Self-Consciousness Form, in own FD, qualitatively to regularize (by availability of some common attributes) simultaneous transgressive-convergentional Process of the overall USCF-realization in all infinite multitude of all possible Directions of its «spheroidal» (different-birvulyart) development, which can subjectively be perceived and assessed by Self-Consciousnesses Forms themselves as the facts of the cyclic appearance of their creative realization diverse conditions (situations, circumstances) in their Existence. Various interactions between diverse Aspects of this Process can be perceived by Self-Consciousnesses Forms of some s-Realities as intensification of Creative Activity state of some particular OO-UU-attributes,

whereas the other trends of the same focal-ethereal interconnections, in the Perception systems of Self-Consciousnesses Forms of the other CSRs, can subjectively be interpreted as oppression of the same OO-UU-attributes down to various states of a certain Creative Passivity. Therefore, *the Conceptions about «cyclicity»* of the same Cosmic Process, which are shown in various exuberation Levels (or via FDs of various Proto-Forms), can be completely different (or be absent at all).

4.1125. This Principle is also reflected rather actively in the character of those subterraneous Synthesis processes, which are implemented via FD of each of our Self-Consciousnesses Forms and subjectively reflected by the way of different-Qualitative states alternately experienced by us: first, creative uprising and inspiration, and then, decline and depression; first, joy and happiness, and then, disappointment and dissatisfaction; first, concernment and keenness, and then, indifference and apathy; first, sympathy and love, and then, antipathy and hate; and so on. So, having synthesized and transmuted interconnections between some OO-UU-Aspects quite thoroughly (for the given exuberation Level!) in own «current» FD (in a very narrow resorption of the subterraneous creative work), you start to experience the Interest decline to the previous creative activity (depression, disappointment, antipathy) and consuetually «reproject» your FCA to the Self-Consciousness structures of those your «personalized» Interpretations, which have the greatest opportunities for Synthesis (in this resorption!) of some other OO-UU-Aspects.

4.1126. Having passed through the particular number of similar Creative Activity heterogeneous uprisings and declines by various development Directions, Form-Creators of your FD *again* begin to experience essential necessity in Synthesis of the same OO-UU-Aspects, with which They've dealt some time before (but in the other manifestation resorption!). And even despite of the fact that since then, qualitative state of the f-Configuration focused by Them has dramatically changed, the effect from a similar — by the particular attributes — interaction associatively activates some of the person's recollections in his/her subterraneous ODS (and with them, the corresponding circumstances), which gives cause to him/her to draw some logical analogs, subjective comparisons, and analysis in own Self-Consciousness: they say, this situation somehow matches to what was before (although, amplificationally, by the state of the «current» and «previous» qualitative positions, there is no occasion for such conclusions). In this way, the Perception system of every person forms subjective Conception about a certain «cyclicity» appearance in the amirsational process. The similar periodicity in our creative states change expressing via alternating priority activity in different development Directions looks (by the mechanism of own realization) a little bit like our vital necessity alternately to inhale the air and to exhale it out of own lungs (after use) during continuous process of breathing.

4.1127. If «to reproject» these Conceptions at the infinity of Our eternal Cosmic Existence (as USCF-«projections»), the conditional phase of «the Cosmic INHALE» — svilgs-spherational activation of synthetic Creative Work of Form-Creators of Self-Consciousness in some qualitative Synthesis Direction — could be characterized as amplificational Creative Work *profectively necessary for These Creators*, which is expressed in acquiring maximal opportunities for Their Focus Dynamics exuberation in some particular birvularity type. At the same time, conditional phase of «the Cosmic EXHALE» (activity in some other qualitative Synthesis Direction) performed along with «INHALE» reflects by Itself required Process of energy-informational preparation of *the same* Form-Creators to the next phase of «the Cosmic INHALE» (in accordance with gabitual conditions of Their further eglleroliftive Amplification in *the same* birvularity type). One should deeply understand that there

is and can be no any energy-informational (and moreover — Spatial and temporal!) «pause» between these two conditional kinds of Focus Dynamics of heterogeneous Form-Creators (so called «Cosmic INHALE» and «Cosmic EXHALE»).

4.1128. Multipolarization of Focus Dynamics of Form-Creators at once embraces many birvularity types, which, depending on covarllertness degree between each other, differently structure, with own attributes, the same resopasons of simultaneous manifestation of different-Qualitative f-Configurations of Form-Creators. Hence, perception of something regularly repeating something else (psychic state, circumstance, phenomenon) dramatically weakens and dissolves, with *rising ampliaticiveness* of Self-Consciousness Form general FD, among all multitude of the other subjective feelings. Multipolarizationally-simultaneously realizing in the whole infinite variety of Form-Creators of each of manifestation resopasons via many different-protoformal birvularity types, subjective Conceptions about a certain «cyclicality» of everything happening to us and around us lose that limited Sense peculiar to them, while increasingly actively merging with SFUURMM-Forms of those among our Self-Consciousnesses Forms, which structure more universal Processes.

### C) The SLLAA-KHOO-OTL Principle

**«I-am is subjective creative reflection of the Cosmic Rhythmicity property of Everything in the Whole»**

4.1129. This Principle strengthens and functionally provides holochrone availability of resonational focal-ethereal interconnections in any Level of simultaneous exhiberation and all possible creative interactions between all heterogeneous Form-Creators. Reflecting in a special way (that is, subjectively) via Focus Dynamics of Self-Consciousnesses Forms of different-protoformal birvularity types, it forms, in them, required realizational opportunities allowing them to establish order (as unconditional Order) in perception of all interconnections of the surrounding World in each of the Levels of their appearance in FD (in macrocosmos conditions — in own way, logically, regularly; in microcosmos conditions — in own way; and so on, by every realizational parameter of a Plasmic Forces Diapason).

4.1130. Functionally completing The SSMMOO-OSM Principle, it excludes any chance of exhiberation and subjective Existence of any of Self-Consciousnesses Forms beyond sphere of specific influence of profective features of those Cosmic Laws on them (on SCFs), which are typical to these PFDs Levels and birvularity types. By the term «Cosmic Rhythmicity» one should mean the general (for all Macrocosmos) set of focal-ethereal interconnections, «inside» of which there is gabitually conditioned particular opportunity and attractor-like expressed sequence in holochrone implementation (consummatization) of the overall formation Process of absolutely harmonized Energy-Plasma state on the basis of focal-ethereal interconnections all infinite variety.

4.1131. Every Rezmiral of creative manifestation — by some particular heterogeneous (different-Qualitative) attributes combinations peculiar only to It — is resonationally interconnected

most of all with some other Rezomiral of manifestation, which has caused the highest degree of creative interaction between Their Form-Creators in the given Direction of the Cosmic Creative Work ambigulyar to Them. But each of These maximally interacting Rezomirals has concurrently implementing «spheroidal» interactions also with many other Rezomirals resonating to varying degrees (but less than with the main one!) with some of the attributes combinations subterraneously peculiar to them, right up to the complete absence of any creative interactions with some of the cruvursorrt Rezomirals infinite multitude.

4.1132. Since every Rezomiral specifically reflects realizational needs and abilities of Form-Creators of the definite birvulyarity type, *first of all(!)*, the most powerful resonational interactions are svilgs-spherationally accomplished in Focus Dynamics of mono-birvulyart (single-type) and different-birvulyart (different-type) Form-Creators, followed by the less powerful interactions, which duvuyllerrtly-successively «fade away» with respect to the power and ability to interact in each of the more impersept «points» of this realizational «spheroidicity.» If to imagine roughly this Process of creative interaction between FDs of the countless number of heterogeneous Form-Creators, the image obtained will correspond mostly to what we interpret as «the decaying pulse.»

4.1133. In so doing, each of accomplished interactions has initiated, in FD of each of Form-Creators, the particular energy-informational conversion, which thereby has changed «initial» conditions and opportunities for realization of «the next stage» of inter-rezomiral focal interactions (again — from the most intensive ones to the passive state) in the general «volume» of focal-ethereal combinations. This eglleroliftive effect produces what we define as Cosmic Rhythmicity via subterraneous state of *every* Focus Dynamics.

4.1134. Virtually, after every focal perturbation (it is shown in nutational exuberation conditions via so called «Self-Consciousness quantum effect» — qualitative «displacement» of FCA between many different-Qualitative f-Configurations), Focus Dynamics of Form-Creators enters a special regime of the potential manifestation — the zeroth ingredient dimensions. The next simultaneous multipolarization of Focus Dynamics is realized, in fact, out of it (via FCAs all variety of different-Qualitatively modified Form-Creators) to all possible Form-systems of the Worlds. The important thing to understand here is that all infinite variety of qualitative conversions in focal-ethereal interconnections all possible combinations (the Process of so called consummatization) has been *already* accomplished in absolutely all versions of gabitual Reality. Though, we consider just very narrow spectrum of some, concatenationally accomplished, interstitial results of this Act accessible to Form-Creators of our Perception system.

4.1135. Together with change of our «current» realizational abilities and lifting of restricting factors of the given Synthesis Scheme (although, we realize ourselves simultaneously in many different-protoformal birvulyarity types), our FCA continuously eglleroliftively «displaces» from some geyliturgent combinations (the most covarlert ones in respect of interconnections of some particular «pulse wave») to — again! — geyliturgent interactions with Form-Creators of the other combinations. During such regular transmutations, *relative* concatenational (svilgs-spherical) liyllusceevation of the most harmonious (to the given exuberation resopason!) interconnections

and the following qualitative «displacement» of FCA to recurrent «resonational wave» of the given Cosmic Rhythm (birvulyarity type) occurs.

4.1136. The kinds of complex rhythmicity, which we are able to observe and analyze directly: the tides, water temperature deviations in the North Atlantic, the Sun's activity changes, the Earth's rotation around own axis (diurnal cycles), the Moon's rotation around the Earth (monthly cycles), the Earth's rotation around the Sun (annual cycles), the Solar system turns around the Galaxy core (the cycle of 180–200 million years), and the others just subjectively reflect, in our Perception systems, some (the slightest!) part of the particular Dynamics of inertial qualitative «displacements» of Form-Creators FCAs of diverse Self-Consciousnesses Forms in conditions of the birvulyarity types peculiar to them.

4.1137. At best, we can observe only very confined (the most covarllert one concerning our Synthesis Scheme) «volume» of those transmutational-multipolarized «displacements» which are carried out «at every instant» by every Self-Consciousness Form in conditions of the zeroth ingredient dimensions peculiar to it. The lion's share of focal-ethereal interconnections formed by the Cyclicity and Rhythmicity Principles remains completely unreachable for bio-Creators of our Perception. Without the ability to put together absolutely all picture of qualitative interactions accomplished at that, They give us (on «the personalized Bioscreen» of Self-Consciousness — ILLGRII-TO-O), for sort of quick look, only the roughest «sketches» of the reality surrounding us, which we subjectively interpret as some «creatures,» «items,» «cosmic objects,» «natural phenomena,» and so on.

#### **D) The FFEERR-OO-OKKRR Principle**

**«I-am is subjective creative reflection of aspiration to Cooperation of Everything in the Whole»**

4.1138. This Principle defines obligatory intercomplementary and interdependent demands for creative Cooperation of all infinite multitude of Form-Creators of Collective Cosmic Intelligences of all development Levels and Existence types as essential qualitative basis of implementation of the simultaneous creative realization Process of Macrocosmos HCCI FD. Reflecting certain among consummative (amplificational) features of eglleroliftive Impulse-Potential, this Principle obliges every Self-Consciousness Form actively and creatively to interact (cooperate) with the other Self-Consciousnesses Forms — both depliative and ampliative ones — thoroughly assisting with own Experience to implement subterransive Self-Cognition Processes peculiar to them.

4.1139. This essential demand of Form-Creators for active Cooperation is provided by availability of such Information gabitual property as covarllertness (potential qualitative compatibility between heterogeneous SSS-attributes), which is reflected, in manifestation conditions of skrruullerrt system all possible focal-ethereal combinations, by the way of the definite resonational Activity initiation between diverse Focus Dynamics. Simultaneously-multipolarizationally realizing via Self-Consciousnesses Forms infinite multitude structuring different-protoformal birvulyarity types, heterogeneous Form-Creators actively intercomplement Each Other throughout the whole spectrum of such possible for

Them qualitative interactions, which make the notions of «depliativeness» and «ampliativeness» to disappear completely. This is what we determine as Cosmic Cooperation of Everything in the Whole.

4.1140. An example reflecting such Cooperation could be exhibition Mechanism organization principle itself in the given dimension diapason of f-Configurations of our NUU-VVU-Form-Types: every relative «instant» of our Focus Dynamics subjective exhibition is supplied with the integral of ambigulyar simultaneous creative work of several «hundreds» (duvuyllerrt — 300–500) our depliative (absensive, nutational-doolls) and several «tens» (20–50) ampliative (nutational-flaks) «personalized» Interpretations (though, one should take into account that *each* of them, in turn, is also initiated by own duvuyllerrt Interpretations, and those ones — with own Interpretations, and so on), which qualitatively intercomplement each other and 250–400 times per second sort of «replace» each other (by whole resonational groups) in our own Focus Dynamics and energetically and informationally fully supply our inertial Existence (the «current» amitsiration) permitting Conceptions peculiar to us to reflect subjectively in the World surrounding us. Besides, we also creatively and comprehensively cooperate with all multitude of different-protoformal Self-Consciousnesses Forms somehow interacting with us, while consciously or unconsciously translating typical for us SFUURMM-Forms into their FDs.

4.1141. Form-Creators of various groups of doollls Self-Consciousnesses Forms ambigulyarly cooperating and resonationally combining with Each Other (by a certain realizational Interest) in our FD, in this way, share with us empiric Experience already synthesized in Their Levels (so called collective unconsciousness) and get in return, by the intuitive way, more ampliative options of own possible choices from Form-Creators of our personalized Self-Consciousness. In the same way, our «group» cooperation with Form-Creators of ampliative (dimidiomittense and translucense) NUU-VVU-Form-Types occurs: Form-Creators of our mixtum «personalized» Interpretations all variety unconsciously generate and translate, in Their FDs, empiric Experience peculiar to us receiving in return opportunity of intuitive connection to certain combinations of Their subterransive Experience (meaning, to collective Subconsciousness).

4.1142. This could be relatively compared with cooperation of many creative teams representatives jointly participating in creation and promotion of some specific product (for example, computers, cars, space vehicles, architectural constructions, scientific concepts and theories, and so on). Just as they, on own theoretical and technical base, actively and interactively help each other to create the final product, we resonationally interact, at every second, in the World surrounding us, with Form-Creators of Self-Consciousness of many Proto-Forms anything like us, but more often completely different from us, while concurrently «giving» and «receiving» all possible OO-UU-Aspects, which we need to realize our essential Interests, to rise ampliativeness of NUU-VVU-Configurations continuously focused by us. This process would be impossible without availability of such eglleroliftive trend, for all Form-Creators, to overall Cooperation.

4.1143. This Principle is actively enabled in the harmonious ordering Mechanism organization (in the new interpretation for them) of all possible *dissonational* focal-ethereal interconnections between all heterogeneous Form-Creators. All these interconnections have been consuyetally generated as a result of Creative Activity of YYYU-LLU-AYY — «The Law of the Qualities Destruction

and Destabilization,» which provides (in consummative State) postmercavgnational appearance of all possible irrkoglictive trends in SSS-Entity Self-Consciousness. To achieve the potential confective State qualitatively differing from primogenitive One by universalization greater degree, one should somehow to strengthen and enhance the abilities of *previously impersept* (in primogenitive State!) SSS-fragments for the deeper *covarllert* interaction.

4.1144. This impact is reached due to the fact that internousness of SSS-fragments previously impersept to each other — under interactional influence of the process of multipolarizational kleksing in Focus Dynamics of Form-Creators — begins to change actively towards convenientization (harmonization) of not only inter-skunkktional informational structures, but also — due to corresponding eglleroliftive perturbations — microstral interconnections (elementary microstrs) «inside» of every skunkktion, which are potentially peculiar to it before mercavgnation Act initiation. In Self-Consciousness of SSS-Entity, irrkoglictive Impulse-Potential demonstrates capacity of possible to It qualitative conversions. It is possible to achieve them only with the help of the powerful activation of the trends to *resonational* Cooperation between «previously» weakly active (impersept) or directly in no way active (cruvursorrt) skunkktions (which «projections» are presented by Form-Creators and Info-Creators creative work in conditions of Form-systems of the Worlds).

4.1145. In subjective Conceptions peculiar to us, this Principle always initiates Form-Creators of various Self-Consciousnesses Forms destructive to each other to svilgs-spherational activation of own FD and search of any opportunities for the further Cooperation in any among Levels of Their ambigulyar manifestation (for compulsory annihilation of available tensors). When there are at least some resonational interconnections between Them, Their FD should be oriented at the even greater perfection and strengthening of these interconnections in various manifestation resopasons via the other birvulyarity types, and at the entering interactions qualitatively new to Them. This allows to bring out Their Focus Dynamics at the completely other Levels of ambigulyar creative relations, where tensorness degree between Them duvuylerrtly degrades.

4.1146. In the psycho-mental specificity of our subjective Existence, this Principle manifests as a potential opportunity to solve all actual issues (tensors, seemingly, completely incompatible positions, irreconcilable differences) not by increased confrontation and irreceivability of any consensuses, but with the help of the active search for mutual understanding, chance of give and take and respectivity for differing viewpoints. This refers not only to relations between Form-Creators presenting the same Synthesis Scheme, but also to the interaction principles between different-protoformal Form-Creators providing in this way, in every exhiberation Level, concatenational Process of qualitative convergence of birvulyart varieties all multitude to the more and more universal birvulyarity types.

4.1147. It also should be noted that this Principle, in eglleroliftive realizations peculiar to it, is functionally complemented and actively regulated (corrected) depending on the degree of its compatibility with the Principles of such Cosmic «Laws» as TUURR-MOORR («Reactions Self-Balancing») and AAKK-BRRAA («Creative Self-Determination Equal-Opportunity»). This puts those particularity and specificity on each of energy-informational interactions, which define the real opportunities of any conflict situation settlement from the standpoint of the search of its diplomatic solutions or with the help of the other interactions. The most primitive of the latter is the trend to

the destructiveness state intensification, which will be followed, after aggressive annihilation of the most tensor interconnections (and Self-Consciousnesses Forms stimulating them), by the search of the new constructive solutions.

### E) The SSPPAA-OO-OSM Principle

#### «I-am is subjective creative reflection of aspiration to Co-Creation of Everything in the Whole»

4.1148. This Principle defines profective inevitability of creative participation of any Self-Consciousness Form in eglleroliftive-consummative implementation of the United Plan of duvuyllerrt formation of Macrocosmos all skrruullerrt system. The potential Resonationness Principle of focal-ethereal interconnections between primogenitive SSS-State fragments and consummative SSS-State fragments «projections» induces all participants of this overall amplificational Process to interact with each other *creatively* (and *svilgs-spherationally*) with the aim of persistent search and accomplishing of potentially possible — more and more harmonious and perfect — realizational interactions between them.

4.1149. Aspiration to Cooperation gabitually peculiar to Form-Creators of all Self-Consciousnesses Forms initiates, in Their FD, need to interexchange of the Experience (specific Creative Work) already synthesized by Them. As the result, qualitative state of Their implementation of further Creative Activity acquires trends towards diversified universalization throughout the whole multipolarizational spectrum of Their FDs. This circumstance stipulates availability of the particular state of *dependence* between all heterogeneous Form-Creators, which is functional interconnection during Their acquirement of more and more realizational opportunities in each of the specific exhibition conditions of Self-Consciousness Form focused by Them.

4.1150. The consequence of this is increasing expansion, in front of Them, of subterransive abilities of simultaneous focusing in Self-Consciousnesses Forms of the countless multitude of different varieties and types of birvulyarity (different-protoformal Synthesis Schemes). This increases dramatically Their creative functionality in the general amitsirational Process. As a result of such creative «expansion» and «integration» of different-protoformal Form-Creators functions, concatenational convergence of Their focal-ethereal interconnections occurs consuyetally in «the areas» actively resonating with each other, which structure different birvulyarity types, and Their creative qualitative conversion takes place to the new varieties and types representing emergent properties, meaning, which are already more universal by own realizational abilities, than each of «the previous ones» independently.

4.1151. You should never forget that the main Purpose of Cosmic Existence (multipolarizational amitsirations) of Form-Creators of any Collegial Cosmic Intelligences is total qualitative Integration of all infinite multitude of Focuses sequentially (and duvuyllerrtly) initiated by Them into increasing ampliative states right up to absolute liyllusceevation and final consummatization of all focal-

ethereal interconnections. Through such Cooperation of all Form-Creators, fundamental energy-informational base is produced for implementation of eglleroliftive Amplification Process of all dissonational interconnections «projections» of SSS-Entity Self-Consciousness to the more ampliative, for It, confective USIP-State.

4.1152. Let me remind you that each of Form-Creators structuring, with own FD, this — synthetic — Macrocosmos type represents the regular result of mercavgnational Initiation, in Information primogenitive State, of eglleroliftive Impulse-Potential specific properties «projected» on not less specific features of irrkoglective IP. Hence, Focus Dynamics of every Self-Consciousness Form generated by Them has «the recurrent» trend («eglleroliftive reaction») svilgs-spherationally «projected» to its f-Configuration, which persistently stimulates, in it (in FD), totally unreplaceable state of internous demand for qualitative «reunification» with own increasingly ampliative versions.

4.1153. This Process of the total simultaneous amplification of USCF-«projections» all variety diversified via UPDR on many heterogeneous attributes is accomplished, in conditions of multidimension of the Tertiary Illusion, via active Cooperation of Form-Creators of Proto-Forms countless number interacting with each other with various Creative Activity and producing more and more «intermediate» birvulyarity types via ambigulyar contacts (SFUURMM-Forms) of the Synthesis Schemes peculiar to Them. For example, active Cooperation of Form-Creators of nuuvvumic-mixtum birvulyarity variety with Form-Creators of many different-protoformal mixtum and transparentive birvulyarity varieties, after reaching the definite level of creative compatibility between Them, obtains opportunity for ambigulyar realization via more ampliative NUU-VVU-Form-Types of the more universal — nuuvvumic-dimidiomittense — variety of lluuvvumic birvulyarity type.

4.1154. In parallel with this process, as a result of creative implementation of such multipolarizational interactions, birvulyart decondicification of Focus Dynamics of Form-Creators (subjective self-disengagement with Self-Consciousnesses Forms of some particular Synthesis Scheme) and Their simultaneous amitsiration to f-Configurations of Self-Consciousnesses Forms structuring many other birvulyarity types take place. As regards exhiberation conditions in «the previous» Synthesis Scheme, we perceive all these amitsirations types as retardation (with the following person's qualitative degradation) transforming to successive FD reformatting between heterogeneous Form-Creators through Their Cooperation growth with Form-Creators of the Dominant not peculiar to the given Synthesis Scheme (meaning, replacement occurs, in lluuvvumic Form-Creators FDs, with invaderental activity of Form-Creators representing vecsative OO-UU-attributes).

4.1155. From our subjective point of view, this Principle is aimed at enabling Form-Creators creative groups (or rather, amitsiration realized by Them) with continuous *amplificational* directivity, which is reflected, in FDs of our NUU-VVU-Form-Types, as its constant perfection and choices universalization in lluuvvumic birvulyarity type. This Process is realized on the basis of active svilgs-spherational Cooperation of lluuvvumic Form-Creators with Form-Creators of Proto-Forms all variety diffuzgent in respect of our Synthesis Scheme.

4.1156. Subjectively, the Essence of all «our» Cooperation with all possible representatives of the World surrounding us (from «our own kind» and animals to vegetables, microorganisms, minerals,

and cosmic macroscopic objects) boils down to the opportunity of each subsequent duvuyllerrt perturbation of «our» FD to be qualitatively based on increasingly ampliative (concerning specific conditions of the given Synthesis Scheme) focal-ethereal interconnections, which will permit Form-Creators to focus in increasingly covarllert (which means more informationally capacious, more steady by own Sense!) combinations of slloogrent f-Configuration.

*«The Law of eglleroliftive amplificational Coordination of Focus Dynamics of all Self-Consciousnesses Forms»*

**RUYYYUUR-TUUSST**

**«The Law» realizational Essence**

4.1157. There is unconditional amplificational joint subordination of Focus Dynamics of all depliative multiplicities of Form-Creators (Self-Consciousnesses Forms) to realizational demands of Their ampliative multiplicities «projections» realized on the basis of eglleroliftive Impulse-Potential common to all of Them. In other words, all infinite diversity of different-Qualitative realizational Creative Work of Form-Creators of many depliative Self-Consciousnesses Forms structuring single-type CCIs is realized by means of unconditional orientation of this Work on conformity with the goals and tasks of collective Creative Work of Form-Creators of the more ampliative Self-Consciousnesses Forms, which realize simultaneously with them in the more universal exhibition Levels of the given birvulyarity type.

4.1158. Actually, ampliative f-Configurations represent more qualitative options of concatenational convergence, in the given birvulyarity type, of *the same* Form-Creators, which is duvuyllerrtly accomplished on the basis of the more depliative «areas» of own slloogrent f-Configuration. By Essence, those *better* and *more perfect* things manifested subsequently at each of intermediate stages of Form-Creators general amitsiration in conditions of the given Synthesis Scheme identify by themselves (by own simultaneous availability) all gamma of possible choices for their less ampliative realizations. That is, the particular qualitative Subordination takes place, which precisely and strictly coordinates the sequence of amitsirational process various stages implementation in Form-Creators slloogrent FD.

4.1159. It should be recalled and pointed out here that the term «coordination» (from lat. *coordinatio* — inter-regulation, ordering) is usually explained by all of us as a necessary constituent part of any organizational process; its essence is search and sequential realization of all moments of functional consistency and qualitative ordering of the process implementation, without which stable interaction between various parts (areas) of the functioning system becomes just unfeasible.

4.1160. In relation to «the Law» under consideration, this definition is extremely incomplete and therefore applicable to this «Law» only partially. This is, first of all, owing to availability of such Information property as *holochrone Simultaneity* of absolutely all SSS-interactions (as intermicrostral and inter-skunkktional, as focal-ethereal ones) directed on full balancing and comprehensive harmonization of Its general amitsissimal (primogenitive + consummative) State.

4.1161. The main feature of all Self-Consciousnesses Forms subjective Existence is that absolutely all — gabitually possible for the given irrkoglictive-eglleroliftive mercavgnation Act — Cause-Effect interconnections have been already realized in its entirety and variety. The effect of «the current» Existence itself is caused, in the Perception systems of Form-Creators of any Self-Consciousness Form, by availability of a certain sense (qualitative) difference (so called dissonational distance) between Macrocosmos general (already holochronely formed by the way of skrruullerrt system) f-Configuration areas simultaneously fixed by Them.

4.1162. This is dissonational distance energy-informational parameters (profective difference between «locally disharmonious» and «potentially harmonious» FD qualitative states) generated as a result of mercavgnation, which produce (initiate), in subterransive Focus Dynamics of Self-Consciousnesses Forms, the stable subjective effect. We interpret its signs as «geometric Space» and «chronological Time.» Though, in holochrone Harmonious Completeness of SSS-Entity absolute consummatization State (when Macrocosmos of all types are spheroidally-diffuzgently balanced between Each Other by all focal-ethereal IP-combinations peculiar to Them), any Space and Time parameters can be in no way exhiberated, since resonational-rotational Process of overall heterogeneous liyllusceevation of all possible SSS-interconnections has been almost completed, thereby attractorily-orderly (svilgs-spherationally) producing, in SSS-Entity Self-Consciousness, the infinite number of different-Qualitative exhiberation Levels of f-Configurations of Form-Creators of absolutely all Self-Consciousnesses Forms structured with abyssal Focus Dynamics of all Macrocosmos HCCIs.

4.1163. This «Law» functional features are based, first of all, on the incontestable — already holochronely accomplished! — Fact that «Absolutely Everything available *already* Exists;» and this circumstance reflects a prerequisite to the ordered formation and providing the general Cosmic Well-Being, despite of *how* any of locally expressed conditions (situations) of this completed Wellness is subjectively perceived by whoever, in accordance with egoistic interests peculiar to him/her and limited Conceptions formed on such basis. That is because any prosperative (subjectively more favorable to somebody) options of concatenational-spheroidal formation of all focal-ethereal interconnections generating Macrocosmos skrruullerrt system every «area» (focus parameters of FD exhiberation *given* regime) are simply unfeasible in ambigulyar propozitumness of CCIs overall Coexistence.

4.1164. Any signs of vitiumness (unfavorable realizational treatment) of a situation subjectively perceived by us just profectively reflect the fact of availability, in amitsirational process already formed by us, of particular dissonational subjective Conceptions (world perception, relations, cause-effect interconnections interpretation) destructive for exhiberation propozitum conditions in the given Synthesis Scheme, which prevent your FD to manifest in conditions much more favorable (harmonized) to your development in this birvulyarity type. To change, in your Existence, any vitiumness aspect

on prosperativeness corresponding to this manifestation regime, one should exclude as much as possible sources of spontaneous tensoriness from own FD, which are based, first of all, on ignorance (including scientific perspectives incorrectness, incompetence, psycho-mental narrow-mindedness), on lack of knowledge or understanding, both generally and particularly, of functioning Mechanism of the Cosmic «Laws» and Their Principles regarding the given Synthesis Scheme.

4.1165. This «Law» Realizational Essence boils down to ordered svilgs-spherational organization of any Focus Dynamics strictly in accordance with demands placed by the general Resume of already accomplished absolute consummatization Act directly concerning exhiberation conditions of every «birvularity manifestation point» («local area» of slloogrent f-Configuration, Self-Consciousness Form). The Principle of the most favorable treatment (realizational prosperativeness) will be executed only in the case of the most qualitative correspondence of interconnections structuring FD Conceptions with those attributes combinations, which are typical to the given specific birvularity «area,» through which this Self-Consciousness Form is reflected.

4.1166. For example, the more typical attributes of nuuvvumic-mixtum variety of lluuvvumic birvularity type (*high-sensual Intellect + high-intellectual Altruism + immunitant Responsibility = humanitarian Freedom*) will be able to reflect in Focus Dynamics of the human Collective Consciousness, the more favorable conditions for effective amitsiration (ampliative development) of all NUU-VVU-Form-Types (people) structuring it will be organized in these Space-Time parameters. Every more or less tensor Conception, with respect of exactly this attributes combination (HSI+HIA+IR=HF), actively realized via general Focus Dynamics of Collective Consciousness contributes own destruction to it influencing on the general process of formation and reflection of those collective subjective Realities (CSRs) types in Space-Time, which are more or less disharmonious as regards ideal conditions of Amplification Process of Form-Creators via Self-Consciousness of NUU-VVU-Form-Types mixtum analogs.

4.1167. Any critical, by own potential (meaning, stable and intensive), qualitative displacement of person Focus Dynamics beyond conditional limits of this Formula is fraught with involving of its subterransive amitsiration process into finitimus exhiberation conditions (some of the protoformal development Directions), where human realizational abilities begin sequentially to yield more and more to activity of the Interests peculiar to Form-Creators of certain Proto-Forms, and also background appears for global destruction of existing human civilization achievements and people's massive physical extermination (bloody international wars, revolutions, planetary pandemics, ecological and climatic cataclysms).

4.1168. This «Law» demonstrates opportunity of appearance of such Energy-Plasma property in slloogrent FD any part as svilgs-spheration — availability of already potentially ready, fully complete (by mercavgnational Sense) State of focal-ethereal interconnections absolutely all «projections,» where f-Configuration of each of the more duvuyllerrtly ampliative (to the given Synthesis Scheme!) Form-Creators represents original priority sample (qualitative reference point) for FD amitsiration of the more depliative (to the given Synthesis Scheme!) Form-Creators, Who will subjectively identify Themselves with this sample signs «afterwards» (possibly, already in the next own focal displacement).

4.1169. In a particular Self-Consciousness Form, depending on Creative Activity intensity of SFUURMM-Forms (their stability and intensity) typical to the given Synthesis Scheme or others, multipolarizational process of «the current» amitsirations is accomplished; it includes either concatenational deepening to scenarios of the more ampliative CSRs options, or successive growth of certain protoformal trends with the regular «immersion» of FD simultaneous versions to the more depliative development scenarios. In the latter case, so called time loops are produced — functional depliative deviations of amitsirations of FD of Form-Creators of Self-Consciousness from invaderentness principle peculiar to the given Synthesis Scheme. However, more and more increasing catalyzing processes make it difficult for invaderental Form-Creators to actively interact between Each Other, what reorientates Their FDs SFUURMM-Forms on the enhanced cooperation with vecsative Form-Creators (this entails the slowdown — person retardation, degradation). This is the way, Form-Creators amitsirations to Self-Consciousnesses Forms of many other diffuzgent birvulyarity types is carried out — sequentially and insensibly for a person themselves — in different-Qualitative spectrums of FD general multipolarization.

4.1170. Besides, you should take into account that, *apart from subterransive Focus Dynamics*, there is no other — special — *subjective* Mechanism of conscious and purposeful (in our understanding, with corresponding vital experience and mental manifestations!) correction of energy-informational interactions among Form-Creators of the same birvulyarity type, since «psychic» constituent of every Self-Consciousness Form represents qualitatively continuously changing *resultant vector* of the whole sum (overall creative potential) of realizational Interests, which are able, in one way or another, to reflect via Focus Dynamics of all multitude of different-protoformal and different-Qualitative Form-Creators structuring «locally» expressed FD of the given Self-Consciousness Form at every conditional «instant.»

4.1171. Profectively, there is only one Mechanism of eglleroliftive amplificational Coordination of Focus Dynamics of all Self-Consciousnesses Forms — *svilgs-spherational* one (meaning, which gabitually defines achievement possibility of the state of even higher covarllertness and Resonationness in every focal-ethereal combination, allowing for retaining specific invaderentness — for every Synthesis Scheme — between attributes structuring it), which takes into account and implements, in «projection» of every focal-ethereal interconnection, absolutely all potential opportunities of propozitum combinations of already finally accomplished Energy-Plasma internous State. These combinations simultaneously constitute absolutely all infinite multitude of Macrocosmos different-type Illusions — different-Qualitative options of development scenarios, and also all types of Form-systems of the Worlds, STCs, and CSRs generated by them, space-time Conversums and Universums.

## The adapted Principles

### A) The TUURRT-UUSS Principle

**«I-am is subjective creative reflection of profective results of amplificational Subsidiarity of Forms of Existence of Everything in the Whole»**

4.1172. We should understand very important thing in the definition of the Subsidiarity notion used by us (which is multilevel organization system of Focus Dynamics of every Self-Consciousness Form *with strict congruence* of Focus Dynamics of Form-Creators of depliative — for the given Synthesis Scheme! — exhibition Levels of many Self-Consciousnesses Forms in the exactly determined Focus Dynamics of Form-Creators of the more universal to Them Self-Consciousness Form of the ampliative Level). This is, actually, not about some *conscious* interactions between different-level Self-Consciousnesses Forms aimed at making the more ampliative Form-Creators to dictate own «will» and vision (Conceptions) to Form-Creators of the less developed Self-Consciousnesses Forms.

4.1173. True, any organizational structure characterized by multilevel management and strictly subordinated volume of managerial decisions taken at every level, in this case, is out of the question, as well as there is no question of such organizational principle, at which all «projections» of Macrocosmos Form-Creators are strictly allocated to vibrational Levels peculiar to them. As a result, all skrruullerrt system becomes sort of multistage. The hard part of your formation of the more deep and profective Conceptions about Macrocosmos «structure» lies in the presence of such universal Information Property as Sll oogrentness, which transforms, at dissonation definite degree between f-Configurations of Form-Creators, in Perception systems of Self-Consciousnesses Forms focused by Them to subjective experience of some particularity, separateness towards the other Forms.

4.1174. The main Essence of conditional Cosmic Subsidiarity of Macrocosmos all Form-structures lies in the fact that there is no any subsidiarity: every *depliative* focal interaction between Form-Creators expressed via *multipolarizational* FD as a set (gabitual spectrum) of the infinite multitude of particular choices (as implementation of essential Interests all options) is profectively motivated, in Self-Consciousness, by potential availability, in the given f-Configuration, of simultaneously already accomplished *ampliative* interactions between qualitatively different «projections» of the same Form-Creators. And vice versa: the more ampliative (universal) choices become possible as a result of concurrent with them implementation (in the other development scenarios) of all number of the less qualitative choices. Their summary experience, while simultaneously «projecting» to the other «areas» of sll oogrent f-Configuration of Stereo-Form, preserves *the same* Form-Creators from making many possible «mistakes.»

4.1175. The simultaneous presence of this subjective difference in the structure of sll oogrent Focus Dynamics predetermines its subterransive conditional «division» (in the Form-Creators Self-Consciousness) into all multitude of different-Qualitative options, each of which, while resonationally initiating skrruullerrt system «area» peculiar only to it, produces an effect of subjective functional diversification of this system on the infinite multitude of f-Configurations of Self-Consciousnesses

Forms sort of particular to each other. From the profective point of view, each of FDs more depliative parts (SFUURMM-Forms) is motivated, at own perfection (universalization) on the given Synthesis Scheme, by its more ampliative part, where tensor interconnections peculiar to it have been already annihilated owing to their «further» covarllertization.

4.1176. Let's consider this in the case of sequential perfection, in Self-Consciousness, of mechanism of our making more and more altruistic choices. Egoistic person does not manifest them at all, but due to the gradual development (Synthesis of the more covarllert interconnections between ALL-Love–ALL-Wisdom and ALL-Will-of-ALL-Intelligence invaderental attributes), the natural demand appears in his/her activity to obtain periodically more complex experience and realize through taking more radical (contradictory by implication) decisions. Every act of the primitive altruism shown by him/her is internally motivated, first of all, by appearing, to him/her, of opportunities of own ambitious Interests realization: advantage in the way of the higher self-esteem, own arrogance feeding, satisfaction through own significance and exclusiveness realization, and also in the way of experiencing grateful, respectful, appreciative response, dependence, chance to strengthen own authority over others, and others.

4.1177. Accomplishing this process, he/she consuyetally acquires both material (change of the value criteria) and moral psychological satisfaction (purely physiological pleasure due to a huge release of all possible endorphins to the organism). Gradually, he/she becomes dependent on this pleasant experience and starts to feel the essential need for it. Inevitable consequence of these positive states is reappraisal of the life values and decrease, in his/her Self-Consciousness, of the Interest to the previous egoistic realizations. During rethinking of relations with the surrounding World, he/she produces necessity of the deeper understanding of the Essence of everything what happens to him/her and around him/her. In this way, the person successively comes to adoption of some religious (or esoteric) World order conception.

4.1178. With extending of spiritual Conceptions, motivations of altruistic choices carried out by him/her increasingly lose own conscious-egoistic color shifting towards establishment of the more stable and deep subterransive relations with «God» («Absolute,» «Allah,» and others), Who personifies only the most perfect, harmonious, almighty, precious, and above all, *humane* things in his/her Perception (since, in the most confessions, «God» on the Earth is presented via own «perfect Son,» or own «trusted Representative» — a Prophet). After achieving such psycho-mental states, every altruism act is carried out by him/her as spiritual Sacrifice to this «God,» as essential necessity to reach at least any likeness with It, to acquire at least any resemblance with the choices, which — supposedly, on conscience — must characterize «His Son.»

4.1179. Thus, material interest of altruistic act already loses own actuality, and endorphins release stimulating unmatched high-feeling, reverent state is perceived as the evidence of «unearthly Grace» appearance, which has been heaven-sent by «God» for a plausible deed. Ability of the deep suffering of these unusual psycho-mental states brings even more powerful incentive to Focus Dynamics of this person for his/her realization in even more radical (with respect to surviving and ambitious egoism SFUURMM-Forms) altruistic choices.

4.1180. In accordance with the iissiidiological Conceptions, the image of «God» psycho-mentally formed in every individual's FD (which happens even for incorrigible atheists at a subconscious level!) is speculatively produced and subjectively perceived by him/her Form of «Themselves» demonstrating all those potential opportunities, abilities, and propensities, which the person would prefer to possess, but which, due to his/her deepest narrow-mindedness and ignorance, seem to him/her as completely unreachable. Though, being already realized in the other FD exuberation conditions (in many most diverse options), these steady ampliative SFUURMM-Forms forming all interconnections of collective Subconsciousness become the basis for appearance, in FD of this person, of the subterransive amplificational effect usually determined as «Death.»

4.1181. This is availability of Conscience as «projection» of potential opportunities *already realized* in the more prosperous exuberation conditions. It is the Standard and main Fairway for the amitsiration process, which is used by Form-Creators of every NUU-VVU-Form-Type to orient during own realization in lluuuvvumic birvulyarity type. Under its guidance, in each of own choices, person thereby spatiumally each time enters psycho-mental contact with FDs of some of the more ampliative versions of own «personalized» Interpretations. And bringing qualitative state of SFUURMM-Forms of own FD to the geyliturgentness state (covarllertness high degree by many attributes combinations) with the more ampliative part of own slloogrent f-Configuration, person undertakes confluence act with it (meaning, psycho-mentally self-identifies with Self-Consciousness Form qualitatively corresponding to it).

4.1182. On this example of sequential amitsiration and concatenational FD perfection of «the same person,» you can imagine and understand better the realization Essence of the Subsidiarity Principle as resonational interaction of heterogeneous Form-Creators simultaneously focused in different-Qualitative (both depliative and ampliative) Self-Consciousnesses Forms of *the given birvulyarity type*. The fundamental birvulyart directivity of such interaction, in accordance with the given Synthesis Scheme subterransive conditions, takes place before appearance of some — permissible to it — Qualitative limit of invaderental trends retention in FD, meaning, to general covarllertness degree between invaderental attributes allows realizing Synthesis at least in some of the different-protoformal Directions possible to this Scheme.

4.1183. But, as soon as steady trend appears in FD multipolarization towards inadmissible activity decrease of Form-Creators of one of the Dominants, creative initiative moves at once to Form-Creators of another OO-UU-Entity, Who «project» SFUURMM-Forms peculiar to Them into already synthesized interconnections. This is what provides amitsiration of such synergetic Focus Dynamics to a corresponding Proto-Form. The Subsidiarity Principle will be implemented, through this new (for subjective Observer of this versatile process!) Self-Consciousness Form, based on already other demands typical to amitsirational process organization by Form-Creators of another Synthesis Scheme.

4.1184. This Principle provides every option of Focus Dynamics subterransive manifestation by only that Self-Consciousness Form, which definitely (resonationally) reflects, in corresponding Space-Time conditions, all Qualitative spectrum of Interests and SFUURMM-Forms peculiar to it (to FD), and thereby determines the focal «point» (resonational zone) of skrruullerrt system only possible

for its manifestation. The f-Configuration of this «point» fully predetermines both all subjective specificity of FD realization and particular features of the Perception system of Self-Consciousness Form initiated by it in this «point» (abilities, propensities, Conceptions about «themselves» and the surrounding World, and so on). Many similar — by some special combinations — Focus Dynamics, which have been simultaneously «projected» into each other in a very complicated hierarchical order, create, in our Perception systems, Illusion of some general conversion process, which we subjectively interpret as «individual development» (its Essence is opportunities increasing, in FD, for steady prevalence of ampliative choices above depliative ones).

## **B) The RUUSST-YYYUUSS Principle**

**«I-am is subjective creative reflection of realizational Coordination of gabitual manifestation of Everything in the Whole»**

4.1185. Regarding functions of this Principle, the term «Coordination» is mainly used for characteristics of intercoordinated and qualitatively ordered (in degree of compatibility) organization of Focus Dynamics between *different-birvulyart* Form-Creators. Every birvulyarity variety, in the equal conditions of Space-Time subjective «unpacking» (for example, in the human STCs, all people «unpack» and form the reality surrounding them in their own way; the representatives of each of Proto-Forms focused in the same STCs do this in their own way), represents profective reflection of availability, in focal-ethereal interconnections, of the particular geyliturgentness (different-Qualitativeness) between interacting Form-Creators. Any birvulyart manifestation of Energy-Plasma is structured with Focus Dynamics of the countless number of different-protoformal Form-Creators, Who altitudally (collectively) realize within the limits of the Interests peculiar to their Synthesis Schemes.

4.1186. Among all multitude of Energy-Plasma varieties and birvulyarity types, in various Space-Time conditions, all infinite diversity of different-Qualitative collective subjective Realities has been simultaneously formed, which Focus Dynamics structure all types of Macrocosmos slloogrent Illusion. Every birvulyarity type is produced on the Diffuzgentness Principle, which is enabled to varying degrees among some of geyliturgent Form-Creators.

4.1187. For example, f-Configurations of our NUU-VVU-Form-Types mixtum analogs generating nuuvvumic-mixtum variety of lluuvvumic birvulyarity type are structured with Form-Creators FDs, which simultaneously realize via many different-protoformal Synthesis Schemes. In this way, Form-Creators of ALL-Will-of-ALL-Intelligence and ALL-Love-ALL-Wisdom OO-UU, Who are invaderental to our Scheme, are simultaneously *invaderental* participants of such Synthesis Schemes as:

ALL-Love-ALL-Wisdom + ALL-Steadiness-ALL-Stability,  
ALL-Love-ALL-Wisdom + ALL-Voidness-ALL-Vacuumness,  
ALL-Love-ALL-Wisdom + ALL-Integrity,  
ALL-Love-ALL-Wisdom + ALL-Aspiration,  
ALL-Love-ALL-Wisdom + ALL-Unity,

ALL-Love–ALL-Wisdom + ALL-Essentiality–ALL-Permeability,  
ALL-Love–ALL-Wisdom + ALL-Primordiality–ALL-Initiality,  
ALL-Love–ALL-Wisdom + ALL-Mobility–ALL-Presence,  
ALL-Love–ALL-Wisdom + ALL-Knowledge–ALL-Informedness,  
ALL-Love–ALL-Wisdom + ALL-Voidness–ALL-Fullness,

ALL-Will-of-ALL-Intelligence + ALL-Steadiness–ALL-Stability,  
ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Vacuumness,  
ALL-Will-of-ALL-Intelligence + ALL-Integrity,  
ALL-Will-of-ALL-Intelligence + ALL-Aspiration,  
ALL-Will-of-ALL-Intelligence + ALL-Unity,  
ALL-Will-of-ALL-Intelligence + ALL-Essentiality–ALL-Permeability,  
ALL-Will-of-ALL-Intelligence + ALL-Mobility–ALL-Presence, f  
ALL-Will-of-ALL-Intelligence + ALL-Primordiality–ALL-Initiality,  
ALL-Will-of-ALL-Intelligence + ALL-Knowledge–ALL-Informedness,  
ALL-Will-of-ALL-Intelligence + ALL-Voidness–ALL-Fullness.

**4.1188.** Realizational Interests of some of the enumerated Synthesis Schemes, in each of which Form-Creators of lluuvvumic para are simultaneously activated, are more diffuzgent (realizationally compatible) with respect to realizational Interests of our Scheme, and some of the other Schemes are less diffuzgent, which affects both their direct organization of every person FD qualitative directivity (intensity and stability of the particular protoformal Interests) and the process of subterransive organization of functioning abilities of every mixtum analog of NUU-VVU-Form-Types (biological organism operation individual features, external signs, abilities, propensities, and so on).

**4.1189.** The broad different-protoformal Experience, which has been narrow-specifically obtained (kleksed) by our invaderental Form-Creators in conditions of many other Schemes, after «losing,» during realization via human person FD, one of the two invaderental constituent parts (which is not particular to lluuvvumic invaderentness type), already cannot be fully «unpacked» in conditions of this Scheme (ALL-Love–ALL-Wisdom + ALL-Will-of-ALL-Intelligence) and, therefore, should be kleksed by Them in a new way. At the same time, active participation of Form-Creators of the second Dominant in «unpacking» of this Experience strongly deforms and distorts the initial Sense of every protoformal SFUURMM-Form, which leads to appearance of the countless number of all possible its interpretations in our FD.

**4.1190.** Some of them reflect considered (initial) information in a stronger way, some of them — in a weaker way, or even distort it beyond recognition. In a person FD, availability of the particular Potential of Creative Activity of those among vecsative Form-Creators, Who participate in «unpacking» of every SFUURMM-Form, plays the great role in the kleksing process effectiveness: the higher activity of Form-Creators of exactly that Proto-Form, which Experience is being «unpacked» at the moment, promotes the more identical kleksing of its constitutional Essence. Alternatively, in FD multipolarizational spectrum, the countless number of completely subterransive (separated) Conceptions simultaneously appear about the same Information (relations, phenomena, situations,

and so on), which are typical to the whole multitude of protoformal development Directions formed in the narrow-specific conditions of *our* Synthesis Scheme.

4.1191. On the basis of SFUURMM-Forms more or less close in meaning, which are simultaneously formed by *our* invaderental Form-Creators in various protoformal Synthesis Schemes, more or less stable and identical, by the Sense, interconnections different-protoformal combinations are produced in the definite Space-Time exuberation regimes. These combinations are more understandable to Form-Creators of the Perception systems of many Proto-Forms. On the basis of their simultaneous realization, «objects» are formed of creative application of Focus Dynamics of common to them Form-Creators of various (diffuzgent) Proto-Forms, which we define as «Self-Consciousnesses Forms.»

4.1192. Focus Dynamics of many creatively compatible Self-Consciousnesses Forms (even if they are busy with realization of completely different Interests) concatenationally conglomerate to specific birvularity diversities and types, which «spheroidally» *self-modify* (in all possible development Directions of qualitative Vectors at once ) and self-universalize on increasing number of geyliturgent attributes stable combinations. That is coordinating promotion of this total amplificational Process affecting absolutely all organizational structure of holochrone-simultaneous generation of subjective Realities Illusions all variety, which provides functions of the Principle considered by us.

4.1193. For each of Self-Consciousnesses Forms, it also determines both the most optimal and the ultimate, by various protoformal Directions (in the birvularity type structured by this Form), manifestation Levels of different-Qualitative psycho-mental Creative Work, while strictly making all opportunities of this Form self-realization subject to subterransive features peculiar to it (VLOOMOOT and NNAASSMM qualitative parameters). Thus, fully coordinating Form-Creators realizational demands with Their potential creative abilities, this Principle functionally supplies energy-informational basis for simultaneous exuberation of absolutely all development scenarios and Self-Consciousnesses Forms structuring them.

4.1194. Although, you should remember already that, profectively, there is no any «current» Coordination (and more than that, there is no any «Control»!) of Focus Dynamics of Self-Consciousnesses Forms, since any among all possible qualitative variations have been already consummatizationally accomplished in Macrocosmos HCCI sllougrent FD, and all subjective Existence effect of all realizational Forms is generated by availability and influence, on FD, of Energy-Plasma dissonational constituent, which is transformed (not inside of Form-system itself, but in Self-Consciousness!), during interaction with Form-Creators of subterransive Perceptions systems of every Self-Consciousness Form, into specific Existence Illusion realized in a versatile way via such dissonational effects as Space and Time.

## C) The UUY-YUYUYY Principle

### «I-am is subjective creative reflection of gabitual Amplificationness of Everything in the Whole»

4.1195. Amplificationness is reflection of resonational influence, on Information primogenitive part, of universal abilities of eglleroliftive Impulse-Potential, which, during «projection» via all possible svilgs-spherational results of heterogeneous Process of all SSS-combinations consummatization (subjectively for us, on sort of a new USIP-Program), manifests in diverse Energy-Plasma realizational conditions (reflecting via Space-Time) in the way of generation of increasingly harmonious focal-ethereal interconnections between Information primogenitive and focus States. Any focal-ethereal interaction shown via Form-Creators FDs is gabitually amplificational, since it is characterized (as regards «the previous» FD state) by the higher degree of covarllertness (consistency, compatibility) between FDs of Form-Creators of some of OO-UU-Entities.

4.1196. Amplificational Process is, by Essence, the synonym of Self-Consciousness Form-Creators Evolution in general, Who are subjectively in no way attached to any specific birvulyarity type, since, during exhiberation of all USCF-«projections,» not Their affiliation to some Synthesis Scheme is crucial (because They simultaneously realize «Themselves» in many Schemes), but availability of profective opportunities for realization of some SSS-attributes combinations peculiar to Their FDs. Subjective attachment to the particular birvulyarity diversities and types is typical not for Form-Creators FDs, but for the Perception systems of all infinite multitude of Self-Consciousnesses Forms different-Qualitatively conglomerated (focally aggregated) by Them, which general FD is simultaneously structured with many diverse realizational Interests, each of which to an appropriate extent reflects essential needs of OO-UU-attributes particular combinations.

4.1197. Some of the most stable combinations of these narrow-specific Interests can be actively realized only via FDs of some Self-Consciousnesses Forms, the others can be realized via the other f-Configurations, which reflect synthetic features of the other Synthesis Schemes. Thus, for the activation period of some of the particular creative demands, there is essential need of some of Form-Creators for exhiberation through f-Configuration of some Self-Consciousnesses Forms, whereas realizational Interests of the other Form-Creators (in *the given* exhiberation conditions!) are able to be maximally realized via subterransive properties of f-Configurations of Self-Consciousnesses Forms of the other birvulyarity types.

4.1198. Amplification is NOT only the amitsiration process of Form-Creators FDs (representing, in Form-systems of the Worlds, gabitual attributes of some specific OO-UU-Entities), implemented just in some particular birvulyarity type. In each of the narrow-specific conditions of own «local» exhiberation, Form-Creators of *the same* OO-UU-Entities provide, with own multipolarizational FDs, profective opportunities for subjective appearance of Self-Consciousnesses Forms of the countless number of birvulyarity different-protoformal varieties and types.

4.1199. In FD, every Synthesis act of some of the constituent elements of these potential opportunities leads to increasing covallertness of generated interconnections with respect to conditions of some Synthesis Schemes and to increasing imperseptness (in the given «local» exhiberation regime) with Form-Creators of the other birvulyarity variety. But overall, sequential universalization of realized focal-ethereal combinations occurs in each of the more amplificational Levels of the collective manifestation of different-Qualitative Focus Dynamics.

4.1200. In any case, at our subjective consideration of any stage of amitsirational process, we can talk about attachment of Form-Creators not to Self-Consciousnesses Forms themselves, but to those realizational opportunities, which allow particular Aspects of the current Interest peculiar to Them (in the given conditions) to realize exactly via narrow-specific features of some specific Form. As soon as the Potential of this Interest starts to wane in FD, the stronger creative purpose (demand) is initiated in Self-Consciousness informational space to replace it. And if Self-Consciousness Form of the other birvulyarity type is more appropriate for realization of this demand, it will be resonationally more available and attractive to these Form-Creators, than the Form «previously» focused by Them.

4.1201. Therefore, during amitsiration, Focus Dynamics of all Form-Creators permanently come through *simultaneous-multipolarizational decondicification*, with respect to attributes combinations of some Synthesis Schemes, and through *svilgs-spherational involvement* into qualitative features of f-Configurations of the other Schemes. Duvuyllerrtness of this process is provided due to availability, in every Synthesis Scheme, of opportunities for parallel implementation, in various Space-Time conditions, of the countless number of different-protoformal-diffuzgent development Directions, each of which successively «reprojects» Form-Creators FDs to some other birvulyarity variety of type.

4.1202. With persistent intensification of such «substitutive» trends and increasing commitment of Form-Creators in choosing specific attributes combinations of some of these Directions, we deal with effect of *birvulyart decondicification* of Form-Creators FD leading to Self-Consciousness Form *degradation* (along with sequential transformation of Their realizational Interest in FDs and f-Configurations of the other Synthesis Scheme). Hence, so called inter-protoformal amitsirations simultaneously implemented in every development Direction realize not at the level of subjective self-consciousness peculiar to Self-Consciousnesses Forms themselves (which in no way perceive protoformal perturbations happening to them), but at the level of radical qualitative changes in ethereal structures (SFUURMM-Forms) of Focus Dynamics of Form-Creators.

4.1203. Based on the foregoing, we can state that any of NUU-VVU-Form-Types sequentially focused by you — no matter how limited set of SFUURMM-Forms and how high degree of egocentrism are used to characterize its FD — always represents only necessary «stage» and important functional instrument, in order for Form-Creators, during Synthesis process of diverse impersept (for this birvulyarity type) interconnections, to permanently supply realizational Interests peculiar to Them with increasingly universal (amplificational) Experience. Literally every act of such multipolarizational amitsiration individually promotes successive (svilgs-spherical) «unpacking» and activation, in Form-Creators FDs, of SFUURMM-Forms of increasingly ampliative Self-Consciousness Levels. It is — during simultaneous realization of Form-Creators of absolutely all Self-Consciousnesses Forms — energy-informational basis of the general amplificational Process.

*«The Law of Holochronness of eglleroliftive Coexistence of all Self-Consciousnesses Forms and CCIs types»*

**SSUUY-NUULLSS**

**«The Law» realizational Essence**

4.1204. All infinite variety of focal-ethereal interconnections of skrruullerrt system is structured in a way that every «point» of their «local» exhiberation (as Space-Time) shows «intersection» of UPDR differentiativational-qualitativational trends with convergent-amplificational trends of slloogrent Focus Dynamics of Form-Creators of different-type CCIs. By the way, the first trends type, under mercavgnational influence of irrkoglicitive Impulse-Potential, has been holochronely implemented only by Info-Creators along with diversification of all ethereal «projections» of heterogeneous inter-skunkktional combinations of primogenitive SSS-State throughout all Rezomirals of manifestation.

4.1205. But at the same time, the second trends type initiated by consummative influence of eglleroliftive Impulse-Potential universal features on each of these «projections» has qualitatively restructured (modified) their «internal informational Essence» in the way that all primogenitive interconnections could be harmoniously combined with confective State potential to them and could generate united and inseparable Integrity with this State. This Process has been provided by slloogrent FD of heterogeneous Form-Creators, Who, by means of the Creative Activity peculiar to Them, have simultaneously converged (via exhiberation of Self-Consciousnesses Forms) all primogenitive inter-skunkktional interconnections into confective ones.

4.1206. On the basis of such «interprojection» to FD of each of Self-Consciousnesses Forms, space-time effect has been produced of its multipolarization in f-Configurations of the countless number of all possible Directions of different-Qualitative amitsiration simultaneously accomplished by the same Form-Creators both within «the current» Synthesis Scheme and in the other diffuzgent birvulyarity types. Besides, availability of eglleroliftive IP in f-Configurations provides only convergent-amplificational trends in Focus Dynamics of all Form-Creators enabling Them to realize simultaneously in many Self-Consciousnesses Forms of different-protoformal Synthesis Schemes at once.

4.1207. Basically, every USCF-«projection» simultaneously structuring — in one way or another — absolutely all Synthesis Schemes potentially represents, by means of slloogrent Focus Dynamics peculiar to it, all infinite variety of birvulyarity types in every «point» of skrruullerrt system local manifestation. All infinite multitude of f-Configurations of different-protoformal STCs and CSRs have been consuyetally formed together with Self-Consciousnesses Forms typical to them in the resonational interaction zones between these birvulyarity types. Therefore, actively focusing at various qualitative constituents of own Focus Dynamics, Form-Creators, due to availability of this «Law,» can freely change the Form of own Self-Consciousness, while amitsirating to «the current» realization Direction most interesting to Them.

4.1208. So, any type of Focus Dynamics depliative states generated by Form-Creators of some Self-Consciousnesses Forms is always balanced with potential availability, in Their other exhiberation regimes, of FD more ampliative states, which are simultaneously generated by Them via FDs of the other Self-Consciousnesses Forms. This, in total, provides general holochrone initiation of eglleroliftive slloogrent Focus Dynamics of Macrocosmos HCCI, which is qualitatively balanced at once throughout many interconnections peculiar to it. Holochronness means universal Property of any Information particle to carry out interconnections typical to it beyond any Time perception subjectivism.

4.1209. Time represents Self-Consciousness subjective effect, through which the particular degree of qualitative dissonation of SFUURMM-Forms is specifically reflected in FDs of Form-Creators of all holochronely manifested Self-Consciousnesses Forms. These SFUURMM-Forms are initiated (produced) by these Form-Creators during eglleroliftive amitsirations (qualitative amplificational variations in the Focus Dynamics state) as regards potentially resonational state already synthesized by Them (in the other multipolarized regimes of FD exhiberation of *the same* Form-Creators), which is manifested via much more universal SFUURMM-Forms. The more covarlert (for the given birvulyarity type) interconnections structure SFUURMM-Forms «unpacked» by you, the «quicker,» subjectively, the effect itself of «the directed flow of Time» is perceived by you.

4.1210. The Holochronness Property of Information, in no way having been changed during accomplishing mercavgnation Act in It, has been consuyetally spread both in the State of SSS-Entity Self-Consciousness and in consummative-eglleroliftive Focus Dynamics, simultaneously performed in It, of all multitude of USCF-«projections» (Macrocosmos Form-Creators). One could say that SSS-Entity Self-Consciousness, as such, has not existed (in accordance with our Conceptions about this!) a single «moment,» since absolutely all microstral and inter-skunkktional interconnections, between initiated heterogeneous SSS-fragments, have been liyllusceevated already in the mercavgnation Act itself, and that conditionally unstable Information State, which we define as amitsissimal One (primogenitive + consummative), is not more than influence result, on our Focus Dynamics, of the particular Time subjective effect expressed by us in the terms of «before» and «after.»

4.1211. Though, gabitually, anything is absolutely in no way changed «before» the moment of an event realized by us, as well as in any moment «after» it, in the infinitely multi-dimensional structure of different-Qualitative focal-ethereal interconnections of the Macrocosmos skrruullerrt system itself: everything what could enter at least some energy-informational interaction with each other, has been accomplished immediately at all possible directions of focal realization peculiar to it. Meaning, in some conditions, pre-mercavgnational cruvursorrt interconnections have been consummatively converted into impersept ones, then — into covarlert and geyliturgent ones, to their full liyllusceevation becomes possible in the most amplificational combinations.

4.1212. On the basis of this gabitual «Process» of holochrone-simultaneous Focus Dynamics of all USCF-«projections,» Macrocosmos skrruullerrt system itself has been formed, which represents slloogrent Configuration of absolutely all subjective types of Self-Consciousnesses Forms and Collective Cosmic Intelligences birvulyartly structured by them. The subjective Coexistence effect itself represents the result of availability, *in separate particles* (in qualitatively conditioned exhiberation

regimes) of slloogrent focal Configuration of skrruullerrt system focused simultaneously by heterogeneous Form-Creators, of the definite degree of disbalance of interconnections activated by Them (in these conditions) with respect of some signs peculiar to Them.

4.1213. In Their Focus Dynamics, availability of eglleroliftive Impulse-Potential initiates, in Them, internous necessity of the immediate balancing of *each* of the attributes structuring Them (that is, realization of some essential Interest), which is the main production Mechanism of the effect of «projections» simultaneous multipolarization of the same Form-Creators (Focuses of Information dissonational particles) in all multitude of different-Qualitative Self-Consciousnesses Forms. Getting concatenationally balanced by some attributes, their interconnections are destructurized by the other attributes, what persistently stimulates Form-Creators on multipolarizational search of more and more opportunities of harmonization of interconnections peculiar to Them by means of focusing in more and more particles of slloogrent f-Configuration.

4.1214. Every fact of the similar interbalancing focusing of Form-Creators is followed by the act of altitudal exhiberation of focal Configuration of the definite Space-Time qualitative parameters and particular f-Configuration of Self-Consciousness Form mostly corresponding to these parameters (and, of course, to the given Focus Dynamics structure itself!). Multipolarizationally-duvuyllerrtly focusing in the more and more balanced (by some specific attributes!) particles of the general f-Configurations, Form-Creators continuously accomplish (by Resonational Principle) subjective amitsiration from some Self-Consciousnesses Forms (representing definite realizational Interests to Them) to the other Self-Consciousnesses Forms (reflecting Their other creative opportunities).

4.1215. Form-Creators proceed with this subjective Process (concurrently in many birvulyarity types) infinitely, right up to Their achievement of the complete informational abruptation state — comprehensive liyllusceevation of simultaneously exhiberated (via slloogrent Focus Dynamics) interconnections throughout all multitude of the attributes energy-informationally matching in them (right to the absolute consummatization State). Since this becomes fact to Them, absolute annihilation of FD and transformation of SSS-Entity Self-Consciousness occurs at once from amitsissimal State to USIP-confective One — more ampliative, than primogenitive One, Which was peculiar to Information before initiation of mercavgnation Act in It. Let me remind you that all this is accomplished holochronely in SSS-Entity Self-Consciousness without participation of such Factors as Time and Space (which influence is able to reflect subjectively only via FDs of different-Qualitative Form-Creators).

## The adapted Principles

### A) The UUY-LLSS Principle

**«I-am is subjective creative reflection of the Sllooqrentness Property via simultaneous manifestation of the infinite multitude of Self-Consciousnesses Forms of Everything in the Whole»**

4.1216. Holochronness of implementation of all post-mercavgnational inter-Qualitative conversions «inside» of Information is gabitually reflected — both in organization itself of focal-ethereal interconnections of skrruullerrt system and in Focus Dynamics of Macrocosmos HCCI — via Simultaneity property (parallelism, simultaneity) of subjective Existence of all «projections» of Form-Creators accomplished by Them due to subterransive focusing in all different-Qualitative Self-Consciousnesses Forms at once. Due to availability of such Simultaneity, chance of Focus Dynamics generation is organized: since all infinite multitude of heterogeneous Focuses structured both with the simplest and the most complicated energy-informational interconnections has been already initiated in all Rezomirals of manifestation at once, eglleroliftive Impulse-Potential has real opportunity of resonational combination (qualitative «reprojection») of the separate particles of these focal-ethereal combinations sort of duvuyllerrtly (sequentially) aggregating them at the same time into more and more informationally saturated focal Configurations — realizational Self-Consciousnesses Forms, each of which is structured with many more or less compatible «projections» of different-Qualitative Focuses (which are the essence of Form-Creators).

4.1217. How can Information Sllooqrentness Property be reflected in every Focus Dynamics of any Self-Consciousness Form? Owing to gabitual availability, in skrruullerrt system, of all infinite multitude of focal-ethereal interconnections, which have been already carried out between all Focuses! Bear in mind that when it comes to Focus Dynamics of Self-Consciousnesses Forms, you should mean not interactions between Focuses themselves (representing the countless number of «still» unrealized — dissonational in respect of primogenitive SSS-State — but potentially possible for Information, owing to the presence of irrkoglictive and eglleroliftive IPs, *new* intermicrostral and inter-skunkktional interconnections), from which all skrruullerrt system is produced, but «projections» only (sort of «qualitative reflections») of informational Content of these Focuses provided for subjective implementation (Experience overall sublimation) into the Creative Activity state with the help of eglleroliftive IP.

4.1218. Let me remind you something. As a result of mercavgnation Act, in the Information subterransive State, irrkoglictive and eglleroliftive Impulse-Potentials have been initiated, Which have ambigularly produced Universal Plasmic-Differentiated Radiation in It. UPDR irrkoglictive part has holochronely restructured the whole of altssimusness already existing in Information (microstral interconnections activity «inside» of every skunkktion or between skunkktions of one SSS-fragment) for the requirements of even more universal (confective) SSS-State «delivering» This in the «way» of Energy-Plasma — a potential «Project» of already completed Macrocosmos skrruullerrt system (furthermore, such «modifications» holochronely implemented by all other IPs have produced Macrocosmos of other types combined into one skrruullerrt system).

4.1219. Macrocosmos Energy-Plasma reflecting all Content of UPDR represents sort of the Standard of The confective State, into Which Information should be converted. All skrruullerrt system is structured by Rezomirals of manifestation, through which Macrocosmos all Form-structure consolidated from the countless number of Focuses (restructured, qualitatively modified Information particles) is reflected. In this State, any «Form-Creators» are out of the question, since This is just a Model of What has yet to be accomplished «inside» of Information. Once this Project has been holochronely presented (inanisally sort of accomplished), eglleroliftive IP proceeded to its svilgs-spherational convergent realization (Experience accumulation, which reflects the Very Essence of the mercavgnation Act) and produced, thereby, together with the rest IPs varieties, SSS-Entity Self-Consciousness. As the result of such Focuses Initiation, absolutely all interconnections structuring them have been initiated in them.

4.1220. Availability of some discrepancy (dissonation, tensoriness) between primogenitive interconnections and new, perspective (consummative) interconnections has provoked, in SSS-Entity Self-Consciousness, essential necessity of the detailed «collation» of What It represents already, What «exists» already (primogenitive SSS-State is at the core), with What «should become something» (confective SSS-State is at the core). Since qualitative difference determination requires subterransive «examination» and «comparison» of the smallest particles, the infinite multitude of all possible «projections» has been generated in the SSS-Entity Self-Consciousness informational space, which are comparative states between «what is» and «what will be.»

4.1221. Due to the fact that all multitude of Focuses represents, in Energy-Plasma, potential, confective State («what will be»), they have consuyetally «revived» *own* part of informational particles with the General Realizational Potential peculiar to them — dissipative Energy, which, in each particular case of eglleroliftive energy-informational conversion, is reflected, in SSS-Entity Self-Consciousness, by all multitude of the Local Realizational Potentials — decoherent Energy configurationally presented by way of the Space and Time particular parameters. Simultaneous carriers of all this Energy (of both its dissipative and decoherent parts) turned out to be Form-Creators — Focuses realizational «projections» initiated in Energy-Plasma by eglleroliftive IP.

4.1222. Sequentially (in the general multipolarizationness of the realizational Interests peculiar to Them) collating qualitative state of «what will be» with «what is,» Form-Creators start Macrocosmos Project implementation with resonational intrusion into the most elementary interconnections. Providing them with the necessary «portion» of decoherent Energy, Form-Creators carry out required qualitative conversion at the level of the whole variety of microstrs and skunkktions of reconverstive Configurations involved in these interconnections. Thus, in the corresponding Space and Time energy parameters (dissonational ones as regards «what is»), completely new Configuration is reflected, which is not reconverstive, but *focal* (meaning, potentially implemented by Form-Creators) Configuration of «what will be.»

4.1223. As noted before, Holochronness property of the Macrocosmos Project implementation is reflected in Space-Time parameters via Simultaneity property. In every Focus, diverse heterogeneous «projections» have been holochronely-eglleroliftively initiated, which have produced realizational basis for simultaneous activity of different-Qualitative Form-Creators all multitude. Since one

conversion necessarily entails need to implement many subsequent qualitative changes, there is a particular simultaneous interconnection generated among «projections» of various Focuses — Focus Dynamics reflecting, by itself, the fact of required «amending» the local part of some particle of «what is» (kleksing of resonational interaction of Form-Creators with the Content of primogenitive SSS-State in the definite resopason).

4.1224. Gabitual Nature of any Focus Dynamics slloogrentness is that both major «parties» of this consummative Process participate in every «collation» Act: «what is» (primogenitive part) and «what will be» (confective part). That is, every qualitative change (kleksing) is carried out by every focal «projection» in the most strict conformity with the Result already available — with the «puzzle» already formed by «the projections» in detail. This Process could be conditionally compared with 3D printer operation principle: the finest shift of the dispenser head with the particular expendables (liquid polymer, plastic, powder, ceramic mixture, stem cells, and so on) is conditioned by availability, in the printer computer, of the detailed program, which reflects, step by step, the whole process of the form successive production.

## B) The LLAA-YYSS Principle

### **«I-am is subjective creative reflection of the infinite «spheroidicity» property of focal Configurations of Self-Consciousnesses Forms of Everything in the Whole»**

4.1225. The whole entire Form-structure of our Macrocosmos, as well as the whole infinite variety of Their different-Qualitative types generating the general skrruullerrt system of Informational Creation, is «spheroidal,» where every conditional «point» of heterogeneous application and resonational reflection of eglleroliftive Focus Dynamics converges simultaneously-multipolarizationally, with respect to qualitative signs peculiar to it, at once throughout the countless number of realizational Vectors possible to it — subterransive birvulyarity types. «Spheroidicity» neither depends on the dimension index nor attached to the features of the various Self-Consciousnesses Forms subjective Perception — it is gabitual by own energy-informational Essence, meaning, is exists at any type and Level of exhiberation.

4.1226. The reality surrounding us is profectively structured very differently compared to our usual perception of it in the three-coordinate reference system. We perceive it like that only because bio-Creators of our brain are able to successively and constructively focus only at those sections of focus combinations (f-Configurations), which are specifically kleksed by the strictly determined SFUURMM-Forms (with the participation of lluuvmic VVU-Factor).

4.1227. Sort of «the same» reality, which seemingly completely identically surrounds us and, for example, ants is perceived, experienced by us and by them constructively and visually in absolutely different ways. It is because this subjectivism is based on only those restricted Conceptions, which are modelled taking into account the subterransive features and realizational opportunities of bio-Creators of the Perception systems of our and their Self-Consciousnesses Forms. All the rest, which

is also potentially attached to this conditional «spheroidicity point» of the skrruullerrt system and specifically reflected through the other simultaneous options of «the reality surrounding us» (that is, everything what we have yet to subjectively kleks in «the future»), either will not identify itself with anything at all, or will be presented to us in the way of very deformed and completely incomprehensible Form of Existence.

4.1228. As you see, a huge role in the opportunity of the united perception of some «spheroidicity sections» of the Macrocosmos slloogrent f-Configuration adapted to the similar Conceptions is played by affiliation of Self-Consciousnesses Forms to the same birvulyarity variety (for example, nuuvvumic-mixtum one). As «spheroidal» focal-ethereal interconnections become more complex in one birvulyarity type (for example, on a certain Dominant, between nuuvvumic-mixtum and nuuvvumic-dimidiomittense, or nuuvvumic-simplisparentive ones), qualitative state of subjective Conceptions realization about «themselves» and about «the surrounding World» changes dramatically acquiring just incommensurable differences.

### C) The SSOO-OOYY Principle

**«I-am is subjective creative reflection of Skrruullerrtness property of the infinite multitude of focal Configurations of Everything in the Whole»**

4.1229. The basis of skrruullerrt system is the whole countless multitude of different-Qualitative Focuses, which have been holochronely produced *sort of «inside» of Information primogenitive State* at the conditional «Instant» of mercavgnation Act. In turn, these Focuses represent that part of intermicrostral and inter-skunkktional interconnections of reconverstive Configurations of heterogeneous SSS-fragments, which, due to own infinite qualitative heterogeneity, did not have any opportunity of liyllusceeve states creation (towards each other). Meaning, in the imperseptness or cruvursorrtness state, they could not reflect, through themselves and inside themselves, the State of Integrity, Unity, and Harmony.

4.1230. What does it mean? Despite of the fact that, *overall*, general equilibrium and harmonicity are peculiar to Information primogenitive State, though, the particular trends to qualitative incompatibility can be expressed to varying degrees between «separate» SSS-attributes reflecting (in the amitsissimal SSS-State!) *different* Pure Cosmic Qualities. This incompatibility gets balanced — in the general «multidisperse» structure — due to potential availability, in Information, of SSS-fragments compatible with them. One can notionally imagine this in the following way.

4.1231. If to compare all possibilities of uniform distribution of the color range known to us with the state of absolute gabitual Harmony (presented by confective SSS-State), the latter (expressed via skunkktions of r-Configurations of each of compatible SSS-fragments) should necessarily contain all-possible tints of the red, and yellow, and green colors, which complete each other to varying degrees and, therefore, are able to provide all infinite range of the uniform distribution of qualitative heterogeneity. Though, there are such among informational fragments, which, due to the presence

of some special trends between microstrs, reflect a single color (cruvursorrt ones) or, at best, two colors (impersept ones), and therefore they are unable to enter harmonious interconnections with the other fragments. In the general «multidisperseness,» they play the role of some informational (conditionally speaking — «energy») «centers» containing powerful unused Creative Potential and interbalancing each other in some special way.

4.1232. In this case, for ease of explanation of the general picture, I took only three parameters of qualitative incompatibility (three colors), though, gabitually, there is countless number of them! It is possible to involve all this part of Information only via holochrone USIP-Initiation, during which all microstrs and skunkktions of each of such SSS-fragments are «internally» activated by many different-functional Impulse-Potentials. This allows microstrs and skunkktions «internally» to convert and establish qualitatively new informational interconnections with all the rest of fragments. Discovering their «internal» potential abilities, USIP-Initiation activates, in their r-Configurations, some unused, untapped (due to the particular Reasons) Creative Potential.

4.1233. Microstrs substantial reorganization occurs at that, and a certain «volume» of Information in no way used «previously» (in the primogenitive State) is released on skunkktions, which is distributed immediately among all multitude of covarllert (with this attribute) skunkktions in the way of the particular informational «excess» — dissonational Focuses («still» in no way realized Information particles). Having been holochronely manifested in the general «volume» of inter-skunkktional interconnections of the primogenitive SSS-State, all these initiated Focuses have produced, «inside» of it, some compensational «Mechanism of heterogeneous attributes multidisperse liyllusceevation.» These attributes are typical to the revealed «excess» with respect to all multitude of the skunkktions qualitatively corresponding to them. We call this «Mechanism» as «consummative SSS-State.»

4.1234. All possible Rezoomirals of manifestation have been consugetally generated out of Focuses the most qualitatively similar to each other by some attributes. The term «generated» does not imply here «an aggregation» or «confluence» of reconverstive Configurations (though, they are focus now!): each of the Focuses has stayed to structure «the multidisperseness section» peculiar to it «previously,» while having activated all its interconnections on the given attribute with some of the Focuses covarllert with it (on the other attributes, *the same* Focus simultaneously generates *the other* Rezoomirals of manifestation and the other exhiberation regimes together with all multitude of the other Focuses!).

4.1235. When some attributes of the potential informational excessiveness (consummativeness) have arisen «inside» of the general informational equilibrium (primogenitivity), Energy-Plasma appeared on the basis of this ambivalent (amitsissimal) State. It represents, by Essence, the compensational Mechanism, due to which primogenitive SSS-State is replaced by even more universal — confective State. The peculiar Qualitative «Preimage» of Its completeness is the skrruullerrt system of all different-type Macrocosmos, which reflects, due to holochrone Activity of United Superuniversal Impulse Potential varieties all multitude, absolutely all potential abilities of interconnections creative conversion, which generate primogenitive State.

4.1236. The Principle considered by us functionally provides a realizational Potential of these Focuses particular part via Focus Dynamics of Form-Creators of our synthetic Macrocosmos, which are initiated on consummatization by the joint Creative Activity of irrkoglective and eglleroliftive Impulse-Potentials. In conditions of the other focus IP-combinations, the other USIP-varieties function as such confective conversions.

*«The Law of information-energy equilibrium general state retention»*

## **FFLAAYY-TTAARR**

### **«The Law» realizational Essence**

4.1237. Any energy-informational Form-system of Collective Cosmic Intelligences realization subjectively perceived by us as unbalanced and disharmonious one represents, in the given «localization point» of our FD, only the smallest part of the functional properties and features of the more powerful and perfect Form-system supplied by the more ordered joint efforts of Self-Consciousnesses Forms of much more developed and universalized, by all signs, Collective Collegial Cosmic Intelligences (CCCI), Whose focal balance (energy-informational interconnections between Form-Creators) is more stable and compensated, than CCI structuring Them have.

4.1238. You should understand already that in holochronness conditions of Information gabitual States examined by us, which are subjectively perceived by us as Macrocosmos transmutational, conversional Processes, any Focus Dynamics of Form-Creators starts nowhere and at no time, as well as stops nowhere and at no time, since all Conceptions based on such illusory factors as Time and Space are produced and interpreted with the help of exactly this Focus Dynamics, which specifically reflects different-Qualitative states of Form-Creators initiating it. With the help of the FD, Form-Creators perform the main own function — dissipative Energy translation of all, potentially *sort of* unrealized (dissonational), interconnections of consummative SSS-State to «the point» locally f by Them (slloogrent f-Configuration «section»). In this «point,» FD is able to realize, to varying degrees, in order to transform to the more ampliative state.

4.1239. At the same time, some part of the dissipative Potential used by Them is spent on covarllertization (meaning, partial elimination of existing tensoriness) of the implemented efforts on some of the attributes most dissonant among each other. Its parameters perceived by us as realizational effect are subjectively expressed as decoherent Energy characteristics. Let me remind you that dissipative Energy represents still unfulfilled (in the less ampliative applications) realizational Potential of absolutely all Focuses. But Form-Creators of every birvulyarity type, in the corresponding realization conditions, use only that part of this Potential, which is attached to Focuses of manifestation Rezmirals actively involved by Them.

4.1240. For example, Form-Creators actively involved in formation of exactly human types of STCs and CSRs use, for own realization, Energy of Rezomirals of all those Proto-Forms, which comprise the basis of the reality surrounding us: animals, vegetables, minerals, water, air, solar radiation, and so on. Annihilation (qualitative conversion) of some locally expressed force (energy-informational) interconnections requires strictly determined resource of dissipative Energy (decoherent part), which is focuses (remains) at different-protoformal interconnections of the given Form-system. The rest of dissipative Energy accessible to Focus Dynamics of Form-Creators of the given exhibition Level is «distributed,» in the Resonational way, over all other «local points» of multipolarizational realization of Focus Dynamics, which are simultaneously focused by Form-Creators in the given manifestation resopason. This process continues right up to production of liyllusceve effect throughout the whole multitude of the attributes participating in this process (confluence of all f-Configuration sections depliative for the given birvulyarity type into ampliative ones).

4.1241. Decoherent Energy is the constituent part of dissipative Energy, which has been «materialized» in one way or another and, thereby, it has provided real possibility for conversion of ethereal combinations of some particles of primogenitive State to the more universal focal-ethereal interconnections between Focuses of the skrruullerrt system (like «Preimage» of confective State). Though, in terms of realization, this Energy is not «attached» to the skrruullerrt system, but has opportunity to be reflected, in SSS-Entity Self-Consciousness, only via Focus Dynamics: as soon as FD ceases in some of the qualitative resopasons (meaning, it already activates interconnections between Focuses of the next resopason) — due to annihilation of initially peculiar to it dissonation by the particular attributes — Energy decoherent part used for these purposes at once «reverts» to dissipative Energy of SSS-Entity Self-Consciousness in the way determined by us as «subjective Experience.»

4.1242. In practice of our inertial Existence, this looks like Form-Creators of depliative Self-Consciousnesses Forms acquire new realizational opportunities (Creative Potential as abilities, propensities) during Their amitsiration to the more ampliative SCFs. I should note that concentration of this decoherent Energy in FD of Form-Creators of the more ampliative Self-Consciousnesses Forms runs not on the principle of its arithmetic adding (as the integral of what was spent on focusing in each of the previous SCFs), but according to the degree of covarllertness and geyliturgentness states achievement among the majority of the attributes invaderental for the given Synthesis Scheme.

4.1243. In other words, realizational opportunities of FD of «the next» — more ampliative with respect to «the previous» — Self-Consciousness Form are supplemented (in the way of subterransive Experience) with only that part of decoherent Energy used earlier, which provided the process of FD intensification in exactly this birvulyarity type, but not in all Directions of its simultaneous multipolarization. This includes also svilgs-spherational realization in those different-protoformal development Directions, which Experience is the most compatible with invaderental Conceptions and amplifies them with new covarllert interconnections.

4.1244. Thus, despite of qualitative state degree of any among FDs considered by us, general energy-informational balance of the skrruullerrt system is unable to get broken at least somehow, because absolutely all conversional manipulations between its Focuses and reconverstive Configurations of

SSS-fragments of primogenitive State are carried out only via simultaneous interactions between their «projections.» When some «amount» of dissipative Energy is «decreased» somewhere, at the same time — *holochronely!* — the same «amount» of dissipative Energy is «increased» somewhere in the way of decoherent Energy of specific Focus Dynamics (corresponding realizational Experience). But at the Level of Focuses, nothing at all could be qualitatively modified at least somehow, thus, all their transfinite multitude (in all their slloogrentness) reflects, by itself, the final phase of confective State.

## The adapted Principles

### A) The PAAPP-LAYYL Principle

**«I-am is subjective creative reflection of presence of the potential energoinformational Balance of Everything in the Whole»**

4.1245. This Principle asserts that qualitative state of collective creative work of Form-Creators of any Self-Consciousness Form jointly realized by Them via combined FD of even more aggregated, between each other, f-Configurations of the infinite multitude of realizational Form-Types, is potentially balanced (over all development Directions of Vectors of Qualities in each of the Levels of own manifestation) owing to simultaneous availability, in slloogrent f-Configuration of the skrruullerrt system, of such qualitative interconnections, which completely compensate, by own ampliativity, any of dissonational manifestations accomplished by Form-Creators.

4.1246. For example, all destructive realizations of Form-Creators of NUU-VVU-Form-Types mixtum analogs are completely compensated (in this birvulyarity type) by simultaneous presence (in the more ampliative conditions of Space-Time) of Focus Dynamics of dimidiomittense analogs of creative realization of *the same* USCF-«projections,» which imperseptness, in turn, is fully compensated by Focus Dynamics of translucense NUU-VVU-analogs of the human Form-Types. Further qualitative compensation, in this birvulyarity type, occurs due to the presence of FDs of the same Form-Creators simultaneously realizing via dimidioclarus, luminosal, transliirstal, transtaarmsal, transtlluuvvstall Self-Consciousnesses Forms.

4.1247. This means that no matter how destructive the results of the «individual» creative work of the separate persons may seem to the most of you. They are just only the natural (and necessary, according to the conditions of this development scenario!) intermediate state of the totally balanced Creative Work of all infinite multitude of Form-Types of the given birvulyarity type, which are simultaneously exhibited in the countless Form-systems of different-Qualitative Worlds. At every «discrete instant» of your Existence peculiar only to the conditions of subjective «localization» of FDs of Form-Creators of this STC, the specific state of your personal (from the standpoint of «*I-am*») *self-awareness is determined to the great extent by realizational demands of Form-Creators «projections»* of the particular Levels of your Self-Consciousness. FDs of these Levels are the least synthesized on some of the essential Interests, which realization is svilgs-spherationally very important factor for your further development.

4.1248. This Principle being instantly realized via all multitude of «personalized» Interpretations of Stereo-Form provides, «inside» of It, the general energy-informational balance, which, in turn, is dynamically regulated by the general qualitative equilibrium of absolutely all Proto-Forms jointly initiated by the general, for them, GOOLGAMAA-A-Ingredient, and by SSMIIYSMAA-A- and TLAASSMA-A-Ingredients at the Levels of the Secondary and the Primary Illusions of our 36-qualitative Universal DDIIUYIYI-Entity Self-Consciousness. Amitsirations Dynamics of Form-Creators of these Levels is qualitatively compensated and functionally determined (creatively directed, initiated) due to simultaneous availability of even more amplificational harmonicity of Focus Dynamics of Form-Creators of Universal 48-qualitative IYYYYUULLSSMI-Entity, Universal 60-qualitative AYYALLDMAAYTS-Entity.

4.1249. So, this Principle defines profective regularity and propriety of simultaneous realization of any of FDs subjectively performed by Form-Creators of any among Proto-Forms at every particular instant of its Existence. This Principle reflects the deepest Essence of the expression, «Everything, whatever it is, already exists and it is for good.» Every Self-Consciousness Form — by means of the character of the essential Interest temporarily peculiar to it — subterraneously defines, for itself, at every instant of own Existence, subjective criteria of something, which is «The Good» exactly for it among all multitude of potential realizational opportunities, and which subjectively represents potential «harm.» The qualitative base of any «current» choice is structured by only these subjective criteria. For any Self-Consciousness Form, the profective Good consists *in the very possibility* to experience subterraneously (comprehend, go through, and analyze later) the results of any choices made by it, while drawing, from them, increasingly ampliative conclusions.

4.1250. This very base, in turn, is determined by qualitative state of those subjective Motivations, which dominate most actively, at the moment, in FD of Form-Creators of Self-Consciousness Form. Let me remind you that every FD manifestation act is structured with potential availability, in it, of many different-Qualitative essential Interests profectively motivated by necessity of realization of various svilgs-spherational needs. Subterraneous features of f-Configuration of Self-Consciousness Form, which Form-Creators focus in, resonationally determine the choice (from the general spectrum of FD simultaneous multipolarization) of that specific version of the Interest, which absolutely corresponds to the essential needs (synthetic picture) of only this Self-Consciousness Form, and no other.

4.1251. It can be concluded that in the capacity of USCF-«projections» we are (meaning, represent in the World surrounding us) what we specifically reflect in every our choice. From the standpoint of subjective Conceptions of some Proto-Forms, every our choice can be interpreted as «good» and «welfare,» but at the same time, from the standpoint of the other Proto-Forms, it can be assessed subjectively as «evil.» Convergent principle of eglleroliftive amplification impels us permanently to perfect our choices towards maintaining a stable balance between many different-prototypical Interests potentially present in the World surrounding us and be guided, in own FD, by the most trustworthy and reliable (though, no less subjective!) evolutionary principle «Do no harm!»

4.1252. The more ampliative (in any of Synthesis Schemes) f-Configuration focused by USCF-«projections» is, the more clear and inflexible the powerful organizing principle is manifested in FD of Form-Creators, which allows Them to coordinate more and more profoundly and deeply Interests

peculiar to Them with realizational needs of Proto-Forms surrounding Them. Thus, in Space-Time diverse conditions, the countless number of productive joint activity types of heterogeneous Form-Creators is concatenationally organized. This activity is simultaneously carried out by Them via many Self-Consciousnesses Forms of various birvularity types: flakses and doollses are organized to photons, photons — to fermions, fermions — to atoms, atoms — to molecules, molecules — to the cells of animals, vegetables, microorganisms, to minerals crystals, to cosmic macro-objects, and so on.

4.1253. This, in turn, stimulates the overall Process of inevitable confluence of f-Configurations of Self-Consciousnesses Forms of the birvularity types most diffuzgent between each other into the general — more universal for them — type. As a result of this (and *concurrently* with this Process!), Focus Dynamics of Form-Creators of the cosmic macro-objects concatenationally transform to FD of Form-Creators of Self-Consciousnesses Forms, which form their microstructures (molecules, atoms, fermions, bosons). The more universal birvularity type enables Self-Consciousnesses Forms structuring it to interact creatively, with the higher degree of awareness and with the greater effectiveness, both with each other and with representatives of the other diffuzgent birvularity types.

4.1254. Basically, this is NNAASSMM subterransive features, which determine qualitative state (in respect of the given birvularity type) and activity, in every person's FD, of SFUURMM-Forms corresponding to any material and moral-ethical values criteria, protoformal character of all his/her properties and abilities, skills and propensities, orientation of his/her taste and creative preferences (meaning, potential opportunities for VLOOOMOOT realization). Energy-informational parameters of focused NNAASSMM profectively reflect amplificational state of FD of Form-Creators of the given Self-Consciousness Form in Creativity Range of the given birvularity type, its «current» tendency for amitsiration in certain protoformal Directions of Synthesis.

4.1255. Profective Conception about «Welfare» practically never reflects the immediate Interests peculiar to any among Self-Consciousnesses Forms, since It is characterized with not only (and not so much) its Interests (and even with not CCI's realizational needs, Who generated this Form for exhiberation in this f-Configuration), but with gabitual necessity of maintaining, in the skrruullerrt system (and thus, also in slloogrent FD), of the energy-informational Balance, through which more universal for Information — confective — State is reflected. This State can be expressed more effectively via activation of *completely new* (for primogenitivity concurrently reflected in Self-Consciousness of SSS-Entity) interconnections between Information dissonational particles (Focuses). We subjectively determine (through the costs of decoherent Energy of annihilated focus interactions) the results of this Creative Activity of Form-Creators (in cooperation with Info-Creators!) as permanently accumulating empiric Experience, which is perceived by us from the moral-ethical standpoint as Conscience.

4.1256. For Us as USCF-«projections,» the most important and determining Factor of Our simultaneous exhiberation in all infinite multitude of different-birvulyart Self-Consciousnesses Forms is exactly conscious acquisition of this Experience, which is consuyetally extrapolated over Our Focus Dynamics (meaning, over Self-Consciousness of SSS-Entity structured by Us) as a result of every of creative realizations among accomplished by Us (in various Synthesis Schemes). In turn, this is availability of lack of some constituent parts of this Experience, which stimulates, in

multipolarizational FD, strong activity of any essential Interest (which is required for compensation of covarllert interconnections lacking for acquisition of the more balanced FD in this exhiberation regime). This is the main Reason of our purposeful subterransive amitsirations to Self-Consciousnesses Forms of various CCI types representing different-protoformal birvulyarities .

4.1257. Since the process of convergent amplification of FD of Form-Creators of diffuzgent (potentially compatible on many attributes peculiar to them) Proto-Forms inevitably leads to Their svilgs-spherational Synthesis into f-Configurations of the birvulyarity types common to them (more complex and universal ones), intensity of our subjective bindings (preferences) to various Self-Consciousnesses Forms slowly subsides giving way, in our FD, to the more profective Conceptions about amplificational Essence and to the final Goal of Our infinite Existence as Universal Focuses Self-Consciousness representing, in Macrocosmos HCCI FD, not a single birvulyarity type, but absolutely all Creative (realizational) Potential of the SSS-Entity's confective conversion.

## **B) The FOOKKT-FOOLLD Principle**

### **«I-am is subjective creative reflection of simultaneous Process of the infinite Existence Of Everything in the Whole»**

4.1258. What we interpret as *Existence* of Self-Consciousnesses Forms, represents a subjective effect «performed» in Self-Consciousness of SSS-Entity, which is based on the Principle of eglleroliftive Rotationness (amitsiration, purposeful qualitative conversion on the cumulative basis of the definite attributes) of any Focus Dynamics of Form-Creators from the less complex-configured informational «sections» of slloogrent f-Configuration (more depliative ones for the given birvulyarity type of Self-Consciousnesses Forms) to its more complex-configured «sections» (more ampliative ones for the given birvulyarity type of Self-Consciousnesses Forms).

4.1259. In Self-Consciousness informational space, manifestation integrity and intensity of the subjective effect of «continuity of subterransive self-identification of Form-Creators with the particular Form» is highly dependent on the specific structural features of the Perception systems: some may perceive something as integral and distinct (firm, stable), and the others may accept it as heterogeneous and in no way connected with the rest of this process. Being differently «unpacked,» this effect, in FD of Form-Creators of various Self-Consciousnesses Forms, is reflected quite unequally right up to the loss of the cause-effect interconnections generating it (owing to the absence of Form-Creators ability to combine logically — meaning, resonationally on many attributes — links in the same chain seeming scattered to Them).

4.1260. The Reason for such Conceptions variety about the same profective conversions of the surrounding reality is based on availability of very different parameters of eglleroliftive «displacements» producing FD and peculiar individually to every Proto-Form. Hence, a huge difference in quality of world perception by representatives of various Proto-Forms that stipulates the same huge differences in the STCs' and CSRs' types formed by them: in Self-Consciousness of people and animals, insects

and vegetables, microorganisms and minerals molecules, the Existence process of diverse elements comprising seemingly «the same» surrounding reality will be reflected very differently right up to complete «vanishing,» from CSR, of the large number of distinct and integrated chains obvious for Form-Creators of some Proto-Forms and «appearance,» in STC, of absolutely new kinds and types of inertial Existence in no way perceived by Form-Creators of the other Proto-Forms.

4.1261. This Principle establishes the unconditional right of heterogeneous Form-Creators of any among different-type CCIs to simultaneous creative Manifestation of the signs peculiar to Them at once through the whole infinite multitude of different-Qualitative Forms of the Cosmic Existence. In turn, this provides Focus Dynamics of every CCI with ample potential opportunities for implementation of convergent subterransive amitsiration into amplificalional Self-Consciousnesses Forms of any among slloogrentness Levels of Focus Dynamics of Macrocosmos HCCI.

4.1262. In the fixedness of our subjective Perception systems severely restricting Focus Dynamics, this Principle functions are manifested via concatenational activation, in every person Self-Consciousness, of opportunities for increasingly deepening Understanding of the life Experience already synthesized by him/her, which is required for FD sustainable growth to even more ampliative creative states. This Principle enshrines our ability to perceive any observed phenomenon, situation, event, and also realizational state of every Self-Consciousness Form during the moment of Time traced by us as «*profective given fact*» («*objective circumstance*»), which is «*initially*» typical to this very CSR part directly realized (focused) by us.

4.1263. Any part of our continuous amitsiration — regardless of whether we like it or not, whether it meets our expectations or not — always represents only regular intermediate result of our svilgs-spherational accomplishment of subterransive rotational Cycle, every instant of which is structured by the same our own choices. The integral of these choices qualitative state defines all particular specificity of every among development scenarios temporarily realized by us.

4.1264. Therefore, it is both senseless and silly to blame someone or something for our frustrated expectations or for relations unprejudiced to us. It is senseless because unawareness of the true Reason of arisen destructive circumstances (which lies only in «our own» depliative choices) is unable to create the basis for constructive change of the situation. It is silly because having this depliative state (offence, disappointment, depression, revenge, envy, and so on), you aggravate even more your tensor relations with the surrounding World losing for nothing the precious time, which you could immediately productively spend on the more ampliative correction of your amitsirations.

4.1265. No one of you is able independently to destroy or create anything, since everything, what exists, always «was,» «is,» and «will be,» «developing» strictly in accordance with the measure of «every-instant» «unpacking» (decoding), by Form-Creators of your Perception system, of the Creation «areas,» which resonationally correspond to the Conceptions structuring your FD. No one of you can know for sure, what exactly is «coded» for activation and appearance, in your FD, in each of the following inertial instant of your personalized self-awareness, because every instant (towards any Direction of FD multipolarization) sequentially brings you closer to those circumstances, where the most essential of your current Interests (specific intention, desire) has an opportunity to be realized.

The circumstances associated to this realization can become the most unexpected, unpredicted and dual to you, since usually, your FD is initiated at once by several Interests often incompatible with each other. It is possible to smooth any destructive situation only by means of making the most ampliative choice.

4.1266. In every spectrum of your FD multipolarization (the particular development scenario), only those things can happen to you, which already «initially» structure the given space-time «point» of your psycho-mental «localization» (meaning, what should happen at the moment in this place). And your «participation» (or «nonparticipation») in some events is always profectively conditioned, because you were able to self-identify, by your stable Focus Dynamics, with only this f-Configuration of your «personalized» Interpretation, which just has «to act» (or «not to act»), in this particular situation, exactly this way defined for it earlier.

4.1267. Thus, the degree of predetermination and duration of your stay in any tensor situations or states fully depends on qualitative state of your Focus Dynamics: *the more stable ampliative lluuvvumic SFUURMM-Forms (with a predominance of HIA- and HSI-signs) structure it, the greater opportunities (due to universality, to potential covarllert multi-variance peculiar to them) will be available to you for the conscious manipulations with periodically appearing unfavorable circumstances.*

### C) The DRUUFFSS-DRAAARRD Principle

**«I-am is subjective creative reflection of the infinite simultaneous Process of eglleroliftive integration and amplificational perfection of Everything in the Whole»**

4.1268. As noted before, during holochrone manifestation, in Energy-Plasma, of Universal Plasmic-Differentiated Radiation coded irrkoglectively by the potential confective interconnections, the conditional «Process» of absolute inter-Qualitative Synthesis has concatenationally-duvuyllerrtly «self-demonstrated» and originally «self-set» (as the absolute Standard for realization) in Self-Consciousness of SSS-Entity showing the Direction *from* the highest degree of the balanced Stability and harmonious Completeness (Consummatization) of the newly generated focal-ethereal interconnections *to* the most elementary and the least stable states among possible to them. Meaning, SSS-Entity — sort of for It-Self — has «speculatively» (with the help of the subjective Imagination and Perception Mechanism peculiar to It) presented the Main Goal of Its «further» Existence (via all infinite multitude of Self-Consciousness different-Qualitative types) — confective State achievement.

4.1269. Once This Goal became known to It, the corresponding Universal Mechanism of This Goal simultaneous creative realization, which was initiated by eglleroliftive Impulse-Potential Creative Activity, has appeared at once (in parallel with This Goal awareness degree increase). Why do I permanently use the epithet «creative» for Self-Consciousness functions? In fact, at first glance, Everything, absolutely Everything, that we subjectively define as the reality surrounding us, the Universe, the Macrocosmos, has been accomplished at once, in Information, at all Levels of Its subjective Perception consuyetally, automatically, meaning, regardless of whether It wanted this or

not! Although, it should be unambiguously said here that It «wanted» since the original essential Interest has been laid to the foundation of each of simultaneous realizations peculiar to It.

4.1270. The Self-Consciousness of SSS-Entity function (in any Level of Its infinite manifestation) is just that *every* newly generated focal-ethereal combination of confective State *potential* to SSS-Entity should be experienced and cognized the most deeply and comprehensively, and also that obtained Experience should be «embedded» in the whole variety of sufferings heterogeneous types having something in common, while simultaneously «reprojecting» these «locally» expressed results obtained via various Self-Consciousnesses Forms into increasingly complex-structured and stable focal-ethereal interactions. This is the main destination of SSS-Entity Self-Consciousness Mechanism: to give exhaustively deep creative filling (Experience) of completely abstract, by own structure, Formula impartially «describing» absolutely harmonized SSS-State.

4.1271. Accomplishing this is possible only in the presence of absolutely all opportunities options of Information for overall and heterogeneous experience of «It-Self» at every conditional «point» of own simultaneous exuberation. In SSS-Entity Self-Consciousness, this subjective effect is reached due to availability, in It, of the Slloogrentness and Multipolarization Properties, owing to which one can exhaustively «experience» and fully «analyze» literally every situation from various perspectives without attaching to any birvularity type, but invariably remaining as profective Observer of all infinite multitude of many different realizational opportunities simultaneous implementation different-Qualitative options.

4.1272. When I previously described confective State, I stressed on Its feature that, after reaching the Levels of absolute Consummatization of slloogrent FD (liyillusceevation, in it, of absolutely all focal-ethereal interconnections), not only amitsissimal SSS-State (primogenitive + consummative Ones) «vanishes,» but also Information, *as such*, «vanishes,» or rather, What we subjectively associate with It! So, «What is «left» instead of It?» you may ask. It is Universal EXPERIENCE, which entirely embodies absolutely all infinite variety of qualitative perturbations holochronely-simultaneously accomplished in dissipative Energy of all inter-skunkktional interconnections, which again has «returned» to USIP-State initial for it!

4.1273. The given USIP-State represents the multifarious and multi-level Experience of absolutely new interconnections. In the mercavgnation Act, they have acquired the opportunity for comprehensive and unique heterogeneous creative interactions and holochronely-simultaneously realized in many birvularity types into united and absolutely harmonious, by all signs, confective State. This Experience is gabitual, maximally concentrated and harmonized expression of absolutely all creative opportunities of United Superuniversal Impulse Potential. These opportunities are profectively manifested in the way of Information and holochronely accomplished via universal Initiation of SSS-Entity Self-Consciousness and Its abyssal Focus Dynamics.

4.1274. The Principle considered by us provides concatenational eglleroliftive «accumulation» and consuyetal «reprojection» of this Experience from Focus Dynamics of Form-Creators of each of the more depliative «sections» of slloogrent f-Configuration to every interconnection structuring FDs of the more ampliative (on all birvularity types) Self-Consciousnesses Forms. Based on such *conditional*

«integration» of focal-ethereal interconnections (it is *conditional* due to its subterraneity, because there is habitually no any real «integration» — since absolutely Everything already is! — but only overall subjective complication of focusing of the same — though, *sort of* different! — sllongrent f-Configuration differently interpreted in different-Qualitative states!) in SSS-Entity Self-Consciousness informational space (as well as in every Self-Consciousness Form structuring It!), the individual effect of Self-Perfection is carried out, when something realized «now» by Form-Creators is perceived by Them as more ampliative one, than something that has existed «before.»

4.1275. This Principle provides infinite opportunities for simultaneous «reprojection» («expansion») of SSS-Entity Self-Consciousness Creative Activity via the countless number of realization Forms of Collective Cosmic Intelligences all variety in peculiar to Them Directions of multipolarizational Amplification of own FD based on the steady convergence of Form-Creators FD from depliative Self-Consciousnesses Forms to increasingly perfect Form-structures. In our Macrocosmos type, the observance of this Principle provides eggeroliftive perfection of the continuous amitsirational Process (in every birvulyarity type) on the basis of permanent covarllertness increase in focal-ethereal interconnections that are being synthesized by Form- Creators.

4.1276. Thus, DRUUFFSS-DRAAARRD Principle completes, intensifies, and extends potential opportunities of Form-Creators of Self-Consciousnesses Forms of each of CCIs during Their achievement of the «internal» balance in the exiberation regimes typical to Them. It is achieved due to svilgs-spherational correction and concatenational reorientation of Their Focus Dynamics depliative constituent to the processes, which stimulate, inside of Them, increasingly deepening Conceptions about Their potential harmonious Integration with Everything and about infinite Self-Perfection in the Whole.

*«The Law of Harmonization and Stabilization of different-Qualitative interactions of Everything in the Whole»*

## **SLOO-GGOLL**

### **«The Law» realizational Essence**

4.1277. Focus Dynamics of Form-Creators of all Self-Consciousnesses Forms and Macrocosmos CCIs types are «initially» provided with ambigulyar properties for steady primariusiveness (in each of the subterransive exiberation regimes) of the focal-ethereal interconnections, through which qualitative harmonization and stabilization is concatenationally realized of all ethereal content structuring every FD. This Process takes place on the basis of the permanent overcoming, by Form-Creators, of peculiar to Them tensoriness states (dissonation with respect to primogenitivity) and trends to disassociation with Everything, which impel Them towards disharmonious creative

manifestations, and also destabilize and *subjectively* «understate» Their creative realizational Potential (though, profectively — in all different-Qualitative multi-spectrality of multipolarizational FD — it remains unchanged).

4.1278. Any tensor different-Qualitative interaction subjectively perceived as Focus Dynamics destructive manifestation between Form-Creators of various Self-Consciousnesses Forms represents a necessary part of overall profective Harmony. In Form-Creators' FD, any tensorness is the basis for Their joint exhiberation in any Self-Consciousness Form, because it is stipulated by the very amplificational necessity of eglleroliftive interaction between dissonational Focuses of consummative State and by inter-skunkktional combinations of primogenitive SSS-State qualitatively most corresponding to Them.

4.1279. At every moment of existence of «local» liyllusceevation on some of the dissonational attributes, available tensorness being compensated by realized covarllert interconnections is annihilated, in the given Space-Time «point,» and consequently, newly synthesized Focus Dynamics loses chance to manifest, in the new way peculiar to it, in the «previous» Self-Consciousness Form. Therefore, all over again, inevitably acquiring just another tensorness on some of the other attributes, Focus Dynamics of Form-Creators consuetyally «reprojects» exactly to the skrruullerrt system specific conditions, where new focal «tension» (meaning, the essential Interest) will get a chance to accomplish required qualitative conversion and subsequent annihilation on this attribute.

4.1280. Since possible dissonational attributes all variety (between consummative and primogenitive States) is realized via Form-Creators FD in the multipolarizational way (by means of different-Qualitative Self-Consciousnesses Forms all diversity), their simultaneous Harmonization occurs in the general slloogrentness of dissonational focal-ethereal interconnections. The more attributes number is used for covarllertization (and ideally, liyllusceevation) between Focus Dynamics qualitative content (SFUURMM-Forms) and dissonational «sections» of the general f-Configuration of Self-Consciousness Form (structured by many other SCFs), the more it (FD) is stabilized in conditions of the reality surrounding it.

4.1281. Here, the term «stability» implies not FD ability for qualitative permanency and invariance (and moreover, not «duration» of its «local» manifestation in some particular SF), but rather, vice versa — its ability to realize simultaneously via many Self-Consciousnesses Forms presenting Interests of different-protoformal CCIs, while reflecting in all variety of different-type birvulyarities . In other words, the more Form-Creators FD is harmonized on all possible heterogeneous attributes, the more broad abilities are peculiar to it for simultaneous realization in very different Space-Time conditions. This is most peculiar to Focus Dynamics characterizing Consummatization State (absolute liyllusceevation) of all dissonational Focuses.

# The adapted Principles

## A) The SGRUU-LL-LOO Principle

**«I-am is subjective creative reflection of the trend to qualitative Integration of all different-Qualitative Self-Consciousnesses Forms of Everything in the Whole»**

4.1282. You know already that Information primogenitive State represents relatively harmonious combination between reconveritive Configurations of absolutely all heterogeneous SSS-fragments. In holochronely accomplished consummative State, this Information Universal Property is not only maintained, but also acquires absolute degree of equilibrium, holistic harmonized state. Eglleroliftive IP stimulated by the consequences of irrkoglective IP Creative Activity aims at holochrone-simultaneous Consummatization inducing all cruvursorrt and impersept (for primogenitive State) SSS-fragments to begin actively entering interactions qualitatively new to them and producing in this way (in the skrruullerrt system) increasingly covarllert (resonational) interconnections, which aggregate, in various Space-Time conditions, to increasingly versatile, structurally complex, and creatively stable focus constructions (f-Configurations of Self-Consciousnesses Forms).

4.1283. No matter how incompatible between each other Focus Dynamics of Form-Creators of various Self-Consciousnesses Forms would seem to us, there are always definite conditions in Space-Time, which allow Their realizational Interests successively to draw together increasingly strongly and actively on the attributes peculiar to them, to, finally, they acquire the completed identity. Then, qualitative integration of many Focus Dynamics and confluence of heterogeneous Form-Creators occurs into a single — more perfect and complex — Self-Consciousness Form. This subjective Process ends only in achieving, by Focus Dynamics, of absolute Consummatization State, when SSS-Entity Self-Consciousness experiences qualitative transmittation (transition to above-informational connective USIP-State).

4.1284. This Principle is more specifically expressed (for all realities Form-structures of the given type) functional manifestation of LLUYYYU-UYLL-Principle, which is provided by the LLAASS-LLUUS «Law» («Absolute Unity of diversities»). This in no way influences on the manifestation opportunities of this Principle as one of the functions of the SLOO-GGOLL «Law» considered by us. This Principle actively coordinates and eglleroliftively orients (resonationally directs) Form-Creators FDs of all creativity Levels of various Collective Cosmic Intelligences to realization via Self-Consciousnesses Forms identical on Synthesis Scheme. Owing to this, all variety of birvulyarity diversities and types is formed in Macrocosmos HCCI sllougrent FD.

4.1285. It's quite rightly to name this Principle also as «the Principle of creative stimulation and activation of like by like»: the more ampliative (for the given Synthesis Scheme) creative work becomes appropriate to your self-realization, the more ampliative, by own f-Configurations, Self-Consciousnesses Forms, among peculiar ones for the given exhiberation diapason, should be used by you for adequate Manifestation of own FD. And vice versa: the more depliative Self-Consciousness

Form focused by you is, the less opportunities you have to fulfill high-qualitative creative realizations through its Perception system.

4.1286. The SGRUU-LL-LOO Principle strongly limits opportunities for active manifestation of depliative SFUURMM-Forms of your IISSIDI-Centers first pair via FDs of the NUU-VVU-Form-Types, which NNAASSMMs are related with the higher VLOOOMOOT parameters and aimed at the active manipulation with SFUURMM-Forms of much more qualitative Energy-Plasma manifestation Levels. All different-diapason realization of your FD completely depends on this Principle allowing you consciously to focus only in the human STCs and CSRs groups, which focal-ethereal structures (the general f-Configuration) qualitatively correspond to the content of your own Focus Dynamics.

## **B) The SKLAA-GG-LOO Principle**

**«I-am is subjective creative reflection of Energy-Plasma all properties via manifestation Illusion of Forms of Everything in the Whole»**

4.1287. The functional basis for SSS-Entity Self-Consciousness realization is Energy-Plasma consummative State — the whole infinite multitude of dissonational Focuses of irrkoglectively initiated Information. In Self-Consciousness, these Focuses represent absolute picture of eglleroliftive reflection of the confective Creation Act. As soon as eglleroliftive IP has been activated in Energy-Plasma (this has occurred simultaneously with irrkoglective IP initiation), new interconnections between Focuses started resonational interaction among each other producing, in this way, all diversity of Form-Creators «projections» of the twelve OO-UU-Entities (ethereal PCQ «projections»), which realize, in the Creation Act, by means of simultaneous «reprojection» from some qualitative Focuses to the other (through Focus Dynamics or amitsiration).

4.1288. In turn, this provided the basis for generation, in the skrruullerrt system, of heterogeneous Rezoomirals of manifestation — all energy-informational basis of exhiberation Mechanism of SSS-Entity Self-Consciousness via Self-Consciousnesses Forms of Form-Creators. Through Rezoomirals, all Focuses (Form-Creators) of the skrruullerrt system were given the opportunity simultaneously to realize, in absolutely all options of focal-ethereal interconnections «inside» of Energy-Plasma, all Creative Potential of Information primogenitive «internal» interconnections transformation to much more universal, to It, — confective — USIP-State.

4.1289. As stated on other occasions, any of formed subjective Realities specifically manifested in Space-Time represents a regular result of narrow-specific realization of joint Focus Dynamics of Energy-Plasma Form-Creators definite types. From Focus Dynamics of many different-type s-Realities, the Creation Illusion particular varieties and types are formed, which are combinations of focal-ethereal interconnections more or less stabilized on the definite attributes and specifically (and also simultaneously!) «experienced» by Form-Creators of Self-Consciousnesses Forms corresponding to them.

4.1290. Absolutely all Form-Creators interact with Energy-Plasma only via subjective Self-identification with the formed — as a result of Their resonational interactions! — Creation Illusion, in every focal interconnection of which realizational Essence of Their «current» Focus Dynamics is reflected in a diversified and multifarious way. One can say that, gabitually, all Form-Creators (as dissonational Focuses) structure, with own FD, the informational production, which we interpret as «Energy-Plasma.» Though, subjectively, They are reflected in any Space-Time «point» (as Self-Consciousnesses Forms) only via s-Realities resonationally formed by *Them-Selves* (from Energy-Plasma interconnections), from subterransive content of which Creation Illusion any variety is organized in Their Focus Dynamics.

4.1291. The functions of the Principle considered by us may seem identical to the functions of the previous Principle for you, though, profectively, it's not like that at all. The difference between these two Principles lies in that SGRUU-LL-LOO stimulates mainly different-protoformal FD of Form-Creators performed by Them in Self-Consciousnesses Forms of Collective Cosmic Intelligences of some birvularity type, whereas the SKLAA-GG-LOO-Principle provides activity of the deeper energy-informational interconnections, which are generated among different-Qualitative Form-structures of different-type CCIs. Under this Principle, Form-Creators of the more qualitative interconnections among diffuzgent CCIs *jointly* produce functionally identical to Them Form-structures of Energy-Plasma dynamic states, which are necessary for implementation of the more qualitative of Their creative dynamisms.

4.1292. In the systems produced by Form-Creators of subterransive s-Realities, this Principle functions are expressed at the organization level of appropriate interactions between different-type CCIs representatives (Self-Consciousnesses Forms) simultaneously exhiberated in the identical Space-Time regimes. For example, Self-Consciousnesses Forms with more balanced Focus Dynamics structure more balanced systems of creative self-realization («life circumstances»), since their FDs' Potential is less likely to produce tensoriness with the reality surrounding them (with the other CCIs types), while strongly destructive FDs of Form-Creators organize the same destructive STCs types.

4.1293. At the level of your personalized Existence, this means that, in the case of the stable modelling of your every choice with more ampliative stimuli and more deeply comprehended positive Motivations, the process of your subterransive amitsiration will be inevitably directed towards more balanced (on the invaderental signs) «personalized» Interpretations of your Stereo-Form. Their FD structures creative realization conditions more prosperative for you, in production of which representatives of the greater «number» of different-type CCIs participate jointly with you. This creates opportunity for refocusing of Form-Creators of your Self-Consciousness Form to even more complex-organized birvularity type, where their (and thus, Your!) realizational abilities become significantly more profound and enhanced (including abilities on the invaderental signs).

*«The Law of absolute stabilization of slloogrent focal Configuration all parts in all variety of skrruullerrt system different-Qualitative Levels»*

## **FFLUUFF-LLIIRR**

### **The «Law» realizational Essence**

4.1294. In the Self-Consciousness slloogrent structures, realizational amitsiration any type of Focus Dynamics of Form-Creators qualitatively in no way destabilizes either «previous,» or «future» states of Forms focused by Them, which are profectively fixed and simultaneously exhiberated in SSS-Entity Self-Consciousness as heterogeneous «projections» of Its different-Qualitative Creative Work options all infinite number accomplished by all heterogeneous Form-Creators via subterransive properties of the Energy-Plasma Levels corresponding to Them. All these options of Self-Consciousnesses Forms with various qualitative state compose, by themselves, the Macrocosmos skrruullerrt system, in which joint Focus Dynamics of absolutely all Form-Creators is svilgs-spherationally accomplished.

4.1295. Let me remind you: in Macrocosmos, the only thing that experiences absolutely no any qualitative transformations and modificational conversions is the skrruullerrt system, which has been holochronely generated «inside» of Information as the result of mercavgnation Act (internal «diversification») of primogenitive State peculiar to It. In Information, on the basis of newly generated dissonational Focuses («projections» covarllertly reflecting all cruvursorrt and impersept inter-skunkktional interconnections of primogenitive State), SSS-Entity Self-Consciousness has appeared at once, all Creative Activity of which is provided and determined by the universal Content of informational «space» structuring It.

4.1296. The basis of this peculiar «space» representing stabilized combinations between covarllert interconnections of SSS-fragments of primogenitive State and resonationally generated conglomerates of consummative State attributes, is absolutely all focal-ethereal interconnections of the skrruullerrt system. It has been already fully arranged and finally completed (as an ideal informational Creation) in the whole own slloogrent Integrity. The main exponents of this informational space of SSS-Entity Self-Consciousness are dissonational, tensor (focus) «analogs» of all possible primogenitive interconnections representing the more universal versions of «What is.» We subjectively define them as «Space» and «Time.» *The main Mechanism of their parameters subterransive reflection, in Self-Consciousness of every Form, is the Perception system peculiar to this Form.*

4.1297. Space-Time is not the function of SSS-Entity holochrone «Existence,» but represents the subjective integral of «the current» content of Focus Dynamics of the particular Self-Consciousness Form. In other words, in every specific case of exhiberation peculiar to them, Space and Time only specifically (energy-informationally) reflect produced *profective difference* between already prepared (ideal) informational Content of SSS-Entity Self-Consciousness It-Self and that «current» (extsederic) content (Focus Dynamics), which is reflected via the Perception system of any among countless Self-

Consciousnesses Forms. The Essence of simultaneous exuberation of all these Forms is provision of the multipolarizational process of eggeroliftive convergence and «subsequent» amplificational confluence of «What is» SSS-State into «What will be» SSS-State.

4.1298. In FDs of Form-Creators, availability of this very qualitative difference causes (via the Perception systems typical to Them), in Self-Consciousnesses of Forms focused by Them, narrow-specifically joint subjective effect of existence, in the reality surrounding Them, of the definite signs of qualitative differences between Who (and also where and when) They «were» and Who (and also where and when) They «have become.» Via Space-Time parameters continuously changing in Their Perception systems and providing the subjective effect of Their constant Existence in some Forma Self-Consciousnesses, Form-Creators have real ability to perceive subterraneously, «experience» narrow-specifically, and transform (synthesize) concatenationally, into empiric Experience, all features of exuberations carried out by Them.

4.1299. Once again I remind you that no one Form-Creator (although, the definition of Form-Creators in singular is absolutely senseless!), as well as no one of focused Self-Consciousnesses Forms already structuring skrruullerrt system in the Space-Time exuberation «local points» peculiar to them does not move formally whenever and wherever, does not deform and change anyhow. In the Macrocosmos Space-Time, the only thing is the Process of focal (energy-informational) «reprojection» (amitsiration, subjective self-identification with the particular signs combinations) subjectively accomplished by all Form-Creators at once, from some «part» of Macrocosmos slloogrent focal Configuration to Its another «part,» which resonationally most corresponds to Their «current» qualitative Content (the current Interest features).

4.1300. In every such act of Form-Creators eggeroliftive «reprojection» (in the SSS-Entity Self-Consciousness informational space), owing to availability of the quite specific realizational potential of decoherent Energy, a strictly defined «part» of just initiated focus-ethereal interconnections consuetally «appears» (being «produced,» manifested with the signs peculiar to it) in every «point» of such resonational focusing of Form-Creators. These interconnections are «locally» expressed in the way of the particular Forma Self-Consciousnesses (Stereo-Type), with which Perception system Form-Creators self-identify at «the moment» to use this energy-informational combination for the further realization intensification of the Interest peculiar to Them.

4.1301. After every such act of kleksing (qualitative transformation leading to satisfaction of some part of the Interest) via the Perception system of some Forma (actually, this act is accomplished multipolarizationally-simultaneously, by the same Form-Creators, in many different-Qualitative Stereo-Types), the general picture is changed of Conceptions about this Interest, which are activated by Form-Creators in the previous (before kleks!) Space-Time «local point.» In turn, this induces Form-Creators again to involve resonationally (and, besides, multipolarizationally!), into own FD, the regular signs combinations from the slloogrentness duvuyllerrt «sections» enclosing, into them, thereby, the regular potential of decoherent Energy peculiar to Them and initiating f-Configurations for simultaneous manifestation of the new Self-Consciousnesses Forms (Stereo-Types), which They self-identify with at once for implementation of the regular stage of the joint realization.

4.1302. I have stressed here the word «joint» to draw your attention to the circumstance that the more developed Forma Self-Consciousnesses is, the greater number of all possible Interests simultaneously-multipolarizationally realizes via its FD by heterogeneous Form-Creators. As a result, abruptation on the particular signs and confluence of many different-Qualitative narrow-specific Interests takes place into increasingly universal (global, large-scale) realizational Goals and amplificational Ideas. Besides, physical scales (proportions in the assessment of our Perception systems) of the very Self-Consciousnesses Forms, through which Focus Dynamics the more universal Interests are carried out by Form-Creators, are in no way concerned with their amplification degree, but reflect only typical features of the birvulyarity types peculiar to them.

4.1303. For example, actively self-identifying with bosons and fermions Self-Consciousnesses Forms, Form-Creators are able jointly and simultaneously to realize amplificational Ideas peculiar to Them at once through Self-Consciousnesses Forms all infinite variety, which represent, in Space-Time nutational exuberation conditions, many birvulyarity types (all multitude of atoms and molecules, viruses and bacteria, minerals and vegetables, people and animals organisms Form-structures, Planetary constructions, Stellar and Galactic systems, and so on). Our — human — essential Interests comprise just the smallest part of their realizational Interests structured with the empiric Experience, which They synthesize by Themselves (including Synthesis via Focus Dynamics of NUU-VVU-Form-Types all variety).

4.1304. Thus, analyzing Macrocosmos, we can talk only about different-Qualitative dynamics of Focuses realizational application of heterogeneous Form-Creators providing — by the very fact of the eglleroliftive Interest peculiar to Them — simultaneous exuberation of all possible Self-Consciousnesses Forms in the Space-Time conditions qualitatively corresponding to them. Herein lies the major part of the general functionality of «the Law» considered by us.

## The adapted Principle

### PLOUFF-FOLFF

**«I-am is subjective creative reflection of stability of the potential focal Presence of Everything in the Whole»**

4.1305. It is worth recalling for you here that such notions as «Form-Creators» and «Self-Consciousnesses Forms» simultaneously used by Them for performing eglleroliftive realization (post-mercavnational Consummatization of confective State) are not identical. The Former (as USCF-«projections» of dissonational Focuses of the skrruullerrt system) represent alternative, for primogenitive State, interconnections between cruvursorrt and impersept informational fragments of Pure Cosmic Qualities carried out via specific properties of OO-UU-Entities Which structure SSS-Entity's Self-Consciousness. Form-Creators being focal «projections» of Pure Cosmic Qualities characterize SSS-Entity all Creative Potential. Using even the simplest f-Configurations, Form-Creators are never presented quantitatively, but always — only qualitatively, thereby defining invaderentness (qualitative advantage) of Focus Dynamics of Self-Consciousnesses Forms mutually structured by Them.

4.1306. Self-Consciousnesses Forms are realizational Mechanisms (means, abilities) of Form-Creators temporarily combined by Them on the diverse signs and specifically exhibited in every «point» of Space-Time subjective «localization.» On the functional signs, Self-Consciousnesses Forms are organized by the joint activity of heterogeneous (different-Qualitative) Form-Creators, Who functionally determine, depending on the degree of covarllertness and diffuzgentness arisen between Them in the specific exhibition conditions, absolutely all realizational features of Forma Self-Consciousnesses decoherently composed by Them. Speaking about Form-Creators functions in Worlds' Form-systems, we always mean not direct relations between «Them-Selves» (which are limited by Rezomirals of manifestation), but resonational interactions between different-Qualitative Self-Consciousnesses Forms focally initiated by Them, which are «generated» as a result of Creative Activity of SSS-Entity Self-Consciousness.

4.1307. At the core of this Principle realization are resonational properties of Focus Dynamics of the very Form-Creators (but not SCFs jointly structured by Them!) allowing Them to self-identify with f-Configuration of virtually any Forma Self-Consciousnesses, which They are able to tune into specifically (meaning, resonationally on all multitude of the signs generating its focus-ethereal interconnections). To tune on — means to have ability actively to «project,» into every interconnection of the given f-Configuration, exactly that potential of decoherent Energy of the type peculiar to this f-Configuration, which provides its exhibition within this Forma Self-Consciousnesses in the Space-Time conditions typical to it.

4.1308. If to consider FD realizational abilities of not Form-Creators Themselves, but such Self-Consciousnesses Forms complex-aggregated by Them, as, for example, our mixtum analogs of NUU-VVU-Form-Types jointly structured by many other different-protoformal SCFs, then this Principle will «work» just partially, because the part of dissipative Energy accessible to people (as a community of different-functional Form-Creators) is multipolarized in our FD on many homologic «personalized» Interpretations (and Stereo-Types producing them). That is, we are just unable «to accumulate,» in own subterransive amitsirations, the volume of qualitative Focuses (decoherent Energy) sufficient for self-identification with another Forma Self-Consciousnesses.

4.1309. And this means we cannot supply energetically all those specific conditions, which are necessary for space-time exhibition, in the given «point,» of potentially sort of «available there» (in the skrruullerrt system) Forma Self-Consciousnesses. Although, if we and Form-Creators of Forma Self-Consciousnesses potentially accessible for us have some resonationness of creative Interests, we can self-identify at least partially (right up to the deep psychic states), in the altered state of Self-Consciousness (in particular, in the profound Meditation), with Focus Dynamics peculiar to this Forma. In this case, decoherent Energy of some of interconnections involved by us can activate, in our own FD, identical combinations of such SFUURMM-Forms, which are typical for Forma Self-Consciousnesses potentially interesting for us.

4.1310. As regards Form-Creators Themselves, this Principle allows the same Form-Creators of OO-UU-Entities to manifest simultaneously («to stay,» «to be present») in f-Configurations of any level of complexity starting from the most elementary ones and finishing with the most universal ones. Because the perfection (completeness) degree of one or another Forma Self-Consciousnesses

depends not on «the quantity» (Information volume) of Form-Creators structuring it, but on covarllertness degree (qualitative compatibility) of focus-ethereal interconnections between each other, which are able functionally (interactively) to reflect in Focus Dynamics performed by Them.

4.1311. Absolutely all slloogrentness of the general Focus Dynamics of Macrocosmos HCCI is always potentially (latently) present in FD of any Forma Self-Consciousnesses. The problem of its realization by Form-Creators via one or another FS lies in the absence of the real ability for Them to activate jointly all potential interconnections at once (all dissipative Energy of Creation). Focal Configuration of any Forma Self-Consciousnesses, due to imperseptness peculiar to it (tensoriness, absence of interbalancing focus-ethereal interconnections), just is not intended for identification with such energy Potential.

4.1312. Collective Cosmic Intelligences structured with the infinite multitude of different-Qualitative Self-Consciousnesses Forms have, in this respect, much greater abilities due to the fact that birvulyart Vectors of Their Focus Dynamics are supplied with the huge diversity of heterogeneous interconnections producing — in own integral simultaneous manifestation! — qualitative emergent extra-additive effect on each other, which allows CCIs Form-Creators to realize via much greater Energy-Potential. But affiliation to the definite birvulyarity type (covarllertness availability on some signs and imperseptness or cruvursorrtness on the other signs) strongly restricts Their realizational abilities.

4.1313. For Form-Creators, the way out of all these creative restrictions is provided by the gabitual presence, in Information Itself, of the Diffuzgentness Property, which is manifested, in conditions of Creative Activity of SSS-Entity Self-Consciousness, as the primary Mechanism of concatenational universalization of Focus Dynamics of diffuzgent different-type CCIs via consequent confluence («step-by-step» liyllusceevization, functional integration) of the birvulyart signs peculiar to Them. Thus, producing increasingly complex-composed birvulyarity types, Form-Creators acquire ability to involve much greater part of Macrocosmos dissipative Energy into own subjective creative work.

4.1314. The huge role in this amplificational Process is played by the Principle considered by us, which functionally defines steady invariability of all energy-informational interconnections between Form-Creators of Self-Consciousnesses Forms of all Collective Cosmic Intelligences simultaneously already accomplished in all Infinity of Macrocosmos space-time structures at once in all Levels of Energy-Plasma Creative Activity. How could one imagine this through subjective features of our human Existence?

4.1315. For example, when you — as «person» — have self-identified with the other own «personalized» NUU-VVU-Interpretation in the multipolarization of own Focus Dynamics at the next moment of its («the previous person») realization, this does not mean at all that «you» — as the «previous person» — have ceased to exist in the s-Reality peculiar to it. Not at all! At the moment, you have dis-identified with your «previous person,» but it continues, in parallel with you, subterransive subjective existence in own rotational Cycle without ceasing to influence, with own FD, on your choices (on some signs combinations) to the same degree, as you influence on its choices with your own essential Interests.

4.1316. At every Existence moment subjectively realized by you, you experience own development scenario, and each of your «personalized» Interpretations experience own scenario. During amirsations, accomplishing Synthesis on many invaderental signs, your FD constantly qualitatively «merges» with Focus Dynamics of some other your «personalized» Interpretations, thereby producing a certain continuous picture of your joint psycho-mental experiences and impressions implemented in different development scenarios. On the basis of the Conceptions about «yourselves» and «the reality surrounding you» formed as a result of this, some subjective Experience of «your» subterransive Existence in the particular scenarios is organized by Form-Creators in the informational space of your «person's» Self-Consciousness — so called rotational Cycle (your memories about «yourselves» starting from the moment of birth).

4.1317. Various «personalized» Interpretations are associated with the different rotational Cycles, which Conceptions, despite of the difference on many subjective details, can coincide in many respects. This is what allows Focus Dynamics of Form-Creators of various «personalized» Interpretations, after accomplishing revitalization act of the Forma Self-Consciousnesses focused by Them, subterransively to «merge» (with the identical UU-VVU-conglomerates) in the qualitatively identical NUU-VVU-Configurations.

4.1318. Each time, sort of «leaving,» with own FD, the conditions of your «current» exhiberation in the particular group of the human STCs, you — as Forma Self-Consciousnesses («person») of the given Collective Cosmic Intelligence — always subterransively focus only in the strictly defined development scenario, which is able realistically to reflect qualitative parameters of only your current «person.» Besides, all the rest your «personalized» Interpretations disappear nowhere and never, but always stay in the scenarios peculiar to them, regardless of where your essential Interest is activated among the whole multitude of the other Worlds of your simultaneous Existence.

*«The Law of absolute Compatibility of different-Qualitative Focuses all variety in slloogrent Creative Dynamics of Macrocosmos Form-Creators»*

## **LLIILL-GGLLAA**

### **«The Law» realizational Essence**

4.1319. All infinite diversity of creative interactions between Form-Creators of all Self-Consciousnesses Forms of different-type Collective Cosmic Intelligences is provided with availability, in the skrruullerrt system, of the countless number of the resonational zones common to them of ambigulyar Creative Activity of SSS-Entity Self-Consciousness interpenetrating each other in many birvulyarity types and producing absolutely all qualitative Levels (Form-structures) of Plasmic Forces Diapasons of Macrocosmos. Through the functions of This «Law,» the Liyllusceeveness Property

of Information primogenitive State is reflected in all «projections» of the skrruullerrt system as Resonationness Property of focus-ethereal interactions of Form-Creators with Info-Creators.

4.1320. For heterogeneous Form-Creators simultaneously realizing via Self-Consciousnesses Forms of some birvularity type, in the Macrocosmos slloogrent f-Configuration, potentially, there are always corresponding Levels of the absolute compatibility (liyllusceeveness) of Their Focus Dynamics with Focus Dynamics of Form-Creators, Who realize via Self-Consciousnesses Forms of the other birvularity types. And even taking into account availability, in FD, of high imperseptness or cruvursorrtness on some qualitative signs, due to simultaneous implementation of eglleroliftive convergence between different-Qualitative focus-ethereal interconnections of different-type CCIs, there are always combinations, where these locally incompatible interconnections flow together, while organizing to the more universal, for them, option of focal interaction.

4.1321. This «Law» provides subjective Process of overall multipolarizational liyllusceevization of all Focus Dynamics of heterogeneous Form-Creators simultaneously structuring Self-Consciousnesses Forms of absolutely all CCIs. As the result, achievement (implementation), in SSS-Entity Self-Consciousness, of the State of absolute amplificational Consummatization (progressive qualitative correction of primogenitive State) and Its transcendent Transformation to the more universal — confective — State become possible.

## **The adapted Principles**

### **A) The ULLUFF-DAARDD Principle**

**«I-am is subjective creative reflection of potential Compatibility of Everything in the Whole manifested via Information qualitative Heterogeneity»**

4.1322. At the core of «the local» (subjective) incompatibility of some of the focus-ethereal interconnections specifically reflected in Space-Time identical conditions there is the Heterogeneity Property of Information structured with the infinite heterogeneous variety of reconverstive Configurations of SSS-fragments generating It. We have conditionally grouped all versions of this gabitual heterogeneity to the twelve main profective Types, which were subjectively defined (for convenience of manipulation in our Perception systems!) as «Pure Cosmic Qualities.» In fact, potential interaction between all These primary PCQs produces all infinite multitude of potential options of absolutely all «intra-informational» States (primogenitive, consummative, confective ones...).

4.1323. It should be noted that existing SSS-heterogeneity is preserved even when we conditionally diversify all informational structure not on twelve, but on quadrillions of all possible options — even then, all inter-skunkktional interconnections will be any different to each other: some of them will anyway manifest the greater potential activity between each other, than towards the other SSS-fragments. Having conditionally divided all this heterogeneity on the twelve primary categories, we gain only more convenient (for us!) consideration pattern required for carrying out logical and analytic manipulations with any Information Particulas, what, in turn, potentially allows us to form,

in own Perception systems, at least some subjective Conceptions about any of the objects considered by us (informational construction, f-Configuration).

4.1324. Due to availability of this Property of qualitative Heterogeneity in Information, extremely unstable (from the standpoint of Self-Awareness potentially peculiar to It) primogenitive SSS-State has been generated «inside» of the reconverutive slloogrent «structure» produced by It. This State being in general absolutely harmonious and balanced nevertheless does not allow Information (due to the huge qualitative difference — cruvorsorrtness and imperseptness — between independent Heterogeneity types) to enter the State of absolute informational abruptation (gabitual «mergeness,» liyllusceeveness, «non-being») — Particulas, which are incompatible between each other to any degree at least on some qualitative signs, do not allow Information (as potential SSS-Entity) absolutely fully to Self-Realize «Themselves» on each of SSS-fragments peculiar to It.

4.1325. Relatively speaking, informational primogenitivity, regardless of own overall balanced state, leaves room for availability of the Creative Dissatisfaction State, which is the source of manifestation, «inside» of Information, of What we define as «essential Interest» (creative «incompleteness,» definite unexploredness). As the natural reaction on this very State, an additional Creative Potential is consuyetally (due to the fact of the presence of this very Interest, meaning, with the aim of its complete annihilation) initiated «inside» of Information. This is United Superuniversal Impulse (USIP) structured with the infinite multitude of very diverse creative abilities holochronely expressed via the particular combinations of heterogeneous Impulse-Potentials (for example, «irrkoglictive + eglleroliftive,» «avariterrnostal + intrinsessive,» «aviditasive + divinurtive» ones, and the like).

4.1326. The Essence of their appearance and different-functional distribution between Information Particulas lies in the fact that specific complex influences subterraneously peculiar to each of these IP-combinations restructure equally specifically, in all microstrs of reconverutive Configuration of each of SSS-fragments, typical to them potential properties and features (in no way manifested in primogenitive State!), thereby initiating, between them, completely new inter-skunkktional interconnections, quite definite, and earlier not peculiar to them. Such different-Qualitative influence has been holochronely performed by all IP-combinations with respect to r-Configurations of each among the infinite number of heterogeneous SSS-fragments!

4.1327. As a result of such «internal» Act of overall IP-mercavgnation, multiple cardinal changes have simultaneously happened both in the structure of Information Itself and in primogenitive State peculiar to It. These changes have affected literally every inter-skunkktional interconnection multiple times. Ultimately, simultaneous implementation of all these qualitative conversions has enabled every skunkktion to establish stable connection not only with SSS-fragments compatible with it, but also with each of those skunkktions, which «previously» (before mercavgnation) showed at least some extent of imperseptness or cruvorsorrtness signs with respect to it.

4.1328. Having merged in the united transformational Act, these new interconnections holochronely produced (not somewhere «independently,» but sort of «inside» of primogenitive State Itself!) the infinite number of amplificational «projections» peculiar to them (focal-dissonational interconnections of the skrruullerrt system), which have formed, «inside» of Information (via

multipolarizational UPDR-Dynamics), being multiply and variously reflected via realizational needs of Form-Creators generated at that (original «surpluses» of newly manifested heterogeneous interconnections), all infinite variety of dissonational (in respect of Information primogenitivity) Form-systems of different-type Macrocosmoses.

4.1329. So, despite of ambigulyar Property of informational Heterogeneity, any of Form-Creators subjective manifestations («I-am,» Forma Self-Consciousnesses) always reflects, by itself, potential (in the other exhiberation conditions) compatibility with any other FS (regardless of the birvulyarity type peculiar to it), which can be simultaneously manifested both in this Macrocosmos type and in the infinite multitude of Its other types formed in the other conditions of IP-combinations. This fundamental feature of every Forma Self-Consciousnesses is provided by the Principle considered by us, which functionally determines essential availability, in f-Configurations of every Forma Self-Consciousnesses of some CCI types, of the infinite number of Particulas, which simultaneously structure also f-Configurations of Self-Consciousnesses Forms of the other CCI types concurrently realizing in completely other qualitative Levels and having other creative abilities.

4.1330. An example of such multi-functional compatibility between Form-Creators of different Proto-Forms could be simultaneous different-Qualitative FD of bio-Creators of our mixtum analogs of NUU-VVU-Form-Types, which biological constructions represent the result of the joint (and very specific in every case) creative self-realization of the infinite number of different-protoformal Self-Consciousnesses Forms starting from «elementary particles,» «atoms,» «molecules,» and «cells» and ending with «biological organs» and «physiological systems.» Own Focus Dynamics of Form-Creators of each of these protoformal groups actively using, for own realization, karmic Channels of the particular IISSIDI-Centers mainly in no way reflect the Sense of even the most general Conceptions peculiar to people, since their subterransive SFUURMM-Forms structure the other — inhuman — CCIs.

4.1331. Nevertheless, being diffuzgently compatible on the particular signs combinations (invaderentness either on ALL-Love-ALL-Wisdom PCQ, or on ALL-Will-of-ALL-Intelligence PCQ) forming Their Focus Dynamics, Form-Creators of our biological organism — by own stable and coordinated interaction — provide, with the definite decoherent Energy, not only own realizations in this exhiberation diapason (on the UU-Factors typical for Them), but also Focus Dynamics of Form-Creators of the human DNAs (both nuclear and mitochondrial ones), which organize Synthesis of the same signs on the VVU-Factor peculiar to them.

## **B) The UYYG-LLAA Principle**

**«I-am is subjective creative reflection of qualitative correspondence of every Forma Self-Consciousnesses to the conditions of its exhiberation in the Whole»**

4.1332. As pointed out several times earlier, the exhiberation act itself of any Forma Self-Consciousnesses represents regular result of «projection» and simultaneous realization, in some of

the vibrational areas of Plasmic Forces Diapason (that is, the skrruullerrt system), of the particular part of general dissipative Energy produced during mercavgnation. In every point of own application, mercavgnation is expressed via joint focus activity of heterogeneous Form-Creators initiated somehow in many Focuses structuring different Rezmirals of manifestation.

4.1333. The realizational base for their joint interactions exactly in the given DPS area («point of focus localization») is availability, in their f-Configurations, of some degree of commonality of the essential Interest typical for them, which is differently interpreted by them concerning its specific realization (as dissonation annihilation existing between Focuses and primogenitive State).

4.1334. Since each of focus-ethereal interconnections structuring this Interest has the particular realizational Interest, these different-Qualitative focal interactions, in every «point» of the application («projection») peculiar to them, are reflected via the definite integral of decoherent Energy cumulative for them. This part of dissipative Energy being «localized» by Form-Creators in the particular section of the skrruullerrt system is irregularly activated by Them for realization of all multitude of different-Qualitative interpretations of this essential Interest. Some part of this, functionally restricted Energy is used for subjective manifestation of some SFUURMM-Forms to a greater extent, and manifestation of the other SFUURMM-Forms to a lesser extent.

4.1335. Based on the global realizational picture abyssally formed in the Rezmirals of manifestation and specifically implemented via locally expressed (in the state of the general multipolarization) Focus Dynamics of Form-Creators, the particular part of this FD corresponding to this «point of local projection» is qualitatively converted to *causal* «projections» of the skrruullerrt system, which constitute this part of the FD and which are peculiar only to it. In the Perception system of f-Configuration of the Self-Consciousness Form *exhiberated at that* (meaning, having been «exuded» in the general slloogrentness on some signs combinations), these *causal* «projections» are specifically reflected via focal-ethereal interconnections structuring the given Rezmiral section in the way of «the surrounding reality» subjectively perceived by Form-Creators — the particular Space and Time qualitative parameters.

4.1336. It should be noted that for accomplishing exhiberation, in Space-Time, of f-Configurations of the more ampliative (for each of the birvulyarity types) Self-Consciousnesses Forms, Focus Dynamics of Form-Creators (or rather, SFUURMM-Forms structuring it) should have high parameters of decoherent Energy providing realization of the particular Interest, and this very Energy should be less «sprayed» among many other different-protoformal Interests concurrently activated in this very FD (maximally ordered by interconnections between Form-Creators of *the specific covarllert signs*).

4.1337. This happens, because during «unpacking» (subterransive kleksing) of the more ampliative SFUURMM-Forms mostly structured by *heterogeneous covarllert* interconnections, a greater informational volume of empiric Experience is sort of «released» in Focus Dynamics (meaning, it is simultaneously annihilated, while converting to qualitatively «new» Space-Time parameters). This Experience is simultaneously realized by many other «personalized» Interpretations, which resonationally «project,» to this FD, the Conceptions peculiar to them. In turn, the more ampliative Self-Consciousnesses Forms are also supplied with the more perfect Perception systems, which allow

Form-Creators of these SCFs actively to manipulate (unpack per unit of time) with correspondingly higher energy potential.

4.1338. So, profectively, any Self-Consciousness Form, as well as the Perception system peculiar to it, is in absolutely precise qualitative correspondence with its exiberation conditions, since absolutely all focus parameters of these conditions (STCs, CSRs) represent the consequence of realization of Form-Creators FD structuring it. The Self-Consciousness Form itself is the very illusory (realizational) effect self-initiating in the informational space of SSS-Entity Self-Consciousness, which we subjectively interpret as «Space-Time.» Every Self-Consciousness Form is the area of the Space «geometry» organized in a particular way, which is exiberated specifically, qualitatively in «accordance» with Time Entity state peculiar to it.

4.1339. The Integral of the infinite multitude of such different-Qualitative effects of focal-ethereal interconnections between Form-Creators and Info-Creators is aggregated, in the Perception systems of Self-Consciousnesses Forms all variety, to the overall illusory picture of all-possible (different-protoformal) space-time Continuums and collective subjective Realities. Their alternation totality is organized via our brain bio-Creators to successively unpacked, in our Self-Consciousness, Illusion of the continuous subterransive Existence.

4.1340. In this process, the great role is played by the functions of the Principle considered by us, which provides, in it, qualitative stability of already existing energy-informational interconnections between Form-Creators of all Self-Consciousnesses Forms of different-type CCIs structuring qualitatively identical manifestation Levels of Energy-Plasma and individually using specific space-time structures of each of these Levels to implement own essential Interests.

4.1341. For example, Focus Dynamics of the most part of bio-Creators of our subjective Perception systems are resonationally tuned to the interconnections only with Form-Creators of those among countless number of Self-Consciousnesses Forms surrounding us, which subterransive properties also correspond to a great degree to a very narrow spectrum of Creative Activity revealed by us. The remaining part of slloogrent FD, which, for various reasons, is not included to this vibrational spectrum and it in no way can reflect at least some part of the SFUURMM-Forms synthesized by us, virtually completely «falls out» of the process of the conscious energy-informational interexchange of bio-Creators of our Perception systems, that is, it becomes sort of «non-existing» to us.

4.1342. But during amitsiration, as soon as we change NUU-VVU-Form focused by us for the more ampliative one, our interconnections with Self-Consciousnesses Forms earlier sort of «non-existed» to us begin specifically to appear through those parts of our Perception system, which resonationally correspond to the more qualitative parameters. These Forms already structure other Energy-Plasma Levels, which qualitative parameters are mostly identical to the f-Configuration of our new «personalized» Interpretation.

«The Law of ALL-Qualitativeness manifestation in Focus Dynamics of any among Self-Consciousnesses Forms and CCIs »

**LLIIFFT-GGLLOOSST**

**«The Law» realizational Essence**

4.1343. Any of specifically manifested Forms of creative Self-Realization of Collective Cosmic Intelligences reflects, to various degrees, in Focus Dynamics of Form-Creators peculiar to it, typical attributes of each of the twelve OO-UU-Entities representing, in one way or another, Information primogenitive State in this Macrocosmos type. These attributes can be shown, in FDs of various Self-Consciousnesses Forms, at quite versatile combinations, with varying degree of invaderentness and vecsativeness, but certainly in the full Qualitative set. This is possible due to availability of such Universal Property of Information as Slloogrentness.

4.1344. Let me remind you that the main informational basis of SSS-Entity Self-Consciousness functioning is *heterogeneous* ethereal filling of all OO-UU-Entities, Which, in turn, reflect (via UPDR properties) typical «projections» of all *heterogeneous* Pure Cosmic Qualities of Information primogenitive State. As is known, the primary Essence of the mercavgnation Act and the subjective Process of Information absolute Consummatization induced by it is to balance completely existing qualitative *heterogeneity* between reconverstive Configurations of all SSS-fragments — in order that «What is» (primogenitivity) qualitatively to be universalized to «What should be» (confectiveness).

4.1345. And this means that the state of every skunkktion should become equally qualitatively balanced (should be brought to informational, sense conformity) with informational filling of all infinite variety of the other skunkktions. To that end, the countless microstrs of *each* of the skunkktions are specifically over-modified (distorted) by *each* of the same multi-variety of Impulse-Potentials. Basically, every IP, in accordance with the features peculiar to It, *narrow-specifically recodes* qualitative content of every skunkktion, thereby initiating it for interconnections with skunkktions «earlier» (in primogenitive State) impersept or cruvursorrt with respect to it. After such holochrone IP-influence, all skunkktions of heterogeneous SSS-fragments acquire sense compatibility (sort of self-identify on absolutely all SSS-attributes) and jointly liyllusceevate (qualitatively merge, annihilate), while transforming from primogenitivity to immutatly «point-like» (for us!) singularity of absolutely perfect confective USIP-State.

4.1346. Such heterogeneous merging (abruptation) of all inter-skunkktional interconnections between each other is «preceded» by the subjective Process of their consummatization in the way of Creative Activity of SSS-Entity Self-Consciousness simultaneously expressed via abyssal Focus Dynamics of Form-Creators of the infinite multitude of different-type Macrocosmos. Amplificational Sense of this Process is that typical attributes of absolutely all PCQs (presented via OO-UU-Entities «projections») could be reflected, in a particular way (slloogrently), literally *in every* focal-ethereal combination (Self-Consciousness Form).

4.1347. This is achieved due to availability, in Self-Consciousness structure, of invaderental-vecsative system of interaction between heterogeneous Form-Creators. As the result of it, all variety of the more primitive Schemes of inter-Qualitative Synthesis and birvulyarity types sequentially (svilgs-spherationally) consolidate on all heterogeneous attributes and abyssally extrapolate to a single — general — Focus Dynamics (Creative Activity) of SSS-Entity Self-Consciousness. Thus, it turns out that *any Focus Dynamics type specifically reflects interconnections between attributes of all OO-UU-Entities.*

## The Adapted Principle

### KSAAYY-KRAASS

**«I-am is subjective creative reflection of ALL-Qualitativeness of all Self-Consciousnesses Forms simultaneously manifested in all exhibition Levels of Everything in the Whole»**

4.1348. No one (even the most elementary!) Synthesis Scheme, which means also that no one Self-Consciousness Form structuring it, can be implemented at the absence, in the FD of its Form-Creators, of the typical attributes of at least one of OO-UU-Entities. Every focal-ethereal interconnection, which is reflected, this way or another, in any Perception system, is always multipolarizational by own realizational structure. Meaning, it is simultaneously «projected» to the multitude of focal-ethereal combinations of the other Self-Consciousnesses Forms generated on various Synthesis Schemes, while being reflected (subjectively experienced, cognized, «unpacked») as extremely diverse illusory effects in *their* Perception systems.

4.1349. Form-Creators in no way associate «Themselves» only with some particular Self-Consciousnesses Forms, but They are always «projected,» with realizational Interests peculiar to Them, to the infinite multitude of different-protoformal Synthesis Schemes producing all countless variety of birvulyarity diversities and types. In some of them, They play invaderental (leading, dominating) role, while uniting, in own creative work, on the signs of the highest compatibility between Each Other (in these exhibition conditions!). And in some Schemes, They are satisfied with carrying out only vecsative (suppressed, subordinate) functions, while participating in a catalyst (auxiliary, initiating) way, on the background, in the generation of focal-ethereal interconnections not peculiar to Them (not reflecting Their essential Interests in these conditions).

4.1350. In this or another Synthesis Scheme, vecsativeness of Form-Creators reflects not Their qualitative «second class status» or «minor position,» but just only the degree of Their «local unconcernment» (decreased Creative Activity) in the particular realization of the attributes peculiar to Them, which They simultaneously («at the same time»), more effectively implement *already* via invaderental focal-ethereal combinations of Focus Dynamics of the other Proto-Forms. Meaning, in some development Directions of the given Synthesis Scheme, the degree of Their vecsativeness decreases svilgs-spherationally, to the most favorable conditions are about to come in this FD multipolarization spectrum for realization (in the same manifestation resopason!) of the attributes peculiar to Them.

4.1351. Then, They become maximally activated and acquire functional invaderentness, and, in this way, modify the previous Synthesis Scheme to another one, which, in the given exhiberation conditions, does not satisfy Their realization needs anymore. In *each manifestation resopason*, They *invaderentially* form and simultaneously implement many most versatile Synthesis Schemes, where They interact the most actively and fruitfully with some of the Form-Creators of OO-UU-Entities most compatible to Them (in these conditions).

4.1352. The presence of such invaderental-vecsative system of simultaneous multipolarization in Focus Dynamics of all different-protoformal Self-Consciousnesses Forms allows Form-Creators of each of OO-UU-Entities to acquire, in every manifestation resopason, the most profound and versatile Experience of inter-Qualitative interaction with Form-Creators of all the rest OO-UU-Entities. Extrapolating it to focal-ethereal interconnections newly generated by Them, They increase the degree of own compatibility with the carriers of the other qualitative attributes, what allows Them to enter increasingly extensive (and deep) invaderental interconnections, while forming multi-invaderental types of Synthesis Schemes in the same resopasons.

4.1353. For example, along with the two-invaderental Synthesis Scheme of mixtum NUU-VVU-Form-Types (ALL-Love-ALL-Wisdom + ALL-Will-of-ALL-Intelligence), Form-Creators of These OO-UU-Entities — in the same exhiberation conditions — simultaneously form, in different-protoformal development Directions, many Self-Consciousnesses Forms (diffuzgent as regards lluuvvumic birvulyarity type) of NUU-VVU-Form-Types simplisparentive analogs, which structure three-, four-, five-, and even six-invaderental Synthesis Schemes (in every resopason, Form-Creators of the OO-UU-Entities attributes, which are the most compatible in these manifestation conditions, acquire additional invaderentness). At that, Their Focus Dynamics organize not only the other Self-Consciousnesses Forms, but also Space-Time (STC and CSR types) analogs completely different by own qualitative parameters (properties).

4.1354. The Principle considered by us, along with the others, provides real opportunity for simultaneous creative manifestation, in every focal-ethereal combination of Energy-Plasma PFD, of all OO-UU-attributes at once, regardless of which CCI's Focus Dynamics structures one or another Self-Consciousness Form. Any act of Form-Creators multipolarizational amitsiration accomplished simultaneously in any of the Energy-Plasma Levels, can be fulfilled only at concatenational interaction (participation) of the corresponding Aspects of all twelve OO-UU-Entities regardless of whether any Self-Consciousness Form realizes this or not, in which Focus Dynamics this process is «locally» initiated.

*«The Law of Destruction and Destabilization of informational parameters of Focus Dynamics in general Creative Activity of SSS-Entity Self-Consciousness»*

**YYYU-LLU-AYY**

**«The Law» realizational Essence**

4.1355. The stable equilibrium state of Focus Dynamics of each of Energy-Plasma exuberation Levels is provided by simultaneous activity, in it, of such coordinated combination of realizational efforts between heterogeneous Form-Creators (Forces, decoherent Energy realization directions), which, from one side, destructures and destabilizes primogenitive qualitative interconnections, and from the other side, organizes, on their basis, new combinations types of the same attributes, while balancing them between each other by the more universal options of constructive interactions, which are typical for confective State.

4.1356. In multipolarization of Focus Dynamics of heterogeneous Form-Creators, any appearance of the destructiveness subjective signs (depliativeness in respect of the conditions of some birvularity type) always potentially already «embodies» the more constructive constituent part, which does not have a chance to be implemented in these exuberation conditions, though it is simultaneously manifested in the more deep, ampliative multipolarization spectra.

4.1357. Let me remind you that in the mercavgnation Act, irrkoglictive IP (jointly with the countless number of the IP-analogs functionally corresponding to It) has determined the most universal «picture» of holochrone conversion of all inter-skunkktional interconnections of primogenitive SSS-State to «the standard» interconnections of confective USIP-State. In parallel with this, eglleroliftive IP (jointly with the countless number of the IP-analogs functionally corresponding to It) at once has holochronely fulfilled this conversion in the spectrum peculiar to It of the intra-informational interactions (with respect to every skunkktion).

4.1358. Thus, SSS-Entity Self-Consciousness has been ambiguously generated «inside» of Information with the specific Form of Its manifestation — Macrocosmos of the given IP-type, which basis is comprised of «the renewed» focal-ethereal interconnections of the skrruullerrt system — the Prototype of confective USIP-State. In SSS-Entity Self-Consciousness informational space, the Principle of successive subjective manifestation (with the aim of realization and Experience amplificational extrapolation — qualitative difference between «What Is» and «What should Be») is provided by heterogeneous Form-Creators — focus «projections» of the attributes (Aspects) of Pure Cosmic Qualities. The analogs of PCQs in Universal Plasmic-Differentiated Radiation forming the skrruullerrt system are Their ethereal «projections» — OO-UU-Entities.

4.1359. The subjective Process of Self-Awareness is resonationally realized by Form-Creators of every OO-UU-Entity on the principle «from the simple — to the complex,» that is, from inter-skunkktional interconnections between one PCQ attributes — to all-possible stabilized interconnections options between Aspects of all PCQs. Therefore, to accomplish eggeroliftive consummatization of all focal-ethereal interconnections in the Macrocosmos given type, the general Process of Self-Awareness (simultaneous concatenational amitsiration throughout all Vectors of multipolarization at once) of Form-Creators is sivilgs-spherationally organized from the less heterogeneous focal-ethereal combinations to increasingly abyssal and complex-compound, on various attributes, «sections» of slloogrent f-Configuration, which are informationally more concentrated and meaningful in own Essence.

4.1360. In Focus Dynamics of Form-Creators, the focal part of Information is presented by mercavgnationally renewed inter-skunkktional interconnections of potentially *already formed* confective SSS-State (which resonationally reflects, in FD of every Self-Consciousness Form, strictly defined part of the fully completed f-Configuration of the skrruullerrt system), and the ethereal part represents qualitative «projections» of primogenitive inter-skunkktional interconnections (which are reflected via ethereal Configurations of SFUURMM-Forms).

4.1361. During every multipolarizational «unpacking» of Focus Dynamics, invaderental Form-Creators resonationally initiate, in the Perception systems of own Self-Consciousnesses Forms (via subterransive OLLAKT-DRUOTMM-system, FLUU-LUU-complexes and their analogs), a «section» of primogenitive interconnections qualitatively corresponding to Them («What is»), «identify» it with «What should be» (meaning, with what is put, in the given exhibition conditions, into Their Own f-Configuration representing the part of the skrruullerrt system), accomplish at once required qualitative conversions (kleks), and form the obtained result in the way of the specific new Conception. The process happens simultaneously over all-possible Directions — spectra — of FD multipolarization at once, in the given focal-ethereal combination, while generating (in the people's ODSs) countless number of UU-VVU-copies having something so similar about them (which at once are resonationally organized, first, to SFUURMM-Forms, and then, to UU-VVU-conglomerates).

4.1362. Because this process is accomplished, in FD, concatenationally (duvuyllerrtly and qualitatively-sequentially, on the highest degree of compatibility), the results of subterransive kleksing, in each of these spectra, differ from each other as to the degree of Resonationness of «the new» combinations with respect to «the old» ones. But since the main Purpose of such interactions between Form-Creators is Their absolute liyllusceevation and abruptation, some of «the old» combinations first should be destabilized and destructured, and then multipolarizational covarllertized on the attributes most compatible with them.

4.1363. Besides, at some of the Vectors of multipolarization, «the old» SFUURMM-Form is virtually sort of completely disintegrated in FD converting at once to qualitatively new Conception, which is more stable, in these conditions, on some particular attributes combinations. Whereas stabilization in each of the rest Vectors of multipolarization occurs on some other attributes. Such qualitative replacement consuyetally initiates, in Self-Consciousness informational space, the continuation of the qualitative rotation process of Focuses of Close Attention of Form-Creators to the other «sections» of the skrruullerrt system.

4.1364. It turns out that, to focus in the new — more covallert and stable — interconnection, impersept inter-skunkktional interconnections of «What is» (or rather, their ethereal «projections;» though, primogenitive State Itself remains unchanged before the Act of absolute Consummatization!) should be disintegrated in the Form-Creators' Focus Dynamics. Instead of these interconnections (in accordance with the standard Prototype), covallert interconnections of «What should be» are synthesized. Exactly in this way — via sequential «destructions,» deconstructurization of «old» Conceptions in every exhiberation «point» of Form-Creators FD and the following (on the same informational basis!) amplifical creation (subterransive «materialization») of the more universal Conceptions — all Macrocosmos types have been formed.

## The Adapted Principles

### A) The KRUYYY-DMOOYY Principle

**«I-am is subjective creative reflection of the regular Consequences of destabilization of Focus Dynamics of Form-Creators in harmonious Equilibrium of all Forms»**

4.1365. Every Self-Consciousness Form represents the definite Qualitative set of focal-ethereal interconnections abyssal by own Nature — that is, a *part* of slloogrent f-Configuration of the skrruullerrt system subjectively initiated by heterogeneous Form-Creators, which is dissonationally expressed («locally» exhiberated) with respect to the particular «section» of inter-skunkktional interconnections of primogenitive SSS-State. Primogenitive State is characterized by relative (as regards USIP) and absolute (as regards It-Self) Harmony and Equilibrium of all parts comprising it (SSS-fragments). It has been produced (in the way of What we interpret as «Information») as a result of the first reaction of United Superuniversal Impulse Potential to own Creative Activity providing specific qualitative basis for accomplishing the following modernization (mercavgnation) «inside of It-Self.»

4.1366. Conditionally, it can be compared with the following creative states: a poet, who after «catching» a line forms the whole poem out of it; a painter, who after making the first stroke on the canvas with the brush fills it with a certain content as a picture; a composer, who has written the whole song on the basis of a short musical compositions «heard inside themselves,» and so on. We cannot know the gabitual Reason of primogenitive State generation (this would require complete identification with the very USIP-State, which is totally impossible). But this could be subjectively imagined as the essential necessity («internal» Property) of the Information in Self-Perfection (some ampliative Analog of eglleroliftive influence), when the «seeming» Perfection is replaced by the true Harmony.

4.1367. Every Self-Consciousness Form reflects by itself (in SSS-Entity Self-Consciousness) the definite part of Information «modified state,» and therefore it is «internal» part of This Harmony. Any Form, first of all, is a specific informational combination structured by many focal-ethereal interconnections more or less compatible to each other. In each of resonational «intersections» of these informational interactions, the particular «projection» (a part of f-Configuration) is formed

(initiated in the skrruullerrt system) — «the Focus of attraction of identical attributes,» which we interpret as «the Creator of all Forms» («Form-Creator»).

4.1368. Absolutely all Forms are structured only with different-Qualitative Focuses, out of which focal Configuration of «What should be» has been generated. There is nothing in the skrruullerrt system except Focuses infinite diversity! Space and Time are specifically initiated («formed,» «materialized») in the skrruullerrt system as subterransive reaction of Form-Creators *jointly* interacting in various manifestation conditions on the opportunity of implementing amplificational Program laid down in Them.

4.1369. What is with «the Program»? The point is that every Focus is resonationally connected with the part of primogenitive State most corresponding to it by the Essence. This part is qualitatively reflected in it not directly, but as specific ethereal «projections.» This part represents the informational basis, which we interpret as «Self-Consciousness» of the Form considered by us. Therefore, Self-Consciousness is what Creators of Forms *have* to kleks (qualitatively to modify in the given exuberation conditions), while bringing this part of primogenitive Information to absolute correspondence with That standard Prototype, which latent interconnections specifically «code» Focuses of Creators.

4.1370. Svilgs-spherically (in accordance with Program laid down of the «future» Prototype) initiating in one f-Configuration or another, simultaneous Focus Dynamics of Creators of Forms of all Macrocosmos (and also all types of Macrocosmos) is generated. At that, Space properties are reflected via f-Configuration of the skrruullerrt system (as the whole multitude of all-possible options of the joint «localization» of different-Qualitative Focuses), and Time is reflected via already modified Self-Consciousness «part.» One can say that Self-Consciousness is subjective comparative effect of Focus Dynamics simultaneous realization jointly initiated by Form-Creators of the Perception system of the given aggregate Form (consisting of many other Self-Consciousnesses Forms) as the result of successive qualitative conversion, by Them, of «What is» to «What should be.»

4.1371. This illusory effect, due to prevalence, in its generation, of different-Qualitative states of Focus Dynamics of Form-Creators of some Self-Consciousnesses Forms or the others, undergoes continuous transformation (destabilization of the interconnections structuring it) being reflected, in various exuberation conditions of Space and Time, via various SFUURMM-Forms (subjective Conceptions of Form about «itself» and the World surrounding it). The huge role in this realizational process of Self-Consciousness is played by Simultaneity and multipolarizationness of Focus Dynamics of Form-Creators. As the result, one can subjectively distinguish, in «the current» qualitative states of Self-Consciousness of our Forms of Existence, such widely differing conditional features, as, for example, collective unconsciousness, personalized Self-Consciousness, collective Subconsciousness, Supraconsciousness, and so on.

4.1372. The Principle considered by us provides inevitability and stability of qualitative elevation (permanent balancing, harmonization) of Focus Dynamics of Form-Creators of absolutely all Self-Consciousnesses Forms during amitsiration in birvulyarity types peculiar to Them. Owing to the fact that there is always some eglleroliftive Factor of «the forced» destabilization of already

generated interconnections in FD of each of Self-Consciousnesses Forms, Form-Creators always have opportunity to enhance even more the invaderentness state on some attributes. To that end, They have first to destabilize and destructure the most impersept interconnections among already synthesized ones to replace them by the more covarllert ones.

4.1373. On the basis of this infinite amitsirational process, subjective «development» (self-perfection) of Form-Creators is accomplished via concatenational focusing in f-Configurations of increasingly universal Self-Consciousnesses Forms, what we interpret as qualitative eglleroliftive Amplification of their Focus Dynamics in many birvulyarity types.

## **B) The KHLAOSS-KHROOSS Principle**

**«I-am is subjective creative reflection of the infinite destructurezation of Focus Dynamics of Form-Creators in all Self-Consciousnesses Forms of SSS-Entity»**

4.1374. This Principle is functionally manifested jointly with the Principle just considered by us, since every fact of qualitative destabilization (resonational kleksing) of focal-ethereal interconnections provokes by itself the necessity for compulsory destructurezation (sort of complete «vanishing» in Self-Consciousness informational space) of «the previous» Focus Activity, on which basis the regular realizational opportunity («a section» of f-Configuration) is consuyetally «localized» (causally initiated) in the particular «point» of the skrruullerrt system. This opportunity is exhiberated by way of the corresponding Self-Consciousness Form, via which Perception system a new Focus Activity will manifest.

4.1375. The subjective difference between different-Qualitative states of Focus Activity of Form-Creators is defined by us as «Focus Dynamics.» In application to Self-Consciousnesses Forms outgoing during this, Focus Dynamics is reflected in the Perception systems as some «objective» change of many signs in «the current» exhiberated conditions, as an endless alternation of many development scenarios jointly merging to a subjective rotational Cycle, which we interpret as «subterransive Existence.» Besides, everything what structured FD «earlier» sort of «disappears» for the Perception system of the next Self-Consciousness Form, because it is structured by new SFUURMM-Forms.

4.1376. Since the process of such resonational Self-identification of Form-Creators with many different-Qualitative Self-Consciousnesses Forms is accomplished simultaneously-multipolarizationally, it turns out in practice that, during every act of Their exhiberated in one or another Self-Consciousness Form, Their Focus Dynamics is generated differently: some of the previous interconnections are first destructurezated, and then organized again to the more covarllert (as regards the specific attributes) combinations. This, in particular, explains the ability of Form-Creators to accomplish non-duvuyllerrt (partial) amitsirations for Their realization of some strong essential Interests: each of the Self-Consciousnesses Forms focused by Them is in strict consistency with Focus Dynamics peculiar only to it.

4.1377. This Principle provides creative manifestation of the other Principle — KKVVOO-OTM («Duvuyllerrtness of Everything in the Whole»). It is very important «mechanism» in the implementation of the simultaneous Process of our subjective Existence, which Essence lies, from one side, in eglleroliftive Amplification of Form-Creators to absolutely harmonized state of slloogrent f-Configuration of Macrocosmos (Consummatization), and from the other side, in irrkoglictive Qualitation of Info-Creators to reconverstive Configurations of SSS-fragments peculiar to Them.

4.1378. In the practice of our amitsirations, this Principle is performed in the following way: to create opportunities for inertial appearance of something new in the surrounding reality (or inside «ourselves»), it is enough only to change a little bit qualitative state and directivity of the Conceptions implemented by us, which structure our FD. This will serve as the reason for amitsiration of Form-Creators to another f-Configuration and will resonationally designate our Focus Dynamics to that Self-Consciousness Form, which is «localized» already at another Space-Time «point» with another exhibition regime.

4.1379. «We» carry out this Process of subjective kleksing in all duvuyllerrt Directions of possible FD multipolarization spectrum at once. As the result, all infinite multitude of different-Qualitative options of our «personalized» Interpretations («copies» differing by qualitative state of own Focus Dynamics, and therefore, initiating various qualitative parameters of dissonational distances in Space-Time). Hence, all of them belong to different Form-systems of the Worlds and, on the mutual exclusion principle, they are in no way capable of perceiving each other.

*«The Law of absolute equilibration in the Whole of subjective reactions of Form-Creators of Everything»*

## **TUURR-MOORR**

### **«The Law» realizational Essence**

4.1380. Any option of Focus Dynamics manifestation in Self-Consciousness Form qualitatively corresponding to it is initiated, at the given Space-Time «point,» by simultaneous appearance of Focus Dynamics *similar to it* (FD) of the countless number of the other Self-Consciousnesses Forms simultaneously exiberated in manifestation regimes subterrantly peculiar to them (in the other STCs and CSRs groups). Meaning, many options of subterrantly manifested similarities (on some specific realizational sign) provide — by the joint Potential of decoherent Energy peculiar to all of them — exiberation effect of each of these similarities in diverse Space and Time conditions. In other words, like «attracting» like thereby provides opportunity for itself of own realization.

4.1381. Here, you should recall that the Effect of realization of own Focus Dynamics subjectively perceived by Form-Creators of Self-Consciousness is the regular reflection, in Space-Time, of the profective Reason, which produced this Space-Time. In any of the cases of FD performance, the Reason, which defines the very ambigulyar Nature of FD, is always caused by the need for full annihilation, *in every FD manifestation resopason*, of any signs of qualitative dissonation between r-Configurations of absolutely all SSS-fragments.

4.1382. It is also very important not to forget about differences between common parameters of exhibition of Self-Consciousness Form and very narrow parameters of manifestation of its Focus Dynamics (which reflects the essential Interest of only Form-Creators of the definite birvulyarity type). The first parameters are formed by the joint creative work of Form-Creators of many different-Qualitative Self-Consciousnesses Forms differently diffuzgent to each other, which reflect, with own f-Configurations, properties and realizational Interests of Form-Creators of various birvulyarity types. *Own manifestation resopason* is characteristic of Focus Dynamics of each of these different-Qualitative Self-Consciousnesses Forms arranged on the Resonational Principle.

4.1383. For example, neural tissue, sensory organs cells, our brain receptor cells realize only in resopasons peculiar to them; secretory and reticuloendothelial cells (of blood and immune system), and also epithelial secretory cells of exocrine glands and endocrine system, connective and muscular tissues realize in own exhibition regimes; joint FDs of Form-Creators of each of internal organs of our biological organism realize in own regimes; FDs of Creators-Interpreters and Creators-Motivators of our nuclear and mitochondrial DNAs realize in those nutational limits, which are peculiar to nuuvvumic-mixtum diversity of lluuvvumic birvulyarity type, and so on. Form-Creators of all these — so different from each other in appearance and properties — Self-Consciousnesses Forms are connected with Each Other by profective functional interdependency in realization of the Interests subterraneously peculiar to Them and dictated by the features of Their Synthesis Schemes.

4.1384. *In the given conditions*, They are simply unable, except through similar multilateral and diversified Cooperation, to accomplish absolutely precisely the Program mercavgnationally placed in Them on qualitative perfection of some of primogenitive interconnections reflecting this way or the other via focus combinations of this Space-Time exhibition regime. This becomes possible only via simultaneous realization of FD of heterogeneous Form-Creators at once in the infinite multitude of different-protoformal Self-Consciousnesses Forms of animals and microorganisms, vegetables and minerals, bosons and fermions, and also all-possible cosmic objects. In order to achieve these common amplificational Purposes, Form-Creators of many different Self-Consciousnesses Forms continuously intersupplement Focus Dynamics of Each Other with the signs peculiar to Them.

4.1385. The integral of all parameters of simultaneous-conjoint manifestation of different-Qualitative Focus Dynamics of heterogeneous Form-Creators of all these different-protoformal Self-Consciousnesses Forms (as «ourselves,» as the reality surrounding us) generates, by itself, the Space-Time geometry subjectively defined by us as «subterraneous diapason of exhibition of Self-Consciousnesses Forms.» This is nutational manifestation regime of the countless multitude of different-protoformal SFUURMM-Forms, which joint realization provides «materialization» and permanent activity of the Sphere of collective Creativity of heterogeneous Form-Creators, which we call «the surrounding World.»

4.1386. Though, this integral of qualitative parameters provides abilities *for general* exuberation of all Self-Consciousnesses Forms, which essential Interests coincide at least somehow. Hence, it far exceeds realizational abilities of each of Self-Consciousnesses Forms. Subterraneous parameters of the Form-system, which we interpret as «the reality surrounding us,» are much more restricted for our realization, than indices of this integral, which huge part is in no way perceived by us and identified with nothing (infrared, ultrasound, ultraviolet, x-ray manifestation spectra of FD of this diapason). One can say that this multi-functional focal Configuration reflecting, by itself, only some of Creative Interests of SSS-Entity Self-Consciousness is structured «inside» itself with many different-Qualitative *subdiapasons* (spectra of individual manifestation), which qualitative parameters depend on subterraneous birvulyart features of Form-Creators of subjective Perception systems of every Self-Consciousness Form.

4.1387. For example, NUU-VVU-Form-Types mixtum analogs now focused by us occupy, in this vibrational structure, own exuberational «niche,» every kind of animals, vegetables, microorganisms, and minerals — own «niche,» structuring them cells and crystals — own «niche,» bosons and fermions — own «niche,» Planets and Stars — own «niche,» and so on. At «the points» of functional intersection (coincidence) of the Interests peculiar to them, focus constructions common to the particular Self-Consciousnesses Forms are consuetally formed from a part of Space and Time «geometry» *common to their Focus Dynamics*. These constructions are different-protoformal space-time Continuums providing opportunity, for the Form-Creators of these Forms, to perceive subjectively Each Other and interact creatively between Each Other (there are «human» STCs, «cat,» «ant,» «bird,» «fish,» «bacterial,» «microbial,» «Planetary» STCs, and so on).

4.1388. In particular, combined Focus Dynamics of all people simultaneously exuberated in chronological conditions common to them (in the Time Flow) and reflecting, in Space (meaning, spontaneously «materializing» with decoherent Energy of own psychic, mental, and physical efforts), Conceptions completely different in own qualitative state, form «own» subjective variety of «the human» STC type around themselves (and CSR peculiar to this human community), which is expressed via qualitative parameters of the manifestation subdiapason typical only to Focus Dynamics jointly generated by *all of them*.

4.1389. But also, *at every conditional instant*, realization of Focus Dynamics of every person structuring this part of the human Collective Consciousness is performed only in very narrow manifestation *resopason*, which enters the subdiapason common to all people of this CSR. Because the major goal of Form-Creators of this FD is bringing of some definite inter-skunkktional interconnection of primogenitive State to the complete qualitative correspondence with «the picture» specified *for this FD* by the potential confective State. Absolute annihilation of this Space-Time «point» (to «the next» amplificational-consummative State) occurs as a result of the fact that heterogeneous Form-Creators of the countless number of different-protoformal Self-Consciousnesses Forms simultaneously perform qualitative correction (on the attributes typical for Them) *in the given* inter-skunkktional interconnection. Besides, these Self-Consciousnesses Forms structure all STCs types of not only our Macrocosmos type, but also all the rest types.

4.1390. I remind you of all of that in the tiniest detail, only in order for you could understand more deeply the ambigulyar Essence of simultaneous realization, by Form-Creators of various Self-Consciousnesses Forms, of all diversity of subjective Effects, each of which represents an intermediate Cause inducing to manifestation all other parallel Effects. Profective Cause is produced by the very mercavgnation Act and absolute Consummatization Act holochronely following it — simultaneous formation of «What should be» State by Form-Creators in SSS-Entity Self-Consciousness due to profound universalization, by Them, of *each* of interconnections structuring «What is» State.

4.1391. All holistic confective «picture,» representing Macrocosmos all variety has been fully «painted» by Creator (USIP) and completed. This is gabitual Truth. But the main Task (and also Purpose and Sense) of Form-Creators of every Self-Consciousness Form is to self-identify, in the most detailed way, literally with each of the Master's «strokes» sequentially put on each other, and subjectively to experience absolutely all options of what He «experienced» at that (via Impulse-Potentials all variety), while deeply getting into amplificational Sense of the created thing and understanding, why every manifested «stroke» has been performed exactly the way it is.

## The Adapted Principles

### A) The UURTT-OOLKK Principle

**«I-am is subjective creative reflection of qualitative similarity of Focus Dynamics of Form-Creators of Everything in the Whole»**

4.1392. In svilgs-spherationally performed Process of multipolarizational consummatization of primogenitive interconnections, Each of Impulse-Potentials all multitude generated during USIP-Initiation induces, in microstrs of skunkktions of every SSS-fragment, such universal properties and features, which allow it, in any of manifestations peculiar to it, always to remain in the full Harmony with skunkktions of all the rest *heterogeneous* SSS-fragments. That is what Information mercavgnational confectization effect is.

4.1393. This means that every heterogeneous SSS-fragment of Pure Cosmic Qualities, due to holochrone forced IP-transfiguration at the skunkktional level («inside» of own reconverstive Configuration), potentially sort of acquires properties and features analogous to those ones, which simultaneously manifest via any of SSS-fragments of the rest PCQs. Here, the state of potential similarity between all attributes in no way causes their «loss» of the fundamental Information Property — heterogeneity, but only allows them to avoid the state of even the slightest imperseptness (partial incompatibility) concerning any inter-skunkktional interconnection mercavgnationally initiated in them. That is, in State of confectiveness, all SSS-fragments remaining heterogeneous on the informational Essence structuring them become interchangeable and able to reflect any empiric Experience via themselves.

4.1394. This circumstance is explained by simultaneous appearance, via every inter-skunkktional interconnection (in all Macrocosmos types), of all Impulse-Potentials *at once* (via FD of Form-

Creators of Self-Consciousnesses Forms all variety), which in itself is the basis for realization of Sllougretness Property «inside» of Information.

4.1395. The Principle considered by us defines all specifics of possible Directions of qualitative development of simultaneous focus interactions between various Self-Consciousnesses Forms, which structure the same CCI with own FDs. At the basis of these interactions is either the same essential Interest, or a certain psycho-mental reaction, which are peculiar to different Form-Types of this Collective Cosmic Intelligence realizing themselves in different Time Flows and in different circumstances. In this case, the term «reaction» implies the particular type of psychic or mental activity initiated into FD of Self-Consciousness Form as the result of its conscious or unconscious energy-informational interaction with FD of another (or the others) Self-Consciousness Form (regardless of the CCI type).

4.1396. Psycho-mental reaction of any type («positive,» «negative,» «neutral» ones) expressed this way or another by the particular Form-Type (for example, a person) during its creative realization depends on subterraneous organization of Form-Creators of its subjective Perception system. This reaction, for its part, resonationally initiates, in FD of another Form-Type, which it interacts with, activity of Form-Creators of the levels identical in qualitative state. This levels, first of all, will stimulate, in FD of another person, psycho-mental reaction qualitatively corresponding to them.

4.1397. For example, if you, owing to increased ampliativeness of own FD (stable activity of high-qualitative SFUURMM-Forms), could positively motivate, for yourself, somebody's abusing actions and have not activated the same negative Thoughts, Emotions, and Desires in own Self-Consciousness, your deliberate and constructive reaction, at sufficient stability, is able to initiate, in Self-Consciousness of a person abusing you, SFUURMM-Forms of the same ampliative levels (if it is really possible for this person's NNAASSMM!), which will either essentially decrease the Potential of destructive influence directed to you, or finally will reduce it to nothing.

## **B) The OORTT-UULKK Principle**

**«I-am is subjective creative reflection of Form-Creators restructuring correlations simultaneously manifested in the Whole»**

4.1398. Speaking about «destruction,» one should note that it should be understood here as the result of manifestation of the more qualitative informational conversions in inter-skunkktional interconnections of primogenitive State accordingly corrected by heterogeneous Form-Creators with respect to demands initiated in them by confective State. To create something absolutely new on the basis of something old, one should fully destructure this old thing and to put completely new, more universal Sense in the previous interconnections. All this Process is implemented via radical correction of skunkktional subterraneous fields of each of r-Configurations (mercavnational perturbation of informational fields of all their microstrs). As the result, every primogenitive interconnection is provided with much more universal Essence.

4.1399. In the Macrocosmos structure, this could be conditionally described in the following way. *Every* skunkktion is subjectively reflected, this way or another, in the Form-structure of SSS-Entity Self-Consciousness via dissonational (with respect to primogenitive State) focal-etheral interconnections of Form-Creators of *every* Self-Consciousness Form simultaneously generated by It. Each of these Self-Consciousnesses Forms is reflected, in the skrruullerrt system, via resonational (with respect to confective State) Focus Dynamics (subterransive parameters of focal-etheral interconnections) peculiar only to this Form.

4.1400. Thus, the f-Configuration subjectively perceived by us as «Self-Consciousness Form» represents concentrated (integral, final) expression of Focus Dynamics of Form-Creators of many different-Qualitative Self-Consciousnesses Forms, which were able, on the Resonational attribute peculiar to them, by *joint* realizational efforts — *spatiumally!* — to provide exhibition of this Self-Consciousness Form in the given Space-Time conditions. Meaning, personalized manifestation of every Self-Consciousness Form becomes possible only due to involvement, by its Form-Creators, to decoherent Energy of own given Focus Dynamics, of the part of dissipative Energy, which is *in the same way* (on the same realizational attribute!) simultaneously already involved *by Them (the same F-Cs!)* as decoherent Energy in Focus Dynamics of many other Self-Consciousnesses Forms «personally» realizing «themselves» in completely other STCs.

4.1401. Let me remind you that at every conditional «instant,» Focus Dynamics of Self-Consciousness Form — on the particular focal-etheral content (attribute) — realizes only in some very narrow manifestation resopason. Simultaneously in this resopason, the other Focus Dynamics of *the same* heterogeneous Form-Creators realize, which are focused in many different-Qualitative Self-Consciousnesses Forms independently structuring the other development scenarios and STCs. Availability of this different-Qualitative resonational realization of multipolarizational Focus Dynamics of *the same* Form-Creators simultaneously in the very different Time Flows creates opportunities for subterransive exhibition of each of these Self-Consciousnesses Forms in the Space-Time conditions peculiar only to it.

4.1402. For example, in these exhibition conditions, *qualitatively identical* joint realizational efforts (on the particular sign of the essential Interest) simultaneously carried out in Focus Dynamics of Form-Creators of 386 «personalized» Interpretations of NUU-VVU-Form-Types mixtum analogs (structuring various development scenarios) *instantly* form (initiate to subjective manifestation in this Focus of the skrruullerrt system) f-Configuration of one human Stereo-Type (that is, an Experience is extrapolated to the Perception system of a personality; this Experience is simultaneously synthesized — on the given attribute! — by 386 different people, each of which realizes themselves in the development scenario peculiar only to them, which is separated from the rest of the participants of this Process by eons of chronological time).

4.1403. Abruptation (resonational merging) between all these NUU-VVU-Form-Types implementing, in various Time Flows, Focus Dynamics qualitatively identical to each other does not happen owing to the presence of huge different-Qualitativeness in their f-Configurations structure: at the time of performing the essential Interest common to them, biological constituent of each of these people represents completely different molecular Form-structures (different-protoformal sets

of bio-Creators of body and brain, different nuclear DNAs constructions), each of which realizes itself in own STC on the basis of hormonal, enzymatic, vitamin and other biochemical «picture» subterraneously organized in it.

4.1404. As soon as kleksing of this Interest (on some *joint* sign!) has been finished in FD of this Stereo-Type, the essential necessity in realization (within *the same* essential Interest!) of some other *joint* sign appears at once in FD instead of this Interest. This means that, in the FD of the person examined by us, activity change takes place in Qualitative «content» — Form-Creators of the previous «personalized» Interpretations are changed on those ones, which FDs also precisely correspond to the conditions of this psycho-mental realization. Consequently, FD of this person, at the examined instant, is jointly organized by Form-Creators of already new 386 NUU-VVU-Form-Types, which precisely correspond to this sign (the number 386 is quite conditional and strongly varies depending on both FD qualitative state and the character of the realized sign).

4.1405. In the given Space-Time conditions, «the next» Stereo-Type is formed of this person exuberation out of FD of all these Form-Types. This Stereo-Type replaces «the previous» Stereo-Type in this person's FD. In one second, depending on realization qualitative state, Focus Dynamics of mixtum «personality» sequentially «replaces» from 200 to 400 different-Qualitative Stereo-Types (328 on average) jointly structured by Focus Dynamics of additional 250–500 (386 on average) NUU-VVU-Form-Types from the other development scenarios. So, in every development Direction (of the possible ones for this person), in one second, corresponding empiric Experience is extrapolated to Focus Dynamics out of FDs of many tens and even hundreds of millions of the other people simultaneously realizing in the same psycho-mental parameters, in development scenarios peculiar to them. Per each second, in FD multipolarization, the countless number of Stereo-Types extrapolations are replaced in it, which are motivated on qualitatively different realizational signs.

4.1406. This Principle creatively supplements and energy-informationally intensifies interconnections produced as the result of the influence of specific functions of the previous Principle on FD of Form-Creators of any Self-Consciousness Form. For example, the most probable manifestation spectrum of our psycho-mental reactions is profectively conditioned by subterraneous features and realizational Potential of the f-Configuration of NUU-VVU-Form-Type now focused by you, while reflecting, in the reality surrounding you, the definite degree of creative compatibility and qualitative balancing of Focus Dynamics of different-protoformal Form-Creators in your Self-Consciousness, Who jointly organize realizational functions of your person's Perception system functions.

4.1407. The integral set of Their joint creative interactions can be reflected in your FD either via depliative, or via ampliative contacts with various manifestations of the World surrounding you: the more ampliative Self-Consciousness Levels are steadily occupied by your FD, the higher level of adaptation and psycho-mental resilience of bio-Creators of your Perception system to different-Qualitative interaction with subjects of the surrounding reality would be. These Creators will correctly motivate and quickly annihilate any opportunities of destructive attacks organization related to you.

4.1408. And vice versa, depliativeness of SFUURMM-Forms of your FD makes your psycho-mental state more vulnerable to various external influences (even regarding somebody's benevolence) and unstable, unpredictable at your priorities choice in realizational activity. And these states, in turn, initiate your FD to manifestation in the same destructive and contradictory vitium life circumstances. Constantly disbalancing FD of Form-Creators of the definite Self-Consciousness Form with interconnections with heterogeneous attributes combinations, which are not peculiar to its Synthesis Scheme, and inducing Them (F-Cs) to find more new options for covarllertization (balancing) of the Conceptions peculiar to Them, this Principle surely provides, in this way, Their FD with absolute freedom of choice at any development Direction (multipolarization) depending on which trends and Interests are most prevalent in Their creative work.

4.1409. On the basis of the new Conceptions about This «Law» and Its Principles functioning, there is completely different perception and deeper interpretation of the Sense of so much popular in the eastern teachings, but very restrictedly understood and extremely subjectively applied in practice by many adepts, «law of retribution» or «law of karma,» and also many concepts about so called «reincarnation of soul» based on its primitive treatment. Though, we will try to gain an understanding of all this in one of the following «Issiidiology Fundamentals» volumes.

### *«The Law of ambigulyar amplificational compensation of Motivations»*

## **UUSS-IISS**

### **«The Law» realizational Essence**

4.1410. This «Law» describes a Mechanism of intermediate compensations of all-possible protoformal deviations for Amplificational Branches development in every dimensional diapason . By the word «Motivation,» I subjectively mean all infinite multitude of different-Qualitative Purposes and Tasks (Desires, Incentives, Aspirations, Interests, and others), which initiate (induce, stimulate) Creative Activity of Form-Creators of all infinite multitude of different-type Collective Cosmic Intelligences in Focus Dynamics of Self-Consciousnesses Forms generated by Them and subterraneously exhiberated in each of Macrocosmos PFD Levels peculiar to Them. In every birvulyarity type, for every Motivation there is own intermediate inducing Cause, which reflects the specifics of energy-informational interconnections formations by Form-Creators in the given Synthesis Scheme. Meaning, the same Motivations (Purposes, Tasks) can be structured by completely different Causes, therefore the result of their realization can be a broad range of Effects.

4.1411. Any intermediate Cause (as some specific «previous» state of the amitsiration), with respect to any Effects options simultaneously produced by it, is always *profective* factor (the «objective» circumstance), which defines Form-Creators abilities as regards Their following realizational perturbations via various Self-Consciousnesses Forms. For choosing the most effective (for the given

Synthesis Scheme) Direction of the subsequent amitsiration, dissonational interconnections of the intermediate Cause should be compensated (maximally covarllertized on invaderental attributes) with the help of the Motivation (the psycho-mental reaction ampliative with respect to it) qualitatively corresponding to it.

4.1412. Each of the newly generated Effects is profectively converted, in Self-Consciousness informational space, to the new intermediate Causes, each of which, during following eglleroliftive realization, also produces all infinite multitude of the regular focus Effects, and so on — in each of the different-protoformal development Directions of all «personalized» Interpretations. In view of multipolarization property availability of our Focus Dynamics simultaneously reflected in Self-Consciousness informational space via the infinite multitude of different-Qualitative Time Flows structuring Space of Form-systems of the Worlds, the Cause of generation of any focal-ethereal combination can belong equally both to «the past» subjectively perceived by us and to «the future» uncertain for us to the same extent.

4.1413. Hence, one cannot argue for sure, *what exactly* is the Cause in each of the focal-ethereal combinations examined by us and *what* is the Effect, since this dependency is svilgs-spherationally determined by the presence, in Form-Creators FD, of eglleroliftive IP, which is this very gabitual Cause of simultaneous exhiberation of all focal-ethereal interconnections in this Macrocosmos type. And functional necessity (role) in SSS-Entity Self-Consciousness manifestation comes down to formation of absolutely all diversities of causal interconnections in Energy-Plasma (owing to simultaneous availability of the transfinite multitude of different-Qualitative Forms of Self-Consciousness in the skrruullerrt system). Besides, one cannot associate the Cause for anything with such notions as «depliativeness» and «ampliativeness,» which reflect only our subjective attitude to the results of choices performed by Form-Creators of NUU-VVU-Form-Types according to lluvvumic birvulyarity type peculiar to all people.

4.1414. Each of the Motivations (subjective Conceptions used for the choice ground) initiated by us in Self-Consciousness via amitsiration (the process of successive choices) has the ability *increasingly* to balance (informationally to inter-compensate), in our Perception system, only a certain set of dissonational (at the moment) attributes, which is characteristic of Form-Creators FD of some specific protoformal Development direction. In these cause-effect interconnections, our «current» essential Interest is performed. In the Perception system, *the most* universal (all-directed) compensation on many attributes (which means the most powerful quantum effect — realizational «leap» — in amitsiration) is possible only in cases when Form-Creators, invaderental in the given Synthesis Scheme, realize via Motivations, which are structured to the most degree by the signs peculiar to this birvulyart variety (for us, they are HSI, HIA, immunitant Responsibility and humanitarian Freedom).

4.1415. In such cases, in multipolarization of our Focus Dynamics, many all-possible intermediate Causes are simultaneously annihilated (without our conscious participation in these scenarios), which svilgs-spherationally provide its (FD's) potential dissonational State. As the result, our amitsiration is accomplished in a Direction of the most favor to realizational conditions of the very Human type of the life creative work, which is characterized (in this Synthesis Scheme) with the most covarllertness in respect of many diffuzgent signs.

4.1416. All other Motivations strengthening some of the protoformal (non-human) trends in NUU-VVU-Form-Types FD promote concentration (accumulation) of dissonational Causes and growth, in FD, of destructive state of increased tensoriness, which inevitably entails modelling, in Self-Consciousness informational space, of the stress circumstances (conflictiness, drama), through which forced «settlement» an opportunity appears of annihilation, in FD, of many intermediate dissonational Causes typical for this protoformal development Direction. In the scenarios of this process intensification, amitsiration of Form-Creators occurs to exhibition conditions peculiar to another Synthesis Scheme.

## **The main adapted Principle**

### **SSNAAYY-SNII**

**«I-am is subjective creative reflection of the intercompensating Creative Work of Form-Creators of all Self-Consciousnesses Forms of various birvulyarity types»**

4.1417. As you already know, Form-Creators representing different OO-UU-Entities in Form-systems of the Worlds are simultaneously «projected» with own FDs to the Self-Consciousnesses Forms of all multitude of different-protoformal and different-level Synthesis Schemes. In each of these Schemes, They assimilate and perform the narrow-specific Existence Experience, which is typical for the general Focus Dynamics of this very CCI. They at once extrapolate the Experience synthesized in each of the different-type CCIs — but only partially, on corresponding sets of covallert attributes! — to the Focus Dynamics of all infinite diversity of different-Qualitative representatives of the rest Synthesis Schemes.

4.1418. Logically «impregnating» SFUURMM-Forms peculiar to them, some part of this Experience provides, in Focus Dynamics of various Self-Consciousnesses Forms, favorable conditions for formation of corresponding compensational Motivations. We call this part as «the intuitive Experience,» which constitutes (along with the empiric Experience synthesized by us in parallel) all informational basis of our subjective relations concerning both ourselves and the World surrounding us.

4.1419. Accessibility of any parts of this Experience depends on the functional perfectness of the subjective Perception systems of NUU-VVU-Form-Types focused by us: the more SFUURMM-Forms of Focus Dynamics initiating them are structured by lluuvmic signs combinations (HSI, HIA, and so on), the greater number of all-possible dissonational Causes can be inter-compensated as the result of performing every quantum effect of Self-Consciousness. And this means that interconnections of our invaderental Form-Creators with Form-Creators of all the rest OO-UU-Entities will be more harmonious and constructive (in these exhibition conditions), which will allow us to focus in the more ampliative CSRs.

4.1420. This Principle regulates and balances (compensates) all «cause-effect» connections inertially generated in Self-Consciousness structures of different-Qualitative Forms and offers them

all opportunities for active creative realization in the development Direction peculiar to them. That is because, for Form-Creators of any OO-UU-Entity, there is no any Purpose and no any Task in Macrocosmos — regardless of how unreal, monstrous, senseless, or unimaginable it could be perceived by someone of you — which would not have legitimate right to self-realization and exuberation in some of the Space-Time regimes most appropriate for this.

4.1421. Every Collective Cosmic Intelligence specifically organizes and performs own Cosmic Creative Work on the basis of own set of Motivations peculiar only to It, while initiating to exuberation, in each of the manifestation Levels peculiar to It, own Forms of all-possible intermediate Causes (meaning, Self-Consciousnesses Forms), which configurationally (qualitatively) differ from the Causes generated in parallel in the same Levels by the other Collective Cosmic Intelligences. All-possible, on the degree of compatibility, STCs and CSRs groups are formed in the various Space-Time regimes on qualitative parameters of the diffuzgentness degree generated between Self-Consciousnesses Forms. These groups Motivations have at least some potential abilities to perform joint realizations.

4.1422. Abyssality and different-Qualitativeness of this Process provide an opportunity of simultaneous realization, in all Plasmic Forces Diapasons of Macrocosmos, of the Main Motivation of the given Creation — Self-Cognition, by SSS-Entity, of absolutely all properties and features subjectively perceived by It via joint Creative Work of Form-Creators of all Its Self-Consciousnesses Forms. Each of the Motivations simultaneously realizing in Macrocosmos HCCI slloogrent Focus Dynamics serves for the search of increasingly ampliative options of this general Task solution, and all infinite multitude of intermediate Causes-Effects generated at that inter-compensate each other both in each of the Levels of their joint manifestation and in absolute Infinity of energy-informational interconnections of the skrruullerrt system.

*«The Law of equal opportunities for creative self-determination of Form-Creators of all Self-Consciousnesses Forms»*

**AAKK-BRRAA**

**«The Law» realizational Essence**

4.1423. Heterogeneous Form-Creators of all realizational Self-Consciousnesses Forms generated in Space-Time by different-type Collective Cosmic Intelligences have equal opportunities for self-manifestation and self-determination in any Synthesis Schemes and development Directions without any connection to any of CCIs, Who produced these Self-Consciousnesses Forms. Since Form-Creators of all OO-UU-Entities are simultaneously focused at once on all Self-Consciousnesses Forms of all multitude of different-type CCIs, all-possible subjective preferences are totally not particular to Them with respect to amitsiration, via FD, of some particular Form-Types: any Synthesis Scheme is not of

the higher priority to Them, than the others, but represents only a real chance to implement, in a specific way, eglleroliftive Creative Work peculiar to Them on svilgs-spherational consummatization of confective SSS-State from primogenitive One.

4.1424. For the same reason, any Self-Consciousness Form jointly structured by Them is always able to choose the Direction of own creative realization in accordance with the essential Interest peculiar to it. For example, when some person is focused solely on the search of solution of a usual life objective or issue (a way out of a difficult situation, sensuous or mental suffering, and so on), they pay a little attention to own Self-Consciousness Form (own body, appearance, necessities of the organism, behavior), — their FD is completely involved to the search of an opportunity for the particular Conceptions realization. So, they do not pay attention at all to the fact that this kind of creative work has clear protoformal (non-human) signs, which promote their concatenational amitsiration to exhibition conditions in Self-Consciousnesses Forms of another Synthesis Scheme. The main thing for them «now» is accomplishing, finally, own essential Interest; and what happens then — does not really matter...

4.1425. Subjectivism of «belonging» to any Self-Consciousness Form occurs owing to profective restriction of each of simultaneously realized Focus Dynamics of Form-Creators by only decoherent part of dissipative Energy of own slloogrent manifestation in SSS-Entity Self-Consciousness. The very ability to activate only the smallest part of Creative Potential peculiar to Their OO-UU-Entity in every «point» of own focal «localization» in the skrruullerrt system, allows heterogeneous Form-Creators to form, by working together, the particular Self-Consciousness Form in the manifested Space-Time conditions.

4.1426. Due to availability of such decoherence, so limited Conceptions of Form-Creators about «Themselves» and the features of the reality surrounding Them are also possible, which are activated in the Perception systems of Self-Consciousnesses Forms focused by Them (let them be a boson, a fermion, a microorganism, a human person, or a Planet). In turn, if all Focus Dynamics of Form-Creators did not have this property of decoherence (limiting realizational parameters), They just would not be able to accomplish so deeply and comprehensively the amplificational Task entrusted to Them.

## **The Main Adapted Principle**

### **DDAATTOONN**

**«I-am is subjective reflection of absolute probability for creative manifestation of Form-Creators of Everything in the Whole»**

4.1427. It was noticed earlier that no one Scheme could be accomplished without more or less active participation of Focus Dynamics of Form-Creators of *every* OO-UU-Entity in its accomplishment. Since the skrruullerrt system represents focal-ethereal «projection» of potentially already completed confective State, all inter-skunkktional interconnections of this State are at once and specifically

reflected in exuberance of each of its Focuses. These interconnections are absolutely balanced between each other on all heterogeneous attributes.

4.1428. In every «localization point» of Focus Dynamics of Form-Creators, absolutely all OO-UU-attributes are potentially involved in this or that way, without which partial focal exuberance of these inter-skunkktional interconnections (as Self-Consciousness Form) would be simply impossible. This means that in any «localization point» of Focus Dynamics subjectively examined by us, all infinite multitude of options of simultaneous creative interaction of heterogeneous Form-Creators of absolutely all Self-Consciousnesses Forms is specifically reflected.

4.1429. From all this countless diversity of different-Qualitative focal-ethereal interconnections, we can subjectively «unpack» only extremely small volumes of Information structuring them. These volumes are determined by the specific parameters of the decoherent Energy, which could be jointly manipulated by all bio-Creators of our Perception system, Who are involved in realization of our Focus Dynamics. All combinations unable to reflect identically within these energy-parameters, are either in no way perceived by us, or interpreted (imagined) in very confined and extremely deformed way (for example, as dolls and flaks regimes of our unified and infinite Existence).

4.1430. The Principle considered by us provides Form-Creators of any Self-Consciousness Form specifically manifested in conditions of some of STCs with absolutely all opportunities, which contribute to maximal realization, in the given exuberance regime, of the creative Potential peculiar to Them in any of development Directions possible for this CSR type. In the infinite Process of multi-dimensional subjective Existence, there are neither prohibitions, nor any restrictions on any kind of the Creative Activity for heterogeneous Form-Creators representing, in FD of Macrocosmos HCCI, qualitative features of all OO-UU-Entities, because any option of exuberance of Focus Dynamics generated by Them always represents necessary and required Element of maintaining overall qualitative equilibrium both in each of Form-systems of the Worlds and in the skrruullerrt system in general.

4.1431. Therefore, one can say that absolutely all possible options of any of your decisions and essential Interests are already «initially» described in a detailed way and qualitatively «impregnated» to corresponding to them scenarios of subterraneous development of each of Form-Types focused by you. The Focus Dynamics of these Form-Types (regardless of the degree of its depliativeness or ampliaticiveness) *harmoniously* structures the infinite realizational pattern of all other scenarios in each of the Form-systems of the Worlds already absolutely balanced between each other. Everything what you could choose at every next moment of your conscious Existence already is; and no one of you, despite of the destructiveness degree of your actions, is just unable to disturb at least somehow the initial Equilibrium of Form-system of the surrounding World, which always «was,» always «is,» and always «will be» invariable in all its confective «primitiveness.»

«The Law of absolute Purposefulness of Self-Consciousnesses Forms and CCIs  
coexistence»

**LAAGGSS-SSNAAL**

**«The Law» realizational Essence**

4.1432. Any Form of Creative Activity manifestation of Form-Creators of different-type Collective Cosmic Intelligences being required and imprescriptible condition of maintaining overall harmonious state of Creation has absolute profective Right on own Existence. Creative work (FD) of Form-Creators of any Self-Consciousness Form is provided by simultaneous availability, in the identical Space-Time exhibition regimes, of the infinite multitude of different-Qualitative «projections» of Focus Dynamics of Form-Creators of the other Self-Consciousnesses Forms and different-type CCIs diffuzgent to this Form. These other Forms, during performing creative realizations peculiar to them, introduce resonational part of the Experience synthesized by them (as all-possible «projections») to the creative work of Form-Creators of the other Self-Consciousnesses Forms.

4.1433. This interexchange is simultaneously accomplished both between Forms of the same STCs and between Forms of completely different STCs, which can strongly differ from each other by own Content. Hence, taking into account such powerful collective factor in the amitsiration process organization, such notion as «subterransiveness» («individuality») should be treated by us with great caution, and we should never forget about its conditional character.

4.1434. In Essence, there is nothing subterransive in the Form-structure of Macrocosmos, because every Form of the joint realization of many heterogeneous Form-Creators is able exactly in this way to be localized in Space-Time and specifically reflected in the Perception systems and Self-Consciousness of Proto-Forms surrounding it only due to availability, in it, of all variety of focal-ethereal «projections» from the other STCs structuring its f-Configuration and Focus Dynamics. Any Self-Consciousness Form is the result subjectively perceived by the Observer of collective creative work of many heterogeneous Form-Creators.

4.1435. In the same way, all of us should treat very carefully such dual definitions as «good — bad,» «better — worse»: some profective Expediency in *the joint manifestation* of exactly such obvious (for you!) combinations of something different-Qualitative is always hidden literally in any creative work of the reality surrounding you. This allows you subjectively to compare them between each other, to assess on the specific signs and to choose what fits you more on some subjective criteria. This is concurrent availability of both «bad» (uninteresting) and «good» (interesting) in the FD realizational spectrum, which allows the surrounding reality sequentially to transform to own increasingly ampliative versions in your FD.

4.1436. Amplificational Expediency is in no way connected with our subjective moral-ethic Conceptions, but reflects, by itself, just eglleroliftive Sense of all Our Existence. The Sense is in accumulating the Experience, which is the most deep and harmonized on own signs, as much as possible, and which is acquired by interaction with any manifestations initiated both in «ourselves» and in the s-Reality surrounding us. And we — as potential People! — should learn finally to choose consciously the reactions most corresponding to lluvvumic signs combinations (HSI and HIA) among all multitude of options constantly offered to us (by different-protoformal brain bio-Creators) of possible interaction with informational content of the reality surrounding us. Only in this way, it will be possible for our amitsirations to be carried out only in the most prosperative scenarios of the Human development.

## The Main Adapted Principle

### RIILLS-GUUNNT

**«I-am is subjective creative reflection of absolute Expedience of Focus Dynamics of Form-Creators of Everything in the Whole»**

4.1437. The highest Cosmic Expedience is in achievement of maximally possible, for any variety of heterogeneous Form-Creators, Experience assimilation of different-Qualitative interaction with all other Form-Creators, on which abyssal harmonization and gabitual universalization of Focus Dynamics of SSS-Entity Self-Consciousness occurs. All heterogeneity of Collective Cosmic Intelligences partially observed and subjectively perceived by us reflects, in our Perception systems, only subjective difference between all-possible different-Qualitative versions of this simultaneous Process, where We — as Form-Creators of the infinite multitude of USCF-«projections» produced by the same Us — realize «ourselves» in completely different ways in all variety of Synthesis Schemes and birvulyarity types.

4.1438. In the multipolarization of resources simultaneously providing (in every development scenario) different-Qualitative implementation of different-protoformal realizational abilities, This Expedience prompts you to adjust ethics and morality qualitative criteria created by you to those essential needs, which seem to you the most important and significant at the moment of our subjective Existence. Thus, at «the current» exhiberation conditions of your mixtum NUU-VVU-Form-Types, which Self-Consciousness is lacking even shallow iissiidiological (Human) Conceptions, the Expedience Principle orients your Focus Dynamics at the maximal providing with *different-protoformal* energy-informational basis, which availability strongly stimulates, in it, activation of SFUURMM-Forms of all-possible egoistic trends.

4.1439. Is this good or bad? There is the only answer: it is expedient (though, of course, the subjective ethics criteria perform, in every Synthesis Scheme, own *stimulating* function enhancing the effectiveness of subterransive amitsirations in this birvulyarity type!). Without preliminary profound adaptation of all qualitative content of this broad basis, Form-Creators of our Focus Dynamics simply

could not identify the choice of Directions of own further amitsirations, which would correspond the most to prosperative opportunities for realizing Their essential Interests.

4.1440. Owing to operation with this informational basis, Focus Dynamics of the most part of USCF-«projections» simultaneously generated by You — in accordance with the Interest peculiar to them — are resonationally involved to all-possible different-protoformal Synthesis Schemes, whereas much lesser their part are focused at cultivation and deepening, in own Self-Consciousness, of only lluvvumic signs, while consciously (for example, via iissiidiological Conceptions) preferring to continue, in this way, the self-realization process in increasingly ampliative scenarios of *exactly Human* development Direction, but not as some other Proto-Form. So, owing to the presence of heterogeneous multipolarization of slloogrent Focus Dynamics of Form-Creators of Macrocosmos HCCI, harmonization and balancing of this FD on all multitude of the signs realizing through it is fulfilled.

4.1441. The Principle considered by us defines, for all USCF-«projections» (heterogeneous Form-Creators of Self-Consciousnesses Forms) simultaneously structuring different-type CCIs, their necessary participation in slloogrent Focus Dynamics of each of the countless Energy-Plasma manifestation Levels. In every specific case, this realizational participation is performed in a strict accordance with the individual features and abilities of Self-Consciousness of the Form focused by them (its VLOOMOOT and NNAASSMM). Besides, their Creative Work is beyond such subjective notions as «good» and «bad,» «right» and «wrong,» «saint» and «sinner,» through which only temporary criteria of the creative states of Self-Consciousnesses Forms are expressed, which are typical for each of the birvulyarity varieties.

4.1442. Any Self-Consciousness Form, by the choice peculiar to it, is unshakably «interweaved,» by subterransive features of own FD, to the general «picture» of the Form-system of the Worlds structured by it, and therefore, it never, with no Forces and means, can be «extracted» out of it and moreover «destroyed,» only because Form-Creators of Self-Consciousnesses Forms of the other CCIs playing the role of Observer cannot reach Understanding of the amplificational Essence of its specific creative work.

4.1443. This Principle intensifying all-possible convergent trends in Form-Creators FD provides successive annihilation, in Their Self-Consciousness, of such egoistic states as blame and jealousy, envy and criticism, animosity and hate, aggression and despotism, which are, in turn, required condition for creative realization of F-Cs via primitive Self-Consciousnesses Forms. Due to own powerful destructive manifestations, this condition balances and stimulates, to the more active realization of ampliative SFUURMM-Forms of Focus Dynamics.

## Conclusion

4.1444. In own Life, we basically constantly deal with functionality of the Cosmic «Laws» and Their Principles, which help us to find ways out of hopeless, at the first sight, situations by means of making extraordinary and absolutely illogical decisions seemingly very chaotic and impulsive both to ourselves and to those, who is watching us from outside, but which are later estimated by us as the

most successful ones, because they were able to lead us to the expected result. All this is the result of creative activity of SBOALLGSS-Entities representing the Universal Cosmic «Laws» in all-possible exuberation conditions of FD of Form-Creators of the Tertiary Illusion.

4.1445. Taking into account that there are infinite diversity of different-Qualitative Levels of simultaneous exuberation of f-Configurations of all CCIs and Self-Consciousnesses Forms, one could suppose that there is also infinite diversity of various interpretations of the Cosmic «Laws» functionally providing narrow-specific implementation of each of the features of this Form-making Process at every «localization point» of Focus Dynamics in Space-Time

4.1446. In the same exuberation conditions, either different Principles (SLLOOYYS-SLLOO-Entities) of the common «Law» can work, or the same Principle of the common «Law» can work differently, or the Principles of the different «Laws» can manifest ambiguously (in the way completely unclear for us!) for various Self-Consciousnesses Forms and their CCIs sort of intercomplementing or interreplacing each other at some profective circumstances. The primitive analogy of this is the dualism of Roman law (praetorian law — *ius hononarium* — without eliminating civil law — *ius civile* — simply lead to inefficiency of the latter). The other example, when a designated Roman citizen — urban praetor — issued an adict (law) for the whole time of own tenure usually keeping general norms of the previous praetor.

4.1447. Besides, it should be noted that all «the Laws» are gabitual (objective), since They are consuyetal «generation» of the mercavgnation Act, whereas Their perception by Form-Creators of any of Self-Consciousnesses Forms always has a subjective character. And the Principles could be compared with subterransive versions of simultaneous manifestation of the general abyssal Essence of Some of «the Laws» in different exuberation conditions. For example, sort of «in the same» dimension diapasons, «the same» Principles of one «Law» can functionally realize completely differently via Focus Dynamics of Form-Creators structuring Perception systems of various Proto-Forms.

4.1448. Hence, any Observer could have the impression about availability, for each of «the Laws,» of the infinite diversity of Its realizational Principles, although, actually, They are simply perceived and interpreted in various exuberation conditions. For example, the Perception systems of a Planet, Ocean, fire, air space, people, ants, microorganisms, atoms, and fermions react absolutely subterransively on the same Principles manifestations — strictly in accordance with the birvulyarity type peculiar to them.

4.1449. Unfortunately, it is not yet possible for us to ascertain and reliably distinguish all these peculiarities and nuances in each of the types of focal-ethereal interconnections specifically observed by us in the surrounding reality, because bio-Creators of our primitive Perception systems (brains) are simply unable to determine and differ from each other typical features of not just «the Laws» Themselves (for example, where prerogative of one Law ends, and activity of the other One begins), but also functional signs of the Principles structuring Them, Which represent the basis of the Universal Mechanisms of conditionally «local» realization of any of the parts of the abyssal Form-making Process in various Space-Time regimes.

4.1450. Nevertheless, this is availability of such Universal Principles as Sloogrentness, Duvuyllerrtness, and Resonationness in all Macrocosmos Form-structures, which enables us, in conditions of high-amplificational VEC-«unpackings» of SFUURMM-Forms structuring Focus Dynamics of Form-Creators of Supraconsciousness and Ultraconsciousness, to access, at least to the minor degree, some fragments of ethereal Information, which allow to make properties general analysis of the «Laws» and Their Principles implemented at the exhiberation process of the reality surrounding us.

4.1451. Of course, during studying this information, you should not forget, even for one moment, about the fact that all your Conceptions about «yourselves» and the reality surrounding you (meaning, all-possible consequences of «the Laws» and Their Principles «local» ambigulyar realization) are extremely subjective, and they carry the deepest print of strong informational destructions, which unrecognizably distort gabitual Essence of any of the objects of your individual research.

# Short glossary of iissidiological terms

*artifitively* — artificially

*vitiumness* — the high degree of unfavorable conditions, resistance to realization of something; for example, vitium conditions are unfavorable conditions, which can cause production of harmful circumstances

*gabitually* — objectively deeply, incognizably «inside,» transcendent-like, primitive-cause-like

*gabitual circumstances* — objectively conditioned circumstances, but subjectively sort of in no way connected with FD of the Self-Consciousnesses Forms, through which they realize

*divinparention* — vecsative attributes conversion to invaderental ones in conditions of 8–9-dimensional diapason

*immensusal respectuality* — the state of Potential unboundedness regardless of anything

*immutatly* — speaking metaphorically, this is allegorically, conditionally

*congruentness* — reflects some aspects of work on yourself, namely: honesty, openness, acceptance of own feelings and sufferings (as distinct from empathy), and also feelings and problems of the other people with their following precise auding with the words and behavior expression by ways, which would not make harm to the others (in other words, the person should follow the condition «as if» this auding and expression is addressed to themselves)

*consuyetally* — usually, in natural way, automatically

*propozitum* — objective, real, not-subjective

*prosperativeness* — the high degree of favorable conditions for anything; for example, prosperative conditions are universal conditions favorable for harmonious realization of both FD of one Proto-Form and many different-protoformal FDs

*revitalization* — «posthumous» amitsiration

*simplecsic interactions* — natural, prime-cause interactions, conditioned by subterransive qualitative features of the sides initiated for them

*simplexparention* — vecsative attributes conversion to invaderental ones in conditions of 3–4-dimensional diapason

*superparention* — vecsative attributes conversion to invaderental ones in conditions of 4–5-dimensional diapason

*suplents* — «deformation breaks,» which narrow-specifically merge interstitial «areas» of the skrruullerrt system of our Macrocosmos with the same interstitial «areas» of f-Configurations of some other Macrocosmos types

*supraparention* — vecsative attributes conversion to invaderental ones in conditions of 5–6-dimensional diapason

*transparention* — vecsative attributes conversion to invaderental ones in conditions of 3–9-dimensional diapason

*ultraparention* — vecsative attributes conversion to invaderental ones in conditions of 6–7-dimensional diapason

*extraparention* — vecsative attributes conversion to invaderental ones in conditions of 7–8-dimensional diapason

# Abbreviations and terminology adopted in IISSIIDIOLOGY

HCCI — the Highest Collegial Cosmic Intelligence

HCI — The Highest Cosmic Intelligence

TEC — temporal ethereal constituent

GIC — group of individual Continuums

HF — Humanitarian Freedom

GHC — group of human Continuums

DP — state of dissonational Passivity

PFD — Plasmic Forces Diapason

USIP — United Superuniversal Impulse-Potential

SCC — Sound Cosmic code

HSI and HIA — High-Sensual Intellect and High-Intellectual Altruism

IG-Ingredient — Immanent G-Ingredient

IIP — irrkogliktive Impulse-Potential

IP — Impulse-Potential

**i-Qualitation** — irrkogliktive Qualitation

IR — immunitant Responsibility

I-C — Info-Creators

IFES — individual focal effect of Self-Consciousness

**IT-Ingredient** — Idiopathic T-Ingredient

**IE-Initiation** — irrkogliktive-eglleroliftive Initiation

CCI — Collective Cosmic Intelligence

CCCI — Collective Collegial Cosmic Intelligences

CCC — Collective Cosmic Concsiousness

C-P — Complex-Plan

CSR — collective subjective Reality

NTC, **n-Continuum** — noo-time Continuum

**n-Conversum** — noo-time Conversum  
**O-D-system; ODS** — OLLAKT-DRUOTMM-system  
**S-T-Continuum; STC** — space-time Continuum  
**PW** — perconalistic World  
**P-O** — Plan-Overtone  
**PVEC** — planetary variable ethereal component  
**PTC** — Primogenitive Transcendent Component  
**P-U** — Plan-Level  
**VEC** — variable ethereal component  
**RA** — state of resonational Activity  
**r-Configuration** — rekonverstive Configuration  
**CCQ** — Combined Cosmic Quality  
**s-STC** — subjective STC  
**s-Reality** — subjective Reality  
**CCS, CC-State** — Creative Cosmic State  
**CC** — Creative Cosmic  
**TS-Ingredient** — Transcendent S-Ingredient  
**UI-Creators** — Universal Creators-Interpretators  
**UCIP**— Universal Cosmic Impulse-Potential  
**UD** — Universal dimension  
**UMPI** — Universal Multipolarizational Impulse, flaks analogue of FDR  
**UD-Creators** — Universal Creators-Motivators  
**UPDR, UPD-Radiance** — Universal Plasmic-Differentiated Radiation  
**UFS** — Universal Field-Consciousnesses  
**UP-Creators** — Universal Creators-Pictusators  
**US-Creators** — Universal Creators-Supermodifiers  
**USCF** — Universal Self-Consciousness FOCUS  
**USCFE** — Universal Self-Consciousness FOCUS Effest  
**FD** — Focus Dynamics

**FDTS** — Form-Differentiating Temporal Shell  
**FDR** — Focus of Dual Reflection  
**FIMI** — Focus of Integral Motivational Impulse  
**f-Configuration** — focus Configuration  
**F-L-complex; FLC** — FLUU-LUU-complex  
**FCA** — Focus of Close Attention  
**SF** — Self-Consciousness Form  
**F-C** — Form-Creators  
**CAF** — Focus of Creative Activity  
**PCQ** — Pure Cosmic Quality  
**EIC** — energy-informational Conversum  
**EIP** — eglleroliftive Impulse-Potential  
**e-Amplification** — eglleroliftive Amplification  
**E-P** — Energy-Plasma

GLOOFFORRGGM — ГЛООФФОРРГГМ  
GLOPP-POO-MMA — ГЛОПП-ПОО-ММА  
GLUANDRIЙI — ГЛУАНДРИЙИ  
GLUNN-NUU-MMA — ГЛУНН-НУУ-ММА  
GMOURGSHORMM — ГМОУРГСХОРММ  
GMUЙGGLS-SSS — ГМУЙГГЛС-ССС  
GNUЙRRSS — ГНУЙРРСС  
GOLGSDARR — ГОЛГСДАРР  
GOLLT-SSS — ГОЛЛТ-ССС  
GON-DO-RROFFR — ГОН-ДО-ПРОФФР  
GOOLGAMAA — ГООЛГАМАА  
GOOLGAMAA-A — ГООЛГАМАА-А  
GOORR-VVU — ГООРР-ВВУ  
GOORRKARR — ГООРРКАРР  
GORROSS — ГОРРОСС  
GRAALG-LLI — ГРААЛГ-ЛИИ  
GRAASS-AA-RS — ГРААСС-АА-РС  
GRALBAREHST — ГРАЛБАРЕХСТ  
GRARR-RAA-MMA — ГРАРР-РАА-ММА  
GRGLOYGLY — ГРГЛОЙГЛЫ  
GRIIMSSIIRS — ГРИИМССИИРС  
GROAGR-A-ARRA — ГРОАГРР-А-АРРА  
GROYGLL — ГРОЙГЛЛ  
GROOLLUGORFF — ГРООЛЛУГОРФФ  
GRO-OL-LUKR — ГРО-ОЛ-ЛУКР  
GROO-MM-SVUU — ГРОО-ММ-СВУУ  
GROOMPF — ГРООМПФ  
GROONNGLY — ГРООННГЛЫ  
GROO-RRO-GR — ГРОО-ПРО-ГР  
GRORRRDY — ГРОРРРДЫ  
GROUYЙРАЙЙF — ГРОУЙЙРАЙЙФ  
GROUFFGRALLF — ГРОУФФГРАЛЛФ  
GRROOFF-VVU — ГРРООФФ-ВВУ  
GRUOFFR-RRUOSSTTR — ГРУОФФР-РРУОССТТР  
GRUUKKLSS — ГРУУККЛСС  
GRUU-LLF — ГРУУ-ЛЛФ  
GRUU-MM-LL — ГРУУ-ММ-ЛЛ

GREIЙSLIIS — ГРЭИЙСЛИИСС  
GFFURRUЙYUSST — ГФФУРРУЙЮССТ  
DТООЛЛL-VU — ДТООЛЛЛ-ВУ  
DAALLBOBERT — ДААЛЛБОБЕРТ  
DAЙSSMМАЙЙ — ДАЙССММАЙЙ  
DARDAPP — ДАРДАПП  
DARREЙЙUUVVSS — ДАРРЕЙЙУУВВСС  
DBOOKOLLД — ДБООКОЛЛД  
DBOOLBLL-LLD — ДБООЛБЛЛ-ЛЛД  
DVERRHEЙЙF — ДВЕРРХЕЙЙФ  
DVOO-O — ДВОО-О  
DVUUDDRASST — ДВУУДДРАССТ  
DDAAAHT — ДДАААХТ  
DDAATTOONN — ДДААТТООНН  
DDAIЙLDS-SSS — ДДАИЙЛДС-ССС  
DDIIUYЙI — ДДИИУЙЙИ  
DDIRIDDR — ДДИРИДДР  
DDLAARR-SS-MM — ДДЛААРР-СС-ММ  
DDRIDDORST — ДДРИИДДОРСТ  
DDUU-TTU — ДДУУ-ТТУ  
DDHVAANTVULSF — ДДХВААХТВУЛСФ  
DII-LL-GG — ДИИ-ЛЛ-ГГ  
DIIMMFALGG — ДИИММФФАЛГГ  
DIISTSIDIFF — ДИИСЦИДИФФ  
DILLI — ДИЛЛИИ  
DЙYURRUULLS — ДЙЮРРУУЛЛС  
DЙYUUTT-ЙЙYU — ДЙЮУТТ-ЙЙЮ  
DLAALMMA-A-LLMA — ДЛААЛММА-А-ЛЛМА  
DLERRHLERT — ДЛЕРРХЛЕРТ  
DLLAABLLA — ДЛЛААБЛЛА  
DLLAABLLA-PLAVAFLAGMMA-A — ДЛЛААБЛЛА-ПЛАВАФЛАГММА-А  
DLIULLSSL — ДЛИУЛЛССЛ  
DLLOOM-DRUU — ДЛЛООМ-ДРУУ  
DLLUU-LLI-GLLAA — ДЛЛУУ-ЛЛИ-ГЛЛАА  
DLOOGLL-O-OLLO — ДЛООГЛЛ-О-ОЛЛО  
DLOOLLKORF — ДЛООЛЛКОРФ  
DLOURRDLL-KLUARPP — ДЛОУРРДЛЛ-КЛУАРПП  
DLUGLLEMM — ДЛУГЛЕММ  
DOЙLLIFFS — ДОЙЛЛИФФС  
DOOLLS — ДООЛЛС  
DRAAKKPAЛL — ДРААККПАЛЛ  
DRAAN-DA-RGS — ДРААН-ДА-РГС

DRAARRG-MAA — ДРААРРГ-MAA  
DRAЙЙYA — ДРАЙЙЯ  
DRIADDORF — ДРИАДДОРФ  
DROLLOSSDIRS — ДРОЛЛОССДИРС  
DROORRDOROSTS — ДРООРРДОРОСЦ  
DROUOLLFFL — ДРОУОЛЛФФЛ  
DROURRHCLASS — ДРОУРРХЛАСС  
DRRULFFUOLLFFT — ДРРУЛФФУОЛЛФФТ  
DRUOTMM — ДРУОТММ  
DRUUDDL-L-DDRAA — ДРУУДДЛ-Л-ДДРАА  
DRUULGM-MMUU-U — ДРУУЛГМ-ММУУ-У  
DRU-UF-FDOUTT — ДРУ-УФ-ФДОУТТ  
DRUUFFSS-DRAAARRD — ДРУУФФСС-ДРАААРРД  
DRUHMULUHST — ДРУХМУЛУХСТ  
DS-VVU-U-BBU-VVU-DS — ДС-ВВУ-У-ББУ-ВВУ-ДС  
DS-VVU-U-VVU-VVU-DS — ДС-ВВУ-У-ВВУ-ВВУ-ДС

KRUUIЙ-DMOUIЙ — КРУУИЙ-ДМОУИЙ  
KRUUSTORFT — КРУУСТОРФТ  
KSAAIЙ-KRAASS — КСААИЙ-КРААСС  
KSALTRAARR — КСАЛТРААРР  
KSARALL — КСАРАЛЛ  
KSKROOPR-OOP — КСКРООПР-ООП  
KSLLUURS-SSS — КСЛУУУРС-ССС  
KSPIIRLUHM — КСПИИРЛУХМ  
KSTAIЙ-SS-TAA — КСТАИЙ-СС-ТАА  
KSTRA-ROO-LLFISS — КСТРА-РОО-ЛЛФИСС  
KTRUUTTRORF — КТРУУТТРОРФ  
KULLY — КУЛЫ  
KURDAUM-GGLL-AIЙTT — КУРДАУМ-ГГЛЛ-АИЙТТ  
KUULDVUDDSS — КУУЛДВУДДСС  
KHAKKALLURST — КХАККАЛЛУРСТ  
KHEIЙFOVRLL — КХЭЙФОВРЛЛ  
LAAGGS — ЛААГГС  
LAAGGSS-SSNAAL — ЛААГГСС-ССНААЛ  
LAANGH-KRUUM — ЛААНГХ-КРУУМ  
LALL-MAA-MMA — ЛАЛЛ-МАА-ММА  
LANT — ЛАНТ  
LAOLL-GLA-UFF — ЛАОЛЛ-ГЛА-УФФ  
LAPPAAKKART — ЛАППААККАРТ  
LARTTUURFF — ЛАРТТУУРФФ  
LBOURVOMM — ЛБОУРВОММ  
LGAAILLG — ЛГААИЛЛГ  
LGALLALLT — ЛГАЛЛАЛЛТ  
LGUU-VVU — ЛГУУ-ВВУ  
LDEELLGELH — ЛДЕЕЛЛГЕЛХ  
LDIBBIRRLILLH — ЛДИББИРРЛИЛЛХ  
LDIЙIRRSLOSS — ЛДИЙИРРСЛОСС  
LDUURLIRD — ЛДУУРЛИРД  
LEERRGEIЙD — ЛЕЕРРГЕИЙД  
LEMMS-GARLLD — ЛЕММС-ГАРЛЛД  
LIDDIFFU-RRMM-OOLL — ЛИДДИФФУ-РРММ-ООЛЛ  
LIIGIЙS-SS — ЛИИГИЙС-СС  
LIЙI-FFMI-LLI — ЛИИЙ-ФФМИ-ЛЛИ  
LILLD — ЛИИЛЛД  
LIIRTUULLAA-A — ЛИИРТУУЛЛАА-А  
LIЙYU-GLLI — ЛИЙЮ-ГЛЛИ  
LIFFRY — ЛИФФРЫ  
LIЙYIЙYU-VVU — ЛИЙЮИЙЮ-ВВУ

LLAAVFM-SSS-LLI — ЛЛАВФМ-ССС-ЛИИ  
LLAA-GRUAA — ЛЛАА-ГРУАА  
LLAA-GTUR-TUU — ЛЛАА-ГТУР-ТУУ  
LLAAЙVV — ЛЛААЙВВ  
LLAA-ЙЙSS — ЛЛАА-ЙЙСС  
LLAAЙММА — ЛЛААЙММА  
LLAASS — ЛЛААСС  
LLAVOLL-DRUU — ЛЛАВОЛЛ-ДРУУ  
LLAVOLLOVALOFFT — ЛЛАВОЛЛОВАЛОФФТ  
LLAGRORULL — ЛЛАГРОРУЛЛ  
LLАЙАЙЙ — ЛЛАЙАЙЙ  
LLАЙАЙЙ-LLAA-SS-ST — ЛЛАЙАЙЙ-ЛЛАА-СС-СТ  
LLA-ИЙЙSS — ЛЛА-ИЙЙСС  
LLA-ИЙЙSS-УУУЙЙ-SSS — ЛЛА-ИЙЙСС-УУУЙЙ-ССС  
LLAISSММА-А — ЛЛАИССММА-А  
LLARIKKERAT — ЛЛАРИККЕРАТ  
LLART-T-LUU — ЛЛАРТ-Т-ЛУУ  
LLARTTUURFF — ЛЛАРТТУУРФФ  
LLDOOLLORST — ЛЛДООЛЛОРСТ  
LLDUOLLDMU-LL-ММ — ЛЛДУОЛЛДМУ-ЛЛ-ММ  
LLII-I-LDR — ЛЛИИ-И-ЛДР  
LLИЙЛИ-LL-ИЙТ — ЛЛИЙЛИ-ЛЛ-ИЙТ  
LLIILL-GGLLAA — ЛЛИИЛЛ-ГГЛЛАА  
LLIING-LLI — ЛЛИИНГ-ЛЛИ  
LLIIRTMY — ЛЛИИРТМЫ  
LLIFFT-GGLLOOSST — ЛЛИИФФТ-ГГЛЛООССТ  
LLILLIMILIFF — ЛЛИЛЛИМИЛИФФ  
LLIMMILSSTS — ЛЛИММИЛССЦ  
LLIUULLURT — ЛЛИУУЛУРТ  
LLIFFMAART — ЛЛИФФМААРТ  
LLOYЙGLLI-I — ЛЛОЙЙГЛИ-И  
LLOOKSTR — ЛЛООКСТР  
LLOOUЙ-SS-ММ — ЛЛООУЙ-СС-ММ  
LLOOFF-PEEPPT — ЛЛООФФ-ПЭЭППТ  
LLУЙЙУУ-УЙЙЛЛ — ЛЛУЙЙЮ-УЙЙЛЛ  
LLUKKULL — ЛЛУККУЛЛ  
LLUOLLSSM — ЛЛУОЛЛССМ  
LLUU — ЛЛУУ  
LLUU-VV-LLI-I — ЛЛУУ-ВВ-ЛЛИ-И  
LLUU-VVOLM-VVU — ЛЛУУ-ВВОЛМ-ВВУ  
LLUU-VVU — ЛЛУУ-ВВУ  
LLUU-VVU-LLUU-RRU — ЛЛУУ-ВВУ-ЛЛУУ-РРУ

LLUU-DFA-VVU — ЛЛУУ-ДФА-ВВУ  
LLUU-KAA-VVU — ЛЛУУ-КАА-ВВУ  
LLUU-LLU-GR — ЛЛУУ-ЛЛУ-ГР  
LLUU-LOO-VVU — ЛЛУУ-ЛОО-ВВУ

ОРФРОВОРТ — ОРФРОВОРТ  
ОРФРОВТ — ОРФРОВТ  
ОССНА — ОССНА  
ОССООССААСТ — ОССООССААСТ  
ОСТРОККОЛФ — ОСТРОККОЛФ  
ОУИЙЙ — ОУИЙЙ  
ОУЙУУУИЙУУ-ЙУУ-ЙУУ — ОУЙЮУУИЙЮ-ЙЮ-ЙЮ  
ОУЛЛГНОО-СС-СТ — ОУЛЛГНОО-СС-СТ  
ОУЛЛГНОО-S-ST — ОУЛЛГНОО-С-СТ  
ОУЛЛТМСС — ОУЛЛТМСС  
ОУРТТУННС — ОУРТТУХХС  
ОУРФФ-ГО-ЛЛУФ — ОУРФФ-ГО-ЛЛУФ  
ОУУОООНТ — ОУУОООНТ  
ОФГГ-ОМС-МУЛЛСС — ОФГГ-ОМС-МУЛЛСС  
ОФ-ОРР-ТОЙ — ОФ-ОРР-ТОЙ  
ОФФМ — ОФФМ  
ОФФООФФЕНТ — ОФФООФФЕНТ  
ОФФ-РОСС-ФЛУЙФ — ОФФ-РОСС-ФЛУЙФ  
ОХННФООННСС — ОХХФООХХСС  
РААЛЛММ-И-И — ПААЛЛММ-ИИ-И  
РААРР-ЛАЙЙЛ — ПААПП-ЛАЙЙЛ  
РААРЛИТИФФ — ПААРЛИТИФФ  
РААРРД — ПААРРД  
РААРРДЫ — ПААРРДЫ  
РАААА-ЙИТ-СС-СТ — ПАААА-ЙИТ-СС-СТ  
РАЙЛАВВР-НАЙР — ПАЙЛАВВП-ХАЙП  
РАИММ-ЛЛИФФ-СС-ММ — ПАИММ-ЛЛИФФ-СС-ММ  
РПЙЙКН-ВВУ — ПИИЙКХ-ВВУ  
РЙЙПРЙЙЛЛ — ПЙЙИППИЙИЛЛ  
РПЙЙКЛ-СС-ОО — ПИЙКЛ-СС-ОО  
РПЙЙСКЛ-Л-УУЛЛУ — ПИЙССКЛ-Л-УУЛЛУ  
РПЙЙККС — ПИЙККС

PIRAFROOGOFFT — ПИРАФРООГОФФТ  
PIRRIMIOFF — ПИРРИМИЛОФФ  
PKUOLLS-VURRLS — ПКУОЛЛГС-ВУРРЛС  
PLAAURFF — ПЛААУРФФ  
PLAVAFLAGMMA-A — ПЛАВАФЛАГММА-А  
PLAVAFLAGMMA-A-TUU — ПЛАВАФЛАГММА-А-ТУУ  
PLIISMA — ПЛИИССМА  
PLIFM-LLI — ПЛИИФМ-ЛИИ  
PLIMMILSSMIRST — ПЛИММИЛССМИРСТ  
PLIFR — ПЛИФР  
PLOULL-FOLLG — ПЛОУЛЛ-ФОЛЛГ  
PLOUFF-FOLFF — ПЛОУФФ-ФЛФФ  
PLOFF — ПЛОФФ  
PLUUBDORD — ПЛУУБДОРД  
PLUUGS-VVU — ПЛУУГС-ВВУ  
PLUSSFENT — ПЛУУССФЕНТ  
PNELEVERST — ПНЕЛЕВЕРСТ  
POILLISY — ПОИЛЛИСЫ  
POORSSOYD — ПООРССОЙД  
PRAAL-TT-UUYF — ППААЛ-ТТ-УУЙФ  
PRAANH-TT-SSS — ППААХХ-ТТ-ССС  
PPIILSSL — ППИИЛССЛ  
PROOLLINT — ППОЛЛИХТ  
PPTUURRMURST — ППТУУРРМУРСТ  
PRUYUUS-SS-MM — ППУЙЮУ-СС-ММ  
PRUU-ЙЙУ — ППУУ-ЙЙУ  
PRUURPU-VVU — ППУУРПУ-ВВУ  
PRAALLU-LAA — ПРААЛЛУ-ЛАА  
PRAIYALL-KVARS — ПРАЙЙАЛЛ-КВАРС  
PRAFAOGORRFFT — ПРАФАОГОРРФФТ  
PRIVVRIPPIID — ПРИВВРИППИИД  
PRIDD — ПРИДД  
PRIYMMIYVVYFT — ПРИЙММИЙВВИЙФТ  
PRI-I-SSM — ПРИ-И-ССМ  
PRIOLGSTO-RRGG-YAYALL — ПРИОЛГСТО-РРГГ-ЯЯЛЛ  
PROVOUDDSS — ПРОВОУДДСС  
PRO-OF-ROKLL — ПРО-ОФ-РОКЛЛ  
PROOFF-RRU — ПРООФФ-РРУ  
PROOFF-RRU-VVU — ПРООФФ-РРУ-ВВУ  
PRTTTS-SSVU — ПРТТЦ-ССВУ  
PRUBIDY — ПРУБИДЫ  
PRUIISS — ПРУИСС

PRUUISSTR — ПРУУИССТР  
PSAASS — ПСААСС  
PSIUNGRIЙИ — ПСИУНГРИЙИ  
PSUЙURTR — ПСУЙУРТР  
PSULL-MUU-MMA — ПСУЛЛ-МУУ-ММА  
PTIRRI-LL-ISTR — ПТИРРИ-ЛЛ-ИСТР  
PTIURRY — ПТИУРРЫ  
PTUUPPFURF — ПТУУППФУРФ  
PUULDDOLLOVAFFT — ПУУЛДДОЛЛОВАФФТ  
PFAUGRRS-SSS — ПФАУГРРС-ССС  
PFILIFTOMOGOFFT — ПФИЛИФТОМОГОФФТ  
PFUURG-VU — ПФУУРГ-ВУ  
PFFAARRGMII-MM-II — ПФФААРРГМИИ-ММ-ИИ  
PHIMLLIVVALLHS — ПХИМЛЛИВВАЛЛХС  
PEEPPT — ПЭЭППТ  
PEEPPTT-II-I — ПЭЭППТТ-ИИ-И  
RAAGUULM — РААГУУЛМ  
RAAKLIMA — РААКЛИМА  
RAARRVV-II-I — РААРРВВ-ИИ-И  
РАЙНТVALLT-PAAS — РАЙХТВАЛЛТ-ПААС  
RAMM-MAA-MMA — РАММ-ММА-ММА  
RANDAALL-TAЙR — РАНДААЛЛ-ТАЙР  
РАНН — РАХХ  
RBAVVARSSVIRST — РБАВВАРССВИРСТ  
RBUUBRUUSTS — РБУУБРУУСЦ  
RVELLDIFEFR — РВЕЛЛДИФЕФР  
RGIIMFLIIMFF-LMUULG — РГИИМФЛИИМФФ-ЛМУУЛГ  
RGUURR — РГУУРР  
RDUU-VVU — РДУУ-ВВУ  
REGOSPOR-DRUU — РЕГОСПОР-ДРУУ  
REGOSPORRUT — РЕГОСПОРРУТ  
RIILLS-GUUNNT — РИИЛЛС-ГУУННТ  
RIISSTDRRAALLMAA-A — РИИССТДРРААЛЛМАА-А  
RISSALBBAS — РИССАЛББАС  
RLOORGKI — РЛООРГКИ  
RLUЙFUUVVS — РЛУЙФУУВВС

You can find out more about Iissiidiology and its conceptions on the following websites:

**[ayfaar.org](http://ayfaar.org)** — It`s official Iissiidiology website. Here you can find the most complete information in all available languages about Iissiidiology and Immortality Accessible to Everyone, free books downloads, videos with Author explanations and articles. English version [www.ayfaar.us](http://www.ayfaar.us)

**[ayfaarpesni.org](http://ayfaarpesni.org)** — Ayfaar Songs-meditations website. The author calls it the «sensual part of IISSIIDIOLOGY". Because the depth of the Knowledge is laid in each song through the unconditional

heartfelt love and joy. In order to study Iissiidiology more effectively and for the harmonious development it is very important to practice the Song's meditation too.

**[iiaidc.org](http://iiaidc.org)** — This website contains information about the Idea of Altruism and Intellect Development centers.

**[iissiidiology.net](http://iissiidiology.net)** — The main objective of this project is to show how "Iissiidiology can change life" or, in other words, the application of Iissiidiology in every-day life situations. This website contains articles written not only by Oris (Iissiidiology author), but also by some of his readers.

# Contents

<b>Table of Contents .....</b>	<b>5</b>
<b>Iissiidiology as a method of cognition, or percolation method for providing information .....</b>	<b>7</b>
<b>SEXTION XIII. From Plan-Overtones of Fields-Consciousnesses to Form-Types of collective subjective Realities .....</b>	<b>16</b>
<b>Chapter 1. The skrruullerrt system interstitial states between USIP-Initiation of Information and Its confectusness.....</b>	<b>16</b>
<b>Chapter 2. The different-Qualitative Process of amplificational Self-Cognition of all Collective Cosmic Intelligences and Their Self-Consciousnesses Forms .....</b>	<b>28</b>
<b>Chapter 3. Functional interconnections among various Cosmic Form-structures and Creators-PLASMOIDS .....</b>	<b>32</b>
<b>Chapter 4. Functional interconnections between Form-Creators of Self-Consciousnesses Forms of Plan-Overtones and Subplan-Overtones of Fields-Consciousnesses.....</b>	<b>60</b>
<b>Chapter 5. Physical Plan-Overtone of Fields-Consciousnesses (TRUURRGURRDT) .</b>	<b>67</b>
<b>Chapter 6. Astral (DLLAABLLA-SVUULLMII-I) and Mental (ASSFOLL-FOLDTS-UOLDMII-I) Plan-Overtones of Fields-Consciousnesses.....</b>	<b>72</b>
<b>Chapter 7. Overtones of Fields-Consciousnesses (VAALL-VAA-KKAA) .....</b>	<b>78</b>
<b>Chapter 8. Subovertones of Fields-Consciousnesses and principles of subterransive formation of collective subjective Realities .....</b>	<b>85</b>
<b>Chapter 9. Duplex-Spheres as the fundamental informational base for generation of collective subjective Realities .....</b>	<b>97</b>
<b>Chapter 10. About simultaneous implementation of different-Qualitative development Directions in multipolarization of Focus Dynamics .....</b>	<b>119</b>
<b>SECTION XIV. The Universe is the result of focal realization of SFUURMM-Forms of Self-Consciousness of DDIIUYYI-Entity .....</b>	<b>124</b>
<b>Chapter 1. Three main constituent parts of Energy-Plasma forming Focus Dynamics of Form-Creators .....</b>	<b>124</b>
<b>Chapter 2. Complex-structured Nature of multiple manifestation of human personality</b>	<b>138</b>
<b>Chapter 3. Photoreductive Ether role in providing unpacking abilities of Focus Dynam-</b>	

ics of heterogeneous Form-Creators .....	146
<b>Chapter 4. Unity of the Main Life Forces as the base for consummatizational processes in Macrocosmos .....</b>	<b>153</b>
<b>Chapter 5. Thoughts, Feelings, and Desires informational Nature and their sllougrent implementation through Ideas .....</b>	<b>159</b>
<b>Chapter 6. Formation principles of the causal base of Space-Time in the Tertiary Universal Illusion exhibition conditions .....</b>	<b>170</b>
<b>Chapter 7. Eglleroliftive convergence mechanism of Focus Dynamics of Karmo-Forms 191</b>	
<b>Chapter 8. Amitsirational reciprocity principle between Focus Dynamics of Form-Creators of various dimension Levels.....</b>	<b>208</b>
<b>SECTION XV .....</b>	<b>222</b>
<b>The nature of Universal Cosmic Entity.....</b>	<b>222</b>
<b>Chapter 1. Basic understanding of diverse Interpretations of an infinite variety of different-Qualitative Universal Entities .....</b>	<b>222</b>
<b>Chapter 2. Twenty four conditional Branches of multipolarizational development of CCIs of Amplificational and Qualitational Vectors .....</b>	<b>229</b>
<b>Chapter 3. Internous interconnections of Idiopathic TLAASSMA-A-Ingredient of DDIIUYI-Entity with Its SSMIIYSMAA-A- and GOOLGAMAA-A-Ingredients.....</b>	<b>231</b>
<b>Chapter 4. The organization of Holochrone transmittation and modificational supplerization of Form-Creators Focus Dynamics of all Levels of Universal Illusion exhibition 250</b>	
<b>SECTION XVI. Universal Cosmic Laws and Their Principles (SLLOOGSS-LLOOGS and SLLOOYYS-SLLOO) .....</b>	<b>256</b>
<b>Chapter 1. «Laws» and Principles multiform manifestation Transcendent Nature ..</b>	<b>256</b>
<b>Chapter 2. Some of the Cosmic «Laws» and Their Principles specification, Which provide universal organization of Focus Dynamics of Form-Creators in lluvvumic birvularity type .....</b>	<b>270</b>
<b>Short glossary of iissiidiological terms .....</b>	<b>377</b>
<b>Abbreviations and terminology adopted in IISSIIDIOLOGY .....</b>	<b>379</b>
<b>Universal Cosmic Code in Russian (Cyrillic) .....</b>	<b>382</b>
<b>Contacts.....</b>	<b>427</b>
